In doing so, the Executive order confused the roles of the State Department, NTIA, and the FCC, and resulted in ad hoc coordination planning and representation. Without a clear line of authority, there is no individual in the executive branch who can exercise leadership and act as the spokesman on international communications and information policy. This situation is puzzling to the private sector, which does not know where to turn for assistance and information; to foreign governments, who already are perplexed by the division of responsibility among executive branch agencies and the FCC; and to the Congress, which is concerned with the maintenance of U.S. leadership in international telecommunications matters. No progress can be made to bolster the U.S position until we clarify the respective roles of those agencies, and reorganize the Department of State.

The United States must develop long-range communications and information goals that will protect and promote our national interests and must formulate the strategies that will insure that we successfully achieve those goals. As part of this overall effort, Congress has directed NTIA to conduct a comprehensive study of the goals, policies and strategies necessary to promote U.S. interests in international communications and information forums.

We cannot continue to rely on a disjointed ad hoc approach to international telecommunications policy development. Ratification of this treaty containing clear instructions to the Secretary of State to strengthen and improve U.S. coordination of international communications and information policy is another important step in acheiving our long-term national objectives.

Mr. PERCY. Mr. President, I urge the Senate to give its advice and consent to ratification of treaty document 97-21, an international agreement which embodies the results of the World Administrative Radio Conference (WARC) of 1979. The Committee on Foreign Relations conducted a public hearing on May 18 and approved this treaty unanimously on September 21 with a report that is available to all Members.

Mr. President, the Committee on Foreign Relations is not aware of any opposition to the ratification of this treaty by the United States from any individuals, groups, or companies. On the contrary, it has been widely supported by Government and industry, as well as thousands of amateur radio operators who wish to make use of the additional radio spectrum allocations made available under this treaty.

The WARC Treaty represents the successful outcome of the enormous and highly complex World Administrative Radio Conference held in Geneva in 1979. Despite fears that this conference would become an ideological battleground between developed and developing countries, it proved to be a highly professional and pragmatic negotiation resulting in a reasonable accommodation on most issues which protects or advances important interests of the United States. Much of that success is a tribute to the preparation and skill of the U.S. delegation to the WARC Conference, headed by Glen O. Robinson, former Commissioner of the Federal Communications Commission and now a professor of law at the University of Virginia. I commend Ambassador Robinson for his able leadership. The success of the 1979 conference is also a credit, however, to the businesslike attitude of the other delegations in Geneva. I would hope that this atmosphere, and not the more political tone of the recent conference of the International Telecommunications Union in Nairobi, will characterize future negotiations on these issues.

Members of the Senate will note that the report of the Foreign Relations Committee includes the text, on pages 4 to 6, of a series of reservations entered by the United States to the agreement at the time of signature. It is not necessary in this case for the Senate to include such reservations in the resolution of ratification since they have already been entered by the United States, but in approving this treaty we take note of the reservations and proceed on the assumption that they will continue to condition U.S. ratification and participation in this treaty.

In addition, the Committee on Foreign Relations proposes one further condition relating to the implementation of the treaty within the United States. That condition is a proviso to the effect that "the introduction of a Direct Broadcasting Satellite Service into the 12.2-12.7 GHz band shall be carried out in a manner which minimizes unreasonable disruptions to existing uses in that band." It is my understanding that the Federal Communications Commission has already taken initial steps to alleviate the concerns which prompted this proviso, so it is not expected to create any difficulties.

I do wish to note, however, that we are not suggesting by this provisio that the 12 GHz band should be entirely devoted to the direct broadcast satellite service (DBS). I understand that this part of the band may also be usable in part terrestrially to transmit high definition television, which offers a dramatic technical improvement in picture quality. The FCC will certainly want to consider this and other potential uses of the band in question as it proceeds with its allocation decisions.

While I am on the subject of provisos, let me explain to my colleagues what this term means for those who are not familiar with it. The Senate can place a range of different kinds of conditions on a treaty to which it gives its advice and consent. It can require amendments to the language of a treaty prior to its entry into force, it can insist upon reservations which otherwise change obligations assumed under a treaty, it can insist upon understandings which control the interpretation of certain parts of a treaty, it can make declarations with respect to the position of the United States on collateral matters, or it can place conditions on ratification which relate to the domestic implementation of the treaty or concern other matters affecting the relationship of the Senate and the executive branch with respect to matters raised by the treaty. All of these conditions are binding upon the President, in the sense that he may proceed with the ratification of the treaty only if he accepts the conditions included by the Senate in its resolution of ratification. However, the final category of conditions to which I alluded, those with domestic or interbranch implications, are what we have recently come to call provisos. They do not involve the international obligations or diplomacy of the United States and, therefore, are not matters of direct concern to the other government or governments who are parties to the treaty in question. For that reason, they need not be included in the instruments of ratification which are formally deposited or exchanged with other governments in the act of bringing the treaty into force. But, as I said earlier, they are nevertheless fully binding upon the President and the executive branch if he chooses to go forward with ratification.

With this description in mind, I would note the second proviso included in the resolution of ratification at the initiative of Senator HARRISON SCHMITT. Senator SCHMITT has repeatedly expressed his concern that the Department of State is not effectively organized to deal with the long-range policy questions raised by this treaty. Initially, he requested that the Senate take no action until after the meeting of the International Telecommunications Union in October. We have clearly complied with that request. The Senator has also asked that we include language reflecting his concern in the resolution of ratification, and that is the purpose of the second proviso.

I think the Senator's point is well taken. The importance of these issues has grown enormously during the past several years in both economic and political terms. Telecommunications has become one of our leading growth industries and a major source of export

earnings and jobs. It will also be a subject of major international negotiations during the next decade. I can assure Senator SCHMITT that the Foreign Relations Committee will continue to take a particular interest in this field and that we will follow closely the efforts of the Department of State—as called for in this resolution of ratification—and the executive branch in general to strengthen our capabilities in this area. I know we can look forward to close cooperation with the Commerce Committee on these matters.

Mr. President, the WARC treaty is an important and valuable agreement. I urge my colleagues to join me in giving it their advice and consent.

Mr. HOLLINGS. Mr. President, although I support ratification of the World Administrative Radio Conference treaty of 1979, I am extremely concerned about our ability to succeed in future meetings before the International Telecommunications Union (ITU) and other international telecommunications bodies. We have gone from a dominating force in international telecommunications to a Nation always on the defensive. We cannot afford to muddle through here when our telecommunications and information needs are so great.

Prior to the boom in telecommunications, the meetings of the ITU were primarily technically oriented. In such an atmosphere, our engineering skill served us well, and we were successful in obtaining what we needed. However, in the past few years, the entire tenor of this and other international telecommunications bodies has changed: A premium is now placed on political matters. In a one-country-one vote situation, our problems are obvious.

This, of course, does not mean these problems are insuperable. It does mean that we will have to work much harder to be successful. Unfortunately, our Government has not reoriented itself fully to operate in this new environment.

Proof of our lack of sufficient commitment in these international arenas is not difficult to find. One only has to look at how we fared at the just completed ITU Plenipotentiary in Nairobi. Our delegation, while certainly technically talented, was far too new to international telecommunications diplomacy. In addition, the time given to prepare for this meeting was woefully short. Despite the hard work of this delegation, we lost several key votes, defeats that could likely have been prevented.

It is all too evident that a change is required. We in the Senate and my colleagues in the House have indicated time and time again that a further commitment by the Federal Government to protecting our telecommunications and information interests overseas is essential. The executive branch should take the resolution by Senator SCHMITT as a strong signal that something must be done.

The PRESIDING OFFICER. The question is on agreeing to the resolution of ratification on treaty document No. 97-21, Radio regulations (Geneva, 1979), and final protocol, as amended. (Putting the question.)

The PRESIDING OFFICER. Two-thirds of the Senators present having voted in the affirmative, the resolution of ratification, as amended, is agreed to.

LEGISLATIVE SESSION

Mr. BAKER. Now, Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended until no later than 4:30 p.m. under the same terms and conditions as previously ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Mr. (HAYAKAWA). Without objection, it is so ordered.

MEASURES ON THE CALENDAR

Mr. BAKER. Mr. President, there are two measures that are cleared on this side for action by unanimous consent. May I inquire of the minority leader if he is ready to consider them on that basis? One is a House message on Senate Joint Resolution 271, making technical corrections in banking statutes which the chairman of the Banking Committee and the ranking member have no objection to. The other is establishing dates for submission of the Budget and Economics Report.

Mr. ROBERT C. BYRD. There is no objection on this side.

Mr. BAKER. I thank the Senator.

TECHNICAL CORRECTIONS IN BANKING STATUTES

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on Senate Joint Resolution 271.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the resolution from the Senate (S.J. Res. 271) entitled "Joint resolution to make technical corrections in certain banking and related statutes," do pass with the following amendments:

(1) Page 2, line 13, strike out "[(a)]".

(2) Page 2, strike out lines 18 through 28, inclusive.

(3) Page 15, strike out lines 6 through 32, inclusive, and insert:

SEC. 18. The last proviso of section 5136 Seventh of the Revised Statutes (12 U.S.C. 24 Seventh), as amended by section 404(b) of Public Law 97-320, is amended by striking out "10 per centum of its" and inserting in lieu thereof "10 per centum of the association's".

(4) Page 19, strike out all after line 31 over to and including line 18 on page 20.

(5) Page 20, line 19, strike out "[34.]", and insert: "33".

Mr. PROXMIRE. Mr. President, I would like to address a question to the distinguished manager of the bill and the chairman of our committee. It is my understanding that the House of Representatives, for some inexplicable reason, has deleted a provision authorizing so-called banker's banks chartered by the Federal Government to provide services to bank-holding companies as well as to depository institutions. This deletion is most unfortunate and will place needless restrictions in banker's banks in at least six States where they have been chartered including Wisconsin, Colorado, Texas, Nebraska, Ohio, and Minnesota. I would like to ask the chairman what action he foresees we might take on this matter.

Mr. GARN. I share the Senator's disappointment, and that of Senators TOWER and ARMSTRONG and other colleagues, that this provision was deleted from the bill. To my knowledge, there is no controversy with regard to this provision, nor is there any opposition. I simply cannot understand why the House deleted it. Unfortunately, because we will be adjourning within the next few hours, there is little we can do but to accept the House action. However, it would be my intention to attach this provision to the first available vehicle reported by the Banking Committee next year.

Mr. PROXMIRE. Mr. President, I thank the Senator for his concern and support.

Mr. GARN. Mr. President, I regret that these changes were made in the House version, but at this late date, we have no alternative but to accept them.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments.

The motion was agreed to.

ESTABLISHMENT OF DATES FOR SUBMISSION OF BUDGET AND ECONOMIC REPORT

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate immediately proceed to the consideration of House Joint Resolution 635, establishing the dates for submission of the budget and accounting report.

The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A House joint resolution (H.J. Res. 635) establishing the dates for submission of the Budget and Economic Report.

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read the second time by title.

Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution (H.J. Res. 635) was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. I move to reconsider the vote by which the resolution was agreed to.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended not past the hour of 5:30 p.m. under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROPOSED CUTBACKS IN NUTRITION PROGRAMS

Mr. LEAHY. Mr. President, I was dismayed, although not surprised, to read in the Washington Post last week that the Department of Agriculture has submitted proposals for deep, new reductions in the food stamp and child nutrition programs to the Office of Management and Budget as part of its fiscal year 1984 budget plan. While these proposals do not represent the last word on the President's budget for fiscal year 1984, it is unlikely they will improve once OMB completes its review of them. Thus, I think we can safely expect that the President's fiscal year 1984 budget will once again propose food and nutrition reductions well in excess of $1 billion.

I cannot condemn these proposals in strong enough terms. At a time when reports of human hunger and suffering across the country are reaching epidemic proportions, the Reagan administration appears ready to again take from those who can afford it the least. Even as Congress now adds additional funding into the continuing resolution to meet emergency food and shelter needs, the Reagan administration is preparing legislation to slash benefits for these same people a few months hence. Such proposals show an incredible insensitivity to the real needs of recession plagued Americans.

Food and nutrition programs have already been hard hit by the budget cutbacks of the past 2 years. In 1981, the food stamp program was cut $2.3 billion or about 20 percent. Child nutrition was cut $1.5 billion or 30 percent. In 1982, food stamp reductions of $1.9 billion over a 3-year period were enacted on top of the 1981 changes.

The administration's proposals are nothing new. Virtually all, or a variation thereof, have been rejected by the Congress in the past 2 years. These are tired, misdirected proposals that do not improve with repetition.

In food stamps, USDA's major cutback proposal is to cut benefits across the board for a savings of about $650 million. Virtually all households, including those with incomes well below the poverty line, would be hurt. No doubt many persons now waiting in soup lines around the Nation because their food stamp benefits do not go far enough would lose several dollars more a month under this proposal.

Another food stamp proposal in the USDA plan is elimination of the $10 minimum benefit. This proposal was flatly rejected by Congress this year. Of the roughly 200,000 households that would have their benefits eliminated under this proposal, about 80 percent include an elderly or disabled member. Many have gross incomes well below the poverty line.

In the child nutrition area, the administration hopes to achieve several hundred million dollars in savings by putting the child care food, summer food service, and school breakfast programs in a block grant at sharply reduced funding. These are the very child nutrition programs with the highest concentration of low income participants. These programs were already cut sharply in the 1981 legislation, and it is highly inappropriate to slash them further now.

In the coming weeks, we will learn more of the details of the President's budget. As ranking minority member of the nutrition subcommittee, I hope to keep my colleagues informed about what is being proposed and what its impact will be. It is my own view that nutrition programs have been given sufficient scrutiny in the 97th Congress that they would benefit from benign neglect in the next year or two. Other than to perhaps meet the burgeoning demand for assistance spawned by the deepening recession, I would hope to avoid major legislative changes in the current Federal nutrition programs during the 98th Congress.

I ask unanimous consent that a copy of the December 15 article in the Washington Post describing USDA's budget proposals be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 15, 1982]

BLOCK SAID TO PROPOSE $1 BILLION CUT IN FISCAL 1984 FOOD STAMP PROGRAM

(By Spencer Rich)

Agriculture Secretary John R. Block has proposed cutting the food stamp program by another $1 billion in fiscal 1984, sources said yesterday.

In a Sept. 17 letter to the Office of Management and Budget, Block also proposed folding a number of child-feeding programs, including school breakfasts, the summer feeding program and the Child Care Food Program, into a single block grant.

In addition, Block suggested eliminating food aid to day care facilities in private homes, as well as canceling his department's funding of school nutrition programs operated by the Defense Department and the Interior Department's Bureau of Indian Affairs.

These cuts could reduce outlays for child nutrition programs by several hundred million dollars, unless they are made up by other agencies, according to program experts.

The new food stamp cuts would be on top of substantial reductions that Congress has approved in the program over the past three years. Congress has tentatively approved a fiscal 1983 budget for the program of $10.8 billion, or about 20 percent below the level before President Reagan took office, according to one expert.

The OMB refused to discuss any details of the Block proposal, but one source said, "There has been an awful lot of discussion since Sept. 17," and Block's proposals may have been altered substantially since then.

The biggest cut proposed by Block would increase the "benefit reduction rate" from 30 percent of a recipient's net income to 33.3 percent. Under this proposal, a family's current annual benefits would drop by an amount equal to 3.3 percent of its net income, after certain deductions are made.

A family of three with an annual gross income of $6,100 would see their monthly allotment of $99 worth of stamps cut to $88; an elderly couple with $475 a month in Social Security income, now getting $264 a year in stamps, could be cut to $120 a year.

Although Block did not cite any savings figure, one expert estimated that the proposal would reduce benefits by at least $650 million.

A second proposal would simplify and combine certain deductions from income now allowed in the program, and, according to Block, provide "some benefit reductions."

A third would give states a fixed block grant for administering the program at the local level, thus saving the federal government added expenditures if state administrative costs exceeded the grant.

A fourth suggestion would eliminate any benefit under $10 a month, a proposal that the Reagan administration made last year but Congress has failed to approve. Block said this would affect only households at the upper end of the eligibility scale. However, experts said that under certain conditions, it could mean a person with income as low as $285 a month could lose all his benefits and it could hit elderly and disabled persons heavily.

A fifth proposal would give persons on Supplemental Security Income cash in lieu of food stamps.

FEDERAL NUTRITION PROGRAMS

Mr. LEAHY. Mr. President, before the Senate adjourns, I would like to briefly comment on Senate Concurrent Resolution 121. Basically, this resolution expresses the sense of Congress that the current array of Federal nutrition programs should be maintained at their current levels of sup-

port. I am both pleased and gratified that 54 Senators have joined Senator DOLE and myself as cosponsors of this resolution.

I think that this resounding display of support for Senate Concurrent Resolution 121 indicates how strongly Members of the Senate believe that there should be no turnback of child nutrition programs to the States. Only the lack of time and our hectic schedule prevented the Senate from officially ratifying this resolution in the closing days of this session.

I should point out that the Senate expressed approval of the thrust of Senate Concurrent Resolution 121 when it passed the conference report on the Agriculture appropriations bill, H.R. 7072. The statement of managers to that conference report adopted language very similar to Senate Concurrent Resolution 121:

The conferees feel that: (1) national efforts to reduce hunger and malnutrition should continue; (2) a national commitment to vital nutrition programs should continue; (3) the Federal Government should retain primary responsibility for child nutrition programs; and (4) State and local governments should be given increased responsibility for formulation and implementation of regulations governing such child nutrition programs.

Similarly, the House has approved House Concurrent Resolution 384, which states in even stronger terms that current Federal nutrition programs should be neither turned back to the States nor converted to block grants. Thus, both Houses of Congress have clearly and unequivocally expressed their positions on this issue.

I might add, for those concerned about this issue, that support for retention of Federal nutrition programs is not inconsistent with a belief that States and localities should gain increased control over education programs. While programs like school lunch and breakfast do greatly enhance the educational process in our schools, they really are not educational programs per se. When the Department of Education was established several years ago, the child nutrition programs remained within USDA jurisdiction. State and local educators and parents are not clamoring for greater control over school lunch. It is not the same issue as controlling the local school curriculum. There already is a great deal of flexibility at the local level as to how to organize feeding programs and what menus to serve. The real issue in child nutrition programs is a stable source of resources to operate effective programs.

I sincerely hope that the President, the Governors, and other State and local officials concerned with developing New Federalism proposals will take note of Congress position on these programs. The inclusion of child nutrition programs in any turnback proposal would be pointless and could be counterproductive to the passage of any New Federalism initiative. I respectfully suggest that those involved in formulating such a package make a realistic assessment of congressional will on child nutrition programs and revise their plans accordingly.

FREE THE SENATE 100

Mr. LEAHY. Mr. President, the meeting of the Free the Senate 100 Committee this afternoon will be delayed until right after the Free the Press Corps 195 Committee meets this afternoon.

Mr. BAKER. The Senate should know, however, Mr. President, that the Sergeant at Arms has been alerted to the possibility of a jail break.

Mr. LEAHY. It was reported that there was a rope of knotted sheets hanging out of the caucus room window. The Segeant at Arms should go up there because some of us are thinking very seriously of escaping. He should be alerted to that, too.

Mr. BAKER. I thank the Senator for his warning.

JUNTA PATRIOTICA CUBANA STATEMENT TO THE ORGANIZATION OF AMERICAN STATES

Mr. SYMMS. Mr. President, I ask unanimous consent to have printed in the RECORD a statement presented to the Organization of American States by the Junta Patriotica Cubana regarding OAS policy toward Cuba, the Symms amendment, and Radio Marti.

There being no objection, the statment was ordered to be printed in the RECORD, as follows:

JUNTA PATRIOTICA CUBANA,
(CUBAN PATRIOTIC BOARD),
Washington, D.C., November 15, 1982.

HONORABLE CHAIRMAN OF THE TWELFTH SESSION PERIOD OF THE GENERAL ASSEMBLY OF THE ORGANIZATION OF AMERICAN STATES (OAS),

HONORABLE MINISTERS FOR FOREIGN AFFAIRS, HONORABLE AMBASSADORS, REPRESENTATIVES OF THE AMERICAN STATES.

DISTINGUISHED REPRESENTATIVES OF THE AMERICAS: We take pleasure in addressing you, in the exercise of a legitimate right, and in your capacities of Representatives of Member States, in this Twelfth Session Period of the General Assembly, and through your mediation we address the governments and peoples of the Americas, in our condition as representatives of the Cuban Patriotic Board, an entity that encompasses the majority of Cuban organizations, which guarantees its representative capacity, and we respectfully state to you:

That the Cuban State, from which we proceed, is a part of the Inter-American System and a member of the Organization of American States (OAS), which in turn is an organization made up by States, not by governments. What is excluded, in accordance with the stipulations in the Reciprocal Assistance Treaty (also known as "Treaty of Rio") and by the Resolution passed by the Eighth Consultation Meeting of Ministers of Foreign Affairs, assembled at Punta del Este, Uruguay, in 1962, is the present Marxist-Leninist government of Cuba, because of it having been declared incompatible with the Inter-American System.

The Cuban State has signed, together with the American States that you represent, the treaties, covenants, agreements and resolutions presently in force within the Inter-American System. You and we have "freely agreed, but become bound by the agreement"—Pacta Sunt Servanda—as stated by the Father of International Law, P. Francisco de Vittoria. We, in the name of the Cuban State, come to request the compliance with those obligations. "We are the Voice for Those Who Have No Voice".

You, gentlemen who are the Representatives of the Americas, so zealous for the application of the Treaty of Rio to the case of the Malvinas, are expected to be as zealous for the application of same Treaty of Rio to the case of Cuba, in order to be consistent with the history and tradition of the Americas and faithful to its national heroes.

The extra-continental power that threatens the peace and security of the Americas is the Soviet Union, that has subjugated and enslaved the people of Cuba, through the action of a surrogate government and the use of armaments and terror.

The Cuban State is one and indivisible, and its rights must be protected by the other Member States of the Organization of American States (OAS), according to stipulations in the treaties, covenants, agreements and resolutions presently in force.

The following was stated at the Seventh Consultative Meeting of the Ministers for Foreign Affairs of the Americas, assembled in accordance with the Treaty of Rio, at San José, Costa Rica:

"1. The intervention or threat of intervention, including the conditional ones, on the part of an extra-continental power, in the internal affairs of any American Republic, is hereby condemned by us, and we underline that acceptance of a threat of intervention by an extra-continental power, on the part of any American State, endangers the solidarity and security of the Americas, which forces the Organization of American States (OAS) to condemn it and to reject it with a similar energetic posture."

Nobody doubts that Castro's satellite government has "accepted the threat of intervention by an extra-continental power" (the Soviet Union) and that it has "endangered the solidarity and security of the Americas." That "acceptance", that "threat" and the intervention by an extra-continental power (the Soviet Union) are now greater, more militant and much more serious than at the time when that agreement was taken.

The above situation, that is certain regarding Cuba, is happening in an accelerated manner regarding Nicaragua, which proceeds in the direction of a Marxist-Leninist totalitarian regime, subservient to that of the Soviet Union. Both countries serve as bases for the ideological, political and military subversion, for terrorism and for the destabilization of other American States, such as El Salvador, Guatemala, Honduras, Costa Rica, Colombia and Peru, among others.

The Eighth Consultative Meeting of Ministers for Foreign Affairs, assembled in Uruguay in accordance with the Treaty of Rio, passed Resolution VI, which declared that "Marxist Doctrine is Incompatible With the Inter-American System." And that stated incompatibility has not been revoked, it is presently in force. If we wish to be respected throughout the world, we must enforce our treaties and Resolutions.

At the Ninth Consultative Meeting of Ministers for Foreign Affairs, convoked in accordance with the Treaty of Rio and assembled in Washington, in 1964, the following was agreed upon:

"1, That the present government of Cuba, since its installation in 1959, has developed, supported and conducted in several manners a policy of intervention in the Continent of the America, with methods, propaganda,

provision of funds, training for sabotage and guerrilla operations, supply of armaments and aiding those movements tending to the subversion of national institutions, through the use of force, in order to install communist regimes. . ."

"That the assistance to subversion generally adopts the form of a political aggression. . ."

The Ninth Consultative Meeting agreed upon the following:

"a. To condemn the present government of Cuba as an aggressor and because of its intervention in the internal affairs of other States, violating their territories and their sovereignty. . ."

That condemnation against the present government of Cuba is still in force, and is now even more obvious than it was then the necessity of its compliance, because the satellite regime of Cuba has ridiculed the American States and has continued intervening in the internal affairs of other States of America and violating their sovereignty. To the sanctions that were applied then—among others the economic embargo, that must be maintained—there must be added the extreme measures contemplated in the Treaty of Rio: "The use of armed force", if we want to be consistent with our own destinies.

Cuba is presently a Soviet arsenal, a base for subversion, a satellite of the Soviet Union, which unabashedly attacks and threatens the American States. It exports communist subjugation, because the very nature of its regime and its goals, that it has not hidden, are those of enslaving the peoples of this Hemisphere, submitting them to the Soviet imperialism.

The Soviet Union has delivered to Cuba, during the past year, over 64,000 tons of armaments, which not only have served to arm one million of Cuban militiamen, but for export to Nicaragua, Grenada and the communist guerrillas in El Salvador, Guatemala, Honduras and Colombia, as well as other countries in the Americas.

Cuba has a base for nuclear submarines at Cienfuegos Bay, where Soviet submarines have already been repaired. It also has over 200 Mig-23 & Mig-27 warplanes, submarines and warships of other kinds, and modern combat stations, staffed by Soviet personnel, to interfere and detect communications in the Americas.

Thousands of Soviet military personnel are stationed in Cuba, in an organized brigade made up by elite Soviet military forces.

Cuba utilizes its naval facilities for drug trafficking and uses contraband vessels to transport armaments for Colombian and other guerrillas in the Hemisphere, as it has already been proven.

The objective of the Soviet Union, an extra-continental power, through its satellites in Cuba and Nicaragua, is seizing power in each of the American nations. And this is an objective that is not negotiable or susceptible for settlement. Because of tactical conveniences, it might agree upon "peace" in Central America, in the same fashion that Hitler did at Munich, and American Chamberlains will not be lacking, ready to let themselves be deceived, thus betraying the destinies of their peoples and the future of the Americas.

José Martí, the Apostle of Cuban independence, said: "Witnessing a crime in silence is equivalent to committing it."

Human rights are universal values, indivisible in their force, maintenance and defense, and no discrimination can be committed in denouncing violations of same.

Human rights violations in Cuba have been institutionalized; they are consecrated in its constitution and its laws, and are daily practice throughout the country, but most especially in the communist dungeons, where a "cruel, inhuman and degrading" treatment is applied, which has been stated by the Inter-American Commission on Human Rights, that has been and still is competent to continue dealing with violations of human rights in Cuba.

The present political imprisonment in Cuba is the longest and most cruel that has been recorded in the Americas. Those political prisoners who are called "Plantados" (those who have stood up to the government by not submitting to communist indoctrination) are submitted to physical and psychic tortures. A majority of them is kept in walled-up cells, at the section termed "the End of the World", at the prison of Boniato, province of Oriente. Thirty-three of them have declared a hunger strike and their lives are endangered, if appropriate measures are not taken to prevent their deaths. We hope that this Assembly will listen to the outcry from those men and women of America who are fighting for mankind's dignity & freedom, in our hemisphere and throughout the world.

Cuba is nothing but a prison, and there are thousands of Cuban men and women in prisons and concentration camps, at forced labor. There is one million Cubans in exile. All of them expect from their American brethren the indispensable cooperation in order to return independence and freedom to Cuba.

We finally state:

That the Tenth Inter-American Conference, held at Caracas, Venezuela, in 1954, agreed upon Resolution XCIII, reading as follows:

"The domination or control of political institutions in any American State by the International Communist Movement, extending into this Hemisphere the political system of the extra-continental power, shall constitute a threat to the sovereignty and political independence of American States; it endangers peace in the Americas and would force us to convoke a Consultative Meeting in order to consider the adoption of an appropriate action, in accordance with the existing treaties."

That the Charter of the Organization of American States, passed in Bogota, Colombia, on May 2, 1948, Article 19, reads thus:

"Those measures taken for the maintenance of peace & security, in accordance with treaties in force, are not constitutive of violations of the principles stated on Articles 15 and 17." (That is, these measures do not infringe upon the principle of non-intervention).

And we request:

1. The convocation of a Consultative Meeting of Ministers for Foreign Affairs of the Americas, in accordance with the Treaty of Rio, in order for said Treaty to be applied to Cuba, most especially its Article 8, that authorizes "the use of armed force."

2. That the incompatibility of Marxism-Leninsim with the Inter-American System be maintained. "Communism is not negotiable in this Hemisphere."

3. That this organization, the Cuban Patriotic Board (Junta Patriotica Cubana) be recognized and accepted as the legitimate representative of the Cuban State, since the present government of Cuba is excluded from the Inter-American System and the Organization of American States.

4. That the Institutional and Factual violations of human rights in Cuba be denounced, in accordance with the American Declaration of Rights and Duties of Man.

5. That the satellite regime of Cuba be declared as a participant and culprit in the trafficking of narcotics in America.

6. That the year 1983 be declared as the Year of the Fight in the Americas Against Communism, and for Freedom and Democracy.

7. That the economic embargo against Cuba be maintained and enforced by all American Nations, as it was accorded for he compliance with the Treaty of Rio.

8. That the Organization of American States designates from within itself a Committee for Decolonization of Cuba, in order to free the island from Soviet colonialism.

9. That the Soviet Union be forced to withdraw its occupation troops from the territory of an American State (Cuba), and that it also withdraw all armaments introduced in Cuba, Nicaragua & other American countries.

10. That the Organization of American States designates a Commissioner for Political Refugees, since this problem affects already millions of persons in the Americas.

11. That the Organization of American States declares that there cannot be freedom for the whole (the Americas) while freedom does not exist in each one of its components, such as Cuba, submitted to the colonialism of an extra-continental power (the Soviet Union).

12. That the Organization of American States declares that there cannot be independence for the whole (the Americas), unless there will be independence in each one of its components, such as Cuba.

13. That it be declared by the Organization of American States, that there is no freedom of the press, nor religious, nor that for the organization of labor unions, nor for expression, nor for travel, and that liberty, integrity and life of persons are not respected in Cuba.

14. That it be declared by the Organization of American States that coexistence with the satellite regime of Cuba is contrary to the principles and values of the Inter-American System.

15. That it be declared by the Organization of American States that Cuba is a country aligned with the Soviet Union and a satellite of same.

16. That it be declared by the Organization of American States that Cuba is not a signatory to the Treaty of Tlatelolco against proliferation of nuclear armaments, because it maintains its territory open to Soviet nuclear arms, as it did publicly in 1962 during the so-called Nuclear Missile Crisis, in which opportunity it endangered the peoples of Cuba and the Americas.

17. That it be declared by the Organization of American States that the communist government of Cuba continues to execute its political opponents. On October 1st, 1982, Armando Hernandez, 35, and Ramon Toledo, 41, as well as 27 other political prisoners, were executed at the execution wall in the Fortress of La Cabaña, La Habana, and executions are going on unabated. We demand from this General Assembly to ask the Castro regime to stop executing its political adversaries.

18. That the Organization of American States cooperate to the compliance with the Joint Resolution of the United States Congress (the Symms Resolution) in which it is expressed that "the United States is committed to fight, together with the Organization of American States and with freedom-loving Cubans, to attain self-determination for the Cuban people."

19. That the Organization of American States cooperate and welcome to the installation of "Radio Martí", to convey the truth to the Cuban People.

We place our demands in your hands, distinguished Ministers for Foreign Affairs of the Americas, Ambassadors and other representatives. We have fulfilled and shall con-

tinue to fulfill our duties, and we expect of you to fulfill yours, in keeping with the tradition and history of the Americas, for the peace and security of the Americas and the liberation of Cuba.

We sign in representation of the Cuban Patriotic Board.

GOODBY AGAIN—AND SOMEHOW WE ARE OLDER

Mr. SYMMS. Mr. President, I have often been an outspoken critic of the media, because I do believe that many members of the Fourth Estate are sometimes out of touch with reality and the mood of the country, permitting their own biases to interfere with the objective reporting of the news. But I also have great respect and admiration for members of the media who observe the high standards of their profession, always striving to be accurate and fair.

Steve Ahrens, political editor and columnist for the Idaho Statesman in Boise, is one of the best journalists I have ever known and dealt with. Over the last 15 years he has covered every major political story in my State, always enlightening and entertaining his readers, sharing the information and knowledge he has acquired without slanting the story or twisting the facts.

I have not enjoyed all of the stories Steve has written, but he has never been guilty of a distortion or a cheap shot. I am going to miss his byline in the Statesman as he moves on to a new career in corporate public affairs. I join his friends and colleagues in wishing him well, and I ask that the following article—a "goodby" tribute by Tim Woodward of the Statesman—be placed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Idaho Statesman, Dec. 2, 1982]

GOODBYE AGAIN—AND SOMEHOW WE ARE OLDER

(By Tim Woodward)

A chapter is closing here at The Statesman. Soon, for the first time in most of our memories, there won't be a Steve Ahrens aboard this train.

For those of you who missed the announcement in Tuesday's paper, Ahrens is leaving journalism for corporate politics. He was the political editor and columnist here for seven years. Before that he was the news editor, and before that he was the city editor, and before that he was the state editor, and before that I don't know. He was state editor when I came aboard, 11 years ago.

Ahrens did many things during his 15 years here, but one accomplishment towers above the rest. It was the focal point of his career at The Statesman, the surpassing glory of his years in the Fourth Estate, and the thing for which history will honor him above all else he did or will do in his years on this Earth. He hired me.

Aside from this achievement, which speaks for itself, I will refrain from mentioning his professional abilities. We haven't worked together in a decade. When I was a rookie in the Canyon County bureau, though, Ahrens was my boss. On my first day, he drove me to Nampa and Caldwell and personally introduced me to the government officials whose offices I would be infesting. Each week he meticulously critiqued my stories. If a story pleased him, he put a note of approval on the wire. If it didn't, we discussed it privately.

When he learned that I needed a protective case for my camera, he bought one and wouldn't let me pay him back. I had been on the job only a short time when he, the boss, invited me and my wife to dinner. In the months ahead he invited us to picnics, sports events, parties. he got me my first promotion, fought for my early pay raises.

A funny thing happened during that time in Canyon County, a thing I still like to kid him about. One day he sent a wire directing the bureau reporters to be on the lookout for weather pictures. (Bureau reporters doubled as photographers.) That afternoon I noticed two elderly men playing golf in a blizzard. The snowflakes were the size of half dollars. I took the pictures, shipped the film to Boise, and confidently waited to see the results in the morning paper. A week passed without a sign of them. Then I got the negatives back in the mail. Attached to the negatives was a note:

"Tim: These are nice pictures of these golfers, but we can't use them. There are black spots all over the negatives."

He had mistaken my prodigious snowflakes for defects in the film. I mention this primarily for the benefit of his future employers, so they will have something in reserve in the event that his exalted new position makes him uppity.

In looking back on those days, it is difficult in one way to believe that they were as long as they were. In one way the memories seem only a few years old—five or six at most. In another way, they seem to belong to another century.

In the computer age, the machine Ahrens used to send his wires is but a moldering dinosaur. The old bureau has long since been converted to an insurance office. Its successor was destroyed by fire, and even that calamity seems part of the distant past. Most of the people we worked with and caroused with and called our friends are gone. A few are in their graves.

In the 11 years since Ahrens risked his reputation for sanity on the new man in Canyon County, we have watched more than a hundred people go out the door for the last time. Of these, four have retired and four are dead. Of the remainder, four have unequivocally improved their situations, in my opinion. Mindy Cameron is an editor at the Seattle Times. Bill Burnett is an editor at the San Francisco Examiner. Two others are editors at the Chicago Tribune. Many have left journalism for better-paying jobs in related fields. For some this has constituted an improved situation. For others it has constituted a slow death.

A hundred people gone! Where are they now, those gray heads we turned to with our youthful questions? Where are the John Corletts, the Walter Johnsons, the Bob Lorimers? Of the crew that grappled with the news in my rookie days, only eight are left. Of 57 people on the current roster, I am senior to all but seven. It's odd; I don't feel senior at all.

And now Steve Ahrens, who gave me my start and would always be around, is saying his goodbyes. Somehow it makes the rest of us seem older. Not senior, just older.

Enough. I'll hobble home now, to my rocker and my warm milk.

HOUSE CONCURRENT RESOLUTION 153, AUTHORIZING A BUST OR STATUE OF DR. MARTIN LUTHER KING, JR., TO BE PLACED IN THE CAPITOL

Mr. KENNEDY. Mr. President, I commend my colleagues on the adoption of the concurrent resolution authorizing a bust of Dr. Martin Luther King, Jr., to be placed in the Capitol.

This tribute to Dr. King is especially timely now, when fundamental rights, such as the right to open housing and the right to intergrated schools—issues for which Dr. King literally gave his life—are threatened more seriously than at any time in the recent history of this land. In the struggle of this time, let us recall the words of Dr. King himself:

> However difficult the moment, however frustrating the hour, it will not be long, because truth pressed to Earth will rise again.

In Dr. King's last address, the day before his death, he said that he had been "to the mountain top." He spoke of his vision that true equality for all people in America could be achieved.

In commemorating Dr. King with a place of honor in the Capitol, we bring his vision a little closer to fulfillment. This recognition of Dr. King will foster a greater national awareness of his life and a greater national commitment to the achievement of his dream. He belongs to the ages, and his bust belongs in the Capitol, beside the other giants of our history.

CONTRACT SERVICES FOR DRUG DEPENDENT FEDERAL OFFENDERS ACT AMENDMENT OF 1981

Mr. KENNEDY. Mr. President, the enactment of H.R. 3963 is a significant step forward in the continuing war against crime. The act contains the Justice Assistance Act, which is an important demonstration of Congress commitment to assist States and localities in their struggle against the rising tide of violent crime.

The magnitude of the crime problem in the neighborhoods of our Nation is staggering. In Massachusetts, the epidemic of violent street crimes in some neighborhoods is so serious that law-abiding residents are prisoners in their own homes, paralyzed with fear. I recently received an impassioned plea from the residents of Dorchester and Roxbury, who are being victimized by the activities of a sophisticated drug ring in their neighborhoods. The reduced budgets of the local police and the effective organization of a well-financed drug trafficking operation have combined to create a sharp in-

crease in violent crime in these neighborhoods.

Mothers are afraid to leave their homes to buy groceries for their families. Older residents are reluctant to answer the doorbell, for fear of being shot and killed, as one of their neighbors was recently. Young pesons are corrupted by drug dealers who will pay $200-400 per week to any youth who will act as a lookout and warn the pushers of approaching police.

Between January 1981 and October 10, 1982, a single street in Roxbury was the scene of 4 murders, 15 assaults, 12 burglaries, 20 street robberies, 21 thefts from cars, and 27 stolen cars.

This act authorizes much-needed Federal financial assistance to develop effective anticrime programs to deal with crime outbreaks such as those in Dorchester and Roxbury. It is an essential part of a war on crime, and I urge the administration to assure that the funds authorized by the act are appropriated.

The act also strengthens the sanction of criminal forfeiture as a penalty for drug trafficking and racketeering, and establishes a "drug czar" to develop policy and coordinate Federal drug enforcement. Also included are provisions of the Armed Career Criminal Act, which expands Federal jurisdiction to cover robberies and burglaries which violate State law. We should be cautious about expanding Federal crime jurisdiction, because of the enormous responsibilities placed upon Federal law enforcement by current law and the charges of interference with local law enforcement. However, the problem of violent crime in America is so serious and the evidence of the high percentage of violent crime perpetrated by career criminals is so compelling that I support these armed career criminal provisions, which include the amendment I offered to require that Federal jurisdiction can be exercised only upon the request or concurrence of the local prosecutor.

Finally, the bill responds to the recent horrifying episodes involving contamination of Tylenol by creating a new Federal antitampering offense.

This act contains several important law enforcement tools. But the act is also significant for the needed law enforcement tools which it does not contain. Foremost among these are bail reform and sentencing reform. On September 30, 1982, the Senate passed S. 2572, the Violent Crime and Drug Enforcement Improvements Act of 1982, by a vote of 95 to 1. This bill contains reforms of Federal bail and sentencing laws which I have worked on for several years with my colleagues on the Judiciary Committee.

In my view, the sentencing reform contained in S. 2572 is the most important reform we can make in Federal criminal law. It would replace the existing nonsystem of sentencing with a rational scheme including certainty of sentencing, guidelines to eliminate disparate sentences, abolition of parole, and appellate review of sentences.

With respect to bail, S. 2572 also contained essential reforms. For the first time, judges would be permitted to consider the dangerousness of the defendant in establishing conditions of bail release, and to detain a defendant who poses a threat to the safety of the community. At the same time, S. 2572 prohibits the common practice of detaining a defendant by setting money bail at a level which the defendant cannot meet.

Bail and sentencing laws have been debated by Congress for years. As the Senate has demonstrated again this year, the needed reforms are not too complicated to legislate. I have received assurances from the distinguished chairman of the House Judiciary Committee, Mr. RODINO, that the House Committee will act early next year to resolve these pressing criminal law reform issues. With those assurances, I look forward to enactment of long overdue reforms in the Federal law of bail and sentencing in the next Congress.

LABOR RACKETEERING ACT OF 1982

Mr. HATCH. Mr. President, the fight to protect thousands of honest union members and the general public from union corruption and racketeering has been lost for this year. Unfortunately, one of the most important pieces of labor legislation before Congress this year, the Labor Racketeering Act of 1982, has been buried in the House of Representatives.

Initially, there was every indication that this much-needed bill would pass through Congress quickly. It was unanimously approved by the Senate Labor and Human Resources Committee following months of negotiation among Senators KENNEDY, NUNN, NICKLES, and me. Each of its provisions was checked with representatives from AFL-CIO, and the bill was endorsed by the federation's president, Lane Kirkland. It even passed the full Senate, unanimously, on two separate occasions.

The bill's provisions were designed to provide better protection for union members and their health and welfare plans. They would have strengthened the prohibitions against racketeering and increased the penalties found in the principal labor laws that regulate labor relations and employee benefit plans—the Taft-Hartley Act, the Landrum-Griffin Act, and ERISA.

The underlying need for such legislation is unmistakable. For example, Alan Dorfman was convicted last week of defrauding the Central States Teamsters pension fund. Since S. 1785 did not pass, he will be able to continue to collect, through his company, Amalgamated Insurance Agencies Services, Inc., $900,000 a month in fees from the fund as long as he appeals his conviction, because of a loophole in current law. Since the appellate process can take 2 to 3 years, this sum might ultimatley exceed $30 million. Under the proposed bill, this money would have been paid into an escrow account until the appellate process is resolved, in order to protect the interests of both the convicted official and the members of the pension plan.

In 1975 the Department of Justice launched an investigation of racketeering on our east and gulf coasts, culminating in the conviction of over 100 top officials in the International Longshoremen's Union as well as shipping company officials. The Senate's Permanent Subcommittee on Investigations held hearings 6 years later in 1981, and found that racketeering and the presence of organized crime was still as prevalent as before. Today, payoffs are considered an expected cost of business in many ports—an expense that is routinely passed on to consumers.

During hearings I conducted before the Senate Labor and Human Resources Committee, it was also revealed that Federal enforcement of existing labor laws has been lacking. For example, witnesses testified that local officials of the International Boilermakers Union had been selling union membership cards or books, that unqualified welders were able to buy these books, and that these unqualified welders who had bought their way into the union have been working on boilers for nuclear powerplants in Pennsylvania and Ohio. Despite possession of this startling information, Government agencies have yet to bring suit to stop these practices.

The Labor Racketeering Act of 1982 could have stopped these and other abuses of our Federal labor laws and strengthened Federal enforcement. Undoubtedly, its effectiveness is what its opponents feared most, for it is clear that only corrupt union and management officials will benefit from Congress failure to pass this legislation.

By enacting the Labor Racketeering Act of 1982, Congress could have demonstrated once again its commitment to honest and equitable collective bargaining and a union movement dedicated to serving its members. By failing to do so, however, it sends a different and very distressing signal to American workers—that so far as this Congress is concerned, union corruption and racketeering are conscionable and unalterable facts of life in the American work force. This failure must be rectified next year.

FURTHER CONTINUING APPROPRIATIONS

Mr. MATTINGLY. Mr. President, I want to congratulate the majority and minority leaders as well as the distinguished chairman and ranking member of the Appropriations Committee for their efforts in obtaining passage of House Joint Resolution

6211, the bill which will provide continuing appropriations for Federal activities through fiscal year 1983.

Without the depth and degree of commitment by these leaders and by Members on both sides of the aisle, this resolution would not have passed; or if it had, it would probably not have been in a form which would have merited the President's signature and avoided the crises and further ado that would have been precipitated by a veto. The American people would not have benefited from a further, protracted fight over this resolution and I am pleased that we have been able to resolve the many differences that existed over the content of this bill.

The total spending figures in the resolution compare well with the targets that Congress agreed to when it passed the budget resolution. I am pleased that we were able to exercise the self-control needed to come close to staying within these spending ceilings.

More importantly, the resolution will fund the activities covered under its provisions for the entire fiscal 1983 cycle. This will allow the Congress, when it reconvenes in January, to concentrate on specific policy and spending decisions.

We will not have to waste time in constant wrangling over another continuing resolution. The increasing use of the continuing resolution has become, and properly so, a matter of growing concern to me and, I know, to many of my colleagues as well.

The use of such a vehicle does a disservice to the traditional authorization/appropriations process. It provides a convenient opportunity for Congress to avoid casting many of the difficult but vitally important votes that are necessary when the traditional appropriations process is adhered to.

When it returns, Congress should take a look at the budget process. Originally created to bring a sense of order and restraint to the appropriations process, it has become so unruly that it threatens to worsen the very problems that it was set up to correct.

We should continue to strive to meet the goals of the Budget Act but the mechanism needs to be fine tuned. Such reform measures should emphasize the need to return to the use of appropriation bills and discard the use of the continuing resolution except in times of true emergency.

The totals in the bill for defense spending will result in an approximate 6 percent increase in defense spending after inflation. This is needed. Despite the fervent hopes and prayers for peace of people around the world, our Earth continues to hold much danger and uncertainty. The peace we seek can best be achieved through a strength that is second to none.

The most controversial item in the defense section, and the most important in the bill, is funding for the MX missile. I am not pleased with the decision of the conferees to eliminate all production money and place even greater limitations than the Senate had approved on research and development funds.

However, given the troubled history of this system, the result does not surprise me. Certainly, it is significant that there has been such a lengthy and involved debate over the appropriate basing mode for this weapon.

I believe that Congress should seize the enforced delay and use it as an opportunity to take a close look at the possibility of deploying the so-called common missile.

This resolution directs the President to conduct technical assessments of alternatives to the MX and among these should be a review of the advanced D-5 missile that is now being developed for deployment in late 1980's on the *Ohio* class Trident submarines.

The time may be upon us when we can resolve the problem of the MX with a renewed look at the common missile approach.

Finally, Mr. President, while I yield to no one in my concern for and in my desire to assist those who enter this holiday season without a job, I believe it was best that title II was deleted from both versions of the continuing resolution.

Passage of this so-called jobs section would have done absolutely nothing to assist those who most need our help. Such legislation, in fact, would have been counterproductive because its passage would have enabled Congress to point to such action as evidence that it was addressing this most serious of problems when in fact, this type of legislation activity would be meaningless.

Most importantly, passage of a jobs title drawn attention from the need to address the root causes of unemployment and make the difficult decisions that will be required to actually bring relief to those who are suffering.

So, Mr. President, while I supported the resolution as the best that could be done under the circumstances, I am looking forward to the next Congress when we will hopefully be able to reform some of our current legislative procedures and do even better in our efforts to resolve the problems faced by our Nation.

PRODUCT TAMPERING

Mr. LEAHY. Mr. President, I am glad that the 97th Congress has adopted legislation to respond to the rash of product tampering that followed the tragic adulteration incidents in Chicago earlier in the year. It was essential that we should deal firmly with this most insidious threat, and we have acted.

The original Senate version of this legislation dealt not only with actual tampering but with false information that is maliciously spread about tampering. Tampering is an offense that harms people and our society through fear as well as deed, and I felt that the false information section was a vital one.

I did have some reservations about the language in the first Senate draft, and I proposed amendments which were adopted by the Senate to narrow the false information section. I wanted to prevent excessive penalties where no tampering was actually committed and the false information caused no harm. It was my hope that as amended, the bill would be favorably received by the House.

But the bill adopted by the House and approved by the Senate today does not contain any section dealing with malicious false information, even where the result of that event is a product recall causing the loss of millions of dollars. Members of the House concerned with this legislation have assured me that the false information provision was not included because it was felt that hearings were needed to determine scope and extent of that problem. Hearings on a bill including a false information section are promised for early in the next session, and I hope that this body will act with similar speed on a comprehensive bill.

While we have passed a statute that takes a very good first step, we need to proceed with permanent and effective legislation in the next Congress, and I intend to start early and work very hard toward that end.

COL. ERNIE COLEMAN

Mr. SYMMS. Mr. President, 2 months ago, my good friend Air Force Col. Ernie Coleman, suffered crippling injuries in an F-111 accident. Ernie, who was wing commander of Mountain Home Air Force Base, may never walk again, and because of his injuries he has prematurely retired from the service.

But when I visited him recently in the hospital, he was as cheerful as ever, determined to overcome his new handicaps and to live a full and active life. There was not a trace of self-pity or pessimism in his voice. He could only see the challenges and opportunities ahead.

Colonel Coleman and his story of "True Grit" is an inspiration I want to share with my colleagues. I ask unanimous consent that the following article, "Crippled F-111 Pilot Fights Back," published recently in the Idaho Statesman, be printed in the RECORD:

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Idaho Statesman, November 25, 1982]

CRIPPLED F-111 PILOT FIGHTS BACK

(By Ken Burrows)

Ernie Coleman isn't one to smother himself in self-pity when tragedy strikes.

On the contrary, the 44-year-old Air Force colonel seems to have a huge helping of "the right stuff," the combination of cour-

age, talent, destiny and determination described by Tom Wolfe in his best selling book about test pilots and astronauts, The Right Stuff.

Coleman, who suffered crippling injuries in an F-111 accident last month, is at home with his family this Thanksgiving counting his blessings and looking forward to what is perhaps the greatest challenge of his life.

Coleman's chances for complete recovery seem slim. He has had little or no feeling from the chest down since an escape capsule jettisoned him and another flier from the disabled jet which smashed into the Elmore County desert on Oct. 8.

"They (doctors) won't give me any hope," Coleman said in an interview this week at the Elks Rehabilitation Hospital, where he is undergoing treatment. "The prognosis is that I will probably be paralyzed."

Yet, Coleman talks about making a comeback; about someday walking again; about skiing and bird hunting; and, perhaps most important, about climbing into a cockpit and flying again.

Wrapped in a plastic brace extending from the top of his head to his waist and dressed in a T-shirt with the wording, "I got this way from playing basketball," Coleman was in good spirits as he recounted the events leading up to the aircraft accident.

"I got the aircraft airborne and quickly developed flight control problems," he said.

Realizing his dilemma, Coleman yelled to the weapons systems operator in the seat next to him that "it was hopeless to eject at this low altitude."

Coleman knew he had to gain altitude in order for the two men to eject safely.

"The aircraft was in a 50- or 55-degree nose-high position and it had stalled (no longer flying) when we punched out," he said.

The escape capsule "separated nicely from the airplane," he recalled. Then something went wrong.

A failure in the ejection system's impact bags caused the escape capsule to slam into the ground, inflicting severe injuries on Coleman's back. Weapons systems officer Scott Springer suffered less severe back injuries.

"I was conscious through the "entire thing," Coleman added. "I knew I was really hurt bad. I didn't have any feeling in either leg."

Still seated in his cockpit seat inside the capsule, Coleman took one hand off his knee to release his harness and "the whole upper half of my body just fell over."

It took 90 minutes for a rescue crew to remove him from the capsule.

He was transported by helicopter to the St. Alphonsus Regional Medical Center in Boise, where he underwent surgery to prevent further damage to the spine.

Later, Coleman was transferred to a medical center in Texas, but decided to return to Idaho to continue therapy.

Although the Air Force is still studying his case, Coleman said he's sure he will be retired. Wing commander of the base at the time of the accident, he was replaced on Oct. 26 by Col. Loren Eastburn.

Asked if he would hold any bitterness or antagonism toward the military if he was placed on the inactive list, Coleman said, "If a guy wears a blue suit, he's got to be able to go to war. They can't have one rule for the Air Force and another for Ernie Coleman."

Military discipline probably has had a lot to do with Coleman's attitude. The odds against suffering such a disabling injury after ejection are high but the fighter-pilot fraternity is well prepared for such an eventuality.

"I've never had a bad airplane in 22 years of military service," said Coleman, who has logged 3,300 flying hours in F-100s, F-4s, and F-111s.

Coleman's wife, Ann, and three children, Lee Ann, 22, Scott, 21, and Todd 17, are still living at their air base home. He said the accident has "pulled his family together. It has strengthened their love for one another and their love for God."

Coleman's immediate goal is to strive for independence. "I'm learning to get in and out of bed by myself, to dress myself, to drive a car," and, on the lighter side, he said, "I'm learning to control this wheel chair so that I can do wheelies."

"The hardest part is trying to move your legs. They weigh at least a 1,000 pounds a piece," he said.

But "I'm a real determined fellow," Coleman said. "When I blink my eyes or twitch, I feel some internal feeling to the tailbone."

Coleman, an avid outdoorsman until the accident, said he hopes someday to resume such activities as hunting.

"I've thought about constructing a swivel seat on the front of a four-wheel drive so that I can hunt birds," he said.

But Coleman knows he probably will never fly another fighter plane.

"Sure, I won't fly again for the Air Force, though there are numerous success stories about paraplegics, and my love for flying will drive me back to that," he said.

"I have every intention of walking again," he added. "But right now, I'm taking one day at a time."

TRIBUTE TO HARRISON SCHMITT

Mr. MOYNIHAN. Mr. President, Senator HARRISON SCHMITT entered the Senate in 1977 on the same day as did I, so there is a certain kinship that I feel for him as he departs this institution.

Much has been written—indeed some of the best of that writing has been done by JACK SCHMITT, himself—about the Apollo 17 mission to the Taurus-Littrow Valley on the Moon. The enormity of the scientific information we gained, as a people, from that mission and others of the space program would have qualified JACK SCHMITT for a special place in our history. He was, after all, the only geologist ever to bring the training of his discipline to the U.S. space program so his contribution was, at the outset, special.

Yet it is a mark of the man that this singular achievement would not satisfy him entirely. He desired a place in public service and we have been better for it. His understanding of technology, of scientific inquiry, and of devotion to detail is something we need more of in the Senate. And JACK SCHMITT's assets in those regards will be difficult to replace.

I have come to know him as a fellow member of the Select Committee on Intelligence, where his conscientiousness and expertise were valued as highly as his sensitivity to the complex questions of national security we considered.

He is a man with a now considerable range of experiences and as he leaves the Senate, we say—simply—that we hope these talents will serve him well in the years ahead.

TRIBUTE TO SENATOR HAYAKAWA

Mr. President, the Senate class of 1976 contained many Members of distinction, none more illustrious in intellectual achievement than SAM HAYAKAWA. I have spent many years in academia, and know well the enormous dedication and talent required to secure the respect of academic colleagues across the globe. SAM HAYAKAWA entered the U.S. Senate, simply stated, as a semanticist of world renown.

At its best, the U.S. Senate is a body devoted to the careful examination of public ideas through free debate. No one is better qualified to contribute to this examination and shape this debate than SAM HAYAKAWA. He also brought with him the insights and skills developed through managing a large institution, for he came as president of San Francisco State University. These insights and skills informed all his many contributions to our debate on the operations of Government, and surely helped direct his splendid work as chairman of the Subcommittee on Advocacy and the Future of Small Business of the Small Business Committee.

While most of SAM HAYAKAWA's academic work has focused on the use and misuse of language, his work in two other fields has also made itself felt in his tenure in the Senate. As an editor of a collection of Oliver Wendell Holmes' prose and poetry, SAM HAYAKAWA brought a profound sense of justice and reflection to the Senate. And as the author of many articles on the history of the American musical form, jazz, and a collector of old jazz recordings, he informed our deliberations with an improvisational and puckish wit which will be sorely missed.

It is my privilege to have served with him in the Senate, and we will all await his future contributions to the academic and political debates of our time.

TRIBUTE TO HARRY F. BYRD, JR.

Mr. President, there are but four Senators in this Chamber who represent a family tradition in the Senate, which is to say that they can claim a parent who served here in years past; though we can, indeed, expand the definition to in-laws to include our distinguished majority leader, Mr. BAKER.

Yet no family tradition has been quite so lasting or indelible as that of the Byrds of Virginia. When our distinguished colleague HARRY F. BYRD, JR., departs us in but a few short days, it will be the first time since March 4, 1933, that the Senate has not been favored by the presence of a Virginia Byrd—our colleague having succeeded his father, Harry F. Byrd. Fifty years of continuous service in the Senate is something worth boasting about and well it is that the Senate should take note.

Mr. President, Senator BYRD's 17 years in this Chamber has given him insights and judgment that we shall sorely miss. Charles McDowell, that careful and astute observer of this Capital, took note of Senator BYRD's acumen in a column he wrote for the Richmond Times-Dispatch, reprinted in the Journal newspapers of northern Virginia on November 30, 1982:

* * * Even the most admiring supporters of Byrd might wonder what he knows about presidential politics. And it would be fair to ask how a man so conservative could be credibly objective about the subject. Well, Harry Byrd, Jr. has followed national politics since he was a boy, as some people follow major league baseball. He is a fan with a good eye, a good ear, a good memory and much pride in not letting his conservative rooting interest in events do much to his view of the events themselves. He is one of the three or four best political predictors I know.

Mr. President, that is uncommon praise in a town that thrives, indeed exists, on political wisdom. And it is a mark of the man that he should be so regarded not only by the press, but by his colleagues here in this Chamber.

It is customary on these occasions, Mr. President, to recount the achievements of a departing Senator and wish him well as he or she leaves. That I would be honored to do, but others have cataloged the service of HARRY F. BYRD, JR., better than would I. I would say, simply, that as a colleague, and as a fellow member of the Senate Finance Committee, Senator BYRD has always been the most courteous of Senators—giving justice to the word that best describes him: "gentleman."

But I would wish to share with my colleagues the following: Senator BYRD's own poignant farewell to the citizens of Virginia. His final newsletter to the people he has so ably represented is touching in its sincerity yet useful to all Senators who desire a better understanding of this place, which Senator BYRD has clearly come to know so well.

Mr. President, I ask unanimous consent that excerpts from Senator BYRD's farewell newsletter to Virginia, volume XVI, No. 2, be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXCERPTS FROM FINAL NEWSLETTER OF HON. HARRY F. BYRD, JR., VOLUME XVI, NO. 2, DECEMBER 1982

As I noted earlier, I was in a philosophical minority when I first took my seat in the Senate. But as a Democrat, I was at the same time in the party majority. That situation has reversed itself to some extent. While I now find myself in a philosophical majority on many issues, I am only the second independent in nearly 200 years to be elected to the Senate—and the only Senator twice elected as an independent.

I have found the designation, which I have held since 1970, to be desirable. I can work closely with both Democrats and Republicans; both know I am not seeking to harass either political party, or to advance the cause of one to the disadvantage of the other * * *

I am asked frequently, as one of the few three-term senators, if the Senate has changed dramatically during my years in Washington. My response must be that it has changed in some ways and in other ways remained the same.

The workload has mushroomed along with federal programs, as evidence by this figure: In 1965, there were 259 recorded votes in the Senate; in 1980, there were 546, more than double the earlier count.

(In 1981 and 1982, the total of roll-call votes declined somewhat, but this resulted largely from a trend toward packaging many measures in omnibus bills. Legislative activity did not actually drop off significantly.)

The complexity of the work has grown to a comparable degree; larger staffs both for the legislative committees and for individual senators have become commonplace. Larger staffs lead to more legislation; I feel we already have too much legislation.

The pattern has been that the executive branch grows enormously—and then the legislative branch follows suit. Soon afterwards, growth comes to the judicial branch. Indeed, in 1977 Congress doubled the number of federal judges almost overnight. Thus, the cost of government balloons * * *

Trusting as I do in the collective judgment of the American people, I feel the people will lead the politicians—not the other way around—to the philosophy that has guided Virginia from Thomas Jefferson's day to our own and has been the beacon I have followed throughout my career.

I end, my dear fellow Virginian, by again expressing to the people of Virginia my deep and lasting appreciation for the opportunity, the honor and the responsibility of representing you in the United States Senate.

These thoughts, Mr. President, are part of the Byrd legacy to the Senate. They are instructive, compelling. And they will be for those who study this Senate and its process for years to come. And above all, they represent what is noble and grand about public service.

TRIBUTE TO SENATOR BRADY

Mr. President, it is not the case that the Senator among us with the least amount of time in this Chamber is a Senator with a short list of achievements as a Member of this body.

Senator NICHOLAS F. BRADY has, among other things well served the dignified process that makes this an orderly institution, an institution of deliberation and of procedure. He came to us from New Jersey after a difficult experience. Yet he came, in part, because he understood the meaning of continuity in the Senate, the need for effective and uninterrupted representation in the Senate. In doing so, he has done a splendid service to the people of New Jersey, the people of the Nation, and the Senate itself.

Mr. President, I have had an opportunity to make use of Senator BRADY's knowledge of the private sector on several occasions and his counsel and wisdom both as a business executive and as a personable colleague has been invaluable. I should say, too, that we were once trapped on an airplane bound for New York and, of a sudden, found ourselves "deplaning," as the airline folks would say, in Baltimore—an experience that would have been far more frustrating than it turned out to be, largely because Senator BRADY's genial company made the time pass quickly.

In but a short time, Mr. President, Senator BRADY has proven a diligent and thoughtful spokesperson for New Jersey, a compliment borne out by the measures and causes he has advanced as a member of the Committee on Banking, Housing, and Urban Affairs, a committee, I should note, of incalculable importance to States like his New Jersey and my New York. And he has been a reflective member of the Committee on Armed Services at a time when we should well reflect on the role of defense in the Nation's security and economy.

Moreover, Mr. President, it would not be overly partisan for me to note that he has done our colleagues on the other side of the aisle an extraordinary, if unrecognized, service through his advise and personal relationship with the President of the Senate, Vice President BUSH. We are fond of saying that the Vice President's duties are secondary to his role as the President of the Senate; Senator BRADY's assistance to the Vice President and the insights he has provided has no doubt lent some credence to the case.

Finally, Mr. President, I should say that Senator BRADY has recognized that the citizens of the Northeast share certain common concerns and face certain common dilemmas. In this respect, he has been a valuable ally, a good neighbor, and a colleague that I, for one, shall miss.

Mr. President, if we associate with the American West the qualities of determination, perseverance, and toughness, then there are few Senators who are more singularly representative of their region than HOWARD W. CANNON.

Senator CANNON, through 24 years of service with us here in this Chamber, has exemplified that which is perhaps the most important talent one can bring to this institution: A thorough understanding of from whence he came, and an ability to translate that understanding into legislation for an entire nation.

His service with us, his chairmanship of one of our most vital committees, his considerable legislative record, is the mark of a Senator who knows how things here are done and knows how to do them.

He began his career in local government, working for the Utah State Senate, and subsequently, as a county attorney. His military record during our Second World War is the sort of story that inspires; a story that is worth repeating to anyone who doubts that there are heros, still, who serve this Nation.

His return to Nevada following the war, and his successful law practice, led to his first campaign for Senate in 1958 and—in a class distinguished by names like Ed Muskie, Phillip Hart,

ROBERT BYRD, and Frank Moss—Senator CANNON gained a role of responsibility and leadership in the Senate that few could match. In his roles as chairman and then ranking member of the Commerce Committee and a senior member of the Armed Services Committee, Senator CANNON became a principal spokesman for deregulation in the Senate and contributed more to legislation passed by Congress on that subject than perhaps any other Member. His understanding of tactical air warfare has made him the Senator, with the possible exception of the senior Senator from Arizona, with the greatest expertise in that crucial area of military strategy.

But finally, Mr. President, Senator CANNON's earnest manner, his candor, and his frank explanations of his views makes him a colleague who will be sorely missed. We wish him well as he departs the Senate.

DR. MARTIN LUTHER KING, JR. BUST OR STATUE

Mr. MATTINGLY. Mr. President, I want to commend my colleagues for the unanimous adoption earlier today of House Concurrent Resolution 153 that provides for the placing of the bust or statue of Martin Luther King Jr., in the U.S. Capitol.

This is an honor rarely bestowed on those who have never served in the U.S. Government. But in the case of Dr. King, it is an honor and a tribute that is appropriate and deserved.

The contributions of Dr. King on behalf of justice and freedom are well known. I do not have to remind my colleagues that the efforts of this man almost singlehandedly brought a new era of social justice, hope, and promise to all Americans.

A native of Atlanta, Ga., Dr. King courageously confronted established injustice; not in a spirit of acrimony and violence, but in the Christian spirit of charity and nonviolence. His legacy is one that will be etched in the history of the last half of this century and will stand as a beacon to all people seeking to further the cause of human dignity and social justice.

Mr. President, I also want to mention that portion of the 1983 Interior appropriations bill now on President Reagan's desk that will set aside $1.5 million for the acquisition and restoration of Dr. King's home and the church where he served as pastor in Atlanta. I am proud to say I was a part of the effort to preserve this great heritage, not only for Georgia, but for all Americans. The recognition of Dr. King's rightful place in our history is the long culmination of the efforts of many people in my State and around the country who seek to carry on the work that Dr. King began.

Again, I commend my colleagues for this honoring of a truly great American. Thank you.

THE PAYMENT-IN-KIND PROGRAM

Mr. EXON. Mr. President, a couple of hours ago this Senator from Nebraska suggested a possible workable compromise on H.R. 7439, which is at the desk, in regard to the PIK program. Since that time I have talked with several Members of the Senate and several Members in the House of Representatives in whom I have great confidence with regard to agricultural matters.

Unfortunately, for a number of reasons, we seem to be at a total impasse. There are holds on the bill. The extended filibuster debate on the gas proposal has so tied up the U.S. Senate that we are nearing that bewitching hour once again, or maybe we are already past it, where compromise and understanding have been almost eliminated with regard to trying to bring about something that I think is potentially good for the Farm Belt of America.

Mr. President, I just want to echo and emphasize once again that I have grave reservations about the PIK program for the reasons that none of the details have been spelled out. But it seems to me, with the extreme difficulties that are facing the American family-sized farmer today, the agricultural sector of our economy in toto and in particular, and the agribusiness part of our society that is closely alined therewith, the devastating effect that this is having on the individual entrepreneur up and down Main Street, U.S.A., that we should at least go along with H.R. 7439 as it came over to us from the House of Representatives, with the clear understanding that this does not mean an enforcement of PIK and with the understanding that the Agriculture Committee of the Senate would hold appropriate oversight hearings on the rules, regulations, and direction that the program is supposed to take when they are spelled out by the administration.

Mr. President, it seems to me that we are making a mistake in not taking up H.R. 7439, but it also seems very clear to this Senator that because of the filibuster on the gas tax bill, which has sharpened the debate here beyond a point where we can have a chance to get together, that, unfortunately, H.R. 7439 will likely die on the Senate desk as a result thereof. I am not sure that this is proper. I am not sure that it is in the best interest of the American farmer. But at this late hour, because of the interruptions that we have had to the normal flow of business as I have outlined, it seems that we will have to at least set this over until the 98th Congress.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PIK PLAN STILL A BAREBONES PROPOSAL

Mr. MELCHER. Mr. President, the opportunity to use payment in kind (PIK) as a method for cutting down on surplus grain, cotton, and rice stocks in Government ownership is a proposal that deserves wide consideration by agricultural producers, agribusiness, and Congress.

Secretary of Agriculture John Block's announcement of his intention to proceed vigorously with securing adequate legislation to implement the program is encouraging, but it is essential to recognize that consideration of it entails more than just a barebones formula leaving gaps to be filled in by the Secretary's broad authority under existing law.

Commodity producers and particularly wheat producers need to evaluate what the effects of PIK with the use of warehouse receipts will mean on market prices for this coming crop. There has not been a clear statement by the Secretary of Agriculture as to his intentions for reserve stocks of grain owned by farmers which under present law would be held off the market until the price received by the farmer equaled a specified trigger price. That trigger or release price is well above current levels. In other words, what wheat and grain farmers must ponder now is "Would the PIK plan force large supplies of grain on the market to further depress prices for the 1983 crop?"

With net agricultural income at the lowest levels since the worst times of the Depression, this is not the time for taking lightly the risk of a new agricultural program that could further aggravate farm cash receipts to even a lower point. It is a question of survival for a good share of grain farmers. During this current marketing year, the prices received by grain farmers on the cash market have only been 60 to 65 percent of the cost of production and some forced sales for lack of storage were even lower.

As a result, grain farmers have taken advantage of the current farm program of "farmer-owned reserves." Secretary of Agriculture John Block has made it known that if that reserve

program is continued for the 1983 crops the price will be reduced considerably.

For example, farmers for the 1982 crop can receive a Government loan of $4 per bushel on wheat placed under the reserve program. Secretary Block now proposed that those reserves be made available for the PIK program as payment in kind for farmers who will take a corresponding amount of their land out of production. Those farmers that do so would receive a payment in kind or a warehouse receipt which could be readily cashed at the rate of about $2.68 per bushel to equal the amount of their average production. That means, as an example, for every acre the wheat farmer takes out of production that has an average yield of 30 bushels, the PIK payment would be 30 times $2.68 or $80.40 payment for each acre set aside or soil banked.

That in itself provides an opportunity for grain farmers to retire part of their land over the next 2 or 3 years and to receive a portion of their needed income in order to survive. What about the price on the crop they do produce? Will there be a continuation of the farmer-owned reserve program to permit some of the wheat farmers' crop to be eligible for the $4 per bushel loan? The answer is apparently "No." The Secretary does not say what he will do. It is his discretion. That leaves a big doubt. The farmer, under law, will have the opportunity to receive a Government guaranteed loan based on the rate of $3.65 per bushel in the regular longstanding loan rate program.

The PIK plan as recommended by Secretary Block clearly indicates a lower market for the 1983 crop. The fear that readily occurs to wheat farmers is that the cash market may be even lower than what it currently is under the PIK program unless there are safeguards to cushion the probable effect of wheat farmers who enter the program and receive warehouse receipts which they will need to cash in for income which will bunch grain on the market causing a drop in price. That is the fear that seems very real to a great number of wheat growers.

I believe some cushion should be incorporated into the bill either by raising the loan rates to at least $3.85 per bushel or mandating the farmer-owned reserves for the 1983 crop at or near the $4 per bushel, like the 1982 program, $4 is nowhere near the cost of production and those costs in 1983 are likely to be 5 percent or more higher than in 1982.

A second shortcoming that is obvious in the PIK plan is a lack of direction for conservation of the vast acreage taken out of production.

Leaving the land idle with no conservation practices would be shortsighted.

For more than 10 years we have been shortsighted in good, sound conservation practices. The cost-sharing programs that have proven very effective during the fifties and sixties have been shortchanged during the seventies and into these first years of the eighties. PIK should be made available to finance conservation practices. Cost sharing on conservation practices in programs where the Federal Government pays an incentive for the farmer to practice sound and acceptable conservation on idle land benefits all of us now and all generations to come. Our land base is our greatest national asset.

The PIK plan as proposed lacks specific safeguards for the farm operator who either rents, leases or share-crops. In days past, agricultural programs have required specific regulations which are still available and in place and any PIK plan that is adopted should incorporate those same regulations as requirements to safeguard farmers who operate but do not own the land. We have faced this problem earlier in the soil bank program and prevented by these regulations a landlord making a determination to set aside his land and receive Government payments and disregard the effects that that decision has on the farmer who is renting or share-cropping the land. I believe the Secretary of Agriculture would want to implement those regulations on the basis of equity.

The problem that arises when the poorest land is taken out of production and receives Government payments must be alleviated by making the payment only on the basis of what the crop yields would be if it were farmed. The average yield for the entire farm would be higher than on the poorest land on that farm. The payment on the poorer land on a farm must be adjusted to the actual rate of the production from the land that is idled.

PIK can be used to subsidize foreign sales in agricultural products. Actual stocks of grain or other agricultural products produced in this country and owned by the Government in the Commodity Credit Corporation could be a method of encouraging and expediting foreign sales.

Bonus payments to exporters of U.S. grain or other commodities could be made available free to make U.S. products at prices competitive in the world market with countries who are already subsidizing their agricultural exports.

This is a policy that must be determined by Congress itself. It is a policy that deviates from the present U.S. practice and it deserves adequate and thorough consideration by all of the people and then action by Congress if we implement such a policy.

On these points that I raise, there has not been sufficient attention allowed for this quickly-conceived legislation. There certainly has not been evidence of general agreement here in the Senate on all of these points and perhaps some will never receive a majority vote in the Senate or in the House, but they are certainly legitimate considerations in the legislative process of enacting the PIK bill. They are certainly legitimate considerations for the agricultural community and for the public at large. I hope that we can have prompt action over the next 6 to 8 weeks with input, with advice, and with suggestions from the millions of Americans who are affected directly by a major shift in U.S. agricultural policies. Beyond that, all Americans are impacted by success or failure of our agricultural economy.

The recession has been aggravated by the decline in agricultural prices followed by the decline in purchasing power by agricultural producers. If the Department of Agriculture and the administration can quickly formulate their proposals to fill the gaps that I have mentioned or other gaps that others find in the PIK proposal, I believe we can act promptly next year for passage of the program into law and make it available for farmers for their 1983 crops.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum called be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXPRESSION OF APPRECIATION TO THOSE WHO WORK ON CAPITOL HILL

Mr. WARNER. Mr. President, there is a strong likelihood that the Congress will recess sine die before the close of this day, and each year it is my privilege to say a few words as one Member of the Senate in heartfelt appreciation to all of those who work on Capitol Hill and make our life more comfortable and more safe. That ranges from the guards, to the cafeteria workers, to the elevator operators, and, of course, the Senate staffs, plus many others.

I wish to express my heartfelt appreciation to these many people and wish them a Merry Christmas and a Happy New Year. I look forward to resuming

our activities the beginning of the new year.

RECESS UNTIL 6:30 P.M.

Mr. BAKER. Mr. President, it does not appear that there is any business that can be transacted at this time that has been cleared on both sides. The conferees on the highway bill are still in conference. As long as that is so, I think we should wait and find the result of that effort.

I ask unanimous consent, therefore, that the Senate now stand in recess until the hour of 6:30 p.m., this evening.

There being no objection, the Senate, at 5:28 p.m., recessed until 6:30 p.m., whereupon the Senate reconvened when called to order by the Presiding Officer (Mr. RUDMAN).

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. WARNER). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BRADY). Without objection, it is so ordered.

DR. MARTIN LUTHER KING, JR.

Mr. NUNN. Mr. President, I am pleased that the Senate has approved legislation providing for the placement of a bust or statue of the late Dr. Martin Luther King, Jr., in the Capitol Building.

Dr. King's lifelong devotion to the civil rights movement made an indelible imprint upon our Nation and the world. This Georgian's courageous leadership broke down legal barriers which separated our Nation's citizens. His principles of nonviolence set a clear example for all those who wish to bring about change through nonviolent means and earned for Dr. King a Nobel Prize for Peace.

I hope that the placement of a bust or statue in the Capitol will recall for all Americans Dr. King's dreams for an equal, just and peaceful society.

When the history of this century is written, Dr. King will be recorded as a great leader of our people. It is fitting that his image stand in our Capitol along with other great Americans who, throughout history, have shared this man's courage, wisdom, and commitment to equal justice for all.

PIPELINE SAFETY ACT

Mr. BAKER. Mr. President, I have a stunning announcement to make. I do not believe my colleagues will believe it on first reading, so I may have to repeat it. I wish to say that it gives me a great deal of pleasure to say—and it gives me a great deal of pleasure to say it—that apparently, the differences between my friend, the assistant majority leader, TED STEVENS, and my friend, the Senator from Ohio, HOWARD METZENBAUM, with respect to the Alaskan railroad have been worked out. I have to confess that I shall believe that when I see it. But hoping that that will be the case——

Mr. ROBERT C. BYRD. Will the Senator pause for a moment?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. Mr. President, so do we take a deep, deep breath.

Mr. BAKER. Now, Mr. President, before anything else happens, I ask that the Chair lay before the Senate a message from the House on H.R. 3420, the Pipeline Safety Authorization Act of 1982.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendments of the Senate to the bill (H.R. 3420) entitled "An Act to authorize appropriations for fiscal year 1982 for carrying out the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes", with an amendment; it insists upon its amendments to the amendments of the Senate to the bill (H.R. 3420) entitled "An Act to authorize appropriations for fiscal year 1982 for carrying out the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes", asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints the following as managers of the conference.

Ordered, That Mr. JONES of North Carolina, Mr. BIAGGI, Mr. RODINO, Mr. SNYDER, and Mr. MCCLOSKEY be the managers of the conference on the part of the House for title I of the amendment of the House to the text of the bill.

Ordered, That Mr. DINGELL, Mr. FLORIO, and Mr. LENT be the managers of the conference on the part of the House for titles II through VIII of the amendment of the House to the text of the bill and modifications committed to conference.

(The amendment of the House is printed in part II of the RECORD of December 20, 1982.)

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment with the further Senate amendment.

I yield to the Senator from Ohio that he may offer that amendment.

Mr. METZENBAUM. Mr. President, the amendment that I send to the desk is the result of untold number of hours of work on behalf of the Senator from Alaska, as well as the junior Senator from Alaska, and my own staff.

UP AMENDMENT NO. 1586

Mr. President, I send an amendment to the desk in the nature of a substitute.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) proposes an unprinted amendment numbered 1586.

Mr. METZENBAUM. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter proposed to be inserted by the House engrossed amendment to the Senate engrossed amendment to the text of H.R. 3420, insert the following: That titles II through VII of this Act may be cited as the "Rail Safety and Service Improvement Act of 1982".

Mr. METZENBAUM. The issue has had to do with the question of the State of Alaska purchasing the Alaska Railroad and the question of what price would be paid for it. The amendment that I sent to the desk will provide a means of determining what that value is, based on fair market value. Thereafter, the parties in the State of Alaska and the Federal Government would be in a position to conclude a transaction on the basis of that price.

The determination of the value would be made by the U.S. Railway Association and I think that it is a move that satisfies the concerns of the Senator from Ohio and, I believe, satisfies the concerns of the Senator from Alaska.

I should further point out that this is the same measure that was pending at the desk. That language having to do with the exemption of the shipping industry from the Antitrust Act would be deleted in its entirety.

There are a number of other provisions in the measure having to do with benefits for approximately 10,000 railroaders. Without this legislation, those 10,000 railroaders would be unemployed, and this will preserve their rights. Therefore, I am pleased to join with the Senator from Alaska, whose staff has worked zealously in an effort to bring this about, in offering this amendment, and I think that the Senator from Alaska and I are in accord on it.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. I want to thank the Senator, and I know that he has returned from dinner, once our respective staffs and the staff of the Commerce Committee worked this bill out, in order that the matter could be handled expeditiously and sent to the House in time for action prior to sine die adjournment.

The Senator is correct that the Northeast corridor improvement project is included in the bill and affects some 10,000 people in New Jersey. It has been in the railroad bill all along, and it is quite important that it be passed before the end of the year.

I think that we are indebted to the people who have kept pressing us on all sides of that project in order to reach this point.

I am grateful to the Senator and his staff. I want to thank Doug Lowenstein, David Springer, Peter Harris, and Marge Baker, for working with our staff; the Commerce Committee staff: Kevin Curtin, Pamela Garvey, Linda Morgan, and Mary McAuliff, who have now been working for 2 years on this bill.

They have been working around the clock this last week with my staff: Bill Phillips, and Mark Schneider. In addition, Lynn Sutcliffe has added his able assistance to the State of Alaska along with a young man that many people have just gotten to know, Dave Walsh. He has been a friend of mine for years and he has had a distinguished record as a member of the Anchorage City Council. Dave has been here representing our new Governor, Bill Sheffield, and has been here working with the staff, in an attempt to insure passage of this legislation.

I have to say to the Senator that this is a matter of faith. Neither one of us has had time to make certain that the understandings that he and I expressed are in this document. I have absolute confidence in the staff that has worked on it, though, and I believe the statements made by the Senator are correct. The shipping act is not in this bill. It is in the position of a privileged matter when it returns to the House, so by virtue of the action that has been taken I am confident that we should be able, if the House stays in session long enough, to take care of the problem of the Northeast corridor improvement project, after this appraisal making the railroad available to my State on what seems to be a reasonable proposition. They will have no obligation to take it, of course, but, assuming the price is right, we may be in the railroad business soon.

Since this bill was reported by the committee, the committee has modified it in a number of important respects relating to the procedure used to convey the real property of the Alaska Railroad to the State and the nature of the interest the State is to receive in the Denali National Park and Preserve. In the committee-reported bill, the State received, on the date of transfer, all right, title and interest to the rail properties of the Alaska Railroad, including the real property. Adjudication of pending claims of valid existing rights would follow with the State being required to reconvey interests adjudicated in favor of other parties. The substitute provides a different process which involves withholding fee title to lands subject to unresolved claims of valid existing rights pending expedited adjudication. On the date of the transfer, the State would be granted fee title to lands not subject to such claims and, with respect to lands so subject, an operating license to insure that operations of the railroad are not affected in any way by the new process.

The concept of an exclusive use easement also is introduced in the substitute. This defined interest represents the minimal interest the State is to receive in the Alaska Railroad right-of-way following completion of the expedited adjudication process. Of course, completion of the process may also result in the conveyance of more than just the easement. It also is the interest the State will receive through the Denali National Park and Preserve. In other areas, where the right-of-way crosses land owned in fee by the Federal Government, the full fee title to the right-of-way will be transferred to the State.

Because the exclusive use interest is a new concept, further description of its characteristics seems warranted. Essentially, it is defined to insure that the State-owned railroad will receive exclusive and complete control over land traversed by the right-of-way. Except as specifically qualified in provisions regarding the easement through the Denali Park, the exclusive use easement, at minimum, vests in the State-owned railroad the following rights:

First. To have complete freedom to add to or delete from the land any structures, roadbeds, adjacent rocks, or gravel or to recontour the land as necessary;

Second. To move track within the right-of-way or to add or delete track;

Third. To provide loading and unloading facilities for railroad customers or for railroad purposes;

Fourth. To add structures as may be necessary for operation;

Fifth. To remove any vegetation which may be required to operate or expand the railroad's services;

Sixth. To fence the right-of-way;

Seventh. To operate any and all trains over the right-of-way;

Eighth. To restrict or grant access to persons or vehicles as it sees fit;

Ninth. To construct and maintain any drainage facilities necessary to preserve the right-of-way;

Tenth. To make any provisions necessary to protect the operational capability of the right-of-way even if this requires access to and control of lands beyond the normal right-of-way limits (for example, avalanche, flood control);

Eleventh. To take such action as may be necessary to safely operate in situations where conflicts with other transport modes may exist; and

Twelfth. To place all necessary communications and signal devices within the right-of-way or to maintain separate rights-of-way for these items where necessary.

Where appropriate the State may also use its police power to regulate activities on the right-of-way and other rail properties.

Other related changes have been made in the substitute which are self-explanatory. I note that a definition of right-of-way has been included to insure that the State receives at least the minimum width necessary to continue to operate the railroad. Modifications have been made in the future rights-of-way section to clarify that current law governs processing of applications for future rights-of-way subject to a description of the interest the State is to receive which is based on the act of March 12, 1914, the Alaska Railroad's organic statute and conforms, that a minimum, to the new definition of an exclusive use easement contained in this bill. As I mentioned, the rail properties within the Denali Park have been treated differently and although the State now receives an exclusive use easement rather than title, this interest is defined to be sufficient to sustain unimpaired, continued operation of the State-owned railroad through the park.

The reversion section also has been changed to provide for reversion in the event the State discontinues use of the railroad for a continuous 18-year period. "Use" is carefully described in the section to include any purpose authorized under the transfer legislation. In addition to special treatment of lands within the Denali Park, the substitute reversion section also specifically deals with lands in the Chugach National Forest. Another provision has been added to provide for Federal recapture of "profits" from the sale of all or substantially all of the State-owned railroad to an entity other than an instrumentality of the State. The proceeds of any such sale are to be reduced by liabilities and obligations assumed in the transfer of the railroad

to the State and subsequent State investment in the railroad.

Mr. President, I ask unanimous consent to have printed in the RECORD, a pertinent table.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Alaska Railroad—Estimated deferred maintenance and delayed capital projects

	Millions[1]
Roadbed and track:	
Tie replacement (assuming 37 yr life cycle)	$12.0
Ballast	10.8
Subgrade	1.3
Bank widening	8.0
Turnout renewal	3.8
Rail replacement, repair	24.0
Block work	.5
Subtotal, roadbed and track	60.4
Structures:	
Tunnels	2.7
Bridges, culverts	6.8
Yards	7.9
Healy Canyon reroute	50.4
Subtotal, structures	67.8
Total	128.2

[1] 1982 dollars.
Source: ARR general manager.

Mr. STEVENS. I would like to clarify the basic intent of the new provision requiring a value determination of the Alaska Railroad by the United States Railway Association that my staff has worked out with the Senator from Ohio.

It is my understanding that the USPA will perform an independent determination of the fair market value of the Alaska Railroad as an operating railroad, including full consideration of the terms and conditions of the transfer legislation. The relevant standard is a determination of what a prospective buyer would compensate the United States, if at all, were they to acquire the Alaska Railroad for purposes of continuing operations.

This provision specifically requires the USPA to include consideration of all obligations imposed by this title and other applicable law upon the operation and ownership of the Alaska Railroad. The outstanding claims against railroad, including those land entitlement selections filed by Alaskan Native Corporations, should very definitely be factored into any determination of fair market value. It is conceivable that a significant portion of the railroad's more valuable undeveloped holdings could be lost to these groups. Furthermore, the specific provisions contained in the reversion clause should be considered in any land appraisal since they greatly restrict the State's options with respect to using rail properties for nonrailroad related purposes.

It is my understanding this includes a complete accounting of all deferred maintenance, delayed capital reinvestment requirements, employment protection obligations, passenger service subsidies, OSHA compliance requirements, real value of fixed assets, and potential cash flows. There should also be some consideration of intangibles such as the railroad coming under full jurisdiction of the Interstate Commerce Commission, Federal antitrust statutes, and potential tax liabilities. The USRA should work closely with the Alaska Railroad, the Federal Railroad Administration, and the State in order to utilize the most accurate financial information on the railroad, much of which is to be generated during the concurrent 9-month period for preparation of the closing report. I would further point out that this latter point is reflected within the amendment language.

I thank the Senator from Ohio, and I thank the leadership.

Mr. METZENBAUM. I should point out, Mr. President—and I think the Senator from Alaska has stated it well—neither of us has had a chance to read the language that our staffs have been working on. We both have an understanding that should there be in error in draftsmanship, we know the intent of what we are trying to do.

If it is necessary to provide some clarification or provide some correction in the next session, we will work together on that action.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

The amendment (UP No. 1586) was agreed to.

The PRESIDING OFFICER. The question is on the motion to concur in the amendment of the House with a further amendment.

The motion was agreed to.

Mr. BAKER. I move to reconsider the vote by which the motion was agreed to, Mr. President.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Withclerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BRADLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New Jersey.

Mr. BRADLEY. Mr. President, I am very pleased, as is I am sure, the distinguished Senator who is presiding in the chair, with the resolution of the Alaskan railway issue, because, as the Senator knows, there is also in that provision a rail link between Philadelphia and Atlantic City. So on this eve of Christmas and in the depths of a recession, that railway offers hope to thousands who will travel to that mecca of the East, Atlantic City, expecting they will return across that causeway to the mainland of New Jersey a wealthy and successful tourist.

I appreciate the resolution of this issue. I thank the Senator from Ohio and the Senator from Alaska for opening the horizons again to thousands who in recent history had to leave the country or travel west to seek their fortune and who now have that opportunity just a short train ride away from Philadelphia. We all know what W. C. Fields said about Philadelphia.

Mr. President, let me again express appreciation to my colleagues and the Chair for presiding over this historic act for the Senate as an institution and for the State of New Jersey.

Mr. D'AMATO. Mr. President, I am very pleased that my very good friend from Alaska has been able to reach an accomodation with the Senator from Ohio, and I am hopeful that this accord will result in viable rail service in Alaska.

Let me only add that this measure also contains some funds—$2 million—for the rehabilitation or relocation of the present Amtrak rail passenger station at Syracuse, N.Y. The Syracuse station served over 79,000 passengers in the first 9 months of fiscal year 1982 and in fiscal year 1983, Syracuse expects a 9.3-percent increase over the previous year. The funds in this bill will be used to improve this station, which serves as a vital link in the upper New York State Empire Service.

Mr. President, I commend the Senate Commerce Committee members and staff who have worked so tirelessly on this measure.

Mr. WEICKER. Mr. President, included in this bill is $75 million in new authorization for Conrail Commuter Transition Assistance. I commend Senator PACKWOOD and the Commerce Committee staff for their efforts on this important matter. This new authority will provide the necessary funding to effect a smooth and effective transition of Conrail's Commuter Rail obligations to the Northeastern Commuter Rail Authorities. This provision is particularly appropriate in light of recent action by the Senate Appropriations Committee to provide $75 million in fiscal year 1983 Transportation Appropriations for the Con-

rail Commuter Transition. This additional funding, which I had requested, has been approved by the committee and the administration and is now included in H.R. 7019, a bill making appropriations for the Department of Transportation and Related Agencies for fiscal year 1983.

In an effort to make Conrail an efficient rail freight system, Congress in the Northeast Rail Service Act (NERSA) directed that Conrail be relieved of its commuter rail operations by January 1, 1983. Congress provided assistance to insure that either commuter agencies or the Northeast Commuter Services Corporation (NCSC), formerly Amtrak Commuter Services Corporation, could take over existing operations without disrupting service to the many communties and cities in the Northeast that depend on commuter operations. To effect this transition, Congress authorized $50 million in transition assistance for costs incurred by either the commuter agencies or NCSC. However, earlier this year, the Connecticut Department of Transportation (ConnDOT) and the Metropolitan Transportation Authority (MTA) as well as other authorities expressed their grave concern that funding made available under the Northeast Rail Service Act would be insufficient to meet the many administrative costs of the transition. MTA and ConnDOT also have a unique contract agreement under which ConnDOT and MTA currently lease service from Conrail. Congress made special recognition of this contract with Conrail in stating under section 1139(b) of NERSA.

> In providing for the distribution of such funds, the Secretary shall consider any particular adverse financial impact upon any commuter authority that results from the termination of any lease or agreement between such commuter authority and Conrail.

In addition to costs associated with Connecticut's contract with Conrail, commuter agencies must also purchase inventories, supplies, equipment, and certain facilities currently owned by Conrail, as well as computer systems to handle payroll, materials, and service contracts. Total costs alone for Connecticut and MTA's takeover of service from Conrail is about $70 million. The Federal Government should provide the $75 million in addition to $50 million already made available thus far to insure that these mandated costs to Connecticut and New York, as well as the other three States, will be adequately met.

Mr. President, insuring a smooth transition of Conrail's commuter activities to the respective commuter agencies is vitally important to my State of Connecticut; 40,000 commuters daily rely on commuter rail service on the New Haven line between New Haven, Conn., and New York City. This translates into an annual ridership of 23 million—more than the entire Amtrak System! Although no disruption in service is anticipated during the transition process, this continual shifting of rail service in this country between the private and public sector cannot help but create uncertainty in the minds of commuters. For the last two decades Connecticut commuters have seen commuter service vacillate between Penn Central, Conrail, and now the authorities themselves. ConnDOT Commissioner William Burns, in testimony before the House Energy and Commerce Committee, summarized the instability of commuter rail operations in saying:

> During the late 1960's, the Connecticut Department of Transportation worked very closely with the Metropolitan Transportation Authority (MTA) to develop a plan to save the Commuter Rail Service on the New Haven, Harlem, and Hudson lines. The service agreement was developed with the Trustees of the Penn Central Corporation to assure the viability of the service for the long term. Not only was the right-of-way in Connecticut leased by the Department for 60 years, but a service agreement was developed which was renewable each five years for the 60 year term. This assured the stability of this vital commuter service in the long term. When the Penn Central properties were merged with other Northeastern Railroads to form Conrail in 1976, a smooth transition occurred because the railroads were being merged. Today we see that organization being torn apart requiring new relationships to be developed.

Establishing new relationships does not happen overnight. ConnDOT and MTA have chosen to take over this service, but must complete labor negotiations, administrative transitions, and implementing operations, like computer systems by January 1, 1983. All of this is supposed to happen on top of daily frustrations which commuters in Connecticut and New York currently experience: Equipment that does not always work, an antiquated generating power source, and other uncertainties that prevail in the commuter rail business. Therefore I will not accept any additional uncertainty placed on the backs of the commuters of my State. I hope this transfer of operations will be the beginning of dependable rail service provided by a stable authority.

Since Congress and the Federal Government are responsible for initiating this transfer of commuter rail's obligations, the Congress and the Federal Government are responsible for providing adequate funding to cover the costs of the transition. Therefore, I urge my colleagues to approve this essential authority for commuter rail transition costs, and I thank my colleagues on the Commerce Committee for addressing this important issue.

Mr. BRADLEY. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Chair thanks the Senator from New Jersey for his kind words.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

(During the quorum call Mr. BRADY occupied the chair.)

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. (Mr. MATTINGLY). Without objection, it is so ordered.

Mr. NUNN. Mr. President, I ask unanimous consent that Randy Nuckolls of my staff be accorded the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REDUCTION, SUSPENSION, AND EXTENSION OF CERTAIN DUTIES

Mr. DOLE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 4566.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

> *Resolved*, That the House insist upon its amendment to the amendment of the Senate to the bill (H.R. 4566) entitled "An Act to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.
>
> *Ordered*, That Mr. Rostenkowski, Mr. Gibbons, and Mr. Frenzel be the managers of the conference on the part of the House.

Mr. DOLE. Mr. President, I move that the Senate disagree to the House amendment to the Senate amendment and agree to the request for a conference with the House and that the Chair be authorized to appoint conferees on the part of the Senate.

Before the Chair makes the appointment, I want to respond to a question of the distinguished Senator from Mississippi.

Mr. COCHRAN. Mr. President, I appreciate the consideration of the chairman of the Finance Committee of a request for a conclusion of this legislation on a tariff relating to surgical gowns and drapes. It is very important in my State and I know the Senator from Georgia (Mr. NUNN) has a very keen interest in this matter as well.

We understand that, at this point, if this is correct, the tariff relating to those items is not included in this measure.

Mr. NUNN. Mr. President, could we have order? I am trying to listen to this. I cannot hear the Senator from Mississippi and this is a very important matter in my State and in the Senator's State.

The PRESIDING OFFICER. The Senator is correct. The Senate will be in order.

Mr. COCHRAN. Mr. President, I wonder if the chairman of the committee can assure us that in spite of the fact that this item may not be included in the report of the conferees and may not be acted upon in the Senate tonight, this could be the subject of early hearings and some action be the Senate Finance Committee or the House Ways and Means Committee so we do have this before the two bodies early next year.

Mr. DOLE. In response to the question of the Senator from Mississippi, I might say to both the Senator from Mississippi and the Senator from Georgia that we have had an informal meeting on this because there was an objection to appointment of Senate conferees. That particular amendment was discussed. Senator ROTH, who is on the other side of the issue, indicated that he would be willing to try to work out something early next year.

Representative GIBBONS, who is chairman of that subcommittee of the Ways and Means Committee, promised it will be the first order of business in his subcommittee. It will come to the Senate, will come to the Finance Committee where it will be in the International Trade Subcommittee. I am going to do the best I can to promise that we will have hearings.

The tariff bill has about 49 provisions in it, affecting about 25 of our colleagues favorably. I know it affects two unfavorably, and also the Senator from Hawaii will want to ask questions when the conference report comes back concerning the tuna provision. I can give that assurance.

Mr. COCHRAN. Mr. President. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas.

The motion was agreed to and the Chair appointed Mr. DOLE, Mr. ROTH, Mr. DANFORTH, Mr. LONG, and Mr. BENTSEN conferees on the part of the Senate.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PAUL FINDLEY BUILDING

Mr. BAKER. Mr. President, the request I am about to make appears to have been cleared for action by unanimous consent. I will put a request now for consideration of the minority leader and other Members.

Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be discharged from the further consideration of H.R. 7406, a bill to designate the Federal building located at 600 East Monroe in Springfield, Ill., as the Paul Findley Building, and I ask for the immediate consideration of that measure upon discharge.

The PRESIDING OFFICER. Is there objection to the discharge?

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 7406) to designate a certain Federal building in Springfield, Illinois, the Paul Findley Building.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

Mr. ROBERT C. BYRD. There is no objection.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 7406) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, there are two measures here that I believe have been cleared on both sides and should be disposed of by unanimous consent.

JAPANESE-MANUFACTURED, NUMERICALLY-CONTROLLED MACHINE TOOLS

Mr. BAKER. Mr. President, I send a resolution to the desk on behalf of the distinguished Senator from Idaho (Mr. GRASSLEY) and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 525) to express the sense of the Senate urging Presidential action pursuant to Section 103 of the Revenue Act of 1971, 26 U.S.C. Section 48(a)(7)(D) to disqualify certain Japanese-manufactured, numerically-controlled machine tools from the United States investment tax credit.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

Mr. ROBERT C. BYRD. There is no objection.

There being no objection, the Senate proceeded to consider the resolution.

Mr. BAKER. Mr. President, this is a sense-of-the-Senate resolution. I send to the desk a list of cosponsors to the resolution.

The cosponsors are as follows:

Mr. D'AMATO, Mr. CHILES, Mr. JEPSEN, Mr. DIXON, Mr. HEINZ, Mrs. HAWKINS, Mr. DOLE, Mr. HUDDLESTON, Mr. GARN, Mr. HOLLINGS, Mr. PERCY, Mr. TSONGAS, Mr. KASTEN, Mr. DANFORTH, Mr. BENTSEN, Mr. BOSCHWITZ, and Mr. MATTINGLY.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 525) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 525

Whereas the Government of Japan has selected the United States high-technology industry in numerically-controlled machine

tools for domination through unfair trade practices; and

Whereas the Petition to the President submitted by Houdaille Industries, Inc., on May 3, 1982, thoroughly documents continuing anticompetitive cartel policies and practices, including the financing of a machine-tool cartel with multi-billion dollar off-budget subsidies earned from bicycle- and motorcycle-race wagering, employed by the Government of Japan to further its industry-targeting goals, and

Whereas as a consequence of the discriminatory acts and policies of the Government of Japan, including its tolerance of an international machine-tool cartel, the Government of Japan has unjustifiably restricted United States commerce in numerically-controlled machining centers and punching machines: Now, therefore, be it

Resolved, That it is the sense of the Senate that the President of the United States should exercise immediately his authority under Section 103 of the Revenue Act of 1971, 26 U.S.C. 48(a)(7)(D), to issue an Executive Order disqualifying Japanese-manufactured, numerically-controlled machining centers and punching machines from the United States investment tax credit until the Government of Japan provides persuasive evidence to the President of the United States that these and other unfair and discriminatory acts and policies unjustifiably restricting United States commerce have ceased.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HARRY S TRUMAN NATIONAL HISTORIC SITE IN THE STATE OF MISSOURI

Mr. BAKER. Mr. President, I yield to the distinguished Senator from Missouri so that he may ask for the discharge of a particular measure from a committee.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the Energy Committee be discharged from further consideration of S. 3077, to establish the Harry S Truman National Historic Site in the State of Missouri, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the discharge? Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 3077) to establish the Harry S Truman National Historic Site in the State of Missouri and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill.

UP AMENDMENT NO. 1587

Mr. BAKER. Mr. President, I send an amendment to the desk on behalf of the distinguished Senator from Idaho (Mr. McCLURE) and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to its consideration?

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) on behalf of Mr. McCLURE, proposes unprinted amendment numbered 1587.

Mr. BAKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the enacting clause and insert:

SECTION 1. (a) In order to preserve and interpret for the inspiration and benefit of present and future generations the former home of Harry S Truman, thirty-third President of the United States, the Secretary of the Interior (hereinafter referred to as the "Secretary") is authorized to acquire by donation, purchase with donated or appropriated funds, transfer from another Federal agency, or otherwise, the residence and real property known as 219 North Delaware Street in the city of Independence, Missouri, together with such property adjacent thereto as passed to Bess Wallace Truman upon the death of her husband. The Secretary may also acquire, by any of the above means, fixtures, and personal property for use in connection with the residence.

(b) The property acquired pursuant to subsection (a) is designated as the Harry S Truman National Historic Site and shall be administered by the Secretary in accordance with the provisions of law generally applicable to units of the national park system, including the Act entitled "An Act to establish a National Park Service and for other purposes", approved August 25, 1916 (39 Stat. 535; 16 U.S.C. 1–4) and the Act of August 21, 1935 (49 Stat. 666, 16 U.S.C. 461–467). The Secretary is further authorized, in the administration of the site, to make available certain portions thereof for the use of Margaret Truman Daniel subject to reasonable terms and conditions which he may impose.

(c) There is authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 1587) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEAHY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 3077) was passed, as follows:

S. 3077

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 7. (a) In order to preserve and interpret for the inspiration and benefit of present and future generations the former home of Harry S Truman, thirty-third President of the United States, the Secretary of the Interior (hereinafter referred to as the "Secretary") is authorized to acquire by donation, purchase with donated or appropriated funds, transfer from another Federal agency, or otherwise, the residence and real property known as 219 North Delaware Street in the city of Independence, Missouri, together with such property adjacent thereto as passed to Bess Wallace Truman upon the death of her husband. The Secretary may also acquire, by any of the above means, fixtures, and personal property for use in connection with the residence.

(b) The property acquired pursuant to subsection (a) is designated as the Harry S Truman National Historic Site and shall be administered by the Secretary in accordance with the provisions of law generally applicable to limits of the national park system, including the Act entitled "An Act to establish a National Park Service, and for other purposes", approved August 25, 1916 (39 Stat. 535; 16 U.S.C. 1–4) and the Act of August 21, 1935 (49 Stat. 668; 16 U.S.C. 461–467. The Secretary is further authorized, in the administration of the site, to make available certain portions thereof for the use of Margaret Truman Daniel subject to reasonable terms and conditions which he may impose.

(c) There is authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MESSAGE FROM THE HOUSE

The conference report on H.R. 6211, the Surface Transportation Act of 1982, and other matters received from the House of Representatives at that time are listed in the message of 9:58 p.m. under "Messages From the House."

Mr. BAKER. Now, Mr. President, this is the conference report on the highway bill which has been adopted by the House of Representatives. I feel a little like a basketball referee throwing the ball up in the air waiting for the tipoff.

Mr. INOUYE. Let us vote.

Mr. BAKER. My friend from Hawaii suggests we vote. I have never been more supportive of such a suggestion.

Mr. President, I ask that the Chair lay before the Senate a message on S. 6211.

The PRESIDING OFFICER. The Senate papers are not at the desk.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

VIRGIN ISLANDS SOURCE INCOME—CONFERENCE REPORT

Mr. BAKER. Mr. President, it has been brought to my attention that there is a conference report which is cleared on both sides and has been acted on, I believe, in the House of Representatives. I would like to take that up now briefly, in advance of the time we begin debate on the conference report on the highway bill. If there is no objection to that, Mr. President, I would like to proceed in that manner.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of the conference report to accompany H.R. 7093.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I submit a report of the committee of conference on H.R. 7093 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate numbered 2, 3, and 4, to the bill (H.R. 7093) to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands or Virgin Islands source income, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 21, 1982.)

Mr. ARMSTRONG. Mr. President, I am delighted Congress today is passing this legislation providing emergency benefits for the disabled. For me, this ends a 4-month effort to enact corrective legislation to end abrupt and unfair termination of benefits to many of our disabled.

This is, indeed, the best Christmas present Congress could provide to those wrongfully terminated from disability rolls.

This legislation is simple. It authorizes the continuation of benefits during appeal for disabled recipients declared, upon initial review, to be ineligible. The legislation also authorizes the Secretary of the Department of Health and Human Services to slow down case reviews by States unable to handle their caseload of reviews.

This legislation is in response to a 1980 law signed by President Carter mandating the review of all social security disability cases by 1983. Of cases thus far reviewed nationally, about 46 percent have had benefits terminated. On appeal to administrative law judges, however, benefits have been restored in about 60 percent of the cases. While cases are appealed, benefits—the financial lifetime to many disabled—were terminated, meaning that many disabled lost all income for the 6 to 9 months their cases were appealed—only to have the benefits restored retroactively.

Much of the credit for passage of this legislation belongs to Mrs. May Reser, founder of the Colorado Disabled Americans Workers Security, for alerting me to this horrible catch 22 situation, and the need for corrective legislation. In August 30 disabled Coloradans accompanied Mrs. Reser and gave me conclusive evidence that benefits were being wrongfully terminated. In fact, one Coloradan had medical opinions from five doctors verifying his total and permanent disability. Yet benefits were terminated, and with only 60 days' notice.

This bill will stop wrongful termination of benefits.

In Colorado, 17,106 persons receive social security disability benefits. Since 1979, about 8,700 cases have reviewed with some 40 percent of those being declared ineligible. Many of these cases are now under appeal. Continuing benefits during appeal goes a long way toward halting unfair disruptions in the lives of our legitimately disabled.

I also support a provision included in the bill that was developed in consultation with Senator RUSSELL LONG and Representative JAKE PICKLE, House Social Security Subcommittee chairman. This provision delays for 6 months the implementation of a rule reducing social security benefits to spouses of social security retirees. In effect this provision assists low-income women who otherwise would have their social security benefits reduced, beginning this month, by the amount of Government pension they earn. This provision will give Congress time to address this social security pension offset issue next year as part of the overall effort to make social security solvent.

The final passage of this bill is the capstone of the effort to make 1982 the National Year of the Disabled. Congress earlier this year adopted a resolution proclaiming 1982 as a year in which Americans dedicate themselves to bring the disabled more into the mainstream of life.

Mr. President, like most bills that finally get enacted, there are a number of persons to whom proper credit should be accorded. I commend Senators COHEN, LEVIN, DOLE, and LONG, Representative JAKE PICKLE and congressional staffers Dr. Carolyn Weaver, Mike Stern, Joe Humphries, Susan Collins, Linda Gustitus, Janice Gregory, Erwin Hytner, Brian Weidmann, Howard Propst and Dick Wadhams for their contributions to this legislation.

Mr. President, I want to express my sense of accomplishment and approval at the passage of this legislation. I especially want to pay tribute to my colleague from Maine (Mr. COHEN) and my colleague from Michigan (Mr. LEVIN) for the tremendous sense of urgency which they brought to this task, which has resulted in the passage of this legislation. I make the observation again that this is about the finest Christmas present that a group of people who have been wrongfully thrown off the disability rolls could possibly receive.

Mr. MITCHELL. Mr. President, I would like to clarify the effective date of the bill and its application to existing law. Is it the Senator from Hawaii's understanding that the bill is intended to be prospective only, and that no inference is intended from the bill regarding the meaning of existing law?

Mr. MATSUNAGA. The Senator from Maine is correct. I understand that there are controversies now pending between taxpayers and the Government of the Virgin Islands concerning existing law. Among the matters at issue is whether under existing law the Virgin Islands can tax U.S. recipients who are nonresident in the Virgin Islands on passive income from Virgin Island sources. No inference is intended from the bill about the status of existing law. As author and introducer of the companion Senate bill, I assure the Senator from Maine that the bill is intended to have no effect whatsoever on these pending tax controversies. As the effective date provision of the bill makes clear, the 10-percent rate is intended to apply prospectively only.

Mr. MITCHELL. I thank the gentleman.

Mr. DOLE. Mr. President, we are ready to consider the conference report on H.R. 7093, a bill concerning the rate of tax on Virgin Islands source income and the payment of benefits under social security disability insurance. The House approved this conference agreement earlier this evening, and I hope the Senate will now give final approval to this legislation and send it to the President for signature. Considerable effort has

been put into arriving at this agreement, and I believe the result meets with the satisfaction of the interested parties.

DISABILITY BENEFITS

Mr. President, the bill before us deals with several issues regarding disability benefits that have been of concern to several Members of the Senate, including Senators COHEN, LEVIN, HEINZ, ARMSTRONG, and others. Under the conference agreement, both disability benefits and medicare coverage would continue to be paid after eligibility is determined to have ceased, in cases where that determination is appealed to an administrative law judge. Benefits would continue up to the month before the decision of the administrative law judge. If the termination decision is upheld, these payments would be recoverable as overpayments. This provision should insure that no one's rights to disability payments would be suspended prematurely pending appeal, which can cause hardship in many cases.

The conference agreement on H.R. 7093 also provides authority for the Secretary of the Department of Health and Human Services to alter the pace of State reviews of disability cases. Specifically, the number of cases sent to the States for review can be reduced below the rate specified in the 1980 amendments. Such a decision by the Secretary will be based on consideration of the extent of any backlogs, expected number of new applicants, and projected State agency staff levels. Further, the Secretary is required to report to the tax-writing committees of each House twice each year on the number of continuing eligibility reviews, termination decisions, reconsideration requests, and termination decisions overturned at the reconsideration or hearing level.

Mr. President, this bill also changes the rules governing evidentiary hearings in reconsiderations of disability benefit terminations. No later than January 1, 1984, the Secretary must provide opportunity for a face-to-face evidentiary hearing before reconsidering decisions to terminate benefits for disability beneficiaries. This requirement is in addition to existing requirements for hearings before an administrative law judge. This is a step in the right direction. It should improve the quality of the reconsideration decision and help reduce the number of people who must go on to request an appeal before an administrative law judge. With the heavy backlog of cases at the administrative law judge stage (about 150,000 cases), hearings can take 6 to 9 months or even longer.

PUBLIC PENSION OFFSET

Further, the conference agreement includes a provision which modifies the social security public pension offset that was enacted in 1977. Presently, social security dependents' benefits (wives, husbands, widows, and widowers) are to be reduced dollar-for-dollar on account of any public pension which the individual receives as a result of his or her own employment in Federal, State, or local government. This provision recently became fully operative—for dependents becoming eligible for a public pension and filing for social security benefits after November 1982.

The conference agreement modifies the offset provision in the following way: For men and women becoming eligible for a public pension in the next 6 months (prior to July 1983), no offset will be applied if the individual is dependent upon his or her spouse for one-half support. In my view, this is a fair solution, albeit temporary, to the problem of the impact of the pension offset on low-income retirees. This provision will provide full protection to dependent spouses so that they may draw both their social security dependents' benefit and their public pension, should they become eligible for that pension in the next 6 months. Likewise, the expiration date on this provision will allow Congress to consider alternative permanent solutions to the pension offset in the context of a comprehensive social security financing bill next year.

TAX RATE ON VIRGIN ISLANDS SOURCE INCOME

Finally, Mr. President, as I indicated at the outset this bill does resolve the matter of the rate of tax applied to payments of passive investment income from Virgin Islands persons to U.S. persons. Under the agreement, the rate of tax will not exceed 10 percent, and such treatment would apply to dividend payments out of earnings and profits accumulated in taxable years beginning on or after date of enactment. The Virgin Islands Government could reduce the maximum rate in its discretion, and can impose and require withholding of a tax up to the maximum 10 percent rate on payments of passive income to U.S. persons.

Mr. President, the matters dealt with by H.R. 7093 have been the subject of considerable interest and hard work in this session, and I am glad that they have been satisfactorily resolved. I urge adoption of the conference report on H.R. 7093 so that we may speed it to the President for signature.

Mr. LEVIN. Mr. President, by the adoption of this conference report, we are not taking action to relieve the injustice which has been suffered by literally hundreds of thousands of disabled Americans. This Congress in its lameduck session is finally taking action which is worthy of our approach to disabled people.

A few months ago, Senator COHEN, chairman of the Governmental Affairs Subcommittee, and I, as the ranking minority member, held hearings on the question of the removal of disabled Americans from the social security disability rolls. We had eloquent testimony of needless suffering, of literally 200,000-plus people who are being removed from those rolls improperly and who would be reinstated to those rolls about a year later by actions of administrative law judges. But during that year there would be needless suffering, excruciating suffering by those people through the loss of those benefits and the loss of medicare benefits as well.

We discovered that we should take at least one action on a temporary basis, and that would be to continue those benefits through the appeals stage, because we found 600,000 persons in the disability program will be subject to review. Of that number, some 45 percent will be terminated and 50 percent of those terminated will appeal. It will take 9 to 12 and in some cases even 18 months for the appeal process to be completed. Without this legislation, severely disabled people who appeal would be without any benefits and any medical coverage. This is indeed a horrible prospect in light of the prospect that two-thirds of the people appealing will be reinstated. This legislation saves us from that injustice. Although there are still many problems within the review process itself, at least the beneficiaries subject to that review will continue to receive their disability benefits.

Those of us who have studied the disability program are committed to substantive major reform in the next Congress. I look forward to joining those efforts next year to grapple with some very difficult and controversial issues involving fundamental problems in the program. In the meantime, it is satisfying to know that we will not be continuing the tragedies we have experienced in the past.

I want to commend my friend from Maine for his leadership in this matter.

As the Senator from Colorado said, it is a well deserved Christmas gift. I want to commend, in addition to my friend from Maine, Senator DOLE for his great help, Senator LONG, Senator ARMSTRONG, Senator SASSER, Senator METZENBAUM, Senator RIEGLE, Senator DOMENICI, Senator HEINZ, Senator DURENBERGER, Senator BOREN, and so many others whose help made it possible for us to finally to do justice to hundreds of thousands of people who have suffered needless injustice.

I also would like to thank Congressman PICKLE in the House whose willingness to modify his own approach in this matter made it possible for us to act in time, barely in time but in time.

I yield the floor and I thank the Chair.

Mr. COHEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. COHEN. Mr. President, let me just take a few moments to express my thanks and commendation to the Senator from Michigan, who really performed a unique service on the Governmental Affairs Subcommittee in the oversight of Government management, and I particularly thank him for the statement that he has made this evening and the way which he has conducted himself throughout his term of office in the Senate.

I should note that it stands in rather stark contrast to some of the other statements that were made in the other body this evening whereupon one of the Members of the leadership of the opposite party took to the floor to denounce the current administration, the Reagan administration, for being cruel and heartless and throwing people out in the streets unnecessarily.

I simply point out that the Senator from Michigan has never conducted himself on the committee or, to my knowledge, in this body in any way but in the most bipartisan and certainly nonpartisan spirit.

Contrary to the assertions made in the other body, this was not a Reagan administration proposal. In fact, it originated with the Carter administration and was voted upon by a previous Congress.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Maine.

Mr. COHEN. The problem is not one of partisanship but one of lack of guideline of having conflicting standards, of having this review process rushed through with inadequate staff and case officers being prepared to handle the caseload. The problems are multitudinous in nature, and they are also not unique to any one administration.

I should like to say by virtue of the statement made by the Senator from Michigan, we will have to take a similar approach to resolving the social security dilemma as well, not in a spirit of partisanship of one party seeking to exploit the vulnerabilities of disadvantages of the other to the great detriment of the people of this country but, rather, in a true spirit of bipartisanship that effects the payment of social security benefits to millions of people throughout the country.

Mr. President, Congress can delay no longer in providing relief to the thousands of individuals whose disability benefits are being erroneously terminated only to be reinstated after a lengthy appeals process has run its course.

Last May, Senator LEVIN and I held a hearing in our Oversight of Government Management Subcommittee to investigate numerous reports from all over the country that truly disabled people are having their benefits terminated as a result of the new reviews.

What we found was most disturbing. Benefits are being discontinued in more than 40 percent of the cases reviewed—far above the 20-percent rate predicted by the General Accounting Office. In the State of Maine alone, benefits for more than 1,200 people have been ended since the reviews began, despite the fact that in a number of cases the claimants still appeal to be severely disabled and unable to work. And about two-thirds of the claimants who appear are eventually reinstated to the program after a hearing before an administrative law judge.

The situation is both absurd and cruel. It makes no sense to inflict pain, uncertainty, and financial hardship on disabled workers and then tell them, "sorry, we made a mistake." It makes no sense to overburden the State agencies and further clog the appeals process with cases where the individuals clearly remain disabled.

The tragedy is that, in waiting for reinstatement, these severely disabled persons and their families must go without benefits for months—or even a year or more—due to the tremendous backlog of appeals. One of my constituents, who was reinstated to the program last August, has been without his disability checks for 16 months. Lacking any income and too proud to accept welfare, this desperate man recently attempted to take his own life.

This is not an isolated example. Witnesses at our hearing recounted case after case in which truly disabled individuals lost their benefits and suffered financial hardship and emotional trauma because of an unjust system.

We identified several flaws in the continuing disability investigations:

First. The SSA does not provide the claimants with an adequate notice explaining the gravity of the review and the beneficiaries' responsibilities. Instead, a misleading notice is provided which simply informs the claimant that his case is "under review" to determine if he" continues to meet" the requirements.

Second. No face-to-face interview is held with the claimant until the hearing before an administrative law judge. This absence of personal contact gives the claims examiner an incomplete picture of the claimant's condition and reinforces the beneficiary's feeling of bureaucratic indifference.

Third. Decisionmakers use different and, at times, conflicting standards to determine disability. For example, there is confusion on the proper evaluation of a claimant's pain.

Fourth. In a number of cases, the medical files which the claims examiners rely on are incomplete and lack current medical evidence from the treating physician.

Fifth. No presumption of validity is accorded the initial decision which entitled the claimant to receive benefits. Instead, as the General Accounting Office has said, a system of "zero-based eligibility" is used, in which the claimant must prove all over again that he is entitled to benefits.

Sixth. In a number of cases, individuals whose medical conditions have actually deteriorated since they started receiving benefits many years ago are having their benefits ended.

In short, our hearing revealed a disturbing pattern of misinformation, incomplete medical examinations, inadequately documented reviews, bureaucratic indifference, erroneous decisions, financial and emotional hardships, and an overburdened system.

The Social Security Administration has taken some steps, such as improving the notice, to remedy these problems. But rectifying such fundamantal deficiencies will require comprehensive legislation, I applaud Senator DOLE for his willingness to thoroughly review the disability program next year. Since it will take time for Congress to consider reforms in the disability program, we must act now to provide short-term relief to disabled individuals whose benefits are being terminated and then reinstated.

Slowing down the number of cases reviewed would help both claimants and the State agencies which conduct the investigations. Currently, case files are literally overflowing out of boxes, and unreasonable burdens have been placed on many State agencies, particularly in those States where personnel freezes have prevented the hiring of needed staff. By directing the Secretary to proceed with the reviews at a pace which recognizes the necessity for careful evaluations and a more even workload, this legislation would improve the quality of the decisions and lessen the huge backlog of cases. It provides the Secretary with the flexibility that he needs to make adjustments in the State's workload after consulting with the State administrators.

In addition, by continuing benefits pending appeal, this legislation would eliminate the needless financial burden now imposed on disabled people who are mistakenly removed from the program, despite being unable to resume work. Currently, claimants who are successful in appealing their termination decisions receive back benefits, but only after months of disruption and delay. Our proposal would prevent the interruption of benefits which these individuals eventually would receive anyway.

To control the coast of this proposal and to discourage frivolous appeals, the legislation would require individuals whose terminations are upheld by an administrative law judge to repay the benefits paid pending appeal unless repayment would cause a severe financial hardship.

Again, I emphasize that fundamental reforms in the SSA review proce-

dures are absolutely essential, Senator LEVIN and I, along with several other Senators, have proposed comprehensive legislation to make the system more equitable and efficient. Congress would, however, be remiss in waiting for comprehensive legislation to solve these urgent problems. While we should continue to seek long-term reforms, including a medical improvement standard, we should act immediately to provide protection for the disabled Americans who are the victims of a faulty and unfair system.

Disability benefits are not welfare. A worker earns this insurance through the social security taxes that are deducted each week from his paycheck, and he must have worked a minimum amount of time in order to qualify for those payments. He must also be so disabled that he not only cannot perform the work that had been doing but cannot engage in any kind of substantial gainful activity which exists anywhere in the country.

Surely when we are dealing with the most disabled workers in our society, we should enact every safeguard to insure that the Government does not add another burden to the ones they already must bear.

I thank Senator DOLE for working with us in fashioning a solution to this problem, and I commend Senator LEVIN for his distinguished leadership and hard work on this issue.

Mr. LEVIN. Mr. President, I thank my friend from Maine for his very flattering remarks.

I agree with his comments about the importance of bipartisanship if we are going to solve the numbers of problems which face us in this country, including the social security problem. I look forward to a long continuing association with him on that subcommittee.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DISABILITY CHANGES—H.R. 7093

Mr. SASSER. Mr. President, the need for modification of the existing disability review process in unequivocal. The existing disability determination system is seriously flawed and in need of repair. The erroneous termination of benefits, which occurs with an unacceptable frequency, not only undermines the fundamental concepts of social justice and equity, but adversely impacts upon thousands of disabled Americans who rightfully enjoy a legitimate claim to such benefits by virtue of their contribution of payroll taxes in their working years. This situation is simply intolerable and must be changed.

Today, I stand before this Senate and urge my colleagues to join me in supporting this much-needed corrective legislation. To the more than 4½ million disabled beneficiaries in this Nation, this legislation is crucial. We owe it not only to them, but to ourselves to reinforce the basic notion of fairness which underscores our Democratic process.

The problem of disability terminations has attracted considerable bipartisan attention for the better part of the past year. There have been no fewer than 13 pieces of legislation to deal with this problem introduced in the Senate alone during the current session. Indeed I offered a bill in June which subsantially incorporates several of the provisions which appear in the legislation we are considering today.

Over the past 6 months, I have worked with several of my colleagues, Senators COHEN, LEVIN, METZENBAUM, HEINZ, RIEGLE, in an attempt to fashion an effective compromise solution to the problem. The measure which stands before this Senate today adequately represents such a bipartisan compromise and should be adopted.

Very briefly, I would like to outline the current problem. In 1980, Congress passed disability amendments which were ostensibly designed to curb the dramatic increase in the social security disability program during the 1970's. A key provision of those amendments called for continuing disability reviews of those currently on the rolls in an attempt to weed out those currently on the rolls in an attempt to weed out those who were not eligible for disability benefits. I supported these changes then, and I continue to support them now. If people do not belong on the disability rolls, then they should be removed. This provision was never intended, however, to justify wholesale terminations of benefits.

By accelerating the implementation of these continuing disability investigations some 9 months ahead of time, the Reagan administration has done precisely that. The desperation and despair faced by many disabled beneficiaries, who in numerous cases lose their only source of income, has resulted in heart attacks and in a number of instances suicide. In my home State of Tennessee, it is estimated that as many as 2,500 beneficiaries have lost their benefits due to erroneous decisions on the part of the State determining agencies. Nationwide, it is estimated by the Social Security Administration that between 60 and 70 percent of all individuals who appeal these decisions are reinstated at the administrative law judge level. This rate of error is totally unacceptable.

This legislation makes the following changes: First, it would provide for the continuation of benefit payments until the administrative law judge level of appeal whereas currently benefits are not available through the appeals process; second, it would allow the Secretary of HHS to slow down the number of cases sent to the State agencies (current caseloads and backlogs are contributing to pressure to review cases and this is resulting in errorenous decisions); third, it would institute a face-to-face evidentiary hearing at the reconsideration level of appeal, currently face-to-face contact does not occur until the administrative law judge; fourth, it would provide for semi-annual reports to Congress on the status of the disability review process.

These changes would provide muchneeded temporary improvements in the current system. They are reasonable and should be adopted. During the past week I have talked with Chairman PICKLE of the Social Security Subcommittee and he has indicated that this legislation is acceptable.

During recent conversations with my colleagues, there is one overriding concern which punctuates the need for this legislation, that is the urgency with which this legislation must be dispatched. As we all know, time is running short. Thus it is absolutely essential that we act on this matter now. It must also be realized that this legislation will merely act ot provide temporary relief to those facing termination of their disability benefits. It will be necessary to address major structural problems in a comprehensive manner in the near future. But we must rectify current inadequacies now. The problem has gone on too long and improvements are long overdue.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, what is the business before the Senate?

The PRESIDING OFFICER. There is no pending business.

Mr. BAKER. Mr. President, I believe we did not yet lay before the Senate the conference report on the highway bill. Is that correct?

The PRESIDING OFFICER. That is because we do not have the Senate papers on the conference report.

Mr. BAKER. Because we do not have the Senate papers, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STENNIS. Mr. President, will the Senator yield to me?

Mr. BAKER. Yes, Mr. President.

Mr. STENNIS. Mr. President, recently on the floor, we had reference to agricultural legislation for future years. I intended to participate in that

debate and have a prepared statement on what was obtained on other urgent matters. I did not reach the floor in time. As a substitute, I ask unanimous consent that my remarks be printed in the RECORD at this place.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE PLIGHT OF OUR FARMERS

Mr. STENNIS. Mr. President, from time to time, throughout the history of this Nation, our farmers have experienced difficulties which have caused them a temporary setback. At each of these times, the farmers have hitched up their belts and pulled to get back on the road to profitably providing this Nation and others with the agricultural goods they needed to survive.

Several years ago, it began to look like we experiencing one of those temporary setbacks. However, as the situation has become alarmingly worse, it has become apparent that this time of difficulty is not temporary. In February of this year, I spoke about farm problems and asked this body to work toward some solutions. We have seen some efforts made but no real solutions have evolved.

The American farmer today faces serious and critical economic problems of unprecedented proportions. Many farmers have already been forced to liquidate their assets. Others face the prospect of financial ruin. If we do not act soon to relieve some of the economic pressures on our farmers, we may find ourselves in the middle of the worst disaster ever to hit the farming industry, that is, the wholesale bankruptcies of even more farmers than are failing at this time.

The difficulties our farmers are now experiencing have come about as a result of several happenings over the past few years. In 1980 there was a severe drought which ruined most crops. Also that year the administration imposed an embargo of certain agricultural goods to the Soviet Union and we have had trouble with our export market ever since. In 1981 farmers produced record crops in almost every commodity, causing an oversupply and bringing prices way down. Inflation has been especially burdensome on farmers in light of the fact that while the cost of production has soared tremendously, the prices of goods have risen very little. Because farmers are almost completely dependent upon the availability of affordable credit, the evil of high interest rates has perhaps been harder on farmers than any other group.

These difficulties are especially hard on a nation that so many other nations depend on. Even if it would, the United States cannot escape its destiny of being the breadbasket of the world. In 1980 the Earth's population was 4 billion. This is projected to rise to 6.2 billion by the year 2000. Future demands on the American farmers for the production of foodstuffs will increase tremendously. Of the world's 173 nations, only eight are net exporters of agricultural products. The U.S. exports more than the other seven combined.

American farmers are without question the most efficient in the entire world. They have shown that they can outproduce the farmers of any other country. In fact, a part of the farm problem arises from the very efficiency of our farmers. Record crops in 1981, and now in 1982 have left storage facilities filled with unsold stocks and have depressed prices.

The importance of our agricultural exports cannot be overemphasized. Since 1970 the value of U.S. agricultural exports has increased more than sixfold. In 1981 our total agricultural exports were $43.8 billion, and our net agricultural trade balance was $26.5 billion. This surplus went a long way in off-setting our chronic nonagricultural trade deficit. Nevertheless, this year, for the first time since 1969, the value of farm exports is expected to fall. The Department of Agriculture has predicted that because of lower prices for most major products the export value will probably decline from the 1981 level of $43.8 billion to around $42.5 billion.

I have already mentioned that the 1981 bumper farm crop depressed prices severely. In 1980, Mississippi farmers received an average price of $7.75 per bushel for their soybeans. In November, they were receiving only $5.60 per bushel. Cotton farmers in Mississippi received almost $.77 per pound in 1980, as compared to less than $.50 per pound now.

While the prices for soybeans, cotton and almost every other commodity have been dropping, the cost of producing the commodities has continued to rise. The price of fertilizer is up 7.4 percent in 2 years and the price of fuel has doubled in that time. The price of diesel fuel alone has risen over 370 percent since 1975.

Dramatic increases in interest rates have placed extra stress upon the farmers. The cost of credit obtained at commercial lending institutions has risen as much for farmers as any other business, making it almost impossible for farmers to borrow commercially. Those who can borrow commercially are paying interest rates of 14 percent or more. As recently as 1978, Farmers Home Administration, "the lender of last resort," was charging a mere 8 percent on their standard operating and annual production loans to farmers. Currently, this figure is 11.5 percent, and this is down from the 14¼ and 16 percent respectively that was being charged on these loans. The Commodity Credit Corporation has increased the interest on its crop loans from 6 percent in 1970, to a current rate of over 9 percent and this is down from the 14⅛ percent that was being charged earlier this year.

Farm debt has increased from $136 billion in 1979 to an estimated $195 billion in 1982. Farm debt rose 11 percent in 1981 alone. At the same time, the real value of farm assets has declined.

Because of the factors that I have mentioned, net farm income dwindled from $32.3 billion in 1979 to an estimated $19 billion in 1982. In terms of real income (that is, measured in 1967 dollars), the net farm income was less in 1980 and 1981 than in any year since the depression year of 1933. Net farm income in 1982 is not expected to rise above the severely depressed 1981 level. Some experts have predicted that the net farm income in 1982 in real terms (1967 dollars) will be less than in 1933, the lowest on record.

The combination of these factors has caused net farm income in Mississippi to be at its lowest level in 18 years. At the same time, the total farm debt of our Nation's farmers has more than doubled in just the last 6 years.

Unfortunately, many of our farmers have reached the conclusion that now is the time to get out of farming. Many who can afford to, are selling their farming operations for what little they can get out of it and many who cannot sell are just quitting and getting anything they can out of what they have. This situation is causing our agricultural land to be sold to the highest bidder, who in many cases is someone with foreign interests or someone who knows nothing about farming and the land is being used for purposes other than the production of agricultural goods.

I believe that agricultural land is an institution that must be protected for the production of agricultural goods and should be managed by farmers who know what to do with it. I would be in favor of a special category for this land which would insure that, down through the ages, no matter what happens, this land will be used for the production of food and fiber for our people.

This thought is a long-term idea I have, but the most prevailing thing before us is what to do to solve the dilemma facing farmers now.

The situation cries out for decisive and positive action. The Congress has already provided the Secretary of Agriculture with some of the tools that he needs. Urgent and more aggressive actions are needed to balance supply with demand and to remove burdensome surpluses.

The Secretary of Agriculture has responded to the surplus problem by invoking provisions of the law to reduce planting of some commodities on a vol-

untary basis for the 1983 crop. Acreage reduction programs for other crops are in the works. This is a good first step but strong followup action is essential.

The Congress has also authorized the Secretary of Agriculture to use cropland diversion payments to make the needed supply adjustments as rapidly as possible, and the Secretary has, at least partially, implemented this program.

The proposed payment-in-kind program is certainly worthy of some very serious consideration. The use of Commodity Credit Corporation stocks and farmer-owned reserves as payments to farmers who reduce their acreage would serve several useful purposes. It would reduce the ever-increasing carryover of commodities that are depressing farm prices, it would reduce the amount of acreage in production, offsetting the past 2 years of record-breaking production which have also depressed prices, and it would reduce the amount of deficiency payments and crop purchases the Department of Agriculture would have to make.

In addition, an all-out effort should be made to increase consumption, especially in export markets. There should be more effective use of Commodity Credit Corporation credit, the food for peace program under Public Law 480, the Export-Import Bank loans. I also favor proposals to authorize the Secretary to offer bonuses from Commodity Credit Corporation stocks to foreign purchasers who have a good record of trade, as long as these bonuses do not interfere with possible sales.

The embargo which we imposed on the sale of grain to Russia contributed to depressed farm prices. It also damaged the reputation of the United States as a reliable exporter. We must remove the uncertainty among our foreign customers and reestablish our reputation as a reliable trading partner. History has shown that the practice of singling out farm exports as a foreign policy tool has had very adverse results.

We cannot, of course, overlook the vital importance of bringing the current excessively high interest rates down to an affordable level. This is an absolute must if our farmers are ever to get on a sound financial level.

Over the years, I have discussed the agricultural problem with many farmers from Mississippi and other States. I have concluded that most, if not all, of them would prefer to farm without reliance on the Federal Government but that this is impossible to do with the current fiscal and financial situation.

There is, of course, disagreement over the extent to which the Federal Government should be involved in agriculture. However, most people believe that because of the unique conditions of the agricultural economy and its importance to the Nation some Government support is absolutely necessary. The weather, interest rates, production costs, and domestic and foreign market conditions, as well as the inherent unpredictability of farming itself, combine to make farmers vulnerable and Government intervention necessary.

Although some farmers were dissatisfied, in view of the serious differences of opinion about Federal Government involvement in agriculture, I believe that the Agricultural Act of 1981 was about as good as could be passed under the circumstances. However, due to circumstances beyond the control of farmers, this act has failed to provide the proper support for the agricultural community.

Now is the time to look in other directions for some relief. S. 3074, as reported by the Committee on Agriculture, Nutrition, and Forestry, goes a long way toward providing some of this relief and I hope that the Senate can support it and see that it is sent to the President before this Congress adjourns. Ordinarily, I do not favor quick action on a matter of this importance, but because our farmers are in such terrible shape, we cannot wait any longer.

The American farmer must not be allowed to become a vanishing breed. The farm population in the United States in 1933 was 32.3 million, or 26 percent of the entire population. By 1981 the farm production had dwindled to 5.8 million, or 2.5 percent of the population.

We cannot allow this remaining 2.5 percent to go bankrupt and get out of the farming business. Too many people are depending on their productivity for us to allow this to happen. We must help them by providing the proper incentives to farm with the reasonable expectation of a fair profit and without unreasonable intervention by the Government. I pledge myself to do everything I can to bring this about.

METCALF WILDERNESS AND MANAGEMENT AREA

Mr. BAKER. Mr. President, I yield to the distinguished Senator from North Carolina (Mr. HELMS).

Mr. HELMS. Mr. President, yesterday, for the entire day, efforts were made to have the Senate consider the so-called PIK bill, the payment-in-kind farm bill. One Senator, exercising his rights properly, placed a hold on that piece of legislation notwithstanding the fact that it is vital to the farmers of this country. In an effort to encourage the Senator to let the Senate consider the farm bill, a hold was placed on Calendar Order 1004, S. 2110. This bill is to establish the Lee Metcalf Wilderness and Management Area in the State of Montana and for other purposes.

We all remember the late distinguished Senator Metcalf. I certainly would not want to do anything to inhibit, let alone prevent, enactment of a bill intended to honor him. Therefore, I advise the distinguished majority leader that insofar as this Senator is concerned, Calendar Order No. 1004 is available for Senate consideration.

Mr. MELCHER. Will the Senator yield?

Mr. HELMS. Certainly, Mr. President.

Mr. MELCHER. The Senator has delayed too long. Perhaps the Senator does not realize that the House has adjourned sine die and that there is now no longer any opportunity to consider the Lee Metcalf Wilderness bill. It is too late. The House has already gone out of session for this Congress.

THE LEE METCALF WILDERNESS AREA

Mr. BAUCUS. Mr. President, for several days, legislation to establish the Lee Metcalf Wilderness Area has been caught in a procedural tug of war. I am most disappointed that this vital legislation has not been considered by the Congress. I certainly hope that the 98th Congress will be able to deal with this legislation in a more expeditious manner.

Mr. President, I strongly support passage of S. 2110 creating the Lee Metcalf Wilderness Area in southwestern Montana.

Fifteen years ago, Senator Lee Metcalf wrote to the U.S. Forest Service's Region I forester to express his support for wilderness designation of the Spanish Peaks Primitive Area. Senator Metcalf stated:

> Wilderness serves the recreational, scientific, educational, conservation and historical needs of the people. Wilderness has become a rare and precious resource in this country. Many states have little, if any, of it left. Montana is more fortunate—and I want to assure that it will always be that way.

Throughout his renowned career of service to Montana, Senator Metcalf treasured the concept of protection of Montana's wildlands. Where possible without causing hardship to other diverse interests in our public lands, Lee Metcalf sought to preserve a portion of Montana as it was before civilization. Due in large part to his efforts, Montanans today can take pride in a living heritage of pristine lands that include the Great Bear, Absaroka-Beartooth, and Welcome Creek Wilderness areas.

The year 1982 represents a considerably different public landscape than that which existed in 1952 when Lee Metcalf was first elected to the U.S. Congress. Today, we are at the conclusion of the much debated RARE I and RARE II wilderness inventory process.

The study of three of the areas mandated for special attention under the

Montana Wilderness Study Act (S. 393) is also nearing completion. Simultaneously, pressures are mounting for the release of hundreds of thousands of acres of roadless forest lands to multiple use. Given this scenario and my personal assessment that vast additions to the wilderness system are unlikely, I endorse the establishment of the Lee Metcalf Wilderness.

Naming any wilderness for Senator Metcalf would, of course, be a fitting and appropriate tribute to this giant in America's conservation movement. More important, however, this particular designation will write the final chapter in one of the conservation efforts which Lee Metcalf advocated throughout his distinguished career. In fact, only Senator Metcalf's untimely death, January 12, 1978, was able to draw the curtain on this own efforts to designate a wilderness area in the Madison and Gallatin Ranges.

This legislation is the result of long, complex negotiations involving literally hundreds of interested individuals, groups, government agencies and businesses. While the bill cannot satisfy all of the diverse and occasionally conflicting desires of these parties, I am convinced that it does signal very real progress in resolving difficult questions about the designation of Federal wilderness areas.

The bill is the product of a series of meetings held by the Montana congressional delegation over the past year. A wilderness area consisting of nearly 240,000 acres will be added to our national wilderness preservation system. In addition, a 40,000-acre wildlife management area for the protection of grizzly bear habitat will be designated.

The area has features that conjure images as remarkable as the land itself. Bear Trap Canyon, the Spanish Peaks, the Taylor-Hilgards, and Monument Mountain will all be included in this wilderness area that stretches from the high prairie along the banks of the Madison River to the boundary of Yellowstone National Park.

Wildlife as diverse as the land share this vast area with recreationalists from throughout the Nation who come to hike, ride horseback, fish, hunt, and enjoy the serenity.

Furthermore I am pleased that we have been able to craft this bill so that snowmobile enthusiasts will continue to use the popular Big Sky Snowmobile Trail unimpeded. In addition, recognition was given to the needs of the timber industry, a vital aspect of the Montana economy. Wherever possible, this bill attempts to minimize those resource conflicts.

Untold hours of dedicated labor have gone into the proposal. In particular, I salute the efforts of Senator MELCHER, Congressman PAT WILLIAMS and Congressman RON MARLENEE. Dozens of other Montanans deserve recognition for their tireless efforts. There being too many to list individually, I would like to commend two people: Dr. Richard Tenney, the president of the Madison-Gallatin Alliance, and Mrs. Donna Metcalf, Senator Metcalf's widow. The advice and counsel which they have provided in this process represents well the contributions of so many others.

Given these considerations, I hope the 98th Congress will quickly consider, and enact, this important piece of conservation legislation and this tribute to Senator Lee Metcalf.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have two matters I wish to address, one in connection with the conference report and another on the Executive Calendar.

There was one item on the Executive Calendar which was not considered today because of a notation by one Senator which has now been cleared, and if it is agreeable to the minority leader I wish to go forward with the confirmation of Calendar Order No. 1129 at this time.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session for the purposes of considering Calendar Order No. 1129, Message No. 1510, Sam H. Bell, of Ohio, to be U.S. district judge for the northern district of Ohio.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

THE JUDICIARY

The assistant legislative clerk read the nomination of Sam H. Bell, of Ohio, to be U.S. district judge for the northern district of Ohio.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, one of the many and manifold blessings of the last indeterminable moments of a session is sometimes you cannot figure out what happened to the documents, and there are literally thousands of pages of documents, and we find ourselves in that situation at this time.

While the House documents on the conference report on the highway bill are here and delivered by the messenger, no one can find the Senate documents.

The Senate documents and the House documents are identical, and we have two choices. We can Xerox the House documents and prepare a set of Senate documents, or we can treat the House documents as the Senate documents for the purpose of proceeding.

At 10:25 p.m. at night that has a great appeal for me.

So I wish now, Mr. President, if I may, to propound a unanimous consent request.

HOUSE CONFERENCE REPORT CONSIDERED TO BE SENATE CONFERENCE REPORT

I ask unanimous consent that the conference report received from the House of Representatives be considered to be the conference report for the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

SURFACE TRANSPORTATION ACT OF 1982—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee on conference on H.R. 6211 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6211) to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

The question is on agreeing to the conference report.

Mr. BAKER. No. Mr. President.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. I would fondly wish for that, but I am afraid we are not ready for it.

Mr. President, I not only lost the conference documents I lost the conference managers, too.

Mr. DOMENICI. They are coming.

Mr. McCLURE. They have the documents.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. BAKER. Maybe they are all together.

Yes, I yield to the Senator from North Carolina.

Mr. HELMS. I thank the able majority leader.

Mr. President, it occurred to me that this may be providential. Maybe the Lord is sending us a message and saying lose the whole thing. [Laughter.]

If so, my prayer would be answered.

In all seriousness, could I inquire of the majority leader's plans for this evening? I understand that it is his intention to file a cloture motion sometime this evening.

Mr. BAKER. Mr. President, I must say to my friend from North Carolina that I have considered a number of options including that one, but I do not plan to do that right away. I think we should go ahead with the debate on the measure and see how things develop so while I do not rule out that possibility I frankly do not plan to do that at this point.

Mr. HELMS. I wish the Senator would do it as quickly as he makes up his mind to do it. There is no point in our staying around here this evening. I want to find out what is in the bill after it has been mutilated or whatever by the conference committee, and there is no earthly way to tell. I would hope the managers of the bill would take some time and tell us what is in it because I do not know what is in it.

Mr. BAKER. Mr. President, I think the request of the Senator from North Carolina is not only logical and entirely within his rights but highly desirable for every Member of the Senate.

But let me respond with another question. I am not sure when or if I will file cloture, and I want to get out of here just as much as the Senator from North Carolina does, believe me. But would the Senator from North Carolina give us some idea of when we might reach a vote on this measure?

Mr. HELMS. You mean which year? [Laughter.]

Mr. BAKER. If that is the Senator's wish.

Mr. HELMS. I would say, Mr. Leader, that I am still convinced that the wise thing for the Senate to do is to reject this measure one way or another and, as I suggested early on to the majority leader, in a new year start afresh with a new piece of legislation, which would not take all that much time to have hearings on and then report to the Senate.

It would not be my purpose to engage in extended debate on it. I would hope that somewhere along the line the Senate would agree to do that. This bill is not one I can support. I wish I could, because I have four grandchildren and three children at home like everybody else, and I would like to go home for Christmas. But if need be I will stay here—I never spent Christmas in Washington, D.C., but I am willing to do it if I have to.

If the majority leader is going to file a cloture motion, I wish that he would file it. Let us go home this evening after he has set a time certain for us to come back after Christmas or whenever he in his wisdom decides.

Mr. BAKER. Mr. President, I appreciate the remarks of the Senator from North Carolina. But let me make another proposal. Why not spend the next hour and a half, that would get us to about 12 o'clock, hearing the explanation of the managers on both sides and then whatever time the Senator from North Carolina wishes, and yet tonight let us vote on this measure up or down one way or the other or on a tabling motion if you prefer, and get it out of the way?

Mr. HELMS. Well, of course, the majority leader knows I would not be willing to do that. I wish I could accede to his suggestion, just as I wish that he could accede to mine. But why not just start in on the consideration of the conference report and see where we go from here?

Mr. DOMENICI. Mr. President, might I ask the Senator from North Carolina a question?

Mr. BAKER. I yield.

Mr. DOMENICI. As I understand, the Senator does not want an explanation. We can have an explanation of a bill of this type, if not within this next hour or the next couple of hours. The Senator just does not want us to vote on this bill.

Mr. HELMS. Well, that is reasonably correct.

Mr. DOMENICI. I do not think it is reasonable. Does the Senator want us to vote on this bill or not? I am your dear friend, but I think everybody ought to know. You asked "Have we had an explanation?" There have been conferences like this many times before. We have had 15 minutes. It seems to me the Senate is willing to take 1 hour, 1½ hours 2 hours of explaining it. The Senator would have every bit of explanation from distinguished Senators, such as DOLE, the distinguished Senator STAFFORD, and myself, I have been on the conference. There are 10 or 12 of the Senator's friends on both sides, and we will explain it in depth.

My question to the Senator is if we have done that, does the Senator from North Carolina intend to let us vote on it or not?

Mr. HELMS. The answer is "No."

Mr. DOMENICI. I thank the Senator.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER (Mr. KASTEN). The Senator from Kansas.

Mr. ROBERT C. BYRD. Mr. President, will the Senator from Kansas yield? There have been many times when I have called bills up that I opposed when I was majority leader. I have been successful in breaking a filibuster, as in the case of the natural gas bill, which I was opposed to. I had to do some rather high-handed actions at that time, but, nevertheless, it was the only way to break the filibuster, and I was responsible for setting some precedents when I was majority leader, with the help of Mr. BAKER who was then the minority leader, and Mr. STEPHENS who was the minority whip, and the then Vice President of the United States, which certainly have been very useful to the present majority leader in his efforts to bring this measure to passage.

We on this side of the aisle offered to have a vote on this measure some days ago without any further action. The majority leader called a caucus and the result was that that offer could not be accepted for reasons I am sure were perfectly justifiable in the eyes of the other side.

I have not had a chance to caucus with my colleagues on this side, but I have a feeling that there are those who will be willing to vote up or down on the conference report within 30 minutes after a reasonable time for explanation of the conference report. I would vote against it, as I voted against the gas tax bill last night. But I would not, in my position, stand in the way of a vote on the conference report tonight. I do not know how my colleagues feel about it. Perhaps a time could be set for a vote on the conference report tomorrow. That would give us an opportunity to alert those colleagues of ours who are absent, who have gone to their homes, and at least give them a chance to come back and vote on the conference report. But, first, without hearing from my colleagues, I would feel that there would be a good chance on this side that we could agree to vote up or down on the conference report at 2 o'clock tomorrow afternoon or 5 o'clock or at some point tomorrow.

I may run into a lot of objections. I have not had a chance to discuss it. But I want it known that we on this side are ready to vote on the conference report up or down. Let the managers make their statements, let every man vote for himself. The opposition to a vote up or down on this conference report does not come from this side of the aisle.

Mr. BAKER. Mr. President, I like the suggestion the minority leader has made, and it is extremely well-taken.

I would point out it is now 10:40 at night and, as far as I am concerned, we can spend as much as such part or all of this night and morning engaging in a discussion of this measure and debate it if that is the desire of the Senate. But I think to set a time tomorrow, the 22d of December, to vote on this thing makes eminent good sense. There is enough time between now and then to satisfy any reasonable time for debate.

Mr. President, I say before I put the request, I have not had a caucus on this side either.

Mr. ROBERT C. BYRD. If I can make one qualification, that the majority leader not keep us in all night.

Mr. BAKER. Mr. President, I ask unanimous consent to do that and the request will be in three parts: I ask unanimous consent that a vote occur on or in relation to this conference report at 12 o'clock tomorrow. I further ask unanimous consent, Mr. President, that the Senate stand in recess at the hour of 12 midnight tonight.

Mr. HELMS. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Mr. President, I revise the request so that we go out at 12 midnight tonight and vote tomorrow on or in relation to the conference report at 2 p.m.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. I object.

Mr. BAKER. Mr. President, I want to put one more request at this time. I may put another later, but I want to bend over backward to try to make it clear that the leadership, I believe on both sides, want to provide an ample opportunity for any reasonable discussion of this measure.

Mr. President, I ask unanimous consent that the Senate conclude its activities tonight at 1 a.m. and stand in recess until the hour of 12 noon tomorrow and that at the hour of 4 p.m. that a vote occur on or in relation to this conference report.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. At 12 midnight.

Mr. HELMS. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. Mr. President, I could go on this way, and I am tempted to, but I think it is clear that the Senator from North Carolina does not intend to agree to any time certain for disposition of this conference report.

Mr. HELMS. The majority leader is correct.

Mr. BAKER. I must say, Mr. President, it is my intention to try to go forward with this matter. I do not intend to file cloture. I do not insist and urge that every Member stay here and listen, but I do expect that we will have further debate on this measure tonight.

Mr. ROBERT C. BYRD. Mr. President, I hope the majority leader will let us all know what his plans are. I have been listening carefully, but are we going to be here all night tonight or, if he is not going to file a cloture motion, are we going to be here maybe all day the following day? I say this with the utmost good faith, Mr. President. We are entitled to know what the majority leader's plans are if he can tell us at this time.

Mr. BAKER. Mr. President, the minority leader knows, I am sure, because he served in this difficult position, as I now serve, and longer than I have served. So I am sure he understands that, on the one hand, I have an obligation to advise Members of the schedule of the Senate so they can make their plans, but, on the other hand, I have the obligation to try to move legislation and not circumscribe myself in that effort unduly.

It is not my intention to punish the Senate nor to punish the Senator from North Carolina. But we have only a brief time left, from a practical standpoint, to try to deal with this matter. I am convinced that we can do it better by simply debating the issue than we can by going the cloture route and coming back after Christmas.

I was attracted to that idea to begin with, because I, frankly, am tired, and I think everybody else in here is tired. But the more I think about it, the more I am convinced that the rules of the Senate relating to debate may yield us a more prompt result on this than going a cloture route and deferring consideration.

So I would hope that the Senate would agree to remain in and to discuss this matter. I hope further that at some point the Senator from North Carolina would recognize that the Senate is entitled, in my opinion, to face up to this issue and to vote it up or down. It is by no means certain this measure is going to pass. I can say there are a number of Senators on this side of the aisle who have supported cloture, and I thank them for it, as there are a great number on the other side of the aisle—and I will be eternally grateful to those who supported cloture—but who will vote against this bill. I know that. I do not like that. I am disappointed, but it is true.

And I do not have any head count that tells me what the final result will be. I do not know what the result of a tabling motion would be. But I do know, Mr. President, that it is my duty and responsibility, as I see it, to try to get this matter concluded.

So I wish I could tell the minority leader with greater exactitude what those plans are, but, at this time, I would suggest that we proceed with the debate. I will consult with the minority leader, I will share with him more thoroughly my thoughts, and perhaps we can have another colloquy at a later time.

Mr. ROBERT C. BYRD. If the majority leader will indulge me just this much. We have been here now 125 hours since Monday a week ago, and here it is on Tuesday of the week of Christmas. We have had very little time with our families. We are all tired. I know the distinguished majority leader is tired. I can understand his problem in the situation and his desire to get on with the legislation and his feeling of responsibility to do that.

But, there comes a time, Mr. President—and I say this most respectfully to the majority leader—when we ought to either have a showdown on this measure or we ought to go home, because it is only going to be a short time until we are back here.

We were asked by the President to come here and pass appropriations bills and a continuing resolution. We have done that. I just think that it is about time—and I am willing to work with the majority leader for a while yet in an effort to bring an end to this bill—but I think we ought to bring an end to the agonizing of this Congress over a matter which was not asked for by the President when he requested us in September to come back and on a matter which could wait until the Senate is back in session and the House is back in session within 2 weeks, virtually. It just does not seem to me—it is an important matter, but it is not so imperative, I would say—that it be enacted by continuing to run the clock, continuing to keep the Senate in session for hour after hour and day after day when we would like to be with our families. The Congress is not looking very well as long as we continue to stay here and wrangle.

I just say this in the utmost kindness to the majority leader, knowing what his problems are and knowing what his sense of duty is. But we all feel we all have a sense of duty to our families, as well. And we have worked with the majority leader. We have offered to pass the bill several days ago. The offer was rejected. We have assisted with cloture; we delivered the cloture votes. And we have waited all day long now for this conference report.

I would just hope that we would not have to continue this agony for too much longer until we know what the plans are as to whether or not we are going to be asked to come back for cloture or whether or not we are going to have a vote on this conference report up or down, or whether or not we are going to quit and go home and come back in January and start all over again, when our patience has not been strained to the limit, our tempers are not frayed, and our ability to exercise the kind of careful and thoughtful judgment that the people expect of

their elective representatives is not impaired.

It has gotten to the point where we pass bills, and we do not know what is in the bills. We do not know what is in the conference reports. And, if one has listened to the television reports tonight and yesterday this is the way the country is viewing the Congress.

We have already accomplished what the President asked us to do. Now we are still here, we are still tied up in knots, we are still agonizing. It has about gotten to the point where clear minds are difficult to find in this body. I think when we legislate we ought to legislate in an atmosphere that is devoid of emotion and strained patience and frayed tempers.

So I would just say to the majority leader, do not run us through this mill too much longer.

Mr. BAKER. Mr. President, I hear some of myself in the remarks of the minority leader, because I can remember other occasions when I have made similar pleas when the distinguished minority leader was the majority leader. I can even remember times when I complained, sometimes in a very vociferous way, about the necessity to stay late. I can remember at least one occasion, I believe two occasions, when I was here on Christmas Eve. I did not like it, but I was. And I can remember when I was here, I believe, in the week after Christmas and up to noon on January 3, as I recall. I did not like that, either. But I then knew deep down in my heart that the then majority leader had an obligation to do this.

The minority leader has stood with me in every step of the effort to get this matter to a vote. I hope he will continue to do that. I hope he will not abandon that fight at this time. And I do not believe he will.

I hope that we will continue to work together to try to get this matter to a vote, because I feel, having come through the fire storm so far, it profits us little to abandon that effort at this time. As I said earlier, I will confer with the minority leader and we will try to see where we stand.

Mr. President, let me make one other request. The distinguished Senator from North Carolina mentioned cloture a moment ago and inquired, I believe, twice on whether I intended to file cloture or not. I indicated then I did not plan to for the moment.

I wonder how the Senator from North Carolina would feel about a unanimous-consent request to have a cloture vote now. Would the Senator be willing to do that?

I understood the Senator to say that he was not.

I am open to any other suggestions, but I respectfully suggest, Mr. President, that we have no alternative at this point except to go forward.

I will consult with the minority leader further as to the next step.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. I would be happy to yield to the Senator from Vermont. I did not want to yield the floor since I want to explain the bill. I wanted to ask the distinguished Senator from North Carolina some questions about the bill, to find out what his problems are about the bill.

Mr. LEAHY. I do not want to use the time of the Senator from Kansas. I wonder if he would give me a minute and a half to associate myself with the remarks of the minority leader. Will the Senator yield?

Mr. DOLE. I think we will have plenty of time. [Laughter.]

Mr. LEAHY. I thank my good friend from Kansas.

Mr. President, I would like to associate myself with the comments of the Senator from West Virginia. I wish we could prevail on the distinguished majority leader to free the Senate 100, as I said earlier this evening, and the press corps, 290, and go out. I say this partly from a personal point of view. This will be the second time in my lifetime that I will not spend Christmas in Vermont. That is a result of the extension of the Senate schedule.

But well beyond any personal time or personal concern, let us admit that we are not dealing with a matter which demands an immediate solution. Perhaps these extraordinary steps are not necessary. We are dealing with a 5-cent gas tax which can be brought up again in January and worked on in February. I wonder if it is necessary to strain the extraordinary rules of the Senate for a matter which is not of historic moment.

The rules of the Senate are of historic moment. The rules are of enormous significance and should be maintained for matters of enormous significance. I would leave only one thought in the minds of my colleagues: If we strain the rule on a matter such as this, I wonder if we may end with the pendulum swinging back in such a way that we do irreparable damage to rules that are designed to protect not only the rights of the minority, but to allow the Senate to be the deliberative body that it should be.

This body should act as the conscience of the Nation. We should not allow two or three Senators to dictate the will of this body, but I think we are fast reaching the point where tempers may be strained to the point that we will no longer recognize the reason for our rules and we may end up making some changes we may later regret. Future day historians will say, "And they did it over a nickle gas tax." What they will not realize is that we did it over sheer frustration with the extraordinary delaying tactics of a tiny handful who feel they alone have been ordained to speak for the Nation.

I yield back to my friend from Kansas and I thank him for his courtesy.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. I do not want to cut anyone off but I do want to explain the conference report.

The Senator from Wyoming was seeking recognition.

Mr. SIMPSON. Will the Senator yield for 2 minutes.

Mr. DOLE. I yield.

Mr. SIMPSON. I commend the majority leader's patience and good humor. His demeanor is far better than I could produce as one who served as a majority leader in the Kitty League in the State of Wyoming.

But something very good will come from all this. This will be a time for the revision of our rules. We will go back to two-thirds vote to exercise cloture and then the gate will clang shut—because those rules were never drafted or crafted to protect a minority within a minority within a minority within a minority—like three. They were created to protect a minority of 20, 30, or 15. "Comity" I have heard described. Go look it up in the dictionary and see if you find any of it here. I have heard that word referred to.

Seldom have I seen in my legislative experience of 17 years or more, a more obdurate and obnoxious performance. I guess it is called hardball. In my neck of the woods we call it stickball. Children play it.

It seems the whole issue of the Senator's tenure, as I have observed it in my short term, seems to be "How is it playing in North Carolina as to peanuts, tobacco, and family farms?" I think, then, let them know in North Carolina that the next time those issues come before this body and are presented to us, there will likely be a veritable phalanx of opposition which will likely be most demeaning and disturbing to the Senator's constituency and to that of his colleague.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I yield to the Senator from New York.

Mr. MOYNIHAN. Mr. President, I thank the distinguished chairman of the Committee on Finance who has taken such an active role in the consideration of this measure.

I would say to this Chamber that something much larger than the substance of the measure before us is at issue. What is at issue is the capacity of the Senate to work its will in a matter where there is a clear majority in favor of a measure of importance and a clearly willful minority determined to thwart that majority.

The rules of the Senate that allow a minority to test the intensity of feel-

ing by a certain prolongation of debate are legitimate, prudent rules which have proven their use over two centuries. But they do no more than test the intensity of conviction. If they were to be allowed to thwart the majority, then they would defeat the purpose of a democratic body, which, after all, is what we are. I would hope we would stay here as long as necessary to work the will of the majority. This can and will be done. It only requires that we recognize how much is at issue. What is at issue is the character and the purpose of this body.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas has the floor.

Mr. DOLE. I am going to explain the bill before this body misunderstands why we are here.

Let me say at the outset that I certainly want to complete Senate action on the bill.

Could I explain the bill and then I will be happy to yield. We have had enough finger pointing and accusations. I would like to finish consideration of the bill.

I am interested in the bill itself. I would hope that we could focus on the legislation. I am willing to answer questions from either Senator from North Carolina about the bill itself. I cannot stand here and tell you whether President Reagan made a mistake or not. That is a judgment that Members will have to make and that I will have to make. I cannot tell you that we are all wrong and you are right. But I can explain the bill or at least the title of the bill that refers to the tax action.

We have had a lot of work on this legislation. That does not mean that somebody cannot frustrate a lot of work. We all have frustrating experiences in our lifetime. This is probably going to be another one that many of us are going to remember for some time. That is all right, but I wonder if we really have focused on the legislation.

I want to discuss the actual details of the legislation. If we want to filibuster, let us filibuster the legislation.

It happens, in my view, to be a very good piece of legislation. I want to summarize as quickly as I can what has happened in the tax title. I think the Senator from Vermont (Mr. STAFFORD) and others would like to go through their titles. Then, if there are questions from Senators on the floor about the different provisions of the bill, I shall be happy to respond.

Let me say at the outset that I still hope that, after we have fully discussed the bill, we can vote on the bill, and maybe avoid some of the other discussion that will not contribute much until next year or the year following.

Let me first go through the conference report.

Mr. EAST. Will the Senator from Kansas yield for a question?

Mr. DOLE. Yes, I shall be happy to yield.

Mr. EAST. Is a copy, a full and complete copy, of the conference report available?

Mr. DOLE. We have a full and complete copy of the conference report.

Mr. EAST. At this point, I have been unable to acquire one.

Mr. DOLE. I can give the Senator a copy of the revenue title.

Mr. EAST. Is it possible to get a full and complete copy of the conference report? I think the implication that at this point there is no comity is not warranted or fair. Certainly, at a minimum, a Senator is entitled to see a full copy of the conference report. If that is an unreasonable and unfair request, then I happily stand publicly corrected. If it is a fair and reasonable request, I would appreciate its being honored. That is the only proposition I put to the Senator.

Mr. DOLE. Mr. President, I can give the Senator the first 100 pages to give him something to start on.

Mr. EAST. I know the Senator makes light of the problem.

Mr. DOLE. I do not make light of it. I think the Senator ought to read it. If he has questions, he ought to ask me questions.

Mr. EAST. Well, I am certainly asking for the availability of the report.

Mr. DOLE. We have a statement of managers which has been filed. I think there is exactly one copy of the report itself—is that correct?—of all the different titles. That is all the conference report. I furnished a copy of the tax title. I think Senator STAFFORD has copies of the other titles. We have the statement of managers. We shall be glad to furnish them as they become available. Right now, we are on the tax title. I furnished the distinguished Senator a copy of that title.

Let us furnish him the statement of managers and the titles——

Mr. EAST. The way I am putting it, it is a slight bit of frustration, as I showed last night with the amendments we finally acquiesced in, not knowing the content or the import of them. I do not quite follow the reasoning or the rationale not to have available a full copy of something we are asked to enact. If I am in error on that, I shall have to stand corrected.

Last night, I acquiesced in the amendments, indicating I had reservations about one or two, because we have not seen any of them in full.

Mr. DOLE. I say to the Senator from North Carolina that only one of those amendments survived, so he will save a lot of time not studying them.

I want to get on with the report itself. There is a lot of frustration in this Chamber. Before it breaks out in more places, I would like to talk about the bill.

We are all frustrated. We all want to go home. But I want to pass this bill. If it takes all night tonight, all day tomorrow, all day the next and all day the next day, we ought to pass it. We should not have to come back, in my view. We are here, in town now, and we ought to stay here.

I am here prepared to hear others discuss the bill. It seems to me that is our obligation. The President has asked us to do this. We have spent day after day on the legislation.

As the distinguished majority leader said, there comes a time to complete action on this legislation. It seems to me it is our responsibility—the 98 or 97 or 96 who want to move on—not that there will be that many who will vote for the bill. But we ought to have an opportunity to vote for or against the bill. It will probably be a very close vote.

It seems to me once the bill is explained Members will vote in favor of it. We shall be happy to furnish all the information we have. We will be happy to secure information for any Senator, whether it is the Senator from North Carolina or the Senator from West Virginia. Secretary Lewis is available to discuss details of the bill with any interested Member. We have members of our staff and members of the joint committee staff available to answer questions. I am sure other Members who have covered other titles have the same expertise available.

No one is trying to push something through the Congress quickly. This is a very expensive bill. It ought to be discussed carefully and it could take 2 or 3 hours to explain, but it ought not to take 2 or 3 days.

But if it takes 2 or 3 days, I think some of us, particularly those who managed the bill, ought to stay here and see that happen.

I thank those who have worked with us and supported us for their patience, and they ought to stay and hear us out.

Mr. RANDOLPH. Will the Senator yield?

Mr. DOLE. I yield to the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I am grateful for the manager of such an important bill speaking as he is. One does not have to be here too many years to understand the length of time those who filibuster can slow the action of the Senate. I remember in 1960, it lasted for 121 days—121 days. I do not think that was a good record, but in reverse to the idea that the Senate should debate, then after adequate decision, make decisions by a vote up or down on amendment, a bill or a conference report.

I want the record to indicate, even as we talk tonight, because there will be

those who read the record, that not too long ago, perhaps an hour or more the House of Representatives of the United States came to grips with the subject of highway gas tax legislation.

They do not have, in the other body—I am not trying to draw a difference between the House and the Senate—the opportunity under the rules to do what I think is bad legislative practice. That is to filibuster to the point where, after adequate discussion, a vote cannot be taken.

Let us remember that the House of Representatives is just as representative of the States as we are. They do not have, of course, the State as a whole—North Carolina, West Virginia, or any other of the 50 States. But they are representative of the people and they serve here in the Congress of the United States, whether it is in the House of Representatives or the district or the State from which they come, having represented a part of that State.

What was the vote tonight in the House of Representatives? The vote was more than 2 to 1 in favor of this measure that is pending in the Senate. I am not going to say that we should vote as the House votes. Certainly, I am not saying that, or even indicating it. I am saying to those who have constantly spoken about the flakiness of this measure that it is one of the most important pieces of legislation that we have considered in this body in many, many weeks.

I repeat, when, by a vote of over 2 to 1 in the other body under this Capitol dome, there was an expression, a decision was made.

If you have a vote and you do not use it, it ceases to exist absolutely, the power and the strength of decision itself. We speak of Napoleon as an emperor or a leader of armies, but he said, "The most powerful instrument we hold in our hands is the power of decision. You either strike or fall back." And Napoleon, of course, at the Battle of Sagunto, when it looked as if he was wavering, said to the little drummer boy, "Beat a retreat." And the drummer boy, with tears in his eyes, according to legend or history, said, "General Bonaparte, I have never been taught to beat a retreat. I only know how to charge."

Well, the story has no reference, of course, except to indicate that there are many of us who are not long-suffering. I do not mean that. But we are very patient people in this body. We work within the rules, of course, of the Senate in our subcommittee, in our committees, and in this hallowed Chamber. But there are times when really I sit here and I wonder what is happening, because the power of decision is not to keep the decision from being made.

Mr. President, the time has come for the Senate to again consider a change in its rules. We must bring forth a mechanism to limit debate so that the will of the overwhelming majority of Senators may be done.

Mr. DOLE. I thank the Senator from West Virginia.

It has been a long week, and I would like to thank every Senator for his and her patience during the time this bill has been on the Senate floor. We have gone through many hours of deliberations and negotiations. As we all know, there were many provisions in the Senate passed version which were not in the House passed version. Although myself and the other conferees insisted on all of the Senate amendments it was simply impossible to keep everything intact. We accommodated as many Senators as possible and we think we have a good package to report back to the Senate.

The existing taxes going into the highway trust fund are insufficient to meet the current maintenance and repair needs of our Nation's vast highway system. The increased highway user taxes are designed to adequately fund the Federal share of the investment needed to complete the construction of the interstate system and proceed with the much needed rehabilitation of the Nation's highways and bridges. By acting immediately on legislation which addresses the lower costs funding needs of resurfacing and rehabilitation, we will avoid the higher future costs of replacement or reconstruction of many miles of highways and bridges.

Although not everyone will be satisfied with each individual item in this package, I assure each Senator here that the conference report is a good and equitable package. Furthermore, I hope that each Senator will look at these revenue provisions as a total package, instead of item by item. When we conferenced these items we did it as a package. Although some excise taxes may be higher than when passed by the Senate, I encourage everyone to also consider the number of taxes that we eliminated for that same taxpayer, such as the tax on parts and accessories, the retread rubber tax and the lubricating oil tax.

I really believe this is a fair package. We spent about 9 hours today in conference with the House. We had our differences. We tried to work out those differences, and we did. We agreed on a good package.

Let me just suggest some of the highlights of that package, and then I am going to yield the floor for other speakers who would like to discuss the bill.

GASOLINE TAX AND OTHER FUELS TAXES

The bill increases the gasoline tax from 4 to 9 cents per gallon, effective April 1, 1983. Similar increases are provided for the taxes on diesel fuel, special motor fuels, and motorboat fuels. The present law exemptions from these taxes are continued for buses, State and local governments, nonprofit educational institutions, and farming use. The exemption for off-highway business use, which is currently 2 cents, is extended to the full tax. A new exemption from the tax is provided for 85 percent or more alcohol fuels from sources other than petroleum or natural gas. Taxicabs are provided a 4-cent exemption through September 30, 1984, and the conditions under which the exemption is provided are expanded, through 1983, to include jurisdictions where ride sharing is prohibited by local law.

Gasohol is exempt from 5 cents of the 9-cent tax. The 40-cent-per-gallon income tax credit for alcohol fuels and the 40-cent tariff on imported alcohol fuels are both increased to 50 cents. The gasohol rules apply through 1992.

The time for payment of the gasoline tax is increased by 5 days for independent refiners and for persons other than those who produce more than 1,000 barrels of crude oil per day.

Ground fertilizer applicators are given the same treatment as aerial applicators.

TIRES, TREAD RUBBER, AND INNER TUBES

The tax on highway tires, currently 9.75 cents per pound, is converted to a graduated tax based on weight. Tires 40 pounds or less, which include ordinary passenger car tires, are exempt. The tax will be 15 cents for each pound over 40 pounds, 30 cents for each pound between 70 and 90 pounds, and 50 cents for each pound over 90 pounds. The taxes on nonhighway tires, laminated tires, tread rubber, and inner tubes are repealed. These changes are effective January 1, 1984.

LUBRICATING OIL

The present law tax on lubricating oil is repealed, effective on the day after enactment.

TRUCK-RELATED TAXES

The 10-percent tax on trucks and trailers whose gross vehicle weight exceeds 10,000 pounds is increased to 12 percent, and the weight thresholds are increased to 33,000 pounds for trucks and 26,000 pounds for trailers. The tax is converted from a manufacturer into a retail tax. Roadrailer trailers are exempt from the tax. The present law tax on truck parts is repealed. These provisions are effective on April 1, 1983, for tax increases and on December 2, 1982, for tax reductions.

HEAVY VEHICLE USE TAX

The heavy vehicle use tax, currently $3 per 1,000 pounds for vehicles whose gross vehicle weight exceeds 26,000 pounds—a tax of $240 for an 80,000-pound vehicle—is converted to a graduated tax, effective July 1, 1984. The maximum tax is increased to $1,600 on July 1, 1984, $1,700 on July 1, 1986, $1,800 on July 1, 1987, and $1,900 on

July 1, 1988. There is a 1-year delay of this phase-in for fleets with five or fewer trucks. If a truck is retired from service during the year because of accident or theft, the use tax will be refunded on a pro rata basis. There is also an exemption for trucks used on highways for 5,000 miles or less.

MOTOR CARRIER OPERATING RIGHTS

The basis adjustment for motor carrier operating rights where stock is acquired by a corporate purchaser is extended to individual purchasers.

TRUST FUND PROVISIONS

The highway trust fund is extended from September 30, 1984, through September 30, 1988. The trust fund is transferred to the Internal Revenue Code. If unfunded authorizations exceed 2 years of trust fund receipts, trust fund apportionments are to be reduced proportionately.

The caps on the amount transferred to the boating safety fund are increased from $20 million to $45 million, both with respect to the annual cap and the cap on the amount that can be accumulated in the fund.

An amount equivalent to a 1-cent-per-gallon gasoline tax is transferred to a Transit Account in the highway trust fund, money from which can be used for transit capital projects.

There are other miscellaneous provisions which I will just touch on briefly.

ENERGY CREDIT

The 10-percent business energy credit is extended to chloralkali electrolytic cells, effective for 1981 and 1982.

INCOME TAX FILING REQUIREMENT

The income tax filing requirement is modified to prevent the filing of unnecessary tax returns by persons receiving payments made by a State government to its residents.

This is the amendment that was of deep concern to the Senator from Alaska (Mr. MURKOWSKI).

CRUISE SHIP DEDUCTIONS

Deductions are allowed for conventions and similar meetings held on cruise ships under certain conditions, limited to $2,000 per individual per year.

That was an amendment offered by the distinguished Senator from Hawaii (Mr. MATSUNAGA).

TAX-EXEMPT DIVIDENDS OF MUTUAL FUNDS

All tax-exempt bonds are made eligible investments for mutual funds by adding provisions for tax exemption to the Internal Revenue Code.

That was an amendment by the distinguished Senator from Pennsylvania (Mr. HEINZ) and the distinguished Senator from Illinois (Mr. PERCY).

NORMALIZATION METHOD FOR PUBLIC UTILITY PROPERTY

The bill makes more specific the rules under which public utilities lose the investment credit and accelerated depreciation when these tax benefits are flowed through too rapidly to consumers. A special transitional rule is provided for certain companies which may have violated these rules.

That is the amendment by the distinguished Senators from California, Senator CRANSTON and Senator HAYAKAWA. Senator BAKER was very interested in that, as was this Senator, Senator PACKWOOD, and a number of other Senators.

SPENDING PROVISIONS: SOCIAL SECURITY ACT PROVISIONS

The bill adds certain types of energy assistance provided to AFDC and SSI recipients to items of income not counted as income for purposes of determining benefits under these programs.

The bill also provides from 2 to 6 weeks of supplemental unemployment compensation, a provision added on the floor, a substitute amendment of the distinguished Senator from Michigan (Mr. LEVIN) which was adopted by an overwhelming margin at a cost of, as I recall, around $540 million.

Let me conclude by highlighting that the conference report repealed the following taxes:

The 8-percent tax on truck parts. That is an approximately $300 million a year tax reduction.

Passenger tires. That is approximately a $500 million a year tax reduction. That is a proconsumer change in the bill. Many people who buy passenger tires never notice the excise tax, a very substantial tax. It amounts to $500 million a year. It would be repealed.

Tread rubber. That tax will be repealed. It is now a $22 million a year tax.

Innertubes. The excise tax on innertubes amounts to another $22 million a year.

Lubricating oil. The tax on lubricating oil amounts to $80 million per year. We were told by Treasury that it cost as much to administer that tax as it did to collect it.

Nonhighway tires and laminated tires. The taxes on these tires amount to more than $35 million per year.

Now, with reference to what happened as far as the House bill, and the Senate bill in the conference, let me suggest that, to give Senators a couple of examples, for fiscal year 1983 the House bill was $240 increase in use tax, the Senate bill is $240 and the conference is $240.

In 1984 the House bill was $2,000, the Senate bill was $560, and the conference agreement was $920.

In 1985 the House bill was $2,000, the Senate bill $880, and the conference $1,600.

And I must say at that point it was our belief that we should have adopted the Senate bill. The Senate bill itself provided much lower use tax in the out years, but I would say in all candor that the House of Representatives felt, the chairman of the Ways and Means Committee felt, along with the ranking Republican Congressman CONABLE, that the House of Representatives had been asked to support the administration position, they had dealt fairly with the administration, they had compromised, taking into consideration the administration's views, and they felt somewhat that the Senate had not followed the administration proposal. But we were still able to compromise. I think, fairly well, and I think it is a good, balanced approach.

Let me suggest, not that figures will tell us everything, but some are concerned about what the administration wanted and what it ended up with. We are told by the Department of Transportation that, for the following 5 years, the total amount paid on the heaviest trucks under the various proposals would be, under the administration proposal, $13,500 over a 5-year period, under the House proposal, $10,000, under the Senate Finance Committee action, $6,600, under the Senate amendment offered by the distinguished Senators from Minnesota, Senator BOSCHWITZ, and Senator DURENBERGER, the presiding officer, and others, would have been $4,280. The conference compromise was $7,770, which may not have been as low as some of us felt it should be, but it is about half the original administration proposal. I would think those who are concerned about the trucking industry, should review these figures very carefully. In my view we have struck a good balance. In addition, we have repeated a lot of taxes that affect the consumers such as the tax on passenger car tires. We are trying to spread the burden evenly. We want to make certain that heavy trucks pay their fair share, that medium-sized trucks pay their fair share, that passenger cars pay their fair share, and I believe that we have done well in an effort to achieve a result.

I would, however, emphasize this: There is no increase at all until July 1, 1984. Those who are concerned that we have gone too far in any direction, we have from now until July 1, 1984 to make modifications to the user fee if the Congress may wish to do so.

Mr. President, I have summarized the revenue-impact of the various proposals.

Mr. DOLE. Mr. President, so we might have an orderly procedure, I will be happy to yield to the Senator from New York, and I will also yield to the Senator from Vermont who might tend to discuss the title of the legislation under his jurisdiction. Perhaps we could review titles 1, 2, 3, and 4, and then come back and address the entire bill for those who have questions on any specific provision.

89-059 O-86-34 (Pt. 24)

But I think for the sake of clarity for someone reading the RECORD, if I can now conclude my explanation of the revenue title. I will yield to the Senator from Vermont to explain the title under his committee's jurisdiction.

Mr. MOYNIHAN. Mr. President, will the Senator yield to me for a question?

Mr. DOLE. I yield.

Mr. MOYNIHAN. With respect to title I, as he would be the first to agree the most salient tax feature is that of the tax on gasoline. I just simply wish to ask is it not his understanding that the price of gasoline at the pump at this moment in the United States is declining.

Mr. DOLE. Yes. In fact in this area it has declined about 3 cents in the past few weeks.

Mr. MOYNIHAN. I believe that is the national figure.

Mr. DOLE. And 7 cents over the past year I am advised.

Mr. MOYNIHAN. Such that the actual cost at the pump to the consumer is for the moment at least not likely to be raised with this tax with the prices decreasing.

Mr. DOLE. That is correct.

I say to those concerned about the tax and believe me no one likes to increase taxes. But everyone likes safer highways, safer streets, better mass transit—1 cent of this goes to mass transit. I have never counted this as a jobs bill, but it will create jobs. It will do I think a great deal to improve our highways and the so-called infrastructure. In my view on balance, it is a good proposal.

I yield to the Senator from Minnesota and thank him in advance for spending several hours with us today as an observer in the conference between the Ways and Means Committee conferees and the Senate Finance Committee conferees, and I appreciate not only his presence but his assistance in contacting a number of Senators and giving us his helpful advice and counsel as we try to work out a fair package.

Mr. BOSCHWITZ. I thank the distinguished chairman of the Finance Committee for yielding.

As he knows I introduced here in the Senate an amendment to the Finance Committee bill that substantially lowered the taxes, the use taxes that would be assessed against trucks. The distinguished Senator from Kansas agrees with me that the use taxes in a sense are unfair inasmuch as they are paid whether or not the truck leaves the garage, whether or not it rides 1,000 miles a day or none at all, and it has no relationship to you.

But I know that the Senator from Kansas pointed out the procedure that we have gone through and the figures that we have arrived at in coming to this compromise.

I must tell the Senator I do not think the compromise is as good as it should be. It would have suited me much better if the administration had decided to enact the 5-cent gas tax, 6-cent, 7-cent gas tax and not found this moment to assess truckers who are reeling from the effects of the recession, but that is not the choice we have before us unfortunately because we do have the distinguished Senator from Kansas who does not consider this to be a jobs bill. I consider it to be a jobs bill, and I consider it to be a bill, also, that I hope will take some steps in restoring consumer confidence which in turn will help to restore the economy to the vigor that we have known in years past.

There are some advantages that this bill has for truckers. I am not sure that the Senator mentioned it with respect to the barrier stakes, with respect to width, length, and weight, with respect to the capacity at the barrier stakes.

Did the Senator talk about that?

Mr. DOLE. I might say that is in other titles that will be discussed by the Senator from Vermont. There are various significant changes and very significant benefits.

I hope to make clear and maybe I did not make it clear, I do not suggest this will not create jobs. But I suggest that I have not addressed it simply as a jobs bill. It will create jobs. There is a great deal of interest in it for that one reason. But, beyond that, I think it is good legislation.

We have not addressed the user fee for trucks for 20 years. It was time for a change. We have tried to phase it in in such a way that we could take a look at it in the future.

I share the view expressed by the Senator from Minnesota. As he knows we have felt that the user fee should have been imposed at a lower level. The compromise should have been between the Senate and the House bills, rather than between the Finance Committee action and the House bill.

I also correct a mistake I made earlier when the Senate bill, the tax title, was title I. But as it comes back to us it is now title V. So if Senators are looking for title I and they cannot find any taxes in it, look to title V.

I am happy now to yield to the Senator from Minnesota or to yield to the Senator from Vermont.

Mr. BOSCHWITZ. Mr. President, did the Senator from Kansas also mention that truckers with five trucks or less will be exempted for an additional year of phase-in. The phase-in will be a year slower.

Mr. DOLE. We increased that from three to five trucks in the conference. The phase-in is actually a little better also.

That was an amendment originally initiated by the distinguished Senator from Iowa (Mr. GRASSLEY) as a second-degree amendment to the amendment of the Senator from Minnesota, and we appreciate the combined efforts of those two Senators.

Mr. BOSCHWITZ. So, Mr. Chairman, you continue with the explanation, and it is a shame that the Senator from North Carolina who wishes to have this bill explained is not here and, perhaps, we should move and go to the question of agreeing to the conference report.

Mr. DOLE. That is all right with me. I would like to adopt the conference report right now, but it would not be fair.

Mr. STENNIS. Mr. President, will the Senator yield to me? I thank him for the explanation of this bill. That is what we have been saying around here. We want a good, forceful explanation of this bill from the Senator, and the Senator is not a timid man, and I hope he will just keep pushing hard here and let us bring this thing to a head on the issue and whoever wins is whoever has the votes.

Mr. DOLE. I share that view, and I am prepared, I say in the spirit of all good will and fair play, to push ahead. We should not give up. We are very close to getting a significant piece of legislation passed.

I yield the floor to the Senator from Vermont.

Mr. STAFFORD. Mr. President, title II of the tax and highway bill was the responsibility of the Committee on Environment and Public Works.

I could say to my colleagues that last May, if they will recall, the Senate unanimously passed a highway bill which is the forerunner of this title II in the present piece of legislation.

Since that bill passed unanimously and is quite similar to title II today, I can say to all of my colleagues that in essence you have already voted once, in fact twice, for title II of this bill because within the last 24 hours title II essentially as it is in the bill at the present time passed this body.

Title II of the conference report, as I have been saying, is very similar to the basic provisions of the bill passed by the Senate within the last 24 hours.

The Senate conferees on this title to a very great extent preserved the allocation formulas in current law for Federal aid to highway systems.

The retention of current law means the formulas recognize factors such as road mileage and area in allocating money to States to construct and upgrade their highway systems.

The House version of the bill had moved quite dramatically to population or population-based formulas, that is, formulas that did not take into account the needs of larger, less densely populated States.

I am happy to say that the conference report continues to reflect the needs of States as well as the amounts

that States contribute to the Highway Trust Fund.

The conference report does contain provisions to guarantee that no State will receive less than 85 cents for each dollar it puts into the Trust Fund, provisions contained in slightly different form in both the House and Senate bills. With these measures, a desirable degree of equity has been incorporated permanently into the Federal program.

The bill reported by the conference provides $4 billion a year for 4 years for interstate construction. Each State is guaranteed at least one-half of 1 percent of the total authorization after $300 million is deducted for a discretionary fund for high-cost interstate projects.

The bill authorizes over $10 billion over the 4-year period 1983–86 for the so-called interstate 4–R program, that is the program to reconstruct, rehabilitate, and repair the interstate system. The distribution of funds for this program remains as in existing law, including the guaranteed one-half percent minimum for each State.

The conference report bases the distribution of primary funds on the higher figure in either the House or Senate bill, reduced by the percentage needed to bring total distributions to the level authorized in the bill.

This is a difficult formula to describe precisely but the effect is a distribution that gives all States substantially more funds than under existing law and, I believe, equitably distributes the increased funds that become available as a result of the increase in highway user taxes. Each State continues to be guaranteed at least one-half percent of the total.

Mr. President, we do have tables that show the allocation of funds under each of the formulas in the conference report for each of the 4 years of the bill.

Mr. MOYNIHAN. Mr. President, will the distinguished chairman have the goodness to repeat the amounts allocated for the repair, resurfacing and rehabilitation program?

Mr. STAFFORD. The Senator would be delighted to, I say to my friend from New York.

The bill authorizes over $10 billion over the 4-year period 1983–86 for the so-called interstate 4–R program.

Mr. MOYNIHAN. So such might be a measure of the need to maintain the system, and the costs that would be incurred by the use of it, if it is not maintained?

Mr. STAFFORD. The Senator is quite right. There is a rapidly growing need for reconstruction, rehabilitation, resurfacing, and refurbishing of the Interstate System because much of it has now reached or exceeded its design travel surface life. Some of it was dedicated as long ago as 26 years ago.

Mr. MOYNIHAN. The Senator will not too much surely object if I point out that the first segment of the Interstate System was built in New York as the New York Thruway and opened in the fifties as a great civil engineer Bertram Tallamy was asked by President Eisenhower to come down and begin the construction of the rest of the system which began in 1957, and that was 30 years ago.

Mr. STAFFORD. That proves the point that much of the Interstate System is in need today of the 4–R program, and if we do not get about the business promptly, it is far more expensive after surface areas have deteriorated must beyond their present condition to fix them again than it is to do it now.

Mr. President, as I was saying, funds available for the 4–R program increased dramatically from current levels. The authorization in current law is $800 million. This increases to $1.9 billion in fiscal 1983 and to over $3 billion in fiscal 1986.

Funds for the bridge replacement and rehabilitation program also greatly increase, from a current level of $900 million per year over $1.3 billion in 1983 and $1.8 billion in 1986.

Resolving the question of how to distribute funds for the primary system was one of the most difficult issues the conferees had to address.

A compromise proposed by the Senate conferees provided a solution for the 4-year duration of the bill without changing the underlying formula contained in the highway title of the United States Code.

If memory serves me correctly, there are over 200,000 bridges in this country that are currently in need of rehabilitation, reconstruction, and repair, and in need of repairs.

The Senator from Vermont notes that his friend and exceptionally able colleague on the committee, Senator DOMENICI of New Mexico, was here in the Chamber, and since he was the principal author of the provisions which deal with this part of the bill, I would ask the distinguished Senator if he would discuss it for the moment, and I yield to him for that purpose.

Mr. DOMENICI. I thank the chairman, the distinguished Senator from Vermont. I will take only a few moments, but I would say to any Senator that desires to know the effect of this bill with reference to the primary system that we have charts that we would be delighted to share with you.

I ask unanimous consent that our estimate for fiscal year 1984 with reference to the State-by-State allocation of primary funds, along with a comparison of what each State would have received under the House bill and what each State would have received under the Senate bill, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ESTIMATED APPORTIONMENT UNDER THE CONFERENCE AGREEMENT FOR FISCAL YEAR 1984 PRIMARY PROGRAM

[In thousands of dollars]

State	Senate bill	House bill	Conference agreement
Alabama	38,092	39,583	38,092
Alaska	75,894	4,011	67,000
Arizona	30,523	21,910	26,946
Arkansas	29,159	25,447	25,742
California	140,444	169,898	150,742
Colorado	32,962	23,782	29,099

Total	2,047,715	2,037,470	2,078,371

Mr. DOMENICI. Mr. President, Members of the Senate, we found ourselves, as we went to conference, in a very unique position. While we were putting on a new 5-cent gasoline tax and the other user fees, the House bill made a rather extraordinary leap from the historic formulas for the primary system, that considered primaries to be national in scope and thus had formulas that emphasized rural population, urban population, postal route miles and the size of the State. Not only did the House bill ask that we put on a new tax, but attempted to create a brandnew formula which abandoned the historic consideration of the size of the State and route miles and attempted to inject the very stringent dimension of population only.

Now the Senator from New Mexico understands that this has been a historic fight, argument, and disagreement. But it seemed to me, as I studied how we might resolve this issue, that

it was asking a great deal of those States that had been accustomed to that kind of formula to impose a new tax and then to go home and say we have also, at the same time, attempted to agree, with those who have large populations and high density cities, to right the wrongs of 25 years.

Mr. President, that being the case, what I did was to harken back to the days of revenue sharing when the Senate and the House passed a revenue-sharing bill with basically the same amount of total dollars but had adopted different criteria for cities, States, and counties in each of the two bills. Thus, if you examined the two bills, we were going to spend the same amount of money, but because they took different ingredients in their formula, there appeared to be no solution. My recollection was that that issue was resolved by taking both formulas, putting them together and saying, "Each entity gets the highest figure in either of the two. Add them up, and the extent by which that total exceeds the amount you want to spend, go back through and reduce each of the entity's share by that percent."

I think we were fortunate. In this case, we added to that approach a hold harmless provision and a guaranteed half of 1 percent. It turned out with this modified approach, we gave every State the highest amount provided in either of the two bills, with a hold harmless so no State got lower than the lowest, and the half of 1 percent. It turned out that we had to reduce every one of those high amounts by approximately 10 percent.

Fortunately, that seemed to work a miracle. When coupled with the mass transit funding in this bill and with the way we solved the interstate and the other formulas, it seems that we were able to solve, at least for the next 4 years, the primary formula such that rural America and urban America get a fair shake. Each gets far more than they would have before, each gets slightly less than they would have under the formula that favored them and, much to our amazement, the U.S. House of Representatives accepted that.

Now I cannot believe that anyone could have any disagreement with that, could vote against this bill based on that formula, unless they expected us to do one of two things: If the House bill happened to be slightly better for them, then they can vote against the conference agreement because they would have expected the Senate to capitulate to the House. For those Senators that were terribly well satisfied with the Senate bill because it was indeed what they wanted, then they would have had to expect the conferees, I say to my good friend from New York who joined us there, to the House and say, "Sorry, you have nothing to do with this. We have to accept the Senate in its entirety precisely as is." I do not think anyone expects that if they understand the two institutions.

For those States with large urban centers that take slightly less here than they would have under the House bill, I remind them, before they quickly add up the primary formula and say that we should have done better, to remember that this bill is historic, because mass transit now has a $1 billion user financed fund. It is an entitlement, or, shall I say, it is vested with contract authority like the highway program. Before they look at just the primary formula, they should look at their States and see what they get from mass transit.

In addition, a significant step forward has taken place in this bill in that we found in the Interstate completion program that there were five or six States that had pieces of the Interstate that go through extremely populated areas, such as the area in New York, of which the Senator from New York is aware.

My recollection is that the President visited that area during his campaign and has pledged to complete it since then. That State and a few others were faced with a problem of using up their interstate funding to an extraordinary degree for a very little piece of freeway that is completed on both ends so they cannot abandon it.

So this bill sets up a $300 million fund for that kind of "superexpensive" piece of the freeway. Before those States look at this and say, "We would have done better"—and I say only slightly—"under the House bill"; before they jump to conclusions, in addition to the mass transit, which I just described, they ought to look at that $300 million. That is the first time we have recognized that, and that is in addition to their annual formula apportionment for the Interstate.

Now when you add all of that up, it seems to me that I agree with the distinguished chairman of the House committee, who, after the passage of this bill, came to this body to ask when we might vote on this and said to the Senator from New Mexico, "I sure hope we pass it, because, by coincidence, we now have a bill that is good for the urban centers and good for rural America."

And I urge that, with reference to the next 4 years, we have conceded no new formula. We are now on a percentage basis during that transition. We will wait until that 4 years is up and then we will have ample opportunity to decide whether we want to give the ingredients that go into the formula a new emphasis.

For now, anyone can claim whatever they like, but there has been no concession by the Senate other than the numbers reflected in the bill.

I thank the distinguished Senator from Vermont for yielding.

Mr. STAFFORD. Mr. President, we do have tables that show the allocation of funds under each of the formulas in the conference report for each of the years of the bill for each of the States. They are available here. If any Member wishes one, we will supply him with it.

I ask unanimous consent that a copy of the table showing the allocation of each program for each State for each year be printed in the RECORD at this point.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

Mr. STAFFORD. Mr. President, at this late hour I will not attempt to lay out in great detail the contents of the conference report that relate to the highway program. I would like you to know that the bill does contain a provision to permit States temporarily to forgo matching Federal funds where State matching funds are not available. This provision will permit more projects to be undertaken quickly and will give States time to rise additional funds if they are needed to match the increased Federal funds available under the legislation.

I also want to point out the emphasis on rehabilitation and repair contained in this bill which requires that at least 40 percent of primary, secondary, and urban system funds be spent on repair, resurfacing, and rehabilitation.

CLOTURE MOTION

Mr. BAKER. Mr. President, I send to the desk a cloture motion.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk proceeded to read the cloture motion.

Mr. RANDOLPH. Mr. President, I ask unanimous consent that on the cloture motion which is at the desk I be included as a signatory.

The PRESIDING OFFICER. Without objection, it is so ordered.

The cloture motion reads as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the conference report on H.R. 6211, the Surface Transportation Assistance Act of 1982.

Howard H. Baker, Jr., Mack Mattingly, Warren Rudman, Rudy Boschwitz, Bob Packwood, John Tower, Jake Garn, Pete V. Domenici, Nancy Kassebaum, Ted Stevens, Robert T. Stafford, Nicholas F. Brady, William S. Cohen, Robert Dole, Strom Thurmond, James A. McClure, Slade Gorton, Jennings Randolph.

SURFACE TRANSPORTATION ACT OF 1980—CONFERENCE REPORT

Mr. BAKER. Mr. President, I have a unanimous-consent request that I have cleared with the distinguished minority leader who indicates that he finds no objection to this request and that he need not be on the floor, he indicates, at the time the request is made. I will state the request for the distinguished acting minority leader and all Senators.

I ask unanimous consent that when the Senate completes its business today it stand in recess until 1 p.m. on Wednesday, December 22, and immediately stand in recess until 12 noon, December 23.

Mr. HELMS. Reserving the right to object, if the Chair will indulge me.

Mr. BAKER. Mr. President, I have not cleared this with the minority leader but I am sure there will be no objection to it. If there is, I include in the request that it may be vitiated on his motion.

Mr. President, I amend the request so that when the Senate completes its business today it stand in recess until 1 p.m. on Wednesday, December 22, and that when the Senate completes its business on Wednesday, December 22, it stand in recess until 12 noon on Thursday. The effect of that is to provide an opportunity for the transaction of business if that seems indicated. However, it is not my intention to offer any business for the Senate unless it becomes a matter of importance which is mutually agreeable on the basis of unanimous consent. If the acting minority leader would like me to withhold this request on that basis until he can consult further, I would be glad to.

Mr. MOYNIHAN. Will the distinguished majority leader allow me that privilege?

Mr. BAKER. Yes. Mr. President, I withdraw the request. I ask that it be vitiated. I will consult with the acting minority leader.

Mr. STENNIS. On Thursday it is a matter of 2 p.m., with not much time to transact business and catch planes in the afternoon.

Mr. BAKER. We would be in at 12 o'clock on Thursday and absent any other arrangements the cloture vote would come sometime shortly after 1 o'clock on Thursday. Does the Senator from Mississippi care to have that adjusted?

Mr. STENNIS. I am thinking about the planes. You would have the debate that would follow, assuming cloture. You would have to have debate time. That would carry over until Friday, maybe.

Mr. BAKER. Perhaps. But there are other variations on that that might be undertaken. If the Senator from Mississippi will permit me, I will confer with him privately and see what we can do in that respect.

Mr. President, I will yield the floor unless some other Senator has a question. I believe the Senator from Vermont has the floor in any event.

Mr. BRADY. Can I ask the majority leader since we might be coming in on Thursday, if we could come in at 10 o'clock?

Mr. BAKER. I would be happy to adjust the request to that time when I make it. I have withdrawn the request. I will ask the representatives of the minority leader to examine the revised request. If the Senator wants 9 or 10 o'clock Thursday, it is perfectly all right with me.

I do not want to take a poll here, but let me see if 10 o'clock Thursday would be more agreeable than 12 o'clock.

There seems to be a general sentiment. That would put the vote at 11:30 or thereabouts. There has to be a quorum call 1 hour after the convening time under the rule.

Mr. McCLURE. Will the Senator yield?

Mr. BAKER. I yield.

Mr. McCLURE. I thank the Senator for yielding. If it is our intention to get to cloture for whatever reason, whether it is to vote cloture and then leave or vote cloture and then conclude our business, in either event committees are not meeting. We are not conducting other business of the Senate during the morning hours. Why could we not come in at 8 or 9 o'clock and get at the business of the day?

If we conclude it in a day, there might be some people who could catch planes or otherwise would have to wait another day.

Mr. BAKER. I might say to the Senator there might be Senators coming back the other direction on Thursday who may leave on Wednesday or yet today.

Mr. McCLURE. Will the Senator yield further?

Mr. BAKER. Yes.

Mr. McCLURE. Part of the problem of those of us who come from farther west is we cannot leave there and conduct business the same day. Conversely, when we leave here, we get in there very late that same day if we leave late.

Mr. BAKER. Do I understand the Senator to suggest 9 o'clock for a convening hour on Thursday?

Mr. McCLURE. I do.

Mr. BAKER. I yield to the Senator from Vermont.

Mr. STAFFORD. Might I inquire of the majority leader how late we might be up tonight?

Mr. BAKER. We are not going to be up very many more minutes if I have my way tonight. Then we are going to be in tomorrow. I had thought pro forma, but at the suggestion of a Senator we will change that so there will be an opportunity to transact business if that requirement presents itself. It would be my intention not to transact business unless there was some reason to do so. We would not be in late on Wednesday. Then we would be in Thursday at 9 or 10 as the group may indicate.

Mr. President, I will ask the representative of the minority leader to suggest that we change the convening time on Thursday to 9 o'clock and that the session on Wednesday would not be a pro forma session but with the announced intention to be the briefest of sessions, unless there is some reason to do otherwise.

[The following proceedings occurred after midnight:]

Mr. STEVENS. I wonder if it would be possible to explore the question precisely when we would have the cloture vote on Thursday? Those of us from the far West—and I am from the far Northwest—have 10 hours to fly after we leave here. Assuming that we do have a cloture vote and are successful in obtaining it, we have a post-cloture period before the vote. We have to leave here no later than 4 p.m. or we cannot make the last plane.

Mr. BAKER. Mr. President, I say to my friend, the assistant majority leader, that I fully appreciate that. If cloture is invoked on Thursday, it will be my present intention to try to accommodate debate in postcloture time so that Members could catch an airplane at that time that afternoon. I do not know exactly what time that would be, but it surely would mean that the 100-hours postcloture would not be utilized before Christmas. We would have to come back after Christmas to utilize that time.

Mr. President, the request has gone forward to the minority leader for his consideration of this request that I shall not now make. I yield the floor so the Senator from Vermont may continue.

Mr. STAFFORD. I thank the majority leader for yielding so that I may conclude the explanation I was offering of title II.

I believe that the Federal-aid highway program of the future will increasingly be directed at keeping our existing highway network in a safe, efficient state and that the period of major construction of new superhighways is over.

Mr. President, let me close by saying that we are very close to enacting into law a very significant program to insure that our deteriorating roads and bridges are repaired and rehabilitated, and that we will not allow the essential transportation network of this country to reach such a state of disrepair that economy and safety are jeopardized.

I would urge the Senate to pass this very important legislation which provides much needed funding, not only for highways, but for mass transit.

I repeat, I conclude that the provisions of title II are essentially those of the Highway Act that the Senate passed unanimously back last May. They are essentially the same provisions that are contained in the Senate version of this legislation which passed this body before going into conference within the last 24 hours.

Mr. President, I yield the floor.

Mr. RANDOLPH. Mr. President, I join with other members of the Committee on Environment and Public Works in strongly urging the Senate to adopt the conference report on H.R. 6211, the Surface Transportation Assistance Act of 1982.

This is important legislation, for it addresses a number of urgent issues affecting our national transportation system. It establishes a mechanism to provide increased financial support for highways and mass transit, and it authorizes expenditures of funds for the next 4 years. The conference report also includes modifications in the way in which the program is carried out. These changes are required to respond to contemporary conditions and to accommodate the increase in revenues for the highway trust fund.

Mr. President, this measure is significant in several respects. Perhaps the most important of these is the substantial increase in user fees to supplement the resources of the highway trust fund. This is the first such addition to revenues since 1959. The trust fund was established in 1956, and since that time its principal income has been through the tax on gasoline.

The tax of 4 cents per gallon has been in effect since 1959, and during that time construction costs have increased substantially, meaning that we receive decreasing returns for every public dollar invested in highways and bridges. In the past 5 years alone, highway construction costs have grown by more than 40 percent, and income of the highway trust fund has not kept pace. The additional 5-cents-per-gallon gasoline tax, plus other enhanced revenue for the trust fund, will enable our States and cities to begin meeting the accumulated backlog of highway and transit needs.

Mr. President, for several years we have known that the Interstate Highway System is approaching completion. Our attention and our resources must be focused increasingly on the repair and reconstruction of older highways and the protection of our multibillion dollar investment in the Interstate System, some of which is now 25 years old. This legislation enlarges upon a policy established in 1978 to provide Federal assistance for these purposes. The bill provides additional funds for the 4-R program and, in fact, for all aspects of the federally supported highway construction effort.

We continue to move toward completion of the interstate construction program. This progress should be accelerated by the provisions of this bill. Concurrently, additional funds are provided for primary, secondary, and urban roads, safety construction and the important and vitally needed replacement and rehabilitation of our country's thousands of deficient bridges.

Mr. President, this measure also revises the formulas for the allocation of Federal-aid highway funds to the States. This is part of our overall effort to redress inequities that have developed in the program over the years.

A major feature of this effort are the provisions related to the growing concern of States which have historically provided substantially larger payments to the trust fund than they have received for construction activities. In 1956 it was recognized that development of the Interstate System was truly a national project, one in which all States should participate. As a result, there have been for the past 26 years States which were net donors to the fund and other States which have been classified as donees. No other approach would have been effective in building the 42,500-mile Interstate System which when completed will carry 20 percent of our Nation's motor vehicle traffic.

The legislation before us provides that every State will receive at least 85 percent of its contributions to the highway trust fund. With initial construction of the Interstate System becoming less of a burden on the trust fund, States will have more opportunity to address other urgent highway needs. This provision assuring a minimum of 85-percent return also is designed so that no State is penalized by having its allocation reduced below previous years. Without this safeguard a few States could actually have received fewer funds despite the substantial increase in trust fund revenues.

In West Virginia we will receive substantial increases in Federal funds to help meet its backlog of highway needs. For the current fiscal year, West Virginia will receive a total of $157.6 million. In 1984 its portion will be $166.6 million; in 1985 it will be $176.2 million; and in 1986 it will be $183.1 million available for use.

Mr. President, the Federal-aid highway program was established in 1916. It is the oldest grant-in-aid program of the Federal Government. During the past 66 years it has served us well and has facilitated the development of an integrated national transportation system. From time to time it has been necessary to make revisions in the program in order to maintain its ability to respond to the needs and wishes of a diverse, growing and increasingly mobile society. The legislation before the Senate today continues this process of modification.

The Committee on Environment and Public Works, the House Committee on Public Works and Transportation and finally the committee of conference which produced the final version of this legislation have carefully considered and recommended to the Congress a number of changes to maintain the efficiency and responsiveness of the Federal-aid program. These will be discussed in detail by other Members who participated in this project.

Mr. President, I call attention to two provisions which I sponsored during committee consideration of this legislation and which I recommended be included in the conference report. One of these emphasizes the necessity to give greater attention to the improvement of roads impacted by the development and production of energy resources. This is a particular problem in West Virginia and other States where there is extensive production of coal and other energy-related resources. Such activities place unusual burdens on the highway system, and we recognize that States should receive special assistance for them.

The bill increases the Federal share to 85 percent for 3-R projects on Federal-aid routes which the Secretary of Transportation determines are energy-impacted. This provision allows the States to give priority to such projects in their annual programs for Federal-aid funds and allows the Secretary to give priority to such projects in approving the State program of projects for a fiscal year.

The other provision which I sponsored represents a continuation of my belief that Federal programs should encourage the development and implementation of innovative and alternative techniques and materials. I have sponsored such provisions in other statutes, notably the Clean Water Act, and I believe that such emphasis must be placed in our highway program.

It came to my attention that several new techniques and U.S. patented products are now available which will improve both the energy efficiency and strength of pavement materials and prolong the life of such pavements. Some incentive appears to be necessary to get the States to use these commercial products in the resurfacing or construction of our highways because of some additional capital costs which are more than offset by longer pavement life cycles and lower maintenance costs. The amendment which I offered raises the Federal share for projects which use these recycled materials or innovative pavement additives. This provision raises the Federal share by 5 percent on any projects on which such products are used.

Mr. President, this conference report on H.R. 6211 is not the product of hasty and ill-considered deliberate either by the Senate or the House of Representatives. Eariler this year the appropriate committees in both bodies began work on this subject matter. There were extensive hearings, and the House of Representatives passed its bill several months ago. Similarly, hearings were conducted in the Senate Committee on Environment and public works.

Further progress on the legislation was delayed pending a decision on whether there would be an effort to secure congressional approval of additional revenues for the highway trust fund. Once that decision was made this autumn, we were in a position in the Senate to expedite final action on a bill, bring it to the floor and secure a successful conference.

During Senate consideration of the bill in recent days, several issues proved to be controversial; and there was extensive debate. The issues were resolved, however, and there is before us what I believe to be a fair, workable and effective bill.

I stress, Mr. President, that this has been a bipartisan effort in our committee, in the Senate and in the House of Representatives. In final passage by the Senate only last night, the vote was 56-34. Twenty-one Democrats and 35 Republicans supported the bill, while the opposition consisted of 19 Democrats and 15 Republicans. This vote reflects not only the bipartisan nature of the support for the bill, but also the fact that the legitimate concerns of Senators of diverse viewpoints were accommodated.

Mr. President, many individuals were responsible for bringing us to this point of enactment of the Surface Transportation Assistance Act of 1982. I commend especially the leadership of our chairman, Senator STAFFORD, who has ably and successfully managed a wide variety of difficult and complex issues during the 97th Congress. Senator SYMMS and Senator BENTSEN, the chairman and ranking minority member respectively of our Subcommittee on Transportation, brought their experience and their expertise to bear on the development of the bill's provisions. Senator DOMENICI, who also serves as the able chairman of the Budget Committee, is an imaginative and articulate spokesman and contributed greatly to this legislation. I also commend for their contri-

butions and their participation the other members of the committee, the majority leader of the Senate (Senator BAKER); Senator CHAFEE; Senator SIMPSON; Senator ABDNOR; Senator GORTON; Senator MURKOWSKI; Senator BURDICK; Senator HART; Senator MOYNIHAN; Senator MITCHELL; and Senator BAUCUS.

As always, our staff has assisted us with excellence and dedication. I join Members in expressing appreciation to the following members of the minority staff for their work on this bill: John W. Yago, Richard M. Harris, Robert Peck, Debbie Knopman, Lee Fuller, Mary Jo Vrem, Ann Garrabrant, Helen Kalbaugh, Ann Underwood, Tanya Hart; Margie Wright, and Elizabeth Thompson.

Mr. President, this legislation is vitally needed by our country, and I urge its adoption by the Senate.

Mr. BOSCHWITZ. Mr. President, while both the Senators from North Carolina are here, I wanted to direct their attention to some of the problems as I hear talk about Thursday and late Thursday afternoon that we are beginning to have. My scheduler has become so familiar to the airlines people because we have been changing so much, that they should be very aware that travel is becoming very difficult. Reservations are almost unobtainable. We luckily obtained reservations tomorrow to go back to Minnesota.

Minnesota is not very far away, but I hope we are able to establish a time certain with respect to a vote on this matter, not only with respect to cloture, which is more easily ascertained, but even a time certain so that we may go about the business, once and for all, of making such reservations as are necessary.

The Senator—I shall wait for the Senator from North Carolina.

The Senator from North Carolina (Mr. HELMS) is aware that my family and I do not celebrate the holiday of Christmas. Nevertheless, it has for many years been the time when we all could be together. That is, of course, the occasion, I am sure, of all of my colleagues around me. That is fast becoming a matter that is academic, simply because we are unable to obtain reservations.

As I see us moving closer and closer to Christmas Eve, it is becoming more difficult. I think we got the last reservations that were available to go to Minneapolis tomorrow. I am not sure that we are going to be able to change our reservations at all.

The Senator from North Carolina is a man of great conviction and I understand that these things may not move him. Nevertheless, on behalf of myself and my family, and I am sure I speak on behalf of many Members of the Senate, it is time that we fix a time certain that we know we can go forward and make arrangements that do not have to be remade and remade because we are now coming to the time when we simply cannot remake them.

I thank the Senator. I yield the floor.

Mr. HELMS. Mr. President——

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, the Senator from Minnesota, my dear friend, knows that I understand his problem. I wish we could be home right now. That is not my judgment call. That judgment was made sometime back.

Did the Senator say to me he cannot go home Thursday, that he does not have a plane reservation for Thursday?

Mr. BOSCHWITZ. Mr. President, we are able to make a series of plane reservations and tell the airlines we are going to take one of them. We have been advancing them a day or 2 days at a time. My family is not all together any more. We felt that we got the last reservation. We were told that Thursday is going to be an extremely busy day, that there would be no reservations available. I do not know about Friday. I am sure it is probably busy.

Mr. HELMS. I say to the Senator that I shall do the best I can and I wish him bon voyage.

Mr. President, I am concerned that there is not a copy of this piece of legislation available for me to take home tonight. I candidly told the distinguished Senator from New Mexico (Mr. DOMENICI) that it is not my intention to vote for the bill. But I frankly do not see how any Senator can vote for it if he does not know what he is voting on.

That has been precisely the problem from the beginning. I think if we used a polygraph on all 100 Senators, I doubt that we would have 10 who would pass the test of saying he or she had read the bill and understood it.

Here is the problem about this bill, Mr. President. Believe me, it gives me no pleasure to be in the fix I am in, being made the heavy in a matter in which I have tried to operate in perfectly good faith. But look at the spectacle of this Congress, if you will. The House of Representatives, in a 10-day period, gave itself a big fat raise. The Senate of the United States took the lid off of outside income from speechmaking.

Also in that 10-day period, the House and the Senate are slapping a tax, a regressive tax, on the people of this country. The ones to be hit the hardest are the people least able to afford it.

Now, it has been suggested here that I have irritated my good friend from Wyoming. He used some adjectives that I would never use about him or any other Senator. He made threats. I know he is tired. I hope he will dismiss those thoughts from his mind later.

I want all Senators to know that I love them dearly, but this Senator did not come to Washington to win a popularity contest among the Members of the U.S. Senate, I hope that I can regain some popularity if I have lost it. But I came here to do what I think is right.

One Senator—I do not recall who it was—professed to state that the rules of the Senate were never intended to allow two or three or four Senators to hold up legislation in the Senate. I say, Senator, you are dead wrong. Those rules were designed for one Senator. And indeed, individual Senators have used those rules this week to block legislation they oppose. An example occurred with respect to the PIK bill.

This is the only tribunal in the world originally designed to protect the rights of the tiniest of minorities. Now, Senator SIMPSON can afford the 5-cents-a-gallon tax increase. Any Senator in this Chamber can. But who is going to speak for the little fellow out there?

Then we get on down to things like the Davis-Bacon Act. What an outrageous proposition when you stop to think about it.

The President called me the other day. He was very gentle in his stroking, urging me to support this measure. And I said, "Mr. President, I think I have the credentials to demonstrate I have been your friend and supporter for about as long as anybody else in the Senate, but I disagree with you on this." I said, "You are the one who said some months back it would take a palace coup for you to propose a measure of this type." I said jokingly, "Mr. President, when did the coup occur?"

Then I began to list the things I found wrong in this legislation, and I said, "Mr. President, do you like that?" He said, "No." I said, "Do you like this?" And he said, "No." We went down the list. And finally, I said, "What do you like about it?" So I think maybe the cart is before the horse in some of the criticisms.

And it may be, I say to Senators, that one of these days you will feel strongly about a piece of legislation,

and I will say this to you. If you feel strongly and do not defend it until the last gasp, you are not doing your duty as a Senator. So have at me; I can take it. I do not like it because I like you, I am honored to serve in the Senate with you, but I think something is amiss when even in frustration and weariness there begins this syndrome of carping. Now, I invite any Senator to check the RECORD and find one instance in which I made comments such as have been made in the last 2 or 3 days. I have not done it. There have been times when I felt like it, but I love this body too much. I respect this institution too much to engage in that sort of thing.

Each Senator is entitled to his own assessment of this piece of legislation. I think it is very bad legislation, and if we want to look at the political aspects of it, speaking as a Republican, I think it is a disaster. We have been exhorted to support this bill because we are Republicans. We have been exhorted to support this bill because of our leadership. But I am telling Senators that the Republican Party is shooting itself in the foot. The tax increase in July and now this one and next year social security. And you better believe the political professionals are going to hang that one around the Republican Party's neck as well.

So that is what prompts me to push aside the political aspects, to peel off the veneer of this legislation, and to look at it fundamentally for what it is. It is bad legislation at the wrong time presented in the wrong manner. I say again that we would not be here tonight if my suggestion had been heeded, even considered, to drop this bill, introduce another one on the first day of the session of Congress in January, have full and adequate hearings and report it out.

I made the commitment then, and I will restate it tonight, that this Senator will not engage in extended debate on this bill next year

So that is about it. I would like to be home. I would like for RUDY BOSCHWITZ to have been on that plane yesterday with his family. But I submit that we have a duty as Senators, when we are genuinely committed to the proposition that a piece of legislation is bad legislation, that we should resist it with all the vigor and energy that we possess.

Mr. STEVENS. Will the Senator yield?

Mr. HELMS. Let me make one more statement and I will yield the floor.

I apologize to Senators for the inconvenience, but I say to them that I do not think I am the one who should be apologizing. I think those who thrust this measure upon the Congress, I think those who went beyond the presentation of the continuing resolution and the appropriations bills, really are the ones who owe you the apology. But, in any case, let me express my affection and respect for each of you, and we will move this thing along.

Mr. STEVENS. Will the Senator yield?

Mr. EAST addressed the Chair.

Mr. HELMS. I yield to the Senator from Alaska.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. I do not want to be one that beleaguers my friend from North Carolina, but I checked the situation for those of us going west. It is as the Senator from Minnesota says, most unhappily. My reservations are tomorrow night, as a matter of fact. I wonder if it might be possible for the Senators from North Carolina to consider one small concession to the Senate as a whole, and that is taking 1 day off the waiting period on the cloture vote?

We are going to go out and just come in here tomorrow on a pro forma basis. A lot of us are going to find we are not going to be home for Christmas because of that 1 day. If we came in tomorrow and had the vote tomorrow, it really is not abusing the rules or the rights of the Senators from North Carolina at all, and it might make a considerable difference to those of us that are going west if we could leave tomorrow night or start leaving tomorrow night, assuming that is the decision the Senate makes, and we will have to take that risk.

But it seems to me that the idea of waiting with that pro forma tomorrow and just sitting here in the city—and I do not want to get started on this city again, but we have 16 feet of good powdered snow in Alaska, and my kids are all waiting up there. I have told the Senator before I have a granddaughter I have not yet seen. And she has an aunt she has not yet seen who is just about a year older than she is, so I think it is going to be a nice Christmas if we can make it home. But will the Senator consider knocking off this 1-day waiting period? I think that is about the nicest Christmas present the Senator could give to us because we would not have to sit around and wait the 48 hours to vote; we would just wait 24 hours to vote.

Mr. HELMS. If the Senator noticed, it was I who suggested to the majority leader that he amend his unanimous-consent request.

Mr. STEVENS. That is what gave me great hope. I just realized that.

Mr. HELMS. This is not a decision that I can make alone.

Mr. STEVENS. I realize that. I suggest we take it absent a quorum. The last time I talked last night I got myself in a little trouble so I think I better quit while I am ahead.

Mr. HELMS. Let me suggest that we have either a brief quorum call or somebody can do a little talking. Maybe PETE DOMENICI wants to fuss at me a little more.

Mr. BAKER. Mr. President, I tried talking last night. Let me suggest the absence of a quorum tonight.

Mr. HELMS. Very well.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER (Mr. D'AMATO). The Senator from Kansas.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE. I have three conference reports which have been cleared all the way around.

Mr. BAKER. Mr. President, may I have recognition for a moment?

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Could we have order in the Senate?

The PRESIDING OFFICER. Will Senators please take their seats and clear the aisles, and cease conversations, please.

SURFACE TRANSPORTATION ACT OF 1982—CONFERENCE REPORT

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, I would like to propound a unanimous-consent agreement for the consideration of the minority leader and all Senators. The distinguished Senator from North Carolina, the senior Senator from North Carolina, has indicated to me that he would like to find a way to conclude this debate, and I thank him for that. I believe what I am about to put next is acceptable on this side of the aisle.

Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 1 p.m. tomorrow and that immediately thereafter the Senate recess over until the hour of 8 a.m. on Thursday.

I further ask unanimous consent that at the hour of 9:30 a.m. the Senate proceed to vote on cloture against the bill pursuant to a motion filed under the provisions of rule XXII.

I further ask unanimous consent, Mr. President, that no business except general debate on this measure be in order from 8 a.m. on Thursday until 9:30 a.m. when the vote occurs.

I ask unanimous consent, Mr. President, that if cloture is invoked on Thursday, with the vote at 9:30 a.m., that a vote occur on the conference report up or down not later than 2 hours thereafter. Mr. President, that is the request.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I have one clarification and possibly two suggestions. The clarification is I want to make sure that the meeting tomorrow will be a pro forma session, no business.

Mr. BAKER. No business. It will be pro forma. The language put in the request is that we meet at 1 p.m. and immediately recess until Thursday at 8 a.m.

May I inquire of the Chair does that constitute a pro forma session with no possibility of business to be transacted?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. My second request comes in the form of a suggestion to say that we vote no later than——

Mr. BAKER. Two hours after the vote on cloture ends.

Mr. ROBERT C. BYRD. No later than that. It could come at 10 o'clock. I think we ought to be in position to tell our Senators exactly what time the vote will be.

Mr. BAKER. Mr. President, I think that is a good suggestion. I amend the request: In the event cloture would be invoked, the vote would occur at 11:30 a.m.

Mr. HELMS. Mr. President, if the Senator will yield——

Mr. BAKER. Yes.

Mr. HELMS. That is longer than I desire. If you want to make it 9:30——

Mr. BAKER. Yes; 9:30 on the cloture vote, and then if cloture is invoked, not more than 2 hours of debate, and then the vote will occur.

Mr. HELMS. I see, that is fine.

Mr. BAKER. I am changing it now so that it would occur at 11:30 a.m.; the vote up or down in the event cloture is invoked at 11:30 a.m.

Mr. HELMS. That part of it is fine. Will the Senator state again or restate the limitation on business?

Mr. BAKER. Yes, Mr. President. Between 8 a.m. on Thursday, when the Senate convenes, until 9:30 a.m. when the vote on cloture will occur, no business will be in order except general debate on the pending conference report. I am talking about Thursday now, not Wednesday.

Mr. HELMS. I understand.

The point, Mr. Leader, is I still want a copy of this conference report. I hope to be able to spend tomorrow looking at it.

The Senator would not preclude any point of order? I know that the legislation is perfectly drafted, but I just want to take a look at it.

Mr. BAKER. The Senator certainly will be able to do so. I have asked the Secretary of the Senate to make sure our service department provides 100 copies of the conference report overnight. That will be available, I assume, early in the morning; 9 o'clock in the morning, I am told. I will make sure the Senator receives a copy of that conference report the moment it is available from our service department.

Mr. HELMS. I appreciate that.

Mr. ROBERT C. BYRD. Mr. President, will the majority leader yield?

Mr. BAKER. Yes.

Mr. ROBERT C. BYRD. If we are going to agree to a vote on Thursday, why not vote today (Wednesday)—we are here—and make it a one-shot deal? One cloture vote today, and if cloture carries, fine, vote 2 hours afterward. If it fails, that is the end of the ball game and we will be out of town.

Mr. BAKER. Mr. President, I am willing to do it on Wednesday. But my understanding was the Senator from North Carolina, perhaps both Senators from North Carolina were not agreeable to Wednesday but were agreeable to Thursday.

As far as the one shot is concerned, I will make the representation that if we get our vote on cloture, that it is my expectation that we will win that vote, but that will be the last effort that I will make to try to conclude this measure this session.

Mr. ROBERT C. BYRD. And the vote would be today or Thursday?

Mr. BAKER. Yes, it would be Thursday in the order that I had requested.

Mr. ROBERT C. BYRD. I think we ought to take that.

The majority leader earlier referred to my keeping the Senate in overnight a few times, and I never responded to that, because I did do it. But I thought we had something that was imperative before us to act upon. I do not think this is imperative, right now. I think it could wait until next year, which is only 2 or 3 weeks away.

But I am willing to do what I can to help the majority leader one more time to get cloture. We Democrats have done it time after time. But I think we ought to have an understanding that this is a one-shot deal—it is up or down win or lose, and that is the end of it, so we can get home.

Mr. BAKER. Mr. President, in the words of West Virginia and Tennessee, "You got a deal."

Mr. MITCHELL. Mr. President, reserving the right to object. Will the majority leader yield for a question?

Mr. BAKER. Yes.

Mr. MITCHELL. Mr. President, I wonder if the Senator from North Carolina would explain to this Senator why, if it is agreeable to set a time for a vote on Thursday morning it is not agreeable to set a time for a vote on Wednesday?

Mr. BAKER. Mr. President, I have had the priviledge, I say to my friend from Maine, of talking to the senior Senator from North Carolina, and I believe I can answer that, and I believe he alluded to it.

It is, indeed, true that it has not been possible to have a printed copy of the conference report. Indeed, as you will recall, I am sure, I could not even find the Senate papers after the House acted on this measure and we to qualify the House papers by unanimous consent. I am told that we subsequently did find the Senate papers. I am glad of that.

But the Senator made the point that he had not yet seen a copy of that conference report. And that is a reasonable request. It is not a small document.

I have asked the Secretary of the Senate, as I indicated earlier, to use our service department, rather than the Government Printing Office, to provide 100 copies of that conference report overnight. The Senator from North Carolina indicated to me that he was not prepared to do this tomorrow because he wanted to spend the day reading that conference report. I think that is a fair request.

I hope Senators would not object to the request that I put.

Mr. MITCHELL. Mr. President, this is a bill that has been pending before the Senate for some time. The Senate has acted; the House has acted. Is it not possible for the Senator from North Carolina, in the goodness of his heart, with the Christmas season approaching—and there are many Members who have been away from their families for a long time—to consider moving that vote up to late on Wednesday? If we are going to agree on a time certain, what conceivable purpose would be served by compelling the Members of the Senate to remain here overnight on Wednesday until Thursday and then get home, in some cases, less than 24 hours before Christmas? What conceivable purpose could be served by that? Is not one full day sufficient time to study the conference report, considering that the matter has been before the Senate before?

Mr. HELMS. Mr. President, let me answer the Senator's question by asking a question. Do you know what is in the conference report?

Mr. MITCHELL. I have here on my desk the summary of the provisions of it, I say to the Senator. I will be happy to make them available to you if you want to review it. I have not read the entire report.

Mr. HELMS. Senator, if we are going to engage in sarcasm, this colloquy is over.

Mr. MITCHELL. I did not intend it as sarcasm. I meant it seriously.

Mr. HELMS. If the Senator is going to go by a summary on every piece of legislation or any piece of legislation, I think he ought to review his process.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader has the floor.

Mr. BAKER. Mr. President, I have no desire to cut off any Member, but I really would like to put the request and I hope Senators will permit us to do this.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. I thank the Chair and I thank all Senators. I especially thank the two Senators from North Carolina.

Mr. President, there will be no more record votes tonight.

MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 1 a.m., in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

TARIFF SCHEDULE REUNION—CONFERENCE REPORT

Mr. DOLE. Mr. President, I submit a report of the committee of conference on H.R. 4566 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4566) to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 21, 1982.)

Mr. DOLE. Mr. President, H.R. 4566 contains more than 50 miscellaneous tariff provisions which either reduce or temporarily suspend the duties on various articles. While these provisions will reduce customs duties by about $60 million, they will benefit a number of small businesses in the United States. For example, one of these provisions will reduce duties by only $6,400, but it will enable the business concerned to obtain parts and raw materials more cheaply. All of these provisions have been the subject of hearings in either the House or the Senate and most are entirely noncontroversial.

The bill also contains four provisions implementing international agreements of the United States. These agreements include the International Coffee and Sugar Agreements. They require the United States to control imports of these commodities and without this bill the Customs Service lacks the authority to do so. The bill also contains provisions implementing the convention on stolen cultural property and an agreement that facilitates the duty-free importation of articles for the handicapped and scientific, cultural, and educational articles.

Mr. President, the bill as amended contains provisions which both the administration and our businessmen need. I urge my colleagues to approve the bill as the conferees agreed.

Mr. President, I yield to the distinguished Senator from Hawaii who has a concern with reference to one of the provisions in this conference report.

Mr. INOUYE. Mr. President, before voting upon this report, I would like to ask a few questions of my distinguished friend from Kansas. Does this conference report include a provision that will change the schedule of tariffs or duties on tuna canned in water?

Mr. DOLE. My answer to the question from the distinguished Senator is yes for over-quota tuna.

Mr. INOUYE. Mr. President, in the South Pacific, there are several small islands and we call these islands American Samoa. On these islands we find canneries and these canneries provide employment for approximately 35 percent of the work force.

I have been advised by some of my friends in Samoa, including the Governor, the Honorable Peter Coleman, that the acceptance of this provision will cause extreme hardship and havoc with their economy. They are fearful that the jobs of thousands of Samoans will be affected.

I have no way of knowing whether this will happen. I have been assured by the U.S. Trade Representative, Mr. Bill Brock, that there should be no fear of such havoc being caused to the economy.

In order to truly assure our friends in Samoa who are deeply concerned, will the chairman of the Finance Committee convene a special committee to investigate the possible effects these provisions may have on the economy of Samoa?

Mr. DOLE. Mr. President, let me say to my distinguished colleague from Hawaii, and I can understand this concern, that I can assure the Senator from Hawaii that if we can go ahead on this conference report the Finance Committee will request the International Trade Commission to conduct an investigation of the entire tuna industry, both domestically and internationally, regarding this provision.

Mr. INOUYE. Will the Senator also include the canneries in California and the rest of the west coast with Hawaii? I am sure the chairman is aware that just a few months ago two canneries closed on the west coast and another one will close in Hawaii.

Mr. DOLE. That will be done. The ranking minority member is on the floor and I am sure he will agree with that.

Mr. MATSUNAGA. Mr. President, while I have the floor, I want to express my deepest appreciation to the chairman of the Finance Committee, the senior Senator from Kansas (Mr. DOLE) and the ranking committee member, the distinguished senior Senator from Louisiana (Mr. LONG) for their all-out effort to win a conference agreement on H.R. 4566, the miscellaneous tariff bill.

Among the bill's meritorious provisions are the measures extending the International Sugar Agreement and the International Coffee Agreement as well as the measure implementing after 10 years the UNESCO Convention to protect cultural property.

However, I must join my colleague from Hawaii to express strong reservations to a questionable provision included by the conferees at the insistance of the House Members. This provision increases the amount of low-duty foreign tuna that may be imported into the United States; this is achieved by excluding from the established tuna quota, tuna shipped into the United States from American Samoa.

As the distinguished chairman of the committee knows, the quota was established to protect a hardpressed domestic industry. The quota for foreign tuna is 20 percent of the previous year's domestic production. Imports within the quota are assessed a duty of 6 percent. Imports over and above the quota are assessed a duty of 12.5 percent.

Although foreign imports have grown, they have not exceeded the quota until this year. The quota this year is 109.7 million pounds and was filled by the third quarter of the year.

Now, tuna packed in American Samoa and brought into the United States counts against this quota. Practically all Samoan packed tuna is foreign caught and landed in Samoa to supply the Soman canneries. Once packed in Samoa, that tuna can is permitted into the U.S. domestic market duty free, in an effort to help the Samoan economy. Although that tuna enters the United States duty free, it stills counts against the quota. Last year 31 million pounds of Samoan packed tuna entered the United States.

Unfortunately, the domestic tuna industry is already suffering from the impact of a worldwide and domestic oversupply. Canneries have shut down in San Diego and San Pedro, Calif. Cannery workers and fishermen are out of work. We cannot afford to make the situation worse by allowing more foreign tuna to enter the United States at a favorable tariff rate.

Various unions oppose the provision in H.R. 4566 to increase the low-duty imports of canned tuna. The International Longshoremen and Warehousemen Union, the Seafarers Union, the Fishermen Union, oppose this measure. Governor Coleman of American Samoa opposes this measure, because of its adverse impact on Samoa where tuna canneries employ 20 percent of the labor force. For these reasons, I strongly question the widom of this provision.

Mr. President, I was prepared to interpose an objection to the consideration of the conference report, but with the assurance just given to the Senator from Hawaii by the distinguished chairman of the committee I will not interpose any objection or in any way delay consideration of the conference report. Instead, I shall look forward to an early and expeditious study which hopefully would show that our domestic tuna industry will not be injured by this House-included provision in the final bill.

Mr. DOLE. I thank the Senator from Hawaii. The study requested by the senior Senator from Hawaii will include a study of the California and Hawaii canneries as well as those in Puerto Rico, as suggested by the distinguished Presiding Officer, Senator D'AMATO.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TAX CORRECTIONS ACT—CONFERENCE REPORT

Mr. DOLE. Mr. President, I submit a report of the committee of conference on H.R. 6056 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6056) to make technical corrections relating to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 21, 1982.)

Mr. DOLE. Mr. President, the technical corrections conference report makes only technical corrections to the internal revenue laws.

THE PROCESS

The principal provisions have been approved by this House this fall. Hearings were held in the House this spring. Full comments were received by the Finance Committee. All of these comments were reflected in the Senate's bill. Further technical improvements were made by the House and in the conference. The bill is not perfect. At least one technical correction which is important to the State of Kansas and this Senator was struck out by the House conferees. But the bill is overall, a very good bill.

MANY CHANGES ARE CLERICAL

I will not delay the Senate by describing every clerical and typographical change made by this measure. But I do want to highlight the importance of several of the technical changes made by this bill.

CORRECTIONS TO AID TAXPAYERS

Three principal provisions prevent serious hardship for taxpayers. For example, the bill prevents an unintended hardship for certain taxpayers who are seeking to roll over the gain from the sale of their principal residence. That problem is eliminated by this bill. Second, TEFRA included a House-originated provision which required registration of municipal bonds after January 1. Legal problems and technical problems have shown that effective date to be too ambitious. Mandatory registration has been deferred 6 months. That deferral does not signal, however, any withdrawal from our strong support for improved taxpayer compliance. Indeed, the 6-month deferral was granted in part because of assurances from bond lawyers, issuers and others that no effort would be made to repeal the bond registration requirement. Third, the bill also clarifies the rules governing the treatment of certain corporate acquisitions with rules which are as fair as they are clear. The complete list goes on and on.

CORRECTIONS TO PROTECT THE GOVERNMENT

The bill also prevents a large number of abuses that can arise be-

cause of errors in prior legislation. The Senator from Ohio has referred to the subchapter S loophole. It is blocked by this bill, but taxpayers are permitted to unwind transactions previously entered into. The bill also prevents a celebrated debt financing abuse highlighted in recent months by two large industrial corporations. A technical amendment to the original issue discount provisions will prevent the mismatching of interest income and deductions in the future. Thus, this bill is important not only because it protects taxpayers but also because it protects the Government from unintended results of technical errors made in recent tax legislation.

THE IMPORTANCE OF THIS LEGISLATION

It is important that we pass this bill in this Congress, before adjournment, in order that taxpayers may know with certainty the law when they prepare and file their tax returns this spring. I do not want to exaggerate the importance of this bill, but it is a good bill and a fair bill. It is not likely to be made any better in the 98th Congress. It should be passed.

Mr. President, I know of no objection to this provision. I know of no questions. It has been approved by the distinguished Senator from Louisiana, Senator LONG.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PERIODIC PAYMENTS TAX ACT—CONFERENCE REPORT

Mr. DOLE. Mr. President, I submit a report of the committee of conference on H.R. 5470 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5470) to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 21, 1982.)

Mr. DOLE. Mr. President, I urge adoption of the conference report on H.R. 5470, The Periodic Payment Settlement Act of 1982. The conference report contains five minor tax provisions relating to the tax treatment of periodic damage payments, the tax treatment of certain foster care payments, the taxation of Indian tribal governments, the waiver of preemption by ERISA in certain circumstances covered by the Hawaiian Prepaid Health Care Act, and the waiver of preemption in the case of multiple employer welfare arrangements.

Section 101 of the conference report excludes from gross income damage payments for injuries or sickness, whether paid as lump sums or as periodic payments. In addition, under certain circumstances, it excludes amounts received for agreeing to undertake an assignment of a liability to make periodic payments of personal injury damages.

Section 102 excludes from the gross income of a foster parent amounts paid to reimburse the foster parent for the expense of caring for a foster child, under the age of 19, in the foster parent's home. It also excludes difficulty of care payments, which are compensation for providing the additional care that is required because of the foster child's physical, mental, or emotional handicap.

Section 201 provides that, for a series of specified purposes under the Internal Revenue Code, Indian tribal governments generally will be treated the same as State governments.

Section 301 generally exempts the Hawaii Prepaid Health Care Act from preemption by ERISA.

Finally, section 302 generally exempts certain multiple employer welfare arrangements from the ERISA preemption provision. This Senator might add that no provision of H.R. 5470 is intended either to overturn or endorse the decision reached by the U.S. Court of Appeals for the First Circuit in Wadsworth, et al. against Whaland. That case held that a State insurance law regulating the content of group insurance policies sold to employee welfare plans covered by ERISA was not preempted by ERISA.

Mr. President, I urge adoption of the conference report on H.R. 5470.

Mr. MATSUNAGA. Mr. President, I thank the Senator for yielding. I have a question for the distinguished floor manager: Does the conference report contain a provision in the form of an amendment which I offered in the Finance Committee, providing for the exemption of the Hawaiian Prepaid Health Insurance Act from preemption by ERISA?

Mr. DOLE. Mr. President, the answer is "Yes," with certain modifications of a technical nature.

Mr. MATSUNAGA. I thank the Senator, because, as the distinguished chairman is well aware, this is a provision we have been attempting to enact for the past two Congresses.

Mr. DOLE. I recall it well. I appreciate the diligence of the Senator from Hawaii.

Mr. MATSUNAGA. I thank the Senator, and let me say that I appreciate deeply the great help he has given me to get this special Hawaiian amendment adopted. I wish also to thank the ranking minority member, and former chairman of the Finance Committee, Mr. LONG, for his unfailing assistance.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION OF APPROPRIATIONS FOR U.S. CUSTOMS SERVICE, INTERNATIONAL TRADE COMMISSION, AND OFFICE OF TRADE REPRESENTATIVE—CONFERENCE REPORT

Mr. DOLE. Mr. President, I submit a report of the committee of conference on H.R. 6094 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6094) to authorize appropriations for the United States International Trade Commission, the United States Customs Service, and the Office of the United States Trade Representative for fiscal year 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 21, 1982.)

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

Mr. DOLE. Mr President, this is simply an authorization for the U.S. International Trade Commission, the U.S. Trade Representative, and the Customs Service. There is no amendment in disagreement. No conference is necessary.

The PRESIDING OFFICER. The question is on agreeing to the conference report. The conference report was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

BANKRUPTCY COURT CRISIS

Mr. SPECTER. Mr. President, on June 28, 1982, the Supreme Court ruled that the delegation of jurisdiction granted the bankruptcy courts in the Bankruptcy Reform Act of 1978 was unconstitutional because it "impermissably removed most, if not all, of 'the essential attributes of the judicial power' from the article III district courts, and has vested those attributes in a nonarticle III adjunct."

The Court, in recognition of the havoc raised by the sudden invalidation of the bankruptcy courts, ruled that its decision would only be applied prospectively to avoid imposing "substantial injustice and hardship upon those litigants who relied upon the act's vesting jurisdiction in the bankruptcy courts."

The Court stayed its judgment until October 4, 1982, and stated: "This limited stay will afford Congress an opportunity to reconstitute the bankruptcy courts or to adopt other valid means of adjudication without impairing the interim administration of the bankruptcy laws."

When Congress failed to act by October 4, the Court, at the Government's request, extended the stay to allow Congress one more opportunity to act. That stay expires in 3 days.

Press accounts have suggested that if Congress fails to act to provide a bankruptcy court system constitutionally capable of directing and resolving thousands of pending chapter 11 business reorganizations, financing will become unavailable to those companies struggling to survive by utilizing chapter 11. As a result, millions of dollars and thousands of jobs may be lost.

Knowledgeable members of the bankruptcy bar similarly suggest that significant hardship will result from our failure to reach a timely solution to this problem.

By our failure to respond to the Supreme Court's invitation that we exercise our judgment to restructure the bankruptcy court system, we neglect our constitutionally mandated responsibilities. I find this unacceptable.

Our problem raised by the Marathon Pipeline case is not simple; nor is its solution. But the fact that a problem is complicated is no excuse for a failure to address it. Nor does the pending of other important bankruptcy and court reform matters excuse our refusal to respond to the crisis created by the Supreme Court's decision.

VOTING RECORD OF SENATOR WILLIAM PROXMIRE

Mr. THURMOND. Mr. President, I commend Senator WILLIAM PROXMIRE, the distinguished senior Senator from the State of Wisconsin, on his outstanding voting record here in the Senate. Senator PROXMIRE holds the record for the most consecutive votes in the Senate, both in terms of the number of rollcall votes cast, and in terms of the number of years this represents. Over the span of 16 years since 1966, Senator PROXMIRE has cast 8,000 consecutive rollcall votes. This record is merely a reflection of the high priority Senator PROXMIRE has given to Senate floor action and deliberation in order to best serve the people of Wisconsin and this country.

In establishing this new record, Senator PROXMIRE has eclipsed the old record of 2,900 consecutive votes set by former Senator Margaret Chase Smith of Maine and 7 years of perfect voting attendance set by former Senator Sheppard of Texas. In this endeavor, Senator PROXMIRE has achieved a milestone in which he, his family, and friends can take great pride. Through his continued dedicated service in the Senate, as exemplified by his continued attention to his legislative responsibilities, WILLIAM PROXMIRE has been an outstanding example of a legislator in our representative democracy.

Mr. President, it is also worth noting that while we have taken a moment to acknowledge his accomplishment, every additional consecutive rollcall vote by Senator PROXMIRE extends this fine record. Certainly, this performance has been, and continues to be, worthy of emulation.

MESSAGE FROM THE HOUSE

At 2:05 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House disagrees to the amendment of the Senate to the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas; it asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and appoints the following as managers of the conference on the part of the House:

Mr. ROSTENKOWSKI, Mr. GIBBONS, Mr. PICKLE, Mr. RANGEL, Mr. BRODHEAD, Mr. CONABLE, Mr. DUNCAN, and Mr. ARCHER (for consideration of title I of the Senate amendment and modifications committed to conference as well as on matters within the jurisdiction of the Committee on Ways and Means); and Mr. HOWARD, Mr. ANDERSON, Mr. BREAUX, Mr. MINETA, Mr. LEVITAS, Mr. CLAUSEN, Mr. SHUSTER, and Mr. SNYDER (for consideration of the remainder of the Senate amendment and modifications submitted to conference).

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 4496) to grant Federal recognition to the Texas Band of Kickapoo Indians; to clarify the status of the members of the band; to provide trust lands to the band, and for other purposes.

At 3:44 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House has passed the following joint resolutions, with amendments, in which it requests the concurrence of the Senate:

S.J. Res. 261. Joint resolution to make technical corrections in certain banking and related statutes.

ENROLLED BILLS SIGNED

At 8:31 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the Speaker has signed the following enrolled bills and joint resolution:

S. 625. An act to revise the boundary of Voyageurs National Park in the State of Minnesota;

S. 717. An act for the relief of Carole Joy Maxfield-Raynor and Bruce Sherlock Maxfield-Raynor, wife and husband, and their children Charlton Bruce Maxfield-Raynor and Maxine Anne Maxfield-Raynor;

S. 835. An act for the relief of Jerry L. Crow and Ralph D. and Connie V. Hubbell;

S. 1364. An act for the relief of Jose Ramon Beltron Aivenda Ostler;

S. 1838. An act for the relief of Cesar Noel Jump;

S. 1965. An act to designate certain lands in the Mark Twain National Forest in Missouri, which compromise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area" as a component of the national wilderness preservation system;

S. 1986. An act to provide for the use and distribution of funds awarded to the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of Fort Belknap Indian Community in certain dockets of the U.S. Court of Claims and of funds awarded to the Papago Tribe of Arizona in dockets No. 345 and 102 of the Indian Claims Commission, and for other purposes;

S. 2059. An act to change the coverage of officials and the standards for the appointment of a special prosecutor in the special prosecutor provisions of the Ethics in Government Act of 1978, and for other purposes;

S. 2355. An act to amend the Communications Act of 1934 to provide reasonable access to telephone service for persons with impaired hearing and to enable telephone companies to accommodate persons with other physical disabilities;

S. 2636. An act to amend and extend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes;

S. 2955. An act to establish the Cheaha Wilderness in Talladega National Forest, Ala.; and

S.J. Res. 270. Joint resolution to designate 1983 as the "Bicentennial of Air and Space Flight."

The enrolled bills were subsequently signed by the President pro tempore. (Mr. THURMOND).

At 9:58 p.m., a message from the House of Representatives delivered by Mr. Gregory, one of its reading clerks, announced that the House has agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7093) to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6056) to make technical corrections related to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5470) to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4566) to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6094) to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1983, and for other purposes.

The message further announced that the House has passed the following joint resolution, with amendments, in which it requests the concurrence of the Senate:

S.J. Res. 29. Joint resolution to authorize and request the President to issue a proclamation designating the calendar week of June 6 through June 12, 1982, as "National Garden Week."

The message also announced that the House agrees to the amendments of the Senate to the amendments of the House to the amendments of the Senate to the bill (H.R. 3420) to authorize appropriations for fiscal year 1982 for carrying out the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes.

The message further announced that the House recedes from its amendment to the amendment of the Senate to the amendment of the House to the amendments of the Senate to the bill (H.R. 5121) to improve the collection of Federal royalties and lease payments derived rom certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes, and concurs therein.

The message also announced that the House has passed the following bills and joint resolutions, without amendment:

S. 705. An act to authorize the Secretary of Agriculture to convey certain national forest system lands, and for other purposes;

S. 2863. An act to amend title 28 to provide protection to all jurors in Federal cases to clarify the compensation of attorneys for jurors in protecting their employment rights, and authorizing the service of jury summonses by ordinary mail;

S.J. Res. 240. Joint resolution to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week"; and

S.J. Res. 264. Joint resolution to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week."

The message further announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 236. Concurrent resolution to declare March 1, 1983, as "National Day of the Seal"; and

H. Con. Res. 439. Concurrent resolution correcting the enrollment of H.R. 5470.

ENROLLED BILLS SIGNED

The message also announced that the Speaker has signed the following enrolled bills:

S. 1501. An act entitled the "Educational Mining Act of 1982"; and

S. 3103. An act to amend section 1304(e) of title 5, United States Code.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

ENROLLED BILLS PRESENTED

The Secretary reported that on today, December 21, 1982, he had presented to the President of the United States the following enrolled bills:

S. 187. An act to authorize the Secretary of the Interior to convey certain lands near Miles City, Mont., and to remove certain reservations from prior conveyances;

S. 1735. An act to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in docket Nos. 113, 191, 221, and 246 of the Court of Claims; and

S. 3113. An act to make certain minor and technical amendments to the Job Training Partnership Act.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BAKER (for Mr. Goldwater), from the Select Committee on Intelligence:

Special Report entitled "Implementation of the Foreign Intelligence Surveillance Act of 1978—1981-82" (Rept. No. 97-691).

By Mr. DOLE, from the Committee on Finance, with amendments:

H.R. 7397. An act to promote economic revitalization and facilitate expansion of economic opportunity in the Caribbean Basin region.

CARIBBEAN BASIN INITIATIVE

Mr. DOLE. Mr. President, I am pleased to report to the Senate from the Committee on Finance H.R. 7397, legislation to implement the President's Caribbean Basin Initiative. Members will recall voting in September to approve another part of the plan, the supplemental aid funds requested by the President.

H.R. 7397 would provide two incentives to development of the beneficiary countries. These are: First, to authorize the President to proclaim for 12 years duty-free treatment for products from the Caribbean Basin countries, with certain exceptions; and second, to extend the availability of the business-expense tax deduction for expenses incurred while attending conventions in these countries, subject to their signing an exchange-of-information agreement to prevent tax abuse. These incentives will foster growth in

the countries based on free enterprise principles and their own self-help measures.

To be eligible for these benefits, a country must not be Communist and it must be abiding by international law in the settlement of investment disputes. It further must not be pirating U.S. copyrighted material and it must have an agreement allowing extradition of U.S. citizens. Finally, after becoming eligible, it must agree on a food production plan that will preclude the possibility of an imbalance arising between food crop and cash crop production. There are also a number of guidelines on eligibility relating to the countries' willingness to follow free enterprise development principles.

Several products are exempt from the duty-free provisions. These are: Textiles and apparel products subject to the multifiber arrangement; petroleum and petroleum products; tuna; and footwear, handbags, luggage, flat goods, work gloves and leather wearing apparel that are ineligible for designation under the generalized system of preferences. Eligible products must contain at least 35 percent value-added sourced in the beneficiary countries. Fifteen percent of this total may be of U.S. origin. However, the articles must be imported directly from one of the countries; the value must be calculated from the direct costs of production; and the articles must be the growth, product, or manufacture of the beneficiary countries. Normal safeguard relief under section 201 of the 1974 Trade Act, and a special emergency procedure established by this bill for perishable products, will protect U.S. industries from any adverse effects of new competition.

As I noted earlier, Mr. President, title II of the bill will extend to U.S. taxpayers the benefit of a deduction for necessary business expenses incurred while attending conventions in the beneficiary countries and Bermuda. This benefit already extends to conventions in Jamaica, Canada, and Mexico. As a precondition to the availability of this deduction, however, countries must sign an agreement that will provide for exchanges of information to assist in enforcing the tax laws. It is estimated that this tax measure will mean a revenue loss of only $5 million, but will be a significant spur to the tourism industries in the countries. I include as an appendix to this statement a detailed explanation of the tax provisions of this bill.

Finally, H.R. 7397 contains several provisions that will benefit Puerto Rico and the Virgin Islands and protect them from any adverse effects of the CBI. These measures include: first, allowing an additional liter of alcoholic beverages to be brought into this country duty-free by a resident returning from them; second, rebating to them all Federal excise taxes collected on rum sold in the United States, third, inclusion of producers in Puerto Rico and the Virgin Islands within those entitled to protection under U.S. import relief law; and (4) liberalization of the rule of origin for products arriving from the insular possessions. I am convinced not only that these measures will substantially protect Puerto Rico and the Virgin Islands, but the measures further insure that they will reap significant benefits from the growth of their Caribbean neighbors.

Mr. President, I urge passage of this important legislation. The beneficiary nations of the CBI are widely divergent in cultures, histories, languages, economies, and governments. But they share some common characteristics: Most are failing economically; they are increasingly oriented economically, politically, and socially to the United States—and together they form our southern border. Too long this country has failed adequately to comprehend our national interests in this integrated region, and to take full advantage of the mutual opportunities greater cooperation offers. These interests are profoundly important.

In a region suffering a history of conflict, the nations of the Caribbean Basin offer in their nascent states a tempting target for Soviet trouble-making. The announcement last summer of a Soviet aid package to Grenada, the express purpose of which is to abrogate the historic Western ties of that island nation, provides a timely example of a real concern for our borders, our sealanes, and the Panama Canal.

The United States has great economic ties to the region. Despite their colonial past, the CBI countries import more from the United States than any other country. Last year this amounted to over $6 billion—half again as much as what we imported from them, excluding petroleum. U.S. direct investment reached nearly $10 billion in 1981. We import over 90 percent of our industrial requirements of bauxite and alumina from the Caribbean countries, and rely on them to a significant degree for nickel. The region clearly offers a vast new market for American products, if only greater economic and political stability can be brought about there.

Besides economic and security interests, the United States is bound by an increasing web of social ties with the Caribbean Basin countries. Some estimate that, excluding Mexicans, over 250,000 illegal immigrants now enter the United States yearly from the countries of the Caribbean Sea and Central America. Their desperate desire to seek political or economic emancipation in this country is perhaps matched only in magnitude by the strain on the services our National and State Governments provide them once they are here. I note that for the entire region in fiscal year 1982 the United States targeted about $475 million in developmental aid; the Federal Government and the State of Florida have spent over twice that on Cuban and Haitian refugees since the Mariel boatlift.

The ability of the United States to exploit these increasingly strong ties to the Caribbean Basin countries rests on their own stability. As the nations of Central America struggle to end armed conflict among themselves and with Communist guerrillas, as the Caribbean nations attempt to restructure their economies away from centuries of dependency on transfers from their former colonial sovereigns, an historic opportunity presents itself to the United States to aid in placing them on a firm, permanent path to growth and stability. The President's Caribbean Basin Initiative embodied in H.R. 7397, embodies a sound plan to that end.

Mr. President, I ask unanimous consent that an appendix to the bill be printed in the RECORD.

There being no objection, the appendix was ordered to be printed in the RECORD, as follows:

APPENDIX TO THE STATEMENT OF SENATOR DOLE—CARIBBEAN BASIN INITIATIVE—H.R. 7397—TAX PROVISIONS

Mr. President, as passed by the House, and reported by the Finance Committee, the CBI has two tax provisions: A rum excise tax rebate provision and a provision permitting business deductions for attendance at conventions in Caribbean countries.

RUM EXCISE TAX

Under present law the United States imposes an excise tax of $10.50 per proof gallon on all distilled spirits, including rum, manufactured in or brought into the United States. The excise taxes paid on rum made in Puerto Rico and the U.S. Virgin Islands and brought into the United States are transferred to the Treasury of Puerto Rico or the Virgin Islands.

This bill would require that all excise taxes collected on foreign rum brought into the United States (whether or not from Caribbean countries) would be transferred to the Treasuries of Puerto Rico and the Virgin Islands. The Secretary of the Treasury would prescribe a formula for allocating these taxes between Puerto Rico and the Virgin Islands.

Effective Date: The substitute would apply to rum imported into the United States after December 31, 1982.

Revenue Effect: It is estimated that this provision would reduce fiscal year receipts by $13 million in 1983, $20 million in 1984, $24 million in 1985, $27 million in 1986, and $33 million in 1987. This estimate does not take into account behavorial change that may result because of enactment of the proposal. Consequently, it should be regarded as a minimum estimate.

CONVENTIONS

Since the enactment of Public Law 96-608 in 1980, the Internal Revenue Code disallows deductions for business expenses incurred while attending a convention held outside the North American area (the

United States, the U.S. possessions, the trust Territory of the Pacific Islands, Canada and Mexico) unless the taxpayer can show that it was as reasonable to hold the convention outside the North American area as within it. The income tax treaty with Jamaica allows deductions for attending conventions held in Jamaica.

The United States has significant problems obtaining from some Caribbean countries information needed to enforce U.S. tax laws.

This bill would allow business deductions for attending conventions held in Caribbean countries if certain conditions are met:

First, the country would have to be a "beneficiary country" as defined in the trade portion (title I) of the bill. That is, it would have to be among the 28 Caribbean Basin countries listed in section 102(b) of the bill and it would have to be designated by the President as a beneficiary country. In addition, a deduction would be provided for conventions held in Bermuda provided that Bermuda met the other critieria.

Second, the country would have to enter into an executive agreement with the United States providing for the exchange of tax information. The agreement would be negotiated by the Secretary of the Treasury. It would provide, on a reciprocal basis, for information relating to U.S. tax matters to be made available to U.S. tax officials. The agreement would have to apply to both civil and criminal tax matters. It would have to override any local rules requiring secrecy about the ownership of bank accounts or bearer shares. The agreement would impose on the officials of each country a duty not to disclose this information other than to those involved in its tax administration.

Third, no deduction would be available for attending a convention in a country found by the Secretary of the Treasury to discriminate in its tax laws against conventions held in the United States.

Effective Date: This provision would apply to conventions beginning after December 31, 1982, but only if an exchange of information agreement were in effect on the day the convention began.

Revenue Effect: It is estimated that this provision would reduce fiscal year receipts by less than $5 million per year.

By Mr. DOLE, from the committee of conference:

Conference report on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6211) to authorize appropriations for the construction of certain highways under title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes (Rept. No. 97-692).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. ARMSTRONG (for himself, Mr. LONG, and Mr. DURENBERGER):

S. 3124. A bill to amend the Internal Revenue Code of 1954 to permit qualified pension funds and certain educational organizations to invest in working interests in oil and gas properties without incurring unrelated business taxable income; to the Committee on Finance.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BAKER (for Mr. GRASSLEY) (for himself, Mr. BENTSEN, Mr. BOSCHWITZ, Mr. MATTINGLY, Mr. D'AMATO, Mr. CHILES, Mr. JEPSEN, Mr. DIXON, Mr. HEINZ, Mrs. HAWKINS, Mr. DOLE, Mr. HUDDLESTON, Mr. GARN, Mr. HOLLINGS, Mr. PERCY, Mr. TSONGAS, Mr. KASTEN, and Mr. DANFORTH):

S. Res. 525. To express the sense of the Senate urging Presidential action pursuant to section 103 of the Revenue Act of 1971, 26 U.S.C. sec. 48(a)(7)(D) to disqualify certain Japanese manufactured, numerically controlled machine tools from the United States investment tax credit; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ARMSTRONG (for himself, Mr. LONG, and Mr. DURENBERGER):

S. 3124. A bill to amend the Internal Revenue Code of 1954 to permit qualified pension funds and certain educational organizations to invest in working interests in oil and gas properties without incurring unrelated business taxable income; to the Committee on Finance.

WORKING INVESTMENTS IN OIL AND GAS PROPERTIES

Mr. ARMSTRONG. Mr. President, legislation I am introducing today with Senators DURENBERGER and LONG could, once enacted, increase profits earned by pension plans and college endowments and, at the same time, infuse new and badly needed capital in domestic oil production.

This legislation is nearly identical to H.R. 7217, a House bill introduced by Representatives JENKINS, MATSUI, GEPHARDT, and FRENZEL, and is simple in concept. It permits pension plans and college endowments to treat, for tax purposes, income from oil and gas production exactly like income earned from stocks, bonds, and royalties. Once enacted, an additional investment pool of more than $500 billion would be available for investment in oil and gas production, and at the same time give pensions and endowments possibly higher rates of return on their holdings.

Some background on current tax law will explain the need for this legislation. Most college endowments and private pension plans are granted tax exempt status. Even if they are tax exempt, some sources of income received by pensions and endowments can, under current law be taxable. For Federal tax purposes, there are two sources of income—passive and unrelated business—for pensions and endowments. Passive income—not taxed—usually is interest and dividends earned on stocks, bonds, and royalties. Unrelated business is income taxed at corporate rates because, in theory, the income is derived from a business or investment not related to the purpose of the pension or endowment for which it received its tax exempt status.

This tax theory is 30 years old, and it makes sense. It seeks to eliminate unfair competition to taxpaying businesses by taxing their competitors controlled by tax organizations on the same basis. For example, an endowment owning controlling interest in a manufacturing plant should be taxed on the same basis as the manufacturer's competitor.

Generally, endowment and pension income that is exempted from the unrelated business income—or UBTI—will not be taxed. The problem is that in the past 30 years there has been precious little updating of UBTI. The result is not surprising. Changing economic conditions and new investment opportunities have somewhat outdated the unrelated business income tax. For example, it used to be that stocks and bonds enjoyed high rates of return and tax exempt organizations invested in them heavily. But the past 10 years have found the traditional equities—stocks and bonds—have been hard pressed to maintain an economic rate of return.

Simultaneously, however, direct investments in oil and gas producing properties have proved to be low risk, consistently performing assets that have brought yields outpacing inflation rates. Solomon Bros. reports that annual rates of return for oil assets have outpaced return rates on real estate, stocks, gold, and silver.

But the problem is that the current UBTI taxes earnings from most oil and gas production holdings of pension plans and private investments. The inevitable result is that pension and endowment trustees do not invest in oil and gas production and are foreclosed from higher investment returns than are available from stocks and bonds. Concurrently, oil and gas producers lose access from a large investment pool, estimated to be about $500 billion.

The bill I am introducing today is the solution to this problem. This bill permits pension and college endowments to invest through limited partnerships in working interests in oil and gas properties without being subject to the unrelated business income tax. This legislation is consistent with the underlying theory of the UBTI because it permits these funds to only passively invest in oil and gas production * * * meaning that the pension and endowment trustees cannot take part in the control of the business of producing oil and gas.

The bill has important safeguards that should make this bill noncontroversial:

First. Pension plans and endowments can only invest as a passive owner in a limited partnership, meaning they cannot exercise control in business decisions. In fact, limited partners exercise even less control over business decisions than stockholders do.

Second. Only qualified pension funds and educational organizations, as already defined in current tax laws, are covered under this legislation.

Third. These funds can only invest in working interests in oil and gas properties, meaning they must pay a share of the development and operating costs to receive a share of income. The definition of working interest is the same now used in current law.

Fourth. Pension plans and endowments will receive no benefit from income tax credits and deductions available to taxable limited partners. The bill also precludes allocations of these deductions and credits to taxable partners.

Fifth. Pensions and endowments will not receive exempt income from working interests held by a limited partnership if either organization is related to the general partner.

There are a number of reasons why this bill should pass, and soon. First, the bill has no revenue loss since investments in oil and gas production will only augment investments otherwise made in currently tax-exempt investments.

Second, the bill encourages portfolio diversification by pension plans and endowments that control nearly $500 billion.

Third, this bill offers the promise of higher rates of return than these pensions and endowments now presently receive.

Fourth, it will infuse new and badly needed capital in oil and gas production without raising energy prices. In fact, capital expenditures this year in oil and gas activity has decreased 35 percent this year.

Fifth, the legislation is consistent with the underlying theory governing unrelated business taxable income.

Sixth, this legislation corrects an anomaly in the current UBTI law. Currently, pensions and endowments can receive tax free income from oil royalties—simply investments in oil and gas activities where the investor pays none of the development costs—but cannot receive tax free income from working interests in oil producing properties. In both types of oil investments—royalty and working interest programs—investors are passive * * * exercising no control over business decisions. Thus, partnerships owning working interests should be subject to the same tax rules as are applied to oil royalties.

For these and other reasons, I urge quick enactment of this legislation. I ask unanimous consent that a more technical and detailed summary of this bill, as well as recent articles summarizing rates of return in stocks and bonds as compared to oil and gas production and an article summarizing rates of return in stocks and bonds as compared to oil and gas production and an article summarizing the desperate need for new capital in the oil and gas production program be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TECHNICAL EXPLANATION

The attached Draft Amendment ("the Bill") amends Section 512 of the Internal Revenue Code of 1954 (relating to the unrelated business taxable income of exempt organizations). The Bill would permit qualified pension funds and certain educational organizations to invest in working interests in oil and gas properties without incurring unrelated business taxable income, if such interests are held by such trust or organization as a passive investor (i.e., a limited partner) in a qualifying limited partnership. The amendment applies to pension funds that are qualified trusts under IRC Section 401 and exempt organizations ("qualified exempt organizations") described in Section 170(b)(1)(A)(ii) (generally, schools, colleges and universities) and in Section 170(b)(1)(A)(iv) (generally, exempt organizations created by public educational institutions with the purpose of holding an investment property for their benefit).

The definition of a working interest incorporates that which is contained in the regulations of the Internal Revenue Service, that is, an interest where the owner "is not relieved of its share of the development costs by the terms of any agreement with an operator." Treas. Reg. § 1.512(b)-1. The amendment is limited to investments in domestic oil and gas wells and is intended to employ the same description for those wells as is used in IRC § 613A, subject to application of IRC § 638.

To assure that partnership income is received by a qualified trust or qualified exempt organization as a passive investor, the Bill requires that the income must be allocated to such trust or organization in its capacity as a limited partner, which means a limited partner for tax purposes.

A limited partnership described in the amendment is one subject to a statute corresponding to the Uniform Limited Partnership Act, both as originally adopted in 1916 and as revised by the National Conference of Commissioners on Uniform State Laws in 1976 (and, in the case of Louisiana, to equivalent partnerships subject to the *In Commendam* law, as amended). A common aspect of the status of a limited partner under such laws is that such partner cannot take part in the control of the business of the partnership without becoming liable as a general partner. It is intended that the Bill will not apply to any pension fund or qualified exempt organization that falls to maintain its status under state law as a limited partner by virtue of having taken part in the control of the business of the partnership.

Income from a working interest held by a partnership may carry with it certain deductions—such as the partnership's administrative costs and the deduction for intangible drilling costs and the investment tax credit—that are allocated to all partners, including limited partners, under the partnership agreement. The amendment provides that all such deductions and credits, and any item thereof, will be excluded or disallowed in the case of any qualified trust or qualified exempt organization to which such item is allocated. Therefore, no such item would be available as a deduction or credit with respect to other taxable income of any such trust or organization.

The Bill precludes potential abuse through use of certain special partnership allocations. Allocations of larger amounts of deductions, losses or credits, relative to allocations of income or gain, would not be permitted to be made to taxable partners instead of exempt limited partners. The Bill provides three conditions that must be met by the limited partnership with respect to the allocation of income, gain, losses, deductions and credits among partners. First, under the partnership agreement, the partnership cannot allocate a lesser share of any item of deduction, loss or credit to the limited partners than their share of each item of income or gain. This requirement is intended to prevent the partnership agreement from allocating larger deductions, losses, or credits in relation to income or gain from the limited partners as a whole (who may consist in part or entirely of qualified trusts or qualified exempt organizations) to a general partner or partners; it is not intended to prevent special allocations under Section 704(b) that may have substantial economic effect from being allocated from the general partner or partners to the limited partners as a whole or to prevent the allocation of revenues to a general partner for services rendered to the partnership. Also, the Bill is not intended to prohibit the shift of sharing arrangements between the general partner and the limited partners, as is customary in the oil and gas industry, within a taxable year, so long as before and after such shift the conditions of the Bill are met.

Second, the Bill requires that, as between limited partners, there can exist no different allocation of any item of deduction, loss or credit. This is to assure that it will not be possible to allocate deductions that are available to the limited partners as a whole to taxable instead of exempt limited partners. However, this limitation does not apply to disproportionate deductions between partners arising as a consequence of the partners having different bases in their partnership interests or in their partnership properties, as, for example, resulting from a Section 754 election.

Third, cash distributions must be made in no different manner from the allocation of income or gain.

The Bill further provides that disproportionately lesser allocations of deductions, losses or credits to exempt limited partners cannot, subject to regulations to be prescribed by the Secretary, be effectuated indirectly, by use of multi-tier partnerships or other entities, such as trusts or Subchapter S corporations. This limitation is intended to apply only to situations in which a partnership or other entity is used as a purposeful device primarily to achieve a material misallocation of tax benefits from exempt to taxable investors. It is not, for example, intended to prevent a limited partnership that otherwise meets the conditions of the Bill from entering, directly or indirectly, into a general partnership, joint venture, operating agreement or "farm out" arrange-

ment for the acquisition, exploration or development of oil and gas properties under the terms of which the other partner, venturer or operator bears the economic burden of paying all or part of the costs of such acquisition, exploration or development and is allocated or assigned the deductions or credits associated with the costs borne by it.

The Bill further provides that pension funds and qualified exempt organizations will not receive exempt income from working interests held by a limited partnership if either organization is related to any general partner. The purpose of the related party provision is to assure that a pension trust or qualified exempt organization (or a group of such trusts or organizations) cannot control, directly or indirectly, the activities of a limited partnership by means of a related entity without becoming subject to tax on income from such activities. Under the Bill, income from a limited partnership interest would not be excluded from unrelated business taxable income if the combined holdings of all such trusts and organizations in a general partner were to represent 35 percent or more of the total interest in the general partner. For purposes of making this determination, the holding of certain related persons are aggregated with the holdings of the exempt pension trusts and qualified exempt organizations.

Many limited partnership drilling programs often, for administrative reasons, employ more than one tier of partnerships to effect investment in operating properties. For example, the investors may invest in an upper tier partnership (which may be either a general or a limited partnership) which in turn invests all its assets as a limited partner in a lower-tier partnership. It is intended that the amendment will apply to investors in such "two tier" partnerships, if the income is distributed to them either as a limited partner or as a partner in a partnership that is itself a limited partner (subject to the limitations of the losses, deductions and credits).

The bill also contains a conforming amendment to Section 514(c) (relating to unrelated debt-financed income) which provides that acquision indebtedness in the case of a qualified trust or a qualified exempt organization includes neither indebtedness incurred by the limited partnership to acquire or improve oil and gas properties or that incurred by such trust or organization in acquiring its limited partnership interest. This amendment provides that the objectives of the Bill in exempting income from working interests, will not fail to be achieved because the partnership has incurred debt for purposes of acquiring or developing its properties, as is customary in the oil and gas industry, or in exempting gain in the sale of a partnership interest because the trust or organization has incurred debt which might be deemed attributable to the acquisition of such interest.

It is not believed that the Bill will result in any material revenue loss, since, to the extent qualified trusts or qualified exempt organizations choose to invest in oil and gas drilling programs as a consequence of it, they will forego other investments producing dividend, interest and other passive income that would also be exempt in their hands. In addition, deductions, losses and credits allocated to an exempt limited partner will not be available to reduce the taxable income of that partner or any other partner. The Bill will take effect with respect to partnership taxable years beginning after December 31, 1982.

PENSION FUNDS EYE OIL, GAS VENTURES

Despite the doldrums of the U.S. drilling industry, pension funds are easing their ways into direct investments in oil and gas.

They are part of a move by institutional investors into ventures of this type (OGJ, Feb. 16, 1981, p. 62). Because they are tax-exempt organizations, pension funds have faced special legal hurdles that other institutions, mainly insurance firms, didn't encounter when they began to consider direct participation in oil and gas work.

The trend could help the oil and gas industry meet its huge future capital needs. But pension funds are moving cautiously.

One of their major motives is the lackluster performance of the stocks and bonds that make up the biggest share of traditional fund portfolios.

And as pension fund managers shed their characteristic wariness toward direct oil and gas investments, many oil firms are studying the special technicalities of working with pension fund capital.

One of these is the complex Employee Retirement Income Security Act (ERISA) of 1974, which regulates pension funds. And there are proposals to change the federal laws that restrict pension fund investments. Further, Congress is considering new regulations on public employee pension funds.

WHO'S INVOLVED

So far only a handful of oil and gas drillers, including ENI Exploration Co., of Seattle and Apache Corp., of Minneapolis, have entered deals involving pension funds.

Arranging the deals are a host of financial firms that include Heafitz, Widmann, McMahon & Gardner Ltd., and Chase Investors Management Corp., New York; Security Pacific Investment Management Corp. (SPIM), Los Angeles; and Bank of America, San Francisco.

The country's economic ailments, weakened oil prices, and drilling slump have dampened enthusiasm for pension fund investments in oil and gas. But oilmen, pension fund managers, and bankers say other factors are spurring a growing number of creative financing plans tailored to pension funds.

Among pension funds that already have made direct oil and gas investments are those of Atlantic Richfield Co., AT&T/Bell System, Ford Motor Co., General Electric Co., Hughes Aircraft, International Business Machines, Minnesota State Board, and National Rural Electric Co-op.

Although there are no reliable numbers on how much pension fund money is currently invested in oil and gas, specialists agree it will be an increasingly important source of oil and gas financing during the 1980s.

"It's an embryonic industry that could have enormous significance for the oil and gas industry," says Stephen M. Youts, a vice-president of Merrill Lynch White Weld Capital Markets Group, New York, who specializes in oil and gas financing.

ENI partner Barry Shulman says interest on the part of pension fund is "staggering, but it's also staggering how pension fund managers have classically stayed with stocks and bonds." He said the key to the future growth of fund investments in oil and gas is awareness and education.

Both are growing as the investment community becomes more familiar with oil and gas and the petroleum industry becomes more comfortable with pension fund investment options. Shulman said he expects funds will put 10–25% of their fund assets into nontraditional investment during the 1980s.

"Oil will be a leader, and the industry sure needs the transfusion," he adds.

WHY INTEREST SURGED

There are two main reasons why pension funds and the oil industry are studying a mutually satisfying arrangement.

As one Wall Street investment banker puts it, "The environment is right for creative financing." Oil companies need funds for costly exploration, development, and production programs. High interest rates are choking off traditional financing. As a result, there is a real push for new capital sources.

Meanwhile, pension funds are looking for inflation hedges and diversification opportunities. Their assets are expected to soar during the decade, and so will the oil industry's capital needs.

Pension fund interest in direct oil and gas investments "was not a love affair with oil and gas," says Victor Romely of Chase Investors Management. "It was sparked by a need for attractive return/risk investments that provide inflation protection because they ar tied to tangible assets. And it wasn't totally breaking new ground because royalties have for years been included in fund portfolios."

He said Chase began to feel earlier this year that there was a lot of untapped potential in oil and gas investments. So it asked some clients to earmark a portion of already committed funds being managed by Chase to oil and gas ventures.

Some clients gave Chase the green light, and as word spread other private and public pension funds and oil companies began inquiring about how they could participate in similar deals.

Chase's experience has been repeated by others in the field. But so far, few new dollars—money not previously committed—have flowed into oil and gas investments. That too is changing gradually, and at least two firms are putting the finishing touches on deals that will involve previously uncommitted dollars.

OBSTACLES AHEAD

Before pension fund dollars can flow unimpeded into direct oil and gas investments, a number of obstacles will have to be eliminated.

Much effort is going into educational presentations for pension fund managers, oil companies, and investors. Many finance specialists believe that education is the first hurdle and that misconceptions on both sides of the fence have to be cleared up.

Second, the Labor Department has long promised—but hasn't produced—proposed revisions of Erisa that deal with plan assets of private corporate and union pension funds. Some pension fund managers and companies who want to participate or structure these deals are reluctant to do so for fear they won't comply.

A Labor Department attorney says the regulations are still being worked out and may be ready by early fall.

Private and union pension funds are tax exempt and must comply with Erisa law. Under current law, these funds are barred from "active" investments such as joint venture participation or working interest ownership.

The funds can own royalties and make loans. Typically, the deals have been private placement of debt leading to earned equity interests. Money is used for everything from

acquiring royalties and leases to paying for drilling and completion.

Interest in these deals is also diluted somewhat by the fact that in most cases it is too early to tell whether the first deals will have solid returns on investment. Just as good results will encourage more deals in the future, the inability to assess the earlier deals is holding back interest.

And some fund managers are wary of direct oil and gas investments because of the recent sluggish performances of oil company stocks in their portfolios.

THE DEALS

Among the first companies to enter deals with pension funds was Apache Corp. with the help of Bank of America's Trust Department.

In 1980, four unidentified pension funds bought Apache limited recourse notes totaling $65 million, which the company used to pay obligations in seven 1979-80 drilling programs (OGJ, Oct. 13, 1980, p. 79).

This year, four pension funds will lend Apache as much as $180 million to finance the oil company's share of an oil and gas exploration and development joint venture with Shell Oil Co. in the Gulf of Mexico.

Apache will pay back the principal along with 10%/year interest, and an amount equal to 3% of the gross oil and gas revenues Apache receives from its share of the leases involved through 2031. Apache's share of the leases is securing the pension fund loans.

Heafitz, Widman is working on American Gas & Oil Investors II, which will be similar to its 1981, $145 million limited partnerships with diversified oil and gas investments. Ten pension funds participated in the deal. Money was used mainly for field development and production purchases.

Until recently, the huge amounts needed for syndication investments kept only the largest pension funds from investing directly in oil and gas. But with the advent of oil and gas commingled funds, at least three firms join Bank of America in trying to lure smaller and medium sized pension funds. SPIM and the Prudential Insurance Co. both offer such programs. Investments are limited mainly to development drilling to lessen the risk.

Prudential's Mat Chanin said the insurance company was flooded with calls from oil companies and fund managers when they introduced the program. A series of closed-end commingled funds is planned with a minimum size of $50 million/fund. Investments will primarily be in proven developed and undeveloped properties, not exploratory drilling programs.

Damson Oil Corp. also recently announced its Damson Institutional Oil & Gas Income Funds, structured for institutional investors, including pension funds. The fund allows tax-exempt institutions to invest in oil and gas through a two-tier structure that doesn't generate unrelated business taxable income.

ENI was involved in four deals last year with four pension funds that supplied about $23 million. Chase made a private placement with ENI on behalf of an unidentified pension fund in the form of a $10 million loan with an equity kicker, and ARCO made a similar $5 million placement with ENI.

The other two deals involved $5 million from the pension fund of a large insurance company and $2 million from an unidentified privately held firm. Shulman said this year's deal "dwarfs" the total amount that was pledged last year.

Pension funds overseas are also showing an interest in participating in programs that invest in oil and gas exploration in the U.S.

One incentive is that foreign pension funds may own working interests in oil and gas properties, unlike American funds.

Last year, J. Henry Schroder Wagg & Co. Ltd. of London assembled London American Energy NV, a group of British investors, mostly pension funds. They purchased 90% of a $100 million private placement to invest in U.S. oil and gas exploration/development drilling via joint ventures with Adobe Oil & Gas Corp. of Midland, privately held Colonial Energy Partners Inc., Moran Energy Inc. of Houston, and Southland Royalty Co. of Fort Worth.

About 150-200 wildcats will be drilled, plus any development wells associated with successful wildcats.

OUTLOOK

Pension funds aren't expected to earmark big chunks of their assets for oil and gas investments during the 1980s. But the consensus is that there will be steady, gradual growth of such investments during the decade.

"We'll see more continued modest beginnings," said Edward Gardner, managing director of Heafitz, Widmann. "We won't see a flood of pension fund dollars. They will come in pooled sources, begrudgingly at first. But the oil industry will win over the source of capital the old fashioned way—with results."

GAO: INDUSTRY DILIGENT ON FEDERAL LEASES

The General Accounting Office has found no fault with U.S. operators' exploration of federal leases.

GAO said, "Concerns that diligent efforts by industry are lacking and that speculators are a significant problem stem largely from a lack of data and understanding of how industry and the leasing system works.

"There is no one factor that seems to be having a major impact on development, and most only delay rather than prevent such development."

The study pointed out that industry is devoting considerable effort to non-federal acreage and some federal land in areas of significant oil production, much federal leasing takes place in wildcat areas, and most of the things the federal government could do to spur activity would reduce industry's flexibility.

The congressional agency said lease speculators don't appear to delay oil development materially, yet they provide substantial revenues to the federal government.

The study recommended that the Interior Department continue to eliminate unnecessary delays in assigning leases and processing drilling permits.

GAO surveyed drilling activity on sample federal leases issued between 1964 and 1979 in Wyoming, Utah, New Mexico, and Colorado.

Of the 783,626 leases checked only 5,984, or 8.13%, were drilled. Nearly 51% of those were drilled in less than 5 years, 35% in 5-10 years, and 14% in 10 or more years. One reason so few federal leases are drilled, GAO observed, is that individual leases are assembled in blocks on which only a few holes will be drilled.

"It is a practice of many oil and gas companies to acquire more leases than they can drill," GAO pointed out. "This affords an inventory and choices of drillsites in a rapidly changing situation. No one factor is apparently impeding exploration in a major way, other than the fact that much of the land is seen by industry as having little potential."

ROUGH PATCH.—OIL INDEPENDENTS ARE HURTING FINANCIALLY

(By Rhonda Brammer)

Despite declining interest rates, troubles in the oil patch—especailly among the smaller producers—may be far from over. "Companies were spending like drunken sailors in expectation of higher prices and increasing volume," says Oppenheimer & Co.'s Arthur L. Smith.: "Now you've had an unprecedented reversal in industry fundamentals. The interest expense from the spending spree is becoming an onerous burden."

Smith studied the liquidity of 261 oil and oil service companies and concluded some 100 appear to be in financial difficulty. (See table for a sampler.) He tiptoes around the word "bankruptcy," refusing to point the finger at specific companies. But he, and others in the industry, suggest that he collapse of Penn Square, the bankruptcy filings of oil-service outfits like Dreco and NuCorp. and widely-published difficulties of Saxon Oil and American Resources are indicative of things to come.

"I would say there are going to be a few more bankruptcies, says Kirby Exploration President George Peterkin. And Rotan Mosle's Geoffrey Hertel agrees: "Certainly, look at the number of independent operators who've overextended themselves."

In the days of skyrocketing energy prices, oil companies—abetted by willing bankers—took on enormous amounts of debt. "Everybody was carried away with reserve estimates," says one executive, "and sometimes there was inadequate investigation of those reserves."

These days, he notes bankers are taking a second look, and finding they don't have quite the collateral they thought. At the same time, falling prices and soft demand—especially for natural gas—are imperiling companies' ability to make interest payments. Top it off with the collapse of Penn Square, and you have bankers who are understandably antsy—who are putting even more pressure on corporate borrowers, urging them to pare down debt and insisting on tough requirements for new loans.

Companies in the meanest straits appear to be those that borrowed heavily to drill for deep gas. They decided to go ahead with deep wells—costing around $10 million a shot—because they could sell the gas for $8, $9, even $10 per thousand cubic feet. Currently, though, they'd be lucky to land a contract for $5 an mcf, industry sources say. And that's if they are able to come up with a buyer at all.

The demand for gas has weakened with the economy; some 40% is used in industry. And specialists like First Boston's Thomas Petrie are predicting the glut in the U.S. "is likely to worsen"—at least in the near-term, as new supplies from the Overthrust Belt come on stream, and Canada and Mexico come under increasing pressure to reduce their export prices.

So what do highly-leveraged companies do in the meantime? "You just try to stay alive," says Denton Howard, spokesman for the Oklahoma-based Amarex, a company that's made big bets on deep drilling in the Anadarko basin. "We have 40 wells," reports Howard. "They cost between $9 million and $14 million to drill, so you can imagine the capital commitment."

Indeed, Amarex has virtually doubled its long-term debt each year for the past three years. And that borrowing spree is costing it dearly. In fiscal 1983's first quarter, ended July, Amarex sank into the red. Why? Interest payments were more than three times operating income. Or looking at it another way-interest expense was 140 percent of operating cash flow. The company's long-term debt now stands at some 80 percent of capitalization.

And it's far from clear how Amarex can crawl out of its fix. The banks probably won't help. As a rule of thumb, they won't lend more than 50 percent of asset value. But according to oil analyst Kurt Wulff at Donaldson, Lufkin & Jenrette, Amarex's long-term debt is already 71 percent of its breakup value.

Other producers in Anadarko—Inexco, Dyco and Universal Resources—are showing financial strains from supporting expensive drilling programs. But the most notable woes have befallen Saxon Oil, which is huddling with creditors to avoid bankruptcy. Sources say Texas International, another deep-gas producer, is also seriously strapped.

Fed up with the worries inherent in such leveraged companies, some investors are pushing toward quality. "It used to be investors looked for exploration potential," says Mosle's Hertel. "Now the most important thing is financial position." And why not? "I'd much rather buy an exploration company that hadn't loaded up on debt, argues Robert Garrison of Houston-based Underwood, Neuhaus. "It has unique opportunity to buy reserves cheaply. And drilling's cheaper. The tubular goods, the mud, the leases—everything's cheaper."

So how does an investor zero in on quality and avoid tomorrow's bankruptcy? Smith insist his study is a good starting point. Consider pre-tax cash flow. Based on year-end numbers, General American Oil's cash flow was almost 123 times its interest expense. Compare that with troubled American Resources, a company that couldn't muster the cash flow to cover its interest costs. If cash flow isn't at least 2.5 times interest costs, it could spell trouble, says Smith.

His debt payback period tells how long it would take a company to pay off its debt if it spent every penny of cash flow for debt repayment. General American could do it in less than two months, while it would take Amarex a dozen years. For Saxon to whittle away its debt, based on 1981 cashflow, would take 14 years. As Smith sees it, anything over three years should give investors pause.

The sales-to-debt ratio shouldn't be under 1, Smith figures. If sales equal debt, that means the company must have an operating margin equal to the interest rate on the debt just to break even. Yet according to Smith's numbers, both American Resources' and Chaparral Resources' sales amount to less than 10 percent of total debt.

Some oil people contend that Smith should use 1980, instead of 1981, debt to compare with 1981 sales. That's because as one executive points out, "the debt is presumably incurred to bring on production during the [ensuing] year." Smith argues that given the environment, 1982 sales are likely to be below, not above, the 1981 levels.

One of the most interesting ratios, according to Smith, is capital spending as a percent of after-tax cash flow from operations. "Anything above 100 percent means the company needed outside financing to fund the outlays," he says, "Virtually every company made capital expenditures in 1981 that were well in excess of internal cash flow, and some spent 20 and 30 times cash flow." Smith's numbers, however, may overstate capital spending, since he hasn't always made adjustments for joint ventures.

Still, there's no denying that oil producers made heavy capital outlays last year. No denying, either, they assumed huge gobs of debt in the process. Now the debt remains and so, of course, does the burdensome cost of carrying it. Everything else in the oil patch seems to be vanishing into thin air.

ADDITIONAL COSPONSORS

S. 2123

At the request of Mr. SYMMS, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 2123, a bill to amend title 18, chapter 44, United States Code, to provide clarification of limitations on controls of the interstate movement of firearms, and to prohibit the use of Federal funds to political subdivisions which implement certain gun control ordinances.

S. 2928

At the request of Mr. HATFIELD, the name of the Senator from Montana (Mr. BAUCUS) was added as a cosponsor of S. 2928, a bill to provide for equal access to public secondary schools.

SENATE RESOLUTION 406

At the request of Mr. KENNEDY, the name of the Senator from Kansas (Mrs. KASSEBAUM) was added as a cosponsor of Senate Resolution 406, a resolution to assure Israel's security, to oppose advanced arms sales to Jordan, and to further peace in the Middle East.

SENATE RESOLUTION 516

At the request of Mr. GRASSLEY, the names of the Senator from Michigan (Mr. RIEGLE), and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of Senate Resolution 516, a resolution expressing the sense of the Senate on urging Presidential action pursuant to section 103 of the Revenue Act of 1971, 26 U.S.C., section 48(a)(7)(D) to disqualify certain Japanese manufactured, numerically controlled machine tools from the U.S. investment tax credit.

NOTICE OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President on February 3, 1983, the Senate Committee on Small Business will continue its oversight hearing on the Small Business Investment Company program. The hearing will begin at 9:30 a.m. in room 424 of the Russell Building. Senator WEICKER will chair.

On January 21, 1983, the Senate Committee on Small Business will hold an oversight hearing on the Small Business Development Center program. The hearing will commence at 9 a.m. in the Lou Strom Auditorium of the Federal Building, 275 Peachtree Street NE., in Atlanta, Ga.

ADDITIONAL STATEMENTS

SURFACE TRANSPORTATION ACT OF 1982

● Mr. BIDEN. Mr. President, we are less than a week away from Christmas. To many people this holiday season is anything but joyful. At no time in my

years in the U.S. Senate have I been more concerned over our Nation's economic well-being. My overriding concern, of course, lies with the 12 million men and women who are officially counted as being unemployed. Another 3 million people, it is estimated, are unemployed but statistically uncounted. Countless others are underemployed. All these people, along with their families, know the real meaning of an "economic downturn" to use the phrase so many policymakers prefer to use. I have never seen worse times.

November's unemployment rate of 10.8 percent is the highest since the spring of 1941. Overall production in our factories sank to a postwar low of 68.4 percent in October. Through the end of November 23,015 businesses have failed this year—an increase of 49 percent compared to last year. While many people are truly having difficulty putting food on their tables, we have record surpluses of agricultural products which have held farm prices well below their cost of production. Net farm income, adjusted for inflation, is lower today than it was in 1932, the worst year of the depression.

It is in this environment that the Congress has been considering the pending highway/gas tax legislation. Many have urged its passage because of the 320,000 jobs the Department of Transportation has estimated it will create. Others argue for its enactment because it begins to address the problem of our deteriorating highways and bridges. Both are compelling reasons to support the bill.

But, Mr. President, I cannot support this legislation for other more compelling reasons. My objections, simply stated, are that the bill imposes unfair tax increases during the severest recession in our history without any information of its impact upon the economy available. Let me explore my concerns in greater depth.

This legislation raises the Federal tax on gasoline and diesel fuels from 4 to 9 cents a gallon. It is estimated that this hike will take $6.7 billion out of the pockets of motorists during the next year and a half. The tax applies evenly to all. It does not matter whether a person earns $60,000 a year or $10,000, or is unemployed. The same nickel a gallon tax increase will occur.

Now there are those who argue that a nickel more a gallon is insignificant—that it is fair. But to those with lower incomes and to those who live in rural areas who are more dependent on their automobiles, this tax increase is anything but fair. That is why I supported an amendment which would have provided an increase in the earned income tax credit to offset these higher gasoline taxes. The earned income tax credit applies only to the working poor—those who earn $10,000 a year or less. The amendment would only have applied to individuals earning less than $10,000 annually and who have children. Unfortunately, the amendment failed by a vote of 42 to 50.

I supported another amendment that sought to make the financing of these needed highway repairs more equitable. It would have also provided another 411,000 jobs while not increasing our bulging Federal deficit. It would have accomplished this by delaying the third year of the 1981 individual tax cuts for those making more than $65,000 and by partially delaying it for those making between $50,000 and $65,000. Capping the third year of the tax cut would have raised $23.8 billion over the next 3 years. Instead of raising the gasoline tax for all, rich and poor alike, it would have placed a greater share of the burden on those who can most afford to bear it.

This amendment, offered by several Democrats including myself, also would have provided 5 additional weeks of Federal unemployment benefits to many of Delaware's 22,000 unemployed people.

This amendment also proposed a one-time supplement of $2 billion for this year's community development block grant program. These funds would have been used to match up the existing pool of those able to work and who are actively seeking work with an existing backlog of useful community projects which city and county governments already have planned for which they lack available funding.

To insure that these funds would have benefited the unemployed, the amendment stipulated that 80 percent of those hired had to have been unemployed for 15 of the previous 26 weeks and so certified by the local U.S. Employment Service office.

The amendment also provided funds to retrain up to 60,000 skilled workers who have been permanently laid off. Another 20,000 part-time jobs would have been provided low-income persons over the age of 55 through an existing program which successfully employs 50,000 senior citizens who need supplemental income in order to pay their rising bills.

While the amendment included funding for a variety of other programs, I want to mention only one other here. I have already mentioned the serious situation facing our Nation's farmers. The Democratic alternative provided $750 million to implement the agricultural export revolving fund which was authorized by last year's farm bill but which is still unfunded. While the decline in net farm income is not solely attributed to weakened exports, exports do play a major role in strengthening farm income. Overall, one-fourth of farm income is attributed to exports. But the value of farm exports have slipped recently. Much of this decline can be blamed by the dollar's overvaluation.

Our farm products have become to costly to finance overseas. To export, we must have credit available on a continuing basis. Thus the need for the self-supporting revolving fund to allow the Commodity Credit Corporation to finance short-term commercial export sales of agricultural commodities including poultry. These loans will be repaid with interest and then reloaned. Why, some might ask, should we include funding for this program in a jobs package. The answer has been provided by the Department of Agriculture which estimates 35,000 jobs are created for each $1 billion in exports.

In my opinion, the Democratic alternative was not only fair but would have provided significantly more jobs than the administration's package. Unfortunately, this amendment lost 44 to 53.

Another problem created by the pending bill which concerns me is the excessive increases in fees and taxes which the Nation's truckers will have to pay. Currently, the owner of a 80,000-pound truck pays $240 annually. As reported by the Finance Committee, this fee will rise to $1,600 annually. The Finance Committee estimated that the trucking industry will have to pay an additional $885 million in total taxes during the next 18 months. This is over and above the $5.6 billion which they are already projected to be paying under existing tax rates. In 1982, the trucking industry made only $120 million in net profits on $44 billion in sales—a profit of less than one-half of 1 percent. While it may be true as the Department of Transportation contends that heavy trucks do not pay their fair share under existing taxation levels, such an increase in a time of deep recession is questionable economic policy at best. Truckers—especially small independents—are struggling as much as everyone else. While larger firms undoubtedly will be able to weather the increases, many independents may not. Given their existing profit margins, these higher taxes will have to be passed through to the consumer. Once again, the public will have to bear the costs of this bill. More importantly, what impact will these higher taxes have on the economy. No one has had the time during the 3 weeks this bill has been under consideration to estimate this bill's impact.

While I supported the Boschwitz amendment which was adopted and which lowers the annual heavy use fee to $1,200 as well as stretching its phasein period to 3 years, I am still concerned that now is not the time for a 500-percent tax increase.

In conclusion, Mr. President, while I support rebuilding our Nation's high-

ways, bridges, and mass transit systems I cannot support financing this program using the regressive tax increase contained in this bill given our current economic distress. Not only does it not make good economic sense, it simply is not fair. While the Surface Transportation Act of 1982 contains provisions which I do support, I must oppose its passage tonight. We simply do not know the impact it will have on the economy and I am not willing to gamble it will work. The price is simply too high.●

REMARKS OF SENATOR HATCH AT FOOD AND DRUG LAW INSTITUTE ANNUAL MEETING

● Mrs. HAWKINS. Mr. President, recently Senator ORRIN HATCH, the distinguished chairman of the Senate Labor and Human Resources Committee, spoke to the Food and Drug Law Institute's annual meeting in Washington, D.C., on the subject of food and drug legislation, specifically on possible areas for change in our Nation's food and drug laws.

I think my colleagues would benefit by reviewing his analyses of possible legislative initiatives in this area and I ask unanimous consent that the text of Senator HATCH's speech be printed in the CONGRESSIONAL RECORD in full.

The speech follows:

REMARKS PREPARED BY SENATOR ORRIN HATCH OF UTAH

I am honored to be with you this morning. As chairman of the Senate Labor and Human Resources Committee, I have substantial responsibilities for the oversight of the Food and Drug Administration and the laws under which it operates.

As most of you know, I am a strong supporter of Commissioner Hayes. I have confidence in the job he and the agency are doing. However, they are often unnecessarily constrained by antiquated and unrealistic provisions of law. So I particularly welcome this opportunity to discuss with you possible areas for change in our nation's food and drug laws.

Certainly, the area of food and drug law that received the most attention during the 97th Congress, and that I predict will continue to be the focus of attention during the 98th, is food safety reform. Today, let's take this opportunity to examine together what we have accomplished during the last two years and what I hope we will accomplish in the upcoming two years.

In July of 1981, I introduced S. 1442, the Food and Safety Amendments of 1982. As I said when I introduced S. 1442, it was not intended to serve as an end product, but rather as merely the beginning of revising the food safety laws. And in that respect, S. 1442 has been a tremendous success. It was responsible for stimulating the development of nearly half a dozen other proposals. It also stimulated a spirited debate—a debate absolutely essential to ensuring that we ultimately arrive at the best possible new law.

In rereading S. 1442 during this past week, I am convinced that some of its provisions continue to represent sound public policy and effectively correct deficiencies in the prevailing law. But, I can also understand why certain individuals consider S. 1442 to be overly ambitious and too complex.

Nonetheless, the criteria that guided me in drafting that bill still represent to me the basic principles that we should follow in drafting a final bill for passage during the next Congress. Let me reiterate them today:

First, we should not attempt to wholly restructure the existing statutes nor substantially overrule existing judicial case law on food safety. Rather, we need to retain the basic integrity of the current law, which has ensured American consumers that their food supply is the safest, most wholesome and abundant in the world.

Second, the law should continue to provide incentives for the development of safe additives.

Third, all relevant scientific data and information should be analyzed in making determinations about food safety, especially in distinguishing significant from insignificant risks. Otherwise, we may not be focusing our resources on protecting against those risks most significant to human health.

Fourth, we must make available the best outside scientific judgment to assist the agency in assessing risks.

Fifth, the law should allow flexibility of regulatory response. We must be able to respond rationally in those special cases where a risk, though real, is, or may be, broadly acceptable to the general public because of the importance of the substance.

These principles represent the thinking and anlaysis of many diverse scientific and legal experts, including the National Academy of Sciences, the Congressional Office of Technology Assessment, the Food Safety Council, and former FDA commissioners and general counsels. Upon such a firm foundation the law can be changed without altering the safety of our food supply.

After I became convinced that these basic principles for changing the law were attainable, and I had succeeded in rekindling the debate, I set out on what I considered an enormously difficult, yet critically important, task—to develop a bipartisan consensus on the best way to correct the deficiencies in the prevailing law. I am able to report to you now that such a consensus is not only possible, but I believe it may even be very clsoe to being reached.

Mind you, I am not talking about satisfying those on either extreme of the policy spectrum. Those who advocate a hardline position on either side of the debate may serve an honorable purpose, but they are limited in their ability to affect policy. Let me emphasize that this Senator is not going to carry the banner of any group which fails to acknowledge that the key to developing a new, effective law lies with careful analysis and a willingness to compromise rather than with decade-old rhetoric.

I believe that most members of this and the next Congress will willingly work together toward a bipartisan resolution of this important issue. There is a lot of common ground already in place.

Soon after I introduced S. 1442, Representative Gore intorduced his own bill to improve the food safety laws of our nation. I was even a little flattered when certain consumer groups dubbed it a "re-Hatched" version of my original bill. And I must say that, on the whole, the Gore bill is a bill I could have lived with.

Meanwhile, my staff sat down with Senator Kennedy's staff and Secretary Schweiker's staff to reach the widest possible consensus. They reached agreement on a new Senate staff draft that is not all that dissimilar from the Gore bill.

Recently, the administration provided us with some timely support. The Food Safety Working Group also came forward with a staff draft. The group's chairman, Bill McMilan from USDA, has said that their draft, "now adheres to many of the principles in the latest Senate staff working draft."

Now, don't get me wrong, our work is far from over. Even after being intensely involved in this debate for more than two years, I believe that there is still much for all of us to learn. Only after further discussion and analysis will I become convinced which of the proposals currently on the table, or combination of them, or even any new proposal yet to be developed, deservess my support.

I believe the time is now right for us to proceed to formal Senate hearings and I hope to hold such hearings early in the new Congress. And let me even suggest that those of you who wish to testify should write to my committee office. I've held off until now because I strongly believe that the hearing process is most useful when it is established upon a solid foundation. With a half-dozen workable proposals currently available for discussion, each one representing considerable thought on the part of the individuals who drafted them, a thorough hearing process can be used to highlight the strengths and weaknesses of each proposal.

Thorough hearings, if they are to be productive, need to be carefully focused. So let me suggest today what I believe is the most important question that we need to ask over and over at the upcoming hearings. You will hear me repeatedly ask: Does the proposal under consideration improve or impede the ability of the FDA and the Department of Agriculture to do a good job, both for the present and the future, in ensuring that the American food supply is the safest in the world.

This question is the heart of the debate. We could get side-tracked by the more abstract questions, such as "How safe is safe?" But I don't think these questions are likely to be as productive, for the answers end up being more philosophical than practical.

We, the members of Congress, must establish a framework to improve the process by which the FDA and the Department of Agriculture reach their decisions. There are zealots who charge that any change in our food laws will inevitably result in a less safe food supply. I say: Hogwash! There is not a person in the food safety area who wouldn't admit that the decision-making process can be improved. It's a clear signal that the law needs reexamination when both consumer groups and industry lawyers spend half of their time in court trying to change agency decisions.

And it's an even clearer signal that that law needs to be reexamined when decisions are thrown back into the lap of Congress. For the third time in six years, the saccharin moratorium will expire in August of next year. As Ted Kennedy said in 1979, "The Congress should not be asked to intervene in the regulatory process on a product-by-product basis, as is currently the case. if current regulatory statutes do not permit issues to be resolved fairly, then those statutes should be reexamined. It does no good to have a law which Congress overrules each time its provisions are involved." I agree. And I am committed to work as diligently as I can during the 98th Congress for passage of a new law which endures a regulatory process that makes sense and that guarantees the safety of our food supply.

Let me now turn to another area of food and drug law that also has received and will continue to receive the attention of Congress. This is the area of sodium labeling. I think there's a strong consensus in Congress for backing Commissioner Hayes on a voluntary program. Hypertension is a major disease posing serious problems and we know that salt is a prime contributor. It is important for the Congress to ask industry to listen to Hayes, because if they don't, both the House and Senate are going to need to take action. While I am strongly, vehemently opposed to over-regulation, I think that in a few years we're going to have turn around and look at the salt problem and ask: How much cooperation are we getting from industry?

I don't think any of us know all the answers on how the salt problem should be addressed. For the moment, we should support the commissioner. We should support the voluntary program. And if it works, I see no need for legislation.

I would like to turn briefly and discuss what I see as some of the important issues facing the pharmaceutical industry in the Congress in the next year.

I believe that the strength of our nation and our ability as a people to solve problems are based on our scientific and technological preeminence. However, our role as a leader in innovation and technological development can no longer be taken for granted. A possible weakening of the status of innovation in the United States has been a concern of President Reagan since the beginning of his administration. The policies of the federal government and the Congress must address this important national concern. The government must maintain an environment conducive to efforts by the research and industrial communities to make better use of the knowledge, technologies and problem-solving techniques already available and, through innovation, to find new ways to provide for our national needs.

We are already making great strides in this area. Perhaps the most important step we have taken that affects the pharmaceutical industry needs a sufficient incentive to conduct research and development. This incentive has in the past been reduced by regulatory delay at the Food and Drug Administration and, over the years, investment for innovation has been adversely affected. Because of this regulatory delay, industry has found other uses for its research dollars, uses which may not be as productive for society. In my view, the Patent Term Restoration Act would restore the proper balance. I am disappointed that the bill will probably not pass the Congress this year, but I am committed to its passage next year.

In a similar vein, we must encourage longer periods of exclusive licensing for drugs which received some government funding in the research stage. Currently, even though the patents to these drugs are privately held, the government controls the length of the license. In the past, HHS has been reluctant to extend exclusive licenses beyond a minimal period. As is the case with the Patent Term Restoration Act, this reduced exclusivity period has in some cases resulted in reduced research and development.

The Universities and Small Business Patent Act, which recently passed the Congress, will allow small businesses to obtain exclusive licenses to market drugs developed with government funds for the full term of the patent. This is an important incentive in encouraging those businesses to develop the full potential of the orginal discovery. I see no reason why that incentive should not be extended to larger companies as well. It is my view that the industry should not be penalized, nor the public deprived of significant new therapies simply because a product initially had some government funding, especially when we are talking about curing important diseases. Senator Schmitt had legislation on this subject before the Congress this year, and I would hope that similar legislation could be enacted in the next Congress.

I sincerely believe that the orphan drug bill which passed the Senate this year will also encourage innovation of a most important kind. This bill will provide industry with financial incentives to develop treatment for diseases that are so rare that the market itself does not provide enough incentive to develop a cure. I believe that the bill which passed the Senate this year is the best possible bill that we can get, and that next year will not produce any better legislation. Therefore, I am working very hard to reach a compromise agreement with Congressman Waxman and Senators Dole and Long, in order to enact this bill before the end of the post-election session. I think that the possibilities for doing so look quite good.

I also would like to take this opportunity to focus attention on the question of drug export policy. The administration is currently considering this issue as part of an overall U.S. review of export policy. In the context of that review, serious questions must be considered concerning the export of pharmaceuticals from this more country. Our current policy is to prohibit the export of any drug which is not approved for use in the U.S. It seems to me, particularly at a time when we are worried about creating jobs and encouraging industrial growth, that it does not make any sense to have an arbitrary rule, applicable in all cases, that prevents a significant sector of our economy from exporting its products. As the people in this room are well aware, there are drugs available which serve important purposes in other countries and are greatly desired by those countries for which there is no reason to obtain U.S. approval or for which U.S. approval is in the process of being obtained. The industry is now forced to manufacture those products abroad.

We are the only nation with a requirement like this. The relocation of manufacturing operations overseas caused by this policy results in a significant loss to the U.S., in capital investment, business and jobs. Further, by reducing the potential for increased exports, this policy aggravates the U.S. balance of trade problem. Of course, we should not have indiscriminate dumping of dangerous or banned drugs on foreign markets; but with proper controls, there is no reason to deny consumers in foreign countries the benefits of products that could be manufactured here but for the operation of this arbitrary rule. Surely if another country has requested a particular drug, it is needlessly paternalistic for the United States government to deny it that drug.

As you know, one of my basic principles is that government and industry should not be adversaries, but rather should work together to solve society's problem. I think that we have made great strides in the last two years towards accomplishing this goal, while at the same time reducing needless government regulatory burdens. Under the leadership of Commissioner Hayes, the Food and Drug Administration has acted responsibly in working with industry to solve a number of critical problems. In 1981, FDA approved 27 new chemical entities, the highest number since 1962 and double the number of approvals for 1980. The recently published New Drug Application (NDA) rewrite should speed up approvals further and reduce paperwork even more. Dr. Hayes has improved the dialogue between the agency and drug sponsors. He has withdrawn cumbersome regulations, such as the patient package insert regulation, and has worked for a much more effective and less costly alternative, the National Council on Patient Information Education, which is model of government/industry cooperation. FDA has reduced the bureaucratic overlap between its different bureaus and streamlined its administrative process to assure quicker action on drug and device approvals and increased accountability. Further, Commissioner Hayes has eliminated the antibiotic certification program, which is a prime example of a regulatory program that has long outlived its usefulness and costs the consumer money without providing any protection.

Perhaps the leading example of industry/government cooperation occurred this fall in the unfortunate product tampering episode. In a time of crisis, the industry and the agency developed a program which is now being put in place to assure that similar episodes do not occur in the future. We on Capitol Hill are carefully monitoring developments in this area and sincerely hope that the actions taken by the agency and the industry will put this problem behind us.

In a similar spirit of cooperation, the FDA has begun to approve switching prescription drugs to OTC status. I believe there are a number of drugs currently on the market which we have sufficient experience to know they are safe and effective for use without a doctor's care. Removal of prescription status is bound to save the consumer substantial amounts of money and I encourage a carefully measured continuation of this trend.

Finally, I would like to say a word about an issue that has achieved a great deal of prominence and notoriety in the last several years, and that is the question of testing of drugs and cosmetics on animals. I am very well aware that there are those that take the understandable position that animal testing is cruel and inhumane and should be stopped. Surely, we must be sensitive to those concerns. On the other hand, however, the developments of important new treatment therapies simply cannot occur without animal testing, for the alternative is testing in humans, and that is unthinkable. We must seek a proper balance that provides for humane treatment of test animals but permits such testing to go forward where no other reasonable option exists.

These are exciting times for the pharmaceutical industry. We are cutting needless regulation, we are encouraging innovation and the industry is on the verge of several important new breakthroughs. I hope to take an active role in encouraging the continuation of these trends and would like to work with you to foster innovation and strengthen drug development. My door is always open to you and I hope that you will feel free to call on me as we progress further in the vital area of food and drug legislation.●

RIGHTS OF ANIMALS

● Mr. GRASSLEY. Mr. President, many of my colleagues are aware of the growing movement underway in this country that marches under the banner of "animal rights." The primary forces behind these efforts are animal welfare groups and humane organizations which have been traditionally concerned about the humane care and treatment of wild and domestic animals. The emerging focus is the rights of animals, particularly those raised on farms for food production.

As a life-long farmer, born and raised in a rural environment, exposed to all types of animal husbandry practices throughout my hometown area, as well as throughout the State of Iowa, I have a difficult time relating to the concerns of the animal rights activists. I have seen firsthand the excellent care that my neighbors provide their poultry and livestock. There are two basic reasons for the time and effort farmers expend to make certain that their farm animals are given the best treatment: First, it is imperative that farm animals receive the optimal care in order to assure maximum efficiency and productivity, and second, farmers, invariably, care deeply for the welfare of their animals. Consequently, it is surprising to me to see this criticism directed at a key segment of our agriculture sector that has done such an excellent job of feeding this country as well as a good part of the world.

I have spent considerable time talking with representatives of the animal rights movement, and although I do not agree with them, the ones that I spoke to seemed to hold sincere beliefs that our animal husbandry practices were troublesome and that changes should be made. These people also disassociated themselves from the radicals who would like to eliminate animal husbandry altogether in order to end the use of animals for food.

Frankly, I have no reason to question this sincerity. Moreover, with the proper discussion and education, I think many of these people will come to understand and accept the farmer's point of view. I fear, however, that the fringe interests may be able to take control of this movement and commandeer drastic, counterproductive alterations through legislative action. As innocently as these initial efforts may appear, they may snowball into a major disaster for agriculture. The situation in England represents a prime example.

During the early 1960's, a book detailing the alleged abuses in animal husbandry practices raised such a public outcry in Britain, that the Government was forced to institute a committee of inquiry. The committee was asked to advise whether standards ought to be set in the interests of the welfare of livestock. The product of this committee, called the Brambell report, recommended the following:

First. The enactment of a new law incorporating a fuller definition of animal suffering than existed in prior law;

Second. The formation of a standing committee to advise the Government on animal welfare; and

Third. The establishment of standards in formal regulations for the housing and management of livestock.

The first step in the implementation of the Brambell report was the appointment of a Farm Animal Welfare Advisory Committee. This committee's responsibility was to draft codes of practice concerning the main species of farm animals.

Later, additional recommendations from the Brambell report were incorporated in the Agriculture (Miscellaneous Provisions) Act, 1968, ch. 34, section 1(1) of the act states:

> Any person who causes unnecessary pain or unnecessary distress to any livestock for the time being situated on agricultural land and under his control or permits any such livestock to suffer any such pain or distress of which he knows or may reasonably be expected to know shall be guilty of an offense under this section.

Section 2 authorizes the issuance of regulations concerning the following matters:

> (a) The dimensions layout of accommodation, the construction materials to be used and the facilities to be provided for lighting, heating, cooling, ventilation, and drainage, etc.;
>
> (b) The provision of balanced diets, and
>
> (c) The prohibition of bleeding, mutilating, marking, restraining, or interference with the exercise of any faculty of the livestock.

The following regulations have been made under section 2:

> (1) The Welfare of Livestock (Docking of Pigs) Regulations, which prohibit the docking of pigs more than seven days old except on health grounds or to prevent injury from tail biting.
>
> (2) The Welfare of Livestock (Cattle and Poultry) Regulations, which prevent tail-docking of cattle, and the castration, dewinging, and blinkering of poultry.
>
> (3) The Welfare of Livestock (Intensive Units) Regulations, which require that livestock and automatic equipment be thoroughly inspected at least once a day.

If these regulations seems troubling, the penalties will shock you. Offenses under section 1, or noncompliance with the regulations under section 2 are liable on summary conviction to imprisonment for up to 3 months or a fine up to 500 pounds (over $800 in U.S. currency) or both.

The act also gives statutory backing for the codes of practice which were already being prepared by the Farm Animal Welfare Advisory Committee. The codes are required to be approved by both Houses of Parliament but are not binding in law. A failure to observe the codes does not make a person liable for prosecution under the act. However, where a person is charged with causing unnecessary pain or distress to livestock, the fact that he failed to comply with the recommendations in a code may be used in order to establish guilt.

Soon after enactment in 1968, four codes dealing with cattle, swine, domestic fowls, and turkey were approved by Parliament. After 1 year, the State Veterinary Service reexamined the effectiveness of the codes. On-site inspections found that in most instances, the animal husbandry practices were sound. Notwithstanding the finding of sufficiency, several modifications were offered and amended versions of the codes were issued in August, 1971.

Each code sets out the basic requirements of a husbandry system deemed appropriate to the health and behavioral needs of the particular animal. Also detailed is the housing space allowances, ventilation, temperature control, and the feeding and general management of the animal.

The development of the animal welfare laws and regulations was recently reviewed in Parliament by the House of Commons Agriculture Committee. In its report, the Agriculture Committee noted that the subject has not ceased to arouse public concern "and that the question of animal welfare engenders not only disquiet but in some quarters considerable emotion." The revisions place more emphasis on the behavioral needs of the animals. In its report, the Agricultural Committee recommended the following additional changes:

> Veal Calves—The code should strongly discourage the housing of calves in crates. Pens must allow enough freedom of movement for calves to groom themselves and turn around, and provide comfortable leg room when laying down; young calves should never have to lie on unbedded floors. (the code already precludes the feeding of iron-deficient diets.)
>
> Pigs—The code should recommend that steps be taken to relieve frustration and boredom where sows are tethered or kept in stalls; animals housed indoors should have access to a bedded area; animals should never be kept in total darkness.
>
> Poultry—beak trimming should be forbidden by regulation.

Upon review of the status of the British laws and new proposals, an English expert commented that—"It is probably true to say that, on paper at least, our domestic animal legislation is as good as any in the world. What we need now is not so much further legislation but better enforcement of that which we already have."

Recently, I found an article in the November 20, 1982, edition of the Times from London. This article covered Parliament's debate of one of the Agriculture Committee's recommendations dealing with veal calves.

The article follows:

[From the London Times, Nov. 20, 1982]

REVISED WELFARE CODES FOR PIGS AND CATTLE

The use of crates for calf rearing, which has already declined to the point when about 90 percent was now raised by other systems, would be effectively excluded by new animal welfare code provisions, Mrs. Peggy Fenner, Parliamentary Secretary, Ministry of Agriculture, Fisheries and Food said in the Commons when she replied to a debate on the report of the Select Committee on animal Welfare in Poultry, Pig and Veal Calf Production.

Mrs. Fenner also announced an increase in the total to be spent on research into animal welfare and said that discussions were going on about taking further account of welfare of animals in the training courses for stockmen. Further revised welfare codes for pigs and cattle were to be issued.

The farm Animal Welfare Council was examining voluntary codes to see if any provisions needed the force of compulsory regulation.

Opening the debate, Sir William Elliott, chairman of the select committee (Newcastle upon Tyne, North, C) said that any changes to be made in factory farming would have to be on a Community basis. It would be unfair to put producers in the United Kingdom at a disadvantage to competitors abroad.

He hoped changes would be introduced, though they would have to be gradual for economic reasons. There was much public concern that the welfare of animals was being sacrificed in the name of financial saving.

On veal production, he said the committee had been unanimous in their dislike of the crate method. It was possible to produce veal economically by the more humane loose house system. Small groups of pigs in more spacious surrounding was a more humane method than the single stall system.

The committee looked forward to the time when the EEC accepted the phasing out of battery hen cages. It would not be possible, to replace the system with the open range system but the battery method ought to be curtailed and the committee was pressing for a Community decision with the introduction of getaway cages as an alternative production method.

Mr. Thomas Torney (Bradford, South, Lab) said. It was balderdash for the Government to talk about consumer resistance to castration of pigs. He doubted if consumers would know the difference between the meat of a pig which had been castrated and that of one which had not.

Sir Paul Hawkins (South West Norfolk, C) said he had been on the agriculture committee of the Council of Europe which had studied a report on transport of horses from eastern Europe to slaughter houses in Belgium, France and Italy.

He had never seen such a horrifying report. His blood had run cold at the horrors inflicted. He wanted British action in the Council of Agricultural Ministers to have the matter raised.

Miss Joan Maynard (Sheffield, Brightside, Lab) said the Labour Party was pledged to extend the scope, membership and responsibilities of the Farm Animal Welfare Council and to transform it into a standing commission on animal protection with a better balance of interests.

Labour was committed to phasing out extreme systems such as battery cages. More money should be spent on finding alternative systems. The aim must be to have basically sound systems of livestock production and a high standard of stockmanship.

Miss Janet Fookes (Plymouth, Drake, C) said an extra statutory tax concession was given by the Inland Revenue so that intensive systems of farming benefitted in a way they otherwise would not. This was particularly so in relations to capital allowances and capital transfer tax. As an opponent of many forms of intensive systems as at present worked, she found this regrettable and she would like to see the concession taken away.

The Government should accept the minimum recommended 17 years ago by the Brambell Committee. "An animal should at least have sufficient freedom of movement to be able without difficulty to turn round, groom itself, get up, lie down and stretch its limbs" (cheers).

Britain should give a strong lead to Europe and the more other countries could be better for animal welfare generally.

It should not be permitted for veal calves to be exported to be rasied in systems found abhorrent in Britain and Britain should not import food produced in that way.

I find the caging of between three to five hens in a very small cage wholly objectionable (she said). I do not care how good the system of light and air. Nothing reconciles me to a system of unnatural confinement.

There should be a time limit on the legality of battery cages, or the system would drag on for too long, but she was prepared to accept a little longer than the five years suggested by the select committee if that would mean the end of an objectionable and cruel system.

Mr. Geraint Howells (Cardigan, L) said he hoped the Government would not dismiss anything on grounds of cost. It should take account of the growing awareness in Britain on all aspects of animal welfare and remember that a substantial section of public opinion was being mobilized against unreasonable treatment of animals raised for food.

Sir Frederick Burden (Gillingham, C) said whatever the EEC might say Britain should stop exporting veal calves to Holland where they were reared in unacceptable conditions.

Mr. Stanley Newers (Harlow, Lab) said to argue that battery hens did not suffer from cold, rain or predators was like arguing that inmates of Belsen had not suffered from obesity and were protected from the possibility of being killed in road accidents.

The battery system should be phased out within five years.

Sir Peter Mills (West Devon, C) said that he totally rejected some of the criticism of the farming community. It was a disgrace and it needed to be said loud and clear that 99 percent of farmers not only cared for but loved their stock and were concerned. MPs should have a little more interest in the care of children. He did not have figures but believed that there was more unkindness towards children than towards animals.

There was much double talk by the Opposition. They wanted cheap food but wanted to change the methods which brought cheap and reasonable prices for food.

Mr. Mark Hughes, an Opposition spokesman on agriculture, fisheries and food (Durham, Lab) for the Opposition, said the overwhelming will of the House corresponded with that of the committee that the sooner they got rid of the system of keeping hens in batteries to produce eggs, the better. But the Government should put money into research and the dissemination of the results into alternative methods. Otherwise, egg producers would not be able to supply the needs at a reasonable price.

Mrs. Peggy Fenner, in her reply, said that when the Government came to power in 1979 it had a manifesto commitment to update the Brambell report and the welfare codes on recommendations for farm animals. It was well on the way to fulfilling this obligation.

The Government set up the Farm Animal Welfare Council which had been a valuable source of independent advice to ministers. The Government had made and laid this week two of the statutory instruments which implemented part of the councils report on certain mutilations of farm animals.

It was hoped to lay soon two further instruments which would complete the implementation of the report on mutilations. The Government also hoped to lay soon draft revisions of the welfare codes for pigs and cattle which would incorporate many of the agriculture committee's own recommendations.

The Government endorsed the committee's view that judgments about animal welfare should be based on as much scientific, knowledge as possible, on full consideration of all the available evidence and on the need for the Government to take into account the economic consequences both for producers and consumers before imposing on producers new welfare requirements.

When Mr. Newens asked if she did not think that a term should be put to the continuance of the battery system, Mrs. Fenner replied: It is the Government's view that there should be research into alternative systems, and research over the whole of Europe. In the research being carried out in Europe she said, the European Commission had called for a report at the end of 1983.

It would be unwise to suggest that there should be compensation for producers if systems changed, the answer was likely to be "No".

The Government agreed with many comments on veal production. The use of crates for calf rearing had rapidly declined in favour of loose house systems and it was estimated that about 90 percent was raised now by systems other than crates. The new code would say that the width of the pen for a single penned animal should not be less than the height of the animal at the withers. That effectively ruled out crates.

The proposed revision of the codes also reflected the view of the importance of good stockmanship. Officials had opened discussion with the organizations responsible for training courses in stockmanship to consider whether, and if so, how training could take further account of the needs of welfare.

In spite of the problems about overall research resources, the Government was increasing the money spent on animal welfare research within the total.

The Farm Animal Welfare Council was looking at points in the codes to see whether they would recommend them for regulations.

We regard their advice (she said) as good advice. I hope that will be an assurance to MPs who believe that codes are not wholly satisfactory. The minimum value of horses for export was examined and updated when necessary, an arrangement which effectively prevented export of horses for slaughter.

The debate concluded.

Mr. President, I do not know about my colleagues, but I find all this very

sobering. I have to ask, "How in the world did the people of England let themselves go so far in implementing such unwarranted sanctions on their farm community? How could they let misinformation spread so widely that uncontrolled emotion dominated the deliberations of an apparent knowledgeable, rational body as Parliament is perceived?

The question that haunts me most, however, is whether this November 19 debate in Parliament might be repeated one day soon in the halls of the U.S. Congress? It is too easy for me to summarily dismiss this potential, for I simply cannot believe that the American people could fail for this. On the other hand, I have to face the realities of recent events, and the impact the animal rights activists have already had.

During the 1970's, books began to appear in the United States detailing alleged abuses associated with animal husbandry. Publications such as "Animal Liberation," "Animal Factories," and "Factory Farming" generated increased interest among our citizens in the issue of animal rights. This was followed by a "20/20" ABC-TV program on the alleged mistreatment of farm animals. This program was shown first in 1980 and again in 1981. This sensational presentation of farm practices generated outrage among viewers who in turn mounted a letter campaign on Congress. In response, Congressman RON MOTTL of Ohio introduced House Joint Resolution 305, the Animal Husbandry Act, which would establish a Farm Animal Husbandry Committee.

Does this chain of events sound familiar? Well, it is. It is exactly how England got where it is today; we are only about 10 to 20 years behind.

But the United States does not have to fall into this same trap. Frankly, at this point, I doubt that many of my colleagues will stand for this, I know that I will not. The American public will not buy it either. But it will require vigilance on our part to make certain that people receive accurate information and are educated with the true facts that underscore the exceptional care that our farmers provide their animals. They must understand that modern husbandry practices are far superior in providing better nutrition, more affective control of diseases and parasites, and superior protection against the elements and predators. These new management practices far surpass old methods in areas of growth, feed efficiency, mortality and disease—criteria accepted by scientists and producers alike.

The problem is that animal rights activists know this, so they are now turning to a far more subjective measure—animal stress. Scientists have a difficult enough time determining what creates stress in humans, let alone animals. And since animals cannot talk to us we cannot ask them whether it stresses them more to be hunted down by wolves, frozen in the winter, or starved for lack of food, than it does to have plenty of food, live in a warm, clean environment, but be restricted in appropriate social interaction and companionship.

Various facets of this whole debate reminds me of an old Byzantine proverb which states:

He who has bread may have many troubles;

He who lacks it has only one.

Since animal rights activists would like to attribute human characteristics, values, and rights to animals, then this proverb should logically apply to animals as well. If our farmers provide the basic needs of food and shelter, should we be overly concerned if the animal has the resulting luxuries of additional troubles?

I am afraid that a lot of these activists are so removed from the realities not only of farm husbandry, but also of the vast human suffering and starvation that exists in the world today, that they have found themselves wrapped up in a misguided adventure in some alien, fantasy world. If they knew better the struggles for bread, perhaps they would be more selective in their efforts to remedy the innumerable troubles of today.

Our Nation and the world faces too many pressing troubles to divert our energies, time, and money to figure out whether a well-fed farm animal is suffering from undue stress. Assuredly, if Congress ever finds itself in a meaningless debate similar to that which recently occurred in Parliament, if I am unable to dissuade my colleagues from such a frivolous endeavor, I should move back to my farm so I can take care of my animals—where I know that I will be appreciated.●

SUBSTANCE ABUSE PREVENTION

● Mr. JEPSEN. Mr. President, recently I received a letter from an Iowa constituent that I wish to bring to the attention of readers of the RECORD.

Charles Cacek, executive director of the Northeast Council on Substance Abuse, has suggested a positive, nongovernmental method to help prevent substance abuse. It focuses on a way of bringing the family unit closer together.

I ask that the letter from Mr. Cacek be printed in the RECORD.

The letter follows:

NORTHEAST COUNCIL ON SUBSTANCE ABUSE,
Waterloo, Iowa, November 22, 1982.

Hon. Senator ROGER JEPSEN,
213 East Main, Waterloo, Iowa

DEAR SENATOR JEPSEN: I am writing you about a substance abuse prevention effort which combines some unusual benefits with still more unusual by-product development of importance of Iowa.

This program is an effort to prevent substance abuse through preserving family health by revitalizing interaction among family members. Much of the focus of this increase in time spent face to face involves family breakfast.

Extensive research tells us the ritual of family breakfast is sound prevention. The nutritional benefits are great, the therapeutic benefits greater.

We at Northeast Council on Substance Abuse believe we can use the catalyst of concern about substance abuse problems to motivate thousand of families to restore this family practice to its proper place. We believe the soundest kind of prevention will result and we believe we can measure this effectiveness.

A main reason I am writing to you about this plan is that this effort can be a tremendous impact on milk consumption. Expanded nationwide this emphasis on family breakfast could be a real force in stemming ever increasing milk surpluses. When people skip breakfast or fastfood breakfast, they typically omit milk, the opposite is true of family breakfast in the home.

We have written some of the national dairy organizations and our proposals have not merited replies. We write you with the hope that your office may help us find ears that will hear us as we know you have great interest not only in coping with substance abuse but also in the problem of dairy surpluses.

We will appreciate any help you can give us.

Sincerely,

CHARLES CACEK,
Executive Director.●

PAYMENT IN KIND

● Mr. HELMS. Mr. President, the Congress has been talking about a "payment in kind" (PIK) program for quite awhile, but the time for talking is past. American farmers need such a program, and they need to know about it now. I urge the Secretary of Agriculture to use his existing authority to implement a PIK program for 1983 crops, and to announce it without delay.

Clearly, there is strong support in Congress for a PIK program. The House of Representatives has passed legislation relating to PIK by unanimous consent. In the Senate, Senators COCHRAN and HUDDLESTON introduced S. 3074 as bipartisan legislation dealing with the PIK program.

The Senate Agriculture Committee conducted hearings and markup at the subcommittee and full committee level, and approved S. 3074, as amended, without objection. In fact, when it was proposed on December 19 to bring S. 3074 before the full Senate for consideration, only one Senator was heard to object.

The obvious reason for such strong support for PIK is the widespread distress in the farm economy. American agriculture has been severely burdened by low prices caused by overproduction and weak demand.

The PIK program will provide farmers assistance while utilizing and reducing our market-depressing surpluses. These surpluses will be used as incentives to restrain additional overproduction. PIK will reduce farm program costs and set the stage for higher prices and profits in the marketplace.

These are profits which the American farmer and the U.S. economy sorely need.

I commend Secretary Brock for proposing the idea of payment in kind, and I encourage the Secretary to implement such a program. At the hearing on farm program alternatives conducted by Senator COCHRAN's subcommittee, Secretary Block testified that the program could largely, if not totally, be carried out under existing authorities. There were two areas, however, where the Secretary stated that a clarification would be helpful. Specifically, the impact on a PIK program of the payment limitation and Commodity Credit Corporation resale provisions in sections 110 and 407 of the Agricultural Act of 1949 and section 1101 of the Agriculture and Food Act of 1981 is unclear.

Mr. President, as Chairman of the Senate Agriculture Committee, I hope that I can clarify those matters. I believe that the payment limitation and CCC resale provisions in current law were never intended by Congress to apply to a program which provides in-kind compensation.

At our hearing on December 9, the Honorable PAUL FINDLEY of Illinois, a senior member of the House Agriculture Committee, testified that commodities used as incentives for land diversion:

> Are not sales for the purposes of sections 110 and 407, and they certainly should not be construed as payments for purposes of section 1101. I can claim some parentage of sectioin 1101, which is a limitation on payments to individual farmers. It was never my thought that this limitation would apply to any payment-in-kind program.

The Congressman is entirely correct. Congress never intended that these restrictions apply to an in-kind program. Accordingly, I believe the Secretary should proceed to implement the program for the 1983 crops as soon as possible. I pledge that as soon as the new Congress convenes, we will look at this matter and provide any clarification or additional authority that may be necessary.

At the same time, however, I hope that the Secretary will implement the program in a way that is consistent with S. 3074, the PIK bill that was reported from committee. The Secretary has assured me that the program will be implemented carefully with certain important protections.

For example, the rights of farmers who rent land, as well as own land, should be protected. In no case should more than 50 percent of the acreage base in a county be removed from production, so as to protect farm suppliers and other businesses in a local community.

Commodities should be provided to farmers in a way that is consistent with normal harvest patterns. USDA may wish to pay some storage costs for commodities, so that local markets will not be disrupted.

In addition, the program should take into account such States as North Carolina which produce large volumes of corn, but use it for poultry and pork production. Secretary Block has assured me that a PIK program will be equitable to all sectors of the agricultural community, and I intend for the Agriculture Committee to monitor the program carefully.

In fact, if further legislative action is needed on the PIK program in 1983, I intend that the committee move forward on such action expeditiously.

Mr. President, I should also note that S. 3074 provides a number of authorities for expanding agricultural markets. I strongly support these provisions. Here again, however, there are already several authorities available to the Secretary of Agriculture. I urge the Secretary to use his current authority aggressively to expand farm exports.

In doing so, he must assure that we do not place domestic manufacturers at a disadvantage relative to foreign users. This is essential for a commodity such as cotton, so that American textile workers are protected from a two-price system where foreign textile mills receive U.S. cotton for a cheaper price than domestic mills. It is imperative that we protect the jobs of American textile workers from two-price cotton.

President Reagan has personally expressed his support for the PIK program, as have many farm leaders and organizations. We have received endorsements of the PIK concept from the American Farm Bureau Federation, the American Agricultural Movement, the National Cotton Council of America, the American Seed Trade Association, the United Egg Producers, and the National Grange.

Mr. President, I have been impressed with the great enthusiasm among Senators for this program. The distinguished Senator from Iowa (Mr. JEPSEN), for example, has been constantly in contact with me, urging enactment of this program.

It is time to get going, Mr. President, and I urge the Secretary of Agriculture to implement the PIK program as soon as possible covering 1983.●

THE WRONG ROAD IN NICARAGUA

● Mr. KENNEDY. Mr. President, I am deeply saddened by the course of events in Nicaragua which has caused first one, then another of their respected Ambassadors to this country to resign.

Ambassador Francisco Fiallos' resignation comes after increasing unwillingness by the Sandinista Junta to recognize that their interest lies in promoting democracy, freedom, pluralism and the active participation of the church and the private sector in the life of that country.

Nicaragua cannot afford, and its friends cannot ignore, the restrictions of freedom, and violations of human rights, such as the forced removal of Miskito Indians from their traditional communities, the frequent suspension and censorship of the respected newspaper La Prensa and the political clashes with the church.

The Nicaraguan Government's appropriate course of action is to maintain its domestic focus on reversing the injustices of 50 years of Somoza rule. For example, its education and health program have won deserving acclaim. But those benefits are increasingly overwhelmed by the frustration and anger of leaders such as Ambassador Fiallos, who oppose the recent restrictions on press freedoms and the rejection of dissent.

At the same time, the Reagan administration must understand that its own policies of confrontation, isolation, and destabilization of Nicaragua are fundamentally wrong. The United States must not repeat the mistakes committed in Chile in the seventies. Instead of handing the ideologues among the Nicaraguan leadership and excuse for further restrictions and greater dictatorship, the United States should encourage moderate elements to pursue a process of negotiation of the serious differences and problems which exist. Other nations, such as Mexico, Venezuela, Columbia, can be willing partners in this effort to negotiate a peaceful settlement.

Both Ambassador Fiallos and former Ambassador Arturo Cruz were defenders of the Sandinista revolution and critics of the Reagan administration's policies; they refused to support the "Somocistas" who were engaged in military attacks on Nicaraguan villages. But now they have found it necessary to protest their Government's course by resigning from their positions of service to the increasingly isolated core of Government leaders. The Nicaraguan people owe a lasting debt to these brave men, and I request that an article by Karen De Young be printed in the RECORD.

The article follows:

[From the Washington Post, Dec. 21, 1982]

ENVOY CALLS NICARAGUA A "TYRANNY"

(By Karen DeYoung)

Nicaragua's ambassador to the United States said yesterday that he has resigned from his government, and from the Sandinista National Liberation Front that runs it,

because "radical" Sandinistas are turning the leftist government into a "tyranny" that no longer listens to its own people.

Francisco Fiallos, 36, said he made his decision after failing at numerous attempts to persuade the Sandinistas that they are "losing public support" because of their increasing authoritarianism under "state of emergency" regulations imposed in March.

"There is growing discontent" in the country, he said. "Production is bad, and there is no feeling among the people that they are living under a system of law and judicial protections. Decisions are made by ever fewer people, with ever less consultation." At first, he said, "they listened to me. But then they lost interest in listening. Now, the hear, but they do not listen."

Fiallos is one of a growing number of high-level Nicaragua officials, and the second ambassador to Washington in little more than a year, to resign because of political differences with the Sandinista government. His predecessor at the Nicaraguan Embassy here, banker Arturo Cruz, has since joined a group of Nicaraguan exiles opposing the Sandinistas on grounds that Sandinista Marxists and their Cuban and East Bloc allies have perverted the democratic goals of the Nicarguan revolution.

Fiallos, a Harvard-trained attorney who joined the Sandinista Front in 1977 as an underground supporter in its struggle to overthrow dictator Anastasio Somoza, said in an interview yesterday, "For the moment, what I want to do is rest and think." But he acknowledged that he has been in touch with Cruz and others of his group, led by former Sandinista guerrilla hero Eden Pastora, and sees joining them as "an option."

The Nicaraguan government, in a brief announcement Saturday, said that Fiallos was being reassigned along with a number of diplomats. But Fiallos said that he had informed Foreign Minister Miguel D'Escoto of his decision to resign on Dec. 12, two days after the government prohibited publication of remarks calling for political pluralism and free elections he had made to La Prensa, the country's only wide-circulation opposition newspaper.

Fiallos' resignation is likely to weaken further the Sandinistas' credibility among a diminishing group of supporters in the West who see them as increasingly authoritarian and unwilling to allow political freedoms.

Much of what remains of their support among Socialist governments in western Europe and among some Latin American countries, according to officials of those governments, is more a reflection of those countries' opposition to Reagan administration hostility to Nicaragua than active support for the Sandinista Front. The Europeans, who support some aspects of Sandinista policy, argue that there is no possibility of tempering the Nicaragua government's militarism as long as it is threatened by armed opposition groups supported by outside powers.

Like Cruz, Fiallos coupled his criticism of the Sandinistas with a denunciation of Reagan administration economic and political pressure against them, as well as covert support for exile groups led by defeated Somoza soldiers trying to overthrow them militarily.

"I stand by everything I ever said about U.S. policy," Fiallos said. The Sandinista "radicals," he said, "have Ronald Reagan and this administration on their side" because Reagan support for the hated Somocistas strengthens the radicals' hand.

"This is the most important point," he said. "The Reagan policy has to change, and let Nicaragua alone to solve its own problems. It is a Nicaraguan problem, a Sandinista problem." The Sandinista government repeatedly has charged that its increasing militarization and centralized control is a response to what they see as a security threat from the Reagan administration.

As have other Sandinista dissidents and defectors, Fiallos also said he was disturbed by the strong presence of Cuban and other East Bloc advisers in Nicaragua. These include what other informed Nicaraguan sources have said are as many as two dozen Bulgarians.

The Bulgarians, according to these sources, work as advisers in the planning and economy ministries. Presumably sent by the Soviet Union, their task is believed to be as much to watch the Cubans, whose independent intentions in Latin America the Soviets sometimes mistrust, as the Nicaraguans.

But Fiallos also said that while direct Cuban contribution in high-level government decisions was often talked about, especially in the United States, he had not seen it. He gave some credence to reports that Cuban President Fidel Castro at times has sought to be a moderating influence among the Sandinistas.

In describing the current internal political balance within the Sandinista Front and its nine-man directorate, Fiallos said he believed there is a division between what he called the "radicals" and the "pragmatists."

He declined to comment "at this time" on which Sandinista leaders he would put in each category. Other Nicaraguan dissidents have listed Planning Minister Henry Ruiz and legislative leader Bayardo Arce, as well as Interior Minister Tomas Borge, as "radicals," and have named Agriculture Minister Jaime Wheelock as the chief "pragmatist" among the nine.

But, according to Fiallos, "they all have the same line" while seeing different ways of achieving the same goal. "Some of them are more pragmatic, but none has the power to act alone. They are prisoners of themselves."

When confronted in private meetings with their apparent loss of domestic and international support, he said, "They make excuses. Some of them deceive themselves, others have a scenario in mind but refuse to see that reality is different than what they believe.

"No revolutionary process is perfect," he added. But beginning with the postponement of promised elections until at least 1985, and "problems with the emergency law" that prohibits activity by non-Sandinista political parties—decreed after a series of exile raids—"things got worse."

Fiallos arrived in Washington last February after serving as deputy foreign minister following the July 1979 Sandinista victory and later as Nicaraguan ambassador to Canada. In June, he returned to Nicaragua for a visit, he said, and was shocked by increasing press censorship and an incident in which a Managua priest was beaten by "revolutionary" youths and his church closed.

There were always more doubts about elections, and the political system was ever more closed. There were confrontations everywhere and like little boys, [the Sandinista leadership] kept falling into traps set for them by the Reagan administration.

Last month, Fiallos said, he visited his home town of Matagalpa, in north central Nicaragua, and found the peasants afraid and anxious over "the increasing arbitrariness" of local government representatives. He decided to answer a request from La Prensa for a written interview, which he sent from Washington. "I decided that if they wouldn't let them print it, I would resign."

Fiallos said he had planned to return to Nicaragua last Saturday, but was advised by friends of "some dangers" including what he said was the arrest for "counterrevolutionary activities" of a deputy justice minister who resigned several weeks ago.

"What is important for Nicaragua," Fiallos said, "is that everyone leave us alone. The Cubans, the Soviets, the Bulgarians, the Americans. Everyone should get out and leave us alone."●

SEC CHAIRMAN JOHN SHAD

● Mr. GARN. Mr. President, I would like to cite an exceptional public official who is doing an outstanding job.

The Banking Committee, which I chair, has oversight authority over the Secruities and Exchange Commission. When I presided at the Senate confirmation hearings of John Shad last year, I said the President had made an excellent choice to head the SEC. We all expected a great deal from an individual who brought a wealth of experience to the SEC. Less than 2 years later, Mr. Shad's energetic leadership of the SEC has confirmed our expectations.

John Shad's background has provided unique insights for his role as Chairman of the SEC. Born in Brigham City, Utah, he has been guided by strong moral principles and an appetite for hard work. His long time aspiration has been to devote his life to "learning, earning, and serving."

During his first 2 years of college, he attended classes during the day, and worked as a riveter in an aircraft plant from midnight until 8, 7 days a week. After service in the Pacific and China as a naval officer in World War II, he graduated with honors from the University of Southern California in 1947, earned a master's degree from the Harvard Business School in 1949 and went to work in New York City as a securities analyst. In 1955, when he concluded that he needed a more intimate knowledge of the legal and tax aspects of corporate financings and mergers, he decided to attend New York University Law School at night. His job required considerable travel, so Shad and his wife, Pat, enrolled together. Shad studied Pat's notes for the classes he missed. They both did well and graduated in 1959.

At E. F. Hutton & Co., Shad helped build the firm into one of the Nation's major managing underwriters of corporate financings. He resigned last year from his position as vice chairman of the E. F. Hutton Group and from directorships of several New York Stock Exchange listed companies

to accept his present position and commence the serving phase of his life.

His years as a highly successful securities analyst, account executive, investment banker, and corporate director have afforded him an intimate understanding of the securities world. He has personally assisted scores of companies in consummating billions of dollars of financings, mergers, and acquisitions. Shad's nuts and bolts knowledge is complemented by his broad professional experince, which has included teaching investment banking at the NYU Graduate School of Business Administration, frequently addressing business and professional groups, writing articles for business and law reviews, and serving on the boards of 17 domestic and multinational, publicly owned corporations in a wide variety of industries.

Under Shad's leadership, the SEC has focused its efforts on protecting and promoting the interests of the investing public by effectively and vigorously enforcing the securities laws and simplifying and improving regulations that impose unnecessary costs ultimately borne by the investing public. His efforts have helped to enhance investor confidence in the fairness and integrity of our markets and facilitate capital formation.

EFFECTIVE ENFORCEMENT

By far the largest portion of the Commission's resources, about a third, is being devoted to enforcement programs. Approximately 45 percent of the enforcement effort is devoted to corporate fraud and disclosure cases; a third to market manipulation cases; and the balance to insider trading and other cases.

While only requiring a small portion of the Commission's resources, the insider trading cases have received great visibility because of the record number of successful cases. In addition, the Commission recently concluded an historic accord with the Swiss that permits the Commission, for the first time, to penetrate the Swiss secrecy laws. The SEC has also proposed legislation to increase criminal fines for securities law violations and impose civil fines in insider trading cases.

REGULATORY SIMPLICATION

Under Chairman Shad, the SEC has initiated measures to reduce the annual costs of securities regulation by many millions of dollars; has freed-up hundreds of millions of securities industry capital from regulatory restrictions; and has conferred other major benefits on the investing public. These benefits include:

REGULATORY SIMPLIFICATION AND IMPROVEMENT

In February 1982, the Commission integrated the registration and reporting requirements of the Securities Act of 1933 and the Securities Exchange Act of 1934. The integrated disclosure system streamlines corporations' paperwork and affords them greater flexibility in structuring and timing financings, without compromising the full disclosure of material information to the public. The integration program, which Chairman Shad brought to fruition, is one of the most important developments in securities regulation since the securities laws were enacted, nearly half a century ago.

The Commission has also simplified and improved the prospectuses for exchange-listed options, and commenced a review of proxy statements in order to improve their clarity and effectiveness.

MORE EFFICIENT USE OF SECURITIES INDUSTRY CAPITAL

In January 1982 the Commission freed-up an estimated $500 million of excess securities industry reserves for more productive uses, and, by authorizing the use of letters of credit for clearing fund and stock loan purposes, saved the industry an additional $200 million.

SMALL BUSINESS CAPITAL FORMATION

The Commission in September 1982 conducted the first annual Business-Government Forum on Small Business Capital Formation, and earlier this year:

Exempted from registration securities offering up to $5 million, to other than the general public. Most States are expected to adopt similar exemptions, which will be the first joint State and Federal registration exemptions.

Extended short form registration privileges on offerings up to $5 million to mining, oil and gas firms, and noncorporate issuers.

INCREASED RELIANCE ON SELF-REGULATION

Major strides have also been made in private-sector self regulation under the Commission's oversight. In the last fiscal year, the accounting profession conducted over 200 peer reviews—up from 80 last year. The profession is now on a 3-year review cycle. It is far beyond the Commission's capacity to conduct such reviews, which are monitored by the SEC's Office of the Chief Accountant. The stock exchanges are also upgrading their electronic surveillance and audit trails of securities transactions, under the Commission's oversight.

The results of these and other Commission efforts are better and, more timely regulation, reduced Commission expenses and greater investor protections.

LEGISLATIVE INITIATIVES

Within months after taking office, John Shad and Phil Johnson, the Chairman of the Commodities Futures Trading Commission, worked out an accord, which resolved a 7 year turf battle between the SEC and the CFTC, which had prevented both agencies from approving new financial instruments for which there is great public demand. Certain of these instruments will facilitate Government and mortgage financings and permit investors to hedge the risks of fluctuating interest rates and securities prices. Both Commissions have unanimously approved the accord, and it has now been enacted. As a result, trading in several new products subject to SEC jurisdication has already begun.

Shad's fellow Commissioners have also unanimously supported his proposal to form a 1-year bipartisan task force to help simplify and rationalize the regulatory structures of the securities, banking, movings and loan, and insurance industries and enhance public protection.

OUTSIDE INPUT

Through various conferences and forum, the Commission is obtaining greater input from outside sources in order to better serve investors and the capital formation process. The Small Business Forum is one example. At the SEC's Major Issues Conference—the first in 5 years, distinguished members of business and Government addressed the problems that confront financial institutions and markets. And in November, leading securities analysts met with the Commissioners and senior staff to discuss the Commission's disclosure and rulemaking requirements and procedures from the perspective of users of the information required by the disclosure system.

In short, under Chairman Shad, with the support of the other distinguished Commissioners and an outstanding staff, the SEC has initiated major regulatory improvements and legislation, and has adopted innovative approaches to protecting and serving the investing public. These achievements are a tribute to the Commission, and to John Shad's energy, experience and leadership.●

SPOKANE COMMUNITY MENTAL HEALTH CENTER CONFERRED HIGH HONOR

(By request of Mr. ROBERT C. BYRD, the following statement was ordered to be printed in the RECORD:)

● Mr. JACKSON. Mr. President, many of my colleagues may have read the recent front-page article in the Washington Post entitled "Depression Often Masquerades as Dementia" which detailed the interplay of physical and mental disorders in the elderly, a situation compounded by the frequent physical isolation of the elderly from family, friends, and community, and the similarly unfortunate fact that only recently have physicians begun to recognize the role severe depression can play in the illnesses of older Americans.

In my home State of Washington, the Spokane Community Mental

Health Center has been involved actively in helping to locate, assess, and provide treatment for at-risk, multiply impaired elderly in Spokane County. Indeed, the fruits of their labors have been realized not only in improved medical, social and mental health services for many elderly in the community, but recognized nationally.

In October 1982, the Spokane Community Mental Health Center, its executive director, Mary Higgins, and elderly services coordinator, Ray Raschko, were conferred a Certificate of Significant Achievement from the American Psychiatric Association, the Nation's oldest medical specialty society, and one which represents over 27,000 psychiatrists nationwide.

The award was conferred by the Association at the recommendation of the Hospital and Community Psychiatry Achievement Awards Board, a panel of leading psychiatrists in the Nation including: Pete Palasota, M.D., of Texas; Harold Eist, M.D., of Washington, D.C.; Hugh Hendrie, M.D., of Indiana; and APA deputy medical director, Henry H. Work, M.D.

The rigorous competition to choose exemplars of outstanding programs for the mentally ill and retarded included not only a detailed application, but interviews and a lengthy site-visit by, a local APA member, in this case J. Pierre Loebel, M.D., of the Harborview Medical Center in Seattle.

Our Spokane CMHC was selected from among 177 applicants for this high honor, and their work can serve as a model of outreach, referral, and community-based health care for the emotionally troubled elderly throughout the Nation.

The program was recognized specifically for its outreach system that helped insure that isolated, multiply impaired elderly in the county receive necessary medical and social support services. Working closely with businesses and public officials who have contact with such persons, the center identifies persons in need of care, evaluates those needs, and assures that adequate medical, social, and mental health services are delivered to them.

In addition, the program has increased the number of elderly persons who receive care from the center. Moreover, the program appears to have led to a significant decrease in the number of nursing home admissions—ending the prior severe shortage of beds in the county—and involuntary hospital commitments, down 25 percent since 1979, among the elderly in the county.

The Spokane CMHC entered into a unique agreement with the Eastern Washington Area Agency on Aging—a relationship which has since been strongly encouraged under title IV of the Older Americans Act. The two organizations agreed that those elderly living in the community who were at risk for premature or unnecessary institutionalization would be the target group for a network of interdependent mental health and other aging services designed to maintain them in their own homes and improve their quality of life. The area agency on aging needed a core agency around which this network or system of community-based services could be built.

Since 1978, this core agency has been developed by the Spokane CMHC with funding and technical assistance from the Eastern Washington Area Agency on Aging. The network includes telephone information and referral, and multidisciplinary, inhome case management. Over 14 organizations in the Spokane area have entered into written agreements with the CMHC and EWAAA to provide further resources, ranging from a newspaper for senior citizens through day treatment and health screening.

Mr. President, I commend the Spokane Community Mental Health Center, not only for its selection by the APA as an award-winning program, but as a model of what can be done for the at-risk emotionally ill elderly of this Nation. I also commend the article in the Post to my colleagues attention and ask that it be printed in the RECORD.

The article follows:

[From the Washington Post, Nov. 29, 1982]

DEPRESSION OFTEN MASQUERADES AS DEMENTIA

By the time Dr. Valery Portnoi first met the patient, the 81-year-old man knew his name, but not his age. The man did not know he was in a hospital, Portnoi recalled later. He knew he was married, but could not give his wife's name. He was strapped to the bed and incontinent.

The man had run a real estate business before his condition deteriorated, and his disorder had been diagnosed as Alzheimer's disease, an incurable deterioration of the brain that is also known as presenile dementia. If the diagnosis was right, not much could be done for him.

But Portnoi, a director of geriatric medicine at George Washington University Medical Center, disagreed with the diagnosis. He concluded after interviewing the patient, his wife and a friend, also a physician, that the man was not suffering from Alzhemier's at all but depression—a treatable, curable illness. Within a matter of months after treatment began, the patient was able to resume living a normal, active life.

Although unusually dramatic, this case is not exceptional. Increasingly, physicians treating older persons are finding that what appear to be organic mental deterioration or physical problems that defy treatment turn out on closer examination to result from depression.

In some instances, the depression may result from a significant event in the person's life. In other cases, however, the depression may result from drugs the patient is taking or from biological changes that occur in the brain.

Portnoi and other doctors say that most physicians have only recently begun to recognize the role severe depression can play in the illnesses of older patients. The particular phenomenon of depression masquerading as dementia has not been widely studied, but a 1979 British study found that 31 percent of ailments diagnosed as dementia in that country were misdiagnosed.

Portnoi wrote a year ago in a medical journal that "there is reliable evidence to support the idea that "there is reliable evidence to support the idea that dementia is even more overdiagnosed in the United States," where 2.5 million to 3 million persons 65 or older are currently thought to be suffering from some form of that disease, than in Britain.

According to another estimate in an American Journal of Psychiatry article this year, between 8 and 15 percent of cases diagnosed as dementia turn out to be depression that can be completely reversed.

Portnoi said he became aware of depression as a problem of the elderly when he encountered numerous aged patients who complained of ailments even though he and other physicians could find no apparent physical cause for these symptoms.

He estimates that 30 to 40 percent of the 500 elderly patients he has seen in the last three years were suffering from depression. However, he notes that his patients are not typical because many are referred to him after other doctors have failed to discover a cause for their problems.

Depression is a common psychological malady. Everyone suffers from at least mild depression at one point or another. In most instances, it is self-correcting: the depressed person "snaps out of it" without professional help. In some cases, when the depression is extended or severe, medical and psychological intervention may be necessary.

Left untreated, depression can be severe and permanent. Misdiagnosed, the symptoms can become worse.

The symptoms of serious depression, as they appear among elderly persons, include long-lasting difficulty sleeping, loss of appetite, loss of energy, sluggishness, slowed thinking and loss of interest in usually pleasurable events. In addition, depressed persons may show signs of inappropriate guilt and have recurrent thoughts of suicide. Complaints about physical problems for which a physician can find no clear cause-described as "phantom symptoms" by Portnoi—are not uncommon.

Dr. Neal Cutler, a psychiatrist and chief of the section of brain aging and dementia at the National Institute on Aging, recalled being asked to see a woman in her 60s who had been described as "dying" by her physician. The woman was emaciated, suffering, among other things, from anorexia. Cutler diagnosed the woman's problem as depression and prescribed antidepressant medication.

Within a week to 10 days, he said, the woman's condition began improving, her weight picked up and she became responsive to her surroundings. After years of living in a nursing home, she was able to return to her family several months later.

Depression is overlooked as a problem among the elderly, Cutler said, because the symptoms can be explained away. "The notion is that as you get older, you get slower."

Until recently, the conventional wisdom viewed depression as a hallmark of old age. Dr. Frederick K. Goodwin, a psychiatrist and scientific director of the National Institutes of Mental Health, takes the opposite view. Depression, Goodwin said, is an aberration in the elderly.

"There's no reason to assume that being old brings depression. That isn't so," he said. "We shouldn't write them off by saying that of course you're depressed when you're old. That's an insult to old people. Not only is it an insult, it isn't true."

In fact Goodwin and his brother, James, who is chief of gerontology at the University of New Mexico School of Medicine, point out that depression in the elderly often turns out to result from drugs taken to deal with physical problems.

Part of the difficulty is that older persons do not necessarily react to drugs in the same way as younger adults. "For many years pediatricians have been taught in medical schools that children are not small adults," James Goodwin said. "The point that geriatricians are trying to make is that old people are not old adults, and they react as differently to drugs compared to young adults as children do."

It may take four times as long for a drug to metabolize in a 70-year-old as in a 20-year-old, according to James Goodwin. If the physician prescribing drugs fails to take these slower metabolism rates for older persons into account, the result can be sluggishness, lethargy, disorientation and depression, he said.

Certain drugs prescribed for arthritis, a common enough problem among the elderly, are known to produce symptoms of dementia, James Goodwin said. "This was something that wasn't picked up for some time." Drugs that can cause depression include reserpine, methyl-dopa and others prescribed for high blood pressure.

Misdiagnosis may lead the physician to prescribe the wrong drugs, aggravating the problem. If, for example, a depressed patient is having trouble sleeping—a symptom of depression—a physician may improperly prescribe a tranquilizer to aid sleep. Tranquilizers may allow the patient to sleep, but may deepen the depression.

Elderly persons with a variety of problems may also be treated by a number of physicians, each of whom could be prescribing medication without any one of them looking to see how the drugs may interact with one another. In some instances, little or nothing is known about drug interaction.

"Often what's needed," according to Frederick Goodwin, "is for someone to stop and say, 'Wait a minute. Let's take a complete look here.' "

Both Frederick Goodwin and Portnoi agreed that in most cases of elderly depression some combination of drug and psychotherapy will probably benefit the patient. Portnoi said that in many cases latent psychological problems that an elderly person has been able to keep under control may appear when a physical infirmity develops. In such cases, Portnoi and Goodwin agreed, drug therapy may be needed to break the downward spiral, but then psychotherapy is indicated to help the patient confront the underlying problem.

Older persons often find it difficult, however, to find psychiatrists willing to take them on as patients. Older psychiatrists, Goodwin said, who are not familiar with new drug developments may not feel comfortable treating older patients, especially since these older patients may have other medical problems.

A "more subtle psychological bias," Goodwin said, is that older persons are seen as becoming more rigid in their behavior and less amenable to change. "I think there's some truth in it. If you state as your goal fundamental changes in a person's personality, then it is more difficult to change older people." But if coping is the goal, "old people respond as well to a focused program as young people do."

According to Dr. Frederick K. Goodwin, scientific director of the National Institutes of Mental Health, the following is a list of dos and don'ts for older persons to keep in mind to avoid depression:

Prevent isolation, which "becomes a self-fulfilling prophecy." Make vigorous attempts to stay active and socially involved. Have active as well as passive sources of stimulation.

Excercise regularly. Many old people give up on exercise because they think they're too old for it. "That's a major mistake," Goodwin said. One reason why orchestra conductors live long, he said, is because they are getting stimulation and lots of physical exercise.

Pay careful attention to medical conditions that can produce depressions, such as hypothyrodism, postmenopausal low estrogen function in women, changes in metabolic functioning. Neurological changes—especially Parkinson's disease—may mask depression.

Routine is important for the elderly—eating meals at the same time daily, going to bed more or less at the same time—generally having a pattern to one's daily life.

Don't avoid controversy and arguments. A certain amount of stress is good. Coddling an older person, "surrounding him or her with a cotton candy kind of existence is not only demeaning" but increases the chance of depression.

Think twice about early retirement. As a society, Goodwin said, "We need more flexibility about this. There's too much all-or-nothing. A person is either 100 percent active, or he's nothing."●

CABLE TELEVISION COPYRIGHT ACT AMENDMENTS

● Mr. MATHIAS. Mr. President, I should like to comment on H.R. 5949, which was the subject of a great deal of controversy in the Senate. That bill died because the Senate was unable to conclude its hearings and come to any final judgment. There is, however, one section that deserves particular mention at this time. It is section 101a, which amends the 1976 copyright law so as to exempt resale carriers from copyright liability. This section would have altered the present law and would have preempted the final decision of the courts in the case of EMI against Doubleday. Of course, with the death of the bill, the 1976 copyright law with its contrary provisions remains in force.

Any proposal to exempt resale carriers from liability raises serious questions of copyright policy—issues which the substantive Senate committees simply were unable to address in this Congress. Section 101a is seemingly inconsistent with the principle of the copyright law, which provides generally that each separate use of a copyrighted product—including a sports owner's televised transmissions of its games—requires compensation to the copyright owner. The 1976 act included a very narrow exception to this liability for a traditional "passive" common carrier, such as AT&T, which merely acts as a conduit between the sender and receiver of a signal. The amendment would change the present law to exempt a whole new group of resale carriers. One of the major justifications for this amendment is the claim that it is essential to preserve the compulsory license for cable systems set forth in section 111 of the act. However, both the administration and the Copyright Office disagree.

The Register of Copyrights pointed out in testimony in 1979 that even if local cable systems might not be able to negotiate individually with program rights holders, satellite resale carriers are in position to act as a "central agent in obtaining retransmission rights and to relay programing." The National Telecommunications and Information Administration of the Department of Commerce also concurs. A report issued by that agency last year concluded that "satellite carriers could broker rights" and that "a flexible and efficient private bargaining agreement among industry segments is a workable alternative to the present government-administered cable copyright system.

This amendment would be a major change in the present copyright law and represents a sharp departure from prior policy. Certainly, the categorical views contained in the House committee report, that there was "no doubt" under the 1976 act that resale carriers had no liability, are supported neither by the express language nor the legislative history of that act. As a sponsor of the 1976 copyright revision effort, I can attest to that view.

Certainly, any statute dealing with such a fluid and dynamic field as cable television requires review from time to time, and it is possible that the Congress could be convinced that there is some public benefit in eliminating copyright liability for resale carriers which are not now exempted by the 1976 act. However, this is such a significant reversal both of policy and of the law's explicit provisions that any change should be made thoughtfully and only after the most persuasive hearing.●

LEGAL SERVICES CORPORATION RESOLUTION OF THE MINNESOTA STATE BAR ASSOCIATION BOARD OF GOVERNORS

● Mr. DURENBERGER. Mr. President, several weeks ago the board of governors of the Minnesota State Bar Association placed its views on the Legal Service Corporation on the record. The resolution approved by the board reaffirms the commitment of the Minnesota Bar to a viable and responsible corporation. It also reemphasizes the need for final congres-

sional action on pending LSC Board nominations.

Since the resolution is intended both as a statement of position and as counsel to those of us in Congress who are about to deal with these issues, I ask that the resolutions be printed in the RECORD.

The resolutions follow:

RESOLUTION

Whereas, by resolution dated March 28, 1981, the Board of Governors of the Minnesota State Bar Association recommended that:

1. The Congress of the United States pass legislation reauthorizing the Legal Services Corporation without restriction on the free exercise of independent professional judgment of legal services lawyers in their representation of low-income persons, and without restriction on the ability of legal services lawyers to pursue on behalf of their clients the same full range of legal remedies that an attorney in private practice would be able to seek on behalf of more affluent clients;

2. The Congress oppose any change to the current form of organization of legal services, or to the current method of funding legal services programs, which would subject programs to control by persons or governmental entities whose interests might be or become in conflict with independent, effective representation of clients by legal services attorneys; and

Whereas, the Congress has found, at P.L. 93-355 Section 1001(5), that "to preserve its strength, the legal services program must be kept free from the influence or use by it of political pressures"; and

Whereas, fair and open hearings, based on evidence and previously established criteria, are an essential tool to reduce the danger of politically motivated, arbitrary decisions to defund programs; and

Whereas, sudden or frequent substitutions of the designated organizations serving a geographical area hinder the development of necessary staff expertise, private bar involvement, and the administration of a program; cause uncertainty in the client community; and create additional costs; and

Whereas, the power of the Senate to consent to Legal Services Corporation Board nominations exists so that Congress may examine and pass judgment on the qualifications and experience of each person who will exercise authority under the Act; and

Whereas, the Senate has not taken action to confirm the nominees to the Legal Services Corporation Board of Directors and these nominations will lapse with the close of the 97th Congress: Now, therefore, be it

Resolved, That the Board of Governors of the Minnesota State Bar Association hereby reaffirms its support for these principles, and in order to preserve the professional independence mandated by these principles, recommends further that:

1. No statute or regulation affecting the operations of the Legal Services Corporation or local legal services programs or attorneys be passed by the Congress, or implemented by the Legal Services Corporation, unless it conforms with the above stated principles insuring the independence of legal services programs and their attorneys;

2. Statute and regulations governing the Legal Services Corporation should continue to provide that refunding of currently funded local programs will not be denied except in case of substantial non-compliance with the provisions of the Legal Services Corporation Act or regulations, or the failure to provide economical and effective legal services; and shall not be denied without adequate notice, an opportunity to correct and an opportunity to be heard in an evidentiary hearing with an independent hearing officer;

3. The longstanding principle (and regulation) guaranteeing local operation and control of legal services programs by private and other attorneys not employed by legal services programs and eligible clients continue to be applied, and that no statute or regulation which would impose any particular system or method of delivery of services on local programs be passed or promulgated by or for the Legal Services Corporation;

4. Until a permanent Board of Directors meeting the requirements of the Legal Services Corporation Act has been confirmed by the United States Senate, no further action should be taken to implement any new rules and regulations or otherwise change policy for the Legal Services Corporation or local legal services programs;

5. During the remainder of the 97th Congress, the United States Senate act on the pending matter of the confirmation of nominees to the Legal Services Corporation Board of Directors; and that the Senate vote on each of the current nominees individually, to determine whether each is qualified to be a director in conformity with the principles stated above and the requirements set forth in the Legal Services Corporation Act;

6. This resolution be forwarded to the Senators and Repersentatives from Minnesota;

7. Consistent with the above stated principles the Legal Assistance to the Disadvantaged Committee of the Minnesota State Bar Association should prepare and forward to the Legal Services Corporation specific comments on any proposed regulations.

RESOLUTION OF THE BOARD OF GOVERNORS, MINNESOTA STATE BAR ASSOCIATION

Whereas, equal justice under law is a fundamental concept of a free society, and accessibility to legal representation for all people is essential to effectuate that principle; and

Whereas, there is a continuing need for low-income residents of Minnesota to receive legal advice and representation in civil matters for which they cannot afford private counsel; and

Whereas, the National Legal Services Corporation pursuant to P.L. 93-355 as amended by P.L. 95-222 provides funding to legal service programs in Minnesota in order that they may provide such services to low-income Minnesotans; and

Whereas, the Congress has found, at Public Law 93-355 Section 1001 (5), that "to preserve its strength, the legal services program must be kept free from the influence or use by it of political pressures"; and

Whereas, the American Bar Association and the Minnesota State Bar Association support the funding of the National Legal Services Corporation and oppose restrictions of the free exercise of independent professional judgment of legal services lawyers in representing low-income persons; and

Whereas, the Reagan administration has announced that it will seek the abolition of the Legal Services Corporation, and an end to budget appropriations for legal services programs, in legislation in the United States Congress: Now, therefore, be it

Resolved, That the Board of Governors of the Minnesota State Bar Association recommends that:

(1) The Congress of the United States pass legislation reauthorizing the Legal Services Corporation without restriction on the free exercise of independent professional judgment of legal services lawyers in their representation of low-income persons, and without restriction on the ability of legal services lawyers to pursue on behalf of their clients the same full range of legal remedies that an attorney in private practice would be able to seek on behalf of more affluent clients.

(2) The Congress oppose any change to the current form of organization of legal services, or to the current method of funding legal services programs, which would subject programs to control by persons or governmental entities whose interests might be or become in conflict with independent, effective representation of clients by legal services attorneys.

(3) The Congress appropriate a sufficient level of funding to the National Legal Services Corporation to enable it to continue the same level of service which it now provides.

(4) This resolution be forwarded to the Senators and Representatives from Minnesota.●

AMICI CURIAE BRIEF IN LUBBOCK CASE

● Mr. HATFIELD. Mr. President, on December 14, 1982, 24 Members of the U.S. Senate filed an amici curiae brief with the Supreme Court in Lubbock Civil Liberties Union against Lubbock Independent School District. The brief asks the Court to grant a hearing and reverse the decision.

The brief makes these basic arguments:

First there is confusion as to the proper policy for student initiated religious activities in public schools that merits Supreme Court review.

Second, the Lubbock decision violates the principle of neutrality and requires the State to become the adversary of students who wish to engage in religious speech.

Third, the Lubbock decision violates the free speech rights of students and discriminates against religious speech.

Mr. President, I wish to thank the Senators who joined me in this effort for thier contribution. I believe much of the confusion which has followed the Court's decision of the 1960's would be cleared up if the issue of student-initiated religious speech in public high schools is addressed by the Supreme Court.

Mr. President, I ask that the brief be printed in the RECORD.

The brief follows:

[In the Supreme Court of the United States, October Term, 1982—No. 82-805]

LUBBOCK INDEPENDENT SCHOOL DISTRICT, *et al., Petitioners,* VERSUS LUBBOCK CIVIL LIBERTIES UNION, *Respondent*

Brief Amici Curiae of Senator Mark O. Hatfield, Senator Paul Laxalt, Senator Jennings Randolph, Senator Jake Garn, Senator Pete V. Domenici, Senator Jeremiah Denton, Senator Donald L. Nickles, Senator Slade Gorton, Senator Jesse A. Helms, Senator S. I. Hayakawa, Senator James Abdnor, Senator David L. Boren, Senator Dennis DeConcini, Senator William Proxmire, Senator Alan K. Simpson, Senator Orrin G. Hatch, Senator Roger W. Jepsen, Senator Paula Hawkins, Senator William L. Armstrong, Senator Sam Nunn, Senator Robert J. Dole, Senator Max S. Baucus, Senator Howell Heflin, and Senator J. Bennett Johnston, Members of the U.S. Congress, in support of the Petition for a Writ of Certiorari to the U.S. Court of Appeals for the Fifth Circuit

INTEREST OF THE AMICI CURIAE

The amici curiae are elected members of the United States Senate. Each has taken an oath to support and defend the Constitution of the United States. Each serves at the will of and as the representative of the citizens of one of the several States. Each bears the responsibility of voting upon legislation designed to preserve and protect rights guaranteed by the Constitution of the United States.

Amici do not lightly seek leave to appear before this Court. However, the decision below would require a school board to discriminate against students who wish to use school facilities outside school hours for discussion the school board considers to have religious content. We submit that the decision violates fundamental principles of the First Amendment. The decision treats one of the most devisive social issues of our day. It is an issue involving the deepest convictions and most cherished liberties of the American people.

The issue presented is one that we have been asked to address officially on several recent occasions and one which we will have to address again. The United States Senate has before it constitutional amendments to permit prayer in public schools,[1] legislation to permit prayer in public schools to some degree,[2] and legislation to remove voluntary school prayer cases arising under state law from the jurisdiction of the federal courts.[3]

The proposals before the Senate are responsive to the widespread perception that the courts are interpreting the Constitution in a way that is hostile to religion. We are of the firm conviction that the decision below is just such a decision and that, if allowed to stand, it will place the judiciary at odds with the people it serves and the Constitution it interprets. The Constitution is not hostile to religion and the prior decisions of this Court do not compel the holding below that it is. Rather, the overwhelming weight of this Court's prior decisions establishes that the Constitution requires the government to maintain neutrality toward religion in a way that recognizes and protects the liberties of our students. The holding below improperly requires state hostility to religion and infringes student rights.

This case presents the Court with the opportunity to resolve an issue of unusual importance that is causing widespread confusion and confrontation. Numerous school boards throughout the country are uncertain as to the applicable law on the subject of equal access to school facilities by voluntary student groups.[4] Some, relying on this Court's recent decision in *Widmar* v. *Vincent*, 454 U.S. 263, 102 S. Ct. 269, 70 L. Ed. 2d 440 (1981), applicable to colleges, believe they must permit voluntary religious activities that are initiated and run by students when they take their facilities available for nonreligious activities. Others, relying on the decision below,[5] believe they are prohibited from doing so. Still others believe that the discretion whether to permit such activities rests with the school boards. A clear rule on this issue is urgently needed. This case squarely presents the Court with the opportunity to announce such a rule.

Amici believe that neither legislation nor a constitutional amendment is required to permit a school to open its facilities for all appropriate student-initiated and student-managed activities including, if the students wish, religious activities. The Constitution already so provides. The Establishment, Free Exercise and Free Speech Clauses of the First Amendment require treatment of such activities in a neutral manner. Consequently, public schools properly may allow students equal access to school facilities for voluntary, extracurricular, religious speech and assembly.

Supreme Court reaffirmation of this neutrality principle will assist amici in acquitting their responsibilities as elected officials when acting upon pending legislation and constitutional amendments and when providing guidance to constituents who operate or attend public schools. These amici curiae have a substantial official interest in the issue presented in this case, and urge the court to grant the petition for certiorari and to reverse the decision of the Fifth Circuit.

STATEMENT OF THE CASE

On August 26, 1980, the Lubbock Independent School District adopted a policy concerning the use of school facilities during non-instructional periods that provided equal access to voluntary, supervised, student groups for any "educational, moral, religious or ethical purposes."[6] It is neutral on its face. Paragraph four of the policy states:

"The School Board permits students to gather at the school with supervision either before or after regular school hours on the same basis as other groups as determined by the school administration to meet for any educational, moral, religious or ethical purposes so long as attendance at such meetings is voluntary."

The Lubbock Civil Liberties Union challenged this policy under the Establishment Clause of the First Amendment as unconstitutional on its face and as applied.[7]

The District Court held that the equal access policy was not facially unconstitutional. Rather, it "strikes the correct balance between the First Amendment's mandate against governmental establishment of a religion and its protection of the free exercise of religion."[8] The District Court also found that there was no evidence that the policy had been unconstitutionally applied.[9]

The Fifth Circuit Court of Appeals reversed this decison, finding that the School Board's equal-access-to-facilities policy was an unconstitutional establishment of religion. *Lubbock Civil Liberties Union* v. *Lubbock Independent School District*, 669 F.2d 1038 (5th Cir. 1982). The Circuit Court held that the policy was constitutionally objectionable because it "appear[ed] in the middle of a policy concerned with religious activities in the schools,"[10] because it authorized student meetings "at a time closely associated with the school day"[11] thereby demonstrating "implicit support and approval of the religious meetings,"[12] and because the School District, in connection with its statutory responsibilities concerning school property, intended to provide personnel to ensure the protection of school property during the student meetings.[13]

---

[1] S.J Res. 199, 97th Cong., 2d Sess. (1982), a constitutional amendment proposed by President Ronald Reagan and sponsored by Senators Thurmond and Hatch declares that "Nothing in the Constitution shall be construed to prohibit individual or group prayer in public schools or other public institutions. No person shall be required by the United States or by any State to participate in prayer." An alternative constitutional amendment proposed by Senator Byrd is similar in nature. S.J Res. 247, 97th Cong., 2d Sess. (1982).

[2] Title IV of S. 1378, 97th Cong., 1st (1981) and S. 1577, 97th Cong., 1st Sess (1981), introduced by Senator Jepsen, would grant every individual the right to participate in voluntary prayer or religious meditation in any public building and would forbid the State from abridging that right. S. 2928, 97th Cong., 2d Sess. (1982), introduced by Senator Hatfield, would require public secondary schools that receive federal aid and which generally allow students to meet during non-instructional periods also to permit use of school facilities on an equal basis by students meeting voluntarily for the purpose of religious discussion or prayer.

[3] S. 481, 97th Cong., 1st Sess. (1981), and S. 1742, 97th Cong., 1st Sess. (1981), introduced by Senator Helms, would eliminate Supreme Court and federal district court jurisdiction to review and hear any case arising under state law relating to voluntary prayer in public buildings and schools.

[4] *See, e.g.* 128 Cong. Rec. S11780-86 (daily ed. Sept. 17, 1982). The present confusion is discussed in more detail, *infra*, at 9.

[5] The Fifth Circuit decision, reported at 669 F.2d 1038 (5th Cir. 1982), is reprinted as Appendix A to the Petition for a Writ of Certiorari to the United States Court of Appeals for the Fifth Circuit filed November 12, 1982 ("Petition for Certiorari").

[6] Since this case clearly involves the question whether public school facilities already available to other student groups may be made available on an equal basis to voluntary student groups seeking to engage in religious discussion or prayer, it differs from *Brandon* v. *Board of Education*, 635 F.2d 971 (2d Cir. 1980), *cert. denied*, 454 U.S. 1123 (1981), as that case was presented to this Court.

At the time the decision was rendered in *Widmar* v. *Vincent, supra*, 102 S. Ct. 269, and thus at the time of the denial of *certiorari* in *Brandon*, the court described *Brandon* as a case "in which religious groups claim that the denial of facilities *not* available to other groups deprives them of their rights under the Free Exercise Clause." 102 S. Ct. at 276 n.13 (emphasis in original). The Court subsequently eliminated the reference to *Brandon* in footnote 13 of the *Widmar* decision, *see Widmar* v. *Vincent*, 454 U.S. 263, 273 n.13 (1981).

[7] At trial, however, the president of the Lubbock Civil Liberties Union, a professor of constitutional law, testified that the policy was not facially unconstitutional (Tr., at 28) and that despite widespread publicity concerning the litigation respondent had received no complaints concerning the policy as applied. (Tr. at 27-28.)

[8] The District Court's unpublished opinion is reprinted as Appendix B to the Petition for Certiorari. The quoted statement is found at page 31a of the Appendix.

[9] Petition for Certiorari, Appendix B, at 33a.

[10] Petition for Certiorari, Appendix A, at 13a.

[11] *Id.*, at 16a.

[12] *Id.*, at 17a.

[13] *Id.*, at 18a-20a.

Rehearing *en banc* was denied, with four judges dissenting.[14] The dissenting judges asked: "Is neutrality still the objective or is it the fashion now to make the state the adversary of religious belief?" [15] This Court should resolve that question in favor of neutrality, by granting petitioner's writ, and by reversing the Fifth Circuit decision.

SUMMARY OF ARGUMENT

The question of whether a school board may open public school facilities to a broad range of student-initiated activities including religious activities or whether the school board must discriminate against activities it considers religious is one which the Supreme Court should resolve now. The Court left this question open in *Widmar* v. *Vincent, supra,* 454 U.S. at 274 n.14. The holding in Widmar and the neutrality principle it espouses point powerfully in one direction. The holding below points in the other. School boards do not know what the law is on a question of great importance to their communities. The Court should eliminate this confusion by announcing a clear equal access rule that can be applied by school authorities nationwide.

This case presents the issue clearly. The policy of the School Board is set forth in writing and has been struck down as unconstitutional on its face. Certiorari should be granted because the Fifth Circuit decision conflicts with the settled principle that neutral State policies concerning religion are not unconstitutional, and because the Fifth Circuit decision requires a deviation from such neutral policies that deprives students of their rights of Free Speech and Assembly.

ARGUMENT

Reasons for Granting the Writ

I. This Court should grant the writ to reduce the nationwide confusion concerning proper policies for religious activities in public schools

Many school boards across the country, genuinely wishing to comply with this Court's rulings, have struggled to resolve the issue of whether students may meet voluntarily for religious purposes. Some school authorities have concluded that such meetings cannot be permitted while others, interpreting the same conflicting legal precedents, have reached the opposite conclusion. For example:

In Sonoma, California, a group of high school students who had been meeting to discuss religious topics was recently disbanded by the school's principal after nearly ten years as a recognized student group. The school district's legal counsel, after reviewing this Court's decision in Widmar and the Fifth Circuit's decision in the instant case, advised the principal that Lubbock controlled in the high school setting and thus prohibited the group's activities.

In Anderson County, South Carolina, students have been meeting weekly in school facilities for the past two years before school buses arrived for prayer, Bible study and religious discussions. The students have met on school premises pursuant to a written policy applying to non-student groups allowing use of the school facilities "to promote the general cultural, civic, religious, educational and social welfare of the community." The policy was clarified in November 1982 to make explicit that religious activity is not permitted during the school day. The group may continue to meet under this policy. The local affiliate of the American Civil Liberties Union has threatened to sue the school board if the religious activities continue.

In Williamsport, Pennsylvania, high school students have sought recognition as a school club for prayer, Bible study, and discussion, and have asked permission to meet on the school premises during the early morning student activity period. Other student groups regularly meet during this activity period. The students' request has been denied based on the opinion of the school district's attorney that recognition of the group would violate the First Amendment. On June 2, 1982, the students filed a complaint against the school board in federal court seeking a declaration that the refusal to permit the students to meet violates their First Amendment rights.

In Saddleback, California, a written school policy permitted student groups to meet to discuss issues without regard to content and subject matter. The policy distinguished between sponsored clubs, which received financial support and supervision from the school, and student-initiated groups, which received no such support. A student-initiated group met during the school lunch period to discuss topical issues and read passages from the Bible. The American Civil Liberties Union filed suit against the school board, asking that the policy, as applied, be declared unconsititutional. The suit was dropped when a newly elected school board promulgated a new policy that allows only sponsored clubs.

These examples illustrate the prevailing confusion as local authorities attempt to operate the schools in the face of conflicts between the cases decided by this Court and the lower federal courts. The Court should grant petitioners' writ to resolve this issue by announcing a clear rule for the nation permitting equal access to school facilities.

II. This Court should grant the writ to uphold the principle of neutrality

The Lubbock School Board has formulated a neutral, non-preferential policy that allows equal access to school facilities for all types of student groups wishing to meet. The policy "neither advances nor inhibits religion." See *Abington School District* v. *Schempp,* 374 U.S. 203, 222 (1963). Merely allowing students to meet for prayer and religious discussions, pursuant to a policy allowing students to meet for a broad variety of purposes, is consistent with this Court's long-established requirement that States act in a manner neutral toward religious and non-religious activities. This principle was first articulated by this Court, through Mr. Justice Black, in *Everson* v. *Board of Education,* 330 U.S. 1, 18 (1947):

"[The First] Amendment requires the state to be a neutral in its relations with groups of religious believers and non-believers; it does not require the state to be their adversary. State power is no more to be used so as to handicap religions than it is to favor them."

In fact, this Court has consistently required governmental neutrality toward religion. See *Roemer* v. *Board of Public Works,* 426 U.S. 736, 745-46 (1976) ("The Court has enforced a scrupulous neutrality by the State, as among religions, and also as between religious and other activities, but a hermetic separation of the two is an impossibility it has never required." [footnote omitted]); *Lemon* v. *Kurtzman,* 403 U.S. 602, 616 (1971) ("Our decisions from *Everson* to *Allen* have permitted the States to provide church-related schools with secular, neutral, or nonideological services, facilities, or materials.");[16] *Walz* v. *Tax Commission,* 397 U.S. 664, 669 (1970) ("Short of those expressly proscribed governmental acts [governmentally established religion or governmental interference with religion] there is room for play in the joints productive of a benevolent neutrality which will permit religious exercise to exist without sponsorship and without interference."); *Board of Education* v. *Allen,* 392 U.S. 236, 249 (1968) (Harlan, J., concurring) ("The attitude of government toward religion must, as this Court has frequently observed, be one of neutrality."); *Abington School District* v. *Schempp,* 374 U.S. 203, 215, 218, 222, 225, 299, 306 (1963); *Engel* v. *Vitale,* 370 U.S. 421, 443 (1962) (Douglas, J., concurring) ("The First Amendment leaves the Government in a position not of hostility to religion but of neutrality.").

The equal access policy instituted by the Lubbock School District satisfies the requirement of neutrality. As this Court stated in *Widmar,* a non-preferential policy permitting all student groups to have equal access to university facilities reflects a secular purpose, 454 U.S. at 271-72, and "[t]he provision of benefits to [a] broad . . . spectrum of groups is an important index of secular effect," *id.* at 274. By contrast, the Fifth Circuit's decision in *Lubbock* violates the neutrality principle by requiring the State to become the adversary of public school students who wish to engage in religious activities. Under *Lubbock,* school boards would be required to screen all voluntary groups that are meeting or desire to meet and deny equal access to school facilities when religious content is discovered. Such State involvement is precisely the sort of entanglement that this Court's rulings under the Establishment Clause have sought to prevent. *Widmar* v. *Vincent, supra,* 454 U.S. at 269, n.6.

III. This Court should grant the writ to protect students' rights of free speech and assembly

This Court has emphatically stated that public school students do not "shed their constitutional rights to freedom of speech or expression at the schoolhouse gate." *Tinker* v. *Des Moines Independent Community School District,* 393 U.S. 503, 506 (1969). Religious discussion and worship are "forms of speech and association protected by the First Amendment." *Widmar* v. *Vincent, supra,* 454 U.S. at 269. Consequently, students must be permitted to exercise their Free Speech and Association rights, including the right to engage in speech with religious content, unless the conduct "would 'materially and substantially interfere with the requirements of appropriate discipline in the operation of the school . . . .'" *Tinker, supra,* 393 U.S. at 509, *citing Burnside* v. *Byars,* 363 F.2d 744, 749 (5th Cir. 1966). In the instant case there is no indication whatsoever that voluntary meetings outside school hours would disrupt discipline in the school.

---

[14] *See* Petition for Certiorari, Appendix D.

[15] *Id.,* at 41a.

[16] The Court in *Lemon* described the types of neutral facilities and services that school districts can provide: "Bus transportation, school lunches, public health services, and secular textbooks supplied in common to all students were not thought to offend the Establishment Clause." 403 U.S. at 616-17. See also *Board of Education* v. *Allen,* 392 U.S. 236 (1968). The classrooms made available in the present case on an equal basis to all student groups are also neutral facilities.

Furthermore, this Court has held that where the facilities of a public university are made generally available to students for the exercise of their rights of speech and assembly, they cannot be denied to other students who wish to engage in religious speech and assembly. *Widmar* v. *Vincent*, supra, 454 U.S. 263. The Lubbock School District permits other voluntary student groups to use school facilities. It should also be permitted to allow religious-oriented groups to meet. Indeed, as held in *Tinker*, "the prohibition of expression of *one particular opinion*, at least without evidence that it is necessary to avoid material and substantial interference with school-work or discipline, is not constitutionally permissible." 393 U.S. at 511 (emphasis added). Since students may discuss the inquiry of Jean-Paul Sartre whether there is a God, they should also be permitted to discuss the conviction of Saul of Tarsus, that there is. See *Widmar* v. *Vincent*, supra, 454 U.S. at 277 (Stevens, J., concurring).

Under Supreme Court precedent the Lubbock School District's Board of Trustees must allow student expressions of opinion. The Fifth Circuit decision would require the Board to prohibit student expressions about religion. Such content-based regulation of speech deprives students of their Free Speech rights.

CONCLUSION

Amici curiae respectfully request that the petition of the Lubbock Independent School District be granted to reaffirm governmental neutrality toward religion. *Lubbock* should be reviewed and reversed to assure nondiscriminatory access to public school facilities for voluntary student meetings.

Respectfully submitted,

JOHN W. NIELDS, Jr.,
WILLIAM JAY HUNTER, Jr.

THE TRICKLE UP PROGRAM

● Mr. KENNEDY. Mr. President, I wish to draw to the Senate's attention a little known but promising program which provides small starting grants to applicants from the lowest income levels in developing countries who can offer viable plans for self-employment, and in the process, encourages the use of local resources and produce.

Established 3 years ago by Glen and Mildred Robbins Leet of New York City, the trickle up program offers a sensible grassroots approach to development aid, which is already being tested in 37 different countries. In an age of increasingly cumbersome bureaucracies, it is heartening to learn of such small-scale projects in which benefits, however modest, are immediate and real. The laudable efforts of Mr. and Mrs. Leets and others involved in this pioneer effort deserve our recognition and support, and I request that the article on their efforts, appearing in the New York Times, appear at this point in the RECORD.

The article follows:

[From the New York Times, Sept. 12, 1982]

COUPLE USING $100 GRANTS TO FOSTER SELF-HELP

(By Kathleen Teltsch)

A check for $100 seems small capital to start a business. But an American couple have used that amount to help poor women on the Caribbean island of Dominica market their home-brewed ginger wine and to help another group in the Solomon Islands sell their pineapple and mango jams, which are delivered to customers by canoe.

The couple, Glen and Mildred Robbins Leet, call their undertaking to help the poor the Trickle Up Program. While scarcely a household name in the United States, its reputation has spread and the organization now operates in 37 countries.

"We're not exactly the World Bank," said Mr. Leet of the three-year-old aid program, which so far has laid out a total of $36,700. But then he also observed that pouring millions of dollars into poor countries did not always trickle down to help the truly impoverished.

The Trickle Up Program was born, the Leets explained in their Riverside Drive office-apartment, because they were convinced that a "bottom up" approach would succeed if carefully planned to motivate people at the lowest income levels to help themselves.

Their conviction was strengthened by their own career experiences. Mr. Leet had worked for three decades at improving community development in more than 60 countries, much of the time as a United Nations specialist. Mrs. Leet had also spent years at the United Nations, as an observer for the National Council of Women, and attended conferences devoted to third-world assistance.

They selected Dominica, an undeveloped island in the West Indies, to test their self-help model, which basically provides two $50 grants to applicants that offer a viable, income-raising plan for self-employment. The first check is issued when a group's application is accepted. The second check arrives when the group has demonstrated its progress.

The criteria are few. The applicants must be willing to devote 1,000 hours of time to work. They are encouraged to utilize local and readily available products—fruits, native woods for handicrafts, home-grown vegetables and spices that can be turned into sauces. They do not encourage export enterprises, partly because, the Leets explain, a quick return from sales has immediate, psychological benefits.

A key element in the undertaking involves unpaid "coordinators" who help the local groups get started. A number have been Peace Corps members who learn about the program and volunteer their time. In some instances, government workers act as coordinators.

Except for a newsletter that goes to organizations active in the development field, the Leets have not attempted to draw attention to their undertaking. In addition to using their personal funds, they have had some financial help from foundations, individuals and a few civic organizations.●

THE SOVIETS AND THE NUCLEAR FREEZE

● Mr. GARN. Mr. President, it is well known that I support President Reagan's arms reduction policy and oppose the call for a nuclear freeze. I have spoken before this body in the past concerning my specific objections to the nuclear freeze proposal, and will not take the time to reiterate those points here today. Nonetheless, I would like to address an important aspect of the nuclear freeze debate, namely, the subject of Soviet involvement in America's peace movement.

Let me say that I recognize the political sensitivity of this issue; it is a question that has tended to generate much emotion on both sides of the debate. I also want to make it very clear at the beginning of my remarks that I do not question the patriotism or motivations of Americans who support a nuclear freeze or have participated in public demonstrations of its behalf. The simple fact of the matter is, however, that the Soviet Union has historically conducted an active campaign to divide the countries of the free world and weaken our resolve to meet the challenge of Soviet foreign policy adventurism and military aggression. In testimony before the House Committee on Intelligence, Mr. Edward J. O'Malley, Assistant Director for Intelligence, Federal Bureau of Investigation, noted that Soviet efforts have recently focused on arms control issues:

> Recent KGB active measures operations in the United States have focused on arms control and disarmament matters and the peace movement. Specific Soviet objectives are to promote Soviet views on intermediate-range nuclear force (INF) negotiations and strategic arms reduction talks (START) and to support and reinforce domestic opposition to Reagan administration defense policies and budget, as well as the production and/or deployment of Pershing II and Cruise Missiles in Western Europe, enhanced radiation weapons or "neutron bomb," MX missile, and the B-1 Bomber.

Soviet active measures are operations that are intended to influence the policies of other nations. The Soviets use a wide variety of active measures including: forgeries, disinformation, the use of front groups, political influence operations, and media manipulation. The CIA estimates that the Soviet Union spends approximately $3 billion annually on covert action and propaganda. Those who are interested in reviewing a firsthand account of Soviet activities in this regard should read the statement of Stanislav Levchenko, a former major in the KGB, and a key actor in Soviet active measures operations in Japan who testified before the House Intelligence Committee on July 14, 1982.

Let me emphasize that to recognize the simple truth of Mr. O'Malley's observation is not a call to initiate a McCarthy-like witch hunt or to question the commitment of nuclear freeze advocates to the cause of reducing the risk of nuclear war. It is, however, a word of caution that we would be dere-

lict in ignoring. As the Wall Street Journal recently pointed out:

None of this means for a moment that the great bulk of the freeze movement is anything but sincere, or that the movement would not exist without Communist initiative. But there is a Communist Party and there are Communist fronts even in the U.S., and they are promoting not peace but Soviet interests. The American labor movement learned long ago that it had to purge Communsts to protect its own interests, and American liberals originally formed the Americans for Democratic Action for the same reasons. It is anything but demagogic to ask the peace/freeze movement to do the same thing today; indeed, any political movement that does not throws a dark shadow over the cause it hopes to advance.

Mr. President, I am disturbed by the remarks of Representative EDWARD BOLAND, chairman of the House Intelligence Committee, as reported in the Washington Post to the effect that Soviet efforts in the peace movement have failed to influence significantly U.S. policymakers in the area of nuclear arms control. In my view, Representative BOLAND has set up a strawman in order to knock it down. While it is indeed important for us to determine the extent of Soviet success in influencing U.S. policy through their active measures campaign, it is also important for us simply to understand and recognize the extent to which the Soviets participate in such activities in an effort to influence U.S. policy. Representative BOLAND's remarks could easily leave the impression that this latter aspect of the issue is of little or no consequence and should elicit no concern or caution on our part. I believe that this is a mistaken approach which fails to recognize the dangers of these Soviet activities for the security of the United States and its allies.

The reasoning used by Representative BOLAND, and others, is something akin to claiming that Soviet military aggression against Afghanistan is of minimal consequence because it has proved less successful than Soviet leaders had previously hoped. I cannot imagine my colleagues soft selling CIA efforts to influence by covert means the policies of other countries simply because they were not successful, and I do not think Soviet efforts should be swept under the rug or ignored for similar reasons.

The legitimate concern that this administration has expressed on this issue should, in my opinion, be reinforced by the succession of Yuri Andropov as General Secretary of the Communist Party of the Soviet Union. Mr. Andropov served as the chairman of the Committee for State Security (the KGB) beginning in 1967. This position made him a central figure in Soviet active measures operations. As was noted by Mr. O'Malley, Soviet active measures are approved at the highest levels of the Soviet Government and implemented by the KGB, the International Department, and the International Information Department of the Soviet Central Committee. Can there be any doubt that Mr. Andropov will build on his experience in these matters in formulating his country's policies and attempting to exploit the internal divisions within the West?

Yet, let us remember that the pressure of the peace movement will not be felt in the Soviet Union itself. Even the New York Times admits that the political effect of the nuclear freeze "is to put relatively greater pressure on the United States than the Soviet Union, which suppressed its own freeze movements." The U.S. Deputy Permanent Representative to the United Nations, Ambassador Kenneth Adelman, also addressed this same dilemma when he stated in a recent speech that:

It is particularly ironic that the Soviet Union's domestic actions contrast so sharply with its rhetorical support for peace movements in free countries. While it cynically seeks to exploit the noble aspirations of the peace movement in other states, the Soviet Union simultaneously inveighs against pacifism and arrests those who take part in unauthorized peace actitivies in its own country. The message is clear: For the Soviet Union, peace and disarmament are issues for propagandistic exploitation abroad but not for free discussion at home.

In this regard, I must confess that I am deeply disappointed that the peace movements in the West so rarely direct their outrage and protest against the Soviet military buildup and policies. It is the Soviet Union that is using outlawed biological/chemical weapons against defenseless people in Laos, Cambodia, and Afghanistan; it is the Soviet Union that continues to deploy SS-20 missiles against Western Europe while the NATO allies hold desperately to their agreement to begin deployment of comparable weapon systems in December 1983, if we are unsuccessful at negotiating the total elimination of these weapons on both sides in the INF negotiations; it is the Soviet Union that has deployed destabilizing, first-strike weapon systems such as some 600 SS-19 and SS-18 missiles, while the United States still languishes over the issue of basing for 100 MX's. Maybe the freeze advocates simply recognize that their voices will never be heard in the Soviet Union, will never have a serious impact on the arms policies of that country. Maybe they have resigned themselves to waging a one-sided campaign that is likely to contribute little to the reduction of the risk of nuclear war, but may result in unilateral constraints on the defense efforts of the West.

If that is the dilemma that faces the freeze advocates, then another challenge faces this administration and those of us who oppose the freeze and believe that force modernization must be an integral part of a responsible arms reduction policy. That challenge is to preserve the freedoms of our society which make the debate over the issue of a nuclear freeze possible and to double our efforts to explain to the American people the basis upon which nuclear deterrence and our Nation's security can be maintained. The American people should be made aware of Soviet efforts to exploit our domestic debate over national defense, but if we fail to rally this country in behalf of a strong defense then it will be our failure, more so than the success of Soviet propaganda, that will be our undoing.

Mr. President, I ask that the following material be printed in the RECORD: the Washington Post article, "Soviet Effort in Nuclear Freeze Rally Cited," a speech of Ambassador Kenneth Adelman, "World Disarmament Campaign," and an editorial from the Wall Street Journal, "Peace, Comrade."

The material follows:

[From the Washington Post]

SOVIET EFFORT IN NUCLEAR FREEZE RALLY CITED

(By Joanne Omang)

The Soviet Union is "trying to capitalize" on the worldwide nuclear freeze movement and its agents "were actively involved" in planning a major New York demonstration last spring, U.S. intelligence officials told Congress in classified testimony released yesterday.

However, both the CIA and the FBI officers said their agencies could find no evidence that the efforts had significantly influenced either U.S. policy makers or the turnout for the rally.

The July testimony before the House Intelligence Committee was among documents President Reagan cited last month as support for his charge that the Soviet Union is manipulating the U.S. freeze movement.

Committee members immediately clashed over the impact of the hearings, which looked into the Soviets' campaign of "active measures" to promote their views worldwide.

"The bottom line is that the hearings provided no evidence that the Soviets direct, manage or manipulate the nuclear freeze movement," said committee Chairman Edward P. Boland (D-Mass.).

Although testimony showed the Soviets spent vast amounts of time and money on forged documents, planted agents and other active measures to try to influence events, Boland said, the FBI had testified that the efforts "have had, at best, minimal impact on U.S. decision makers."

Rep. C. W. (Bill) Young (R-Fla.), a conservative committee member, told a news conference he did not agree that the hearings produced no evidence of Soviet involvement.

He said he had "provoked, pushed and irritated" the committee into holding the hearings because the Soviet active-measures campaign "is growing and it's essential that the American people know about it."

All sides agreed that the Soviet Union, through its KGB intelligence agency, tries to infiltrate many groups worldwide and to influence their growth and direction. They differed over the success of those efforts and over the way U.S. citizens should respond.

"We were well aware that the peace movement in Europe did have a very native and genuine spawning," testified John McMahon, deputy CIA intelligence director, on July 13. "Yet the Soviets were able to capitalize on that and drive it much further than what the Europeans expected."

Edward J. O'Malley, assistant director of intelligence for the FBI, testified that the U.S. Communist Party, the U.S. Peace Council and the World Peace Council, which he called Soviet front groups, "were actively involved in the planning and implementation of the June 12 demonstration" in New York, which drew 500,000 people. But, he added, "I would not attribute the large turnout at this demonstration to the efforts" of those groups.

Jerry G. Berman, legislative counsel of the American Civil Liberties Union, said it was "irresponsible" of Reagan to charge Soviet manipulation of the freeze movement "when his own FBI could have told him there was no evidence to substantiate those charges."

Appearing with Young was former KGB major Stanislav Levchenko, who defected to the United States in 1979 after years of work in Japan.

The hearing testimony, much of it from Levchenko, revealed "absolutely incredible" things about KGB work, he said, and "if the people know about it, it will prevent the Soviets from infiltrating quite healthy organizations."

World Disarmament Campaign

(Following is a statement by Ambassador Kenneth L. Adelman, U.S. Deputy Permanent Representative to the United Nations, in Committee I of the U.N. General Assembly, New York, November 4, 1982.)

I speak today to agenda item 22d concerning the world disarmament campaign, The United States supports the achievement of a truly universal, comprehensive, and objective worldwide discussion of disarmament.

Over and over again in this century wars have been started by governments opposed to the principle of free expression or which deny their people a true voice in their governance and instead purport to speak on their behalf. Free nations do not want or choose war. Free speech leads them toward justice; freedom of opportunity offers progress without recourse to violence; and political freedom insures that governments reflect the views and concerns of their people.

Throughout this troubled century, the United States has never been at war with another country committed to democracy and the free expansion of ideas, whatever, their content. Indeed, it has supported the process of democratic change from its inception as a nation, and it champions peaceful change today. In the contemporary world, it has always been, and remains today, the least free and most repressive countries which are the main instigators of international tension and conflict. It is Soviet troops which are in Afghanistan, Vietnamese troops which are in Laos and Kampuchea, and Cuban Troops which are in Angola and Ethiopia. And it is Soviet weaponry, introduced through Cuba and Nicaragua, which is playing so active a destabilizing role in Latin America and fuels the ambitions of such irresponsible dictatorships as Libya.

The Second Special Session on Disarmament working group last summer produced a consensus document for a truly universal and effective world disarmament campaign. The language of this document is clear and unequivocal. It stipulates that:

The campaign "should be carried out in all regions of the world in a balanced, factual and objective manner."

Its universality should be "guaranteed by the cooperation and participation of all states and by the widest possible dissemination of information and opinions on questions of arms limitation and disarmament and the damages relating to all aspects of the arms race and war, in particular nuclear war."

And it should provide an "opportunity for discussion and debate in all countries on all points of view relating to disarmament issues, objectives and conditions."

These are admirable goals. Now it is up to all governments of the world to put these clear principles into practice, to realize in concrete deeds and in their day-by-day actions what all member states of the United Nations have already endorsed in words.

In the United States and in all open, democratic societies, the workings of a free, multisided media insure that essential information about security and disarmament is readily available to the public. Scores of public and private institutions are working actively to propagate their views on arms control and security issues. No censors or commissars impede the flow of public information. Demonstrations are not staged, nor is participation in them restricted to those invited by the government.

The Soviet and Eastern-Bloc Record

Unfortunately, this is not the case everywhere. In the Soviet Union, and in other countries following similar domestic repressive policies, only that information which supports official government positions can circulate freely and be openly and publicly discussed, even when it affects the most profound issues for mankind. And those who do demonstrate for peace and disarmament without permission run the risk of prison or internal exile.

It is particularly ironic that the Soviet Union's domestic actions contrast so sharply with its rhetorical support for peace movements in free countries. While it cynically seeks to exploit the noble aspirations of the peace movement in other states, the Soviet Union simultaneously inveighs against pacifism and arrests those who take part in unauthorized peace activities in its own country. The message is clear: For the Soviet Union, peace and disarmament are issues for propagandistic exploitation abroad but not for free discussion at home.

And if the Soviet delegate speaks, as he did yesterday, of 20,000 demonstrations with over 60 million participants, the question is not one of peace but only whether these persons had the option of not participating or of expressing their views freely. They had no such choice, because freedom of expression—much less spontaneous demonstration—does not exist in the Soviet Union.

Let me cite a few examples—all recent, some continuing—from a dismal Soviet and Eastern European record in the treatment of their own incipient, authentic peace movements.

In contravention to the Helsinki accords, the Soviet Union regularly jams Western radio broadcasts and strictly limits the circulation of foreign books and newspapers to keep its citizens from hearing about or discussing disarmament as well as other topics with foreigners. Ordinary Soviet citizens are admonished not to be in contact with foreigners, and KGB surveillance of foreigners generally intimidates Soviet citizens from contacting outsiders.

In the German Democratic Republic, we even witness the remarkable spectacle of government repression of peace movements which use symbolic arm patches showing the beating of swords into plowshares—a symbol reflecting the most basic ideals of the U.N. Charter itself and a symbol similar to the monument that the Soviet Union presented as a gift to the United Nations. These patches were denounced by a frightened East German regime that considered such a pacifist image "the expression of a mentality hostile to the state and proof of membership in an illegal political association." Students and workers wearing "swords into plowshares" patches faced expulsion from school or their jobs.

In Czechoslovakia, members of Charter 77, a reformist group dedicated to the upholding of the letter and spirit of the Helsinki accords and the U.N. Charter, have been harassed, arrested, and told not to discuss disarmament as well as other topics.

During August, the Polish authorities cynically sought to manipulate the Pugwash Conference in Warsaw to legitimize the Jaruzelski regime. To their credit, the American contingent voted beforehand at Boston not to participate as an official group, and many individual European scientists chose to boycott the conference. An open letter to the conference from Nobel Peace Prize laureate Andrey Sakharov, dealing with issues of the arms race and condemning the closed nature of the U.S.S.R. and other "Socialist" countries, was never put on the agenda—nor was the destabilizing and repressive situation outside the halls of the Pugwash Conference in Poland itself.

In regard to the arms race, the Sakharov letter reads: In the last decade there has been a very substantial increase in the Soviet army, navy, missile arsenal and air force, while the countries of the West, Europe especially, have weakened their defense efforts. The SS-20 missiles have changed the strategic equilibrium in Europe, although those who take part in pacifist demonstrations seem not to notice this fact.

Sakharov concludes his letter by urging that: "There must be international efforts, efforts made by all honest people, to defend human rights, to overcome the closed nature of the USSR and other socialist countries." It is incumbent upon all countries in the United Nations to heed Sakharov's plea.

In January, the official Soviet newspaper Pravda carried an enthusiastic editorial hailing the antiwar movement in Western Europe as "the vital cause of the peoples." The same paper had earlier declared that Soviet internal "propaganda must decisively rid itself of the traces of pacifism that are occasionally to be found in some instructional or propaganda materials." And, in February, on the occasion of Soviet Army-Navy day, the Soviet Chief of Staff, Marshal Ogarkov, published a booklet deploring "elements of pacifism" among citizens of the Soviet Union.

Last spring, seven people attempted to unfurl a little hand-lettered banner in Red Square in Moscow with the Russian words for "Bread, Life, and Disarmament." They were immediately arrested by the Soviet state security police. One wonders which of these three words was considered so dangerous that it had to be hidden from the people of Moscow.

In early summer, an international group of peace advocates was towed out from Leningrad harbor after releasing 2,000 balloons carrying messages which read: "U.S.S.R. Stop Nuclear Testing Now." The Soviet explanation: "The peace advocates' vessel 'Greenpeace' was polluting the harbor." In reality, it seems clear that the Soviet authorities regard spontaneous peace movements as the most dangerous pollutant of them all.

In July, a group of several hundred Scandinavians who visited several Soviet cities on a peace march—billed in the Soviet press as the counterpart of similar marches in the West—learned that their marches had to be done the Soviet way. Soviet speakers, ignoring previous agreements, introduced Soviet political themes and disarmament proposals; marching was cut to a minimum, and, where permitted, was tightly controlled; an effort was made to exploit the group by setting up a rally at Katyn, the site of the infamous Soviet execution of 4,000 Polish officers during World War II; discussions were orchestrated and translations of speeches falsified; and two members of an independent Soviet peace group seeking contract with the marchers were sentenced to 15 days detention to keep them away from the marchers. So much for the international walks for peace, cited yesterday by the Soviet delegate.

Also this past summer, just after one of the largest peaceful disarmament rallies in American history took place in New York, Soviet police moved against 11 Soviet citizens who had announced the formation of a fledgling, indpendent disarmament group called the "Group To Establish Trust Between the U.S.A. and the U.S.S.R." The group appealed—very much in the spirit of the Second Special Session on disarmament working group that same month—for the widest possible access to information on questions relating to disarmament and arms limitation. They called on my government—as the Soviet Government has called—to ratify the SALT II Treaty. They called for a "four-sided dialogue" to include the Soviet and American publics along with their governments on the issue of peace. They asked for permission to hold a real demonstration—one not planned, sponsored, and orchestrated by the Soviet Government—in Moscow in support of disarmament.

As a result of these activities, several members of the group were arrested and charged with "hooliganism." And on August 6, the spokesman of the group, 25-year-old Sergei Batovrin, the son of a Soviet diplomat attached to the Soviet U.N. Mission for 1965 to 1970, was confined for a month in a psychiatric institute, where he was forcibly treated with powerful debilitating drugs. His main sin seems to have been that, in a country where suspicion is all pervasive, he was notable for this openness and lack of suspicion. Perhaps, like anyone who had grown up in the United States, he had taken freedom for granted.

Just this week—on Monday, November 1—Soviet authorities once again prevented a new conference by Batovrin's battered group of peace advocates, barring both members and Western reporters from the building where the meeting was to take place. Batovrin, who would have been making his first public appearance since his release from detention, was prevented by Soviet security agents from even leaving his apartment. The meeting was to have dealt with Oleg Radzinsky, a young linguist arrested last week for anti-Soviet agitation. Before his arrest, Radzinsky has had the temerity to call for an international observance of 10 minutes of peace during which all work would be stopped in the name of disarmament.

The very virulence with which these peace advocates have been harrassed and suppressed illustrates the utter intolerence of the Soviet and Eastern-bloc authorities to any challenge to the official Soviet policy of "peace" or to its carefully nurtured official image of a nation totally supportive of the ruling Communist Party's peace initiatives and policies. The Soviet Union yesterday pledged 1.5 million rubles to the disarmament campaign, a gesture of rich irony from a country where no true disarmament movements are allowed.

The governments of the free world cannot and do not persecute or stifle their critics, whether we like them or not. We know that much of the progress of mankind—in the arts and sciences; in the mastery of disease or the conquest of space; in the persistent assertion of human dignity and the rights of man—is due to the work of courageous individuals who challenge falsehood in the name of truth, who speak for justice in the face of repression. We know better than to condemn critics to psychiatric wards, and we will not recoil if the passion for truth leads people to question our weaknessess or expose our wrongs.

We have welcomed dissidents from the inception of the American Republic, beginning, in fact, with those who landed at Plymouth Rock in 1620. Nor have these dissidents come only from Western Europe. Russians, Poles, Hungarians, Czechs, and people subjected to totalitarian governments elsewhere have flocked to these shores in search of self-expression and the right of individuals to shape their own lives. Those seeking freedom of intellectual and artistic expression have not threatened but vastly enriched the quality of thought and fabric of our culture. Each—whether Solzhenitsyn, Rostropovich, Baryshnikov, General Grigorenko, or lesser known figures—has made a unique impact.

In early September, 20 American leaders of the movement to freeze Soviet and American nuclear arsenals—including among them a Nobel Prize winner, the chairman for the Council for a Livable World and one of the few American members of the Soviet Union's Academy of Sciences—sent a letter to President Leonid I. Brezhnev protesting the Soviet efforts to "harrass and persecute" their Soviet counterparts. A portion of that letter reads: "The double standards by which the Soviet Government abides—applauding widespread debate in the West, while crushing the most benign form of free expression at home—only strengthens the complex of forces that impel the nuclear arms race."

The U.S. Government fully subscribes to that sentiment. That is why the United States would welcome a truly universal disarmament campaign allowed by all governments of the world, a campaign that meets the criteria established and agreed to by all member states at the Second Special Session on Disarmament.

RECENT U.S. INITIATIVES

For our part, we are giving concrete expression to our commitment to increased freedom and openness, not only at home but in the international arena as well. Let me review briefly some of the recent initiatives which the United States has undertaken in this regard.

The United States has engaged in an extensive, active dialogue with the Soviet Union on important world issues. As one element of this, President Reagan offered recently in Berlin to provide President Brezhnev with an opportunity to speak on world issues directly to the American people on U.S. television, if the Soviet leader provided a reciprocal opportunity. He also proposed that Soviet and American journalists exchange views in their respective media.

President Reagan also proposed, then and there, a number of new strategic confidence-building measures to foster greater openness and greater understanding. These include reciprocal U.S.-U.S.S.R. exchanges on advanced notification of major strategic exercises and on launches of intercontinental ballistic missiles within as well as beyond national borders and expanded exchange of strategic force data.

The United States also has supported and respected arrangements promoting greater openness in military matters as an outgrowth of the Conference on Security and Cooperation in Europe.

At the Second Special Session on Disarmament this summer, President Reagan proposed the convening of an International Conference on Military Expenditures to give a much needed stimulus to reporting of military budgets by countries, some of which continue to shroud their real military spending in secrecy and mask it behind patently false statistics.

In yet another effort to shed light on an important matter of world concern, the United States has strongly supported the efforts to induce the Governments of the Soviet Union, Laos, and Vietnam to facilitate access to areas where chemical weapon attacks have taken place over the last several years, so that the U.N. Group of Experts can conduct an impartial and complete investigation of these profoundly disturbing illegal and inhumane practices.

And in arms control negotiations, we have pressed for acceptance, on a mutual basis, of appropriate verification measures to enhance mutual confidence, credibility, and trust.

All of these proposals represent concrete and practical steps to increase freedom, openness, understanding, and confidence; to flood light into areas heretofore shrouded by excessive obsession with secrecy and control; and to lessen the dangers of international miscalculation and misunderstanding. We would welcome the free flow of information on disarmament among citizens of all countries. Two days ago, Americans in nine states exercised their right to vote in referenda on various disarmament issues. We regret that supporters of peace elsewhere still lack these basic rights. But we urge all other countries to undertake—in deeds, not only in words; at home as well as abroad—concrete efforts to promote an unhindered flow of information to all peoples of the world and to permit the widest possible freedom of public expression and assembly on the crucial issues of world peace and disarmament.

PEACE, COMRADE

When the House Select Committee on Intelligence recently released FBI and CIA testimony on "active measures" by the Soviets to influence public policy in the West, Rep. Edward P. Boland fixed the press and popular reaction with a press release saying "The bottom line is that hearings provide no evidence that the Soviets direct, manage

or manipulate the nuclear freeze movement." We have now read the actual 337-page report, and suggest that Rep. Boland might want to try the same exercise himself.

Item A in Rep. Boland's interpretation of the hearings is a statment by Edward J. O'Malley, assistant director of the FBI's intelligence division. Mr. O'Malley testified that some 500,000 people participated in the June 12 freeze demonstration in New York City, and that "I would not attribute the large turnout at this demonstration to the efforts" of Communist or Communist-dominated groups—the Communist Party U.S.A., the U.S. Peace Council or the World Peace Council.

This denies what no one, not even the freeze movement's most severe critic, has alleged. The concern, rather, has been that the freeze theme parallels Communist propaganda efforts, that Communists are active in the Western European peace movement and the related U.S. freeze movement, and that the sincere protesters who undeniably provide most of the power behind the movements are recklessly cavalier about Communist connections. The same Mr. O'Malley had some other interesting things to say in this regard.

For example, "The U.S. Peace Council and the World Peace Council, as well as CPUSA members, were actively involved in the planning and implementation of the June 12 demonstration." By way of definition, he added that the U.S. Peace Council is an affiliate of the World Peace Council, which he further described as "the largest and most active Soviet international front organization."

"In the last few years, the Communist Party Soviet Union instructed the CPUSA to place high priority on issues of arms control and disarmament and the peace movement," Mr. O'Malley continued. "The Soviets have used the Communist Party U.S.A. to mount campaigns against the neutron bomb, NATO theater nuclear force modernization and administration defense policies. Furthermore, the Soviets have requested the CPUSA to reinforce and mobilize the peace movement in this country."

According to an FBI report, the World Peace Council "was deeply engaged, almost to the exclusion of other projects," in preparations for the U.N.'s Second Special Session on Disarmament last spring. Meanwhile, the FBI added that the U.S. Peace Council was involved in organizing the 500,000-person rally, and that the U.S. Communist Party, "was a member of the June 12 coalition, which was responsible for actually coordinating and planning the rally."

The FBI's position is, then, that the Communist Party and Communist fronts were indeed active in the demonstration, but not crucial to its success. The logical question is whether Communist participation mattered, and on this the FBI also has an opinion. In participating in planning the demonstration, "The USPC reportedly attempted to channel the theme of the protest away from the Soviet Union and against the U.S."

Any eye-witness to the march past the U.N. must have been struck, as we certainly were, that there weren't any signs, banners or chants against, say, the Soviet occupation of Afghanistan or the use of "yellow rain." The U.S. administration, though, was certainly given a lot of grief. There is reason to suspect, in short, that Communist efforts within the freeze movement have been successful in shifting attention away from the Soviet Union's massive military buildup and toward the Reagan administration's defense programs. Perhaps this does not meet Rep. Boland's definition of "manipulating" the freeze movement, but it certainly meets ours.

Indeed, Rep. Boland's hear-no-evil, see-no-evil attitude perfectly exemplifies what we find objectionable about the leaders of the freeze movement. By now the Europeans, who have watched their own peace movement longer than we have watched the freeze, have lost any such naivete. Both Denmark and Norway, for example, has expelled Soviet diplomats for trying to influence their peace movements. West German groups have fought Communist takeovers. And Bruno Kreisky, chancellor of neutralist Austria, says "the Soviets have spent millions on the peace campaign."

None of this means for a moment that the great bulk of the freeze movement is anything but sincere, or that the movement would not exist without Communist initiative. But there is a Communist Party and there are Communist fronts even in the U.S., and they are promoting not peace but Soviet interests. The American labor movement learned long ago that it had to purge Communists to protect its own interests, and American liberals originally formed the Americans for Democratic Action for the same reasons. It is anything but demagogic to ask the peace/freeze movement to do the same thing today; indeed, any political movement that does not throws a dark shadow over the cause it hopes to advance.●

ENTITLEMENT REFORM

● Mr. DURENBERGER. Mr. President, we will confront very few issues over the next 2 years that match the importance of the fight to control the growth of the Federal deficit.

That deficit touches our lives in many ways—through higher interest rates that slow the economy and take away jobs; by squeezing out small investors as Government consumes an ever greater share of private savings; by saddling future generations with immense debt repayment obligations. Perhaps most important, it shatters the basic faith of the American people in the will of this Government to control its own financial destiny.

Regaining control of the Federal budget cannot be handled as a political issue. It will require each of us to display a high degree of objectivity and political courage. In a recent article in the Atlantic magazine, James Fallows showed that objectivity and courage in discussing the impact that one of Government's great "untouchables"—the entitlement segment of the budget—is having on the growth of the deficit. This is an article that all of us should read and ponder before we reconvene for the next Congress. The entitlement issue is not an easy one to deal with, either politically or on its substance. But it is an issue that cannot be evaded, and I believe that everyone who reviews this article will be impressed as I was with the precision and sensitivity that the author brought to his analysis of the various aspects of entitlement reform.

Mr. President, I ask that the article be printed in the RECORD.

The article follows:

ENTITLEMENTS

(By James Fallows)

Early last spring, Hastings Keith tried to return some money to the federal government. For fourteen years, Keith was a Republican congressman from the Massachusetts district that includes Cape Cod. After leaving the Congress in 1972, he worked for a few months in the Nixon Administration and then went into business. Together with the five years and ten months he had spent in the military before, during, and after World War II, Keith had put in twenty years on the federal payroll; and so, in 1973, at the age of fifty-eight, he was eligible for the early retirement benefits the government provides.

His combined congressional/civil-service pension provided him initially with $1,560 a month, or $18,720 a year. He also received retirement pay, $551 a month, for service on active military duty and in the reserves, which be began getting in 1975. And in 1980, when he turned sixty-five, Keith drew a third government benefit, his monthly Social Security check.

Like other federal benefits, Keith's were fully "indexed" against inflation, which meant that they were increased once, and in some cases twice, a year, in step with changes in the Consumer Price Index (CPI). Because of these increases, Keith, whose highest salary as a congressman had been $42,500, found himself by 1982 taking in nearly $61,000 a year in federal pensions. His congressional pension had more than doubled since 1973, to $3,419 a month. His military pension had risen to $903 a month, and his Social Security payment was 691 a month. Another round of cost-of-living adjustments made this summer raised Keith's federal pensions yet again, to a total of more than $65,000.

And that was not the end of federal benefits for the Keith household. Keith's wife had retired from the federal government during a "reduction in force," or RIF, when she was forty-six years old. Since she had put in twenty-five years of federal service, she was as a victim of a RIF, entitled to a pension, which started at $550 a month in 1976. By this year, it had nearly doubled, to some $1,000 a month. All told, then, the Keith family's federal pensions came to more than $77,000 as of last summer—and all of it was fully indexed to future increases in inflation.

To Hastings Keith, this seemed excessive. He wrote a letter to the secretary of the Treasury, Donald Regan, explaining why he wanted to turn over three checks, totaling $3,107, each representing a portion of his monthly allotments that he considered unwarranted.

Keith's hope had been to present his checks in a public ceremony, where he would register his complaint about the system that depleted the Treasury to finance windfalls such as his. The government shared little of his enthusiasm for the plan. Instead, he was granted an audience with an assistant secretary of the Treasury, who listened politely to his case, but did nothing.

His rebuff at the Treasury did not stop Hastings Keith, who has been telling his story to congressional committees and devoting his extra money to the effort to change the federal retirement system. But

the government's lack of interest in his cause helps explain some of the current agonies over the federal budget and federal deficits.

Although the generosity of congressional pensions makes the sums in this example extreme, they illustrate a basic fact of modern government. Benefits that are indiscriminately awarded, and then ceaselessly increased, add more to the federal budget than do those more familiar evils "cost overrun" and "welfare fraud." Yet politicians of every camp have found it perilous to tackle, or even to acknowledge, this problem.

Since early this year, both friends and foes of the Reagan Administration have understood that the next four years might well produce the largest sustained budget deficits in American history. When the administration released its budget proposals for fiscal year 1983 last spring, it did what no other adminstration had ever done: for the years ahead it predicted a smooth, robust return to national prosperity, yet it still foresaw budget deficits that would hover in the vicinity of $100 billion a year.

Last year's reductions in tax rates are part of the reason for the deficits, as are the administration's plans for a sustained military buildup. But while these two policies have been debated to death, neither the administration nor its critics have yet wrestled with the largest single force behind the deficits. Neither liberals nor conservatives have yet devised a confident approach to that portion of federal spending known as "entitlements."

Entitlements, sometimes called "payments to individuals," are technically defined as benefits for which people qualify automatically, by virtue of their age or income or occupation. Social Security is such an entitlement, by far the largest. So are medical programs such as Medicare and Medicaid, civil-service and military pensions, unemployment insurance and price-support payments for farmers, and (with certain technical quibbles over definitions) subsidized housing and food stamps.

From a budgetary point of view, the significance of such programs is that, at least in the short run, their costs cannot be controlled. If the Congress appropriates $2 billion to build a dam or a highway, it can be confident that no more than $2 billion may legally be spent. But when it authorizes extended unemployment benefits, or a different reimbursement formula under Medicare, it can set no limit on the money that will ultimately flow from the Treasury, since the government is legally obligated to provide benefits to anyone who can prove that he is eligible.

The Reagan Administration took office committed to a fundamental redefinition of federal responsibilities, but it will almost certainly depart having made no dent in entitlements. From the less than one third of federal spending in 1970, entitlements rose to represent nearly half (of a much larger total) in 1980. Even if the Reagan Administration should continue to be granted its every wish for more military spending, and even if Congress were to concur in all its proposed cuts in the rest of the budget, entitlements would still make up nearly half of the budget in 1983 and 1984.

The two national parties have virtually raced each other to distance themselves from this dangerous issue. Old-style liberals to "neo-liberals," the Democrats have attacked almost every other part of the administration's economic plan, without volunteering their ideas about this half of the budget. In its top-to-bottom re-examination of government spending, the administration exempted from Budget Director David Stockman's scrutiny not only the military but also the largest and fastest-growing entitlements.

The "entitlement problem" is often thought of as a "welfare problem." To a trivial extent, it is: most federal programs for the needy, including the classic welfare program, AFDC (Air to Families with Dependent Children), do fall within the entitlement budget. But they make up a small part of the whole. Only a sixth of all the money spent on entitlements is for programs that are "means-tested," or aimed at the poor, and those programs are the slowest growing part of the entitlements budget. For example, AFDC, at $7 billion, costs one third as much as civil-service pensions, and it shrinks while the pensions grow. Rather than a "welfare problem," the growth of the entitlements is actually a "retirement problem."

October 1 marks the beginning of the government's fiscal year, and in fiscal year 1983, just begun, the federal government will, according to the latest congressional budget resolutions, spend some $770 billion for all its varied activities. Of that total, $362 billion will go toward entitlements; of the $362 billion, $264 billion will be for retirement programs. In other words, one out of every three dollars the federal government spends this year will be spent on pensions or on medical care for those over the age of sixty-five.

Social Security, of course, heads the list of retirement programs; it will cost about $170 billion in 1983. Medicare, the medical-care program for people over the age of sixty-five, is second largest, at $49 billion. Together, these two programs account for more than half of the entitlement budget and more than a quarter of all federal spending. Two other major retirement items are civil-service pensions, $21.2 billion in 1983, and military retirement pay, $16.2 billion. By way of comparison, the largest means-tested program, Medicaid (Medicare's counterpart for the needy) is expected to cost $18.5 billion in 1983, and food stamps will be about $12 billion.

Retirement programs not only dominate the federal budget, they also represent its largest area of growth. The basic reason for this growth is demographic: over the past generation, more people have been surviving to retirement age, and the birthrate has declined. In 1950, roughly one American out of every forty-three drew benefits from the main Social Security account, known as Old Age and Survivors Insurance. Now about one in seven receives payments (including those who draw from the newer Disability Insurance account). In 1959, every 100 working Americans had to provide, through their Social Security taxes, the support for six retired people. Now each worker's obligation is five times as great (thirty-one retirees per 100 workers). That ratio should remain steady for the next twenty-five years, while the children of the postwar baby boom remain in the workforce. But early in the next century, the ratio should shift again. Fifty years from now, each person in the office or on the assembly line may be responsible not only for his own livelihood but also for half the support of a retired countryman.

The average single man who retired in 1960 received six and a half times as much money in benefits as he ever paid in. (These comparisons are adjusted for inflation, and for the interest that the taxpayer could have been earning on his contributions.) The man who retired in 1970 got back more than three times as much as he contributed, and the man who retired in 1980 should eventually receive two and a quarter times as much money as he paid in. But by the time one of today's teenagers retires, in the year 2030, he will have paid more into the system than he will ever get back.

Moreover, while life-spans were increasing, the retirement age was being lowered. The average man who turned twenty in 1940 could expect to live six months past his sixty-eighth birthday. Since the retirement age was then sixty-five, he could expect to spend three and a half years receiving the retirement benefits toward which he had contributed during his forty-five years of work. In 1956, the Social Security retirement age for women was lowered to sixty-two; it was lowered for men in 1961. (Retiring at sixty-two instead of sixty-five means a maximum reduction of 20 percent in Social Security benefits, but most of those eligible choose to take their benefits as soon as possible.

The average man who turned twenty in 1977 could expect to live to the age of seventy-five, or thirteen years past his retirement age. Consider how this young man's expectations would differ from his older counterpart's. The thirteen years he would spend in retirement would be nearly one third as long as his forty-two-year working career. Forty years ago, the average retirement was only one twelfth as long as the average working career.

Demographic trends, powerful as they are, do not fully explain the growth of the retirement programs; political maneuvering deserves much of the credit. The explosion in retirement benefits derives in large part from a reform gone awry.

The reform in question was an attempt to take the "politics" out of federal benefits. In 1962, Congress undertook a reform of civil-service pensions. Until that time, Congress had to approve each pension increase, in rituals very much like its regular votes to raise the ceiling on the national debt. Good-government spokesmen argued that this sapped the Congress's energies and debased its deliberations, by enticing congressmen to play politics with pension adjustments. It would be far better, they said, to delegate adjustments to the automatic workings of a formula.

The reformers also recommended an improvement over the military's system of raising pensions whenever active duty pay went up. In those days when federal salaries were considered to be "low," it was argued that the government might need to increase its pay selectively to attract the right talent; there was no logical reason to pass this on as a windfall to retirees. Pensions should rise only in accordance with the cost of living.

Starting in 1962, therefore, pensions for civil servants were to be adjusted once a year, in proportion to the rise in the CPI. Indeed, starting in 1969, the adjustment was one percent more than the CPI increase. This one percent "kicker" was supposed to make up for the lag between the rise in prices and the annual adjustment in the checks.

The other major step came in 1972, when Congress voted to index Social Security benefits to the CPI (but with no "kicker"). Until then, Social Security benefit levels had also been adjusted by the Congress. Switching to the index plan was, once again,

supposed to shield the system from political demagoguery. The logic seemed so compelling that by the end of the 1970s, 30 percent of all federal spending was directly indexed to the CPI, and another 14 percent was indexed to other measures.

The architects of indexing failed to foresee what would happen next, and understandably so: through most of the fifties and sixties, inflation had averaged less than 2 percent a year. But at just the moment when so large a share of federal spending was being tied to the CPI, the historic American inflation of the 1970s began. As prices increased by 8, 10, 12 percent each year, exactly in pace rose federal payments.

No, not exactly in pace. In fact, the payments rose faster, because of peculiarities in the design of the indexing formulas. The kicker for federal pensions, for one thing, put federal retirees far ahead of the game, until it was removed in 1976. Civil-service retirement pay cost $2.8 billion in 1970; after ten years of sustained inflation, it reached $14.7 billion in 1980, an increase of 525 percent. Perversely, indexing meant that it could be more profitable to retire than to work. Eric Heimel wrote in the Journal of Contemporary Studies that a four-star general who retired in 1971 would have seen his retirement pay increase, through indexing, to $64,000 in 1981, while a four-star general still on active duty in 1981 would be earning $54,000.

In principal, indexed increases did nothing more radical than enable federal pensioners to keep even with inflation. But in practice, their effect was quite different. During the inflation of the 1970s, few prices rose faster than those of energy and housing; but the increases in those prices, dramatic enough in reality, were exaggerated by the formulas used to calculate the Consumer Price Index. The costs of home ownership, which made up one quarter of the "market basket" of goods whose prices determined the CPI, were calculated in a way that made the index extremely sensitive to changes in the mortgage rates. For example, if the mortgage rate were to rise by one point in a month, from 10 percent to 11, that change would, all by itself, raise the CPI for that month by almost one full point, which could be "annualized" into an inflation rate of 12 percent. The Congressional Budget Office has estimated that this and other quirks in the CPI's treatment of housing costs exaggerated the real rise in consumer prices by as much as 5.1 points between 1978 and 1980, with each of those points triggering an extra $2 billion in federal spending each year. As for the cost of energy, the CPI market basket assumed that families would keep buying the same amounts of gas and oil and electricity, no matter how much prices might rise or fall. The real market basket of American consumers has of course changed markedly from that of 1972. The era of cheap fuel ended, and consumers cut back, but the CPI ignores such adjustments totally.

Beyond these technical defects in the index was a larger question of fairness, for "full indexation" led to very different fates for different segments of the American public. It created a class that had nothing to fear from the inflation that was the scourge of the rest of the populace. Those who retired from private companies were, if anything, more vulnerable to inflation than their working counterparts, since more than 90 percent of private pension plans offer no cost-of-living protection. (Hastings Keith's pension from the private firm where he spent twenty years started out at $150 a month and dropped to $100 when he began receiving Social Security.) But because of the technical oddities of the CPI, those who received federal pensions and Social Security could come out ahead when prices rose. For one class of beneficiaries, indexation all but shattered the connection between the nation's productivity and their economic welfare.

There is one further engine of growth at work within the retirement accounts: medical insurance. In financial terms, the medical programs are potentially the most explosive of all; they also present the most intractable of the entitlement dilemmas.

Through the past decade, no major program run by the federal government has grown more quickly than medical care for the aged. Between 1970 and 1980, federal payments for medical entitlements, of which Medicare makes up three quarters (Medicaid accounts for nearly all of the rest), rose by 133 percent in real dollars (i.e., adjusted to remove the effects of inflation). Medicare now costs less than one third as much as Social Security, but it is increasing at a much faster rate. According to projections based on the 1981 Social Security Trustees' report, Medicare could, by the year 2005, surpass Social Security to become the largest single item in the federal budget.

That Medicare should be outstripping Social Security suggests that it is subject to pressures other than demographics, since the clientele of the two programs is almost the same. The pressures driving Medicare costs ever higher are built into the medical system.

American doctors, researchers, and hospitals have proven far more brilliant in combating the ravages of age than in figuring out how to do so at a controllable cost. This imbalance presents choices that are inescapably cruel: who shall be denied kidney dialysis if the cost of serving everyone is too high? Who shall pay the cost if no one is to be denied? These are precisely the sorts of choices that democratic governments find most awkward to make, and medical-entitlement plans reflect that uneasiness. Under Medicare and Medicaid, the choices finally do get made, but only in a backhanded fashion that does not pretend to be rational and does not succeed in being economical.

The choices fall to the doctors: if your physician authorizes a trip to the hospital and elaborate tests, Medicare will pick up the costs of the next sixty days (after you pay the first $260). In principle, the brake on expenditures is the cumulative effect of a half-a-million doctors' prudent decisions. In practice, the limit is often set by local availability of hospital beds, of specialists, and of machines.

After years of bitter struggle, Congress enacted the Medicare program in 1965. Organized medicine, led by the American Medical Association, represented the principal opposition; as part of the political bargaining that ensured congressional passage, Medicare took on features that guaranteed that doctors and hospitals would not suffer financially under the plan. Doctors would be reimbursed according to a schedule of permissible fees—but the schedule would be based on rates set by the doctors themselves. Moreover, the doctors were free to bill their patients for supplements on top of the charge to Medicare. Hospitals, unlike doctors, agreed to accept Medicare's reimbursement as payment in full for a patient's bill. But that reimbursement would be based on the hospital's rendering of "reasonable costs" of care. Hospitalization insurance was automatic under Medicare. To get the extra coverage for doctors' bills, each person had to pay a premium, now $12.20 a month. Nearly everyone chooses the additional coverage, and so is effectively shielded from rising medical costs—which was, of course, one of the fundamental purposes of the plan.

The result of these arrangements was another of the "cost-plus" schemes so common in government contracting. No party to the transaction had both the incentive and the ability to economize on care. A hospital-building boom left new beds waiting to be filled. Filled they soon were, and the charges were passed on to Medicare or to private insurers. These "third-party reimbursers" watched their payments shoot through the roof—hospital charges have typically risen by 15 to 20 percent each year.

This general quandary for American medicine has created a particular challenge for Medicare, because expensive new medical techniques are most often used to treat older patients. Nearly a quarter of all Medicare payments are made in the last year of a recipient's life. While Medicare has been a resounding success in enabling retired Americans to meet their routine medical needs without financial terror, its budget is tremendously skewed by the costly last efforts to fend off death.

Political arguments about medical care have simmered down in the past half-dozen years, because of the near-universal assumption that the time has not been right to create another expensive new entitlement, in the form of a national health system. Yet the very difficulty of balancing our public accounts may soon refocus political attention on the basic questions of who gets what kind of medical care, and how we can pay for it.

As it drew up its proposals for the 1983 budget, the administration decided not to recommend any reductions in Social Security, and only minor adjustments in Medicare and federal pension plans. In so doing, it started out by declaring one-third of the budget off-limits for spending cuts. Another quarter of the budget belonged to the military, and its share was supposed to increase to one-third over the next few years. A further 15 percent of the 1983 budget was committed to repaying interest on the national debt.

Together, these three areas account for nearly three-fourths of all federal spending, without even counting the other entitlements. If they could not be cut, an administration pledged to frugality and embarrassed by mammoth deficits had little choice but to slash everything else. The administration proposed "zeroing out" most job-training programs, cutting research-and-development funds, and taking other difficult steps. There was one final possibility for savings: the "other" entitlements, those aimed at the poor. This possibility the administration seized.

Between Jimmy Carter's budget for fiscal year 1981 and Ronald Reagan's proposals for 1983, the major pension programs increased by 20 percent and Medicare increased by 30 percent. But in that same period, AFDC was cut by 25 percent, the low-income energy-assistance program by 30 percent, and a variety of nutrition programs, including food stamps, by 15 percent.

The unequal sharing of the sacrifice became one of the administration's central political problems; it led even conservative

pillars such as Senator ROBERT DOLE to complain about shoving the burden onto the poor. Even so, the cuts were not enough to solve the budget problems. No matter how deeply it might probe elsewhere, an administration that chose not to confront the biggest entitlements (to say nothing of the military) was left with the prospect of deficits so stupendous that they could double the national debt within five years.

In the middle sixties, it took the simultaneous pursuit of a war on poverty and a war in Vietnam to throw the federal budget into chronic deficit. Now it might require nothing more ambitious than meeting our routine obligations.

Can the entitlements explosion be contained? The ultimate answer demands a reconsideration of basic political premises that we have found comforting since the New Deal. Yet certain technical changes, primarily involving pensions for public employees, provide a place to start.

The single most important technical change is to begin dismantling preferential federal pensions and bring new federal employees into the Social Security system.

Federal employees now enjoy the nation's most generous pension plan. Most private pensions aim at replacing 20 to 25 percent of a worker's previous earnings. Social Security reduced living expenses, and, yes, savings are supposed to make up the rest. A federal employee with thirty years' service will typically receive 56 percent of the average salary for his last three years on the job, congressmen 80 percent. All of it is fully indexed, of course (although the Congress did, this summer, limit indexing for retirees under the age of sixty-two, on the theory that most of them were holding other jobs). Federal retirees receive more in pensions than retirees from all private businesses combined.

The pension plans of private businesses usually require the worker and his firm to invest, in varying proportions, the resources that will pay dividends during retirement. Federal pension plans don't come close to doing so. The largest contributions come neither from the workers nor from the agencies that employ them but from general federal funds. Patrick Owens reported in *Newsday* that in 1980, federal workers and their agencies contributed a total of $3.6 billion toward their retirement funds. The Treasury contributed an extra $11.9 billion. The unfunded liabilities of the federal retirement systems—the commitments made to workers but backed by no investment or trust fund—now amount to some $1 trillion, roughly as much as the entire national debt. According to Hastings Keith, unfunded liabilities average $149,000 *per person* in the military, $173,000 in the civil service, and $530,000 in the foreign service.

The generosity of federal pensions is a legacy of the 1920s, when federal pay was poor. For the past twenty years, the federal government has embraced the principle of "comparability," offering salaries comparable to those in business. Why should the principle not extend to pensions as well?

"Integrating" federal employees into Social Security would ultimately mean more generous benefits for low-paid federal employees, especially those who do not work for the government long enough to earn pension rights, since they would be able to count their years in government service toward their Social Security benefits. At the other end of the scale, it would mean an end to the windfalls now available to "double-dippers": government employees who, having qualified for pensions while still in their late forties or fifties, take private jobs and become eligible for Social Security as well. Robert Myers, a former chief actuary for Social Security who now directs a presidential commission on Social Security, which will recommend reforms for the system this winter, contends that three quarters of all retired government workers are either receiving a second pension or are working in a job that will qualify them to do so.

A few groups of federal employees have already set an example that might be widely emulated. The retirement plan for the Tennessee Valley Authority has since the 1950s been integrated with Social Security, like most private pension plans; it does not count military service toward its pensions; it applies its disability standards more strictly than does the civil-service retirement system; and it discourages early retirement. Except for the provisions for early retirement, it offers benefits comparable to those of other civil servants; yet, unlike most other systems, it is actuarially sound. The Federal Reserve pension plan and a few others operate on similar principles.

The logic of comparability also suggests a change in military pensions. Career soldiers can now retire on half pay after twenty years of service, or three-quarters pay if they serve for thirty years. (Members of the military are also eligible for Social Security.)

The demands of military duty obviously differ from those of any other work. But the twenty-year career costs a great deal while adding very little to our national defense. Gradually converting the military to a thirty-year career might mean increasing active-duty pay, especially for the sergeants and petty officers who are now the services' scarcest resource. In the long run, this would probably cost less than adding to the mountain of unfunded pension liabilities; and by reducing many officers' sense that their military duty can be only a "first career," it might well enhance the services' integrity.

Yet all such reforms take us only so far. No matter how we might crack down on the retired colonels and GS–15s, it will not make much more difference in the entitlements budget than cracking down on welfare mothers would. Our national accounts will remain out of balance until we wrestle with the IOUs that middle-class America has issued to itself, through Social Security and Medicare. The two awesome challenges of the entitlements are to control medical costs and to re-examine our notion of who "needs" public help.

The budgets for Medicare and Medicaid, in their leaps to the sky, reflect the same pressures that are driving Blue Cross premiums and personal medical bills up and up. Tinkering with the government programs is the minor solution to this problem; the major one is changing incentives in the medical system. In forcing this issue to the center of political attention, the entitlements mess may indirectly do some good.

One political camp, exemplified by Senator Edward Kennedy, contends that the government can never contain medical costs unless it controls the medical system. To that end, Kennedy has tirelessly pushed for a nationwide, largely publicly financed, centrally planned approach to health care. The opposite view, espoused by David Stockman in his days in the Congress, holds that rising medical costs reflect imperfections in the medical market. The answer, therefore, is to unleash market forces through more competition.

Of the two views, Stockman's seems more in harmony with the politics of the time. The Reagan Administration plans to unveil a new medical-reform scheme, emphasizing "market force," about the time of the President's State of the Union address next January.

The logic of the market means encouraging the pre-paid medical plans known as health-maintenance organizations. It also means—though this may or may not be a feature of the President's plan—removing some of the padding that now protects the typical patient from his medical bills. Economists lament "third-party" payment schemes, whether run by Blue Cross or by the U.S. government, because they blunt the instinct for frugality that is so powerful when one's own money is at stake. When the patient can pass the bill to someone else, why should he worry about unnecessary tests? Why should he wait two weeks for an appointment at the doctor's office when he can use the hospital emergency room as a clinic? He will ultimately pay the bill, of course, through higher taxes or insurance premiums; but the market functions poorly when its messages are so long delayed and so weak.

One government economist, who chooses to remain unnamed, has taken reliance on the market a radical step further. Medicare's biggest economic problem, the economist argues, is the last-resort measures taken before an elderly patient's death, which dwarf the costs of previous care. When patients and their families decide how hard the doctors should fight, and with what machines, finances do not color the deliberations, because Medicare covers nearly all hospital fees. The economist argues that when such a patient dies, his estate should be tithed to recover a share of his "Medicare profit"—the difference between the premiums he has put into the system and the benefits paid on his behalf. This, the argument continues, would repair the social contract between the generations. It would also build into individual decisions the same realities that the nation faces, as high-priced medical possibilities grow more rapidly than resources.

This may seem a ghoulish suggestion, as its author is aware, but when public leaders dismiss out of hand, the possibility of questioning the rules, even though those rules lead straight to bankruptcy, are a few ghoulish thoughts so much more dangerous then the conventional wisdom? Whether or not this specific proposal is workable, the spirit behind it is constructive, because it demonstrates a willingness to think of new ways out of a predicament.

The main idea waiting to be spoken is that people have different claims on public support. Yes, there are cases in which the state bestows its benefits equally on all. The children of rich and poor alike should be entitled to schooling at public expense. But to extend that logic to pensions and subsidies leads to commitments beyond our national means. The people who really need help need more than they are now getting. If they are to have it, other people must have less.

In the case of medical care, there are certain obligations that the state should assume on everyone's behalf. Any burn victim, to choose one example, should be entitled to the best care that is available, regardless of the cost. But there are other obligations that the nation cannot assume,

simply because there would never be enough money to pay for them. Medical technology now offers answers to many of mankind's universal complaints. Corneal surgery can eliminate much of the need for eyeglasses. Joints can be rebuilt, arteries reamed, gums surgically lifted and the underlying bone scraped to remove plaque. We all "need" such services, but if all these innumerable repairs to all parts of all bodies were carried out, the cost would rival the gross national product.

How, then, can we decide where to draw the line? One way is to ask each patient to share more of the cost, giving him a stake in the decision about costly care. But if that is done without recognizing the differences in economic need, it will deny some people a more basic level of medical care.

A twenty-dollar physician's fee, or a $500 deductible for hospitalization, would mean quite different things to a retired couple with pensions and dividends of $30,000 and a widow surviving on $4,000 from Social Security. For the one, it would mean some sacrifice; for the other, denial of care. Yet our retirement plans, in their magnificent evenhandedness, treat the poor widow and the well-off couple the same. When we provide for some, we must provide for all. If we change the rules so as to balance the budget, we revoke the widow's right to treatment. But if we do not, we lose control of our financial future.

The original genius of Social Security was precisely that it did treat everyone the same. No one need feel humiliated by accepting its benefits, because it was not welfare. Everyone was included in the plan. As a political ideal, this is most attractive; but, in Social Security as in Medicare, it may simply have become too costly to sustain.

Consider two of the major proposals for bringing Social Security's commitments into line with its resources. One is to raise the retirement age, in recognition of medical improvements and demographic shifts. Raising the retirement age to sixty-eight by the end of this century would keep the average time in retirement one quarter as long as the average adult life-span—the same balance that has prevailed for the past few years. Another proposal is to hold down the automatic increases in Social Security and other benefits, perhaps by gearing them to the Consumer Price Index or the average increase in wages, whichever was less in a given year. If wages rose faster than prices, the buying power of the pension would be fully protected. If the reverse, people of all ages would share in the sacrifice of a less productive economy. (The CPI will, in any case, soon be revised to eliminate the housing-cost bias.)

But if changes like these were applied "fairly," with equal effect on all, the results would be unfair. Some people need the payments; others do not.

To speak of "the aged," or "Social Security recipients," as one homogeneous group no longer makes sense. As recently as twenty years ago, it did. Those above sixty-five were then an economically distinct group. Like black Americans or single women heading households, they were on the whole poorer than other people. The economic differences within the group were less important than the gap between them and the American norm. To air a program at all retired people not only made political sense, in avoiding the taint of welfare; it also made economic sense, for it transferred money to people in need.

That has changed. Older Americans are now economically very much like their children's generation, and their grandchildren's. Michael Hurd and John B. Shoven, of the National Bureau of Economic Research, have reported that the per capita income of people over sixty-five is now higher than for the population as a whole. In 1978, it was 121 percent of the national norm. Two thirds of all people over sixty-five own at least one home.

As the differences between the generations have diminished, the differences among older people have grown more acute. On average, those above sixty-five enjoy parity with those below; but the average conceals many retired people who are desperately poor. About a fifth of all retired couples have incomes above $24,000; but of the 5.8 million single women sixty-five or older, fully half have incomes below $5,000. As the world works, the wealthiest couples generally receive the highest Social Security benefits (because they earned more when working) but depend on them least. For the couples making more than $24,000, the comparatively large Social Security check represents about one sixth of their income. For the poorest elderly women, their smaller check is more than 80 percent of their total support.

Can it be fair to treat these people "equally," to hold the widow's $300 a month and the couple's $900 a month to an "even" 5 percent increase? Only a perverted sense of fairness is thereby honored; yet it is this kind of equity that our evenhanded entitlement policy now serves.

In practical terms, the solution might be to provide a full cost-of-living adjustment for only a certain portion of Social Security benefits—say, the first $500 a month. A more significant step might be to make Social Security benefits subject to federal income tax. The automatic workings of the IRS are administratively far simpler than any other means for concentrating scarce resources on people in need. Social Security is already subject to a tax of sorts—the "earnings test," which reduces benefits by $1 for each $2 a recipient earns above $6,000 per year. (The limit is $4,400 for those under the age of sixty-five.) But the test does not apply to people above the age of seventy-two, and next year the age will fall to seventy. More important, it applies only to earnings, from jobs, and not to investment income or other pensions, which are the major source of income for the most affluent older people.

Yet to tax Social Security would be heresy: that attitude is nearly universal, its emotional and political power a legacy of the era when we could effortlessly afford to treat everyone "equally." As I have tried to suggest, that era has ended, but adjusting our assumptions takes time. The only political proposition more challenging than taxing Social Security would be carrying the logic to its next step, and asking why there should be extra exemptions on Form 1040 for everyone over the age of sixty-five. Since older Americans are, on the whole, economically even with everyone else, why are the exemptions necessary? And since they transfer money to the wealthiest members of the group (those who pay taxes) and do little or nothing for the poorer 50 percent, how can they be defended?

We are understandably reluctant to face seemingly mean-spirited questions such as these. Yet our reluctance helps explain why the entitlements have grown so large, and why we seem so powerless to control them. We are also hindered by a widespread misunderstanding of where most people stand on the economic pyramid, and who should therefore be "entitled" to help. A family whose income is in the mid-$30,000s is part of the richest 20 percent of all Americans. A family in the mid-$50,000s is in the upper 5 percent. Yet most such people would be horrified to think that they were anything but "middle class," entitled to public help in financing their homes or sending their children to school and to the rewards of a lifetime of work in the form of monthly Social Security checks. As individuals, they undoubtedly deserve help; but if all of us are entitled, where will the money come from?

The entitlements problem has forced such questions upon us. The cost of ignoring them is not simply the obvious—the automatic growth of federal spending—but also the subtle destruction of other public goals. This effect transcends ideology. It matters little whether you want to improve education for all children, or build more aircraft carriers, or lift the burden of taxation from the shoulders of America's entrepreneurs—all causes are in jeopardy as long as more and more of us are "entitled" to support from everyone else.●

TWO-YEAR BUDGET AND APPROPRIATION PROCESS

● Mr. FORD. Mr. President, for the sixth consecutive time, we have reached the end of a fiscal year without having completed all of the annual appropriation measures we should have enacted. Unless we soon decide to adopt a 2-year budget and appropriation cycle, it appears we are doomed to Government by continuing resolution. This is a most shoddy, inefficient, and expensive means of operation.

As the Senator from Arkansas (Mr. PRYOR) said on the Senate floor, "the continuing resolution concept is an abdication." He pointed out that 85 percent of all the appropriations bills for the past 20 years have been passed after the start of the succeeding fiscal year.

During the discussion of Mr. PRYOR's amendment to the continuing resolution, I observed that our current difficulties with the continuing resolution are largely attributable to our 1-year appropriation cycle. For these reasons I suggest we change to a biennial system. Today I would like to speak in more detail about why I believe we must go to a 2-year budget and appropriation cycle.

While avoiding hastily passed continuing resolutions and enlarging the timespan for consideration of regular budget resolutions and appropriations bills are compelling justifications for switching to a 2-year budget cycle, there are other equally worthy reasons to change.

The uncertainties concerning budgetary decisions which confront State and local government officials each year can be substantially reduced if not totally eliminated. Today, as in most recent years, it has become impossible for State and local governments to know what part Federal

funds will play in their spending plans until long after the fiscal year has begun.

If the Federal Government goes to a 2-year budget, not only will there be more time for analysis and decisionmaking on the important spending issues, there will also be more time for the authorizing committees of Congress and the executive branch to conduct meaningful and constructive oversight of ongoing programs. The time available for consideration of new policies and programs will lengthen, with predictably good results.

Taking the frenetic haste out of the budget process will not only make for better spending decisions, but the longer budget cycle should bring some stability and discipline to our economy and contribute to achieving the goals of balanced budgets and reduced inflation.

Mr. President, the 2-year budget idea is attracting more and more supporters. I believe the time has come for calm in the eye of the storm.

It is certainly not for lack of effort that the appropriations bills and the second budget resolution have not been passed. It is certainly not for lack of interest. Indeed, the interest and the effort are so intense and so all consuming that little is ever accomplished in the annual budget process.

To what purpose do we continue this frenzy? Do we think that the spectacle of furious action and the excitement of round-the-clock sessions are satisfactory substitutes for insuring the orderly operation of the Government of this great Republic?

Mr. President, it has taken us a long time to recognize the need for a 2-year budget. The annual appropriation process was not working well before 1974, and the additional requirements of the Congressional Budget Act in that year only made matters worse. I believe we need more time to meet the requirements of the Congressional Budget Act and enact the 13 regular appropriations bills.

At the first opportunity in the new Congress, I shall reintroduce legislation to establish a 2-year appropriation cycle. A 2-year cycle will enable us to logically consider appropriations bills, insure better fiscal and spending decisions, allow a more realistic time period for our legislative oversight duties, provide more certainty and security to the financial planners in the 50 States and generally improve the overall operations of the Federal Government. I hope to have the support of my colleagues on this measure. I believe the 2-year budget is a vital time-saving step.●

COMBINED FEDERAL CAMPAIGN ANNUAL FUND DRIVE

● Mr. DENTON. Mr. President, I rise today in support of the Combined Federal Campaign's annual fund drive. The 1982 season extends throughout the months of October, November, and December. The Senate's fund drive, held November 15–19, is estimated to have collected approximately $65,000, an increase of $13,300 over last year's contribution. I must point out, however, that only 12 percent of the employees of the Senate participated in this year's campaign. Although I am pleased with this display of voluntarism by my colleagues and their staffs, I hope that next year there will be a substantial increase in the number of persons contributing.

The CFC was established in 1956 to consolidate the collection of contributions from Federal and military employees. Its formal inception was in 1961 with Executive Order 10927 signed by President John F. Kennedy. During the past 15 years, contributions to the CFC have increased by nearly 600 percent. It is projected that, when total receipts are counted, the 1981 drive will have collected approximately $93 million.

In my own State of Alabama, Federal military employees contributed $1,369,490 during the 1980 season. It is projected that the 1981 total will be over $1.5 million. I am confident that, even at a time when so many Americans are out of work, my fellow Alabamians will maintain the spirit of voluntarism and concern for our fellow man that sets our country apart from all others.

As we in the Senate attempt to meet unlimited needs with limited means, we must come to the understanding that voluntarism is not merely a great tradition within our society, but that contributing to the voluntary health and welfare agencies of our country serves to compliment the efforts of the Goverment to help all of our people meet basic human needs. The best way that the needs of every American can be adequatly met is through sharing in a spirit of charity and love.

I hope that the CFC's annual fund drive of 1982 will provide increased funding to support the efforts of private health and welfare organizations to meet the needs of the people of this country.●

CLINCH RIVER—OUT OF FUEL

● Mr. HUMPHREY. Mr. President, on November 30, and December 6 and 7, I entered into the RECORD material concerning the high costs of constructing and operating the Clinch River breeder reactor project. Today I would like to examine a new difficulty with the project—by the Department of Energy's (DOE) own accounts there is not enough plutonium available to fuel it.

The first indication that there would be difficulty fueling the project came last year in March in testimony Dr. Charles Gilbert, Acting Deputy Assistant Secretary for Nuclear Materials gave before a House Armed Services Committee hearing. At that time Dr. Gilbert stated that DOE probably would run short of fuel-grade plutonium by the late 1980's.

Rather than use all of this lower purity plutonium to fuel Clinch River and other breeder work, DOE is now blending it with very pure supergrade plutonium to produce materials suitable for modernizing our aging nuclear weapons force. If Clinch River is to stay on track and stay within current cost estimates, though, DOE must begin fueling the reactor in 1987 with an immense amount of plutonium. Indeed through 1986 when the reactor is supposed to be sold, the project will require 10,296 kilograms of plutonium. This amount, if blended with supergrade plutonium could produce from between 2,500 to 5,000 warheads and would go a long way to relieve the current pressure to build a new military production reactor under a crash deadline, as recently reported in the Washington Post.

Clinch River's supporters, however, insist that the plutonium is readily available. In its latest report on Clinch River, the General Accounting Office [GAO] concluded otherwise. The GAO examined four possibilities—taking the plutonium from the military stockpile and trying to return it from material bred in Clinch River, reprocessing light water reactor spent fuel in a commercial facility, reprocessing light water reactor fuel at military facilities, and buying foreign plutonium. None of these options, according to GAO, will be able to provide plutonium early enough to meet DOE's Clinch River fueling schedule. Indeed, Ken Davis, former Deputy Secretary of Energy said as much on September 9, 1982, when he testified before the Senate Subcommittee on Energy, Nuclear Proliferation, and Governmental Processes. He emphasized that we do not have enough plutonium stockpiled to run Clinch River if it is built.

DOE's Assistant Secretary for Nuclear Energy and Deputy Assistant Secretary for breeder reactor programs, though, gloss over this point. In their latest breeder publication, National Breeder Reactor Program Rationale and Clinch River Project Facts, they talk about returning plutonium to the military stockpile even though this cannot be done without breeder reprocessing plant, the completion of which is at least another decade away.

This omission is disturbing. Dr. Gilbert's testimony, the pertinent sections of GAO's latest report on Clinch River and DOE's National Breeder Reactor Program Rationale and Clinch River Project Facts, and the Washington Post article on the need for an additional military production reactor

make it clear that a serious fueling problem exists. Mr. President, I ask that the texts of these materials be entered into the RECORD.

The material follows:

Statement of Dr. F. Charles Gilbert, Acting Deputy Assistant Secretary for Nuclear Materials, Department of Energy, made before Hearings on H.R. 2969, Department of Energy Authorization Legislation (National Security Programs) for Fiscal Year 1982 before the Procurement and Military Nuclear Systems Subcommittee of the Committee on Arms Service, House of Representatives, Ninety-Seventh Congress, First Session, March 2, 4, 5, and 9, 1981 (H.A.S. No. 97-2), p. 156.

". . . Fuel-grade plutonium is required for blending with higher purity plutonium to produce more weapon-grade material, for the breeder program including the Clinch River Breeder Reactor (CRBR), and for basic research and development programs, primarily the Fast Flux Test Facility. A potential fuel-grade plutonium shortage may occur in the late 1980s based on the current projected supply and demand situation. As indicated in the chart, even with the Purex plant processing of plutonium from N Reactor fuel, DOE would not have sufficient supplies of fuel-grade plutonium required to support all these programs. The CRBR requirements shown in the chart are based on startup of the reactor in 1988. If that schedule is to be maintained, it will be necessary either to decrease requirements for the other two noted programs or to attempt to find an alternative source of plutonium."

ANALYSIS OF THE DEPARTMENT OF ENERGY'S CLINCH RIVER BREEDER REACTOR COST ESTIMATE

COST AND SOURCE OF PLUTONIUM UNCERTAIN

DOE's Office of Nuclear Material Production, which is under the Assistant Secretary for Defense Programs, is responsible for meeting the Government's plutonium requirements. Defense program officials are unable at this time to identify the specific source or cost of plutonium needed to fuel the CRBR's demonstration operations. Instead, these officials believe that, based on the current CRBR schedule with initial criticality in September 1989, a decision on the source of plutonium for the CRBR will not be required until 1986. At that time, they expect to have definitive plutonium cost estimates.

DOE's defense programs officials said that the plutonium needed for the CRBR can be provided from a number of different sources, including defense programs activities, reprocessed light-water reactor spent fuel, and/or foreign sources. According to these officials, the costs associated with each of these sources not only vary widely, but also in some cases, are highly speculative.

Currently, the only domestic source of plutonium is from DOE's defense programs activities—either existing plutonium inventories, future production, or a combination of both. Depending on whether the plutonium is taken from existing inventories or from production, the value of the plutonium needed for the 5-year CRBR demonstration could range from $143 million to $1.2 billion.

Defense program officials point out, however, that they expect the quantity of plutonium supplied the CRBR will eventually be returned to the defense program. In their view, the only cost to the Government and CRBR would be the cost associated with reprocessing the spent fuel assemblies as the necessary step in recovering the plutonium. Based on defense programs officials' estimates, such reprocessing would cost from $196 million to $261 million for the 5-year demonstration period.

This approach does not recognize that a provision in the NRC Authorization Bill for fiscal year 1982 and 1983 (H.R. 2330), now under consideration by the House-Senate Joint Conference Committee, might have a substantial impact on the planned transfer of plutonium produced by the CRBR to defense program uses. This bill would prohibit the use of plutonium from NRC-licensed facilities in the manufacture of nuclear explosives. CRBR will be an NRC-licensed facility. Defense program officials feel, however, that this provision will have little impact on the return of defense-supplied plutonium. They believe that if the fuel supplied to CRBR was produced at a defense facility, the fuel returned from CRBR still should be considered as plutonium produced at a defense facility. We have not, as part of this review, analyzed the legality of DOE's position concerning the return of CRBR plutonium for defense purposes.

According to defense program officials, the plutonium for CRBR could also be obtained from reprocessed light-water reactor spent fuel assemblies. These officials estimate that plutonium obtained this way could range in cost from $15 per gram to $35 per gram. That cost range, however, is extremely speculative. It is based on DOE 's preliminary estimates of prices they think could be negotiated for domestic reprocessing services.

In this regard, a commercial capability to reprocess light-water reactor spent fuel does not now exist in this country. Although several reprocessing facilities are being considered, no decision has been made, and it is unclear whether those facilities could be available to meet the CRBR project schedule and plutonium requirements. DOE's existing defense program reprocessing facilities cannot recover plutonium from breeder fuel assemblies because of physical and chemical process limitations. DOE has requested $5.6 million for conceptual design efforts to modify one of its reprocessing facilities to enable it to reprocess spent fuel from light water reactors, the Fast Flux Test Facility[1] and the CRBR. DOE's preliminary estimates indicate the modification could be operational by fiscal year 1989 if the project is authorized by the Congress.

Another option under consideration includes a demonstration size fuel reprocessing facility. DOE's Consolidated Fuel Reprocessing Program is a comprehensive, centrally managed program for all U.S. fuel reprocessing research and development. According to DOE's Director of Nuclear Research and Development, Oak Ridge Operations Office, since 1976, the focal project for reprocessing research and development has been DOE's "Hot Experimental Facility." In June 1981, a conceptual design study for the Hot Experimental Facility was completed. This facility, however, does not have congressional authorization nor has it received construction funding. The Director estimates it would require about 10 years from start of construction to achieve normal operations.

[1] The Fast Flux Test Facility is the LMFBR test reactor built for testing fuels, materials, and components. It has no capability of generating electricity nor is it intended to demonstrate the breeding of plutonium fuel.

[From the Washington Post, Nov. 20, 1982]

NEW ATOM PLANT FOR WEAPONS MATERIAL URGED

(By Milton R. Benjamin)

A Department of Energy advisory panel has recommended construction of a $4 billion nuclear reactor at the Savannah River Plant in South Carolina to produce the tritum needed to increase the nation's stockpile of hydrogen warheads, it was learned yesterday.

The proposed government plant—a larger, higher-powered version of existing reactors at Savannah River that produce all the plutonium and tritum used in America's nuclear weapons—would be the first new reactor built for the U.S. military program in more than two decades.

The advisory panel, which submitted its classified report Monday to Energy Secretary Donald P. Hodel, said that after evaluating the adequacy of future supplies of tritium and plutonium, it agreed with earlier studies that concluded a new production reactor is needed "to assure an adequate supply of strategic nuclear materials in the 1990s and beyond."

The increased need for tritium, a radioactive gas used in thermonuclear weapons, stems in part from U.S. plans to build thousands of new warheads for the MX, Trident and cruise missiles. It also is needed for the neutron warheads that will replace older tactical atomic warheads. In addition, because the isotope decays, the tritium in existing warheads periodically must be replenished.

Hodel, whose department is in charge of all of the facilities that produce materials for nuclear weapons, is expected to act on the panel's recommendation by March 1, an Energy Department spokesman said yesterday.

If Hodel approves the recommendation, funds for initial planning would be added to the Energy Department's fiscal 1984 budget request, a source said. If funds are approved, construction of the reactor would begin in 1985.

In recommending construction of the ZEPHWR (zero electric power heavy-water reactor) at the Savannah River Plant, the special advisory panel headed by former atomic energy commissioner T. Keith Glennan passed over all six reactor types and three alternative sites that had been proposed by the Energy Department.

These included a proposal that the Energy Department take over a partially completed commercial atomic power plant in Washington, where the utility spent $804 million before terminating construction, and convert this reactor to the production of plutonium and tritium.

The panel said it decided this proposal involving the Washington Public Power Supply System (WPPSS) reactor was the least desirable because of "the potential for adverse public perception of converting a plant designed for commercial production of electricity to production of weapons material."

The advisory group also cited concern "over use of commercial technology to produce weapons material" in strongly advising against construction of a pressurized light-water reactor that would be virtually identical to many of the atomic powerplants operating in this country and overseas.

The panel also rejected the option of constructing the new tritium production reactor at the Nevada nuclear weapons test site,

noting that the underground test conducted there raised "safety questions" involving earthquakes.

Glennan said in a telephone interview yesterday the panel felt constructing a new reactor similar to those that have been operating at the Savannah River Plant since the 1950s was the best way to meet the objective of producing needed materials on a timely basis.

"Essentially, you have a reactor that has been proven over many, many years, and the Savannah River Plant is operated by an enormously reliable contractor, Du Pont," Glennan said. "Those factors played a major part in our decision."

Of the five production reactors built by Du Pont at the Savannah River Plant in the 1950s, three produce plutonium and tritium for the weapons program, and a fourth—which was shut down in 1968—is being refurbished and is scheduled to be put back into operation next September. The fifth was shut down in 1964, and there are no plans to reactivate it.

The panel said if the administration decided it was essential that the new production reactor generate as a byproduct electricity that could be sold to a local utility, it still would recommend that such a plant be built at the Savannah River Plant site and that it be similar to the reactors already operating there.

The group said if the administration felt it was "essential" that the nation's entire production of tritium for hydrogen warheads not be concentrated at one location, it would recommend that a replacement for the aging N-reactor be built at Hanford, Wash.

The Hanford Reservation was the site of all the plutonium production for America's atomic weapons program during the 1940s. At one point, nine production reactors were operating there. But all have been shut down for over a decade except for the N-reactor, which in recent years has been largely used to produce fuel-grade plutonium for the Energy Department's breeder research program.

NATIONAL BREEDER REACTOR PROGRAM RATIONALE AND CLINCH RIVER PROJECT FACTS

CLINCH RIVER FUEL

The Clinch River fuel is a mixture of the oxides of uranium and plutonium. The uranium and plutonium required for fuel for the Clinch River project is to be supplied by the Department of Energy (DOE).

The uranium will come from the depleted uranium in DOE's stockpiles. This depleted uranium is the waste from the enrichment process: natural uranium contains 0.7 percent uranium-235, which is enriched leaving the depleted uranium. DOE currently has 24,000 cylinders, each containing 10 to 14 tons of depleted uranium, in storage at various locations.

DOE's Defense Programs is responsible for meeting the Government plutonium requirements. That office has traditionally provided plutonium at no charge to DOE's breeder program. The CRBRP currently plans to obtain plutonium from DOE's stockpiles. The amount of plutonium that will be used as fuel in Clinch River during the 5-year demonstration period is about 5.2 million grams of plutonium. This plutonium will be drawn from DOE's stockpile between 1987 and 1993. Because there will not be any net loss of plutonium and because DOE will retain possession of the plutonium, it is inappropriate to include plutonium as an element of the cost estimate.

The Clinch River powerplant will produce about 430 kilograms of plutonium more than it uses during the 5-year demonstration period. However, DOE has not elected to take credit for the value of this plutonium in the Clinch River cost estimate.

There are no firm plans at this time with respect to reprocessing Clinch River fuel assemblies. A number of alternative possibilities are being considered including the Demonstration Reprocessing Plant.●

PERIODIC PAYMENTS SETTLEMENT ACT

● Mr. DURENBERGER. Mr. President, the conference committee report on H.R. 5470, the Periodic Payments Settlement Act, has been cleared for action and deserves our immediate consideration. A provision of this bill that I added in the Finance Committee is especially important to me and to the many families who, every day of the year, open their hearts and homes to special children.

My provision excludes from gross income the difficulty of care payments foster parents receive for handicapped children. These payments are over and above the reimbursement for expenses paid to foster parents. While the expense reimbursements are not subject to taxation, the additional difficulty of care payments coud be includable in taxable income.

These payments average about $4 per day, although some run as high as $20 per day. The difficulty of care payments recognize the additional expenses incurred in caring for a handicapped child—extra laundry, transportation, special equipment, specially trained babysitters, just to name a few.

This provision is nothing more than commonsense. Yet, at every step in the legislative process it has faced a roadblock that has threatened to end its chances for passage. All the while, in Minnesota the Internal Revenue Service has on hold a number of audits of foster parents and other families are left uncertain as to whether their kindness and love will result in a tax burden that is unbearable for many.

Maybe it is only because I care so deeply about this bill that I feel so frustrated. I feel like I have pulled the difficulty of care provision back from the brink so many times that it has become like the proverbial cat who has lived through eight of nine lives.

The first opportunity to introduce my provision in the Finance committee did not come until late September. When it passed there, we were only days away from the October recess. Fortunately, my request to waive the usual layover period was granted and the Senate passed the bill on October 1—the very last day before going into recess.

In the House, the process has been equally laborious. Thanks to Representative BILL FRENZEL in particular, the provision was passed by the House earlier this month.

Unfortunately, that was not the end of this provision's struggle. Even though both the House and the Senate conferees on H.R. 5470 agreed to the difficulty of care provision, an unrelated disagreement threatened the entire legislation.

BILL FRENZEL and I worked hard to reach a compromise on the dispute and, with the understanding and help of many of our colleagues, succeeded.

Now, we are in the closing hours of the 97th Congress. Despite the hours of work by myself, people like BILL FRENZEL, the foster care families and several organizations, we still have not rescued this provision from yet another brink.

Mr. President, we in Congress know that most issues are not black and white; rather, they are shades of gray. The difficulty of care provision, though, is one issue that is a matter of simple justice. Anyone who knows anything about the foster care parents who are carrying the burden of our inaction understands how important it is that we favorably consider this provision and do it today.

I urge my colleagues—I plead with my colleagues—that we act favorably and immediately on this conference report. That is the right thing to do; it is the fair thing to do.●

ECONOMIC REALISM IN EAST-WEST TRADE

● Mr. GARN. Mr. President, the dean of the Rand Corp.'s graduate school, Dr. Charles Wolf, Jr., recently gave a presentation that deserves the attention of all who must deal with questions of East-West trade, which would include all of my colleagues in the Senate and House of Representatives. For too long, Western trade with the Soviet bloc has been conducted on an economically irrational basis. Real Western subsidies to the Soviet bloc through trade alone have totaled between $1 billion and $2 billion annually.

Dr. Wolf presents three rules that should govern our economic relations with the Soviets and their allies, principles which I also have often advocated. They are as follows:

1. No loan guarantees or export insurance should be available to Western lenders or investors engaged in transactions with the East unless these guarantees are extended without direct or indirect government underwriting (of the types provided by government and quasi-government agencies in West Germany, France, the U.K., and the U.S., in the past).

2. No concessionary interest terms should be available to either government or commercial borrowers in Eastern Europe or the Soviet Union. The minimum criterion for implementation of this rule should be that interest rates applying to loans to Eastern

Europe and the Soviet Union should not be less than the highest rates charged to domestic or other foreign borrowers on loans of equivalent duration.

3. No preferential tax treatment should be accorded to either individual or corporate income derived from transactions with Eastern Europe or the Soviet Union. (For example, the preferential tax treatment extended under the Domestic International Sales Corporation Program in the U.S. would have to be modified to comply with this rule.)

Mr. President, these are rules that we can begin applying in our relations with the Soviet bloc today while at the same time encouraging our allies to follow suit. They are no more than sound economics. That is our strength. By pursuing sound economics in East-West trade, the Soviets will eventually be faced with the choice of making reforms in their system or being left far behind. As Dr. Wolf indicates:

Such a policy will shrink the possibilities open to the Soviet Union for reconciling continued expansion of its military capabilities with the competing demands of consumption, investment, and economic growth at home, and of its expanded empire abroad.

Mr. President, I ask that the statement by Dr. Charles Wolf of the Rand Corp. be included in the RECORD at this point, and I urge my colleagues to give it close study.

The statement follows:

STATEMENT OF CHARLES WOLF, JR.[1] BEFORE THE WORKSHOP ON EAST-WEST ECONOMIC RELATIONS

Mr. Chairman, members of the Committee and of the Congressional Research Service of the Library of Congress, I want to express my appreciation for this opportunity to discuss further with you some of the matters on which I testified before the Committee in August, 1982.

At the outset, I would like simply to note that sensitive and controversial policy issues, such as the one we are addressing in this workshop, often elicit from putative experts a mixture of genuine expertise—that is, facts, analysis, and knowledge—combined with opinions, personal preferences, and political sympathies. Moreover, the proportions of these ingredients are sometimes not evident to the audience, and occasionally not even to the experts themselves. Part of the reason, I think, is that the "bottom line" on the issue of East-West economic relations relates to beliefs about Soviet behavioral responses that really have quite fragile analytical underpinnings. None of us is truly expert on Soviet behavioral responses, and I think it is fair to say that genuine expertise on the Soviet economy, or on international trade and finance, provides very little basis for prescience in judging prospective Soviet behavior. Instead, in judging Soviet behavioral responses, what we tend to fall back on are our own tacit premises about the nature of the Soviet system and the Soviet decisionmaking process, and the connection between decison-making with respect to Soviet domestic policies on the one hand, and Soviet foreign and defense policies, on the other.

My own views on these fundamental, but elusive matters will, I hope, become clearer as I proceed, and clearer still in the discussion which follows.

The following remarks will cover four separate points: First, European perceptions of the period of detente, and of its relationship to East-West commercial transactions.

Second, a set of specific "rules of the game" for conducting East-West economic relations in a manner that reduces or removes the pervasive subsidies that have supported those transactions in the past.

Third, I will consider and rebut two arguments that are often made against imposing rules and restrictions of the sort I have proposed: (1) the argument that this would constitute "economic warfare," and hence should be eschewed; and (2) that unilateral observance of these restrictions by the U.S. would be ineffectual, and multilateral observance by our allies is implausible.

And, finally, I will conclude with a few comments about the probably limited, but not negligible, effectiveness of the sorts of restrictions I have in mind.

I. EUROPEAN AND AMERICAN PERCEPTIONS

It is a mistake to think that our European allies are of one mind, or that they speak with one voice on these matters, any more than Americans do. Nevertheless, there are, by and large, sharp differences between the median or average views of our European allies, and most of us in the United States, in our respective evaluation of the results of détente, and of the role of expanded East-West economic relations in contributing to détente. Our European allies look at the world through lenses that focus on quite different experiences from those that occupy the center of our field of vision. For example, the Europeans see and commend the emergence of Solidarity in Poland *prior* to December 13, 1981, the development of decentralized, market decisionmaking in the Hungarian economy, and the seeming independence of Rumania's foreign policy. Our allies, especially the Federal Republic of Germany, also see the humanitarian as well as the political benefit of reuniting 200,000 German families previously separated by the barriers between the FRG and East Germany.

Moreover, our European allies see this as having come about while they have conducted only a relatively modest volume of trade with Eastern Europe and the Soviet Union, amounting to less than five per cent of Western Europe's total external trade. They also see the clear signs of weakness and the declining prospects of the Soviet economy, reflected in its low and decreasing rate of growth, declining productivity, increasing capital-output ratios, repressed inflation, and labor shortages. Finally, from this evidence our European friends infer, perhaps wishfully, that the Soviet Union is likely to be preoccupied with its own problems, and may not really be such a serious threat and adversary, after all.

By contrast, I think most of us in the United States see a different set of consequences of détente. We see instead a tremendous buildup of Soviet military power, both nuclear and conventional, and naval, air and ground forces; a rate of growth in Soviet defense spending throughout the past decade somewhat greater than the rate of growth in Soviet GNP; and a level of Soviet military investment many times larger than our own.

We also see the Soviet invasion of Afghanistan in 1979, the imposition of martial law and the repression of Solidarity in Poland *after* December 13, 1981, the continued expansion of the Soviet empire in Angola, Ethiopia, South Yemen, Laos, Cambodia, and Nicaragua, and the adroit deployment of proxy forces with very substantial Soviet military and other support to accomplish this expansion. We also note the tremendous growth of debt owed to the West by Eastern Europe and the Soviet Union, amounting to over $80 billion, of which three-quarters is owed by the Eastern European countries. And we worry that this debt makes our European allies hostage to Soviet influence and pressure. Moreover, we see the limited, as well as short-lived, reactions of our European friends to the Soviet invasion of Afghanistan, and to repression in Poland, as confirmation of precisely the sort of hostage behavior we have been concerned about.

In sum, the countries of Western Europe—by and large, and with some differences among and within them—look favorably upon détente and its fundamental, underlying premise concerning the salutary effects to be expected from expanded economic relationships. They conclude that this premise was valid and useful in the 1970's, and remains applicable in the 1980's.

By contrast, we in the United States—by and large, and also with some differences among us—have concluded that détente and its premise "has been weighed in the balance and found seriously wanting." We have concluded that we should envisage major changes in our relations with the Soviet Union in general, and in our economic relations in particular. We have concluded that the policy of seeking to influence and moderate Soviet behavior by encouraging expanded economic relationship has failed badly—so badly that its underlying premise should be discarded.

II. RULES OF THE GAME

Mr. Chairman, in my statement to the Foreign Relations Committee on August 12, I distinguished three different policy orientations toward East-West economic relations: (1) embargoes or sanctions, representing a policy of selective economic warfare; (2) subsidization to encourage East-West transactions beyond what strict market considerations would warrant; and (3) reducing or removing the pervasive network of subsidies on such transactions that have developed over time, while letting the market function to facilitate or restrict commercial transactions in accord with the differing economic conditions and prospects prevailing in the Eastern European and Soviet economies.

As I indicated at that time, I strongly favor the third policy. What I would like to propose at this time are some specific measures for implementation, for "putting teeth" into such a general policy orientation.

The following are several specific examples of what I would suggest as "rules of the game" for East-West economic transactions:

1. No loan guarantees or export insurance should be available to Western lenders or investors engaged in transactions with the East unless these guarantees are extended without direct or indirect government underwriting (of the types provided by government and quasi-government agencies in West Germany, France, the U.K., and the U.S., in the past).

[1] Charles Wolf, Jr. is dean of the Rand Corporation's Graduate School, and director of Rand's research program on international economic policy. Comments in this statement are the author's views, and not necessarily those of The Rand Corporation or any of its research sponsors.

2. No concessionary interest terms should be available to either government or commercial borrowers in Eastern Europe or the Soviet Union. The minimum criterion for implementation of this rule should be that interest rates applying to loans to Eastern Europe and the Soviet Union should not be less than the highest rates charged to domestic or other foreign borrowers on loans of equivalent duration.

3. No preferential tax treatment should be accorded to either individual or corporate income derived from transactions with Eastern Europe or the Soviet Union. (For example, the preferential tax treatment extended under the Domestic International Sales Corporation Program in the U.S. would have to be modified to comply with this rule).

What is the purpose of these proposed rules? It is fundamentally to reduce and remove the subsidies that have undergirded economic transactions with the Soviet Union and the other CMEA countries over the past decade, and have thereby contributed to the huge expansion of net resource flows from West to East. The intended result is to restrict such resource flows in the future to no more than an unsubsidized market will allow. Such restrictions can help, albeit only modestly, to constrain Soviet allocation decisions, to impede the management and expansion of the Soviet empire and, hopefully rather than assuredly, to bring resource pressures to bear in the longer run that will help reduce the Soviet military buildup.

For reasons I will discuss in more detail later, one should have no illusions that a policy of this sort will have short-run or dramatic effects on Soviet behavior. But at least such a policy will shrink the possibilities open to the Soviet Union for reconciling continued expansion of its military capabilities, with the competing demands of consumption, investment, and economic growth at home, and of its expanded empire abroad.

III. ARGUMENTS AGAINST RESTRICTIONS

Two arguments are usually raised against such attempts to put teeth into the "rules of the game" of East-West commerce. One argument is that such measures would amount to "economic warfare," and would, therefore, be politically undesirable, especially from the viewpoint of our European allies. The second argument is that, while such "rules of the game" might have some effect if they were applied collectively by the West and Japan, this is unlikely to ensue and unilateral application will have negligible effects. I will comment briefly on each of these arguments.

The term "economic warfare" does not have a very precise technical meaning, and the loose and diverse ways in which it has been used in the media and elsewhere have not contributed to resolving these ambiguities.

The official "Dictionary of Military and Associated Terms of the Joint Chiefs of Staff" defines "economic warfare" as "aggressive use of economic means to achieve national objectives."

Another definition, in Elsevier's "Economics Dictionary," defines "economic warfare" as "non-violent activities aimed at making one nation's economy dominant over that of another nation."

Probably the best and most comprehensive definition is presented in "The Encyclopedia of the Social Sciences," which defines economic warfare as "state interference in international economic relations for the purpose of improving the relative economic, military, or political position of a country." "Interference" is further described as having two components: "coercion," through denial of trade or resources, or the threat to do so; and "persuasion," through conferral of economic "favors * * * [by which] a country may expect in return reciprocal favors in the form of political support, or alliance, or perhaps neutrality." [2]

I have three comments to make about "economic warfare."

First, I suggest that the "rules of the game" I am proposing should be termed "economic realism," and should be sharply distinguished from the more "aggressive use of economic measures" constituting "economic warfare."

Second, it is worth noting that, as I've previously noted, one of the two components of economic warfare, as elaborated in "The Encyclopedia of the Social Sciences," consists in the use of "persuasion," through the conferral of economic "favors." According to this view, it would seem that the West itself has, ironically, already been engaging in economic warfare by the very fact of extending the "economic favors," that is to say, the subsidies in the past decade that I have referred to earlier. If provision of subsidies is itself a form of economic warfare, then their reduction or removal can hardly be said to constitute economic warfare! (Incidentally, it's worth noting, as the Encyclopedia article by Robert Loring Allen does note, and as our European allies usually overlook, that the very act of attempting to use persuasion may "render the initiator vulnerable . . . If the trade is large for the recipient, it is also large for the initiator, and the recipient under some circumstances may subject the initiator to pressure through the same relations that the initiator is employing.")

Finally, the discussion of economic warfare in the Encyclopedia, observes that any "nation which practices [state trading] is necessarily and automatically engaged in economic warfare . . . [because] the concentration of all external transactions in the hands of the government implies that trade no longer is solely a means of increasing the income of a country. Economic decisions in which costs are balanced against benefits in all aspects of national life.[3] In other words, it is the Soviet Union which, by virtue of its state trading, is inherently and regularly engaged in economic warfare! This suggests that some forms of state action on the part of the West to offset the economic warfare normally practiced by the Soviet Union is justifiable.

Mr. Chairman, I am sure you will recall Lenin's maxim that "When we are ready, the West will sell us the rope with which to hang them." I would submit that while refusing to *sell* the rope may be economic warfare, refusing to give it away, or to subsidize its sale, is certainly not; even placing a tax on its sale would not necessarily be economic warfare.

The other argument that I want to rebut concerns the effectiveness of applying the "rules of the game" unilaterally, if they are not acceptable multilaterally.

There is no question that multilateral action in concert with our Western European allies and Japan is far preferable to unilateral action by the U.S. alone, both in terms of the effectiveness of these proposed rules in achieving the objectives I've described earlier, and in terms of improving cohesion within the alliance. Nevertheless, I believe that announcing and observing these rules unilaterally would be worthwhile, even if our allies did *not* follow suit.

One reason is simply that the U.S. has tremendous influence in the international financial community. If U.S. banks and exporters were to follow these rules, several consequences would ensue:

1. Other members of the international financial community would simply feel less confident and more reluctant to "go-it-alone" without U.S. financial participation in financial consortium arrangements. While European exporters might realize some one-sided gains, these would probably be short-lived.

2. American banks would extend more credit domestically, and in other parts of the world outside of Eastern Europe and the Soviet Union, relative to what would be the case if the subsidies on transactions with the CMEA countries were continued; in othe words, U.S. credit would be redirected with some beneficial consequences that we may wish to consider in the later discussion.

3. Even if the European banks were to go ahead with the credit extensions that are sustained by the continuation of subsidies by their governments, I conjecture that the asset portfolios of such lending institutions would, over time, be compromised by the accumulation of these questionable debt instruments acquired from the CMEA countries. Conseqently, these institutions would become less attractive to depositors and investors than would their American counterparts. Anticipation of this outcome would very likely lead the European institutions to follow a more prudent course of action.

It is true that the Soviet Union itself is conventionally viewed as a good credit risk: its net outstanding debt is modest, unlike that of most of the countries of Eastern Europe; its debt service ratio is reasonably low, although higher than it has been in the past; its ratio of hard currency reserves to monthly import costs is relatively high. These are the ratios that bankers typically look at, so one might argue that credit extended to the Soviet Union would not appear to be a too-risky asset for European banks to acquire even without participation by U.S. lenders.

On the other hand, it's less well-recognized that the creditworthiness of the Soviet Union is really quite precarious. Several adverse, but by no means "worst case," contingencies can sharply reverse Soviet credit prospects. Such contingencies would include, for example, reductions in Soviet oil exports and continued soft world fuel prices, continued poor Soviet agricultural performance together with large Soviet grain imports and high world grain prices, continued softness in the international gold market, a diminution in the international market for weapons (which has been an important hard currency earner for the Soviet Union in recent years), and other plausible circumstances.

I conclude this portion of my remarks with one slightly whimsical observation. Even if the "rules of the game" I've been advocating are not adopted multilaterally, and even if they're applied less rigorously by the U.S. than I would like, the "invisible hand" of international financial markets may accomplish a good measure of what the visible hands of government do not. In the 1980's, international capital markets are likely to be severely supply-limited, so that the Soviet Union and Eastern Europe will find their access to foreign capital sharply

[2] *The Encyclopedia of the Social Sciences*, p. 471.
[3] Ibid.

reduced compared to the 1970's, even apart from the governmental policies I've been proposing.

IV. EFFECTS ON SOVIET BEHAVIOR

How would Soviet behavior be affected by the sort of policy I have been proposing?

It may be worthwhile, first of all, to decompose "Soviet behavior" into the component parts we wish to affect: (a) Soviet military efforts and buildup, both conventional and nuclear; (b) direct and indirect use of Soviet military power in various parts of the world, such as Afghanistan; (c) persistent efforts to expand the Soviet empire and Soviet influence abroad; and (d) the repressiveness of the Soviet system, both at home and in Eastern Europe.

Three hypotheses can be formulated concerning the likely Soviet response. The first hypothesis is that such a policy may be so provocative that the Soviets might actually devote even more effort to military spending and external mischief, notwithstanding diminution of their aggregate resource base.

The second hypothesis is that they might, instead, adopt a more accommodating and conciliatory stance, if they became convinced of the firmness and the credibility of Western and U.S. intentions.

The third hypothesis is, to use slightly technical terminology, the "null" hypothesis: Soviet behavior and Soviet preferences may not be discernibly affected by this policy, at all. In general, where the evidence in support of either of the other hypotheses is inconclusive, one should not reject the (null) hypothesis that says, in effect, Soviet behavior will not change appreciably from what it would otherwise be.

Instead, Soviet behavior may be impelled by internal pressures, forces, and factions, and the relative strength of these is unlikely to be influenced by Western economic policy.

I have heard plausible arguments advanced in support of the first two, mutually inconsistent hypotheses. I expect there are members of the Committee, as well as others in this room, who are inclined to favor each of them. My own inclination runs strongly toward supporting the null hypothesis until there is much stronger evidence than anyone has thus far produced in favor of another hypotheses. Soviet priorities and Soviet behavior are likely to be governed by factors inherent in the Soviet system, rather than by changes in Western economic policy, and these factors aren't very different for Andropov from what they were for Brezhnev.

This conclusion seems to me to argue very strongly in favor of the policy direction that I have been proposing to you. At the least, a policy of restricting resource flows, by removing the subsidies that have lubricated such flows in the past, would place greater pressure on the Soviet economy in the middle and longer run. Such a policy would thereby tend to expose the inherent economic, political, and social contradictions within the Communist system. This is simply a policy of economic realism; it is not a policy for bringing the Soviet Union "to its knees," or bringing about the "collapse of the Soviet system," as some of the media's caricatures of the policy have occasionally portrayed it.

Indeed, the effects on Soviet behavior of such a policy of resource restriction will be modest and gradual, and will be felt only over the long run. This argues for moving our policy on East-West economic relations in this direction now, rather than later. We should certainly not try to outdo Lenin's forecast by subsidizing the rope with which to hang ourselves!●

THE ATTACKS OF PAC

(By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD:)

● Mr. GOLDWATER. Mr. President, about the only advantage of growing older is watching the ball go around and around and around as history has proven it does. This time what interests me, as one who has been there before, are the determined attacks being made by Members of the Congress concerning PAC's. Not one word was ever spoken by these same people in the days when unlimited spending was practiced by the labor unions, the spending of dues money without any consultation of the members, without any approval of the members.

Now PAC happens to be a voluntary setup and, thank goodness, as I understand it, so now are direct union contributions; but the question in my mind is why all the furor about PAC today when 20 years ago, with the unions contributing millions and even hundreds of millions of dollars if you counted all the work they force their members to do, we did not hear one word about it?

And now we come into another little interesting repetition along the same lines. The General Accounting Office, bless their little souls, has decided that the Pentagon has been lobbying and that is a no-no. The question I want to ask is, has the General Accounting Office ever stood out in the hall by the elevators in front of the Senate Chambers and counted the number of labor union lobbyists lined up there stopping every Member of Congress, every AA, every secretary, besieging and even demanding that their Senator vote the right way? I would imagine this goes on over in the House, although I have never witnessed it.

Now what in the world is the difference between a labor union or associations of automobile dealers, lumber dealers, and you name it, what is the difference between those groups lobbying for their interest and the Pentagon defending what they feel is in the best interest of their services and the best interest of the United States?

You take the argument that General Accounting got its little self into relative to the C-5 cargo plane versus the 747. Anyone, I say, anyone who understands which end of the airplane goes down on the runway first could have told any Member of Congress that the 747 was a bad, a real bad buy, compared to buying the C-5A when you consider the purpose. The purpose in that case was heavy outsized airlift; the Pentagon knew that, and that is why the Pentagon did not go for the 747. Now that is not saying the 747 is not a good cargo airplane; it is, but it would not do and never will do the job of the C-5. So can you blame those people who were charged with the responsibility of moving all our armies, our air forces, all the heavy equipment to theaters of war preferring an airplane that will do it over an airplane that would not do it? Yet this seems to be a real no-no, not only in the eyes of the General Accounting Office, but now in the eyes of everyone who dislikes the Pentagon.

I just wish that someday I could see some continuity, some sense, and some reason in the arguments constantly being made against doing this or doing that. If it is good for the labor unions, then it is good for the manufacturer; if it is good for the United States, it is good for the Pentagon, and vice versa. Let us get off this kick; we have been on it too long.●

TENNESSEE TOMBIGBEE WATERWAY

● Mr. DENTON. Mr. President, in the midst of a severe recession, questions about funding for controversial water projects is understandable. But it would be a serious error nonetheless for Congress to slash funding for the Tennessee-Tombigbee Waterway, which will open an important link between America's inland waterways.

The Tenn-Tom is more than 82 percent completed. To disrupt funding now would only delay construction and add to the costs of completing the project. To cut off funding would in the long run be more costly than to finish the project.

The Federal Government already has made a major commitment to finishing the TTW. It would be pennywise and pound foolish to stop the project or severely restrict funding. The costs for restoring this land to its natural conditions would be more than twice the cost of finishing the project.

The TTW is a 234-mile navigation project that will begin at the Tennessee River on the Tennessee-Mississippi border, wind south through Mississippi and Alabama, and end at the Demopolis lock and dam in Alabama. An existing waterway flows from that point to the Port of Mobile on the gulf coast.

The project was originally authorized by Congress in 1946 but was not funded until much later. Construction began in 1972 and will be completed in 1985. The project has been consistently ahead of schedule in spite of numerous court battles and environmental concerns.

As an important addition to the transportation system linking America's heartland with important shipping ports on the gulf coast, the Tenn-Tom will improve our ability to export

coal, grains, and other mineral, agricultural, and industrial products.

The Tenn-Tom will provide valuable shipping lanes for Ohio coalfields and enhance our ability to reduce our dependence on Middle East oil. It will also ease the way for an expected jump in coal exports, which are expected to double in the next 18 years.

Great care has been taken throughout the project to protect the environment. The TTW was the first major water project built under the National Environmental Policy Act. Construction has been monitored by a three-member Board of Environmental Consultants, which includes distinguished experts in environmental concerns.

The Tenn-Tom has stirred considerable controversy throughout the life of the project. Much of this was prompted by environmental concerns, economic fears, and vested railroad interests that feared increased competition from the Tenn-Tom.

But those fights should be behind us. The project has been funded every year since 1968. Regardless of the original debates, the basic issue now is whether we want to continue our Federal commitment to the Tenn-Tom or abandon it and miss an opportunity to realize more than $127 million in benefits annually for the next 50 years.

The total cost of the project, according to official figures compiled by the Government, will be $1.830 billion. Already, $1.3 billion has been spent and $1.5 billion has been committed.

Eight of the ten locks and dams are completed; the other two are under construction. More than 154 miles of channel have been completed and the waterway is open to traffic below Columbus, Miss., the halfway point. The Corps of Engineers estimates that about $350 million will complete the project. With so much invested already, it would be economically unsound to abandon the project.

The past 6 Presidents and 14 consecutive Congresses have supported funding for the Tenn-Tom. In one court case after another, Federal judges have ruled in favor of continuing this project. The surrounding States of Mississippi, Alabama, Tennessee, Kentucky, Florida, Georgia, and Louisiana have strongly invested State and local funds in this waterway.

Based on the long-term promise of Federal dollars to finish the project, the States in the region have invested more than $159 million in new bridges, highway and utility relocations, and other costs. These States made these investments in good faith and would be unable to recover those costs if the full waterway is not opened.

Opponents of the project have claimed recently that the ultimate costs of the project will exceed $3 billion, an estimate that includes the cost of improvements below Demopolis, Ala., and in the Port of Mobile. Such improvements have not been authorized by Congress. The Levin amendment passed in 1981 limits the funding to $1.83 billion. The benefit-to-cost ratio from this investment is conservatively estimated to be 3 to 1—an excellent return ratio.●

NEW YORK'S FINE WINE TRADITION

● Mr. MOYNIHAN. Mr. President, I should like to share with my colleagues a proclamation which salutes New York's wine industry. Governor Carey of New York State recently declared November to be "Wine Month." Indeed, New York, our Nation's second-largest wine producing State, may be proud of its wine and grape industries every day of the year.

James Trezise, the executive director of the New York State Wine Grape Growers, recently informed me that New York State's world class white wines were chosen for their superior quality at a wine tasting at the International Wine Center in New York City. The results of the tasting were dramatic: All seven New York Riesling entries, grown in New York State's Finger Lakes region, were rated superior to comparably priced French and German "benchmark" wines.

Let me add that New York State's expanding wine industries—its wineries—provide thousands of jobs for New Yorkers. I find this greatly encouraging and hope the tradition is carried on.

I hope the entire Senate will join me in marking this special occasion for New York State. I also ask to include in the RECORD Governor Carey's proclamation of October 26, 1982, concerning New York's fine wine tradition.

The proclamation follows:

PROCLAMATION

New York State has a long and proud tradition of producing fine wines. That tradition continues today.

More and more people are discovering the excellence of New York State wines. More and more wineries are being estabished in response to their demand.

In the last ten years, the number of wineries in New York State has increased by four times. Today, there are almost 60 wineries—and the potential exists for more.

These new wineries are continuing the tradition of quality and are being watched worldwide for their innovations.

The grape-growing and wine-making industries provide thousands of jobs for New Yorkers, and the industries are expanding.

Because of their contributions, it is fitting that all New Yorkers acknowledge their pride in the wine and grape industries.

Now, Therefore, I, Hugh L. Carey, Governor of the State of New York, do hereby proclaim the month of November, 1982, as "Wine Month" in New York State.●

THE NATURE OF MONEY

● Mr. GRASSLEY. Mr. President, it is always encouraging for Members of the Senate to receive letters of encouragement and it is doubly encouraging when those letters stimulate one's thinking on a variety of important subjects. I wish to have printed in the RECORD a letter from Mr. Sylvester H. Cain, a former Iowan now residing in Mechanicsville, Md. In it Mr. Cain draws together a series of fascinating historic interactions between participants at the Federal Convention of 1787 which shed light on the nature of money as a mechanism of exchange and the pitfalls of poorly designed systems.

The material follows:

MECHANICSVILLE, MD.,
December 16, 1982.

Hon. CHARLES E. GRASSLEY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR GRASSLEY: Thank you for the fine job you are doing as Senator and for the expressed interest you have in today's economy. I have had numerous occasions to contact your office and have always been served by you through Mrs. Berger very aptly and very faithfully. My previous contacts have been limited to my interests, but this time I contact you with a point in everyone's interest. This interest is in the economy and I have studied about our system only to find the same problems existed around the time the U.S. Constitution was being framed. I take this opportunity to pass some of my findings on to you.

At the outset, let me recommend a very resourceful set of books (on which I depend heavily for this letter) to both you and Mrs. Berger. I would like to give them as a Christmas present but I simply do not have the necessary thirteen dollars of Federal Reserve Notes.

"The Miracle on Main Street," F. Tupper Saussy; Spencer Judd Publishers, Sewanee, Tennessee 37375.

"A Caveat Against Injustice: Or An Enquiry Into the Evil Consequences of a Fluctuating Medium of Exchange," Roger Sherman (signed the Constitution); Spencer Judd Publishers, Sewanee, Tennessee 37375.

It is a common misconception that our country in its early days (1780's) took many years to settle down to using the new money (gold and silver). It was quite the contrary according to statements I have discovered that were written about the time the Constitution was being signed.

Starting with a sad state of affairs less than nine months before the Constitution was signed, George Washington wrote to General Knox:

"Good God! who could have foreseen, or predicted the disorders which have arisen in these states."

To a better state of affairs about two years later writing to Marquis de La Fayette, June 3, 1790 he stated:

"You have doubtless been informed, from time to time, of the happy progress of our affairs. The principal difficulties seem in a great measure to have been surmounted. Our revenues have been considerably more productive than it was *imagined* they would be. I mention this to show the *spirit of enterprise* that prevails. (Emphasis mine)

This was written within one year after going to gold and silver coin. Imagine that!

Again to LaFayette March 19, 1791, Washington wrote: "Our country, my dear sir, is fast progressing in its political importance and social happiness."

To Catherine Macaulay Graham he wrote: "The United States enjoys a sense of prosperity and tranquillity under the new government that could hardly have been hoped for."

And, to David Humphreys: "Tranquillity reigns among the people with that disposition toward the general government which is likely to preserve it. Our public credit stands on that high ground which *three years ago* it would have been considered as a species of madness to have foretold." (Emphasis mine)

So it can hardly be said that "it took many years for the new nation to settle down to using the new money".

I sincerely believe that President Reagan got his mandate from the people because in the campaign he referred frequently to the Constitution. The people are interested in preserving the U.S. Constitution. All of it! I only pass this on to you because I know that you are diligent servants in President Reagan's administration which is desperately trying to kill inflation. Our fore fathers have shown the way. Please use their experience to our advantage.

Let me point out that the Congress was not empowered by the Constitution to emit paper money. Those who were involved at the time can give the best testimony to this, let me refer you to: James Madison, Notes of Debates in the Federal Convention of 1787, Ohio University Press, Athens, Ohio 1966.

Specifically, Article 1 Section 8 was proposed: "The Legislature of the United States shall have the power to * * * coin money * * * and emit bills on the credit of the United States" (Such as Federal Reserve notes).

Here is Madison's description of the debate so you will understand how diligently our fore fathers tried to keep paper money out of our country's monetary and legal systems:

Mr. G. Morris moved to strike out "and emit bills of credit." If the United States had credit such bills would be unnecessary; if they had not, unjust and useless.

"MADISON. Will it not be sufficient to prohibit the making them a tender? This will remove the temptation to emit them with unjust views. And promissory notes in that shape may in some emergencies be best.

"MORRIS. Striking out the words will leave room still for notes of a responsible minister which will do all the good without the mischief. The Monied interest will oppose the plan of Government, if paper emissions be not prohibited.

"Colonel MASON. Though he had a mortal hatred to paper money, yet as he could not foresee all emergencies, he was unwilling to tie the hands of the Legislature. [Legislature—Congress]

"Mr. MERCER. (A friend to paper money) It was impolitic . . . to excite the opposition of all those who were friends to paper money.

"Mr. Elseworth thought this was a favorable moment to shut and bar the door against paper money. The mischiefs of the various experiments which had been made, were now fresh in the public mind and had excited the disgust of all the respectable part of America. By withholding the power from the the new Government more friends of influence would be gained to it than by almost anything else . . . Give the Government credit, and other resources will offer. The power may do harm, never good.

"Mr. WILSON. It will have a salutary influence on the credit of the United States to remove the possibility of paper money. This expedient can never succeed whilst its mischiefs are remembered, and as long as it can be resorted to, it will be a bar to other resources.

"Mr. Read, thought the words, if not struck out, would be as alarming as the mark of the Beast in Revelation.

"Mr. Langdon had rather reject the whole plan than retain the three words "and emit bills."

George Bancroft—History of the United States of America, Vol. VI. New York: D. Appleton and Company, 1886, Page 303 states it this way:

"James Madison left his testimony that "the pretext for a paper currency, and particularly for making the bills a tender, either for public or private debts, was cut off." This is the interpretation of the clause, made at the time of its adoption alike by its authors and by its opponents, accepted by all the statesmen of that age, not open to dispute because too clear for argument, and never disputed so long as any one man who took part in framing the constitution remained alive."

When Article 1, Section 10 was debated it was first worded: "No state shall coin money; nor grant letters of marque and reprisal; nor enter into any Treaty, alliance, or confederation; nor grant any title of Nobility."

Madison's account of the debate: "Mr. Wilson & Mr. Sherman (Roger, author of book cited above) moved to insert after the words 'coin money' the words 'nor emit bills of credit, nor make any thing but gold and silver coin a tender *in payment of* debts' making these prohibitions absolute, instead of making the measures allowable with the consent of the Legislature of the United States." (Emphasis mine)

"Mr. Sherman thought this a favourable crisis for crushing paper money. If the consent of the Legislature could authorize emissions of it, the friends of paper money would make every exertion to get into the Legislature in order to license it."

Paper money was thus absolutely prohibited by the Constitution. That cannot be changed without amendment to the Constitution. 31 U.S.C. 371 prohibits the courts from keeping their proceedings in anything but the money of account of the United States, which is clearly intended by the Constitution to be gold and silver coin.

Let me cite jurisprudence on behalf of this administration because I sincerely believe that Mr. Reagan desperately wants to solve the inflationary problem—as I sincerely want him to. That is why I offer this information to you—so you can sincerely help the President solve not only the problem of inflation, but the myriad of problems caused by inflation.

Now 16—American Jurisprudence 2nd—§ 155:

"Since the constitution is intended for the observance of the judiciary as well as *the other departments of government* and the judges are sworn to support its provisions, the courts are not at liberty to overlook or disregard its commands, or countenance evasions thereof. It is their duty in authorized proceedings to give effect to the existing constitution and to obey all constitutional provisions, irrespective of their opinion as to the wisdom or desirability of such provisions, and irrespective of the consequences.

"If the constitution prescribes one rule and the statute another and a different rule, it is the duty of the courts to declare that the constitution, and not the statute, governs in cases before them for judgment." (Emphasis mine)

Therefore, since Article 1 Section 10 of the United States Constitution has not been amended, it is quite clear that we are happily obliged to gold and silver in the United States. Please ask Congress to return to gold and silver and do away with the Federal Reserve system. The law that took us off the gold standard was "10 years temporary". Therefore in 1943 we should have returned to gold, why haven't we? Because the friends of paper money were content with eroding the U.S. Constitution and everything in the United States.

Further simplifying the problem, let me quote the United States Attorney General's published opinion, attached to 31 U.S.C. 311 in the federal statutes.

"The President has authority to proclaim and put into effect a plan for the unlimited coinage * * * of domestic silver produced after the effective date * * *"—1933, 37 Op. Aty. Gen. 344, at 31 U.S.C. 311.

Still further clarification are the words of Bruce A. Budlong, Acting Director, Special Financing Staff, Department of the Treasury, Fiscal Service—"The same monetary system that was established on April 2, 1792, is in effect today." This is true, but it seems to not be enforced by all of our leaders.

So, it seems just returning to gold and silver would solve inflation, and it would help the President and all people in the United States.

The President has taken the first steps toward this goal which is to back off inflationary interest rates. This would be solved naturally by returning to gold and silver. "Federal Reserve notes are legal tender for all debts." Notice that the word "for" is used rather than "in payment of". Now it is well known that lawmakers are presumed to have selected each word, that makes up a statute carefully and deliberately, lest the statute be considered void for vagueness. Therefore, it is for sure that Congress chose not to use the phrase "in payment of"—the reason being that no debt can be paid in the eyes of American jurisprudence unless paid in gold and silver coined and regulated in value by Congress. (Refer to: "The U.S. Monetary System" Page 148)

The advocates of irredeemable "paper money" (Federal Reserve Notes) use the supreme court citation of Juilliard versus Greenman. This was a March 1884 decision where it stated Congress had the power to impose a standard of paper currency upon the citizens of the United States.

But only two months later May 5, 1884 the United States Supreme Court ruled in Hagar V. Land Reclamation District No. 108, 111 U.S. 701, that "the acts of congress making the notes of the United States a legal tender do not apply to involuntary contributions in the nature of taxes or assessments (fines)." The reason is clear of course in Article 1 Section 10 of the U.S. Constitution, and 31 U.S.C. 371.

Further, Olmstead versus United States 277 US 438, 48 S.Ct. 564 (1928): "In a government of laws, existence of the Government will be imperiled if it fails to observe the law scrupulously. Crime is contagious. If the Government becomes a law breaker, it breeds contempt for law; it invites every man to become a law unto himself; it invites anarchy."

Also in this connection *Simmons* vs. *United States*, 390 US 394 "It is intolerable that one constitutional right should be surrendered in order to assert another." In this

context should I have to surrender any constitutional right at Article 1 Section 10?

Thus, is it possible that the break down of law and order plaguing our land orginates not in the streets, as the media would have us believe, but in our public offices?

Bronson vs *Rhodes*, 74 US 229 defines lawful money. "Lawful money of the United States could only be gold and silver coin, or that which by law is made its equivalent, so as to be exchangeable therefore at par on demand, and does not include a currency which, though nominally exchangeable for coin at its face value, is not redeemable on demand." (Emphasis mine)

There are so many citations available that its seems like every citizen is required to go all the way to the Supreme Court before he or she can get a ruling in favor of gold and silver. The citizens would not have to go to this expense if they were not hood winked by previous administrations.

It is quite clear from the earlier quote from American jurisprudence that the Constitution prevails over conflicting court orders, conflicting Presidential orders, or even conflicting laws from Congress.

Of course it belabors the point to suggest that any lesser office, or any lesser law can supercede the supreme law of the land.

If I can be of assistance to you in this matter please feel free to enlist my services.

Thank you for your endurance.

Sincerely yours,

SYLVESTER H. CAIN.●

AN ACID RAIN STUDY

● Mr. EAGLETON. Mr. President, every summer thousands of college students come to Washington to intern in our Senate office. It is a great experience for these young people to witness first hand the political and legislative process. It should also be a learning experience for us, as well. The optimism and original thinking these students give in addressing major problems is most refreshing. Sometimes new eyes looking into old problems can be quite revealing.

Last summer, Katy Green, a senior at Wesleyan University in Middletown, Conn., spent several months in my office. Katy is the daughter of Mr. and Mrs. Louis Green of St. Louis, Mo. Lew Green has been an active voice in the environmental movement in Missouri for years. So, Katy came to my office with a solid background and interest in Missouri's environmental problems.

Ms. Green studied the effects of the acid rain regulations on Missouri. With the multitude of material available, there was little attention being given to individual States needs and problems. While Katy and I do not agree on every aspect of acid rain, I feel her report is an excellent study of the questions posed by the acid rain legislation for a Midwestern State like Missouri.

Mr. President, I ask that the text of Katy Green's report be printed in the RECORD. I hope it will provide "food for thought" for next year's Congress in addressing the acid rain problem.

The report follows:

MISSOURI ACID RAIN ANALYSIS

(By Katy Green)

Missouri, which is receiving most attention as a leading contributor to the problem, might soon have to join allegiances with those states suffering from the contributions. In 1979, the Kingdom Daily News ran an article publicizing the death of a creek in the Ozarks due to acid rain. The St. Francois River and County have foreseeable problems due to acid rain, as do the New Madrid Range and Madison County. Missouri is fortunate in that most of its land is made up largely of limestone, which acts as an excellent buffer. It is obvious that the lands which have no limestone are the ones suffering already.

It is becoming increasingly obvious that Missouri's crops will soon show damage due to a high level of acidity in the soil. Studies completed by the University of Minnesota directly link crop damage to unusually high levels of acidity; and, although no studies of this kind have been done in Missouri, there is significant potential for damage to Missouri's vegetation also. A large portion of Missouri's crops are soybeans, which are susceptible to the same damage as was found in Minnesota. A study done by Gene Likens, in which he determined the pH of the rainfall in selected areas across the country, during the period from 1955 to 1965, and again from 1975 to 1979, found that the rainfall has become increasingly acidic in an area steadily expanding from the Northeast to the Midwest and West. Missouri is included in the later charts showing rainfall with pH significantly lower than normal. This trend has been increasing steadily over the last two decades and there is no reason to think that it will stop unless action is taken soon.

Missouri is located in the center of the country and is therefore subject to blame from the East, as well as waste from the West. In states as far west as Texas and Arizona, there are huge coal companies as well as smelters, which pose an even more grave threat than some companies in the East. The emissions from the West travel in the winds just as do the emissions from the Midwest, and fall in areas as close as to the Midwest. Missouri will soon be paying to prevent damage as well as to repair it. This should make it painfully clear to all that an immediate compromise is needed involving the entire nation. Once again, acid rain is a national, not a regional, problem that must be dealt with effectively. If we, as a nation, are going to consume such quantities of energy, then we must be prepared to pay for it, at the least expense to the health of the public as possible. Any preventative actions taken now will obviously prove "cost-effective", for we cannot guess the amount of the damage to occur in the future, but we can see the cost already.

The Missouri consumer would necessarily share a larger part of the rate increase than the Northeastern consumer, who already pays more for utilities than the Midwestern consumer.

The Missouri utility companies are avidly watching the progress that any regulatory bill might make in Congress because of the tremendous cost to its users. Union Electric, Missouri's largest emitter of sulfur dioxide, estimates an annual increase of up to 25 per cent in utility rates to its Missouri consumers.

Union Electric operates four plants in Missouri, one of which is already operating under variance for failure to meet the existing sulfuric dioxide regulations, another of which is the second largest emitter of SO_2 in the state, emitting some 123,000 tons of SO_2 per year, more than the state of Connecticut emits in one year. Associated Electric Company, second to Union Electric in total number of SO_2 emissions, estimates an increase ranging from 20 to 30 per cent to its customers. Kansas City Power and Light Company, the third largest company, estimates only a 3 to 4 per cent increase in its utility rates; for it has no room for scrubbers, but must switch to low sulfur fuel.

The Missouri Department of Natural Resources, Air Pollution Control in Missouri, conducted its own study of the UE and Associated Electric companies, and arrived at a figure of a 15.5 per cent increase to those customers. ICF projects an increase of 7 per cent to the Missouri consumer. Other, smaller companies in Missouri do not expect such large increases in rates: St. Joseph Power and Light Company estimates only a 5 per cent increase to its customers; the Citizens Electric Corporation expects no effects, as it is just a distributing company; and the Missouri Public Service Company has conducted no studies.

A study of Missouri's utility companies should make it obvious what the problems inherent in the Committee bill are. By requiring the State of Missouri to limit its SO_2 emissions by whatever tonnage the governors should decide, the bill gives the state freedom to decide by itself from where to make the reductions. However, it would be a serious folly if the State of Missouri should decide not to require controls be put on tall stacks, which are the principal source of acid rain. (The EPA has previously placed controls on the SO_2 output from tall stacks but has proved ineffective at enforcing the controls.) If Union Electric should do nothing about its enormous power plants while a much smaller plant such as UMC, which has no tall stakes, is made to curb its emissions to contribute to the total reduction figure, what benefit is gained? This should make it apparent that there need be a "Tall Stack" Provision, that will be enforced, added to the Acid Rain Amendment, calling for strict controls to be placed on every stack of over 200 feet. * * * This rule should not apply to just the 31 states in the ARMS region, but to all 50 states of the nation, for the tall stacks everywhere emit sulfur high into the sky which will form acid rain. Acid rain is not a regional problem.

In the freedom granted by the Committee bill the bill makes no specifications as to what age the plant must be to either qualify or disqualify for controls be placed on it. Clearly, a state would waste a lot of money if it were to retrofit an aging plant slated for retirement, rather than controlling a new but poorly controlled powerplant. The bill provides that if a plant is closed, the reduced amount of SO_2 can count toward compliance; however, the bill should insist that any plant that will be retired within 10 to 15 years need not comply with the Committee bill, while plants under construction or scheduled to begin operation must comply with the existing Clean Air standards. (For example, in 1974 and 1975, Gavin Power Plant, the largest single source of electricity in the United States, located in Ohio, was put on line without controls with a stack 1,100 feet high. Its total emissions are 400,000 tons of SO_2. The stupidity of constructing plants such as this one, while spending thousands of dollars to reduce emissions of other ones, is quite evident here.) Thus, this second provision is necessary.

Another provision that should be added is that, in an attempt to ward off a Civil War (the Northeastern states seem to be becoming increasingly angered by the Midwestern states' unwillingness to take responsibility for reform). All 50 states be required to reduce their emissions by ridding the coal of at least 85 per cent of its sulfur. This could be done by scrubbing, retrofitting, or washing. A company could also "switch-fuels" to lower its emissions by the 85 per cent. The immediate response to this is that Western coal is already cleaner then Eastern; however, sulfates coming from the Western states have already caused damage in Los Angeles, Colorado, Missouri, and Minnesota. The New Source Performance Standards (NSPS) passed by Congress in 1977 call for a reduction to 1.2 lb SO_2 per million Btu, and a 70 per cent removal of SO_2 from low sulfur coal and a 90 per cent removal from high sulfur coal. (A newly built plant in Colorado achieves .15 lb SO_2 per million Btu.) EPA did not enforce either these nor the tall stack regulations by Congress: in 1982, there were reduced emissions in only seven stacks. This provision, calling for reductions from all 50 states, would effectively eliminate the 31-States ARMS region, and instead, reallocate the costs. Perhaps eventually the federal government would be able to partially subsidize the programs in the states.

The existing Committee bill allows for a two year period for governors to meet to decide upon each state's share of the reduction, a four and one half year period for the state to plan its reductions, and another year and one half for the utilities to plan their reductions. Thus, no direct action that would reduce the SO_2 emissions, or the amount of acid rain in this country, is required for a least eight years. Although eight years is not a long time for such a major requirement, Sweden, Canada, and the Northeastern United States expect extensive damage to occur within a decade, and eight years might be too long to wait.

In addition, if a utility plant should see the eight year deadline and decide to wait until the seventh year before taking action, then it will be an additional several years before the controls are implemented and significant reductions occur. This delaying could postpone any improvements for several years or perhaps decades after the bill has been passed. Therefore, a "Time-Log" Provision must be added to the Committee bill, requiring actions taken within five years that would reduce in some portion the amount of SO_2 released into the air. This is necessary if we are to avoid only a little bit of the predicted damage. There must also be penalties provided for by the bill, and enforceable by the EPA should a plant fail to comply. The costs of equipment will have escalated in eight years, and the reduction process will look even grimmer to utility companies. Time-charted controls should be implemented with the bill.

The acid rain problem is real and must be dealt with quickly and effectively by Congress. The health of our people and the fate of our ecosystems must not be ignored. The Committee bill with the four additional provisions is only a start to a solution and must be implemented immediately. Acid rain is not a state problem. It concerns every state of this nation, as well as Europe and Canada. It is imperative that we act as a nation, and act NOW, to reduce the amount of global acid rain.●

SAINT PAUL AT THE CROSSROADS

● Mr. DURENBERGER. Mr. President, on October 21, 1982, Mayor George Latimer of St. Paul, Minn., delivered an extraordinary "State of the City" address. It outlines a bold, sweeping program of municipal reform and economic revitalization aimed at improving St. Paul's standing as a "Self-Reliant City."

Mayor Latimer's administration has impressive plans for St. Paul: revamping the city's personnel system to make it more efficient, accountable, and flexible; developing alternative methods of financing and delivering public services; stimulating the local business climate. It is a cooperative effort involving the city, the corporate community, foundations, and other nonprofit groups, academics, and the Federal Government in the form of a $100,000 grant from the Department of Housing and Urban Development.

The goal is to produce a city where people know they can get the quality services they need. A city that encourages and nurtures small and growing businesses and creative entrepreneurs to strengthen the economic base. A city with a strong sense of community. A city that can stand on its own two feet.

In many ways, Mr. President, St. Paul is already that city. Its effective work in revitalization, alternative service delivery and neighborhood initiatives have already established it as a vibrant, involved, progressive city. Mayor Latimer's latest plans can only reinforce that image, promising further improvements in the quality of life in St. Paul and in other cities that may look to its example.

I ask that the text of Mayor Latimer's speech be printed in the RECORD.

The speech follows:

SAINT PAUL AT THE CROSSROADS

(By Mayor George Latimer)

The state of the city is good. As a community we have accomplished more in the last few years than any one of us would have dared dream. Together we have created housing, jobs, businesses, a new downtown and a start on our hot water district heating system. In addition, we now have a Job Corps to provide training for our unemployed young people, we have made progess on affirmative action and we have welcomed thousands of Hmong refugees into our community.

But we are also part of a larger world which is staggering under the forces of inflation, unemployment and economic distress. It is becoming harder and harder for people to provide the necessities of life for themselves and their families.

The effect of these economic forces is obvious as you struggle to pay your bills at home. They have been just as evident to us in City Hall as we strained in the last months to balance yet another difficult budget. We cannot continue year after year, to raise taxes and cut services. We must now take steps to reverse this trend.

Let us remind ourselves that we are a city 270,000 strong—a healthy and robust people who can take effective action here and now in our homes, neighborhoods, businesses and city government, to make certain that Saint Paul continues to be a community in which we can live and believe.

In these time, it is important to remember that cities and local governments have not been thrust upon us by some alien force. They are simply a reflection of what we have freely and rightfuly chosen as a way of life. People gather together to acknowledge the joys of community, and also to face the sorrows and challenges that come when we commit ourselves to living and working together.

In recent years, our sense of community and local initiative has helped Saint Paul reverse the pattern of deterioration that has plagued many older American cities. We have pooled the talents and resources of all our people and our city employees, and we have been willing to depend on each other when the need arises. If we are to remain a healthy city, we must continue to strengthen this sense of community and self-reliance.

Indeed, the essential commitment of this address is that we do become a more self-reliant city: a city with a strong sense of local community, a financially stable government, and an independent, growing local economy.

In order to accomplish these goals we must:

1. Change the way we finance and deliver services.

2. Pay closer attention to employee needs and personnel system problems.

3. Spend more time on stimulating Saint Paul's business climate.

1. FINANCES AND SERVICE DELIVERY

There is no question in my mind that the fiscal pressures we feel now are going to continue. They may even worsen in the years to come. Saint Paul's operating budget will be stretched to the limit. Likewise, financial demands on the city's infrastructure will increase significantly in the years ahead, as is true for any older city.

To respond to this challenge, we must develop greater expertise in long-range financial planning. We must be more aggressive in generating new revenues. With foresight and innovation, the city can create a sound financial base to complement our efforts at increasing community and citizen self-reliance.

Next month the Rand Corporation will begin the research and design phases of a "pay-as-you-go" program for some city services. While our tax base will continue to cover essential or critical services, we must take pressure off the general tax levy. To maintain acceptable service levels in all areas, new forms of financing such as user fees, revenue centers, non-resident charges and special assessments must be adopted, wherever appropriate. This is a strategy already in use to a limited extent for programs funded by fees and special assessments.

I want to emphasize that, given the hard economic times we live in, decisions regarding funding for specific municipal services and improvements raise tough public policy issues. Rand will not solve this problem for us. The Mayor, the City Council, city employees and Saint Paul's taxpayers will, in the end, have to come up with answers. I predict a great deal of debate and disagreement on these issues. But, not facing up to such financing issues in 1983 would do a

grave disservice to the future health of our community.

This proposal suggests a need to let market forces play a larger role in defining the range of services the city provides. At the same time, we must protect equity standards in providing services, and we must find ways to ensure that all citizens have reasonable access to all city services, be they essential or non-essential.

The Ford Foundation and several local foundations have expressed a strong interest in providing the funds necessary to undertake this project. In addition, Secretary Samuel R. Pierce, Jr. of the U.S. Department of Housing and Urban Development and Dr. E. S. Savas, Assistant Secretary, have agreed to provide $100,000 to cover part of the cost of this demonstration. HUD has been a strong supporter of innovations such as this which encourages local self-reliance and alternative approaches for municipal service delivery. The President's National Urban Policy strongly needs such innovative approaches. We are among the first to take this challenge seriously and make it work. Our innovative approach to maintaining services through changing service delivery options will serve as a powerful example to other cities.

For this program of increasing revenues and modernizing government operations to make a significant difference, we must find ways to develop new and deeper partnerships between City Hall and Saint Paul residents. Saint Paul has a rich tradition of volunteer involvement through civic, church and other groups. The neighborhood district councils make a great contribution to our successful citizen participation process. It is time to build on this solid base and to encourage an even broader range of inventive, neighborhood-based efforts.

In return, I want all of our departments and offices to be more than service providers. I want City Hall to become a reservoir of resources and skills for the whole community, to be called upon by residents who want to work at building self-reliance in partnership with their local government.

2. PERSONNEL ISSUES

We have 2,900 dedicated and talented city employees. They now work within a personnel system designed in a different era for different reasons. We often penalize good employees, tolerate poor ones, and structure our workloads inefficiently. Our personnel system needs to be more flexible and it needs built-in incentives to assure quality and accountability in the jobs people perform.

I will be appointing a task force to review the present personnel system and identify the necessary changes. David Lilly, Dean of the School of Management at the University of Minnesota, has consented to chair the task force. At the same time we will continue to work to protect employees' rights and to respect union contracts.

Employees should have an opportunity to participate more fully in the affairs of government. If employees themselves can play a key role in economically distressed industries, then surely our employees can play the same key role in changing the way local government does business.

To succeed in this venture, we need to mobilize city government and reduce internal fragmentation. Recently, I consolidated the central administration's management, finance, budget and employee relations functions. We must play to our strengths and put these functions to work in assisting the departments, city employees and citizens to promote self-reliance throughout the entire community.

3. SAINT PAUL'S BUSINESS CLIMATE

The third element in my program to increase local self-reliance focuses on the condition and direction of our local economy. We will work this fall, with the Institute for Local Self-Reliance, on a small business enterprise program to encourage the establishment and growth of more local businesses and industries.

Saint Paul has a relatively healthy economic base. In these troubling economic times, we have not suffered as much as other cities. Yet, the unpleasant reality remains that we are very dependent on economic forces outside of our direct control.

We import many of the goods used here in Saint Paul from other parts of the country. To improve the local economy, we must develop the capacity to produce more goods, both for our own consumption here at home, and for export to other areas.

Saint Paul will continue to aggressively support established firms in the future, as we have in the past. This principle applies equally whether we are talking about Burlington Northern, or the gas station on Payne Avenue.

Nonetheless, the evidence from across the nation is clear. Our capacity to nurture small-scale and growing businesses is, in large part, the key to our future in developing jobs, maintaining our commercial tax base, and ensuring overall economic stability. We need not recklessly compete with other cities for established businesses when it is our own local firms that create jobs, pay local taxes, and generate local profits.

Every time a ma-and-pa operation falters, or every time a local entrepreneur with vision is left out in the cold for lack of support, Saint Paul loses a piece of its future and further mortgages its local economic life.

An ongoing success in this area has been the city's aggressive loan program for Saint Paul's neighborhood commercial strips. More recently, Energy Park and the renovated Farmers' Market in downtown Saint Paul have demonstrated the returns possible on this kind of investment. The Farmers' Market provides a visible showcase for an energy-conserving, small-scale, labor-intensive industry.

IN CONCLUSION

We have a proud record of community accomplishments in Saint Paul. But as impressive as these accomplishments are, I believe that we have been far too timid in recent years. Our personnel system needs to be updated, the financial and service structure of city government has to be reshaped to meet the pressing demands of the 1980's and Saint Paul's local economy now requires an aggressive shot in the arm.

We are at a point in our history when we must build on our past successes and take larger risks. The new programs that I have outlined will put Saint Paul on the map as the first in a new generation of self-reliant cities.

Success will require a large dose of courage, creativity and commitment. We have succeeded before. I know that we can do it again. Together, as a community, we have the will, the resources and the strength to make Saint Paul one of the great, older cities in this nation.●

SURFACE TRANSPORTATION ASSISTANCE ACT

(By request of Mr. RIEGLE, the following statement was ordered to be printed in the RECORD:)

● Mr. CRANSTON. Mr. President, I am most grateful to the distinguished Senator from Michigan (Mr. RIEGLE), who serves as the ranking minority member of the Banking Committee, for offering amendment No. 5011 on my behalf during my necessary absence. I wish to describe briefly the compromise on this provision that is contained in the House amendment.

First, as to the discretionary earmarking of funds under section 16(b) of UMTA for the provision of financial assistance to States and local public agencies and private nonprofit corporations for the specific purpose of helping meet the transportation needs of handicapped and elderly persons, the agreement retains the basic thrust of the Senate amendment that the new moneys provided as a result of the new gas tax, as well as the full $1.6 billion appropriation already made for fiscal year 1983 for discretionary mass transit capital assistance under UMTA, will be subject to the Secretary's authority to set aside up to 3.5 percent for the provision of section 16(b) assistance for handicapped and elderly individuals' transportation.

Second, the provision in the compromise version is faithful to the purposes of the Senate-passed amendment—to make clear the fundamental Federal responsibility to make provision for the transportation needs of handicapped and elderly individuals. It requires the Secretary of Transportation to establish national minimum criteria for the provision of transportation services to handicapped and elderly persons: Thus, the compromise rejects as unsatisfactory the Department of Transportation's July 1981 interim final rule, which fails to establish any such criteria.

The compromise version also requires that the Secretary's regulations establish procedures for monitoring transit system activities in order to insure compliance with the newly established criteria and include provisions for insuring that handicapped and elderly persons are provided, through groups representing them, with a meaningful role in the planning of services meeting their needs by requiring that they be afforded adequate notice of and opportunity to comment on proposed activities of recipients to achieve compliance with the new criteria.

I wish to note that the provisions of the compromise in no way restrict transit systems in providing handicapped and elderly individuals with transportation services that exceed the minimum criteria set forth in the Department of Transportation's regu-

lations or in affording these individuals with opportunities to comment and be fully consulted on such services.

Finally, Mr. President, the parenthetical reference in the compromise provision to any applicable Government-wide standards which might exist with respect to the implementation of section 504 of the Rehabilitation Act of 1973 was added to make clear that the Secretary's obligation to promulgate regulations under this provision is not intended, insofar as section 504 is concerned, to supersede any obligation he may have to conform such regulations to any applicable Government-wide standards for implementation of section 504 that are validly prescribed within the executive branch. Such standards are currently set forth in the so-called lead-agency regulations which, pursuant to Executive Order 11914, were originally issued by the Department of Health, Education, and Welfare, and are now, under Executive Order 12250, the responsibility of the Department of Justice. If such regulations were revised in such a way as to be declared unlawful in court or were withdrawn by the Department of Justice, the Secretary of Transportation would in no way be relieved of his responsibility to promulgate the regulations required under this provision. I wish to emphasize that this parenthetical is inapplicable to the Secretary of Transportation's responsibilities under the compromise version for the promulgation of the regulations to the extent that those regulations implement section 16(a) of UMTA or section 165(b) of the Federal-Aid Highway Act of 1973.

Before closing, I want to express my thanks to staff who provided Senator RIEGLE and me with such excellent assistance on these issues—David Yudin of the Banking Committee staff, David Krawitz of Senator RIEGLE's staff, and Ed Scott and Jon Steinberg, who represented me in this matter.

For the reasons I have stated, Mr. President, I believe that the provisions of the compromise have set the stage for the Federal Government once again to begin to discharge its responsibilities for insuring that the rights of handicapped and elderly persons to transportation services will be met and that these persons will not be discriminated against in the provision of federally assisted transportation.●

"ALL EVENTS TEST"

● Mr. LAXALT. Mr. President, today I would like to discuss a vital matter with my colleague from Nevada and the chairman of the Senate Finance Committee. With the short time left in this session, I know it is impossible to push through corrective legislation, but I want to alert the Senate of the existence of the problem and serve notice that this Senator will do all he can to see that it is resolved early next year.

Mr. President, the problem arose when the U.S. district court in Nevada overturned 50 years of tax policy and a tax court case and reinterpreted the "all events test" for accrual taxpayers. In that case, *Flamingo Resort Inc.* v. *United States"* 485 F. Supp. 926 (1980), the taxpayer was ordered to declare as income gambling "markers," or debts, held at the end of the tax year. The complication is that in Nevada, gambling debts are legally void—not voidable—and cannot be enforced or collected through the courts. Thus, the court ruled that accrual taxpayers must include as income legally unenforceable debts.

Mr. President, I believe this result is as unfair as it sounds. Under the new law, the taxpayer would be forced to pay taxes on income he may never see and cannot legally collect.

Mr. CANNON. Mr. President, I totally agree with the remarks of my friend, the junior Senator from Nevada. I share his alarm about the implications of the court's decision in the Flamingo case.

The time-honored "all events test" is at issue in this case, which was upheld by the ninth circuit. This legal principle states that income should not be accrued for tax purposes until "all events" have occurred which fix the taxpayer's right to receive the income. If we apply this longstanding doctrine to Nevada it would mean the point at which the money for markers is actually collected. Before that time there is no right to receive the income because the debtor can walk into any court and have the debt declared legally void.

In a case before the U.S. Tax Court, the court ruled that, in Nevada, because markers are not legally enforceable "all events" had not occurred, giving rise to the "right" of that income. On the other hand, the ninth circuit in the Flamingo case ruled that the "all events test" in this situation did not require legal enforceability as a prerequisite. In essence, the court scrapped the "all events test" for the gaming industry in Nevada. Keep in mind that this ruling was made in spite of the fact that the "all events test" has been applied to many other businesses for several years. Here is a case where the legal gaming industry is being singled out for different treatment.

Mr. LAXALT. I thank my good friend for his astute analysis of the legal situation. As he is an acknowledged expert on the subject of legalized gaming in this country, I would like to ask him a question. Will this ruling have an impact on the legalized gaming industry in Nevada?

Mr. CANNON. Absolutely. This ruling would have a significant impact on Nevada's economy—an economy which depends on its legal gaming industry for over 81 percent of its revenue and 61 percent of its jobs. If the ninth circuit ruling is allowed to stand, Nevada's hotels/casinos will be forced to utilize working capital to pay the IRS assessments. The tab will run into the hundreds of millions.

This will force the taxpayers to cut back and will cost jobs. I think everyone can agree that this is not the time to be eliminating jobs. Despite popular myths, the gaming industry is not recession proof. The industry has been seriously hurt by the present recession and unemployment levels are growing in Nevada.

The ultimate irony is that the economy of Nevada will be devastated in order to pay taxes on income which does not legally exist and may never be seen by the taxpayers.

Mr. LAXALT. I appreciate my colleague's remarks. Also, beyond its impact on the State of Nevada, the ruling of the ninth circuit will have far ranging results. The "all events test" is weakened so that legal enforceability is no longer a requirement, billions of dollars of deductions will be taken. The drain on the Treasury will be tremendous. At a minimum, the decision will tie up the courts in knots as every accrual basis taxpayer tests the new ruling.

For all these reasons, Senator CANNON and I introduced S. 2985. S. 2985 is designed to correct this problem and protect both the taxpayers and the Treasury. The chairman of the Finance Committee called for and held hearings on S. 2985 on Wednesday, December 16. I thank him for all his consideration, particularly at this late date.

Mr. DOLE. Mr. President, I appreciate the comments from the two Senators from Nevada. As the junior Senator from Nevada pointed out, the Finance Committee held hearings on S. 2985 last Wednesday. Then, as today, they outlined a serious problem. The Treasury Department has some objections to S. 2985 as originally drafted, but I am hopeful and confident that we can reach an agreeable compromise. Unfortunately, there is not enough time left this session to do so. I understand that the bill will be reintroduced next year. At that time the Finance Committee will work with its sponsors and the Treasury in an attempt to fashion suitable legislation.

Mr. LAXALT. Mr. President, I am very pleased by the commitment made by the chairman of the Senate Finance Committee. I look forward to working with him next year and resolving this problem quickly.●

CLARK EQUIPMENT CO.'S COMPLAINT AGAINST ARMY SOLE SOURCE CONTRACT

● Mr. LEVIN. Mr. President, in March 1981, representatives of the Clark Equipment Co. of Benton Harbor, Mich., met with members of my staff to register their complaints about a recent announcement of a sole source contract by the Army. The award was being made to Caterpillar Tractor Co. for the purchase of a fleet of six commercial construction equipment items for use by the Rapid Deployment Force. Officers of Clark argued that there was no reasonable basis for the decision by the Army that only Caterpillar was able to perform the contract.

I asked the Government Accounting Office to investigate the allegation of Clark Equipment. The GAO, after conducting what appears to be a very thorough investigation into the matter concluded in a letter to me that although the Army justified its use of a sole source procurement on the defense acquisition regulation which allows competition to be waived when the supplies can be obtained from only one person or firm, that GAO found "that several other suppliers could have furnished the equipment and that the Army had ample opportunities to solicit this procurement competitively." The GAO went on to say that the Army's decision to secure all the equipment through a "fleet buy" concept—where all pieces are obtained from one manufacturer—was unnecessary and eliminated several potential suppliers.

I asked the Army to respond to GAO's report. They did so in a letter to me dated December 9, 1981. While defending their position on the one hand, they also stated that since the Army is "strongly committed to competition in its procurements," they had reviewed this procurement and determined that some competition was feasible; they would compete one of the six pieces of equipment; namely, the T-3 tractor.

Well, Mr. President, I was curious to see just what would happen as a result of that decision—to use this as a test to confirm what I have always believed to be true—that competition saves money, substantial sums of money, and that we should be everything in our power to use competition in Federal procurements.

I asked the GAO to report to me on the results of the competitive procurement for the T-3 tractor. In a letter to me dated November 26, 1982, Donald Horan, the Director of the Procurement, Logistics and Readiness Division of the GAO reported that what was to cost $1,078,000 under the sole source contract, was now, pursuant to an award to the lowest bidder, going to cost $609,923—a savings of 43 percent.

Mr. President, a 43-percent savings is a profound amount. What was going to cost over $1 million is now costing us just over $600,000 solely because the contract was competed. This is a classic example of what many of us in this body have been saying for so long—competition saves money and must be used to every extent practicable and possible.

Mr. President as an ardent advocate for competition in Federal procurement, I rest my case on a 43-percent savings.

I ask that the three letters exchanged between myself, GAO, and the Department of Army be included in the RECORD at this time.

The letters follow:

U.S. GENERAL ACCOUNTING OFFICE,
Washington, D.C., October 15, 1981.

Subject: Allegations of an Inappropriate Army Sole-Source Award for Commercial Construction Equipment (PLRD-82-13)

Hon. CARL LEVIN,
Ranking Minority Member, Subcommittee on Oversight of Government Management, Committee on Governmental Affairs, U.S. Senate.

DEAR SENATOR LEVIN: On April 24, 1981, you asked us to assess the Department of the Army's decision to buy commercial construction equipment from Caterpillar Tractor Company on a sole-source basis.

The Army's justification for this sole-source procurement is based on Defense Acquisition Regulation (DAR) 3-210-2(i) which allows competition to be waived when "supplies or service can be obtained from only one person or firm (sole source of supply)." However, we found that several other suppliers could have furnished the equipment and that the Army had ample opportunities to solicit this procurement competitively. By using a "fleet-buy" concept (restricting consideration only to those firms that could manufacture all of the desired pieces of equipment), the Army eliminated several potential suppliers.

Also, because the award had not yet been made to Caterpillar at the time of our review, we discussed our findings with U.S. Army Tank-Automotive Command (TACOM) officials and suggested they resolicit the procurement on a competitive basis. They declined to do so because the equipment is urgently needed for the Army's rapid deployment force and because, in their view, a delay of up to a year for a resolicitation, negotiation, and award would seriously jeopardize the Army's mission.

OBJECTIVE, SCOPE, AND METHODOLOGY

Our objective was to assess the appropriateness of and justification for the Army's decision to buy construction equipment from Caterpiller Tractor Company on a sole-source basis. To accomplish our objective, we reviewed (1) Army procurement regulations and policy concerning sole-source procurements, (2) the proposed contract and support files at TACOM and the industry correspondence files maintained by the Military Equipment Research and Development Command (MERADCOM) at Fort Belvoir, Virginia, and (3) cost data, parts commonality information, and industry worldwide support capabilities. In addition, we interviewed TACOM, MERADCOM, and construction equipment industry officials.

BACKGROUND

The XVIII Airborne Corps, consisting of the 82d and 101st Airborne Divisions, will use the commercial construction equipment. Because it is the only large airborne organization within the Army, the Corps is the Army's primary rapid deployment force and, as such, must quickly respond to aggression directed against the United States.

The Corps must be self sufficient in the field because it could be conducting land operations in undeveloped areas or in areas where quick defensive construction is needed. These types of construction would include building airstrips and roads so that other ground combat units could be brought quickly into the troubled area. Other defensive earth-moving construction would include building artillery positions and antitank ditches. The nature of these missions requires that the earth-moving equipment be both air-mobile and air-droppable.

The proposed procurement is designed to replace outdated earth-moving equipment within the XVIII Airborne Corps. The present equipment, which the Army bought between 1962 and 1969, had an expected machine life of from 8 to 10 years. The Army stated that because of the age of this equipment, maintenance is hampered due to the shortage of spare parts, and thus, the rapid deployment mission is or could be adversely affected.

The types of construction equipment required to replace the existing inventory and to improve the mission capabilities of the XVIII Corps are as follows:

T-3 and T-5 size bulldozer tractors—level ground, spread dirt, and dig out ditches.

Scoop loader—loads dump trucks and stockpiles dirt.

Scraper—scrapes ground surfaces and levels roadbeds.

Road grader—maintains roads and spreads and levels fill dirt over uneven terrain.

Water distributor—hauls and distributes water over construction sites.

Because Army medium lift helicopters must transport this equipment, some of it will require sectionalization. Sectionalization is a process by which a machine can be broken into two or more major components, each of which is within the weight limitations for helicopter airlift.

In addition to helicopter airlift, all the equipment must conform to both weight and dimensional restrictions for air-transport or air-drop from the C-130 and C-141 Air Force cargo aircraft.

The specific number of equipment to be procured follows:

Item	Number of	
	Nonsectionalized equipment	Sectionalized equipment
T-3 bulldozer tractor	8	0
T-5 bulldozer	26	8
Scoop loader	20	6
Scraper	12	7
Road grader	20	11
Water distributor	9	3

Army officials told us they intend to buy loaders, graders, and the bulldozer tractors with fiscal year 1981 funds and the scrapers and water distributors with fiscal year 1982 funds. Also, the Army intends to exercise a future contract option to buy 53 additional

items to meet war reserves and maintenance float requirements.

FLEET-BUY CONCEPT

To meet its rapid deployment mission, the XVIII Airborne Corps requested that the equipment be procured under a fleet-buy concept. Under this concept, it was envisioned that all of the desired pieces of equipment would be obtained from one manufacturer rather than from various manufacturers as was done in the past. The Corps believed that its mission capability would be increased if only one supplier was responsible for parts supply, training, and equipment maintenance. The following factors were among those cited as advantages of the fleet concept:

A high degree of parts commonality provides for a greater number of interchangeable spare parts, thereby reducing the requirements for parts in stock.

A single supply source enhances the mission capability of the military unit, allowing uniform maintenance procedures and a common supply source.

A family of vehicles with common parts reduces training time for operators and mechanics as well as simplifying maintenance procedures.

Although TACOM procurement officials initially expressed some concern over the possible impropriety of purchasing the entire fleet from a single source, they decided to support the fleet-buy concept. In reaching this decision, they considered a precedent set by the U.S. Air Force Bare Base Program of 1970-73. Under that program, the Air Force, using the fleet-buy concept, successfully bought similar equipment from a single supplier following competitive bidding procedures.

SOLE-SOURCE PROCUREMENT DECISION NOT JUSTIFIED

The Army could not show us evidence from its records or industry analyses to support its decision to purchase construction equipment on a sole-source basis from Caterpillar Tractor Company.

In May 1980, the Army surveyed the construction equipment industry to determine the availability of the types of equipment needed and the extent of competition that could be obtained under its fleet-buy concept. The industry surveys prepared by the Army indicated three companies—Caterpillar, John Deere and Company, and International Harvester Company—could provide five of the six pieces of equipment. Two other companies—Clark Equipment Company and J.I. Case—could produce three pieces of equipment. Further, several other construction equipment manfacturers could produce one or two pieces of equipment. Although these Army surveys are not meant to the be all-inclusive as to industry's capabilities and potential suppliers, they did demonstrate competition could be obtained.

After preparing industry survey and equipment specifications and considering industry correspondence and comments regarding these equipment specifications, the Army decided to buy the equipment sole source from Caterpillar. This decision was based on the Army's judgement that Caterpillar was the only company expressing interest in the fleet-buy concept, and other equipment manufacturers either did not produce the necessary equipment or could not meet equipment specifications because of the increased engineering, redesign, and cost involved.

Mainly, this decision was directly attributable to the restrictive interpretation of the fleet-buy concept adopted by the Army for this procurement. Unlike the fleet-buy definition used by the Air Force in its precedent setting Bare Base Program, the Army's definition required that a successful bidder must have manufactured or marketed all of the vehicles in the fleet. In contrast, under the Air Force's definition, bidders were free to supply equipment manufactured by other companies, as well as their own.

Even under the Army's definition, TACOM found it necessary to make an exception in the case of the water distributor because none of the potential sources of supply surveyed for the fleet buy manufactured this piece of equipment. This exception, as well as TACOM's interpretation of the fleet-buy concept and its intention to buy the remaining equipment on a sole-source basis from Caterpillar, was clearly stated in its Request For Proposal, dated February 3, 1981: "We are proposing to negotiate on a sole source basis for the entire fleet with Caterpillar Tractor Company * * *. 'Fleet Approach' requires that the offeror submit a proposal for the entire fleet and have manufactured or marketed all of the vehicles in the fleet except the water distributor * * *."

In response to the Request For Proposal, TACOM received one proposal from Caterpillar. Although none of the other manufacturers responded, several of them questioned the Army's justification for its sole-source decision.

In reply to these inquiries, the Army reiterated the desirable benefits of obtaining the entire fleet of vehicles from one source. While we do not dispute the benefits to be derived from obtaining the equipment from one source under the fleet-buy concept, we did not find sufficient justification supporting the sole-source selection of Caterpillar for the fleet buy.

Our review of Army files disclosed no significant advantages in limiting this procurement to Caterpillar. Parts commonality, one of the claimed benefits for a fleet buy, did not appear to be any greater for Caterpillar equipment than for others. For example, our analysis and comparison of available file data disclosed the commonality of Caterpillar equipment to be no greater than for equipment manufactured by John Deere and Company. Moreover, we found that the Army made no attempt to determine the relative commonality of the equipment manufactured by the potential suppliers.

Concerning other benefits of the fleet concept, that is, common supply source, uniform maintenance, and training procedures, it also appears that the other potential suppliers could have satisfied the Army's needs. For example, we found that all of the other major manufacturers (Case, International Harvester, Deere, and Clark), as well as Caterpillar, possess worldwide parts distribution and most already supply spare parts for Army equipment throughout the world. Again, as in the parts commonality example, we found that the Army had not analyzed the relative capabilities of the potential suppliers.

Finally, we uncovered no evidence which supports the Army's claim that other potential suppliers expressed an unwillingness to bid on this procurement. Our review of Army files disclosed that most of the correspondence from these companies related to equipment specifications. Although some industry responses state problems in meeting various specification requirements because of the increased engineering, redesign, and costs involved, these letters and correspondence do not support the Army's contention that only Caterpillar expressed a willingness to supply this equipment.

Rather, we believe that these files substantiate the problems which would be experienced by the entire construction equipment industry in complying with the specification requiring that the equipment be air-transportable and air-droppable. We believe this is evidenced by the fact Caterpillar is having difficulty meeting air transportability requirements for the scraper and only until recently did Caterpillar indicate that it could comply with the specifications for the grader, loader, and two tractors. The specification problems Caterpillar experienced and is currently trying to solve were specifically cited in Army-industry correspondence files.

In our view, competition would be encouraged if the Army were to revise its definition of the fleet-buy concept to permit a given company to bid under the concept without requiring that the prospective bidder manufacture each piece of equipment. Therefore, companies which manufacture some but not all of the equipment would have an opportunity to bid, as long as they were able and willing to provide worldwide support for all the equipment.

If this were to occur, the fleet-buy concept would feature a family of vehicles, increased competition, a possibly lower unit price, and viable options to those manufacturers otherwise restricted from bidding, without abandoning the concept and all its merits applicable to rapid deployment.

The Army has not yet awarded a contract to Caterpillar, since negotiations continue regarding price, delivery dates, and specification requirements. Current estimates are that the contract will be awarded in October 1981. The current value of the proposed contract is $22 million, an almost 50-percent increase from the original Army estimate of $14 million. In view of the pending award, we discussed our findings with TACOM officials on September 22, 1981, and recommended they consider terminating the ongoing negotiations with Caterpillar and resoliciting the procurement on a competitive basis.

In reply, TACOM officials informed us that it is necessary to proceed with the contract award because the XVIII Airborne Corps is in dire need of the equipment and its rapid deployment mission would be seriously jeopardized as a result of any further delay in obtaining the needed equipment. TACOM officials estimated that resoliciting for competitive proposals, negotiating with a contractor, and awarding a contract would result in an additional 1-year delay in supplying equipment to the Corps.

CONCLUSIONS

The Army's decision to negotiate a sole-source contract with Caterpillar Tractor Company is not adequately justified and lacks sufficient support documenting Caterpillar as the only capable and willing manufacturer and/or supplier of the construction equipment in question. By restricting consideration only to those firms that could manufacture all the equipment to be purchased, the Army eliminated several potential suppliers who do not manufacture all the pieces of equipment or could not meet vehicle specifications with their own equipment. In the future, this procurement, as well as others of a similar nature, should be procured competitively.

As directed by your Office, we did not obtain written comments for Defense or Army officials. However, we did discuss the

results of our review with Army officials and considered their comments in preparing this report.

As arranged with your Office, unless you publicly announce its contents earlier, we plan no further distribution of this report until 30 days from the date of the report. Then, we will send copies to interested parties and make copies available to others upon request.

Sincerely yours,

DONALD J. HORAN,
Director.

DEPARTMENT OF THE ARMY,
OFFICE OF THE ASSISTANT SECRETARY,
Washington, D.C., December 9, 1981.

Hon. CARL LEVIN,
Subcommittee on Oversight of Government Management, Committee on Governmental Affairs, U.S. Senate, Washington, D.C.

DEAR SENATOR LEVIN: Attached for your information is the Army's response to the United States General Accounting Office (GAO) report dated 15 October 1981, Subject: Allegations of an Inappropriate Army Sole-Source Award for Commercial Construction Equipment.

As indicated in that response, the Army continues to believe that the commonality of construction equipment provided by a fleet buy will provide significant advantages. We believe the proper and efficent equipping of the airborne engineer elements of the Rapid Deployment Force (RDF) is critical to the performance of their mission. Thus, the Army believes it has a logical and sufficient rationale for contracting this requirement with a single manufacturer. Further, the equipment is quickly needed as part of our efforts to build an effective and supportable Rapid Deployment Force.

However, the Army is strongly committed to competition in its procurements. Accordingly, we have again reviewed this program for ways to introduce competition where feasible. We have determined that one of the six pieces of equipment, the T-3 tractor lends itself to competition among several manufacturers with minimal impact on the XVIII Airborne Corps. Accordingly the Army intends to procure this item on a competitive basis.

The decision to award the major portion of this requirement to Caterpillar Tractor Company was based on the unique and urgent requirements of the XVIII Airborne Corps. It was made only after a lengthy review of industry capabilities and interest which was conducted with the objective of obtaining meaningful competition. It should be noted that this procurement represents only about 2 percent of construction equipment planned in Fiscal Years 1982 through 1987. Generally speaking, the balance of the construction equipment procurement is planned for competitive solicitation utilizing multi-year contracts.

I appreciate your interest in this matter and look forward to your support for Army programs in the future.

Sincerely,

J. R. SCULLEY.

DEPARTMENT OF THE ARMY,
OFFICE OF THE ASSISTANT SECRETARY,
Washington, D.C., December 9, 1981.

Hon. CHARLES BOWSHER,
Comptroller General, United States, Washington, D.C.

DEAR MR. BOWSHER: On 15 October 1981, the Honorable Carl Levin, United States Senate, was provided with an assessment by the United States General Accounting Office (GAO) of the Army's decision to procure "a fleet" of six (6) commercial construction equipment items from Caterpillar Tractor Company on a sole-source basis. The GAO's fundamental finding was that the Army's requirement to procure these items from one manufacturer was unnecessarily restrictive and, therefore, eliminated potential competitors.

The Army requirement for this low density procurement from a single manufacturer is based on the unique and vital missions of the XVIII Airborne Corps in support of the Rapid Deployment Force (RDF). This procurement will restore the capability of the XVIII Airborne Corps Engineer Units to support one of the most difficult missions of modern warfare: air landing or air dropping a large force in a distant and possibly hostile area and sustaining that force by air for an extended period.

Current on-hand engineer equipment is so diverse, old, and unreliable that it causes a serious shortfall in its ability to accomplish RDF missions. Tactical exercises have shown the operational capability of current equipment is reduced to approximately 40 percent of that necessary to construct and maintain the airfields, roads, and defensive positions which are axiomatic to the success of the RDF.

The major reasons to procure from a single manufacturer are the significant benefits gained through "commonality". Commonality is categorized through the following attributes:

a. Increased Interchangeability: This includes parts, assemblies/subassemblies, manuals, operator instructions and maintenance/repair procedures, inherent in a single manufacturer's equipment.

b. Increased Cannibalization: The benefits derived by the units' ability to immediately fix a needed item of equipment using parts from other damaged/inoperable equipment, when stocks of repair parts are not available.

c. Increased Sustainability: Increases "days of repair parts supply" for combat operations within weight/cube constraints. Efficiency achieved because fewer different items are required to be stocked for a fleet manufactured by a single source and, therefore, more of each can be airlifted.

d. Increased Human Efficiencies: These are the human factors associated with repetitive operations due to the soldier's exposure to the same or similar pieces of equipment and the similar manuals and method of maintenance required for equipment produced by a single manufacturer.

In the combat scenarios portrayed utilizing the RDF, time, efficiency, sustainability and mission fulfillment are of the essence. The abuse that this engineer equipment will receive in performing its combat mission is substantial and will require the unit's ability to fix, maintain, and operate the equipment to maximum efficiency.

The factors of increased interchangeability, increased cannibalization, increased sustainability, and increased human efficiency, provide the commander the ability to increase his chances of meeting these demands. For example, an engineer operator's Military Occupational Specialty (MOS) requires him to operate all six types of equipment although he normally concentrates on operating only one type. Due to probable casualties in both personnel and equipment which will be experienced during the initial air drop, it is quite likely that operators will be required to efficiently operate and maintain equipment other than the type they normally operate. This example, plus the requirement for the unit to be able to fix a given piece of equipment using parts on-hand or cannibalization, may be the key to mission success.

The GAO's assessment also cited 50% "cost growth" on this program. It must be noted that the planned program for Fiscal Year 1981 and Fiscal Year 1982 originally included a total of 130 items of construction equipment necessary to fill the Initial Issue Quantities (IIQ) of the XVIII Airborne Corps. The cost of this equipment was originally estimated at $15.4 million. Prior to any determination of contract award, the Army identified an additional quantity of 53 items estimated at $7.6 million necessary to support war reserve, maintenance float and potential loss requirements, bringing the total program to 183 pieces of equipment at $23.0 million. The $5.0 million required to fully fund this program now that firm estimates are available is primarily associated with underestimating the cost of sectionalization and other modifications associated with military transportation requirements.

The Army did not originally intend to procure this fleet on a sole source basis. The Army conducted a market survey which indicated that three companies (Caterpillar, IHC, John Deere) could probably manufacture all six items. There were, however, differences in the degree each company's equipment would require modification in order to meet the demanding specifications necessitated by the air transport and air drop requirements; and each company would have to subcontract the towed portion of the two-piece water distributor. Inclosed matrix depicts the results of the market survey conducted by the U.S. Army Tank Automotive Command (TACOM). As discussions progressed during the solicitation planning stage, both John Deer and IHC advised that they would not bid on a "family" or fleet buy type of procurement. In view of these discussions with possible suppliers, it was determined that competition was not available for the XVIII Airborne Corps' requirement for a fleet buy from a single manufacturer. Accordingly, a noncompetitive, sole-source solicitation was issued to the only willing supplier who would meet the requirement, Caterpillar Tractor Company. However, to ensure that we had not drawn an incorrect conclusion from the survey and discussions with contractors, a letter inquiring as to interest in bidding on the requirement and the solicitation were mailed to four prospective suppliers. No firm other than Caterpillar expressed a desire to bid on our requirements for fleet buy.

The Army has reviewed each and every piece of equipment in our proposed procurement and although we remain committed to commonality when appropriate, we have found that the T-3 Tractor can be procured separately from the other items. Three major factors support this conclusion: First, the T-3 Tractor will not have to be procured in both a sectionalized/non-sectionalized version. This means that several manufacturers could competitively bid commercial tractors with minimal modifications, thus assuring competition. Second, the small number of T-3 Tractors to be purchased will mitigate any loss of commonality which might result from a competitive award to a firm other than the fleet supplier. Third, the market survey indicates this item has the shortest production/delivery leadtime, thus, minimizing the effect of a resolicitation.

Therefore, the Army has determined that the contract award for five of the six construction equipment items to Caterpillar Tractor Company is appropriate. The Army will resolicit the T-3 Tractor program on a competitive basis. The solicitation is expected to be released in January 1982 with anticipated award by mid 1982.

Sincerely,

J. R. SCULLEY.

U.S. GENERAL ACCOUNTING OFFICE,
Washington, D.C., November 26, 1982.

Subject: Request that GAO review Army comments on prior report, "Allegations of an Inappropriate Sole-Source Award for Commercial Construction Equipment" (PLRD-82-13, October 15, 1981.

Hon. CARL LEVIN,
Ranking Minority Member, Subcommittee on Oversight of Government Management, Committee on Government Affairs, U.S. Senate.

DEAR SENATOR LEVIN: On January 27, 1982, you asked us to evaluate Army comments received in response to the subject report. Specifically, you asked us to:

Obtain comments from International Harvester and Deere & company on the accuracy and validity of the points raised by the Army in their responses, including the Army's stipulation that both companies would not bid on a "family" or fleet buy type of procurement;

Determine the accuracy and relevance of the Army's contention that the equipment performance requirements (including airdroppability) for this procurement differ from the equipment requirements under the Air Force's "Bare Base Program;"

Determine the degree of commonality which exists among the Caterpillar construction equipment in this procurement; and

Determine how much of the Army's recent construction equipment procurement has been sole source.

FAILURE OF OTHER COMPANIES TO BID ON A FAMILY OF VEHICLES

We agree with the Army's contention that other companies would not bid, but it does not mean they were not interested in bidding. Discussions with officials of major construction equipment firms, including International Harvester and Deere & Company, indicated they were willing to bid but unable to do so due to the restrictions the Army placed in its request for proposal. Some suppliers indicated they were interested in bidding on those items in the proposed buy that they manufacture. An official of one firm said that if the scraper was eliminated from the fleet buy, it would have bid to supply the remaining equipment. In general, the suppliers were of the opinion that the Army had already decided upon Caterpillar as its source and bidding on the fleet buy would not be in their best interests.

EQUIPMENT PERFORMANCE REQUIREMENTS

We agree with the contention that the equipment performance requirements for the Army's fleet of vehicles differ from the equipment requirements under the Air Force's "Bare Base Program." However, this point is not relevant. Our point is that the Army, in implementing its fleet buy, restricted competition while the Air Force, under its Bare Base Program, encouraged competition. The Army required that a successful bidder must have manufactured or marketed all of the equipment needed. In contrast, the Air Force competitively purchases—from single suppliers—equipment similar to that desired by the Army by allowing bidders to supply equipment manufactured by other companies, as well as their own.

COMMONALITY OF EQUIPMENT

As noted in our prior report, parts commonality, one of the claimed benefits for a fleet buy, did not appear to be any greater for Caterpillar equipment than for other suppliers. Also as reported, the Army did not determine the relative commonality of the equipment manufactured by the potential suppliers. However, two of these suppliers—Deere & Company and Caterpillar—provided the Army a limited amount of information on the relative commonality of their equipment. In its submittal, Deere & Company informed the Army that "the diversity of these machines does not lend itself to accomplishing any significant degree of common parts." Nevertheless, this supplier indicated, for the five items it manufactures, that 1 percent of the parts were common. The highest degree of commonality between two of the five items was 10 percent. In contrast, parts lists submitted by Caterpillar for five of its items indicated less than .06 percent of the parts were common to all items. However, 12 percent of the parts were common to two items, slightly better than Deere & Company's 10 percent.

RECENT SOLE-SOURCE PROCUREMENTS OF CONSTRUCTION EQUIPMENT

The extent of recent Army sole-source procurement of construction equipment is shown in the following comparison of purchases made during the last two fiscal years.

	Fiscal year	
	1981	1982
Sole-source purchases:		
Number	19	39
Dollar value (in millions)	$7.2	[1] $31.5
All purchases:		
Number	66	91
Dollar value (in millions)	$41.2	$68.5
Sole-source purchases as a percentage of all purchases:		
Number	29	43
Dollar value	$17	$46

[1] Includes awards totaling $29 million to Caterpillar for the fleet buy.

EVENTS SINCE OUR OCTOBER 1981 REPORT

As you recall, the Army declined our suggestion to resolicit the planned fleet purchase on a competitive basis because a delay of up to a year could have resulted and the equipment was urgently needed to build an effective and supportable Rapid Deployment Force. However, in response to our report, the Army indicated it had reevaluated the purchase and determined that one of the pieces of equipment—the T-3 tractor—could be procured separately on a competitive basis with minimum impact. With this exception, the Army did award four sole-source contracts to Caterpillar in December 1981 and July 1982 totaling $29 million for furnishing and modifying the remainder of the fleet buy.

With respect to the competitive resolicitation of the T-3 tractor, two suppliers—Caterpillar and Deere & Company—submitted bids. On July 23, 1982, a contract for $609,923 was awarded to Deere & Company, the lowest bidder. The price, thus obtained, compared to Caterpillar's original sole-source price of $1,078,000 resulted in an estimated savings of about $468,000 or 43 percent.

Also in response to our report, the Army stated that, in the future, it plans to competitively purchase almost all of its fiscal year 1982-1987 requirements for construction equipment. As part of these plans, the Army recently submitted separate invitations for bids to major construction equipment suppliers for multiyear purchases of over 7,000 graders, loaders, compressors, and scrapers at an estimated cost of $1 billion.

We trust these additional comments will assist you in your monitoring of Defense sole-source procurements.

Sincerely yours,

DONALD J. HORAN,
Director.

NUCLEAR WASTE POLICY ACT

● Mr. HART. Mr. President, I commend the distinguished Senator from Idaho (Mr. MCCLURE) for his efforts to have this Congress enact comprehensive nuclear waste legislation. We have been wrestling with this issue in the Congress for the last decade. Two years ago, again in a lameduck session, a conference committee of House and Senate Members failed to agree on a nuclear waste bill—and we had to begin the process all over again this Congress.

Once again, we find ourselves trying to craft a comprehensive nuclear waste bill—one that will be acceptable not only to the Senate but also to the House—in the 11th hour of the Congress. The difficulty in resolving differences among Members and between Houses, attests to the large degree of controversy that necessarily surrounds nuclear waste legislation. For, a bill such as this, has profound implications both for the environment and for the health and safety of the public. Indeed, this bill may well be the most important environmental legislation the Congress will consider this session.

In general, this nuclear waste bill, as proposed to be amended by the Senator from Idaho, represents a significant improvement over the bill passed by the Senate last spring and the House last fall. Of course, there are some provisions that still cause me concern: I think we need the increased scrutiny an environmental impact statement could provide at the point the Secretary recommends sites to the President for characterization, although I would expect the environmental assessment under section 112(b) should include as much as possible. I think we should remove restrictions on environmental impact statements on, and NRC licensing of any monitored retrievable storage facility the Congress might authorize. And I think the Congress should first receive a proposal for a test and evaluation facility before authorizing its construction. But these provisions in the McClure amendment apparently reflect an agreement with the House Members most active on this legislation. It would not be appropriate to undo that agreement here.

Mr. President, I note for the record that this bill, as proposed to be amended by the Senator from Idaho, does not contain a provision included in the bill passed last spring that caused me particular concern. Described as a technical amendment, it stated that enactment of this Nuclear Waste Policy Act demonstrates the existence of a technology to safely dispose of nuclear waste. This provision, as I understand it, sought to undermine laws in various States requiring that a demonstrated waste disposal technology exist before additional nuclear powerplants could be built within that State.

Of course, enactment of a law hardly guarantees that the technology contemplated under the law will work as promised. We all hope that we can dispose of nuclear waste safely, but we do not know for sure. That is why we are establishing a program, including licensing by the Nuclear Regulatory Commission, that will lead to construction and operation of a geologic repository for nuclear waste.

Mr. President, I am pleased that this latest compromise proposal for a nuclear waste bill does not contain the technical amendment that many States found offensive.●

RECESS UNTIL 1 P.M. TODAY

Mr. BAKER. Mr. President, I see no other Senator seeking recognition. I move, in accordance with the previous order, that the Senate stand in recess until the hour of 1 p.m. today.

The motion was agreed to and, at 1:04 a.m., the Senate recessed until 1 p.m., Wednesday, December 22, 1982.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 21, 1982:

National Council on Educational Research

Donald Barr, of Connecticut, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1982.

Carl W. Salser, of Oregon, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1983.

J. Floyd Hall, of South Carolina, to be a Member of the National Council on Educational Research for a term expiring September 30, 1983.

Donna Helene Hearne, of Missouri, to be a Member of the National Council on Educational Research for a term expiring September 30, 1983.

George Charles Roche III, of Michigan, to be a Member of the National Council on Educational Research for a term expiring September 30, 1983.

M. Blouke Carus, of Illinois, to be a Member of the National Council on Educational Research for a term expiring September 30, 1984.

Onalee McGraw, of Virginia, to be a Member of the National Council on Educational Research for a term expiring September 30, 1984.

Penny Pullen, of Illinois, to be a Member of the National Council on Educational Research for a term expiring September 30, 1984.

Elaine Y. Schadler, of Pennsylvania, to be a Member of the National Council on Educational Research for a term expiring September 30, 1984.

Donald Barr, of Connecticut, to be a Member of the National Council on Educational Research for a term expiring September 30, 1985.

Paul Copperman, of California, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1982.

James Harvey Harrison, Jr., of Virginia, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1982.

Wallie Cooper Simpson, of New York, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1982.

Paul Copperman, of California, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1985.

James Harvey Harrison, Jr., of Virginia, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1985.

Wallie Cooper Simpson, of New York, to be a Member of the National Council on Educational Research for the remainder of the term expiring September 30, 1985.

National Commission on Libraries and Information Science

John E. Juergensmeyer, of Illinois, to be a Member of the National Commission on Libraries and Information Science for a term expiring July 19, 1987.

Jerald Conway Newman, of New York, to be a Member of the National Commission on Libraries and Information Science for a term expiring July 19, 1987.

Julia Li Wu, of California, to be a Member of the National Commission on Libraries and Information Science for a term expiring July 19, 1987.

Byron Leeds, of New Jersey, to be a Member of the National Commission on Libraries and Information Science for a term expiring July 19, 1986.

Harry S Truman Scholarship Foundation

Richard J. Fitzgerald, of Illinois, to be a Member of the Board of Trustees of the Harry S Truman Scholarship Foundation for a term expiring December 10, 1985.

Truman McGill Hobbs, of Alabama, to be a Member of the Board of Trustees of the Harry S Truman Scholarship Foundation for a term expiring December 10, 1985.

Margaret Truman Daniel, of New York, to be a Member of the Board of Trustees of the Harry S Truman Scholarship Foundation for a term expiring December 10, 1987.

Gloria Ann Hay, of Alaska, to be a Member of the Board of Trustees of the Harry S Truman Scholarship Foundation for a term expiring December 10, 1987.

Federal Mine Safety and Health Review Commission

Richard V. Backley, of Virginia, to be a Member of the Federal Mine Safety and Health Review Commission for a term of 6 years expiring August 30, 1988.

L. Clair Nelson, of Virginia, to be a Member of the Federal Mine Safety and Health Review Commission for a term of 6 years expiring August 30, 1988.

National Science Foundation

Charles E. Hess, of California, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988.

John H. Moore, of California, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988.

Norman C. Rasmussen, of Massachusetts, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988.

Roland W. Schmitt, of New York, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988.

Robert F. Gilkeson, of Pennsylvania, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988.

William F. Miller, of California, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988.

William A. Nierenberg, of California, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1988.

Federal Council on the Aging

Edmund T. Dombrowski, of California, to be a Member of the Federal Council on the Aging for a term expiring June 5, 1985.

National Council on the Handicapped

Nanette Fabray MacDougall, of California, to be a Member of the National Council on the Handicapped for a term expiring September 17, 1984.

ACTION Agency

Betty H. Brake, of Oklahoma, to be Deputy Director of the ACTION Agency.

Equal Employment Opportunity Commission

David L. Slate, of California, to be General Counsel of the Equal Employment Opportunity Commission for a term of 4 years.

National Institute of Education

Manuel J. Justiz, of New Mexico, to be Director of the National Institute of Education.

National Foundation on the Arts and the Humanities

Allen Drury, of California, to be a Member of the National Council on the Arts for the term expiring September 3, 1988.

Celeste Holm, of New York, to be a Member of the National Council on the Arts for the term expiring September 3, 1988.

Raymond J. Learsy, of New York, to be a Member of the National Council on the Arts for the term expiring September 3, 1988.

Samuel Lipman, of New York, to be a Member of the National Council on the Arts for the term expiring September 3, 1988.

George L. Schaefer, of California, to be a Member of the National Council on the Arts for the term expiring September 3, 1988.

Robert Stack, of California, to be a Member of the National Council on the Arts for the term expiring September 3, 1988.

C. Douglas Dillon, of New Jersey, to be a Member of the National Council on the Arts for the term expiring September 3, 1988.

William Laurens Van Alen, of Pennsylvania, to be a Member of the National Council on the Arts for the term expiring September 3, 1988.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify

before any duly constituted committee of the Senate.

DEPARTMENT OF DEFENSE

Thomas Edward Cooper, of Virginia, to be an Assistant Secretary of the Air Force.

IN THE AIR FORCE

The following officers for appointment in the U.S. Air Force to the grade of brigadier general, under the provisions of chapter 36, title 10 of the United States Code:

To be brigadier general

Col. Marcus A. Anderson, [redacted] FR, Regular Air Force.
Col. Charle W. Bartholomew, [redacted] FR, Regular Air Force.
Col. Philippe O. Bouchard, [redacted] FR, Regular Air Force.
Col. Charles P. Cabell, Jr., [redacted] FR, Regular Air Force.
Col. James S. Cassity, Jr., [redacted] FR, Regular Air Force.
Col. Larry D. Church, [redacted] FR, Regular Air Force.
Col. Gaylord W. Clark, [redacted] FR, Regular Air Force.
Col. John A. Corder, [redacted] FR, Regular Air Force.
Col. Donald R. Delauter, [redacted] FR, Regular Air Force.
Col. Robert F. Durkin, [redacted] FR, Regular Air Force.
Col. Anthony J. Farrington, Jr., [redacted] FR, Regular Air Force.
Col. Edsel R. Field, [redacted] FR, Regular Air Force.
Col. Richard F. Gillis, [redacted] FR, Regular Air Force.
Col. David M. Goodrich, [redacted] FR, Regular Air Force.
Col. Samuel J. Greene, [redacted] FR, Regular Air Force.
Col. William J. Grove, Jr., [redacted] FR, Regular Air Force.
Col. Michael D. Hall, [redacted] FR, Regular Air Force.
Col. Trevor A. Hammond, [redacted] FR, Regular Air Force.
Col. Paul A. Harvey, [redacted] FR, Regular Air Force.
Col. Richard G. Head, [redacted] FR, Regular Air Force.
Col. William K. James, [redacted] FR, Regular Air Force.
Col. James D. Kellim, [redacted] FR, Regular Air Force.
Col. Peter T. Kempf, [redacted] FR, Regular Air Force.
Col. Michael C. Kerby, [redacted] FR, Regular Air Force.
Col. Albert L. Logan, [redacted] FR, Regular Air Force.
Col. Donald A. Logeais, [redacted] FR, Regular Air Force.
Col. John M. Loh, [redacted] FR, Regular Air Force.
Col. Alan P. Lurie, [redacted] FR, Regular Air Force.
Col. Donald L. Marks, [redacted] FR, Regular Air Force.
Col. Charles A. May, Jr., [redacted] FR, Regular Air Force.
Col. Robert P. McCoy, [redacted] FR, Regular Air Force.
Col. Charles C. McDonald, [redacted] FR, Regular Air Force.
Col. Willard L. Meader, [redacted] FR, Regular Air Force, Medical.
Col. Charles D. Metcalf, [redacted] FR, Regular Air Force.
Col. Donald C. Metz, [redacted] FR, Regular Air Force.
Col. Fred R. Nelson, [redacted] FR, Regular Air Force.
Col. Thomas R. Olsen, [redacted] FR, Regular Air Force.
Col. Cecil W. Powell, [redacted] FR, Regular Air Force.
Col. Robert R. Rankine, Jr., [redacted] FR, Regular Air Force.
Col. Billy J. Rhoten, [redacted] FR, Regular Air Force.
Col. Horace L. Russell, [redacted] FR, Regular Air Force.
Col. Richard L. Stoner, [redacted] FR, Regular Air Force.
Col. Luther E. Thweatt, [redacted] FR, Regular Air Force.
Col. Norman R. Thorpe, [redacted] FR, Regular Air Force, judge advocate.
Col. Richard J. Toner, [redacted] FR, Regular Air Force.
Col. Richard J. Trzaskoma, [redacted] FR, Regular Air Force.
Col. David S. Watrous, [redacted] FR, Regular Air Force.
Col. Charles N. Wood, [redacted] FR, Regular Air Force.
Col. Larry D. Wright, [redacted] FR, Regular Air Force.
Col. Ronald W. Yates, [redacted] FR, Regular Air Force.

IN THE ARMY

The following-named officer under the provisions of Title 10, United States Code, Section 601, to be reassigned to a position of importance and responsibility designated by the President under Title 10, United States Code, Section 601:

To be lieutenant general

Lt. Gen. Robert Charles Kingston, [redacted] United States Army.

IN THE NAVY

The following named officer, under the provisions of Title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under Title 10, United States Code, section 601:

To be vice admiral

Vice Adm. Kenneth M. Carr, [redacted] 1120, U.S. Navy.

THE JUDICIARY

Sam H. Bell, of Ohio, to be U.S. district judge for the northern district of Ohio.

DEPARTMENT OF JUSTICE

Daniel F. Lopez Romo, of Puerto Rico, to be U.S. attorney for the District of Puerto Rico for the term of 4 years.

IN THE MARINE CORPS

Marine Corps nominations beginning Stephen P. Freiherr, and ending Donald L. Hairston, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 10, 1982.

IN THE NAVY

Navy nominations beginning Anthony P. Battaglia, and ending Henryk Bronislaw Zaleski, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 15, 1982.

PUBLIC HEALTH SERVICE

Public Health Service nominations beginning David W. Anderson, and ending Kevin S. Yesky, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 14, 1982.

HOUSE OF REPRESENTATIVES—*Tuesday, December 21, 1982*

(Legislative day of Sunday, December 19, 1982)

AFTER RECESS

The recess having expired, the House was called to order by the Speaker, at 12 o'clock noon on Tuesday, December 21, 1982.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Make a joyful noise to the Lord, all the lands! Serve the Lord with gladness! Come into His presence with singing!—Psalm 100: 1.

PRAYER

We are thankful, O God, for the brightness and joy of this holy season and for the promises of peace on Earth and good will toward all people. As we see the needs of the day, may we be encouraged to share with others the gifts that we have received. Enable us so to understand Your word and will that we will help all people celebrate the meaning and purpose of Your love that is our inheritance and joy.

May Your spirit and presence be with all those who labor in this place and may Your heavenly benediction remain with them all the days. Amen.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills and joint resolutions and concurrent resolutions of the House of the following title:

H.R. 2481. An act for the relief of Cynthia Gambon Rabena;

H.R. 4491. An act to exempt the U.S. Capitol Historical Society from certain taxes;

H.R. 4746. An act for the relief of Kin Chi Eng Sims;

H.R. 5456. An act to amend the Plant Quarantine Act of August 20, 1912, as amended, to eliminate certain unnecessary regulatory requirements;

H.R. 5633. An act for the relief of Dana Braford Baretto;

H.R. 6243. An act to provide for the distribution of Warm Springs judgment funds awarded in docket numbered 198 before the Indian Claims Commission, and for other purposes;

H.R. 6679. An act to authorize the Secretary of Agriculture to assess civil penalties with respect to violations of certain Acts relating to the prevention of the introduction and dissemination into the United States of plant pests, plant diseases, and livestock and poultry diseases, to increase the amount of criminal fines which may be imposed with respect to violations of such Acts, and for other purposes;

H.R. 7005. An act to amend the Federal Seed Act with respect to prohibitions relating to interstate commerce in seed mixtures intended for lawn and turf purposes and prohibitions relating to importation of certain seeds, and for other purposes;

H.R. 7143. An act to amend the Foreign Assistance Act of 1961 to extend for an additional year the Agricultural and Productive Credit and Self-Help Community Development Programs;

H.R. 7336. An act to make certain technical amendments to improve implementation of the Education Consolidation and Improvement Act of 1981;

H.J. Res. 459. Joint resolution authorizing the President to proclaim May 13, 1983, as "American Indian Day";

H. Con. Res. 153. Concurrent resolution authorizing a bust or statue of Dr. Martin Luther King, Jr., to be placed in the Capitol;

H. Con. Res. 330. Concurrent resolution expressing the sense of the Congress with respect to the Soviet Union's obligations under international law to allow Ida Nudel to emigrate to Israel, and for other purposes; and

H. Con. Res. 438. Concurrent resolution providing for the sine die adjournment of the 97th Congress.

The message also announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 1540. An act to revise the boundaries of the Saratoga National Historical Park in the State of New York, and for other purposes.

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate to the bill (H.R. 3963) entitled "An act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated."

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate to the bill (H.R. 5161) entitled "An act to designate certain lands in the Monongahela National Forest, West Virginia, as wilderness; and to designate management of certain lands for uses other than wilderness."

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 4365. An act to provide that per capita payments to Indians may be made by tribal governments, and for other purposes;

H.R. 4496. An act to grant Federal recognition to the Texas Band of Kickapoo Indians; to clarify the status of the members of the band; to provide trust lands to the band, and for other purposes; and

H.R. 6211. An act to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 6094) entitled "An act to authorize appropriations for the United States International Trade Commission, the United States Customs Service, and the Office of the United States Trade Representative for fiscal year 1983, and for other purposes," disagreed to by the House, agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DOLE, Mr. ROTH, Mr. DANFORTH, Mr. LONG, and Mr. BENTSEN, to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 6211) entitled "An act to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DOLE, Mr. PACKWOOD, Mr. ROTH, Mr. DURENBERGER, Mr. LONG, Mr. HARRY F. BYRD, JR., and Mr. MATSUNAGA for title I; Mr. STAFFORD, Mr. DOMENICI, Mr. CHAFEE, Mr. ABDNOR, Mr. SYMMS, Mr. BENTSEN, Mr. RANDOLPH, Mr. BURDICK, and Mr. MOYNIHAN for title II; Mr. GARN, Mr. TOWER, Mr. LUGAR, Mr. PROXMIRE, and Mr. RIEGLE for title III; and Mr. PACKWOOD, Mr. DANFORTH, and Mr. CANNON for title IV; to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 1867. An act to amend and supplement the acreage limitation and residency provisions of the Federal reclamation law, as amended and supplemented, and for other purposes;

S. 1939. An act to amend the Public Health Service Act to establish a National Institute on Arthritis and Musculoskeletal and Skin Diseases;

S. 1999. An act to authorize the Secretary of the Interior to install pump casings in the southern Nevada water project;

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

89-059 O-86-36 (Pt. 24)

S. 2863. An act to amend title 28 to provide protection to all jurors in Federal cases to clarify the compensation of attorneys for jurors in protecting their employment rights, and authorizing the service of jury summonses by ordinary mail; and

S. Con. Res. 46. Concurrent resolution expressing the sense of the Congress with regard to the mutual security efforts of the United States and Japan.

REQUEST TO MAKE IN ORDER CONSIDERATION OF H.R. 6094, AUTHORIZING APPROPRIATIONS FOR U.S. INTERNATIONAL TRADE COMMISSION, U.S. CUSTOMS SERVICE, AND OFFICE OF U.S. TRADE REPRESENTATIVE

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent that it shall be in order, any rule of the House to the contrary notwithstanding, to consider without intervening motion a motion to take from the Speaker's table or from conference, as may be appropriate, the bill (H.R. 6094) to authorize appropriations for the United States International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1983, and for other purposes, as passed by the Senate, with Senate amendments thereto, and to concur with the Senate amendment or amendments with an amendment or amendments thereto to the bill; all points of order against said amendment or amendments are hereby waived; all amendments shall be considered as read, and the previous question shall be considered as ordered on the motion to final adoption without intervening motion.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

Mr. MICHEL. Mr. Speaker, I reserve the right to object.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I will be happy to yield.

Mr. GIBBONS. Mr. Speaker, the purpose of this is to try to take the bill, H.R. 6094, which is a relatively noncontroversial House bill that was amended in the Senate, which is an authorization bill for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative, a noncontroversial bill, and use it as a vehicle by which we can unravel this problem we are in today.

I would say to the minority leader that we would not try to do this unless I get the consent of Mr. CONABLE.

Mr. MICHEL. Is the gentleman asking unanimous consent to bring this up for immediate consideration?

Mr. GIBBONS. No, sometime today; not immediate consideration.

Mr. MICHEL. Is this a measure that was reported out of the Ways and Means Committee?

Mr. GIBBONS. It is, but the bill H.R. 6094 has been passed by the House. It has been passed by the Senate with some very minor amendments on it. It has been sent to conference, and it is in conference. I am asking unanimous consent to either take it from the Speaker's table or from conference, as may be appropriate, in hopes that it may be a vehicle by which we can unravel the problem we have here.

I give the minority leader my word of honor that I will not do this unless it is cleared by Mr. CONABLE. It has to be cleared by Mr. CONABLE or I would not try to move it.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield.

Mr. WALKER. Could we find out whether there is anything in this bill with respect to the Arthritis Foundation?

Mr. GIBBONS. No, it has nothing to do with that. What is holding us up are two bills, the CBI and the vehicles bill. Unless we can put them together I do not see how we are ever going to get out of here.

Mr. MICHEL. I will say to the gentleman that last night the gentleman from Illinois was talking with the chairman of the Ways and Means Committee about several measures that, frankly, are noncontroversial, that might very well have to be pulled out from under the cover as a vehicle to get something here. I would just like to tell the gentleman from Florida that I know he is up to no chicanery.

Mr. GIBBONS. The gentleman has my solemn understanding that unless we can work it out with Mr. CONABLE, it will not move.

Mr. WALKER. I guess what concerns me is the fact that the gentleman is waiving all rules, all points of order and all that, and then when we are told that this is being used as a vehicle for various things I think we would like to nail down specifically what it may be a vehicle for.

Mr. MICHEL. The gentleman from Illinois would also like to know at the appropriate time.

Mr. GIBBONS. We will give the gentleman an hour's notice on that. It will include the things that are tying us up, just those matters that are within the jurisdiction of the Ways and Means Committee, the highway tax bill and the highway authorization bill that has been passed by the House, passed by the Senate.

It is hopelessly bogged down in filibusters and everything else. That is all I am trying to do, is to provide one vehicle by which we may finally get some solution to this problem.

The SPEAKER. The Chair would like to ask the gentleman from Florida if some of these bills have been kicking around since a year ago February.

Mr. GIBBONS. These are not those bills, Mr. Speaker. Those bills are entirely different.

The SPEAKER. They will not be in this package?

Mr. GIBBONS. No, they will not be. That is a different package entirely.

The SPEAKER. The Chair wants to make sure that the gentleman has arranged for complete cooperation from the minority side and we have no confrontation on any of the legislation that he is going to bring up. If there is confrontation, the Chair will request him not to bring it up.

Mr. GIBBONS. I do not think there will be, Mr. Speaker. We are going to have to find something to work out this thing. What I am trying to do is use this vehicle of this little bill that deals with the authorization for H.R. 6094 as a vehicle to get at two bills that have tied the Senate in hopeless knots and threatens to tie the Senate in hopeless knots for the rest of this session.

Mr. MICHEL. I would like to say to the gentleman before making up my mind, Mr. Speaker, that we wanted to see that highway tax bill riding on its own here if that is possible. Does the gentleman view this as a vehicle for moving the tax bill on the highways?

Mr. GIBBONS. Yes, it could be.

Mr. MICHEL. That is what I have a reservation about, because we would like to see that on its own.

Mr. GIBBONS. I have no objection to seeing it on its own, but I would tell the minority leader that it would be my purpose to try to do that, but I am afraid we are bogged down.

□ 1210

Mr. MICHEL. Mr. Speaker, let me out of an abundance of caution, object for the moment, with the understanding that there are no recriminations against the gentleman from Florida (Mr. GIBBONS).

The SPEAKER. The Chair will ask, will the gentleman from Florida (Mr. GIBBONS) withhold his request at this particular time?

Mr. MICHEL. Mr. Speaker, I suggest he withhold at least for a few minutes so we can check this out.

Mr. GIBBONS. I will withhold my request, Mr. Speaker.

The SPEAKER. The gentleman from Florida (Mr. GIBBONS) withdraws his request.

MAKING IN ORDER CONSIDERATION OF CONFERENCE REPORT ON H.R. 6211, SURFACE TRANSPORTATION ASSISTANCE ACT OF 1932

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that it shall be in order, any rule of the House to the contrary notwithstanding, to consider the conference report on the bill, H.R. 6211, at any time after it is filed in the House, that all points of order against the conference report be waived, and that the conference report be considered as having been read when called up for consideration.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

Mr. GIBBONS. Mr. Speaker, I reserve the right to object.

The SPEAKER. The gentleman from Florida reserves the right to object.

Mr. MICHEL. Mr. Speaker, I think we have a sufficient number of objectors over here for the moment.

The SPEAKER. The Chair will ask the gentleman, is the gentleman objecting or is he reserving the right to object?

Mr. MICHEL. Mr. Speaker, I will reserve the right to object and yield to the gentleman from Pennsylvania (Mr. WALKER).

The SPEAKER. The Members had better look into this. This may be the only method by which we can get out of the House today. That is what the Members on the gentleman's side are interested in.

Mr. MICHEL. Let me suggest, Mr. Speaker, that the gentleman from Pennsylvania go ahead.

Mr. WALKER. Mr. Speaker, reserving the right to object, I do so to allow the gentleman to explain what it is we are doing. Is this the gas tax bill we are wishing to get consideration on?

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Washington.

Mr. FOLEY. Yes, it is.

Mr. WALKER. Mr. Speaker, do I understand correctly that all points of order against the bill would be waived?

Mr. FOLEY. Yes.

Mr. WALKER. And that under this procedure we would not have to go to the Rules Committee with regard to all of the amendments, some of them nongermane, that have been attached in the Senate?

Mr. FOLEY. The gentleman is correct.

Mr. WALKER. So that we would be in a position of considering a bill on the floor with a lot of nongermane amendments in it that we have reason to believe might be cleaned up in conference, but again it might not be?

Mr. FOLEY. Mr. Speaker, I cannot advise the gentleman whether there will be any nongermane amendments attached to the bill when it returns, but to answer his quesiton, this waives any points of order against the conference report.

If the gentleman will permit me to say this: Last night the House agreed to a unanimous-consent request of a similar nature when offered by the distinguished chairman of the Committee on Ways and Means in terms of an amendment to the Senate amendment, and at that time all points were waived by the House, all reading of the bill was waived, the previous question was considered as ordered, and very similar expediting language was agreed to by the House, the gentleman being in the House at the time.

Mr. WALKER. Mr. Speaker, further reserving the right to object, I remember it well, and at that time the gentleman from Illinois had assured us that we would be making every effort to clean up the bill with regard to those amendments.

The problem this gentleman has is that the consideration of the gas tax bill under these circumstances could also become the consideration of a major tax package. Under the procedures that we are talking about adopting, we could end up with a major tax package out here on the floor with no ability whatsoever to make changes in it.

Mr. FOLEY. Mr. Speaker, I think I can assure the gentleman that no such likelihood exists.

Mr. WALKER. Mr. Speaker, do we have any idea at this point what we are talking about?

Mr. FOLEY. Mr. Speaker, I assume the gentleman is talking about a major tax package, being other than the 5-cent gasoline tax.

Mr. WALKER. Well, I am, and, further, what I am talking about is the fact that if we tack on a number of other things, we could end up with considerably more in the way of taxes in it.

But my point is that I would like to get some kind of an idea as to what we could expect to be in the package on which we are going to get unanimous consent to consider without a rule. Do we have any idea what is in the package other than the gas tax?

Mr. FOLEY. Again, I cannot predict for the gentleman what might be included in the conference report when it comes back. I am not able to tell him because I do not know. But I would say to the gentleman that the only difference is that last night the procedure was envisaged that the chairman of the committee might be bringing back, instead of a conference report, an amendment to a Senate amendment, and the same kind of authority was given him to do that that is attached to this which is being considered as a conference report.

I am sure the gentleman realizes that if features were added which the House would not want to agree to, the House would not have to agree to them, but I cannot predict every aspect of the conference report, I will tell the gentleman, simply because I do not know all the matters that might be brought into consideration.

Mr. WALKER. Further reserving the right to object, I understand, for instance, that there is a major unemployment compensation measure in it that is likely to come over. Is that the gentleman's understanding?

Mr. FOLEY. Yes, that is my understanding, that there might be some unemployment compensation provision in it.

Mr. WALKER. It is also my understanding that there is a tax break for utilities in California in the bill that is likely to come over; is that correct?

Mr. FOLEY. I am not advised on that. We have, however, passed in the House a provision which does provide some relief for utilities, which includes some California utilities and covers rate payers in the area. I can tell the gentleman that. That bill has already passed the House.

Mr. WALKER. Mr. Speaker, I thank the gentleman from Washington (Mr. FOLEY).

Based upon the understanding that we had with the gentleman from Illinois last night that the House is making every effort to stick with its position and not bring us back a bill that has a lot of nongermane amendments and additional material in it, I will withdraw my reservation, but I will say that I am going to object to other kinds of requests that serve as vehicles for further action.

I understand we are limiting this particular request to H.R. 6211 alone; is that correct?

Mr. FOLEY. The gentleman is precisely correct. This unanimous-consent request refers exclusively and singularly to the conference report on the bill, H.R. 6211.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

Mr. DANNEMEYER. Mr. Speaker, reserving the right to object, perhaps the gentleman from Washington can shed some light on the concern that some of us have heard expressed on this bill that there may be a conflict relative to the Clean Air Act, which requires attainment for certain pollutants by December 31, 1982, and certan things happen when those areas of the country are not in attainment.

We may be in the position of imposing a gas tax increase of 5 cents a gallon on the citizens of our communities and then find to our chagrin that our areas will not be eligible to get the money to build projects because we have, in case the Members are interested, 472 counties in the United States which are not in attainment today and will not be in attainment by the end of this month. And because they are not in attainment they cannot get the money that the citizens pay taxes for.

Mr. Speaker, can the gentleman shed some light on that?

Mr. FOLEY. Mr. Speaker, insofar as the Environmental Protection Agency is concerned, I have heard the gentleman say many times that under the new administration the Agency is going to provide a more flexible and balanced administration of these requirements than the gentleman felt had been followed in the previous administration.

I do not know whether the actions of the Environmental Protection Agency during the first 2 years of the administration have given the gentleman any confidence in it. I do not know whether that is the case or not, but I personally believe there will be a sense of

balance and fairness in meeting any of these requirements of the act during such time as Congress has under consideration the Clean Air Act. Obviously I cannot go beyond that in making any assurance to the gentleman on the enforcement of the law because that is a matter that is in the hands of the executive branch and, in particular, the Environmental Protection Agency.

Mr. DANNEMEYER. Mr. Speaker, further reserving the right to object, I can respond to the gentleman's observation by saying that it is not the actions of the current Administrator of the EPA that causes me to make these comments, but it is the law that was developed prior to the time this Administrator took over the job that causes these comments to be addressed, and I am very concerned about it.

I would appreciate it if the gentleman could elaborate on what is going to happen.

Mr. FOLEY. Most laws are self-enforcing, and it is the responsibility of the executive branch to enforce the laws passed by the Congress.

□ 1220

That also requires some judgment and decision as to the character of the statute involved and the circumstances under which it is to be implemented.

So all I can tell the gentleman is that I believe personally that the agency that is involved in responsibility, the EPA in this case, particularly during any consideration of the Clean Air Act amemdments, will be responsible and balanced, and if I can use the word, employ commonsense in the administration of the law previously enacted.

Mr. DANNEMEYER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

THE PRESIDENT LACKS HEART

(Mr. JOHN L. BURTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHN L. BURTON. Mr. Speaker, Saturday a spokesman for the President said that they were against any expenditure of funds for job programs and would veto the continuing resolution if it had job programs in it.

At the same time they said they were concerned about the unemployment and they were in favor of extending unemployment insurance for 13 months.

As Ronald W. Reagan always said, what the people of this country want is a hand up and not a handout.

I would suggest that the President stop by the butcher shop and get himself a heart for these holidays.

PARLIAMENTARY INQUIRY

Mr. DORNAN of California. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. DORNAN of California. Mr. Speaker, yesterday I thought the Chair very graciously used, instead of a recess period and a break in official proceedings, the time to go through special orders. I wondered if I might request that today, that some of us, if we are kind and brief in our special orders, could do them at that time.

The SPEAKER. We can do that. I am delighted that the gentleman brought up the idea.

Mr. DORNAN of California. I thank the Speaker.

The SPEAKER. We will hold off on it momentarily because there are a couple of things we have to do.

Mr. DORNAN of California. I thank the Speaker and I appreciate it.

CONGRESS NEEDS TO REVIEW PROCEDURES

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, this last week in the House of Representatives and in the other body has raised a lot of serious questions in this country and even among those of us in the Congress as to whether our procedures really can stand the test of moving this country at a time that it has to be moved without delaying tactics, without uses of parliamentary procedures that end up in blocking the intent of Congress itself.

I would certainly hope, Mr. Speaker, that in the days and months ahead in the new Congress that a great deal of thought will be given as to how to prevent the situations that we are seeing taking place today on both our side in the House and in the other body.

This country really deserves better than what we have seen the past week or two.

I must say that the blame for the problem does not sit alone with the Congress. It also very strongly sits with the executive branch. I hope they, too, will look very carefully at what has happened and see if we cannot do better in the years ahead.

APPOINTMENT OF CONFEREES ON H.R. 6211, SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

Mr. HOWARD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes, with the Senate amendment thereto, disagree to the Senate amendment and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey? The Chair hears none, and appoints the following conferees: Title I of the Senate amendment and modifications committed to conference as well as on matters within the jurisdiction of the Committee on Ways and Means, Messrs. ROSTENKOWSKI, GIBBONS, PICKLE, RANGEL, BRODHEAD, CONABLE, DUNCAN, and ARCHER; for consideration of the remainder of the Senate amendment and modifications committed to conference, Messrs. HOWARD, ANDERSON, BREAUX, MINETA, LEVITAS, CLAUSEN, SHUSTER, and SNYDER.

TAX TREATMENT OF PERIODIC PAYMENTS

Mr. PICKLE submitted the following conference report and statement on the bill (H.R. 5470) to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness:

CONFERENCE REPORT (H. REPT. No. 97-984)

The committee of conference on the disagreeing votes of the two Houses on the House amendment to the Senate amendment to the text of the bill (H.R. 5470) to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment to the Senate amendment, insert the following:

SECTION 1. AMENDMENT OF 1954 CODE.

Whenever in title I or II an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

TITLE I—INCOME TAX PROVISIONS

SEC. 101 TREATMENT OF RECIPIENT OF SETTLEMENT PERIODIC PAYMENTS.

(a) TREATMENT OF RECIPIENT.—Paragraph (2) of section 104(a) (relating to compensation for injuries or sickness) is amended by striking out "whether by suit or agreement" and inserting in lieu thereof "whether by suit or agreement and whether as lump sums or as periodic payments".

(b) TREATMENT OF ASSIGNEE-PAYOR.—

(1) IN GENERAL.—Part III of subchapter B of chapter 1 (relating to items specifically excluded from gross income) is amended by redesignating section 130 as section 131 and by inserting after section 129 the following new section:

"SEC. 130. CERTAIN PERSONAL INJURY LIABILITY ASSIGNMENTS.

"(a) IN GENERAL.—Any amount received for agreeing to a qualified assignment shall not be included in gross income to the extent that such amount does not exceed the aggregate cost of any qualified funding assets.

"(b) TREATMENT OF QUALIFIED FUNDING ASSET.—In the case of any qualified funding asset—

"(1) the basis of such asset shall be reduced by the amount excluded from gross income

under subsection (a) by reason of the purchase of such asset, and

"(2) any gain recognized on a disposition of such asset shall be treated as ordinary income.

"(c) QUALIFIED ASSIGNMENT.—For purposes of this section, the term 'qualified assignment' means any assignment of a liability to make periodic payments as damages (whether by suit or agreement) on account of personal injury or sickness—

"(1) if the assignee assumes such liability from a person who is a party to the suit or agreement, and

"(2) if—

"(A) such periodic payments are fixed and determinable as to amount and time of payment,

"(B) such periodic payments cannot be accelerated, deferred, increased, or decreased by the recipient of such payments,

"(C) the assignee does not provide to the recipient of such payments rights against the assignee which are greater than those of a general creditor,

"(D) the assignee's obligation on account of the personal injuries or sickness is no greater than the obligation of the person who assigned the liability, and

"(E) such periodic payments are excludable from the gross income of the recipient under section 104(a)(2).

"(d) QUALIFIED FUNDING ASSET.—For purposes of this section, the term 'qualified funding asset' means any annuity contract issued by a company licensed to do business as an insurance company under the laws of any State, or any obligation of the United States, if—

"(1) such annuity contract or obligation is used by the assignee to fund periodic payments under any qualified assignment,

"(2) the periods of the payments under the annuity contract or obligation are reasonably related to the periodic payments under the qualified assignment, and the amount of any such payment under the contract or obligation does not exceed the periodic payment to which it relates,

"(3) such annuity contract of obligation is designated by the taxpayer (in such manner as the Secretary shall by regulations prescribe) as being taken into account under this section with respect to such qualified assignment, and

"(4) such annuity contract or obligation is purchased by the taxpayer not more than 60 days before the date of the qualified assignment and not later than 60 days after the date of such assignment."

(2) CONFORMING AMENDMENT.—The table of sections for part III of subchapter B of chapter 1 is amended by striking out the item relating to section 130 and inserting in lieu thereof the following new items:

"Sec. 130. Certain personal injury liability assignments.

"Sec. 131. Cross references to other Acts."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after December 31, 1982.

SEC. 102. EXCLUSION FROM GROSS INCOME FOR CERTAIN FOSTER CARE PAYMENTS.

(a) IN GENERAL.—Part III of subchapter B of chapter 1 (relating to items specifically excluded from gross income), as amended by section 101(b), is amended by redesignating section 131 as section 132 and by inserting after section 130 the following new section:

"SEC. 131. CERTAIN FOSTER CARE PAYMENTS.

"(a) GENERAL RULE.—Gross income shall not include amounts received by a foster parent during the taxable year as qualified foster care payments.

"(b) QUALIFIED FOSTER CARE PAYMENT DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified foster care payments' means any amount—

"(A) which is paid by a State or political subdivision thereof or by a child-placing agency which is described in section 501(c)(3) and exempt from tax under section 501(a), and

"(B) which is—

"(i) paid to reimburse the foster parent for the expenses of caring for a qualified foster child in the foster parent's home, or

"(ii) a difficulty of care payment.

"(2) QUALIFIED FOSTER CHILD.—The term 'qualified foster child' means any individual who—

"(A) has not attained age 19, and

"(B) is living in a foster family home in which such individual was placed by—

"(i) an agency of a State or political subdivision thereof, or

"(ii) an organization which is licensed by a State (or political subdivision thereof) as a child-placing agency and which is described in section 501(c)(3) and exempt from tax under section 501(a).

"(c) DIFFICULTY OF CARE PAYMENTS.—For purposes of this section—

"(1) DIFFICULTY OF CARE PAYMENTS.—The term 'difficulty of care payments' means payments to individuals which are not described in subsection (b)(1)(B)(i), and which—

"(A) are compensation for providing the additional care of a qualified foster child which is—

"(i) required by reason of a physical, mental, or emotional handicap of such child with respect to which the State has determined that there is a need for additional compensation, and

"(ii) provided in the home of the foster parent, and

"(B) are designated by the payor as compensation described in subparagraph (A).

"(2) LIMITATION BASED ON NUMBER OF CHILDREN.—In the case of any foster home, difficulty of care payments for any period to which such payments relate shall not be excludable from gross income under subsection (a) to the extent such payments are made for more than 10 qualified foster children."

(b) CLERICAL AMENDMENT.—The table of sections for part III of subchapter B of chapter 1 is amended by striking out the item relating to section 131 and by inserting in lieu thereof the following items:

"Sec. 131. Certain foster care payments.

"Sec. 132. Cross references to other Acts."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

TITLE II—TAX STATUS OF INDIAN TRIBAL GOVERNMENTS

SEC. 201. SHORT TITLE.

This title may be cited as the "Indian Tribal Governmental Tax Status Act of 1982".

SEC. 202. INDIAN TRIBAL GOVERNMENTS TREATED AS STATES FOR CERTAIN PURPOSES.

(a) GENERAL RULE.—Chapter 80 (relating to general rules) is amended by adding at the end thereof the following new subchapter:

"Subchapter C—Provisions Affecting More than One Subtitle

"Sec. 7871. Indian tribal governments treated as States for certain purposes.

"SEC. 7871. INDIAN TRIBAL GOVERNMENTS TREATED AS STATES FOR CERTAIN PURPOSES.

"(a) GENERAL RULE.—An Indian tribal government shall be treated as a State—

"(1) for purposes of determining whether and in what amount any contribution or transfer to or for the use of such government (or a political subdivision thereof) is deductible under—

"(A) section 170 (relating to income tax deduction for charitable, etc., contributions and gifts),

"(B) sections 2055 and 2106(a)(2) (relating to estate tax deduction for transfers of public, charitable, and religious uses), or

"(C) section 2522 (relating to gift tax deduction for charitable and similar gifts);

"(2) subject to subsection (b), for purposes of any exemption from, credit or refund of, or payment with respect to, an excise tax imposed by—

"(A) chapter 31 (relating to tax on special fuels),

"(B) chapter 32 (relating to manufacturers excise taxes),

"(C) subchapter B of chapter 33 (relating to communications excise tax), or

"(D) subchapter D of chapter 36 (relating to tax on use of certain highway vehicles);

"(3) for purposes of section 164 (relating to deduction for taxes);

"(4) subject to subsection (c), for purposes of section 103 (relating to interest on certain governmental obligations);

"(5) for purposes of section 511(a)(2)(B) (relating to the taxation of colleges and universities which are agencies or instrumentalities of governments or their political subdivisions);

"(6) for purposes of—

"(A) section 37(e)(9)(A) (relating to certain public retirement systems),

"(B) section 41(c)(4) (defining State for purposes of credit for contribution to candidates for public offices),

"(C) section 117(b)(2)(A) (relating to scholarships and fellowship grants), and

"(D) section 403(b)(1)(A)(ii) (relating to the taxation of contributions of certain employers for employee annuities); and

"(7) for purposes of—

"(A) chapter 41 (relating to tax on excess expenditures to influence legislation), and

"(B) subchapter A of chapter 42 (relating to private foundations).

"(b) ADDITIONAL REQUIREMENTS FOR EXCISE TAX EXEMPTIONS.—Paragraph (2) of subsection (a) shall apply with respect to any transaction only if, in addition to any other requirement of this title applicable to similar transactions involving a State or political subdivision thereof, the transaction involves the exercise of an essential governmental function of the Indian tribal government.

"(c) ADDITIONAL REQUIREMENTS FOR TAX-EXEMPT BONDS.—

"(1) IN GENERAL.—Subsection (a) of section 103 shall apply to any obligation (not described in paragraph (2)) issued by an Indian tribal government (or subdivision thereof) only if such obligation is part of an issue substantially all of the proceeds of which are to be used in the exercise of any essential governmental function.

"(2) NO EXEMPTION FOR CERTAIN PRIVATE-ACTIVITY BONDS.—Subsection (a) of section 103 shall not apply to any of the following issued by an Indian tribal government (or subdivision thereof):

"(A) An industrial development bond (as defined in section 103(b)(2)).

"(B) An obligation described in section 103(l)(1)(A) (relating to scholarship bonds).

"(C) A mortgage subsidy bond (as defined in paragraph (1) of section 103A(b) without regard to paragraph (2) thereof).

"(d) TREATMENT OF SUBDIVISIONS OF INDIAN TRIBAL GOVERNMENTS AS POLITICAL SUBDIVISION.—For the purposes specified in subsection (a), a subdivision of an Indian tribal government shall be treated as a political subdivision of a State if (and only if) the Secretary determines (after consultation with the Secretary of the Interior) that such subdivision has been delegated the right to

exercise one or more of the substantial governmental functions of the Indian tribal government."

(b) CONFORMING AMENDMENTS RELATING TO CROSS REFERENCES.—

(1) Subsection (d) of section 41 is amended to read as follows:

"(d) CROSS REFERENCES.—

"(1) For disallowance of credits to estates and trusts, see section 642(a)(2).

"(2) For treatment of Indian tribal governments as States (and the political subdivisions of Indian tribal governments as political subdivisions of States), see section 7871."

(2) Subsection (m) of section 103 is amended to read as follows:

"(m) CROSS REFERENCES.—

"For provisions relating to the taxable status of—

"(1) Certain obligations issued by Indian tribal governments (or their subdivisions), see section 7871.

"(2) Exempt interest dividends of regulated investment companies, see section 852(b)(5)(B).

"(3) Puerto Rican bonds, see section 3 of the Act of March 2, 1917, as amended (48 U.S.C. 745).

"(4) Virgin Islands insular and municipal bonds, see section 1 of the Act of October 27, 1919 (48 U.S.C. 1403).

"(5) Certain obligations issued under title I of the Housing Act of 1949, see section 102(g) of title I of such Act (42 U.S.C. 1452(g))."

(3) Section 164(f) is amended by adding at the end thereof the following new paragraph:

"(3) For treatment of taxes imposed by Indian tribal governments (or their subdivisions), see section 7871."

Section 170(k) is amended by adding at the end thereof the following new paragraph:

"(8) For charitable contributions to or for the use of Indian tribal governments (or their subdivisions), see section 7871."

(5) Section 2055(f) is amended by adding at the end thereof the following new paragraph:

"(11) For treatment of gifts and bequests to or for the use of Indian tribal governments (or their subdivisions), see section 7871."

(6) Subparagraph (F) of section 2106(a)(2) is amended to read as follows:

"(F) Cross references.—

"(i) For option as to time for valuation for purposes of deduction under this section, see section 2032.

"(ii) For exemption of certain bequests for the benefit of the United States and for rules of construction for certain bequests, see section 2055(f).

"(iii) For treatment of gifts and bequests to or for the use of Indian tribal governments (or their subdivisions), see section 7871."

(7) Subsection (d) of section 2522 is amended to read as follows:

"(d) Cross References.—

"(1) For exemption of certain gifts to or for the benefit of the United States and for rules of construction with respect to certain bequests, see section 2055(f).

"(2) For treatment of gifts to or for the use of Indian tribal governments (or their subdivisions), see section 7871."

(8) Section 4227 is amended to read as follows:

"SEC. 4227. CROSS REFERENCES.

"(1) For exemption for a sale to an Indian tribal government (or its subdivision) for the exclusive use of an Indian tribal government (or its subdivision), see section 7871.

"(2) For credit for taxes on tires and tubes, see section 6416(c)."

(9) The table of sections for subchapter G of chapter 32 is amended by striking out the item relating to section 4227 and inserting in lieu thereof the following new item:

"Sec. 4227. Cross references."

(10) Section 4484 is amended to read as follows:

"SEC. 4484. CROSS REFERENCES.

"(1) For penalties and administrative provisions applicable to this subchapter, see subtitle F.

"(2) For exemption for uses by Indian tribal governments (or their subdivisions), see section 7871."

(11) The table of sections for subchapter D of chapter 36 is amended by striking out the item relating to section 4484 and inserting in lieu thereof the following new item:

"Sec. 4484. Cross references."

(12) Sections 6420(h) and 6421(j) are each amended by adding at the end thereof the following new paragraph:

"(4) For treatment of an Indian tribal government as a State (and a subdivision of an Indian tribal government as a political subdivision of a State), see section 7871."

(13) Sections 6424(g) and 6427(k) are each amended by adding at the end thereof the following new paragraph:

"(3) For treatment of an Indian tribal government as a State (and a subdivision of an Indian tribal government as a political subdivision of a State), see section 7871."

(c) CLERICAL AMENDMENT.—The table of subchapters for chapter 80 is amended by adding at the end thereof the following new item:

"Subchapter C. Provisions affecting more than one subtitle."

SEC. 203. DEFINITION OF INDIAN TRIBAL GOVERNMENT.

Subsection (a) of Section 7701 (relating to definitions) is amended by adding at the end thereof the following new paragraph:

"(40) INDIAN TRIBAL GOVERNMENT.—The term 'Indian tribal government' means the governing body of any tribe, band, community, village, or group of Indians which is determined by the Secretary, after consultation with the Secretary of the Interior, to exercise substantial governmental functions and in Alaska shall include only the Metlakatla Indian Community."

SEC. 204. EFFECTIVE DATES.

The amendments made by this title—

(1) insofar as they relate to chapter 1 of the Internal Revenue Code of 1954 (other than section 103 thereof), shall apply to taxable years beginning after December 31, 1982, and before January 1, 1985,

(2) insofar as they relate to section 103 of such Code, shall apply to obligations issued after December 31, 1982, and before January 1, 1985,

(3) insofar as they relate to chapter 11 of such Code, shall apply to estates of decedents dying after December 31, 1982, and before January 1, 1985,

(4) insofar as they relate to chapter 12 of such Code, shall apply to gifts made after December 31, 1982, and before January 1, 1985, and

(5) insofar as they relate to taxes imposed by subtitle D of such Code, shall take effect on January 1, 1983, and shall cease to apply at the close of December 31, 1984.

TITLE III—AMENDMENTS TO EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

SEC. 301. TREATMENT OF HAWAII PREPAID HEALTH CARE ACT UNDER EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974.

(a) EXEMPTION FROM PREEMPTION.—Section 514(b) of the Employee Retirement Income Security act of 1974 (29 U.S.C. 1144(b)) is amended by adding at the end thereof the following new paragraph:

"(5)(A) Except as provided in subparagraph (B), subsection (a) shall not apply to the Hawaii Prepaid Health Care Act (Haw. Rev. Stat. §§ 393-1 through 393-51).

"(B) Nothing in subparagraph (A) shall be construed to exempt from subsection (a)—

"(i) any State tax law relating to employee benefit plans, or

"(ii) any amendment of the Hawaii Prepaid Health Care Act enacted after September 2, 1974, to the extent it provides for more than the effective administration of such Act as in effect on such date.

"(C) Notwithstanding subparagraph (A), parts 1 and 4 of this subtitle, and the preceding sections of this part to the extent they govern matters which are governed by the provisions of such parts 1 and 4, shall supersede the Hawaii Prepaid Health Care Act (as in effect on or after the date of the enactment of this paragraph), but the Secretary may enter into cooperative arrangements under paragraph and section 506 with officials of the State of Hawaii to assist them in effectuating the policies of provisions of such Act which are superseded by such parts."

(b) TREATMENT OF OTHER STATE LAWS.—The amendment made by this section shall not be considered a precedent with respect to extending such amendment to any other State law.

(c) EFFECTIVE DATE.—The amendment made by this section shall take effect on the date of the enactment of this Act.

SEC. 302. TREATMENT OF MULTIPLE EMPLOYER WELFARE ARRANGEMENTS UNDER EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974.

(a) DEFINITION OF MULTIPLE EMPLOYER WELFARE ARRANGEMENT.—Section 3 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002), relating to definitions, is amended by adding at the end thereof the following new paragraph:

"(40)(A) The term 'multiple employer welfare arrangement' means an employee welfare benefit plan, or any other arrangement (other than an employee welfare benefit plan), which is established or maintained for the purpose of offering or providing any benefit described in paragraph (1) to the employees of two or more employers (including one or more self-employed individuals), or to their beneficiaries, except that such term does not include any such plan or other arrangement which established or maintained—

"(i) under or pursuant to one or more agreements which the Secretary finds to be collective bargaining agreements, or

"(ii) by a rural electric cooperative.

"(B) For purposes of this paragraph—

"(i) two or more trades or businesses, whether or not incorporated, shall be deemed a single employer if such trades or businesses are within the same control group,

"(ii) the term 'control group' means a group of trades or businesses under common control,

"(iii) the determination of whether a trade or business is under 'common control' with another trade or business shall be determined under regulations of the Secretary applying principles similar to the principles applied in determining whether employees of two or more trades or businesses are treated as employed by a single employer under section 4001(b), except that, for purposes of this paragraph, common control shall not be based on an interest of less than 25 percent, and

"(iv) the term 'rural electric cooperative' means—

"(I) any organization which is exempt from tax under section 501(a) of the Internal Revenue Code of 1954 and which is engaged primarily in providing electric service on a mutual or cooperative basis, and

"(II) any organization described in paragraph (4) or (6) of section 501(c) of the Internal Revenue Code of 1954 which is exempt

from tax under section 501(a) of such Code and at least 80 percent of the members of which are organizations described in subclause (I)."

(b) LIMITATION ON PREEMPTION OF STATE LAW WITH REGARD TO WELFARE PLANS WHICH ARE MULTIPLE EMPLOYER WELFARE ARRANGEMENTS.—Section 514(b) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1144(b)), as amended by section 301 of this Act, is further amended by adding at the end thereof the following new paragraph:

"(6)(A) Notwithstanding any other provision of this section—

"(i) in the case of an employee welfare benefit plan which is a multiple employer welfare arrangement and is fully insured (or which is a multiple employer welfare arrangement subject to an exemption under subparagraph (B)), any law of any State which regulates insurance may apply to such arrangement to the extent that such law provides—

"(I) standards, requiring the maintenance of specified levels of reserves and specified levels of contributions, which any such plan, or any trust established under such a plan, must meet in order to be considered under such law able to pay benefits in full when due, and

"(II) provisions to enforce such standards, and

"(ii) in the case of any other employee welfare benefit plan which is a multiple employer welfare arrangement, in addition to this title, any law of any State which regulates insurance may apply to the extent not inconsistent with the preceding sections of this title.

"(B) The Secretary may, under regulations which may be prescribed by the Secretary, exempt from subparagraph (A)(ii), individually or by class, multiple employer welfare arrangements which are not fully insured. Any such exemption may be granted with respect to any arrangement or class of arrangements only if such arrangement or each arrangement which is a member of such class meets the requirements of section 3(1) and section 4 necessary to be considered an employee welfare benefit plan to which this title applies.

"(C) Nothing in subparagraph (A) shall affect the manner or extent to which the provisions of this title apply to an employee welfare benefit plan which is not a multiple employer welfare arrangement and which is a plan, fund, or program participating in, subscribing to, or otherwise using a multiple employer welfare arrangement to fund or administer benefits to such plan's participants and beneficiaries.

"(D) For purposes of this paragraph, a multiple employer welfare arrangement shall be considered fully insured only if the terms of the arrangement provide for benefits the amount of all of which the Secretary determines are guaranteed under a contract, or policy of insurance, issued by an insurance company, insurance service, or insurance organization, qualified to conduct business in a State.".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the enactment of this Act.

And the House agree to the same.

MALCOLM WALLOP,
RUSSELL B. LONG,
Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the amendment of the Senate to the bill (H.R. 5470) to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House amendment to the Senate amendment struck out all of the Senate amendment and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the House amendment and the Senate amendment. The differences between the House amendment, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

Periodic Payment Settlement Act of 1982

1. Exclusion for Periodic Damage Payments

Present law

Present law generally excludes from gross income damages received by an individual on account of personal injuries or sickness. Furthermore, the IRS has ruled that damages for personal injuries are excludible from gross income whether paid as a lump sum, or paid in periodic payments out of a fund invested and owned by the tortfeasor or an insurer.

House bill

The House bill excludes from gross income damage payments for injuries or sickness whether paid as lump sums or as periodic payments.

Furthermore, under certain circumstances, an amount received for agreeing to undertake an assignment of a liability to make periodic payments of personal injury damages is not included in gross income. Specifically, any amount so received will not be included in gross income to the extent it is used to purchase an annuity contract issued by a company licensed to do business as an insurance company under the laws of any State or an obligation of the United States. It is intended that the definition of a "qualified funding asset," meaning an annuity contract designed to satisfy a "qualified assignment," encompass an annuity policy the payments from which end upon the death of a measuring life, i.e., an annuity with a life contingency.

The provision is effective for taxable years ending after 1982.

Senate amendment

The Senate amendment is similar to the House bill except that if an annuity contract is used to fund periodic payments, it must be issued by a life insurance company.

Conference agreement

The conference agreement follows the House bill.

The conferees wish to emphasize that, as a result of this legislation, no negative inference should be drawn as to the appropriate tax treatment of such transactions under present law and administrative rulings.

2. Exclusion From Gross Income for Certain Foster Care Payments

Present law

Except as otherwise provided by law, gross income means all income from whatever source derived.

The IRS has set forth guidelines regarding the tax treatment of amounts received and amounts expended by individuals providing foster care to children. If foster parents are rendering gratuitous services to child-placing agencies in feeding, clothing, and caring for foster children, then paymens received from the child-placing agency for the support of a foster child are excludible from gross income to the extent that the payments do not exceed the expenses incurred by the foster parents in supporting the child. If foster parents have a profit motive, then a portion of each payment from the child-placing agency for the support of a foster child is excludible from gross income to the extent that the payments do not exceed the expenses incurred by the foster parents in supporting the child. If foster parents have a profit motive, then a portion of each payment from the child-placing agencies represents reimbursement or advancement for expenses incurred on behalf of the agency by the foster parents, and the remainder is compensation for their services.

House bill

The House bill excludes from the gross income of a foster parent amounts paid to reimburse the foster parent for the expense of caring for a foster child (under the age of 19) in the foster parent's home and difficulty of care payments. This exclusion, in the case of difficulty of care payments, is available with respect to payments for the care of up to ten children.

Difficulty of care payments are payments that are compensation for providing the additional care of a foster child which is required by reason of a physical, mental, or emotional handicap with respect to which the State has determined that there is a need for additional compensation and which is provided in the home of the foster parent.

In order for payments to be excludible, the foster child with respect to whom payments are made must be placed by an agency of a State or political subdivision thereof, or by a State-licensed, private, tax-exempt agency.

The provision applies to taxale years beginning after December 31, 1978.

Senate amendment

The Senate amendment is similar to the House bill, with two exceptions. first, the Senate amendment excludes only difficulty of care payments, not reimbursements. Second, the amendment does not require private child-placing agencies to be licensed by the State.

Conference agreement

The conference agreement follows the House bill.

3. Taxation of Indian Tribal Governments

Present law

States (including the District of Columbia) and their political subdivisions generally are exempt from Federal tax. In addition, numerous transactions by private parties with State governments and their political subdivisions result in favorable Federal tax treatment (e.g., exclusion from income, tax deductions, or tax credits) for the private parties involved.

Under present law, Indian tribal governments are not treated as State governments. The Internal Revenue Service has ruled that tribal government income is tax

exempt until the income is received, or constructively received, by tribe members (Rev. Rul. 67-284, 1967-2 C.B. 55).

House bill

No provision.

Senate amendment

Overview

The Senate amendment provides that, for a series of specified purposes under the Internal Revenue Code, Indian tribal governments are to be treated the same as States or similar to States. The term Indian tribal government is defined to include in Alaska only the Metlakatla Indian Community. The provisions will not apply to any Indian tribal government unless it is recognized by the Treasury Department (after consultation with the Interior Department) as exercising sovereign powers. Sovereign powers include the power to tax, the power of eminent domain, and police powers (such as control over zoning, police protection, and fire protection).

Present law generally provides that political subdivisions of States are to be treated essentially the same as the States themselves. Therefore, a subdivision of an Indian tribal government will be treated as a political subdivision of a State for the purposes specified in the amendment if the Treasury Department determines (after consultation with the Interior Department) that the subdivision of the Indian tribal government has been delegated the right to exercise one or more of the sovereign powers of the Indian tribal government.

Taxation of Indian tribal governments

Under the amendment, most Federal excise taxes will not apply to articles sold for the exclusive use of Indian tribal governments. Specifically, exemption will be provided from the following taxes:

Diesel and special motor fuels.
Gasoline.
Tires, innertubes, and tread rubber.
Lubricating oil.
Highway use tax.
Bows and arrows.
Firearms.
Telephones.

The amendment does not change the present income tax treatment of Indian tribal governments specified in Rev. Rul. 67-284, supra.

Special treatment of certain transactions involving Indian tribal governments

GENERAL RULE.—Indian tribal governments will be treated as States in the following transactions involving private parties—

(1) The exclusion from income of interest on certain obligations of State governments (except as set forth below);

(2) The income tax deduction for taxes paid to State and local governments;

(3) The income, estate, and gift tax deductions for charitable contributions;

(4) The tax on unrelated business income of certain types of organizations;

(5) The taxes imposed on certain prohibited transactions by pubic charities and private foundations;

(6) The income tax credit for individuals who receive retirement income from public retirement systems;

(7) Eligibility for certain tax-deferred annuities;

(8) The income tax credit for political campaign contributions; and

(9) The exclusion of certain scholarships and fellowships awarded to students who are not candidates for a degree.

SPECIAL RULES FOR TAX-EXEMPT BONDS.—The amendment permits Indian tribal governments to issue tax-exempt industrial development bonds only where the primary activities of the businesses benefitting from the bonds take place on the reservation and where substantially all of the off-reservation activities are purchasing, marketing, and similar related activities. Additionally, interest on bonds other than IDBs is exempt from tax only if substantially all of the proceeds of the obligations are used in the exercise of essentially governmental functions or for a public utility. These requirements are in addition to any other requirements imposed under the Code for tax-exempt bonds.

In general, the amendment applies to taxable years beginning after 1982.

The provisions related to tax-exempt bonds will apply to obligations of Indian tribal governments issued after the date of enactment in taxable years ending after that date.

The provisions amending the estate or gift taxes will apply to estates of individuals dying, or gifts made, after 1982.

The excise tax provisions are effective on January 1, 1983.

Conference agreement

The conference agreement follows the Senate amendment, with modifications and clarifications. First, Indian tribal governments are permitted only to issue public activity bonds, the proceeds of which are used in an essential governmental function (such as schools, streets, and sewers). Therefore, tribal governments are not permitted to issue private activity bonds (i.e., industrial development bonds, scholarship bonds, and mortgage subsidy bonds). Second, all of the provisions will terminate after December 31, 1984. Third, the provision permitting issuance of tax-exempt bonds is effective for obligations issued after December 31, 1982, and before January 1, 1985.

Finally, the conferees wish to clarify two points. The present-law requirement that an excise tax exempt article be sold for the exclusive use of a State or local government will apply in the case of articles sold to Indian tribal governments. The tax-exempt articles must be for the Indian tribal government's exclusive use in carrying out an essential governmental function. Additionally, the requirement of consultation between the Secretary of the Treasury and the Secretary of the Interior is not to be construed as requiring the consent of the Secretary of the Interior before adoption of any regulation, ruling, or other determination made by the Secretary of the Treasury.

4. Waiver of Preemption in Case of Hawaiian Prepaid Health Care Act

Present law

The Employee Retirement Income Security Act of 1974 (ERISA) provides comprehensive rules relating to employee benefit plans, including plans providing health benefits to employees. The Act (sec. 514(a)) generally supersedes State laws insofar as they relate to employee benefit plans.

The Hawaii Act (Haw. Rev. Stat. 393-1 through 51), provides for a program of health insurance for employees. As a result of litigation, it was determined that the Hawaiian Act was preempted by ERISA (*Standard Oil Company of California* v. *Agsalud*, 633 F. 2d 760 (9th Cir. 1980), aff'd, 454 U.S. 801 (1981)).

House bill

The provision generally exempts the Hawaii Prepaid Health Care Act from preemption by ERISA. Under the provision, however, preemption is continued with respect to (1) any State tax law relating to employee benefit plans, or (2) any amendment of the Hawaii Act enacted after September 2, 1974, to the extent the amendment provides for more than the effective administration of that Act as in effect on September 2, 1974. The provision continues Federal preemption of State law with respect to matters governed by the reporting and disclosure and the fiduciary responsibility provisions of ERISA, as well as certain of the provisions of the administration and enforcement rules of ERISA (Title I, part 1, part 4, and secs. 501 through sec. 514(b)). The provision also permits the Secretary of Labor to enter into cooperative arrangements with the officials of the State of Hawaii to assist them in effectuating the policies of the provisions of the Hawaii Act that are superseded by ERISA.

The provision states that it is not to be considered a precedent for extending nonpreemption to any other State law.

The provision is effective on the date of enactment.

Senate amendment

The Senate amendment generally follows the House bill except that the exemption from the ERISA preemption provision applies to the Hawaii Prepaid Health Care Act, as in effect on January 1, 1976. Additionally, the amendment requires that the Secretary of Labor conduct a study of the feasibility of extending the exemption to include other State laws which establish health care plans and report to the Congress on his findings within two years.

Conference agreement

The conference agreements follows the House bill.

5. Waiver of Preemption in Case of Multiple Employer Welfare Arrangements

Present law

The Employee Retirement Income Security Act of 1974 (ERISA) provides comprehensive rules relating to employee benefit plans, including plans providing health benefits to employees. The Act (sec. 514(a)) generally supersedes State laws insofar as they relate to employee benefit plans.

House bill

The provision generally exempts certain multiple employer welfare arrangements from the ERISA preemption provision. Under the provision, a multiple employer welfare arrangement is any plan or other arrangement established to offer welfare benefits, such as health insurance, to the employees of two or more employers. However, it continues preemption with respect to State law applying to any plan maintained pursuant to a collective bargaining agreement or maintained by a tax exempt rural electric cooperative.

In the case of a fully insured multiple employer welfare arrangement, the provision exempts from ERISA preemption any State laws that require the maintenance of specified levels of reserves and contributions in order for such an arrangement to be considered adequately funded.

In the case of a multiple employer welfare arrangement that is not fully insured, the provision exempts from ERISA preemption any State laws that regulate insurance. Notwithstanding this provision, the Secretary is authorized to determine the extent to which the ERISA preemption provision will be applied to a multiple employer welfare arrangement that is not fully insured. The Secretary's determination may be made on a case-by-case basis or a class basis.

The provision is effective on the date of enactment.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill.

6. Reduction in Income Tax Rate on Virgin Islands Source Income

Present law

The Treasury and the Government of the Virgin Islands take the position that present law imposes a 30-percent tax on the U.S. recipient of certain Virgin Islands source passive investment income, and that present law also imposes withholding at the source by the V.I. payor of such income. Certain taxpayers contend there is no such tax or withholding obligation.

House bill

No provision.

Senate amendment

The Senate amendment provides for a 10-percent rate of tax by the Virgin Islands when the recipient is a U.S. citizen, resident alien, or corporation and provides for a corresponding withholding obligation on the V.I. payor of such income. The amendment makes clear the Virgin Islands' right prospectively both to impose the tax and to collect it by requiring withholding. The amendment is not intended to affect disputes now pending with respect to prior years between various taxpayers and the V.I. Government as to whether under existing law the Virgin Islands can tax U.S. recipients non-resident in the Virgin Islands on passive income from Virgin Islands sources. The amendment will allow the V.I. Government to reduce this 10-percent rate in its discretion. Payments will continue to be subject to the tax at a 30-percent rate.

The new tax rates generally will apply to amounts received after the date of enactment. The corresponding withholding obligation will apply to payments made after the date of enactment.

Conference agreement

The conference agreement follows the House bill.

7. One-Year Extension of Highway Trust Fund Taxes

Present Law

Highway Trust Fund taxes are scheduled to expire or revert to lower tax rates after September 30, 1984. Receipts from those highway taxes that would continue after expiration of the trust fund would be deposited in the general fund of the Treasury. The exemption from the fuels tax (4 cents a gallon) for qualified taxicabs expires after December 31, 1982.

Expenditures may be made from the trust fund for authorized highway purposes through September 30, 1984.

House bill

No provision.

Senate amendment

The Highway Trust Fund is extended for one-year, through September 30, 1985. Receipts from excise taxes designated for deposit to the trust fund also is extended for one-year, through September 30, 1985. Expenditures from the trust fund for authorized purposes is extended for two years, through September 30, 1986.

Transfer of recreational motor boat fuels taxes to the Land and Water Conservation Fund also is extended for one additional year.

In addition, the refund of the taxes on motor fuels used in qualified taxicabs is extended for one-year, through December 31, 1983.

Conference agreement

The conference agreement follows the House bill.

ESTIMATED REVENUE EFFECTS OF PROVISIONS OF H.R. 5470 AS AGREED TO BY THE CONFERENCE COMMITTEE—FISCAL YEARS 1983–87

[In millions of dollars]

Provision	1983	1984	1985	1986	1987
1. Exclusion for periodic damage payments	(1)	(1)	(1)	(1)	(1)
2. Exclusion from gross income for certain foster care payments	(2)	(2)	(2)	(2)	(2)
3. Taxation of Indian tribal governments	(2)	(2)	(1)	(1)	(1)
4. Waiver of preemption in case of Hawaiian prepaid health care act	(2)	(2)	(2)	(2)	(2)
5. Waiver of preemption of ERISA in case of multiple employer welfare arrangements	(1)	(1)	(1)	(1)	(1)

(1) Negligible revenue impact.
(2) Loss of less than $5 million.

And the House agree to the same.

TAXES ON VIRGIN ISLAND SOURCE INCOME; DISABILITY BENEFITS

Mr. PICKLE submitted the following conference report and statement on the bill (H.R. 7093) to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income:

CONFERENCE REPORT (H. REPT. No. 985)

The committee of conference on the disagreeing votes of the two Houses on the Senate amendments numbered 2, 3, and 4 to the bill (H.R. 7093) to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income, to amend the Social Security Act to provide for a temporary period that payment of disability benefits may continue through the hearing stage of the appeals process, and for other purposes, and on the disagreeing votes of the two Houses on the House amendment to the Senate amendment numbered 1 to such bill, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 3, and 4.

That the Senate recede from its disagreement to the House amendment to the Senate amendment numbered 1 and agree to the same with an amendment as follows:

In lieu to the matter proposed to be inserted by the House amendment to the Senate amendment, insert the following:

SECTION 1. INCOME TAX RATE ON VIRGIN ISLANDS SOURCE INCOME.

(a) IN GENERAL.—Subpart D of part III of subchapter N of chapter 1 of the Internal Revenue Code of 1954 (relating to possessions) is amended by inserting after section 934 the following new section:

"SEC. 934A. INCOME TAX RATE ON VIRGIN ISLANDS SOURCE INCOME.

"(a) GENERAL RULE.—For purposes of determining the tax liability incurred by citizens and resident alien individuals of the United States, and corporations organized in the United States, to the Virgin Islands pursuant to this title with respect to amounts received from sources within the Virgin Islands—

"(1) the taxes imposed by sections 871(a)(1) and 881 (as made applicable to the Virgin Islands) shall apply except that '10 percent' shall be substituted for '30 percent', and

"(2) subsection (a) of section 934 shall not apply to such taxes.

"(b) Subsection (a) RATES NOT TO APPLY TO PRE-EFFECTIVE DATE EARNINGS.—

"(1) IN GENERAL.—Any change under subsection (a)(1), and any reduction under section 934 pursuant to subsection (a)(2), in a rate of tax imposed by section 871(a)(1) or 881 shall not apply to dividends paid out of earnings and profits accumulated for taxable years beginning before the effective date of the change or reduction.

"(2) ORDERING RULE.—For purposes of paragraph (1), dividends shall be treated as first being paid out of earnings and profits accumulated for taxable years beginning before the effective date of the change or reduction (to the extent thereof)."

(b) WITHHOLDING.—Subchapter A of chapter 3 of such code (relating to withholding of tax on nonresident aliens and foreign corporations) is amended by adding at the end thereof the following new section:

"SEC. 1444. WITHHOLDING ON VIRGIN ISLANDS SOURCE INCOME

"For purposes of determining the withholding tax liability incurred in the Virgin Islands pursuant to this title (as made applicable to the Virgin Islands) with respect to amounts received from sources within the Virgin Islands by citizens and resident alien individuals of the United States, and corporations organized in the United States, the rate of withholding tax under sections 1441 and 1442 on income subject to tax under section 871(a)(1) or 881 (as modified by section 934A) shall not exceed the rate of tax on such income under section 871(a)(1) or 881, as the case may be."

(c) TECHNICAL AMENDMENT.—Subsection (a) of section 934 of such Code is amended by inserting before the period at the end thereof "or in section 934A".

(d) CLERICAL AMENDMENTS.—

(1) The table of sections for subpart D of part III of subchapter N of chapter 1 of such Code is amended by inserting after the item relating to section 934 the following new item:

"Sec. 934A. Income tax rate on Virgin Islands source income."

(2) The table of sections for subchapter A of chapter 3 of such Code is amended by adding at the end thereof the following new item:

"Sec. 1444. Withholding on Virgin Islands source income."

(e) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to amounts received after the date of the enactment of this Act in taxable years ending after such date.

(2) WITHHOLDING.—The amendment made by subsection (b) shall apply to payments made after the date of the enactment of this Act.

SEC. 2. CONTINUED PAYMENT OF DISABILITY BENEFITS DURING APPEAL.

Section 223 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"Continued Payment of Disability Benefits During Appeal

"(g)(1) In any case where—

"(A) an individual is a recipient of disability insurance benefits, or of child's,

widow's, or widower's insurance benefits based on disability,

"(B) the physical or mental impairment on the basis of which such benefits are payable is found to have ceased, not to have existed, or to no longer be disabling, and as a consequence such individual is determined not to be entitled to such benefits, and

"(C) a timely request for a hearing under section 221(d), or for an administrative review prior to such hearing, is pending with respect to the determination that he is not so entitled,

such individual may elect (in such manner and form and within such time as the Secretary shall by regulations prescribe) to have the payment of such benefits, and the payment of any other benefits under this Act based on such individual's wages and self-employment income (including benefits under title XVIII), continued for an additional period beginning with the first month beginning after the date of the enactment of this subsection for which (under such determination) such benefits are no longer otherwise payable, and ending with the earlier of (i) the month preceding the month in which a decision is made after such a hearing, (ii) the month preceding the month in which no such request for a hearing or an administrative review is pending, or (iii) June 1984.

"(2)(A) If an individual elects to have the payment of his benefits continued for an additional period under paragraph (1), and the final decision of the Secretary affirms the determination that he is not entitled to such benefits, any benefits paid under this title pursuant to such election (for months in such additional period) shall be considered overpayments for all purposes of this title, except as otherwise provided in subparagraph (B).

"(B) If the Secretary determines that the individual's appeal of his termination of benefits was made in good faith, all of the benefits paid pursuant to such individual's election under paragraph (1) shall be subject to waiver consideration under the provisions of section 204.

"(3) The provisions of paragraphs (1) and (2) shall apply with respect to determinations (that individuals are not entitled to benefits) which are made—

"(A) on or after the date of the enactment of this subsection, or prior to such date but only on the basis of a timely request for a hearing under section 221(d), or for an administrative review prior to such hearing, and

"(B) prior to October 1, 1983.".

SEC. 3. PERIODIC REVIEWS OF DISABILITY CASES.

Section 221(i) of the Social Security Act is amended—

(1) by inserting "(1)" after "(i)";

(2) by inserting ", subject to paragraph (2)" after "at least every 3 years"; and

(3) by adding at the end thereof the following new paragraph:

"(2) The requirement of paragraph (1) that cases be reviewed at least every 3 years shall not apply to the extent that the Secretary determines, on a State-by-State basis, that such requirement should be waived to insure that only the appropriate number of such cases are reviewed. The Secretary shall determine the appropriate number of cases to be reviewed in each State after consultation with the State agency performing such reviews, based upon the backlog of pending reviews, the projected number of new applications for disability insurance benefits, and the current and projected staffing levels of the State agency, but the Secretary shall provide for a waiver of such requirement only in the case of a State which makes a good faith effort to meet proper staffing requirements for the State agency and to process case reviews in a timely fashion. The Secretary shall report annually to the Committee on Finance of the Senate and the Committee on the Ways and Means of the House of Representatives with respect to the determinations made by the Secretary under the preceding sentence.".

(b) The amendments made by subsection (a) shall become effective on the date of the enactment of this Act.

SEC. 4. EVIDENTIARY HEARINGS IN RECONSIDERATIONS OF DISABILITY BENEFIT TERMINATIONS.

(a) IN GENERAL.—Section 205(b) of the Social Security Act is amended—

(1) by inserting "(1)" after "(b)"; and

(2) by adding at the end thereof the following new paragraph:

"(2) In any case where—

"(A) an individual is a recipient of disability insurance benefits, or of child's, widow's, or widower's insurance benefits based on disability,

"(B) the physical or mental impairment on the basis of which such benefits are payable is found to have ceased, not to have existed, or to no longer be disabling, and

"(C) as a consequence of the finding described in subparagraph (B), such individual is determined by the Secretary not to be entitled to such benefits,

any reconsideration of the finding described in subparagraph (B), in connection with a reconsideration by the Secretary (before any hearing under paragraph (1) on the issue of such entitlement) of his determination described in subparagraph (C), shall be made only after opportunity for an evidentiary hearing, with regard to the finding described in subparagraph (B), which is reasonably accessible to such individual. Any reconsideration of a finding described in subparagraph (B) may be made either by the State agency or the Secretary where the finding was originally made by the State agency, and shall be made by the Secretary where the finding was originally made by the Secretary. In the case of a reconsideration by a State agency of a finding described in subparagraph (B) which was originally made by such State agency, the evidentiary hearing shall be held by an adjudicatory unit of the State agency other than the unit that made the finding described in subparagraph (B). In the case of a reconsideration by the Secretary of a finding described in subparagraph (B) which was originally made by the Secretary, the evidentiary hearing shall be held by a person other than the person or persons who made the finding described in subparagraph (B).

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply with respect to reconsiderations (of findings described in section 205(b)(2)(B) of the Social Security Act) which are requested on or after such date as the Secretary of Health and Human Services may specify, but in any event not later than January 1, 1984.

SEC. 5. CONDUCT OF FACE-TO-FACE RECONSIDERATIONS IN DISABILITY CASES.

The Secretary of Health and Human Services shall take such steps as may be necessary or appropriate to assure public understanding of the importance the Congress attaches to the face-to-face reconsiderations provided for in section 205(b)(2) of the Social Security Act (as added by section 4 of this Act). For this purpose the Secretary shall—

(1) provide for the establishment and implementation of procedures for the conduct of such reconsiderations in a manner which assures that beneficiaries will receive reasonable notice and information with respect to the time and place of reconsideration and the opportunities afforded to introduce evidence and be represented by counsel; and

(2) advise beneficiaries who request or are entitled to request such reconsiderations of the procedures so established, of their opportunities to introduce evidence and be represented by counsel at such reconsiderations, and of the importance of submitting all evidence that relates to the question before the Secretary or the State agency at such reconsiderations.

SEC. 6. REPORT BY SECRETARY.

Section 221(i) of the Social Security Act (as amended by section 3 of this Act) is further amended by adding at the end thereof the following new paragraph:

"(3) The Secretary shall report semiannually to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives with respect to the number of reviews of continuing disability carried out under paragraph (1), the number of such reviews which result in an initial termination of benefits, the number of requests for reconsideration of such initial termination or for a hearing with respect to such termination under subsection (d), or both, and the number of such initial terminations which are overturned as the result of a reconsideration or hearing.".

SEC. 7. OFFSET AGAINST SPOUSES' BENEFITS ON ACCOUNT OF PUBLIC PENSIONS.

(a) ADDITIONAL EXEMPTION.—

(1) Section 334 of the Social Security Amendments of 1977 (Public Law 95-216) is amended by adding at the end thereof the following new subsection:

"(h) In addition, the amendments made by the preceding provisions of this section shall not apply with respect to any monthly insurance benefit payable, under subsection (b), (c), (e), (f), or (g) (as the case may be) of section 202 of the Social Security Act, to an individual—

"(1) to whom there is payable for any month prior to July 1983 (or who is eligible in any such month for) a monthly periodic benefit (within the meaning of such provisions) based upon such individual's earnings while in the service of the Federal Government or any State (or political subdivision thereof, as defined in section 218(b)(2) of the Social Security Act); and

"(2) who at the time of application for or initial entitlement to such monthly insurance benefit under such subsection (b), (c), (e), (f), or (g)—

"(A) meets the dependency test of one-half support set forth in paragraph (1)(C) of such subsection (c) as it read prior to the enactment of the amendments made by this section, or an equivalent dependency test (if the individual is a woman), in the case of an individual applying for or becoming entitled to benefits under such subsection (b) or (c), or

"(B) meets the dependency test of one-half support set forth in paragraph (1)(D) of such subsection (f) as it read prior to the enactment of the amendments made by this section, or an equivalent dependency test (if the individual is a woman), in the case of an individual applying for or becoming entitled to benefits under such subsection (e), (f), or (g).".

(2) Section 334(f) of such Act is amended by striking out "The amendments" and inserting in lieu thereof "Subject to subsections (g) and (h), the amendments".

(b) REPORT BY SECRETARY.—The Secretary of Health and Human Services shall conduct a study of the provisions of title II of the Social Security Act which require an offset against spouses' and surviving spouses' benefits on account of public pensions, as added by section 334 of the Social Security Amendments of 1977 (taking into account

the amendment made by subsection (a) of this section as well as the provisions of such section 334), and shall report to the Congress, no later than May 15, 1983, his recommendations for any permanent legislative changes in such provisions (or in the applicability of such provisions) which he may consider appropriate.

(c) TECHNICAL AMENDMENTS.—Subsections (b)(4)(A), (c)(2)(A), (e)(8)(A), (f)(2)(A) and (g)(4)(A) of section 202 of the Social Security Act are each amended by inserting "for purposes of this title" after "as defined in section 210".

(d) EFFECTIVE DATE.—The amendments made by subsections (a) and (c) of this section shall be effective with respect to monthly insurance benefits for months after November 1982.

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the Senate amendments numbered 2, 3, and 4 to the bill (H.R. 7093) to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income, to amend the Social Security Act to provide for a temporary period that payment of disability benefits may continue through the hearing stage of the appeals process, and for other purposes, and on the disagreeing votes of the two Houses on the House amendment to the Senate amendment numbered 1 to such bill, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

INCOME TAX RATE ON VIRGIN ISLANDS SOURCE INCOME

Present law.—The Virgin Islands Government contends that payments of passive investment income by V.I. persons to U.S. persons are subject to a 30-percent tax (on the gross amount of the payment) and a corresponding withholding obligation. Certain U.S. recipients of such income contend that such payments are subject to neither tax nor withholding. (Similar payments to foreign persons are clearly subject to the tax and the withholding obligation.)

Senate position.—The Senate language (which is identical to the original House language) provides that the rate of V.I. tax on payments of passive investment income from V.I. persons to U.S. persons shall not exceed 10 percent. This treatment would apply to dividend payments out of earnings and profits accumulated in taxable years beginning on or after the date of enactment. The Government of the Virgin Islands would be able to reduce this 10 percent maximum rate in its discretion. The withholding obligation of the payer would in every case correspond to the substantive tax liability of the recipient. Payments to foreign persons would continue to be subject to the 30-percent tax and corresponding withholding.

House amendment.—The House amendment follows the Senate position, but makes two technical changes.

First, the House amendment makes it clear that Congress is taking neither side in the current dispute between U.S. persons and the V.I. Government by striking references to "reductions" in tax.

Second, the House amendment makes it clear that the Virgin Islands will be able to impose and require withholding of a tax of up to 10 percent on payments of passive income to U.S. persons.

Conference agreement.—The conference agreement follows the House amendment with the two technical changes.

CONTINUED PAYMENT OF DISABILITY BENEFITS DURING APPEAL

Present law.—A social security disability insurance (DI) beneficiary who is found to be no longer disabled under the provisions of the Social Security Act continues to receive benefits for two months after the month in which his eligibility is determined to have ceased. (As an administrative practice, individuals are now generally found to be "no longer disabled" no earlier than the month in which the individual is notified of the termination decision.)

The individual may request a reconsideration of the decision, and if the termination is upheld, he may appeal the decision to an Administrative Law Judge (ALJ). The individual is not presently eligible for benefits during the appeals process. However, if the initial termination decision is reversed, benefits are paid retroactively.

House bill.—Upon request of the beneficiary, DI benefits and Medicare coverage would continue to be paid through the month preceding the month of the decision pursuant to a hearing before an Administrative Law Judge. These additional DI benefits would be subject to recovery as overpayments, subject to the same waiver provisions now in current law, if the initial termination decision is upheld.

The provision is effective for benefit payments beginning with the first month after the date of enactment for cases where a termination decision has been made before October 1, 1983. In all cases such benefit payments would cease no later than June 1984. For cases where a termination decision was made before the date of enactment and a timely appeal is pending or is filed, benefits could be paid under this provision, but no lump sum back payments would be authorized.

Senate amendment.—Identical to House provision.

Cost effect.—According to the Congressional Budget Office this provision will increase outlays by $75 million in fiscal years 1983-85. There are no costs beyond those years.

Conference agreement.—The conference agreement follows the House provision.

PERIODIC REVIEWS OF DISABILITY CASES

Present law.—The Social Security Disability Amendments of 1980 required the Secretary of Health and Human Services to review the cases of current disability beneficiaries at least once every three years, beginning in January, 1982, to determine whether they are still disabled. Beneficiaries judged to be permanently disabled were to be excluded from this review.

House bill.—The House bill authorizes the Secretary to slow down the number of cases sent to the State disability agencies for reexamination below the rate required by the 1980 amendments. The Secretary's determination of the appropriate numbers of cases to be reviewed in each State shall be based on consideration of the backlogs of such pending reviews, projected numbers of new applicants for disability benefits, and projected staffing levels of State agencies. The State agency must demonstrate a good faith effort to meet appropriate staffing requirements and to process reviews in a timely fashion. The Secretary is to report annually to the House Committee on Ways and Means and the Senate Finance Committee on the determinations made under this section.

Senate amendment.—Same as House bill.

Cost effect.—Negligible.

Conference agreement.—The conference agreement follows the House provision.

REPORT BY SECRETARY

Present law.—There is no requirement for periodic reports to the Congress by the Secretary of Health and Human Services with respect to continuing disability investigations.

House bill.—Requires the Secretary of HHS to report to the Senate Finance Committee and the House Committee on Ways and Means semiannually on the number of: continuing eligibility reviews, termination decisions, reconsideration requests, and termination decisions which are overturned at the reconsideration or hearing level.

The provision is effective upon enactment.

Senate amendment.—Identical to House provision.

Cost effect.—None.

Conference agreement.—The conference agreement follows the House provision.

EVIDENTIARY HEARINGS IN RECONSIDERATIONS OF DISABILITY BENEFIT TERMINATIONS

Current Law.—The Social Security Act provides for initial determinations of disability by the State agencies authorized by the Secretary to make disability decisions, and for continuing reviews of disability by the Secretary or the State agency. The law also provides for a hearing by the Secretary, and subsequent judicial review, for any individual dissatisfied with determinations made by the State agencies or the Secretary.

House bill.—The House bill requires the Secretary to provide, beginning no later than January 1, 1984, opportunity for a face-to-face, evidentiary hearing prior to reconsideration of decisions to terminate benefits for disability beneficiaries. This requirement does not supplant or affect in any way the requirement of existing law for a hearing by an Administrative Law Judge. The provision applies only to reconsiderations of determinations that the beneficiary is not disabled because the physical or mental impairment on which his eligibility is based is found to have ceases, not to have existed or to no longer be disabling.

Senate amendment.—No provision.

Cost effect.—Negligible.

Conference agreement.—The conference agreement follows the House provison.

CONDUCT OF FACE-TO-FACE RECONSIDERATIONS IN DISABILITY CASES

Present law.—The Social Security Act provides for initial determinations to be made by the State agency or the Secretary, and for hearings conducted by the Secretary and judicial review after such hearings for those individuals dissatisfied with the earlier decisions.

House bill.—The House bill requires the Secretary to take all steps necessary to insure public understanding of the importance Congress attaches to the face-to-face reconsideration hearings provided in Section 4. The Secretary is required to assure that beneficiaries will receive reasonable notice and information as to the time and place of the reconsideration, of the opportunities to be represented by counsel and to

introduce evidence at the reconsideration, and of the importance of submitting all available evidence concerning the case at the reconsideration.

Senate bill.—No provision.

Cost effect.—None.

Conference agreement.—The conference agreement follows the House provision.

MEDICAL EVIDENCE

Present law.—Although current law does not specify a time period for the collection of medical evidence, current procedures, detailed in guidelines used by State agencies, require the Secretary to seek to obtain all medical evidence from all persons or institutions which have diagnosed or treated the individual within the 12-month period preceding the review of an individual's continuing eligibility.

Under both the regulations and the guidelines used by State agencies, an individual must meet the prevailing requirements for eligibility and no medical improvement needs to be shown to find an individual no longer eligible for disability benefits.

House bill.—No provision.

Senate amendment.—Requires the Secretary to make every reasonable effort to seek and obtain all relevant medical evidence from all persons or institutions which have diagnosed or treated such individuals with respect to his impairment or impairments within the preceding 12-month period. Requires the Secretary to consider all evidence available in the individual's case file relating to such impairment or impairments in making a determination on the case. States that nothing in the preceding sentence shall preclude the Secretary from finding an individual to be ineligible under the terms of the Social Security Act even if such individual's medical condition has not improved or otherwise changed since any prior determination of his disability.

Cost effect.—No estimate made.

Conference agreement.—The conference agreement does not include the Senate provision.

PUBLIC PENSION OFFSET

Present law.—Prior to 1977 social security spouse's benefits were available only to men who could meet a dependency test and to women, all of whom were presumed to be dependent. These provisions were declared in March 1977 (*Califano v. Goldfarb*) unconstitutional since they applied differently to men and women.

The Social Security Amendments of 1977 responded to the Goldfarb decision by providing, except for beneficiaries who are covered by the public pension offset exception clause, that social security dependents' benefits which are paid to spouses of retired, disabled, or deceased workers are reduced dollar-for-dollar by an amount equal to any public pension which the spouse receives as a result of his or her own employment by a Federal, state or local government which is not covered by social security. (Non-covered government employment is defined as employment not covered under section 210 of the Social Security Act on the last day the spouse was employed by the government.)

Under the exception clause (which expired December 1, 1982), the offset would not apply if: (1) a beneficiary is either receiving or eligible to receive a government pension based on non-covered employment for any month in the period December 1977 through November 1982, and (2) the beneficiary, at the time of filing for social security dependents' benefits, meets all the requirements for entitlement as they were in effect and being administered in January 1977. The law in January 1977 required men, but not women, to prove they were dependent on their spouses for at least one-half of their support in order to qualify for the spouses benefit.

House bill.—The House bill provides that during the 60 month period beginning with December 1982, the amount of the public pension used for purposes of the public offset shall be an amount equal to one-third of the public pension.

Senate amendment.—No provision.

Cost effect.—According to unofficial estimates of the Congressional Budget Office, the House bill would increase outlays by the following amounts (by fiscal years, in millions of dollars):

1983	15
1984	40
1985	65
1986	85
1987	108
1988	30

Conference agreement.—The Conferees agreed that, in lieu of a modification of the public pension offset clause, the public pension offset would not apply to an individual who becomes eligible for a public pension prior to July 1983 if that individual is dependent upon his or her spouse for one-half support. The one-half support test would be applied according to the pre-1977 law, except that it would apply to both men and women.

The amendment would also require the Secretary of Health and Human Services to study the pension offset provisions and to report his recommendation for any permanent legislation that may be appropriate by May 15, 1983.

In addition, the Conferees agreed to specify the definition of non-covered government employment as government employment which on the last day the spouse was employed, was not covered employment for purposes of title II of the Social Security Act.

LEGISLATIVE PROGRAM

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, for the information of the House, it is our intention to bring up the conference report on H.R. 5470, tax treatment of periodic payments, and H.R. 7093, taxes on Virgin Island source income, disability benefits, in approximately an hour, or at a time when we ask permision to consider the gasoline tax. The conferees are in session and we are just simply hoping we can get quick action.

□ 1230

TEXAS BAND OF KICKAPOO ACT

Mr. KAZEN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4496) to grant Federal recognition to the Texas Band of Kickapoo Indians; to clarify the status of the members of the band; to provide trust lands to the band, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Texas Band of Kickapoo Act".

CONGRESSIONAL FINDINGS AND DECLARATION OF POLICY

SEC. 2. (a) Congress finds that the Texas Band of Kickapoo Indians is a subgroup of the Kickapoo Tribe of Oklahoma; that many years ago, the Band was forced to migrate from its ancestral lands to what is now the State of Texas and the nation of Mexico; that, although many members of the band meet the requirements for United States citizenship, some of them cannot prove that they are United States citizens; that, although the Band resides in the State of Texas, it owns no land there; that, because the Band owns no land in Texas, members of the Band are considered ineligible for services which the United States provides to other Indians who are members of federally recognized tribes because of their status as Indians except when the members of the Band are on or near the reservation of the Kickapoo Tribe of Oklahoma; that members of the Band live under conditions that pose serious threats to their health; and that, because their culture is derived from three different cultures, they have unique needs including, especially, educational needs.

(b) Congress therefore declares that the Band should be recognized by the United States; that the right of the members of the Band to pass and repass the borders of the United States should be clarified; that services which the United States provides to Indians because of their status as Indians should be provided to members of the Band in Maverick County, Texas; and, that land in the State of Texas should be taken in trust by the United States for the benefit of the Band.

DEFINITIONS

SEC. 3. For purposes of this Act—

(a) "Band" means the Texas Band of Kickapoo Indians, a subgroup of the Kickapoo Tribe of Oklahoma;

(b) "Tribe" means the Kickapoo Tribe of Oklahoma; and

(c) "Secretary" means the Secretary of the Interior.

ESTABLISHMENT OF BAND ROLL; CLARIFICATION OF UNITED STATES CITIZENSHIP

SEC. 4. (a) Within one year of the enactment of this Act, the Secretary shall, after consultation with the Tribe, compile a roll of those members of the Tribe who posses Kickapoo blood and who are also members of the Band. When said roll is complete, the Secretary shall immediately publish notice in the Federal Register stating that the roll has been completed. The Secretary shall ensure that the roll, once completed, is maintained and that it is current.

(b) If the Secretary does not compile the roll within the period prescribed in subsection 4(a), he shall submit a report to Congress setting forth the reasons he did not do so.

(c) For a period of five years after the publication of the Federal Register notice required under subsection 4(a), any member of the Band whose name appears on the roll compiled by the Secretary, may, at his option, apply for United States citizenship. Such application shall be made to the Immigration and Naturalization Service and, upon receipt of the application, citizenship shall promptly be granted to the applicant.

(d) Notwithstanding the Immigration and Nationality Act, all members of the Band shall be entitled to freely pass and repass the borders of the United States and to live and work in the United States.

LAND ACQUISITION; APPLICABILITY OF THE INDIAN REORGANIZATION ACT

SEC. 5. (a) The Act of June 18, 1934 (48 Stat. 984), is hereby made applicable to the Band: *Provided*, however, That the Secretary is only authorized to exercise his authority under section 5 of that Act (25 U.S.C. 465) with respect to lands located in Maverick County, Texas.

(b) The Secretary is authorized and directed to accept no more than one hundred acres of land in Maverick County, Texas which shall be offered for the benefit of the Band with the approval of the Tribe. Nothing in this subsection shall be construed as limiting the authority of the Secretary under section 5 of the Act of June 18, 1934 (48 Stat. 985).

JURISDICTION

SEC. 6. The State of Texas shall exercise jurisdiction over civil causes of action and criminal offenses arising on the Band's trust lands in accordance with section 1360 of title 28, United States Code, and section 1162 of title 18, United States Code, as if it had assumed jurisdiction pursuant to sections 401 and 402 of the Act of April 11, 1968 (82 Stat. 78, 79). The provisions of section 403 of the Act of April 11, 1968 (82 Stat. 79), shall be applicable and available to the State of Texas.

PROVISION OF FEDERAL INDIAN SERVICES

SEC. 7. (a) Notwithstanding any other provision of law authorizing the provision of special programs and services by the United States to Indians because of their status as Indians, the Band and its members in Maverick County, Texas shall be eligible for such programs and services without regard to the existence of a reservation, the residence of members of the Band on or near a reservation, or the compilation of the roll pursuant to subsection 4(a) of this Act.

(b) In providing services pursuant to subsection (a), the Secretary and the head of each department and agency shall consult and cooperate with appropriate officials or agencies of the Mexican Government to the greatest extent possible to ensure that such services meet the special tricultural needs of the Band and its members. Such consultation and cooperation may include, whenever practicable, joint funding agreements between such agency or department of the United States and the appropriate agencies and officials of the Mexican Government.

Mr. KAZEN (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. LUJAN. Mr. Speaker, reserving the right to object, I do so to ask the gentleman to give us a little more information on the legislation.

Mr. KAZEN. Mr. Speaker, if the gentleman will yield, H.R. 4496 is a bill to grant Federal recognition to the Texas Band of Kickapoo Indians and to allow members of the band to acquire U.S. citizenship.

The bill was reported out of the committee and passed the House by consent with the support of the administration. The Senate passed the bill with some technical changes. The bill as passed by the Senate is supported by all concerned parties. It is a much needed bill that does not contain any authorization for any appropriation of funds and I am asking the House to concur in the Senate amendment to H.R. 4496.

Mr. Speaker, after reading the Senate rewrite of the bill, it is the opinion of the committee that this rewrite only brings technical changes to the bill as passed by the House.

It is therefore the view of this committee that section 5 as rewritten by the Senate still mandates the Secretary of the Interior to accept 100 acres in trust for the benefit of the Texas Band of Kickapoo Indians. Furthermore this committee interprets the second sentence of section 5(b) as allowing the Secretary at his discretion to accept in trust for the benefit of the band any additional lands over and above the 100 acres he is directed to accept under the first sentence of this subsection.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. There is no money in the bill at all?

Mr. LUJAN. Absolutely no money. It authorizes no Federal spending at all.

Mr. WALKER. I thank the gentleman.

Mr. LUJAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas that the Senate amendment be considered as read?

There was no objection.

The SPEAKER. Is there objection to the initial request of the gentleman from Texas?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. KAZEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

MAKING TECHNICAL CORRECTIONS IN BANKING AND RELATED STATUTES

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 271) to make technical corrections in certain banking and related statutes, and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

Mr. WYLIE. Mr. Speaker, reserving the right to object, I do so in order that the chairman might give us an explanation of this.

Mr. Speaker, there is a technical amendment which will be considered, but may I say that the minority has examined this now and what the chairman of the full Committee on Banking, Finance and Urban Affairs is attempting to do here is to offer some strictly technical amendments which do not have any substantive effect at all, and there is no money involved.

I simply reserve the right to object so that the chairman might include a statement in the RECORD at this point in explanation.

Mr. ST GERMAIN. If the gentleman will yield, I want to assure the gentleman that the action that would be taken definitely concerns technical amendments, typos, correction of erroneous references in the legislation that we adopted prior to the November elections, and where there are substantive changes there will be an amendment offered to eliminate the substantive legislative changes. They can be dealt with in the next Congress in the ordinary legislative process.

Mr. WYLIE. So-called bankers' bank language will be deleted by the amendment which the chairman intends to offer?

Mr. ST GERMAIN. That will be deleted, yes.

Mr. WYLIE. Mr. Speaker, I rise in support of Chairman ST GERMAIN'S unanimous consent request on this so-called technical corrections package, Senate Joint Resolution 271.

The Garn-St Germain Act is already being implemented by the depository institutions and the agencies which regulate them. There is no question in my mind that it will be remembered as a highly significant piece of legislation which will do much to restore confidence in the Nation's insured depository institutions. Nevertheless, there are some technical and conforming changes which need to be made.

From my perspective as the ranking Republican member of the Subcommittee on Financial Institutions, I can truly say that the provisions of Senate Joint Resolution 271 are technical and conforming and do, in fact, correct a number of provisions in the Garn-St Germain Depository Institutions Act of 1982 which the House passed without objection on October 1 of this year. The minority staff of our committee has worked closely with Chairman ST GERMAIN'S staff, as well as with the staff of the Senate Banking Committee, to develop what should be

viewed as consensus and perfecting legislation.

This resolution makes numerous grammatical corrections, corrects some improper cross references, and clarifies congressional intent. I will comment briefly on the two provisions which I believe are most significant in this technical package, sections 13 and 30.

Section 13 provides that the new money market instrument, which was made available for the first time on December 14, shall not be subject to the transitional adjustments under the Monetary Control Act of 1980. This provision is necessary to insure that depository institutions and their customers receive the benefit of a fully competitive instrument, as Congress intended, and will not be subject to the 1-percent reserve on personal accounts which had been imposed by the Federal Reserve.

Section 30 confirms that the limitation on life insurance activities contained in title VI of Public Law 97-320 applies to small bank holding companies. The apparent enpowerment of small bank holding companies to sell life insurance and annuities not withstanding title VI was inadvertent, and this correction merely preserves the original intent of Congress.

While I am sure that there are some interested parties who would like to see other items considered at this time, I am confident that this perfecting resolution is acceptable to all segments of the financial industry. To the best of my knowledge, I know of no real objections to Senate Joint Resolution 271.

For those who are interested, I encourage Members to review a sectional analysis to see for yourselves that this is purely a technical corrections resolution. Despite the fact that we are rapidly nearing the holiday season, this is not an example of Christmas tree legislation which our committee brings to the floor today.

In closing, Mr. Speaker, I urge all of my colleagues to support the unanimous consent request of my friend from Rhode Island, just as we passed the Garn-St Germain Act unanimously a few short months ago.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

S.J. RES. 271

SECTION 1. (a) Section 13(c)(5)(A) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(5)(A)), as added by section 111 of Public Law 97-320, is amended by inserting "or dividends" after "interest".

(b) The amendment made by subsection (a) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

SEC. 2. Section 5(o)(1) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(o)(1)), as added by section 112 of Public Law 97-320, is amended by inserting "examination," after "operation,".

SEC. 3. The last sentence of section 26(a) of the Federal Deposit Insurance Act (12 U.S.C. 1831c(a)), as added by section 113(p) of Public Law 97-320, is amended by striking out "Depository Institutions Amendments" and inserting in lieu thereof "Garn-St Germain Depository Institutions Act".

SEC. 4. (a) Section 13(f)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1823(f)(1)), as added by section 116 of Public Law 97-320, is amended by striking out "paragraphs" both places it appears and inserting in lieu thereof "paragraph".

(b) Section 13(f)(6) of such Act (12 U.S.C. 1823(f)(6)), as added by section 116 of Public Law 97-320, is amended—

(1) by redesignating subparagraphs (C) and (D) as subparagraphs (D) and (E), respectively; and

(2) by inserting after subparagraph (B) the following:

"(C) In the case of a minority-controlled institution, the Corporation shall seek an offer from other minority-controlled institutions before proceeding with the sequence set forth in the preceding subparagraph.".

SEC. 5. Section 406(c)(3) of the National Housing Act (12 U.S.C. 1729(c)(3)), as amended by section 122(f) of Public Law 97-320, is amended by striking out "paragraphs (1) or (2)" and inserting in lieu thereof "paragraph (1) or (2)".

SEC. 6. Section 408(l) of the National Housing Act (12 U.S.C. 1730a(l)) is amended by striking out "mergers or acquisitions approved under subsection (e)(2)" and inserting in lieu thereof "any transaction approved under subsection (e)(2) or (m)".

SEC. 7. (a) Section 408(m)(1)(A)(i) of the National Housing Act (12 U.S.C. 1730a(m)(1)(A)(i)), as added by section 123 of Public Law 97-320, is amended by striking out "subsections (e)(2) and (l)" and inserting in lieu thereof "subsections (e)(2) and (l)".

(b) Section 408(m)(1)(B)(iii) of such Act is amended by striking out "Board of Directors" each place it appears and inserting in lieu thereof "Federal Home Loan Bank Board".

SEC. 8. The second sentence of section 17 (a) of the Federal Home Loan Bank Act (12 U.S.C. 1437(a)), as amended by section 127 of Public Law 97-320, is amended—

(1) by striking out "the Administrative Procedure Act" and inserting in lieu thereof "section 553 of title 5, United States Code"; and

(2) by striking out "such Act" and inserting in lieu thereof "section 554 of such title".

SEC. 9. (a) Section 406(f)(5)(C)(ii) of the National Housing Act (12 U.S.C. 1729(f)(5)(C)(ii)), as added by section 202 of Public Law 97-320, is amended by striking out "if" the second place it appears.

(b) (1) Section 406(f)(5)(1) of such Act (12 U.S.C. 1729(f)(5)(I)), as added by section 202 of Public Law 97-320, is amended by inserting "or dividends" after "interest".

(2) The amendment made by paragraph (1) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

SEC. 10. (a) Section 13(i)(9) of the Federal Deposit Insurance Act (12 U.S.C. 1823(i)(9)), as added by section 203 of Public Law 97-320, is amended by inserting "or dividends" after "interest".

(b) The amendment made by subsection (a) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

SEC. 11. Section 206 of Public Law 97-320 is amended to read as follows:

"SUNSET PROVISION

"SEC. 206. (a) Upon the expiration of three years after the date of enactment of this Act, section 406(f)(5) of the National Housing Act and section 13(i) of the Federal Deposit Insurance Act are repealed.

"(b) The repeal by subsection (a) shall have no effect on any action taken or authorized pursuant to the amendments made by this title by or for a qualified institution while such amendments were in effect and while net worth certificates issued pursuant to these amendments are outstanding.".

SEC. 12. The first sentence of section 5(b)(1)(B) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(b)(1)(B)), as amended by section 312 of Public Law 97-320, is amended by inserting "may accept a demand account from itself and" after "An association".

SEC. 13. Section 204 of the Depository Institutions Deregulation Act of 1980 (12 U.S.C. 3503), as amended by section 327 of Public Law 97-320, is amended by adding at the end thereof the following:

"(4) The transitional adjustment provisions in section 19(b)(8) of the Federal Reserve Act, providing for the phase-in of reserve requirements, shall not apply to an account or accounts established pursuant to this subsection.".

SEC. 14. (a)(1) Section 5(c)(3) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)(3)) is amended by adding at the end thereof the following:

"(D) CONSTRUCTION LOANS WITHOUT SECURITY.—Investments not exceeding the greater of (i) the sum of its surplus, undivided profits, and reserves, or (ii) 5 per centum of the assets of the association, in loans the principal purpose of which is to provide financing with respect to what is or is expected to become primarily residential real estate where (I) the association relies substantially for repayment on the borrower's general credit standing and forecast of income without other security, or (II) the association relies on other assurances for repayment, including but not limited to a guaranty or similar obligation of a third party. Investments under this subsection shall not be included in any percentage of assets or other percentage referred to in this subsection.".

(2) The amendment made by paragraph (1) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

(b) Section 5(r)(2)(B) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(r)(2)(B), as added by section 334 of Public Law 97-320, is amended by striking out "Depository Institutions Amendments" and inserting in lieu thereof "Garn-St Germain Depository Institutions Act".

SEC. 15. Section 352 of Public Law 97-320, is amended by inserting "Home" after "Federal" the first place it appears.

SEC. 16. Section 6(m) of the Federal Home Loan Bank Act (12 U.S.C. 1426(m)), as added by section 355(b) of Public Law 97-320, is amended by striking out "Banks" and inserting in lieu thereof "banks or in connection with obtaining a charter from the Federal Home Loan Bank Board".

SEC. 17. (a) Section 5200(b)(1) of the Revised Statutes (12 U.S.C. 84), as amended by section 401 of Public Law 97-320, is amended by inserting a comma before "to the extent specified by the Comptroller of the Currency".

(b) Section 11(m) of the Federal Reserve Act (12 U.S.C. 248(m)) is amended by striking out in the first sentence "under paragraph (8) of section 5200 of the Revised Statues, as amended (U.S.C., Supp. VII, title 12, sec. 84)" and inserting in lieu thereof

"under section 5200(c)(4) of the Revised Statutes".

SEC. 18. (a) Section 5169(b)(1) of the Revised Statutes (12 U.S.C. 27(b)(1)), as amended by section 404(a) of Public Law 27-320, is amended—

(1) by inserting "(except to the extent otherwise provided by law)" after "engage exclusively"; and

(2) by striking out "depository institutions" the second place it appears and inserting in lieu thereof "depository organizations, subsidiaries thereof,".

(b) The last proviso of section 5136 Seventh of the Revised Statutes (12 U.S.C. 24 Seventh), as amended by section 404(b) of Public Law 97-320, is amended—

(1) by inserting "(except to the extent otherwise provided by law)" after "engages exclusively";

(2) by striking out "depository institutions" the second place it appears and inserting in lieu thereof "depository organizations, subsidiaries thereof,"; and

(3) by striking out "10 per centum of its" and inserting in lieu thereof "10 per centum of the association's".

(c) The last sentence of section 2(c) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(c)), as amended by section 404(d) of Public Law 97-320, is amended—

(1) by inserting "(except to the extent otherwise provided by law)" after "engage exclusively"; and

(2) by striking out "depository institutions" the third place it appears and inserting in lieu thereof "depository organizations, subsidiaries thereof,".

SEC. 19. (a) Section 2 (b) of the Act of May 1, 1886 (12 U.S.C. 30(b)), as amended by section 405 (a) of Public Law 97-320, is amended by inserting "for a relocation outside such limits" after "stock of such association".

(b) The first sentence of section 5154 of the Revised Statutes (12 U.S.C. 35) is amended by striking out "with any name approved by the Comptroller of the Currency" and inserting in lieu thereof "with a name that contains the word 'national' ".

SEC. 20. (a) Section 406 of Public Law 97-320 is amended to read as follows:

"VENUE PROVISIONS

"SEC. 406. The last sentence of section 5198 of the Revised Statutes (12 U.S.C. 94) is amended to read as follows: 'Any action or proceeding against a national banking association for which the Federal Deposit Insurance Corporation has been appointed receiver, or against the Federal Deposit Insurance Corporation as receiver of such association, shall be brought in the district or territorial court of the United States held within the district in which that association's principal place of business is located, or, in the event any State, county, or municipal court has jurisdiction over such an action or proceeding, in such court in the county or city in which that association's principal place of business is located.'.".

(b) The amendment made by subsection (a) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

SEC. 21. Section 4(b)(1) of the Act of March 9, 1933 (12 U.S.C. 95(b)(1)), as amended by section 407 of Public Law 97-320, is amended by inserting "a State or" before "a State official".

SEC. 22. Section 23A(d) of the Federal Reserve Act (12 U.S.C. 371c(d)), as amended by section 410(b) of Public Law 97-320, is amended—

(1) by striking out "except for the purchase of a low-quality asset which is prohibited" in paragraph (1) and inserting in lieu thereof "subject to the prohibition contained in subsection (a)(3)"; and

(2) by striking out "purchasing loans on a non-recourse basis from affiliated banks" in paragraph (6) and inserting in lieu thereof ", subject to the prohibition contained in subsection (a)(3), purchasing loans on a non-recourse basis from affiliated banks".

SEC. 23. (a) Section 412 of Public Law 97-320 is amended to read as follows:

"VISITORIAL POWERS

"SEC. 412. The fifth paragraph of section 5240 of the Revised Statutes (12 U.S.C. 484) is amended to read as follows:

" '(A) No national bank shall be subject to any visitorial powers except as authorized by Federal law, vested in the courts of justice or such as shall be, or have been exercised or directed by Congress or by either House thereof or by any committee of Congress or of either House duly authorized.

" '(B) Notwithstanding subparagraph (A), lawfully authorized State auditors and examiners may, at reasonable times and upon reasonable notice to a bank, review its records solely to ensure compliance with applicable State unclaimed property or escheat laws upon reasonable cause to believe that the bank has failed to comply with such laws.'.".

(b) The amendment made by subsection (a) shall be deemed to have taken effect upon the enactment of Public Law 97-320.

SEC. 24. Section 424(g) of Public Law 97-320 is amended by striking out "688" and inserting in lieu thereof "668".

SEC. 25. Section 107(5)(A)(i) of the Federal Credit Union Act (12 U.S.C. 1757(5)(A)(i)), as amended by section 507 of Public Law 97-320, is amended by striking out "Association" and inserting in lieu thereof "Administration".

SEC. 25. Section 107(7) of the Federal Credit Union Act (12 U.S.C. 1757(7)), as amended by section 514 of Public Law 97-320, is amended—

(1) by striking out "and" before "(J)";

(2) by striking out "(L)" and inserting in lieu thereof "(K)"; and

(3) by striking out "; and" at the end thereof and inserting in lieu thereof a period.

SEC. 27. The next to the last sentence of section 124 of the Federal Credit Union Act (12 U.S.C. 1770), as amended by section 515 of Public Law 97-320, is amended by inserting "of" after "installation".

SEC. 28. Section 113 of the Federal Credit Union Act (12 U.S.C. 1761b), as amended by section 522 of Public Law 97-320, is amended—

(1) by striking out "directions" and inserting in lieu thereof "direction";

(2) by striking out "unions" in paragraph (2) and inserting in lieu thereof "union";

(3) by inserting "by" after "interest paid" in paragraph (9); and

(4) by striking out "meetings" in paragraph (15) and inserting in lieu thereof "meeting".

SEC. 29. Section 202(c) of the Federal Credit Union Act (12 U.S.C. 1782(c)), as amended by section 529 of Public Law 97-320, is amended by striking out "paragraphs (2) and (3)" in paragraph (1) and inserting in lieu thereof "paragraph (2)".

SEC. 30. The first sentence of section 4(c)(8) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(8)), as amended by section 601 of Public Law 97-320, is amended—

(1) by inserting "*: Provided, however,* That such a bank holding company and its subsidiaries may not engage in the sale of life insurance or annuities except as provided in subparagraph (A), (B), or (C)," before "; or (G)"; and

(2) by striking out the proviso at the end thereof.

SEC. 31. Section 701(c) of Public Law 97-320 is amended—

(1) by striking out "both"; and

(2) by inserting ", on," after "prior to".

SEC. 32. (a) Section 1(b)(4) of the Bank Service Corporation Act (12 U.S.C. 1861(b)(4)), as amended by section 709 of Public Law 97-320, is amended—

(1) by striking out "or another" after "insured bank," and inserting in lieu thereof "a"; and

(2) by inserting before the final semicolon the following: ", or a financial institution the accounts or deposits of which are insured or guaranteed under State law and are eligible to be insured by the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, or the National Credit Union Administration Board".

(b) The Bank Service Corporation Act, as amended by section 709 of Public Law 97-320, is amended—

(1) by striking out "the Financial Institutions Supervisory Act of 1966 (12 U.S.C. 1818(b) et seq.)" in section 7(b) and inserting in lieu thereof the following: "section 8 of the Federal Deposit Insurance Act (12 U.S.C. 1818)"; and

(2) by striking out "under this Act" in subsections (d) and (e) of section 4 and inserting in lieu thereof "under the law of the United States".

SEC. 33. Section 4(c)(14)(F) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)(14)(F)), as amended by section 203 of Public Law 97-290, is amended—

(1) by striking out the semicolon at the end of subparagraph (ii) and inserting in lieu thereof a period;

(2) by striking out "solely to do business with other banks and their officers, directors, or employees; (II) is owned primarily by the banks with which it does business; and (III) does not do business with the general public" in subparagraph (iii) and inserting in lieu thereof "to engage exclusively (except to the extent otherwise provided by law) in providing services for other depository organizations, subsidiaries thereof, and their officers, directors, and employees; and (II) is owned exclusively (except to the extent directors' qualifying shares are required by law) by other depository institutions";

(3) by striking the semicolon and the word "and" at the end of subparagraph (iii) and inserting in lieu thereof a period; and

(4) by striking out subparagraph (iv).

SEC. 34. Section 414 (a) of the National Housing Act (12 U.S.C. 1730c) is amended by inserting "(which, for the purpose of this section, shall include a Federal association the deposits of which are insured by the Federal Deposit Insurance Corporation)" after "insured institution" the first place it appears.

AMENDMENT OFFERED BY MR. ST GERMAIN

Mr. ST GERMAIN. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ST GERMAIN: Senate Joint Resolution 271 is amended in section 4 by striking out "(a)" immediately before "section 13(f)(1) of the Federal Deposit Insurance Act", and by striking out subsection (b); by striking out section 18 and inserting in lieu thereof the following:

"SEC. 18. The last proviso of section 5136 Seventh of the Revised Statutes (12 U.S.C. 24 Seventh), as amended by section 404(b) of Public Law 97-320, is amended by striking out "10 per centum of its" and inserting in lieu thereof "10 per centum of the association's";

By striking out section 33; and,

By renumbering section 34 as section 33.

The SPEAKER. The question is on the amendment offered by the gentleman from Rhode Island (Mr. ST GERMAIN).

The amendment was agreed to.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

OUR YOUNG AIRCREWS DESERVE THE VERY BEST, THE B-1 "PEACEMAKER"

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. DORNAN) is recognized for 20 minutes.

Mr. DORNAN of California. Mr. Speaker, thank you for your consideration in calling up my special order in defense of the B-1 at this time. This is my last speech to my colleagues in the House and I have chosen a subject of utmost importance to my brother active duty U.S. Air Force colleagues.

I implore my 354 colleagues who are returning to serve in the 98th Congress, 142 Republicans and 212 Democrats, and the 81 new Members not to undo the years and years of hard work that has finally brought the B-1 into production. Senator JOHN GLENN, a strong B-1 supporter, told me this week he believes this superb aircraft may again be in jeopardy of cancellation during the next Congress. May commonsense forbid that.

I have been on the phone all week with our key intelligence services, both the CIA and the DIA, trying to get the very best and latest intelligence estimates on what the Soviets are doing with their B-1, and their B-2.

In other words how they are expanding their air-breathing strategic bombing forces, the air leg of their triad. I have brought to the well today a perfectly scaled model of the Soviet Tupolev 122 Backfire bomber. You recall, Mr. Speaker, I brought it to the well of the House on February 22, 1979, George Washington's Birthday, when you changed your support and the B-1 was canceled by this House finally caving in to President Carter's worst defense mistake. That horrendous decision has cost the United States precisely to the month, 5 years delay in delivery of the first B-1 to our Strategic Air Command.

This is what the Soviet Backfire bomber looks like. Notice how similar it is in size to the B-1. This large model of the B-1 sitting next to the Backfire model here on the recording clerk's table is made to the identical scale. The comparison graphically demonstrates that the Backfire is almost exactly the same size as the B-1. Although it has only two engines, compared to the B-1's four engines, the Tupolev's Kuznetsoy NK-144 engines are the most powerful jet turbofan afterburning engines in the world, 48,500 pounds of thrust. That is more power than the two engines on our Mach III capable Blackbird intelligence aircraft, the SR-71. This Backfire bomber has been discussed in Geneva for the last 10 years as a tactical weapon system, during the rare times when it has been discussed at all. What a farce.

The variable geometry swept-wing Backfire bomber is simply not a tactical weapon only; it is a strategic bomber, a cruise missile carrier, a naval power projection weapon or if an aggressor chooses a tactical blitzkrieg battlefield tactical bomber. It was used within the last few months to make simulated cruise missile runs on two of our superaircraft carriers.

It is capable of reaching the United States without refueling, and then after attack on the way out, it could easily recover in Cuba or on the island of Grenada, at the end of the Antilles chain, where the Soviets are now building two parallel 13,000-foot runways. It could recover in a South American country and claiming emergency, as for example, a British Vulcan bomber did on a long-range bombing mission to the Falkland Islands from Ascension Island. The Soviets also have the capability of staging an airborne paratrooper strike on any far northern Canadian airfield and then recover their Backfire bombers there.

Now, understand this: Since we had our raging debates trying to put the B-1 into production in 1977 and 1978, the Soviet Union moved ahead with a B-2, and began a research and development program, flying a bomber so classified that I could not discuss it at all before this House in 1979 or 1980 or last year, or even earlier this year, not until this fall. In those excellent John T. Hughes intelligence briefings that the Committee on Armed Services receives at the beginning of each year this new bomber was referred to as the RAM-P. And this new Blackjack bomber is larger than our B-1. It is designed to carry cruise missiles. And while the Soviet Backfire reaches a production rate of almost four per month, which by the way is the maximum rate we were planning to produce our B-1 or will be producing the improved B-1B.

Their B-1 strategic airplane, the Tupelov-122, Backfire, in Soviet use for years, has now come into service in impressive numbers: 100 in the Soviet long-range bombing forces, that is their Strategic Air Command, by the end of next summer, and 100 in the bombardment wings of the Soviet Navy, with particular emphasis on their East Siberian Pacific Forces.

□ 1240

Our Navy no longer has a long-range bomber with conventional or nuclear capability. Our Navy gave up that mission almost 20 years ago. But the Soviet Navy has always had its own Strategic Air Command. That means at the end of this year there will be 200 new supersonic intercontinental bombers, with the Blackjack (RAM-P) on the way.

Now, about that "Blackjack," that name is its new NATO designation. Let us call it their B-2, for clarity and comparison. The Soviets expect to have 50 to 75 of these monsters flying by 1990. It, like the Backfire, has a conventional and a nuclear capability. And also a cruise missile capability. They expect the first deliveries of the Blackjack, the Soviet B-2, to be received in their long-range forces by 1987.

We will not pick up our first B-1's until just 2½ years before that, February 1985. And we will not have our 100th and final B-1 Peacemaker until July 1988. Hopefully not late. We could have had 240 by June 1986 had it not been for President Carter lack of vision.

I hope to God our B-1's are not too late to keep the peace. Mr. Speaker, Douglas MacArthur once said that all failures in war can be traced really to those two words—too late.

Here is General MacArthur's exact remarks:

> The history of failure in war can be summed up in those two words, too late—too late in comprehending the deadly purposes of a potential enemy, too late in realizing the mortal danger, too late in preparedness, too late in uniting the possible forces for resistance, and too late in standing with one's friends.

Mr. Speaker, when Carter cancelled the B-1 it was looked at by the Soviets as another act of weakness by the American Government. Another manifestation of no resolve. Perceived by the Politburo as the continuing decline of the West.

And what about our aging B-52 Stratofortresses. In my State of California, we have seen three B-52's crash and burn in just in the last year and 2 months.

One went down at dawn, on October 30, 1981. It was a B-52D, one of the earlier models of this 450,000-pound former Queen of the Skies that has been our first line of defense since the mid-fifties. At the end of a long night mission, this March AFB B-52, struck the ground near La Junta, Calif., killing all officers and the sergeant tailgunner. A fraternity brother of one of

my staffers, Lt. Kendall Wallace, was killed in that crash. Some of my colleagues may recall the tribute, on April 21, that I paid to him and all of our SAC crewmen who fly these difficult ground-hugging mission.

On November 29 last, just 22 days ago, another B-52 crashed on landing in the district of our distinguished colleague, (Mr. MATSUI), and burned on the ground, completely destroying the aircraft. Thank God, all the crewmen were able to safely evacuate the aircraft. That was November 29, then last Wednesday, December 16, another B-52G from the same 93d Bombardment Wing out of Castle Air Force Base, Merced, Calif., crashed on takeoff with total loss of life, all nine crewmembers killed on impact. Castle AFB became the first B-52 wing in the Unites States of America, receiving its first bomber No. 0156 in the spring of 1955.

That B-52G tragedy near Sacramento showed again how young our new combat crews are. Literally younger than the planes they fly in defense of the free world.

I have here a good article that shows how dedicated our young men are and how they are milking the very maximum capabilities out of the B-52's. There is a cockpit crew photograph on the front section of this South Bay Daily Breeze, September 27, 1981, feature story. I wish you could see this photograph and how young the crewmen are. The aircraft commander is a young captain, Scott Martin and his copilot is 1st Lt. Gaetano Degioia. Now these two pilots look like for all the world like senior pages here in the House of Representatives. They are in their early twenties.

I repeat our crews literally are younger than the B-52's they are flying. Here is the list of our Air Force men who died Wednesday, five 2d lieutenant trainees and four seasoned Vietnam veterans with thousands of hours of invaluable flight experience. Civilian eyewitnesses maintain the pilot Maj. Jim York turned, banked, the B-52 at the moment before impact to avoid houses. Typical of our superb military pilots.

Mr. Speaker, here are the names, crew positions, family status and hometowns of these fine Americans:

(1) 2nd Lt. Scott A. Semmel, twenty three, Student Co-pilot, newly married, Philadelphia, Pa.

(2) 2nd Lt. Peter M. Riley, twenty three, Student Co-pilot, newly married, Woonsocket, R.I.

(3) 2nd Lt. Richard P. Robeson, Jr., twenty seven, Student Navigator, married, Bolling Green, Ohio

(4) 2nd Lt. Benjamin C. Berndt, twenty four, Student Navigator, newly married, Norwalk, Conn.

(5) 2nd Lt. Daniel N. Bader, twenty five, Student Navigator, bachelor, Salt Lake City, Utah

(6) Major James H. York, 43, Aircraft Commander/Instructor Pilot, 3 children, Pendleton, Ore.

(7) Captain Lyle A. Brunner, 42, Bombadier Instructor, 2 children, Missoula, Mont.

(8) Captain Dennis E. Davis, 44, Navigator Instructor, 1 son, Hillsboro, Oregon

(9) Master Sgt. Jere E. Lefever, 42, Aircraft Gunner, 3 children, Concord, Penn.

Notice the ages of the new SAC crewmen, 23, 23, 27, 24, 25. Four of them are newly married as I was within months of receiving my Air Force wings of silver on Febuary 7, 1955.

Notice that the four senior instructor crew members are leaving widows and nine children to grieve during this Christmas season. We are so fortunate as a Nation to have these heroic families who give so much in their service to us.

Mr. Speaker, let me use the course of my own life as a striking example of how long our B-52's have been in service. My wife Sallie and I were married in April 1955 when the first B-52's arrived in numbers on active duty at Castle Air Force Base, Calif., I repeat, that same 93d Bombardment Wing that has lost two airplanes in the last few weeks. I have now been married to my lovely lady for 28 years this coming April, we have five grown children, all in their twenties, two sons and three daughters. My older daughter is beautifully pregnant with our third grandchild which is due next May. My middle daughter has already given us a grandson and a granddaughter. From 22-year-old bridegroom, USAF second lieutenant to grandfather three times over, a lifetime, and throughout all that time our Nations' No. 1 strategic bomber has been the same aircraft, the B-52.

When you go back to the last time the Republicans were in the majority in this House, it was 4 months before the delivery of B-52 No. 0156 out of Boeing, Seattle, to Castle Air Force Base. A long, long drought for Republicans. Not a single sitting Republican will be in the 98th House of Representatives who goes back before January 1957, and only BARRY GOLDWATER was in the Senate then. My colleagues, this B-52 is history. Those planes were built to replace the B-36 Peacemaker I which served for a little over a decade, and the 52's were supposed to serve for a little over a decade. They were not supposed to serve for three decades.

It is a betrayal of trust to make our young men in SAC fly these aging aircraft that were once the Queens of the Skies, and not give them this excellent new B-1B.

We only have two choices, and our major disarmament exponent in this House, the gentleman from California (Mr. DELLUMS) agreed with me on this. Do away with all our bombers in SAC or give our men a decent new aircraft to fly. And that is really the decision facing the 98th Congress. To betray our men and keep our crews flying what they described to me as a kamikazie or suicide mission if called to combat. Or upgrade the equipment. We either dump the whole Strategic Air Command flying men—side of our deterrence—or give our crews what they are entitled to as American citizens, technology worthy of our advanced society.

We cannot go back to that harrowing period before World War II when our pilots were flying obsolete airplanes, 10 to 15 years behind of the state of the art, while we witnessed the Luftwaffe and the Air Forces of the Japanese Imperial war lords flying the finest fighter and bomber aircraft in existence.

Mr. Speaker, I found in my B-1 files as I was closing down my office yesterday an article written in February 1976 by the then SAC Commander in Chief Russell E. Dougherty on the strategic mission profile of the B-1 and why we desparately needed that aircraft to defend the free world. In re-reading General Dougherty's article, I found that word for word it could have been written yesterday. And the Soviets are much stronger now. Because of improving the B-1A to a B-1B model, with Stealth technology incorporated into the B model, there is not a single word in General Dougherty's article about maintaining a credible deterrent, keeping the peace, that is not apropos today. After all the motto of the Strategic Air Command is "Peace is our profession," then and now.

Here is how General Dougherty concluded his article. He said:

> In sum, I see no real alternative to the B-1 from among the suggestions that have been advanced. If we are denied timely production of this aircraft, and rapid introduction of the B-1 into our operational inventory, it is my opinion that the nation's deterrent force mix soon will be seriously deficient in its ability to maintain an essential balance, real or perceived, with the strategic forces of the Soviet Union.

Now, that word "perceived" is one of the most important aspects in maintaining peace in this fragile world of ours. It is the Soviet perception of the United States of America and our ability to defend ourselves that is every bit as important as the reality of our military preparedness whatever it may be at any given period of history.

True, the Soviet Union does not have the blood lust for warfare that, for example, the war lords of Japan and their Bushido Knights had, or the Nazi Third Reich and its thugs had, military forces spoiling to get into a slaughter. But the Soviet Union is expansionist and agressive. One, the Soviet Union believes that their military superiority will give them whatever victories they want in foreign policy without a war. Two, they believe that we are so rotten internally with an epidemic of violent crime, alcoholism problems, narcotic addiction problems, child pornography sickness, consumerism to a fault, hedonism at its peak, that Lenin was correct, they

will pluck us off the vine like rotting fruit.

But if push comes to shove, as they say, to implement their foreign policy and gain hegemony over the world, they will shove. The slave system of communism cannot live side by side with our free system for all of its shortcomings. That was seen in Czechoslovakia when they opened the border and the Czech people freely journeyed down to Vienna, Austria, and looked in the store windows. They said, "How is it that these people in Austria can buy a pair of shoes with a week's labor, and it takes us 8 months' wages to buy shoes not even as good?" All this under a liberal, Dubcek, a man who would be described in this House as a flaming liberal. The Soviets realized that they again had to send in the tanks and kill their liberal because they cannot suffer this side-by-side, window-to-window comparison with the free world.

□ 1250

But make no mistake about it, my colleagues, or anyone who hears my voice or reads these words, the Soviet Union under that command economy of theirs has reached a military-industrial capability equal to the United States of America. They are keeping open four intercontinental ballistic missile production lines, we have none; they keep in production at this moment nine different classes of submarines, build a cruiser, the *Kirov* class, better than any cruiser in the American Navy. And if they can maintain a production line of four Soviet Tupelov Backfire bombers a month, and still move into production of the Blackjack, a second intercontinental bomber—their B-2, bigger than our B-1—then it shows you what can be accomplished in a command system. It shows you how Napoleon was able to arm for one war after another.

How Hitler was able to arm for war, for his first 5 years sneakily under the provisions of even the oppressive Versailles Treaty. I can tell you that the United States of America is going to have to go back to adhering to the words of the Father of our Country, after whom our Capital City is named.

George Washington said over and over that the way to keep peace in a hostile world is to be prepared for war.

There is not a Member in this Chamber that would not do everything in his or her power to avoid a Satanic holocaust across this world with an exchange of nuclear weapons or horrific powerful modern conventional weapons, but turning the other cheek as some bishops advise us to do has never, never, ever worked in the international arena. Expansionist powers only respect strength and resolve. And would it not be ironic if we achieved a pluperfect nuclear stalemate similar to what we had with battlefield poison gas in World War II, and then had the Soviet Union overwhelm Western Europe, because of some conflict over foreign policy, with biochemical warfare. The Soviets at this moment are testing seven types of poison gas agents against innocent people in contravention of Geneva treaties against poison gas in 1925 and 1972. Those poisons are being used now, as I speak to you, in Afghanistan, Ethiopia, Laos, and Cambodia. If they use in an immoral, arrogant manner, biochemical warfare against Afghanistan, who can claim they would not use it against Europe? They keep their consumers at absolutely a poverty level so that they can keep their massive space, military, and chemical warfare programs going at full speed. And we respond by telling our young aircrews in the Strategic Air Command that they cannot have the best equipment that we are capable of producing in our modern industrial society. We order them to fly these old, reworked, reengined, planes that should be in air museums.

I called the Strategic Command Headquarters and I asked them to give me the average pay of a new aircraft commander on a B-52. Some young men actually become commanders of these huge eight-engine aircraft during their first 4-year tour of duty as junior captains just 3 years out of pilot training. A young captain like that would make $98 a month for basic subsistance—groceries—and there are some in this House who would like to take commissary and PX privileges away from our military people. Shame on you.

Then he would make $406.50 for housing allowance. You cannot get a decent apartment for that money here or in Sacramento if you are married and most of the young bachelors forfeit that allowance to live on base so that in the early part of their careers they can be closer to their training units and their squadron operations, learning better their profession of keeping the peace.

Their basic pay is $1,990.70 a month, their flight pay $206. Think of that. The men who left mom and dads, eight widows, and nine young children without their daddies on Christmas in that plane crash outside of Sacramento, received flight pay—hazard pay—of a lousy $206 a month. That is the maximum our submarine crews get. Airborne paratroopers even less.

Now, what is the yearly total of that pay? It is only a little over $31,000 a year. Since the Members here will now be making almost $70,000 a year, with the possibility of speech honoraria at 30 percent of $70,000, that is, $21,000, I ask you to be fair to those men and women who make far less serving our country. When they risk their lives for us they deserve at least the finest equipment. Do not take back the money to build 100 B-1's.

We must give the best to our men who land on the pitching decks of aircraft carriers, to our A-10 Thunderbolt pilots flying tank support 10 feet off the ground, our F-14, F-15, and F-16 pilots who are pushing their aircraft and themselves to the very razor's edge of performance to defend our country.

I think that Congressmen on both sides of the aisle must understand that it is a moral issue if we ask our pilots to fly in obsolete aircraft. I hope you will consider your own pay raise when you budget for men and women in our military services across the world. They are putting up with much privation and brutally long hours and sometimes violent death to give us this peace that we so cherish, particularly at this lovely family season of Christmas.

Mr. Speaker, I commend the gentleman from Pennsylvania (Mr. DON BAILEY) for his efforts to bring the deserved honor to our Vietnam vets that he has fought for over 4 years in this House. That honor was never absent from the battlefields and skies of Vietnam where our men, including B-52 crews, served for over a decade, crippled by political decisions, trying desperately to bring freedom to that part of the world. Well done, DON.

In closing, Mr. Speaker, I ask unanimous consent at this point in the RECORD to resubmit my remarks of November 18, 1981, defending the B-1 bomber. Every word is just as relevant today, 13 months later.

[From the CONGRESSIONAL RECORD, Nov. 18, 1981]

B-1 PROJECT

Mr. DORNAN of California. Mr. Chairman, I join with my colleagues here today in support of President Reagan's efforts to restore funding for the B-1 bomber project which President Carter had terminated. Now that we have a President more committed to maintaining the delicate strategic balance between the United States and the U.S.S.R. In pursuit of that balance, President Reagan has announced his intention to build the long-delayed B-1 bomber. This aircraft is acknowledged by the majority of aviation experts to be the best bomber ever developed by man. It is capable of penetrating Soviet air space undetected and may continue to have that ability until the 1990's or later. Only after the Soviets spend massive funds on improved radar systems will they be even able to detect the B-1.

The citizens of my 27th Congressional District can be particularly proud of the B-1 bomber project; much of the research/development and manufacture is the work of local citizens. The Reagan decision to recommend funding for the construction of the B-1 based upon some logically accepted assumptions. The United States must depend heavily on bombers—and seabased forces—while we take steps to strengthen our land-based missiles. We cannot afford the luxury

to wait for the Stealth bomber, which presently exists only on paper. There are currently technical uncertainties about the Stealth bomber. It is expected that these uncertainties will be resolved during development and the advanced technology bomber will be a very effective aircraft when ultimately deployed. Without the B-1, there would be pressures to accelerate the Stealth bomber, which would increase program risks and possibly result in a less capable aircraft being deployed. Building two bombers will stimulate competition and give the Defense Department the flexibility to adjust bomber production in accordance with any changes in estimates of the cost and effectiveness of the two aircraft, as well as any changes in the Soviet military capabilities.

President Reagan has proposed building 100 of the variant bombers. The term variant is used because research and development has continued on the B-1 since the Carter cancellation. Innovations and efficiencies developed in the 5 years since its cancellation will be incorporated in the new variant model. The first B-1 squadron is expected to be operational in 1988.

Mr. John W. R. Taylor, editor of Janes All the World's Aircraft, is universally recognized as one of the foremost experts on every type of military and civilian aircraft. Mr. Taylor warns.

"It is therefore vital for all people to understand that the fragile co-existence maintained for generations by balanced East-West military power is being allowed to slip inch by inch from our grasp."

When Mr. Taylor was asked about his thoughts on the opposition that has been raised to the B-1, he replied:

"Most of that has been due to the high cost. But really, I do not think that the cost is the main consideration. It is a question of what it does for you. Does it keep you alive? If there is anything else that will do the job less expensively, by all means build it. But, in this case, there just isn't anything else."

The decision to build the B-1 is a clear move away from the previous administration's policy of unilateral arms restraint. The Reagan administration wants to be sure that any weapon system forgone by the U.S. Government is reciprocated by the Soviet Union. The new policy direction will increase the Soviet incentive to seriously discuss arms limitation agreements. In turn, assisting our Nation in achieving its most important foreign policy goals: Preservation of peace and valid arms limitation agreements with verifiable provisions in any treaty that is agreed upon.

The B-1 bomber will have advantages that no other leg of our triad of strategic nuclear forces possesses. Some of these are:

Bombers are the only element that can be launched prior to a decision to employ these weapons, and permits a trained crew to take actions and accept responsibilities that cannot be anticipated or preprogramed in missile systems.

Weapons-carrying bombers can be launched to insure their survivability, or to signal national resolve during times of crisis with the confidence that the crew can be redirected or recalled as the situation develops. Bombers can be put on increased ground alert, dispersed to remote airfields, flown on airborne alert, or dispatched to trouble spots throughout the world without a final commitment to use their weapons. In a time when the availability of foreign bases and ports is uncertain, the B-1 will provide the quickest, and in some cases probably the only, means to mount a rapid show of force.

Bombers provide the only capability to engage unanticipated or mobile targets by using the crew and aircraft sensors to determine target location at the times of delivery.

In assisting maritime roles, bombers have the inherent capability to provide an important supplement to U.S. Naval Forces. They can provide collateral maritime support in long range sea surveillance and interdiction, mine laying and, potentially, in antisubmarine warfare.

As a reusable strategic weapons system, bombers have the capability to accurately deliver large nuclear or conventional payloads throughout the course of the conflict, regardless of the level.

The B-1 is going to enter into the defense of our Nation's borders much later then it could have or should have. It will nevertheless play a vital role on our strategic defense until the year 2000, and perhaps beyond. First as a penetrating bomber, later as a bomber capable of standing off the coast of an adversary nation and launching cruise missiles. Its manufacture sends a strong signal to the Soviets that we are as serious about our defense as we are about pursuing arms agreements.

I thank the Speaker and wish him a holy and a merry Christmas. It was an honor to serve under the leadership of the gentleman from Massachusetts and I consider him one of the finest figures of history serving his country today.

I wish all of my distinguished colleagues a holy holiday season and merry Christmas and wish them God's protection and guidance in the performance of their duties in the turbulent years before us.

VIETNAM VETERANS MEMORIAL COMPLETION

(Mr. BAILEY of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BAILEY of Pennsylvania. Mr. Speaker, yesterday the House passed House Joint Resolution 636 and House Concurrent Resolution 437 without any dissenting votes. The support was unanimous—a very rare occurrence—for the placement of an American flag with inscription and a statue of three American servicemen as part of the integral and basic design of the Vietnam Veterans Memorial.

This Member cannot adequately express, from a personal point of view, his heartfelt gratitude for the help my colleagues gave on this issue. Virtually all veterans groups and the Vietnam Veterans Memorial Fund had agreed on the placement of the flag and statue as described in the resolutions. But a small group in the Fine Arts Commission were holding up final placement. This very strong and unanimous expression by our colleagues here in the House will obviously make it very clear what the Congress wants.

Most importantly the vote took place during a time when the floor of the House was full, and with the support of the House Majority Leader JIM WRIGHT, and the House Minority Leader BOB MICHEL. I particularly want to thank the gentleman from Arizona, Mr. UDALL, chairman of the Interior and Insular Affairs Committee. Without his help and support we would not have been able to call up the bills. I also want to express my thanks to the gentleman from Ohio, Mr. JOHN SEIBERLING, whose enthusiastic support along with the strong support of the gentleman from Alaska, DON YOUNG, also made the passage of these important bills possible.

To the veterans of the Vietnam war, who gave so much, then faced further opposition at home, the passage of these bills which will insure that the memorial carry a message not only of honor and respect, but also convey a message concerning the very proper reasons why we fought in that war,

This action in many ways helps ease the hurt of our original unwelcome homecoming. More importantly, it clearly indicates that the memorial is to carry a political message, a good and strong and positive political message that the fundamental values of the United States are sound, and do offer help for mankind; and that in fighting the Vietnam war, regardless of one's opinion of how it was fought, the men and women who sacrificed there did so for the freedom and liberty of their fellow men, in the finest tradition of what the United States of America has stood for, stands for now, and we pray to God will continue to stand for, on behalf of the human rights of all individuals everywhere.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. NELSON) is recognized for 5 minutes.

● Mr. NELSON. Mr. Speaker, due to unavoidable circumstances, I was not present on rollcall votes No. 467, No. 479, No. 480, No. 481, and No. 482.

Had I been present, I would have voted "yes" on passage of H.R. 3191 relating to the taxation of cruise ships (rollcall 467); "yes" on passage of House Resolution 621 creating an office of the Bicentenial of the House of Representatives, (rollcall 479); "yes" on resolving into the Committee of the Whole (rollcall 480); "yes" on resolving into the Committee of the Whole (rollcall 481); and "no" on the Education and Labor Committee amendment to the immigration bill (rollcall 482).●

SOCIAL SECURITY REFORM ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, I think we are all well aware of the crisis the social security system is facing. Indeed, between use of social security as a political issue in this fall's campaigns and anticipation of the long-awaited report of the President's Commission on Social Security Reform, it has been impossible to forget about social security for long. There is certainly no doubt that the fiscal crisis which has been predicted so many times is actually upon us; as you know, the retirement fund has had to borrow from the disability and medicare trust funds in order to send out its November and December benefit checks on time. Interfund borrowing is giving us the time we need to search for a solution, but it is no substitute for comprehensive reform.

The newspapers have also told us that many young people are losing faith in the ability of the system to pay out benefits into the long-term future. I believe this demonstrates a lack of confidence not just in social security, but in the ability and the willingness of Congress and the administration to deal with this issue in any substantive, meaningful way. It is essential, not only for financial reasons but also to restore public faith, that Congress demonstrate the political courage to deal with this difficult problem.

We have heard a good many suggestions in recent months as to how best to solve social security's problems, but most of the proposals have this in common: They are short-term remedial measures, designed to make up the system's immediate shortfall but to do little else. Most would place heavy burdens on workers or retirees or both. We must protect the current and future retirees who have paid into the system for many years; cuts in benefits would cause especially severe hardships for the two-thirds of recipients whose social security benefits are their sole or primary source of income. Likewise, proposals to accelerate the scheduled increases in the payroll tax would have a severe impact on the young workers of today, without guaranteeing that the system would still be available when they retire.

Mr. Speaker, I believe we should view the current situation not only as a crisis to be solved, but as an opportunity for major structural reform which will secure the retirement fund well into the future. The social security system was established originally to pay pensions to retired workers and their dependents, and to provide for their families in case of death. Americans now count on social security for many different kinds of assistance, but I think most would agree that its primary purpose should remain the payment of retirement and related benefits. If social security is to survive its current crisis, and if the American people are to continue to believe in its future, the system must be returned to this original conception.

I am today introducing legislation which will not only remedy social security's short-term financial difficulties, but will also reform the system to insure its long-term fiscal integrity. The basic thrust of this legislation is to provide for a gradual transition to do the following: Stabilize the retirement insurance program in its current form through the payroll tax; and separate out the other major components of the social security system—disability insurance and hospital insurance—by taking them off the payroll tax and onto a permanent trust fund supported by the general fund.

Specifically, this bill maintains the old-age and survivors insurance trust fund for the payment of retirement, survivors, and dependents benefits. OASI will still be funded by the payroll tax, but will have a separate account in the Federal budget. Disability and medicare will be consolidated into one trust fund which will draw revenues out of the general fund. OASI will be credited with whatever surplus remains in the disability and hospital trust funds, and the amounts already transferred under the interfund borrowing program will not need to be repaid.

Over a transition period covering the years 1983-90, the OASI trust fund will receive an amount of the payroll tax decreasing from 5.275 percent in 1983 to 5.2 percent in 1984, and 5.1 percent from 1985 on. Even under worst-case economic assumptions, this tax schedule will build up a sufficient level of reserves to insure continued payment of retirement and retirement-related benefits through the 1980's. Demographic trends in the 1990's are expected to favor social security, meaning that the retirement program will be stabilized well into the 21st century.

Immediate payment of disability and medicare benefits out of the general fund would obviously place a tremendous strain on an already overloaded Federal budget. Next year's budget deficit is projected to reach $200 billion, and I do not think we can sanction any measure which would add substantial amounts to that staggering figure. My legislation includes several provisions which will insure that during the transition period, the Federal budget deficit will not be adversely affected by the addition of disability and medicare benefits:

First. Over the 1983-90 transition period, a specified amount of the payroll tax will be paid into the consolidated disability and health insurance trust fund to be used toward the payment of disability and medicare benefits. This amount will increase from 1.425 percent in 1983 to 1.5 percent in 1984, 1.95 percent in 1985-86, and 2.05 percent in 1987-90. Under this system, the total payroll tax will rise from its current 6.7 to 7.05 percent in 1985 and 7.15 percent in 1987-90. However, the payroll tax is scheduled under current law to reach 7.05 percent in 1985, 7.15 percent in 1986, and 7.65 percent in 1990—greater increases than those contained in this legislation.

Second. In addition, the projected 10-percent tax cut due to be implemented on July 1, 1983, would be reduced to 5 percent with the remaining 5-percent set-aside during the period 1983-90 into the consolidated trust fund. I think it is important to point out here that the payroll tax is a regressive tax because it is a flat percentage taking a proportionately greater share out of the low- or middle-income worker's paycheck. The income tax system, on the other hand, is designed to be progressive: The higher one's income, the greater the tax rate. Use of an income tax base instead of the payroll tax thus spreads the burden of disability and medicare costs more fairly.

While the combined revenues from the special payroll tax and the income tax set-aside will result in an increase in Federal outlays in some years and a surplus in others, the overall effects of revenues and outlays over the transition period will more or less offset each other. Current figures indicate that by 1990, this proposal will actually result in a net addition to the Federal budget of $1.5 billion.

Finally, this bill includes two additional reforms which I feel are important in the effort to insure long-term stability:

First. Social security coverage will be extended to employees of nonprofit organizations, Federal employees who do not already have vested pension rights in the civil service or other Federal retirement system, and new Federal hires. This approach meets two considerations. It moves the system toward the universal coverage which was intended by its founders. And, it protects those Federal employees who have paid into their own retirement systems in good faith, and are already receiving or can expect to receive returns on those contributions.

Second. Cost-of-living adjustments will be indexed to the annual increase

in wages minus 1½ percentage points—the average annual increase in productivity—rather than to the Consumer Price Index. Use of the wage index will stabilize the system by subjecting its beneficiaries to the same economic conditions as its working contributors.

The advantages of this legislation over other proposals currently under consideration are significant. It does not cut benefits to current retirees or significantly restructure the benefits to be paid to future retirees. It does not accelerate payroll tax increases; indeed, it scales those increases back. And from 1991 on, the new retirement fund is projected to remain stable with a 5.1-percent tax rate.

With regard to medicare and disability, I have long felt that these programs are better suited for general revenue financing than for funding through the payroll tax. These are both extremely valuable and worthwhile programs, and I certainly do not intend the Federal Government's commitment to the ill and the disabled to be weakened in any way. However, it is difficult to reconcile these programs with the "earned wage benefit" conception on which the retirement program was founded, because unlike retirement, these programs do not pay benefits to everyone who pays social security taxes. Use of a flat percentage payroll tax on all workers is appropriate for a retirement insurance program which pays benefits to all workers, but insurance against disability and illness is best funded from other sources. It simply is not equitable to ask low- and middle-income workers who may never receive benefits from these programs to bear a greater share of their costs through a regressive payroll tax.

Mr. Speaker, the measures currently under consideration by the Commission constitute band-aid approaches to the social security system's problems. They may succeed in patching up the short-term financial crisis, but they cannot be presented to the American people as a comprehensive solution. I believe Americans are willing to sacrifice in order to help insure the system's stability, but at the same time they expect and deserve a responsible and humane approach to the system's problems. This proposal provides such an approach. It stabilizes the retirement program for all workers without asking any one sector to bear too heavy a share of the burden of change, and it transfers the components of the system which are not available to all workers to general revenue financing. I urge my colleagues to use this opportunity to institute this comprehensive and much-needed reform.●

THE SERVICE SECTOR—AN IMPORTANT PART OF OUR ECONOMY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

● Mr. ST GERMAIN. Mr. Speaker, there is a little disagreement among the closest of observers that the recent November GATT meetings held in Geneva produced very little encouragement for the further liberalization of international trade. A major objective of the United States involved opening negotiations on services trade at these meetings. Our intention was to see if a system of agreements comparable to those that cover the movement of merchandise trade across national borders might also be established as well for services trade.

Such moves were defeated, and thus it is that a wide spectrum of economic activities embracing such as consultancies, transportation, banking, insurance, advertising, information transmission, and the like will be without a basis for general agreement. The resolution of trade difficulties, if at all achievable, will in all probability have to rely on bilateral agreements. Given the number of such arrangements that must be sought in this regard, it is not difficult to understand the obvious dismay and disappointment of our representatives upon their return from the GATT meetings.

Mr. Speaker, the service sector is very important to our economy. For those of us from the New England region, the measure of its importance is noted in the fact that it constitutes over 60 percent of the region's total employment and provides at least 4 million jobs within the six-State area. In a recent study, the New England Congressional Institute noted that expansion in services had provided 140,000 new jobs in the region between 1975 and 1980.

The significance of trade in services is, however, even more obvious when you weigh the fact that it is estimated that 7 out of 10 Americans are employed in service industries. The United States is, at last report, the biggest worldwide exporter in this growing field.

Mr. Speaker, so that my colleagues may note further the increasing prominence of foreign business for the U.S. service industries, I ask that the following table of information noting growth in this field between 1977 and 1981 be made a part of the RECORD. These estimates were prepared by the U.S. Department of Commerce and document an extraordinary degree of expansion and growth in these areas over this most recent 5-year period. The table follows:

ESTIMATED FOREIGN BUSINESS OF U.S. SERVICE INDUSTRIES: EXPORTS FROM THE U.S. INCOME OF OVERSEAS AFFILIATES[1]

[In millions of dollars]

	1977	1981
Total receipts for exports	23,295	40,520
Travel	6,150	12,168
Passenger fares	1,366	2,991
Other transportation	7,264	12,168
Fees and royalities from affiliated foreigners	3,793	5,867
Fees and royalities from unaffiliated foreigners	920	1,386
Other private services	3,802	5,940
Total income of foreign affiliates	69,220	99,953
Oil and gas field services	3,251	6,454
Petoleum tanker operations	8,249	9,576
Pipeline transmission, oil gas	1,570	1,823
Finance (except banking), insurance and real estate	14,884	20,703
Banking	2,205	4,290
Construction	10,141	20,889
Wholesale and retail trade	2,290	5,196
Transportation and communication	13,412	1,570
Hotels and lodging	1,550	1,799
Advertising	1,448	1,583
Motion pictures and TV tape and film	1,063	1,234
Engineering, architecuture, surveying	3,207	4,695
Accounting	433	503
Other personal and business services	4,857	5,638
Total, exports plus affiliates' income	92,515	140,473

TUSCALOOSA COUNTY CIRCUIT JUDGE FRED W. NICOL RETIRES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alabama (Mr. SHELBY) is recognized for 5 minutes.

● Mr. SHELBY. Mr. Speaker, a very outstanding citizen in my hometown of Tuscaloosa, Ala., has decided to retire from his duties as Tuscaloosa County circuit judge.

I would like to share with my colleagues in the House of Representatives an article written by Doris Flora of the Tuscaloosa News staff, about Judge Nicol and his service to the people of Tuscaloosa County.

TUSCALOOSA COUNTY CIRCUIT JUDGE FRED W. NICOL RETIRES

The senior elected official in the Tuscaloosa County Courthouse retired Thursday, closing a public service career that covered nearly four decades.

Tuscaloosa County Circuit Judge Fred W. Nicol officially became a supernumerary judge after more than 30 years as a judge, circuit solicitor and assistant state prosecutor in the county courthouse and nearly 10 additional years as an agent with the FBI and in military intelligence.

Nicol—known as a whistling and singing judge—said he used to play tennis and golf but for the "past 30 years at least, my life has revolved around getting up and going to the courthouse, coming home and starting all over again."

Starting today, all that has changed. And Nicol and his wife, Rachel, will head to the beach Monday to savor their new free time.

Nicol, who has held the circuit judge Place 2 slot in the 6th Judicial Circuit composed exclusively of Tuscaloosa County

since Nov. 20, 1964, did not seek re-election this year.

District Judge John M. Karrh defeated Public Defender Ralph Burroughs for the judgeship in the Democratic primary in early September. Following the election, Nicol asked for and received early retirement from the position effective today.

Looking back on his service in the courthouse, Nicol said he has "seen a lot of changes in court proceedings" not only during his time on the bench, but also since he was circuit solicitor—now the district attorney—or an assistant in the solicitor's office.

At the time he started, he said, "when the grand jury reported, we didn't even have arraignments. About half of them pleaded guilty and in a matter of a short while were on a prison bus going to Kilby Prison."

The law didn't provide for free lawyers and free appeals then, he said. Sometimes in a murder case, the court appointed a lawyer.

"Nowadays everybody gets a lawyer and free appeal," he said, something the "liberals rejoice over" as the "conservatives bemoan the procedures to protect criminals."

He cited the petit juries as another major change. "When I first started out, the juries were all men. Now we have got women, too, and it is a big improvement.

"I have worked with them all and by and large have been most favorably impressed by the lady jurors. They think things out on the evidence," he said.

Although he has handled countless cases, he said one of his most memorable came while he was state prosecutor. It involved the murder of a woman whose body was burned.

"They found a green stamp near her body and were able to trace it back to where she came from," Nicol said. Her body was identified and a young man was charged.

The case attracted attention from all over the country, he said. "Every true detective magazine in the country wrote about it."

The defense attorney had offered to settle for a life sentence but the woman's family wanted the death sentence.

Instead, when the jury came back in, he said, they "gave him five years and the people in the courtroom stood up and cheered. The presiding judge had to call for order."

Another notable case in which he was involved was University of Alabama head football coach Paul "Bear" Bryant's libel suit over a story published in the Saturday Evening Post.

Since he used to lecture annually at the Polygraph Institute in Chicago, Nicol said Bryant's lawyer asked him to administer the lie detector test to the coach.

"Of course, he passed the lie detection test with flying colors," Nicol said, adding that he was given a "good grilling" by attorneys for the other side.

Nicol said he "came to the courthouse hoping someday I might get to be a judge." But he said, "You don't just step into things like that, you have to work to earn it."

"Being a judge involves you in many controversies," he said. "You are not engaged in a popularity contest when you serve as a circuit judge.

"I think the people respect you if you try to do what is right," he said. A judge doesn't necessarily have to be a "brilliant legal scholar, but he does have to have a lot of common sense," said Nicol.

And he added, "Any judge is going to make mistakes. That is what the Supreme Court is down there for."

Nicol is a Tuscaloosa native who was "born right where I am living today—in the old Monnish home."

Before returning here and settling down, he traveled extensively. After graduating from the University of Alabama Law School, he served as a special agent with the FBI for four years.

During the war years, he was in military intelligence and served throughout China, Burma and India where he "saw a lot of deprivation and hardship."

He returned to Tuscaloosa in 1946 and went into private practice for several years before moving to the courthouse as an assistant circuit solicitor under the late Monroe Ward.

Describing himself as "always ambitious," he ran for and was elected circuit solicitor for two terms. He ran against Judge W. C. Warren, but was defeated.

He was later appointed to fill the unexpired term left by the death of Judge Reuben H. Wright, and was elected without opposition for three terms.

Nicol is widely known throughout the county for his love of gospel singing which he said developed because of his friendship which started "about 20 years ago with W. G. Snider and the Rainbow Quartet."

Although he insists he is "not what would be termed a singer, I have had to do some singing" as he traveled all over Tuscaloosa County and West Alabama to all-day church singings and dinner on the ground.

Scattered in churches throughout this area are hundreds of songbooks stamped with "Best Wishes from Judge Fred Nicol" which he has donated in the name of gospel singing.

Mr. Speaker, not many people achieve the measure of admiration and respect that Judge Nicol has enjoyed. He earned that admiration and respect because he genuinely cared about the people and about the welfare of his community.

Judge Nicol is a rarity for he is a man who has the vitality and know-how to be extremely effective in getting things done, yet warmth and sensitivity has made him a beloved leader.

It is indeed an honor for me to share this tribute with my colleagues in the House of Representatives. Judge Nicol has devoted his life to serving other people and I wish him the very best as he sits back and let others serve him. His wisdom and knowledge and great deeds for Tuscaloosa and the State of Alabama will be with us for many, many years.●

RECESS

The SPEAKER pro tempore. Pursuant to the order of the House of December 17, 1982, the Chair declares the House in recess subject to the call of the Chair.

Accordingly (at 12 o'clock and 59 minutes p.m.) the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 6 o'clock and 30 minutes p.m.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks announced that the Senate had passed without amendment bills and joint resolutions of the House of the following titles:

H.R. 4350. An act for the relief of Arthur J. Grauf;

H.R. 5029. An act to designate the Federal Building in Fresno, Calif., as the "B. F. Sisk Federal Building";

H.R. 5826. An act to provide for the reinstatement and validation of United States oil and gas lease numbered W-24153;

H.R. 5916. An act to declare certain Federal lands acquired for the benefit of Indians to be held in trust for the Tribes of such Indians;

H.R. 6538. An act to designate the Federal Building in Lima, Ohio, as the "Tennyson Guyer Federal Building";

H.R. 7316. An act to establish the National Park System Visitor Facilities Fund, and for other purposes;

H.R. 7420. An act to name the fish hatchery at the Warm Springs Dam component of the Russian River, Dry Creek, Calif., project as the Don H. Clausen Fish Hatchery;

H.J. Res. 619. Joint resolution designating January 17, 1983, as "Public Employees' Appreciation Day"; and

H.J. Res. 635. Joint resolution establishing the dates for submission of the Budget and Economic Report.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5002) entitled "An act to improve fishery conservation and management."

The message also announced that the Senate agrees to the amendments of the House to the joint resolution (S.J. Res. 271) entitled "Joint resolution to make technical corrections on certain banking and related statutes."

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate to the bill (H.R. 7154) entitled "An act to amend the Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes."

The message also announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 265. Joint resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism."

The message also announced that the Senate disagrees to the amendment of the House to the amendment of the Senate to the amendment of the House to the amendments of the Senate to the bill (H.R. 5121) entitled "An act to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes."

REQUEST FOR CONSIDERATION OF S. 1939, PUBLIC HEALTH SERVICE ACT AMENDMENT

Mr. DINGELL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1939) to amend the Public Health Service Act to establish a National Institute on Arthritis and Musculoskeletal and Skin Diseases, with an amendment which is at the desk, that the amendment be considered as agreed to, and that the Speaker put the question on final passage of the Senate bill, as amended, without intervening motion.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the question of the gentleman from Michigan?

Mr. DANNEMEYER. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

□ 1830

AUTHORIZING SECRETARY OF AGRICULTURE TO CONVEY CERTAIN NATIONAL FOREST SYSTEM LANDS

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs and the Committee on Agriculture be discharged from further consideration of the Senate bill (S. 705) to authorize the Secretary of Agriculture to convey certain National Forest System lands, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. WALKER. Mr. Speaker, reserving the right to object, we on this side know nothing about this particular bill and therefore I would object.

Mr. SEIBERLING. Would the gentleman kindly reserve his objection to permit an explanation and yield to me?

Mr. WALKER. Further reserving the right to object, certainly I extend that courtesy to the gentleman and I will be glad to yield to the gentleman.

Mr. SEIBERLING. This is a bill that has been cleared with Congressman DON YOUNG, the ranking minority member on the Public Lands Subcommittee. I received a call again from him today confirming that clearance.

It is a bill which passed the House without any dissenting vote. It is known as the small tract bill. It is a bill to give the Secretary of Agriculture certain flexibility in dealing with small land claims so that we do not have to pass innumerable private bills. It did pass the House in the last Congress, but was vetoed simply because the other body put an extraneous amendment on it.

It is sought by the administration. I believe it is entirely noncontroversial and I would strongly urge the House not to object to it at this time.

However, if the gentleman wishes the time to confirm, after all of that, with the ranking minority member and any other on his side I would be glad to try to bring it up again. But I assure the gentleman that this has been cleared with all of the concerned parties.

Mr. WALKER. I thank the gentleman for his explanation. I would simply tell the gentleman that there is at least one member of the leadership on this side who has indicated that he does in fact have an objection to this request. So, therefore, I would hope the gentleman, further reserving the right to object, would withdraw his request.

Mr. SEIBERLING. Before the gentleman reserves further, would the gentleman yield?

Mr. WALKER. I will be glad to further reserve the right to object and yield to the gentleman from Ohio.

Mr. SEIBERLING. A couple of days ago I was planning to try to attach an additional bill, the American Conservation Corps bill, and send it back to the other body. At that time Congressman DON YOUNG indicated that if that happened he would have to object because the other body would not then approve it.

I have since talked with Senator MCCLURE and told him and Congressman DON YOUNG that I will not attempt to do that. This is the original Senate-passed bill without any amendment, and, therefore, I am aware of no objections. If there is some Member objecting, I would like to confer with him and see what I can do to alleviate his concerns.

Mr. WALKER. Reserving the right to object, let me suggest to the gentleman that he do withdraw his request because those kinds of consultations need to take place, and if the gentleman persists in his unanimous-consent request I will be constrained to object.

Mr. SEIBERLING. Mr. Speaker, I withdraw my unanimous-consent request, for the time being.

AUTHORIZING PRINTING OF REPORTS OF COMPTROLLER GENERAL OF THE UNITED STATES AS HOUSE DOCUMENTS NOTWITHSTANDING SINE DIE ADJOURNMENT OF THE HOUSE

Mr. WRIGHT. Mr. Speaker, I offer a privileged resolution (H. Res. 638), and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 638

Resolved, That, notwithstanding the sine die adjournment of the House, reports of the Comptroller General of the United States made to the Congress pursuant to the Government Corporation Control Act (31 U.S.C. 841 et seq.) shall be printed during such adjournment as House documents of the second session of the Ninety-seventh Congress.

The resoluton was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING PRINTING OF REVISED EDITION OF RULES AND MANUAL OF HOUSE OF REPRESENTATIVES FOR 98TH CONGRESS AS HOUSE DOCUMENT

Mr. WRIGHT. Mr. Speaker, I offer a privileged resolution (H. Res. 639), and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 639

Resolved, That a revised edition of the Rules and Manual of the House of Representatives for the Ninety-eighth Congress be printed as a House document, and that two thousand additional copies shall be printed and bound for the use of the House of Representatives, of which seven hundred copies shall be bound in leather with thumb index and delivered as may be directed by the Parliamentarian of the House for distribution to officers and Members of Congress.

Mr. WALKER. Mr. Speaker, reserving the right to object, are we going ahead and continue to print these rules while there is still some question as to whether or not some of the rules are advisable, and while we are going to have a discussion of those rules on the opening day of the next Congress?

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Texas.

Mr. WRIGHT. Of course, the rules would not be printed until the rules of the 98th Congress would be adopted. This is standard procedure. It simply is to permit the printing of the rules of the 98th Congress when the rules of the 98th Congress have been adopted.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. The resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING SPEAKER TO ACCEPT RESIGNATIONS AND TO APPOINT COMMISSIONS, BOARDS, AND COMMITTEES, NOTWITHSTANDING SINE DIE ADJOURNMENT OF HOUSE

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that, notwithstanding the sine die adjournment of the House, the Speaker be authorized to accept resignations, and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING FILING OF REPORTS WITH CLERK AND PRINTING AS REPORTS OF 97TH CONGRESS

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that reports may be filed with the Clerk following the sine die adjournment by committees authorized by the House to conduct investigations, and on committee activities pursuant to clause 1(d), rule XI, and may be printed by the Clerk as reports of the 97th Congress.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Mr. Speaker, reserving the right to object, the minority does not have a copy of this particular resolution the gentleman is proposing and therefore could not follow this. Is this one of the standard resolutions at the end of the session?

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Texas.

Mr. WRIGHT. This is one of the standard resolutions, I would say to the gentleman. It simply is an unanimous-consent request which normally is made to the effect that committee reports which may be filed subsequent to the adjournment, and yet are committee reports of committees of the 97th Congress, pursuant to the rules, may be printed.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING MEMBERS TO REVISE AND EXTEND THEIR REMARKS PRIOR TO LAST EDITION OF CONGRESSIONAL RECORD

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that all Members of the House shall have the privilege, until the last edition authorized by the Joint Committee on Printing is published, to extend and revise their own remarks in the CONGRESSIONAL RECORD on more than one subject, if they so desire, and may also include therein such short quotations as may be necessary to explain or complete such Extensions of Remarks; but this order shall not apply to any subject matter which may have occurred, or to any speech delivered subsequent to the adjournment of Congress.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING CHAIRMAN AND RANKING MINORITY MEMBER OF COMMITTEES AND SUBCOMMITTEES TO REVISE AND EXTEND THEIR REMARKS AND TO INCLUDE SUMMARY OF WORK

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the chairman and ranking minority member of each subcommittee thereof be permitted to extend their remarks in the RECORD, up to and including the last publication thereof, and to include therewith a summary of the work of that committee or subcommittee.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

□ 1840

FEDERAL OIL AND GAS ROYALTY MANAGEMENT ACT OF 1982

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5121) to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes; with a Senate amendment to the House amendment thereto, recede from the House amendment, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Resolved, That the Senate disagree to the amendment of the House of Representatives to the amendment of the Senate to the amendment of the House of Representatives to the amendments of the Senate to the bill (H.R. 5121) entitled "An Act to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes."

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

Mr. CHENEY. Mr. Speaker, reserving the right to object, and I shall not object, but I would be happy to yield to the chairman of the Committee on Interior and Insular Affairs, the gentleman from Arizona (Mr. UDALL), to explain the bill.

Mr. UDALL. I thank the gentleman for yielding.

Mr. Speaker, this measure has been before the House a couple to times in the last few days. We have worked out all the difficulties. This is the bill that is going to bring glad tidings of joy to every taxpayer in America because the Federal Government is going to probably collect an additional $100 million to one-half billion dollars annually in royalty payments owed to the Federal Government because of its enactment.

We have been hung up on a bill that essentially everyone supported. We give the tools to the administration to collect the royalties. We have been hung up on an extraneous provision which involved providing the Secretary of the Interior with discretionary authority to increase the royalty rate for noncompetitive oil and gas leases. That provision has now been dropped. The Senate would not agree to it.

Rather than lose all of the benefits of this important bipartisan legislation, we take the Senate amendment which eliminates this controversial provision and agree with that amendment to eliminate the provision.

Mr. Speaker, the bill that is before us tonight, H.R. 5121, the Federal Oil and Gas Royalty Management Act of 1982, is the product of a great deal of effort on both sides of the aisle. It has been the focus of considerable effort, in fact, between the House and the Senate in recent weeks and especially the past few days. I am very glad that we have arrived at a point tonight where the House can send to the President a good government piece of legislation.

In brief the bill will help correct many of the problems which have plagued the Federal royalty management system for a number of years. It should help generate additional income to the U.S. Treasury and to States and Indian tribes. It is expected that overall it may help generate between $100 and $500 million a year.

Great effort has been made to insure that the bill will be effective, and will be fair to Indian tribes, the States, and the agency of the Federal Government which has the responsibility for implementing this act.

I would like to pay special tribute to Chairman ED MARKEY of the Oversight and Investigations Subcommittee whose drive and determination were essential to bringing this bill to fruition. Also, a great deal of this credit is shared by Chairman SANTINI of the Mines and Mining Subcommittee, Representative MARRIOTT, Representative CHENEY, and Representative LUJAN, and Representative KOGOVSEK.

Some of the key provisions of the bill are as follows:

Requires that site security plans be developed for all onshore oil and gas lease sites to help protect against oil and gas theft;

Requires notice of the start of oil or gas production not later than the fifth business day after such production began, this would help curtail illegal diversion of such oil or gas;

Requires that lessees and operators maintain records to properly account for the production of oil and gas from the Federal lands, Indian lands, and the Outer Continental Shelf;

Establishes strict civil penalties and criminal penalties for violations of the act;

Provides authority to pay rewards to informants who provide information to the Government which leads to the recovery of oil or gas or additional royalties;

Provides authority to the Secretary of the Interior to enter into cooperative agreements and contracts with States and Indian tribes to carry out inspection, auditing, and enforcement activities under the act;

Speeds up payments to the States of their share under the Mineral Leasing Act of 1920 oil and gas royalty receipts form once every 6 months to once a month;

Requires an explanation of what such payments were based upon so that the State or Indian tribes could cross check such explanation with their own records to see if the royalty management system is properly accounting for all oil and gas produced for Federal or Indian lands;

Requires more frequent inspections of lease sites by experienced personnel to determine whether oil or gas has been diverted or stolen;

Provides the States with the authority to sue under Federal law in Federal court to recover royalties, interest, or civil penalties with respect to oil and gas leases on Federal lands located within States under certain conditions;

Provides the Secretary with the authority to delegate his authority to conduct inspections, audits, and investigations to any State with respect to Federal or Indian lands within that State; and

It would also authorize the Secretary of the Interior to reinstate terminated oil and gas leases at a higher royalty and rental rate.

Mr. Speaker, I strongly urge my colleagues to support this legislation.

Mr. CHENEY. Mr. Speaker, further reserving the right to object, I would simply like to add to what the chairman has said.

This is an excellent piece of legislation, strongly supported by the administration. We have worked out a solution between both parties at both ends of the building. I urge my colleague to approve it.

Mr. MARKEY. Mr. Speaker, will the gentleman yield?

Mr. CHENEY. I yield to the gentleman from Massachusetts.

Mr. MARKEY. I thank the gentleman for yielding.

Mr. Speaker, I would just like to note that this bill was only made possible through the bipartisan cooperation of the gentleman from Wyoming and several other Members over there, and through the leadership and cooperation of the gentleman from Arizona.

I believe as the two previous speakers do this is a good, solid measure which is going to mean additional hundreds of millions of dollars a year coming into the Federal Treasury to be used for States, Indian tribes, and Federal Government purposes.

Mr. WILLIAMS of Montana. Mr. Speaker, will the gentleman yield?

Mr. CHENEY. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Montana.

Mr. WILLIAMS of Montana. I thank the gentleman for yielding.

Mr. Speaker, I would ask the chairman of the committee if the royalty is now at 12 or 16 percent.

Mr. UDALL. If the gentleman will yield to me, it is now at 12½ percent.

Mr. WILLIAMS of Montana. Twelve and one-half with the study?

Mr. UDALL. We leave the royalty as it is under existing law, which is 12½ percent for noncompetitive oil and gas leases, and there is a 6-months study provision.

Mr. WILLIAMS of Montana. I thank the gentleman.

Mr. CHENEY. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Arizona (Mr. UDALL)?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

AUTHORIZING SECRETARY OF AGRICULTURE TO CONVEY CERTAIN NATIONAL FOREST SYSTEM LANDS

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs and the Committee on Agriculture be discharged from further consideration of the Senate bill (S. 705), to authorize the Secretary of Agriculture to convey certain National Forest System lands, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is the objection to the request of the gentleman from Ohio?

Mr. CHENEY. Mr. Speaker, reserving the right to object, I do so to yield to the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. I thank the gentleman for yielding.

Mr. Speaker, this bill is sometimes referred to as the small tracts bill. It passed the Senate on August 19. It would authorize the Secretary of Agriculture to resolve a number of management problems by making conveyances or exchanges of certain specified types of small tracts of land within the National Forest System.

It is an entirely noncontroversial bill. It is sought by the administration. I have talked to the ranking minority member on the Public Lands Subcommittee. I have talked to the gentleman from Wyoming. I believe there are no objections to this bill on any side. I would hope that we can dispose of it expeditiously at this point.

The bill is similar to legislation which passed the 96th Congress but was pocket vetoed by President Carter because of objections to a nonrelated Senate amendment which is not included in this version. The bill is carefully drawn and, while limited in its scope, would enable an efficient resolution of many genuine problems. I urge its passage and include my remarks at this point in the RECORD:

PURPOSE

The purpose of S. 705 is to enable the Secretary of Agriculture to more efficiently and flexibly manage the National Forests by providing additional authority for the transfer out of federal ownership of certain limited and specific categories of national forests lands, without case-by-case authorizations from the Congress.

BACKGROUND AND NEED

There are an estimated 200,000 tracts of Federal land the size, shape, or location of which makes them impracticable to administer efficiently as units of the national forest system. They are often isolated or too small to justify the expense and time required in land management activities. They may be occupied in trespass by adjoining landowners. These tracts can generally be grouped into one of three readily defined categories: (1) irregularly shaped tracts of 40 acres or less that are interspersed with or adjacent to mineral claims, (2) tracts of 10 acres or less that are encroached upon by private parties because of surveying, titling, or land description errors, or (3) road rights-of-way that are owned by the United States but are no longer needed. Each type of tract is more specifically described below.

Mineral Tracts.—The mineral fractions were created 75 to 100 years ago through patenting of mining claims on the Western public lands. Because of the way the claiming occurred, the residual tracts owned by the Federal Government are of an infinite variety of sizes and shapes. Some may be as small as 0.2 acre. Many of the intermingled, unpatented public lands came under the administrative responsibility of the Forest Service upon creation of the national forests but are of such small size or are located in such a way as to be of little practical use for National Forest System purposes.

Most of the adjoining mineral patents are no longer held for their mineral values. They may support ranching, industrial plants, irrigation sites and water power facilities, utility lines, roads, and intensive recreation sites. Recently, some of the patented lands have been subdivided into vacation homesites.

Encroachment.—Innocent occupancy, or encroachment, upon national forest system lands occurs when improvements are constructed or are being used on a parcel of land acquired in good faith by a private party which is later found to overlap Federal land. This usually happens as a result of an improper property line survey, by either private or public surveyors, or an error in the title or land description. While there are a few known instances where Federal survey errors are the cause of such encroachments, the great bulk of the title claim cases existing on national forest system lands involves problems resulting from private surveys. The error giving rise to the encroachment is frequently not discovered until the public land is later surveyed and marked. The resulting trespass is considered to be in good

faith if the private party had no knowledge that the improvements would encroach upon the Federal lands. The claims generally involve parcels of small size, frequently less than one acre, but constitute a major portion of the estimated 50,000 title claim cases existing on national forest system lands throughout the United States. There would be a distinct advantage to the Government to have the possibility of litigation removed from these potential title claim cases.

Road Right-Of-Way.—These are narrow strips of Federal lands that pass through private land. Most were created as exceptions to homestead patents in order to provide access to the homesteaded area or to remaining Federal lands. Some were purchased by the Government in conjunction with the work of the Civilian Conservation Corps. Many of the roads no longer exist or were never built, and the rights-of-way are no longer needed for national forest system purposes. The average size of these rights-of-way is two acres. They occur in the West, especially in Montana, Wyoming, Idaho, and Arizona.

These three types of small irregularly shaped tracts of national forest system land create problems for both the Federal land manager and adjacent private party owners. Administrative remedies, while generally applicable are not in most cases a desirable solution. A special use permit may be granted. The permit acknowledges the occupancy and allows it to continue for a specified period. This period is usually sufficient to amortize any improvements to the property. The permit is then cancelled and the improvements must be removed. A land exchange may also be made under which the Secretary may accept lands in exchange for the small tracts of the type described above. However, individual exchanges under current authority are lengthy and expensive. They are not usually satisfactory in the case of small acreages and irregularly shaped tracts.

Private legislation has not been successful in only a small number of cases. It is a difficult, time-consuming and costly process with uncertain results. A general legislative solution is thus considered preferable and appears to be the only realistic solution to the massive backlog of these types of title claim cases. S. 705 would provide the Forest Service with authority to administer an efficient system for resolving these claims in a manner consistent with protecting the public interest.

The proposed legislation would also address a different, but related, matter involving national forest system lands. The act of December 4, 1967, authorizes exchanges of national forest system lands with public school districts where the lands offered in exchange do not equal the value of the Federal lands. In such cases, the act authorizes the Secretary to accept cash from the public school district to equalize the value of the exchange. Broadening this cash equalization feature to include States, county, and municipal governments would recognize that these entities may have the same difficulty in making equivalent land exchanges as do public school districts and would allow for the completion of desirable land exchanges where sufficient suitable land is not available. In addition to specifically identified land exchanges, there are approximately 10,000 cases where these governmental units occupy a tract of national forest system land under a special use permit in order to carry out a specific function, such as highway maintenance facilities or forest fire lookout towers. Many of these could appropriately be transferred to the local governmental unit under a cash equalization exchange program.

SECTION-BY-SECTION ANALYSIS

Section 1 defines the terms "person", "interchange", and "Secretary". The term "person" includes States or any political subdivisions or entities thereof, such as county and municipal governments, independent school districts and similar entities. The term "interchange" means a land transfer involving the change of titles to or interests in lands between the Secretary and another person under such regulations as the Secretary may prescribe.

Section 2 authorizes the Secretary of Agriculture, when in the public interest, to sell, exchange, or interchange by quitclaim deed, all right, title, and interest, including the mineral estate, of the United States in the national forest system lands described in section 3. As consideration for such lands the Secretary is authorized to accept other lands, interest in lands, or cash, or any combination thereof, which in the case of a sale or exchange is at least equal in value to the lands being conveyed by the Secretary. In the case of conveyance by interchange the consideration must be of approximate value to the lands being conveyed by the Secretary.

Section 3 identifies the lands which may be sold, exchanged, or interchanged by the Secretary under section 2 as those the sale or exchange of which is not practicable under any other authority of the Secretary, which the Secretary has determined to have a value of not more than $150,000, and which are (1) parcels of 40 acres or less interspersed with or adjacent to mineral patents and which the Secretary has determined, because of size and location, are not subject to efficient administration; (2) parcels of 10 acres or less which are encroached upon by improvements occupied or used under claim or color of title by persons to whom no advance notice was given that the improvements encroached or would encroach upon such parcels, and who in good faith relied upon an erroneous survey, title search, or other land description indicating that there was no such encroachment; or (3) road rights-of-way reserved or acquired which are substantially surrounded by lands not owned by the United States and which are no longer needed by the United States subject to the first right of abutting landowners to acquire the rights-of-way.

Section 4 requires that persons to whom land is conveyed must bear all reasonable costs, as determined by the Secretary, of administration, survey, and appraisal incidental to the conveyance. In addition, any person to whom a right-of-way is conveyed is required to reimburse the United States for the value of any improvements to the right-of-way made by the United States. In cases where the Secretary determines it would be consistent with the public interest to do so, the Secretary is authorized to waive payment of such incidental costs or reimbursement for such improvements to rights-of-way. This section also provides that, in determining the value of any lands or interest in lands to be conveyed, the Secretary may exclude from such determination the value of any improvements to the lands made by persons other than the Government, when the Secretary determines that such exclusion would be consistent with the public interest.

Section 5 provides that conveyance of any road rights-of-way shall not be construed as permitting any designation, maintenance, or use of the rights-of-way for road or other purposes except to the extent permitted by State or local law.

Section 6 directs the Secretary to issue regulations to carry out the provisions of the bill, including specification of: (1) the criteria to be used in determining what constitutes the public interest; (2) the definition of and the procedure for determining "approximate value"; and (3) factors relating to location or size to be considered in determining the lands interspersed with mineral patents that are eligible to be conveyed under the bill. With regard to this section, the framers of the bill intend that the Secretary take care to promulgate regulations which will confine the new authority provided by this bill to its intended limits. In particular, it is essential that the authority provided to dispose of "mineral fractions", those tracts of Federal land remaining after the patenting of public domain lands under the mining laws, not be interpreted too broadly. This authority is not intended to allow the disposal of National Forest System land except for reasons specifically related to location, size or efficient administration. Therefore, in the regulations the Secretary must adopt stringent criteria to guide the disposal of mineral fractions. The following criteria are suggested to guide the Department of Agriculture in this regard:

1. Fractions qualifying for disposal be only those surrounded by lands patented under the mining laws.

2. To qualify, there must be good evidence that the Federal lands being considered for disposal are or would be occupied or used by adjoining private parties.

3. The combined acreage of fractions sold in any one sale (whether the fractions are sold separately or aggregated for purposes of sale) should generally not exceed 40 acres.

Furthermore, it is our intent that the regulations in general make sure that the authority provided by this legislation is not to be construed to enable private parties, singly or acting together, to block or unduly restrict public access to National Forest Lands, to monopolize or unduly restrict access to water supplies or other resources of the National Forests now open to use by the public, or to establish new, extensive inholdings which would present management problems for the U.S. Forest Service.

It is the clear understanding of those of us in the House who are familiar with the purposes of the bill that the regulations will assure that the discretionary authority provided by this bill (including the authority to waive the payment of various costs) will be exercised only in those de *minimis* cases (which must be evaluated individually) for which it has been designed, and not as a means for a general disposal of National Forest lands for purposes not directly related to improved management or resolution of specific problems or for the enhancement of federal revenues.

Section 7 provides that nothing in the bill shall authorize conveyance of Federal lands within the National Wilderness Preservation System, the National Wild and Scenic Rivers System, the National Trails System, National Monuments, or National Recreation Areas.

Section 8 amends the act of December 4, 1967, to authorize the Secretary to accept cash equalization payments, in connection with exchanges of national forest system lands, by State, county, or municipal governments where the lands offered in exchange do not equal the value of the Federal lands. Presently, that act only authorizes cash equalization payments in connection with exchanges with public school districts.

COST AND BUDGET ACT COMPLIANCE

S. 705 authorizes no appropriations, and should have no discernible impact on the Federal budget; any likely impact would probably be in the form of reduced costs.

LEGISLATIVE HISTORY

Legislation similar to S. 705 was passed by both the House and Senate in the 96th Congress, but was subjected to a pocket veto because of Administration objections to a nongermane Senate amendment. S. 705 passed the Senate on August 19, 1982. The Subcommitee on Public Lands and National Parks held a hearing on the bill on December 2, 1982.

Mr. CHENEY. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Ohio (Mr. SEIBERLING)?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 705

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That for the purposes of this Act—

(1) the term "person" includes any State or any political subdivision or entity thereof;

(2) the term "interchange" means a land transfer in which the Secretary and another person exchange titles to lands or interests in lands of approximately equal value where the Secretary finds that such a value determination can be made without a formal appraisal and under such regulations as the Secretary may prescribe; and

(3) the term "Secretary" means the Secretary of Agriculture of the United States.

SEC. 2. The Secretary is authorized, when the Secretary determines it to be in the public interest—

(1) to sell, exchange, or interchange by quitclaim deed, all right, title, and interest, including the mineral estate, of the United States in and to National Forest System lands described in section 3; and

(2) to accept as consideration for the lands sold, exchanged, or interchanged other lands, interests in lands, or cash payment, or any combination of such forms of consideration, which, in the case of conveyance by sale or exchange, is at least equal in value, including the mineral estate, or, in the case of conveyance by interchange, is of approximately equal value, including the mineral estate, to the lands being conveyed by the Secretary. The Secretary shall insert in any such quitclaim deed such terms, convenants, conditions, and reservations as the Secretary deems necessary to ensure protection of the public interest, including protection of the scenic, wildlife, and recreation values of the National Forest System and provision for appropriate public access to and use of lands within the System. The preceding sentence shall not be applicable to deeds issued by the Secretary to lands outside the boundary of units of the National Forest System.

SEC. 3. The National Forest System lands which may be sold, exchanged, or interchanged under this Act are those the sale or exchange of which is not practicable under any other authority of the Secretary, which have a value as determined by the Secretary of not more than $150,000, and which are—

(1) parcels of forty acres or less which are interspersed with or adjacent to lands which have been transferred out of Federal ownership under the mining laws and which are determined by the Secretary, because of location or size, not to be subject to efficient administration;

(2) parcels of ten acres or less which are encroached upon by improvements occupied or used under claim or color of title by persons to whom no advance notice was given that the improvements encroached or would encroach upon such parcels, and who in good faith relied upon an erroneous survey, title search, or other land description indicating that there was no such encroachment; or

(3) road rights-of-way, reserved or acquired, which are substantially surrounded by lands not owned by the United States and which are no longer needed by the United States, subject to the first right of abutting landowners to acquire such rights-of-way.

SEC. 4. Any person to whom lands are conveyed under this Act shall bear all reasonable costs of administration, survey, and appraisal incidental to such conveyance, as determined by the Secretary. In determining the value of any lands or interest in lands to be conveyed under this Act, the Secretary may, in those cases in which the Secretary determines it would be in the public interest, exclude from such determination the value of any improvements to the lands made by any person other than the Government. In the case of road rights-of-way conveyed under this Act, the person to whom the right-of-way is conveyed shall reimburse the United States for the value of any improvements to such right-of-way which may have been made by the United States. The Secretary may, in those cases in which the Secretary determines that it would be in the public interest waive payment by any person of costs incidental to any conveyance authorized by this Act or reimbursement by any person for the value of improvements to rights-of-way otherwise required by this section.

SEC. 5. Conveyance of any road rights-of-way under this Act shall not be construed as permitting any designation, maintenance, or use of such rights-of-way for road or other purpose except to the extent permitted by State or local law and under conditions imposed by such law.

SEC. 6. The Secretary shall issue regulations to carry out the provisions of this Act, including specification of—

(1) criteria which shall be used in making the determination as to what constitutes the public interest;

(2) the definition of and the procedure for determining "approximately equal value" and

(3) factors relating to location or size which shall be considered in connection with determining the lands to be sold, exchanged, or interchanged under clause (1) of section 3.

SEC. 7. Nothing in this Act shall authorize conveyance of Federal lands within the National Wilderness Preservation System, National Wild and Scenic Rivers System, National Trails System, or National Monuments. Nothing in this Act shall authorize sale of Federal lands, within National Recreation Areas.

SEC. 8. (a) The Act of December 4, 1967 (81 Stat. 531), is amended by inserting before the phrase "public school district" wherever it appears, and before the phrase "public school authority" the second time it appears, the words "State, county, or municipal government or".

(b) The Act of December 4, 1967 (81 Stat. 531), is further amended by adding the following at the end thereof: "Lands may be conveyed to any State, county, or municipal government pursuant to this Act only if the lands were being utilized by such entities on the date of enactment of this sentence. Lands so conveyed may be used only for the purposes for which they were being used prior to conveyance.".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on S. 705.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

MASHANTUCKET PEQUOT INDIAN CLAIMS SETTLEMENT ACT

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6612), to provide for the settlement of land claims of the Mashantucket Pequot Indian Tribe of Connecticut, and for other purpose, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Mashantucket Pequot Indian Claims Settlement Act".

CONGRESSIONAL FINDINGS

SEC. 2. The Congress finds that—

(a) there is pending before the United States District Court for the District of Connecticut a civil action entitled Western Pequot Tribe of Indians against Holdridge Enterprises Incorporated, et al., Civil Action Numbered H76-193 (D. Conn.), which involves Indian claims to certain public and private lands within the town of Ledyard, Connecticut;

(b) the pendency of this lawsuit has placed a cloud on the titles to much of the land in the town of Ledyard, including lands not involved in the lawsuit, which has resulted in severe economic hardships for the residents of the town;

(c) the Congress shares with the State of Connecticut and the parties to the lawsuit a desire to remove all clouds on titles resulting from such Indian land claims;

(d) the parties to the lawsuit and others interested in the settlement of Indian land claims within the State of Connecticut have reached an agreement which requires implementing legislation by the Congress of the United States and the Legislature of the State of Connecticut;

(e) the Western Pequot Tribe, as represented as of the time of the passage of this Act by the Mashantucket Pequot Tribal Council, is the sole successor in interest to the aboriginal entity generally known as the Western Pequot Tribe which years ago claimed aboriginal title to certain lands in the State of Connecticut; and

(f) The State of Connecticut is contributing twenty acres of land owned by the State of Connecticut to fulfill this Act. The State of Connecticut has provided special services to the members of the Western Pequot Tribe residing within its borders. The United

States has provided few, if any, special services to the Western Pequot Tribe and has denied that it had jurisdiction over or responsibility for said Tribe. In view of the provision of land by the State of Connecticut and the provision of special services by the State of Connecticut without being required to do so by Federal law, it is the intent of Congress that the State of Connecticut not be required to further contribute directly to this claims settlement.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(a) the term "Tribe" means the Mashantucket Pequot Tribe (also known as the Western Pequot Tribe) as identified by chapter 832 of the Connecticut General Statutes and all its predecessors and successors in interest. The Mashantucket Pequot Tribe is represented, as of the date of the enactment of this Act, by the Mashantucket Pequot Tribal Council;

(b) the term "land or natural resources" means any real property or natural resources, or any interest in or right involving any real property or natural resources, including without limitation minerals and mineral rights, timber and timber rights, water and water rights, and hunting and fishing rights;

(c) the term "private settlement lands" means (1) the eight hundred acres, more or less, of privately held land which are identified by a red outline on a map filed with the Secretary of the State of Connecticut in accordance with the agreement referred to in section 2(d) of this Act, and (2) the lands known as the Cedar Swamp which are adjacent to the Mashantucket Pequot Reservation as it exists on the date of the enactment of this Act. Within thirty days of the enactment of this Act, the Secretary of the State of Connecticut shall transmit to the Secretary a certified copy of said map;

(d) the term "settlement lands" means

(1) the lands described in sections 2(a) and 3 of the Act to Implement the Settlement of the Mashantucket Pequot Indian Land Claims as enacted by the State of Connecticut and approved on June 9, 1982, and

(2) the private settlement lands.

(e) the term "Secretary" means the Secretary of the Interior;

(f) the term "transfer" means any transaction involving, or any transaction the purpose of which was to effect, a change in title to or control of any land or natural resources, and any act, event, or circumstance that resulted in a change in title to, possession of, dominion over, or control of land or natural resources, including any sale, grant, lease, allotment, partition, or conveyance, whether pursuant to a treaty, compact or statute of a State or otherwise; and

(g) the term "reservation" means the existing reservation of the Tribe as defined by chapter 824 of the Connecticut General Statutes and any settlement lands taken in trust by the United States for the Tribe.

APPROVAL OF PRIOR TRANSFERS; EXTINGUISHMENT OF ABORIGINAL TITLES AND INDIAN CLAIMS

SEC. 4. (a) Any transfer before the date of enactment of this Act from, by, or on behalf of the Tribe or any of its members of land or natural resources located anywhere within the United States, and any transfer before the date of enactment of this Act from, by, or on behalf of any Indian, Indian nation, or tribe or band of Indians of land or natural resources located anywhere within the town of Ledyard, Connecticut, shall be deemed to have been made in accordance with the Constitution and all laws of the United States, including without limitation the Trade and Intercourse Act of 1790, Act of July 22, 1790 (ch. 33, Sec. 4, 1 Stat. 137, 138), and all amendments thereto and all subsequent reenactments and versions thereof, and Congress hereby does approve and ratify any such transfer effective as of the date of said transfer: Provided, however, That nothing in this section shall be construed to affect or eliminate the personal claim of any individual Indian (except for federal common law fraud claim) which is pursued under any law of general applicability that protects non-Indians as well as Indians.

(b) By virtue of the approval and ratification of a transfer of land or natural resources effected by subsection (a), any aboriginal title held by the Tribe or any member of the Tribe, or any other Indian, Indian nation, or tribe or band of Indians, to any land or natural resources the transfer of which was approved and ratified by subsection (a) shall be regarded as extinguished as of the date of such tranfer.

(c) By virtue of the approval and ratification of a transfer of land or natural resources effected by this section, or the extinguishment of aboriginal title effected thereby, any claim (including any claim for damages for trespass or for use and occupancy) by, or on behalf of, the Tribe or any member of the Tribe or by any other Indian, Indian nation, or tribe or band of Indians, against the United States, any State or subdivision thereof or any other person which is based on—

(1) any interest in or right involving any land or natural resources the transfer of which was approved and ratified by subsection (a), or

(2) any aboriginal title to land or natural resources the extinguishment of which was effected by subsection (b),

shall be regarded as extinguished as of the date of any such transfer.

(d)(1) This section shall take effect upon the appropriation of $900,000 as authorized under subsection 5(e) of this Act.

(2) The Secretary shall publish notice of such appropriation in the Federal Register when the funds are deposited in the fund established under subsection 5(a) of this Act.

MASHANTUCKET PEQUOT SETTLEMENT FUND

SEC. 5. (a) There is hereby established in the United States Treasury a fund to be known as the Mashantucket Pequot Settlement Fund. This fund shall be held in trust by the Secretary for the benefit of the Tribe and administered in accordance with this Act.

(b)(1) The Secretary is authorized and directed to expend, at the request of the Tribe, the fund together with any and all income accruing to such fund in accordance with this subsection.

(2) Not less than $600,000 of the fund shall be available until January 1, 1985, for the acquisition by the Secretary of private settlement lands. Subsequent to January 1, 1985, the Secretary shall determine whether and to what extent an amount less than $600,000 has been expended to acquire private settlement lands and shall make that amount available to the Tribe to be used in accordance with the economic development plan approved pursuant to subsection 5(b)(3).

(3) The Secretary shall disburse all or part of the fund together with any and all income accruing to such fund excepting the amount reserved in subsection 5(b)(2) according to a plan to promote the economic development of the Tribe. (A) The Tribe shall submit an economic development plan to the Secretary and the Secretary shall approve such plan within sixty days of its submission if he finds that it is reasonably related to the economic development of the Tribe. If the Secretary does not approve such plan, he shall, at the time of his decision, set forth in writing and with particularity, the reasons for his disapproval. (B) The Secretary may not agree to terms which provide for the investment of the fund in a manner not in accordance with section 1 of the Act of June 24, 1938 (52 Stat. 1037), unless the Tribe first submits a specific waiver of liability on the part of the United States for any loss which may result from such an investment. (C) The Tribe may, with the approval of the Secretary, alter the economic development plan subject to the conditions set forth in subsection 5(b)(3)(A).

(4) Under no circumstances shall any part of the fund be distributed to any member of the Tribe unless pursuant to the economic development plan approved by the Secretary under subsection 5(b)(3).

(5) As the fund or any portion thereof is disbursed by the Secretary in accordance with this section, the United States shall have no further trust responsibility to the Tribe or its members with respect to the sums paid, any subsequent expenditures of these sums, or any property other than private settlement lands or services purchased with these sums.

(6) Until the Tribe has submitted and the Secretary has approved the terms of the use of the fund, the Secretary shall fix the terms for the administration of the portion of the fund as to which there is no agreement.

(7) Lands or natural resources acquired under subsection (5)(b) which are located within the settlement lands shall be held in trust by the United States for the benefit of the Tribe.

(8) Land or natural resources acquired under subsection (b) which are located outside of the settlement lands shall be held in fee by the Mashantucket Pequot Tribe, and the United States shall have no further trust responsibility with respect to such land and natural resources. Such lands or natural resources shall not be subject to any restriction against alienation under the laws of the United States.

(9) Notwithstanding the provisions of section 1 of the Act of August 1, 1888 (25 Stat. 357), as amended, and section 1 of the Act of February 26, 1931 (46 Stat. 1421), the Secretary may acquire land or natural resources under this section from the ostensible owner of the land or natural resources only if the Secretary and the ostensible owner of the land or natural resources have agreed upon the identity of the land or natural resources to be sold and upon the purchase price and other terms of sale. Subject to the agreement required by the preceding sentence, the Secretary may institute condemnation proceedings in order to perfect title, satisfactory to the Attorney General, in the United States and condemn interests adverse to the ostensible owner.

(c) For the purpose of subtitle A of the Internal Revenue Code of 1954, any transfer of private settlement lands to which subsection (b) applies shall be deemed to be an involuntary conversion within the meaning of section 1033 of such Code.

(d) The Secretary may not expend on behalf of the Tribe any sums deposited in the fund established pursuant to subsection (a) of this section unless and until he finds that authorized officials of the Tribe have executed appropriate documents relinquishing all claims to the extent provided by sections 4 and 10 of this Act, including stipulations to the final judicial dismissal with prejudice of its claims.

(e) There is authorized to be appropriated $900,000 to be deposited in the fund.

JURISDICTION OVER RESERVATION

SEC. 6. Notwithstanding the provision relating to a special election in section 406 of

the Act of April 11, 1968 (25 U.S.C. 1326), the reservation of the Tribe is declared to be Indian country subject to State jurisdiction to the maximum extent provided in title IV of such Act.

LIMITATION OF ACTIONS: FEDERAL COURT JURISDICTION

SEC. 7. (a) Notwithstanding any other provision of law, the constitutionality of this Act may not be drawn into question in any action unless such question has been raised in—

(1) a pleading contained in a complaint filed before the end of the one-hundred-and-eighty-day period beginning on the date of the enactment of this Act, or

(2) an answer contained in a reply to a complaint before the end of such period.

(b) Notwithstanding any other provision of law, exclusive jurisdiction of any action in which the constitutionality of this Act is drawn into question is vested in the United States District Court for the District of Connecticut.

(c) Any action to which subsection (a) applies and which is brought in the court of any State may be removed by the defendant to the United States District Court for the District of Connecticut.

(d) Except as provided in this Act, no provision of this Act shall be construed to constitute a jurisdictional act, to confer jurisdiction to sue, or to grant implied consent to any Indian, Indian nation, or tribe or band of Indians to sue the United States or any of its officers with respect to the claims extinguished by the operation of this Act.

RESTRICTION AGAINST ALIENATION

SEC. 8. (a) Subject to subsection (b), lands within the reservation which are held in trust by the Secretary for the benefit of the Tribe or which are subject to a Federal restraint against alienation at any time after the date of the enactment of this Act shall be subject to the laws of the United States relating to Indian lands, including section 2116 of the Revised Statutes (25 U.S.C. 177).

(b) Notwithstanding subsection (a), the Tribe may lease lands for any term of years to the Mashantucket Pequot Housing Authority, or any successor in interest to such Authority.

EXTENSION OF FEDERAL RECOGNITION AND PRIVILEGES

SEC. 9. (a) Notwithstanding any other provision of law, Federal recognition is extended to the Tribe. Except as otherwise provided in this Act, all laws and regulations of the United States of general application to Indians or Indian nations, tribes or bands of Indians which are not inconsistent with any specific provision of this Act shall be applicable to the Tribe.

(b) The Tribe shall file with the Secretary a copy of its organic governing document and any amendment thereto. Such instrument must be consistent with the terms of this Act and the Act to Implement the Settlement of the Mashantucket Pequot Indian Land Claim as enacted by the State of Connecticut and approved June 9, 1982.

(c) Notwithstanding any other provision of law, the Tribe and members of the Tribe shall be eligible for all Federal services and benefits furnished to federally recognized Indian tribes as of the date of enactment of this Act.

OTHER CLAIMS DISCHARGED BY THIS ACT

SEC. 10. Except as expressly provided herein, this Act shall constitute a general discharge and release of all obligations of the State of Connecticut and all of its political subdivisions, agencies, departments, and all of the officers or employees thereof arising from any treaty or agreement with, or on behalf of the Tribe or the United States as trustee therefor.

INSEPARABILITY

SEC. 11. In the event that any provision of section 4 of this Act is held invalid, it is the intent of Congress that the entire Act be invalidated. In the event that any other section or provision of this Act is held invalid, it is the intent of Congress that the remaining sections of this Act shall continue in full force and effect.

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

Mr. WALKER. Mr. Speaker, reserving the right to object, does this bill still have the $900,000 in it that does not fit into the budget?

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Arizona.

Mr. UDALL. I thank the gentleman for yielding.

Mr. Speaker, it still authorizes $900,000, but it is subject to appropriations in the future.

Mr. GEJDENSON. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Connecticut.

Mr. GEJDENSON. I thank the gentleman for yielding.

What the authorization additionally does and what we have done, we have checked with both the Senate Budget Committee which has given approval to this to the Senators on their side and checked with the House Budget Committee which says there is no necessity for waiver since the number is under $1 million.

As the procedures go through we feel confident if we can go through this this year, in future years we can get the funding. But the proper procedure has been followed all the way through. We have contacted the Budget Committees in both the House and Senate.

Mr. WALKER. Further reserving the right to object, I agree with the gentleman it is something which should go ahead. We are going to go through a budget cycle when the new Congress proceeds. This is certainly something where the authorization could take place early in the Congress. I do not see any need to exceed the budget by $900,000 at the end of the Congress.

Mr. GEJDENSON. If the gentleman will yield further, it does not exceed the budget because it does not call for an appropriation. What it would do is it would clear the titles of those homes around the settlement area and would take those homes out of dispute, thereby relieving considerable burden to a handful of homeowners and really provide no jeopardy to the budget.

Mr. WALKER. Further reserving the right to object, the only way that can happen is to obligate the United States—the U.S. Government—to $900,000. It is that obligation that this gentleman is taking exception to, because it is not included in the budget. That is the reason for my objection, and why I continue to object.

Mr. Speaker, I object.

The SPEAKER. Objection is heard.

REREFERRAL OF EXECUTIVE COMMUNICATION NO. 5141 TO COMMITTEE ON ENERGY AND COMMERCE AND COMMITTEE ON WAYS AND MEANS

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that executive communication No. 5141 which was referred to the Committee on Energy and Commerce be rereferred jointly to the Committee on Energy and Commerce and the Committee on Ways and Means.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. DANNEMEYER. Mr. Speaker, reserving the right to object, I would like to direct a question to my colleague from California (Mr. WAXMAN).

Is there anything else, not that there is, but is there anything else in this proposal than what the gentleman from California has described, such as a reference, even collaterally to S. 1939 or the subject matter thereof?

Mr. WAXMAN. Mr. Speaker, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman from California.

Mr. WAXMAN. I thank the gentleman for yielding.

Mr. Speaker, what the gentleman heard is what he gets. This is a request to refer a report that was done by the Department of Health and Human Services both the Committee on Energy and Commerce and the Committee on Ways and Means, because we share jurisdiction over medicare.

It is only for the purposes of referring the report to both committees.

Mr. DANNEMEYER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PROVIDING FOR METHOD OF SERVING JURY SUMMONS, AWARDING FEES FOR COURT APPOINTED ATTORNEYS, AND EXTENDING COMPENSATION BENEFITS TO FEDERAL JURORS

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2863), to amend title 28 to provide protection to all jurors in Federal cases to clarify the compensation of attorneys for jurors in protecting their employment rights, and authorizing the serv-

ice of jury summonses by ordinary mail and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

□ 1850

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin (Mr. KASTENMEIER)?

Mr. HYDE. Mr. Speaker, reserving the right to object and I shall not object, this legislation passed the House Judiciary Committee and the House without objection. This legislation was title II of H.R. 6872, a bill drafted and introduced by my good friend and colleague from Illinois, TOM RAILSBACK. This bill relates to Federal jurors and it has three subparts. The first portion of the bill provides that attorneys' fees may be provided to persons whose claims for compensation are handled by a court appointed attorney. Under current law, the award of attorneys' fees can only be made to retained attorneys. The claims involved in these cases are suits against employers who have discriminated against persons because of jury service.

The second change made by this bill is to authorize the use of regular mail to notify prospective jurors of jury service. Adoption of this technique will save hundreds of thousands of dollars. In addition, it is likely that the response rate to regular mail will be greater than with registered or certified mail.

The third portion of the bill provides that persons who are serving as Federal jurors are eligible for workers' compensation for jury-related injuries. Under current law, only Federal employees on jury service are eligible for such compensation.

The primary question about this provision during the hearing concerned the cost of such a proposal. In sum, while there are no accurate statistics available—because such claims are not allowed under current Federal law—it appears that jury injuries are rare and that the amount of any claims is very small. The administrative office estimates a yearly cost of $25,000, for this particular provision. But the overall bill will save the Federal Government $300,000 to $500,000. Therefore there will be no additional cost to the taxpayer.

Mr. Speaker, further under my reservation of objection, I yield to the gentleman from Wisconsin (Mr. KASTENMEIER) to explain the bill.

Mr. KASTENMEIER. Mr. Speaker, this is what remains of a bill that was passed by the House, the Railsback bill, as a matter of fact, and is relatively technical, has no controversial material in it.

As was indicated by the title, it deals with two elements involving jurors; one is to permit the use of regular mail to notify persons of their eligibility for jury service. It is estimated by the Congressional Budget Office that it will save the U.S. Government from $300,000 to $500,000.

The second part permits the Federal Government to recoup fees paid by the court in certain jury discrimination cases.

The third change is to permit equitable treatment of non-Federal employees who are injured, improbably injured, I might say, during the course of service on a Federal jury.

This was sent back by the Senate in almost indentical form as passed by us. They removed two of the major titles of the bill and this is what remains of it, but I still think it worthy of passage by this body.

Mr. HYDE. Mr. Speaker, further reserving the right to object, would it be fair to say that the overall bill will save the Federal Government from $300,000 to $500,000 a year?

Mr. KASTENMEIER. That is correct. That was the assessment made by the Congressional Budget Office. We indicated that at the time we presented the bill to the floor earlier in the session and that remains true today.

Mr. HYDE. Mr. Speaker, I urge passage of this bill, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin (Mr. KASTENMEIER)?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2863

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1875(d) of title 28, United States Code, is amended—

(1) by inserting "(1)" immediately after "(d)"; and

(2) by amending paragraph (2) to read as follows:

"(2) In any action or proceeding under this section, the court may award a prevailing employee who brings such action by retained counsel a reasonable attorney's fee as part of the costs. The court may tax a defendant employer, as costs payable to the court, the attorney fees and expenses incurred on behalf of a prevailing employee, where such costs were expended by the court pursuant to paragraph (1) of this subsection. The court may award a prevailing employer a reasonable attorney's fee as part of the costs only if the court finds that the action is frivolous, vexatious, or brought in bad faith.".

SEC. 2. (a) The second paragraph of section 1866(b) of title 28, United States Code, is amended to read as follows:

"Each person drawn for jury service may be served personally, or by registered, certified, or first-class mail addressed to such person at his usual residence or business address.".

(b) The fourth paragraph of section 1866(b) of title 28, United States Code, is amended to read as follows:

"If such service is made by mail, the summons may be served by the marshall or by the clerk, the jury commission or their duly designated deputies, who shall make affidavit of service and shall attach thereto any receipt from the addressee for a registered or certified summons.".

SEC. 3. Chapter 131 of title 28, United States Code, is amended—

(1) by adding at the end thereof the following:

"§ 1877. Protection of jurors

"(a) Subject to the provisions of this section and title 5 of the United States Code, subchapter 1 of chapter 81, title 5, United States code, applies to a Federal grand or petit juror, except that entitlement to disability compensation payments does not commence until the day after the date of termination of service as a juror.

"(b) In administering this section with respect to a juror covered by this section—

"(1) a juror is deemed to receive monthly pay at the minimum rate for grade GS-2 of the General Schedule unless his actual pay as a Government employee while serving on court leave is higher, in which case monthly pay is determined in accordance with section 8114 of title 5, United States Code, and

"(2) performance of duty as a juror includes that time when a juror is (A) in attendance at court pursuant to a summons, (B) in deliberation, (C) sequestered by order of a judge, or (D) at a site, by order of the court, for the taking of a view."; and

(2) by amending the table of sections for such chapter by adding after the item relating to section 1876, the following:

"1877. Protection of jurors.".

SEC. 4. Section 8101 of title 5, United States Code, is amended in paragraph (F) of subsection (1) by striking out "juror" through the end of such paragraph and inserting in lieu thereof "juror;".

The Senate bill was ordered to be read the third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. For what purposes does the gentleman from Michigan rise?

Mr. DINGELL. Reserving the right to object, Mr. Speaker——

The SPEAKER. On what?

Mr. DINGELL. On the unanimous consent request of the gentleman from Wisconsin.

The SPEAKER. The gentleman is too late.

CONFERENCE REPORT ON H.R. 5470, PERIODIC PAYMENT SETTLEMENT ACT OF 1982

Mr. ROSTENKOWSKI. Mr. Speaker, I call up the conference report on the bill, H.R. 5470, to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Pursuant to the order of the House of December 17, 1982, the conference report is considered as having been read.

(For conference report and statement, see prior proceedings of the House of today, Tuesday, December 21, 1982.)

The SPEAKER. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 20 minutes, and the gentleman from Tennessee (Mr. DUNCAN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the House and Senate conferees have reached agreement on the Periodic Payment Settlement Tax Act, as passed by the House and amended in the Senate.

As passed by the House, H.R. 5470 clarifies the tax treatment of periodic payments of certain types of compensation for personal injuries which are excluded from gross income. The legislation has negligible revenue impact and is supported by the administration.

There were few items in disagreement between the House and the Senate. The conference report generally follows the Senate amendments which make technical modifications to the periodic payments provisions. The Senate has receded from its amendment involving withholding by Virgin Islands payors as this matter is the subject of a separate conference on H.R. 7093. The Senate also has receded from its amendment extending the highway trust fund taxes and expenditure authority, in view of the separate action in both Houses on H.R. 6211, the Surface Transportation Assistance Act of 1982.

The conference report follows the Senate amendment on Indian tribal governments with several modifications. Under the conference agreement certain tax provisions are extended to American Indian tribal governments on a similar basis as those which apply to the States. The conference agreement permits tribal governments to issue bonds for public purposes and exempts tribal governments from certain Federal excise taxes in limited circumstances. These tax provisions will sunset after 1984.

The conference agreement follows the Senate amendment on the tax treatment of certain foster care payments, with clarifying and technical language proposed by the House. Under the conference report, payments received by foster parents as "difficulty of care" payments for handicapped foster children would be excluded from income. The conference report also codifies the practice under present law that excludes from income basic foster care payments for the expenses of caring for foster children.

The conference report generally follows the Senate amendment with regard to the exception from ERISA preemption for the Hawaii Prepaid Health Care Act. In addition, the conference report includes a House amendment clarifying preemption in the case of certain multiple employer insurance trusts providing group health insurance.

Mr. Speaker, the conference report on H.R. 5470 improves current Federal tax and pension law through clarification and technical refinements. It will assist both taxpayers and the Government in the administration of the law. I urge its adoption by the House.

Mr. DUNCAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report on H.R. 5470, the Periodic Payment Settlement Act.

As the Members may recall, the House recently passed H.R. 5470. As passed by the House, H.R. 5470 established specific statutory rules governing the taxation of payments received on account of personel injuries.

The Senate added several amendments to the bill. The conferees have reached a reasonable compromise of our differences and I urge adoption of the conference report.

Mr. Speaker, I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 7093, REDUCING RATE OF CERTAIN TAXES PAID TO VIRGIN ISLANDS

Mr. ROSTENKOWSKI. Mr. Speaker, I call up the conference report on the bill (H.R. 7093) to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Pursuant to the order of the House of December 17, 1982, the conference report is considered as having been read.

(For conference report and statement, see prior proceedings of the House of today, Tuesday, December 21, 1982.)

The SPEAKER. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 30 minutes, and the gentleman from Texas (Mr. ARCHER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I submit for the approval of the House the report of the conferees on H.R. 7093. This bill makes changes in three areas: First, it makes it clear that only a 10-percent tax will be imposed on passive income from the Virgin Islands when the recipient is a U.S. individual or corporation; second, it provides for a short-term solution to the problems that have arisen in the course of reexamination of disability beneficiaries; and third, it delays for 7 months full implementation of the spouses' public pension offset provision which took effect December 1, 1982, by exempting from the offset those who can demonstrate dependence on their spouse for at least half of their support.

This bill was originally devoted only to the Virgin Islands tax measure. The House had accepted most of the original Senate amendments to this bill dealing with the social security disability program, the most important of which were the extension of payments to the ALJ hearing level for those appealing termination of their benefits, and slowdown of the rate of reviews of disability beneficiaries. In the conference, the House position prevailed with respect to the addition of two House amendments, including requirement of a face-to-face hearing at the reconsideration level, and with respect to rejection of a Senate amendment concerning review of evidence in the file. The cost of the disability provisions of the bill is estimated by CBO to be $75 million over the 1983–88 period.

The House conferees also managed to win a compromise from the Senate on the Government pension offset provision. The House had originally proposed a new offset provision that would have used only one-third of the Government pension in computing the offset against the social security spouses' pension. The Senate wished to delete this section altogether. The compromise that was finally struck is only temporary: it provides that the offset will not apply to those who become eligible for a Government pension between December 1, 1982—when the current law offset took effect—and July 1, 1983, and who can prove they are dependent on their spouses for at least one-half of their support. This provision is not a permanent solution, but it does aid those women most harshly affected by the current offset provision. The cost of this provision is estimated at $50 million over the five years.

In short, the House prevailed on the amendments that were of critical importance to Members of the House; namely, the extension of benefits for disability beneficiaries, and managed to win a compromise on the Government pension offset provision that will give 7 more months of exemption from the offset for the neediest women affected by it, giving Congress time to devise a permanent, equitable solution next year. I urge acceptance of this report.

□ 1900

Mr. ARCHER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support the conference report on this legislation.

The primary bill was relatively noncontroversial when it passed the House and remains so as it emerges from the conference committee. It has

to do with a reduction in certain taxes paid to the Virgin Islands, on income from the Virgin Islands, and has not, as far as I know, been protested by an interested parties. It has, according to the Treasury Department and others, no significant revenue impact.

The rest of the measure deals with changes in the disability insurance program and the so-called pension offset, which was enacted as section 334 of Public Law 95-216.

The disability insurance changes are aimed at adjusting to problems arising from continuing disability investigations (CDI's). In various parts of the United States, there have been reports that CDI's have resulted in beneficiaries being removed from the disability rolls improperly and/or without due process. The conference report would, among other things, respond to these reports by providing for payment of benefits to claimants in such cases until their claims have been reviewed by administrative law judges (ALJ's).

The conference report also would provide for a short extension of a grace period offered to those eligible for social security spouse's benefits who also are eligible for governmental retirement benefits based on their own work. The 1977 Social Security Amendments provided that spouse's benefits would be reduced, dollar for dollar, by the amounts of those other governmental pensions. A 5-year grace period was added to exclude from this offset both women and dependant husbands who had reason to plan for such benefits under prior law. That grace period ended November 30 of this year.

The conference report would provide for an extension of this grace period for 7 months, during which time exempted beneficiaries, both men and women, would have to show that they had been dependent upon the primary beneficiaries.

These are not perfect answers to perplexing problems. But they do represent responses which appear to be acceptable to a majority of the conferees and to a number of affected social security beneficaries. The conferees have been assured that the net additional cost to the social security system would be relatively slight.

Against this background, Mr. Speaker, I recommend that my colleagues approve the conference decision. But I would repeat some cautionary words I offered on this subject earlier this week, when H.R. 7093 was amended and sent to the other body. At that time, I pointd out that we are dealing with extremely complicated provisions of law in a very short period of time. When we attempt to respond to crisis, real or imagined, in the closing days of any session, we tend to make mistakes, usually unwittingly. Although I am not disposed to stand in the way of this legislation, I do deplore the process which has brought us to this point.

I also would like to reiterate my strong feeling that the disability insurance program, especially the hearings and appeals process, warrants further detailed review, and very likely, more far-reaching reform. The legislation we are acting upon today should, therefore, not be viewed as any kind of an obstacle to real reform, and it is with that understanding, Mr. Speaker, that I support the conference action on H.R. 7093.

Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. CONABLE) the ranking Republican on the Committee on Ways and Means.

Mr. CONABLE. Mr. Speaker, I support this conference report for one overriding reason. It addresses severe problems resulting from continuing disability investigations (CDI's) which were mandated under the Disability Insurance Amendments of 1980. That legislation required periodic review of all disability cases which held some hope of recovery. The aim was to make certain that only those who were entitled to such benefits were continuing to receive them. There was no congressional intent to penalize, or treat unfairly, anyone then on the rolls.

Unfortunately, after the congressional mandate had been implemented—and I should note that this occurred earlier than was ordered—there were many reports throughout the United States of persons being removed from disabiity rolls summarily and, in some instances, unjustly. In response to such reports, I asked the Committee on Ways and Means' Subcommittee on Social Security to investigate and recommend corrections in law where necessary.

The conference report represents, I believe, an adequate interim response to this request. Among other things, it woud provide that beneficiaries who appeal their removal from the rolls will continue to receive benefits until their cases have been reviewed by administrative law judges.

The conference report does not represent a definitive answer either to CDI problems or to structural problems of the hearings and appeals process. It does represent the best response obtainable now. It also carries with it the understanding, at least on this side of the aisle, that we will make every effort in this next Congress to seek more lasting and much needed reform of the entire system.

Mr. ARCHER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Speaker, I ask for approval of this conference report on H.R. 7093.

This bill give much needed short-term relief, on a temporary basis until June 1984, for disabled beneficiaries who are appealing the decision to terminate their benefits. It provides for a face-to-face interview for claimants appealing the termination of their benefits at the reconsideration level. This is an important improvement over the present procedure that gives them no chance for a personal hearing in the review process until their ALJ hearing.

The bill also give the Secretary of HHS the authority to slow down the rate at which reviews of beneficiaries must be done, to make sure State agencies can handle the review workloads.

This bill is a temporary stopgap provison. I firmly believe, and I have been supported in this by most concerned, that the disability program must be looked at again next year in order to address the basic administrative problems the system faces. But for now, this bill gives relief where it is needed, and gives some basis for further reform in the near future.

The bill contains as well a very limited solution to the Government spouse's pension offset problem. The House approved what I think was a good, sound approach to making the offset equitable and fair for both men and women, by using one-third of their public pension in the offset against their social security spouse's benefit. The Senate did not feel they could agree to this, and proposed instead that the offset would not apply for those becoming eligible for public pensions within the next 7 months if they can prove they are dependent on their spouses for at least one-half of their support. The House finally agreed to the Senate's proposal, but I think all of us look at this provision as only a temporary solution to the pension offset problem. This area will have to be looked at again next year.

All in all, we have a good bill, one that gets the relief of benefits during appeal to those who need it now and cannot wait until next year for a solution. In the meantime, we can examine the disability program, and the pension offset provision, to devise permanent, long-lasting answers to the problems we have temporarily addressed in this bill.

I would like to acknowledge the persistent support of the many Members of the House who have urged action on both of these provisions and the Members of the other body who have worked with us to come to an acceptable compromise. It is good to know that an agreement can be reached in the social security area. All Members of the conference have agreed to this bill as have the many other Members interested in these issues. I urge adoption of this report.

SUMMARY OF H.R. 7093

H.R. 7093 passed the Senate by a vote of 70-4, December 3, 1982, and the House by unanimous consent December 16, 1982. The Conference agreement includes provisions which:

1. Clarify of the rate of certain taxes paid to the Virgin Islands on Virgin Island source income.

2. Continue payment of benefits through the ALJ decision (on cases terminated by October 1983, with no benefits payable past June 1984).

3. Give the Secretary authority to slow down the number of continuing disability cases sent to State agencies.

4. Require by January 1, 1984, a face to face evidentiary hearing at the reconsideration level for termination cases.

5. Order the Secretary to take necessary steps to assure public understanding of the importance Congress attaches to the face to face reconsiderations and of the importance of submitting all evidence at that level.

6. Require semi-annual reports to Congress.

7. Extend for seven months, until July 1983, the exemption in current law from the public pension offset provided the individual can prove dependency on his or her spouse.

EXAMPLES

Extension of benefits to ALJ decision.—

1. Individual's benefits were terminated in October 1982. Beginning January 1983, he could again receive benefits if he has a timely request in for an appeal and an ALJ has not ruled on the case.

2. Individual's benefits are terminated in August of 1983. He could continue to receive benefits through June of 1984 or until an ALJ rules on the case, if he appeals.

3. Individual's benefits are terminated October 1983. He could not receive any extension of benefits beyond the two months after the month of termination which is provided in present law.

Examples of public pension offset.—

1. Woman becomes eligible for $300 public pension from uncovered employment sometime between December 1982 and July 1983. Her husband receives a social security benefit of $500 (potential spouse benefit of $250). At the time he retired, died or became disabled, her husband provided more than half of her support. She will receive spouse benefit of $250 (or a widow's benefit of $500) in addition to her public pension of $300.

2. Same example, except at the time he retired, died or became disabled, her husband did not provide more than half of her support. She will receive no spouse benefit (the $250 is entirely offset by the $300 public pension). She could receive $200 in a widow's benefit ($500 widow's benefit minus $300 in public pension).

3. Man becomes eligible for $500 public pensions from uncovered employment sometime between December 1982 and July 1983. His wife receives social security benefit of $400. At the time she retired, died or became disabled she provided more than half of his support. He will receive public pension of $500 and spouse benefit of $200 (or a widower's benefit of $400).

4. Same example, except at the time she retired, died or became disabled his wife did not provide more than half of his support. He will receive no spouse benefit (the $200 spouse benefit is entirely offset by the $500 public pension). Also he would receive no widower's benefit (the $400 widower's benefit is offset by the $500 public pension).

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Texas.

Mr. WRIGHT. I thank the gentleman for yielding.

Mr. Speaker, I think what he is discussing is one of the most important things the Congress could do. All the Members need to be aware of what our conferees have agreed to in connection with disability benefits.

It will be of some help to slow down this headlong dash by which the administration has seemed intent upon just arbitrarily determining that disabled people are no longer disabled, without any hearing, without any personal face-to-face confrontation, without any opportunity for those people to have an interview. I am told that some 200,000 of our disabled Americans have been arbitrarily made ineligible even though earlier and officially adjudged as disabled.

Mr. ARCHER. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. No. I am asking the gentleman from Texas (Mr. PICKLE) to yield for a question and I am propounding the question.

Now, is it true that what you are doing is making it more difficult for some overzealous administrator to go in without a hearing and arbitrarily advise some disabled person by mail that for some reason or some whim, that person is no longer considered disabled?

Mr. PICKLE. No, I cannot say that I would agree with the gentleman entirely. I would agree with him in his appraisal of our intent.

What the gentleman should realize is that we need a uniformity of standards at both the local and State levels, and at the administrative law judge level, so that we are judging the cases by the same rule book.

Now, the administration is attempting to establish those standards. That way you can eliminate many of the very harsh decisions that have been made because one group at the State level has been operating from the State operating procedures while the administrative law judges are operating on the basis of a different set of standards. We are trying to say, and the Social Security Administration has agreed, that we ought to have uniformity at all levels.

First, they are tying to establish that if we can agree to that and put it in force by regulation or rules, we will have cured many of our problems because we cannot explain some of the very harsh decisions that have been made.

But second, let me say to the gentleman, the Social Security Administration has had a very difficult problem. This Congress mandated a review once every 3 years of all the disability cases.

Mr. WRIGHT. What was the legislation in which it was mandated, if I may ask the gentleman to yield further?

Mr. PICKLE. This was passed in 1980, as part of the social security disability amendments. At that time the Congress mandated a review once every 3 years of everyone on the disability rolls.

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield further, did it mandate that arbitrary decisions would be made among those who would be disabled and they would be rendered ineligible without hearings?

Mr. PICKLE. No. I agree with the gentleman totally that the facts ought to apply. I cannot explain some of these unimaginable decisions that were made by Social Security.

Mr. WRIGHT. Is it not true that a very substantial majority of those arbitrarily ruled out of their eligibility, once they were able to get into a court or an official administrative hearing, have reestablished their eligibility?

Mr. PICKLE. Yes. It is true, we must keep in mind that a person may be handicapped but he still can work, and that is what the average individual wants to do. All we want to do, and all the Congress wants to do, is say that those people who receive disability benefits are entitled to them. We do not want to take benefits away from anyone who is entitled to them, but we have to make certain they are entitled to them.

Mr. WRIGHT. I agree. I think what the gentleman's legislation achieves is worthy and useful. I am trying to help the gentleman make his case. I am not trying to give the gentleman any difficulties.

□ 1910

Let me ask the gentleman this question: In the future, in the case of an individual who has been officially adjudged to be permanently and totally disabled, if some person in the bureaucracy who has never seen this individual should decide that he does not believe that individual is any longer disabled, will that individual continue to draw disability benefits until the hearing has been held to which the individual is entitled?

Mr. PICKLE. Let me respond to the gentleman by saying what the procedure should be. Congress mandated a review of these cases and said that those people who are eligible and possibly could work should be reviewed. There was no intent to review those who are permanently disabled. Some people were called in who were permanently disabled. They should not have been called in in the first place, and I think that has been corrected. So, I do not think that is a problem any more.

Mr. WRIGHT. I thank the gentleman.

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Speaker, contained in the Virgin Island tax bill is a provision which can ultimately affect 5,000 female public pensioners, who are eligible for social security spouse bene-

fits. We all realize that conferees of the Ways and Means Committee and the Senate Finance Committee have spent many hours discussing the implications of the Government pension offset law currently in effect.

As all of you know, if the law is not amended, 5,000 women will lose their eligibility for social security spouse benefits this year, alone. By 1987, as many as 25,000 women will experience reductions in their benefit payments. The loss adds up to approximately $2,000 in retirement revenue per individual, as a result of a dollar-for-dollar reduction of social security by the amount of the local, State, or Federal pension. What Chairman ROSTENKOWSKI and Social Security Subcommittee Chairman PICKLE have presented today will change that for a select group of needy women.

By extending an exemption from a total offset for 7 months to both male and female public pensioners who pass dependency tests, we are enabling almost 20 percent of the eligibility class, those who would have lost social security benefits, to receive the monetary payments they are due.

The 20-percent figure is low. For those of us who have been following this issue closely this is a disappointment because nearly 4,000 women will not pass dependency requirements, but need the income provided through social security payments. If the Senate had receded to the House, accepting the original Pickle language, more women would be able to receive the benefits that they have anticipated receiving.

Yet, the measure is indicative of continued interest in this subject. As chair of the Select Committee on Aging's task force on social security and women, I realize that we need to work hard next Congress to reach a solid, fair compromise that will give these deserving women just benefits.

I commend Chairman PICKLE for his diligence and commitment to the cause of improving the financial conditions of thousands of poor, elderly women in this country. I am hopeful that we will resolve this issue in the next Congress and urge that my colleagues, here today, support the conference report before us.

Thank you, Mr. Speaker.

Mr. SHANNON. Mr. Speaker, will the gentlman yield?

Mr. PICKLE. I yield to the gentleman from Massachusetts.

Mr. SHANNON. Mr. Speaker, I thank the gentleman for yielding. Let me say at the outset that I agree with what has been said by all three of our colleagues from Texas who have spoken on this issue tonight. This is a problem that was recognized on both sides of the aisle, that needed to be dealt with, and I am glad that we were able to come together in a bipartisan way and deal with it through stop-gap legislation at this late hour.

Nobody believes that the problems of the disabled are solved by this legislation. We all know that we are going to have to revisit this process perhaps sometime next year, maybe in the context of a bigger social security bill. We all know that there are still problems in the appeals process that need to be addressed, but at least we have said to the disabled people of America that we are going to try to straighten out what part of the process that we can; we are going to try to extend benefits a little longer through the appeals process. We institute the face-to-face evidentiary hearing, which I think is a very good thing to do.

We deal with the offset provisions a little more, but most importantly, I think we have dealt with this issue together, acknowledged the problems together. Democrats and Republicans alike have come together and said that we are going to work on this problem. I think that is a very healthy thing to do.

I do want to say that I think that all of the people have an interest in this legislation, and all of the disabled people of America owe a great debt to Mr. PICKLE, chairman of the subcommittee, for his efforts on their behalf. I certainly look forward to working with him in the next Congress to make sure that we straighten out continuing problems.

Mr. PICKLE. The gentleman is very kind.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I appreciate my colleague yielding. I will not take as long as I normally do. I want to compliment the chairman of the Subcommittee on Social Security for facing this problem we had in the disability portion of the act that needed improvement. The chairman of our committee has done an excellent job in trying to bring to the House and improvement in the law, and I know that all Members of the House cannot fully appreciate the time and effort that was spent not only by the chairman of the subcommittee, but by other members of the subcommittee, to make sure that this change in the law is put in place, and that it allows the Social Security Commission to try to deal with this problem of the disabled individual who needs more attention, and face to face.

So, I wish to compliment my colleague for bringing this to the floor and making sure that we do improve it, and not let it lapse.

Mr. PICKLE. If the gentleman will let me add to that statement, the gentleman from California, Mr. ROUSSELOT, has been one of the most diligent and helpful members of our Social Security Subcommittee that we have had this year. I regret seeing him leave this body. He has made a real contribution to our subcommittee, and I commend him for his work and dedication.

Mr. ROUSSELOT. I thank the gentleman.

Mr. NEAL. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from North Carolina.

Mr. NEAL. Mr. Speaker, I want to say, first of all, that I am delighted that this bill concerning social security disability has passed the House and the Senate, and that the conference report is now before us for final approval. If we accomplish nothing more in this lameduck session, with the final passage of this legislation we will have done the Nation a laudable service.

The legislation concerning disability involved in this conference report is almost identical to a bill which I introduced in January of this year. I was compelled to do so when I became aware, through the treatment being accorded many of my constituents, of the cruelest, most inhumane acts I have ever encountered on the part of our Government.

We will remember, Mr. Speaker, that in the Social Security Amendments of 1980, the Congress recommended that all social security disability cases be reviewed at least once every 3 years to determine whether the recipient remains disabled, under the law, and is entitled, therefore, to a continuation of the benefits. The purpose of this legislation was to weed out of the rolls all those recipients who, for whatever reason, were no longer entitled to receive them. It was clear that such abuses existed, and the Congress in a most responsible way sought to eliminate abuse and fraud from the system.

The Congress did not intend, however, that suffering and hardship be inflicted upon a single individual who was entitled to the benefits he or she was receiving. Rather, it intended an orderly, deliberate, humane process of review.

Enter the Reagan administration, which came into office in January 1981. It speeded up the review process; reduced the personnel needed for the review process, and began arbitrarily cutting people from the disability rolls.

Mr. Speaker, the results in my district were shameful. We were contacted by people desperately ill with cancer, with heart problems, people who had lost limbs, who had major back operations and other crippling conditions. Each of them said they had been cut off the disability rolls, were desperate, and had nowhere to turn. They feared losing their homes, if they still owned them. They feared they would not be able to feed their families, or educate their children. They were, on the whole and in num-

bers, the most desperate people I have encountered in all my years of office.

Most of these people, Mr. Speaker, had been terminated from disability benefits after only the most cursory of examinations. It reminded me of the jokes about draft examinations during World War II—if you had a pulse, they took you. In this case, a tap or two on the knee and the recipient might be told he or she would no longer receive disability benefits. In some cases, they were notified that the removal was retroactive, and they would have to reimburse the Government for benefits already received. The appeals process was open to them, but it was long and arduous. In the meantime, the disabled persons were left to shift for themselves.

So, Mr. Speaker, the bill I introduced in January said essentially that we would give these people the same consideration in reviewing their disability status that was given to putting them on the rolls in the first place. It is not now, and never has been, easy to get on the disability rolls. It requires a very thorough physical examination, a complicated work history, and so forth. We said in our bill that disability benefits would be extended until the review, if unfavorable to the recipient, had gone through an appeals process to make sure the recipient had not been terminated without just cause.

For all intents and purposes, the language of H.R. 7093 concerning disability and the accompanying conference report fulfills that intention. It continues social security disability benefits and medicare until, on appeal, an adverse determination has been made by an administrative law judge. My bill, H.R. 5325, would have extended this provision beyond the October 1983, cutoff date.

The conference report also guarantees face-to-face evidentiary hearings at the reconsideration level; increases the HHW Secretary's authority to reduce the number of CDI reviews, and directs the Secretary to assume public understanding of the reconsideration process. These clarifications of what the Congress intended, in the first place, will do much, Mr. Speaker, to prevent future suffering and anguish. It cannot, however, assauge the hurt that already has been inflicted upon tens of thousands of people, many of whom were later found to indeed be eligible for the benefits which were terminated. My experience has been that about 90 percent of the appeals my office has been involved in have been upheld at the administrative judge level.

Mr. Speaker, there has been a callousness—implicit and explicit—in the way these reviews have been handled. It begins with the fact that many people were deprived, without due cause, of benefits for which they had paid and to which they were entitled. Disability benefits are paid from the social security trust fund established for that purpose, and into which every American worker under social security pays. Most people believe, and have believed over the years since the program was founded, that if they become truly disabled and no longer employable, these benefits would be there to help sustain them. This has been the case, with modest amounts of abuse, until the Reagan administration got hold of the program. It seems quite evident now that they are handling this law in the same way they handle environmental laws, toxic waste laws, and other laws pertaining to the public health and safety; that is, in defiance of the intent of Congress. In the case of social security disability, the gun has been leveled at the people least able to defend themselves against the encroachment of policies which cater to the wealthiest and most powerful in our society.

I would also mention, in closing Mr. Speaker, that this bill will not entirely make up for the loss that many of these poor people have sustained. It would not make the restoration of their benefits retroactive to the date of termination, in cases terminated before enactment of the bill, but would restore them at that point.

Finally, Mr. Speaker, I commend this conference report to my colleagues and urge its approval. I also ask unanimous consent that a statement which I gave before the Subcommittee on Social Security, Ways and Means Committee, on March 17, 1982, concerning my bill be included in the RECORD at this point.

STATEMENT OF HON. STEPHEN L. NEAL, A REPRESENTATIVE IN CONGRESS FROM THE STATE OF NORTH CAROLINA

Mr. Chairman and members of the subcommittee, I appreciate the opportunity to submit testimony before this subcommittee on a most tragic situation.

The situation involves the Social Security Administration (SSA) and its administration of the disability insurance program. Let me share some of the incidents which have occurred in my congressional district:

A middle aged man with a very severe back ailment and who for the past ten years has received social security disability payments, was terminated from the program without ever having a current physical examination.

A leg amputee, who is currently receiving treatment for pain in his limb, was informed by the Social Security Administration that his benefits were being terminated and that he was able to work. His body, however, has been unable to accept the artificial limb because of pain.

A young father of four with heart problems was told by a personal physician he would be risking a possible heart attack if he engages in strenuous work. The Social Security Administration informed him that his benefits were being terminated on the grounds that he could work two to four hours a day at a parking garage. Yet, no such employment opportunities exist in the area.

A mental patient found her only source of income abruptly halted in August, 1981. It took the Social Security Administration over five months to make a decision on her appeal. It will be another three to four months before the case comes before an Administrative Law Judge.

A gentleman, upon arriving for a physical examination at a state agency assigned doctor's office, was told by the receptionist that his benefits were being terminated and the examination results would not matter in the decision. She was correct. After receiving a cursory examination, he received a termination notice a few weeks later.

These are not just isolated incidents. My office has received over 100 similar complaints from disability recipients questioning the manner in which their disability review was handled. I am sure many other horrifying stories have been brought to the subcommittee's attention. Reports of mass benefit terminations, administrative blunders and harassment are occurring throughout the country. I also understand the subcommittee has become aware of individuals commiting suicide after learning their disability benefits have been terminated.

Mr. Chairman, the source of this upheaval is not difficult to explain. It can be traced back to March, 1981, when the Reagan Administration more than doubled the cases for the state agencies to review under the Continuing Disability Review process. Under the Social Security Amendments of 1980, the Social Security Administration (SSA) was required to review all disability cases at least once every three years. This was in response to the lack of follow-up of a beneficiary's medical improvement and possible work activity. The Congress, recognizing the need for providing state agencies with enough leadtime to hire and train the additional staff, established January 1982 as the effective date for implementing the three-year review process.

In March of last year, as a result of an Administrative action, the number of cases referred to the state agencies ballooned from about 160,000 in 1980 to over 356,000 in 1981. As you can imagine, Mr. Chairman, the state agencies were not prepared to take on this caseload. The Administrator of my state's Disability Determination Service reported to me that the decision to escalate the CDI procedure has taxed "to the limit our staff and medical community." There is no doubt that the Administration's decision to accelerate the review process has resulted in many deserving people being deprived of benefits.

Of course, Mr. Chairman, a person can appeal a cessation decision, but the process can take up to twelve months to complete. In the meantime, benefits are terminated within a short time after the findings of the state agency are sent to the Social Security Administration. This poses a serious economic hardship for those who have been wrongfully terminated and stand a good chance of being reinstated.

I am sure that there are some people still on the disability rolls who no longer qualify for these benefits. The CDI three-day review is designed to remove these people from the program. But, according to SSA's own data, over 70 percent of those who have lost disability benefits are being reinstated, indicating a serious flaw in the review and termination program, which I hope this subcommittee will correct.

Seeing the need to correct this problem, on January 25, 1982, I introduced H.R. 5325, which could prevent disability benefits from being terminated prior to the exhaustion of the administrative appeals procedure. The only exception would be in cases in which current medical evidence substantiates the termination of benefits and is made available to the beneficiary. The proposal parallels the procedures already afforded SSI Disability recipients. It also provides an in-

centive for insuring that the same care and quality which went into the intitial screening for eligibility in the program is given to an individual whose case is under a CDI review.

Mr. Chairman, you are to be commended for conducting this investigation into the disability program. Thousands of people are being hurt by the CDI procedure and therefore it is important that we act now. I respectfully request that you and the members of the subcommittee give careful and thorough consideration to the provisions outlined in H.R. 5325 and develop a workable solution to this problem.

Of course, H.R. 5325 is not a cure-all. I hope the subcommittee can persuade the SSA to return fairness and compassion to the CDI process. The inclusion of my provisions or similar language would, however, relieve a great deal of anxiety for those who are truly disabled.

Thank you again, Mr. Chairman, for allowing me to address this issue.

Mr. Speaker, I want to thank the chairman also, because in my experience over the last year I have encountered nothing that has seemed to me as cruel as the treatment that has been afforded to the people who come to us. We have talked to people who had incurable cancer, limbs destroyed, multiple back operations, heart attacks, people with young families, told they cannot work and cut off with the most cursory of examinations, and in many cases their only source of income. I have never seen anything crueler done on the part of our Government than this. It is even tougher than for those people who are unemployed and cannot find work. They are in good health, and so there is hope for them.

But, in many of the cases we have seen there is almost no hope. What the gentleman has done is extend the benefits of these people until they run through the full review process. In the case of the nationwide figures, about 70 percent of the people who have appealed and followed the process through to its conclusion, they have won. Is that not correct, about 70 percent?

Mr. PICKLE. A large number of cases have been reversed for various reasons. Also a very large number of people have probably been removed from the rolls because they could go to work. When we consider the number of cases that have been reversed on appeal, we must bear in mind that many of those reversals were based on the fact that different sets of rules were applied at the State agency and ALJ levels. Once we put uniform standards in place, the system should work as it was intended to. Let me also say to the gentleman and to the State people who run our State disability agencies that we have confidence in them. They have had to operate under different sets of standards, and the Social Security Administration will admit that many decisions that cannot be explained have happened within each district. There have been errors and mistakes, but I think SSA and the States have corrected a great many of them and have been more cautious about how the decisions are made. They have recommended the changes that we are making here, so each of us feels that this is the crucial time for beginning to put the right procedure in place.

We must change the disability adjudicative process. Does the gentleman know how many disability cases are stacked up now waiting for the administrative law judge hearing? Over 155,000 cases.

□ 1920

These cases cannot be handled in a timely manner, so we must change our procedures in order to give claimants a timely hearing. Next year that is one of the challenges we will face.

Mr. NEAL. And they are short of staff, as I understand it, and there are 150,000 people under current law, without this change, who are going to be without income from the social security disability program until they complete the review process.

Mr. PICKLE. If those cases are appealed, they will go to the administrative law judge, and this bill says——

Mr. NEAL. No, under this bill you have corrected that, but under the law as it is now interpreted, before your bill, they would be without income.

Mr. PICKLE. Yes. Their benefits are cut off within, say, 30 to 60 days after the decision under the present law, but they can appeal to the reconsideration level, and to the administrative law judge. Our bill provides that their benefits will continue until the ALJ level. So we are giving them relief, and that is the reason for this bill.

Mr. NEAL. Mr. Speaker, I commend the gentleman for that, and I thank him very much.

Mr. SKELTON. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Missouri.

Mr. SKELTON. Mr. Speaker, I want to commend the chairman of the subcommittee for handling this bill as he has done.

As the gentleman knows, we have had a very extensive problem, particularly in my area. The gentleman will recall that when I testified before the subcommittee, I testified about those who were cut off in cases where the doctor would say, "You are disabled," and the social security people would say, "No, you are not." Consequently, they were in a terrible dilemma.

After I testified, on that very same day, after I walked out the door, a gentleman followed me and introduced himself to me as an administrative law judge, and he said, "Congressman, you are right on the mark in what you say. I compliment you in addressing this very serious problem."

I might point out the fact that we have had this problem in which these people who are cut off had nothing on which to live. In my district we had a situation just in recent weeks where someone was found initially to be disabled. The social security people said, "You are able to work," and the doctor said, "No, you cannot walk." Before his appeal was held before the administrative law judge, he died of the very same complaint of which he was initially found to be disabled, although later the social security said he was not.

So, Mr. Speaker, I compliment the gentleman for addressing this problem. I realize this is only a stop gap, but I look forward to working with the gentleman for a complete resolution of this very serious problem.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I want to commend the gentleman from Texas (Mr. PICKLE).

I was an original cosponsor of this bill, and I have worked with the gentleman on it. I just want to say to you that "you have been a gentleman all the way."

Mr. PICKLE. Mr. Speaker, the gentleman from Massachusetts has been most persistent in our efforts to develop this legislation. I thank the gentleman for his cooperation.

Mr. CONTE. Mr. Speaker, I will not be speaking to my colleagues long today; I merely want to rise and associate myself with the remarks of the gentleman from Illinois (Mr. ROSTENKOWSKI) and the gentleman from Texas (Mr. PICKLE), and thank them once again for bringing this bill to the floor of the House today. Last week, before the conference, I spoke in favor of the changes made in the disability program as a result of this legislation. Today, with the prospect of passage imminent, I want to again say that I strongly support this legislation.

As my colleagues know, it contains several important provisions. First, it provides the Secretary of the Department of Health and Human Services wide discretion to slow down the disability reviews process that has caused untold harm to thousands of Americans. Second, it provides benefit payments through a hearing by an administrative law judge for persons terminated before October 1 of next year. It also makes changes in the pension offset for spouses of Government employees, extending for 7 months the effective date of the offset.

Overall, this is good, balanced legislation, and no one should have trouble supporting it. All of us are aware of the problems that have come about because of the reviews process, and this bill goes a long way toward a short-term solution to that problem. Next year, in a new Congress, we will be able to work toward a bipartisan solution for once and for all. I look forward to working with my friends on

the Ways and Means Committee at that time.

Thank you, Mr. Speaker.

Mr. PEPPER. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Florida.

Mr. PEPPER. Mr. Speaker, the able gentleman from Texas (Mr. PICKLE) has been dealing with a very, very serious problem in the country. I am sure that most of the Members of the House have had complaints about the tragedy of how so many disabled people have been treated under the present law.

What I propose to do is to commend the able gentleman from Texas on what he has done. He has restored hope and perhaps life to many of these disabled people, and I just want to commend him for that and hope that he will continue his good efforts until this whole system is very much improved and there will be justice for the disabled people of the country.

Mr. PICKLE. Mr. Speaker, I thank the gentleman from Florida (Mr. PEPPER). That is a very kind thing to say.

Mr. OBERSTAR. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Speaker, I want to commend the gentleman from Texas (Mr. PICKLE) on the tremendous work he has done both in correcting the disability inequities, as he has done in this legislation, and especially on the spouse offset. I know that this was not all the gentleman hoped to accomplish, but it was far more than what he could have expected to achieve at the outset of bringing this legislation to the floor. I am delighted at what the gentleman has done.

Mr. PICKLE. Mr. Speaker, the gentleman from Minnesota (Mr. OBERSTAR) made a definite contribution to this legislation. He made a suggestion that we initially passed in this House. We went to a different alternative because that was all we could get from the other body, but if the gentleman had not made his suggestion in the first instance, we might not have achieved this improvement at all.

So I commend the gentleman for that.

● Mr. CORRADA. Mr. Speaker, I commend the gentleman from Texas (Mr. PICKLE) for his diligence in working with the matter addressed in H.R. 7093. This is certainly a step in the right direction in providing some relief to disabled individuals under the Social Security Act whose disability payments are terminated at times arbitrarily. The changes in procedure provided in this bill, as agreed to by the conferees, are fair and needed and will allow many of the beneficiaries of disability payments to retain their benefits while their cases are appealed. I urge passage of the conference report.●

● Mr. JEFFORDS. Mr. Speaker, I would like to once again thank the gentleman from Texas for working so diligently on the issue of disability.

In the State of Vermont we have had a number of instances where people who wanted to work—but could not—were removed from the disability roles because the Social Security Administration decided that they could work. In many of these cases the result of being dropped from the disability roles was tragic, and contributed to the death of disability recipients in a few instances. I can see no justification for this, and commend my colleague for the apparent strong support we have for this measure.

In all likelihood we will have to address the disability issue again this coming spring. I hope that we respond to the greater challenge then as well as we will on this night.

When this measure came up a few days ago, I said my piece on why it should be supported. I will not discuss it in detail again tonight. I would, however, like to point out that the provisions in this bill look toward solving all of the major problems we have in the continued review of disability cases.

Again, I commend the gentleman from Texas, and all of the other Members who have worked on this measure.●

Mr. ROSTENKOWSKI. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on the conference report.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 259, not voting 174, as follows:

□ 1940

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendments of the House to the amendments of the Senate with amendments to a bill of the House of the following title:

H.R. 3420. An act to authorize appropriations for fiscal year 1982 for carrying out the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes.

PIPELINE SAFETY AUTHORIZATION ACT OF 1981

Mr. FLORIO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3420), to authorize appropriations for fiscal year 1982 for carrying out the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes, with Senate amendments to the House amendment to the Senate amendments and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

In lieu of the matter proposed to be inserted by the House engrossed amendment to the Senate engrossed amendment to the text of H.R. 3420, insert the following:

That titles II through VII of this Act may be cited as the "Rail Safety and Service Improvement Act of 1982".

TITLE I—NATURAL GAS PIPELINE SAFETY

SEC. 101. Section 4(b) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1673(b)) and section 204(b) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. 2003(b)) are each amended by striking "once every 6 months." and substituting "twice each calendar year.".

SEC. 102. Section 8(a) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1675(a)) is amended by striking "sixtieth day" and substituting "90th day".

SEC. 103. Section 206(a) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. 2005(a)) is amended by striking "60th day" and substituting "90th day".

SEC. 104. Section 5(a) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1674(a)) is amended by striking "(other than subsection (a)(3) thereof)" and substituting "(other than subsection (a)(2) thereof)".

TITLE II—BANKRUPT RAILROADS

SHORT TITLE

SEC. 201. This title may be referred to as the "Bankrupt Railroad Service Preservation and Employee Protection Act of 1982".

Subtitle A—Service Preservation

PURPOSE

SEC. 211. It is the purpose of this subtitle to continue the effort by Congress to assure service over the lines of rail carriers subject to liquidation in instances where rail carriers are willing to provide service over such lines and financially responsible persons are willing to purchase the lines for continued rail operations.

FINDINGS

SEC. 212. The Congress finds that—

(1) it is necessary to establish procedures to facilitate and expedite the acquisition of rail lines of carriers subject to liquidation by financially responsible persons in instances where service is not being provided over the line by the carrier and where the financially responsible person seeks to provide rail service over the line;

(2) procedures set forth in the amendments made by this title represent an exercise of the powers of the Congress under the Constitution of regulate commerce among the several States which will provide a practicable means for preserving rail service, thus benefiting shippers, employees, and the economies of the States in which such carriers subject to liquidation have operated service, and for facilitating interstate commerce, while at the same time providing safeguards to protect the interest of the estates of such carriers by requiring compensation which is not less than the constitutionally required minimum; and

(3) it is in the public interest that the Interstate Commerce Commission's authority to issue orders involving temporary authority to operate service over lines of carriers subject to liquidation be clarified.

AMENDMENTS TO THE MILWAUKEE RAILROAD RESTRUCTURING ACT

SEC. 213. Section 17(b) of the Milwaukee Railroad Restructuring Act (45 U.S.C. 915(b)) is amended—

(1) by redesignating paragraph (3) as paragraph (4); and

(2) by inserting after paragraph (2) the following new paragraph:

"(3)(A) If a person has made or makes an offer to acquire from a carrier subject to liquidation a rail line or lines over which no service is provided by that carrier, and that offer has been or is rejected by the trustee in bankruptcy of such carrier, such person may submit an application to the Commission seeking approval of such person's acquisition of such line or lines. A copy of any such application shall be filed simultaneously with the court.

"(B) The Commission shall, within 15 days after the filing of an application under subparagraph (A) of this paragraph, determine whether the applicant—

"(i) is a financially responsible person; and

"(ii) has made a bona fide offer to acquire the line or lines under reasonable terms.

"(C)(i) If the Commission's determination under subparagraph (B) of this paragraph is affirmative with respect to the matters referred to in clauses (i) and (ii) of such subparagraph, the applicant and the trustee in bankruptcy (hereafter in this paragraph referred to collectively as the 'parties') shall enter into negotiations with respect to terms for the acquisition of the line or lines applied for. If the parties at any time agree on such terms, a request for approval of the acquisition shall be filed with the Commission and the court. If the parties are unable to agree to such terms within 30 days after the date of the Commission's determination under subparagraph (B) of this paragraph, either party may, within 60 days after the expiration of such 30-day period, request the Commission to prescribe terms for such acquisition, including compensation for the line or lines to be acquired. The Commission shall prescribe such terms within 60 days after any such request is made. The terms prescribed by the Commission shall be binding upon both parties, subject to court review as provided in subparagraph (D) of this paragraph, except that the applicant may withdraw its offer within 10 days after the Commission prescribes such terms.

"(ii) If more than one applicant has requested under this subparagraph that the Commission prescribe the terms of acquisition for the same or overlapping lines or portions of such lines, the Commission shall prescribe terms for such acquisition which it determines best serve the public interest.

"(D)(i) Within 15 days after the Commission prescribes terms under subparagraph (C) of this paragraph, the Commission shall transmit such terms to the court, unless the offer is withdrawn under such subparagraph. Notwithstanding any other provision of law, the court shall, within 60 days after such transmittal, approve the acquisition under terms prescribed by the Commission if the compensation for the line or lines is not less than that required as a constitutional minimum.

"(ii) Except as provided in this subparagraph, no action shall be taken by the court which would prejudice the acquisition which is the subject of an application under this paragraph.

"(E) The Commission shall require that any person acquiring a line or lines under this paragraph use, to the maximum extent practicable, employees or former employees of the carrier subject to liquidation in the operation of service on such line or lines.

"(F) No person acquiring a line under this paragraph may transfer or discontinue service on such line prior to the expiration of 4 years after such acquisition.

"(G) The Commission shall, within 45 days after the date of enactment of the Bankrupt Railroad Service Preservation and Employee Protection Act of 1982, prescribe such regulations and procedures as are necessary to carry out the provisions of this paragraph.

"(H) As used in this paragraph, the term—

"(i) 'carrier subject to liquidation' means a carrier which, on the date of enactment of the Bankrupt Railroad Service Preservation and Employee Protection Act of 1982, was the subject of a proceeding pending under section 77 of the Bankruptcy Act or under subchapter IV of chapter 11 of title 11, United States Code, and which has been ordered by the court to liquidate its properties;

"(ii) 'the court' means the court having bankruptcy jurisdiction over the carrier subject to liquidation; and

"(iii) 'financially responsible person' means a person capable of compensating the carrier subject to liquidation for the acquisition of the line or lines proposed to be acquired and able to cover expenses associated with providing service over such line or lines for a period of not less than 4 years.".

INTERSTATE COMMERCE COMMISSION AUTHORITY

SEC. 214. (a) Section 122(a) of the Rock Island Railroad Transition and Employee Assistance Act (45 U.S.C. 1017(a)) is amended—

(1) by striking "the Rock Island Railroad or the Milwaukee Railroad" and inserting in lieu thereof the following: "a carrier which, on the date of enactment of the Bankrupt Railroad Service Preservation and Employee Protection Act of 1982, was the subject of a proceeding pending under section 77 of the Bankruptcy Act or under subchapter IV of chapter 11 of title 11, United States Code";

(2) by striking the last sentence of such section; and

(3) by adding at the end thereof the following: "The Commission shall have authority to authorize continued rail service under this section over the lines of any such carrier which has been ordered by the court having jurisdiction over such a carrier to liquidate its properties until the disposition of the properties of the estate of such carrier.".

(b) Section 122(c) of the Rock Island Railroad Transition and Employee Assistance Act (45 U.S.C. 1017(c)) is repealed.

Subtitle B—Employee Protection

EMPLOYEE PROTECTION AGREEMENT

SEC. 231. Section 106 of the Rock Island Railroad Transition and Employee Assistance Act (45 U.S.C. 1005) is amended to read as follows:

"EMPLOYEE PROTECTION AGREEMENT

"SEC. 106. (a) The Secretary and the representatives of the various classes and crafts of employees of the Rock Island Railroad shall, not later than 90 days after the date of enactment of the Bankrupt Railroad Service Preservation and Employee Protection Act of 1982, enter into an agreement providing protection for employees of the Rock Island Railroad who are adversely affected as a result of a reduction in service by such Railroad. Such agreement may provide for the use of funds described in subsection (c) of this section for the following purposes:

"(1) Subsistence allowances to employees.

"(2) Moving expenses for employees who must make a change in residence.

"(3) Retraining expenses for employees who are seeking employment in new areas.

"(4) Separation allowances for employees.

"(5) Health and welfare insurance premiums.

"(6) Such other purposes as may be agreed upon by the parties.

"(b) If the parties are unable to reach agreement within the time period specified in subsection (a) of this section, the Secretary shall, within 30 days after the expiration of such time period, prescribe a schedule of benefits for employee protection not inconsistent with the provisions of this Act.

"(c) Any agreement entered into under subsection (a) of this section, and any benefit schedule prescribed under subsection (b) of this section, shall not require the expenditure of funds in excess of amounts authorized to be appropriated under section 217(f)(1)(C) of the Regional Rail Reorganization Act of 1973, nor shall any individual employee receive benefits in excess of $20,000 under such agreement or benefit schedule. No benefits or assistance may be provided under any agreement entered into or benefit schedule prescribed under this section after April 1, 1984.

"(d) The Board shall, in such manner as it shall prescribe by regulation, administer the distribution of funds under any agreement entered into or benefit schedule prescribed under this section, and shall determine the amount for which each employee is eligible under such agreement or benefit schedule. Such regulation shall include procedures to resolve by final and binding arbitration any dispute over an employee's eligibility or claim.".

ELECTION

SEC. 232. Section 108 of the Rock Island Railroad Transition and Employee Assistance Act (45 U.S.C. 1007) is amended—

(1) in subsections (a) and (d), by striking "or arrangement entered into" and inserting in lieu thereof "entered into or benefit schedule prescribed"; and

(2) in subsection (b), by striking "April 1, 1981" and inserting in lieu thereof "120 days after the effective date of any agreement entered into under section 106(a) of this title or of any benefit schedule prescribed under section 106(b) of this title, as the case may be".

NEW CAREER TRAINING ASSISTANCE

SEC. 233. Section 119(a) of the Rock Island Railroad Transition and Employee Assistance Act (45 U.S.C. 1014(a)) is amended by striking "from the Rock Island Railroad under an employee protection agreement or arrangement entered into under section 106 of this title may" and inserting in lieu thereof "under an employee protection agreement entered into or a benefit schedule prescribed under section 106 of this title may, if so provided under such agreement or benefit schedule,".

REPEALS

SEC. 234. (a) Section 110 of the Rock Island Railroad Transition and Employee Assistance Act (45 U.S.C. 1008) is repealed.

(b) The second sentence of section 14(b) of the Milwaukee Railroad Restructuring Act (45 U.S.C. 913(b)) is repealed.

DISPUTE RESOLUTION

SEC. 235. (a) Section 704(f) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 797(c)) is amended by striking "3-year" and inserting in lieu thereof "4-year".

(b) Section 704(g) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 797(g)) is amended by striking "this section or section 703 of this Act" wherever it appears and inserting in lieu thereof "this section, section 703 of this Act, section 8 of the Milwaukee Railroad Restructuring Act (45 U.S.C. 907), or section 105 of the Rock Island Railroad Transition and Employee Assistance Act (45 U.S.C. 1004)".

RAILROAD HIRING

SEC. 236. (a) Section 8 of the Milwaukee Railroad Restructuring Act (45 U.S.C. 907) is amended by striking "April 1, 1981," and inserting in lieu thereof "April 1, 1984,".

(b) Section 105(a) of the Rock Island Railroad Transition and Employee Assistance Act (45 U.S.C. 1004(a)) is amended by striking "January 1, 1981," and inserting in lieu thereof "January 1, 1984,".

TITLE III—NORTHEAST CORRIDOR

AMENDMENTS

SEC. 301. Title VII of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 851 et seq.) is amended as follows:

(1) Section 703(1)(A)(ii) is amended by striking "and Albany, New York" and inserting in lieu thereof "Albany, New York, and Atlantic City, New Jersey".

(2) Section 704(a)(1) is amended to read as follows:

"(1) $2,313,000,000 to remain available until expended (A) in order to effectuate the goals of section 703(1)(A)(i) of this title, of which not less than $27,000,000 shall be available to finance the cost of the equipment modification and replacement which States (or local or regional transportation authorities) will be required to bear as a result of the electrification conversion system of the Northeast Corridor pursuant to this title; (B) of which, if the National Railroad Passenger Corporation receives notification on or before June 1, 1983, from the State of New Jersey that such State has approved a plan, developed in consultation with the National Railroad Passenger Corporation, for the operation of rail passenger service between the main line of the Northeast Corridor and Atlantic City, New Jersey, and if such Corporation determines that such plan is feasible, $30,000,000 shall be made available by the Secretary to the National Railroad Passenger Corporation for rehabilitation and other improvements (including upgrading track and the signal system, ensuring safety at public and private highway and pedestrian crossings by improving signals or eliminating such crossings, and the improvement of operational portions of stations related to intercity rail passenger service) on the main line track between such points, consistent with the plan for operation approved by the State, in order to ensure that such track will be of sufficient quality to permit safe rail passenger service at a minimum of 79 miles per hour not later than September 30, 1985, and to promote rail passenger use of such track; and (C) of which such sums as may be required shall be available for the following projects with respect to the main line of the Northeast Corridor: development of the Union Station in Washington, District of Columbia; installation of 189 track miles of concrete ties with continuously welded rail between Washington, District of Columbia, and New York, New York; renewal of 133 track miles of existing continuously welded rail on concrete tie track between Washington, District of Columbia, and New York, New York; installation of reverse signaling between Philadelphia, Pennsylvania, and Morrisville, Pennsylvania, on numbers 2 and 3 tracks; restoration of ditch drainage in concrete tie locations between Washington, District of Columbia, and New York, New York; undercutting of 83 track miles between Washington, District of Columbia, and New York, New York; rehabilitation of bridges between Washington, District of Columbia, and New York, New York (including Hi line); development of a maintenance-of-way equipment repair facility between Washington, District of Columbia, and New York, New York; roadbed stabilization at various locations between Washington, District of Columbia, and New York, New York; automation of Bush River Drawbridge at milepost 72.14; improvements to the New York Service Facility to develop rolling stock repair capability; construction of maintenance-of-way bases at Philadelphia, Pennsylvania, Sunnyside, New York, and Cedar Hill, Connecticut; installation of rail car washer facility at Philadelphia, Pennsylvania; restoration of storage tracks and buildings at the Washington Service Facility; installation of centralized traffic control from Landlith, Delaware, to Philadelphia, Pennsylvania; track improvements including high speed surfacing, ballast cleaning, and associated equipment repair and material distribution; rehabilitation of interlockings between Washington, District of Columbia, and New York, New York; painting of Connecticut River, Groton, and Pelham Bay bridges; additional catenary renewal and

power supply upgrading between Washington, District of Columbia, and New York, New York; rehabilitation of structural, electrical, and mechanical systems at the 30th Street Station in Philadelphia, Pennsylvania; and installation of evacuation and fire protection facilities in tunnels at New York, New York;".

(3) Section 704(a) is amended by adding at the end thereof the following new sentences: "Funds are authorized to be appropriated under this section in excess of limitations imposed under the preceding sentence with respect to a fiscal year, or for fiscal years after the fiscal year ending September 30, 1983, to the extent that the amount appropriated under the authority of this section for any previous fiscal year is less than the limitation under such sentence with respect to such previous fiscal year. The Secretary shall expend or reserve for expenditure funds from the yearly appropriations under this section for the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985, first (A) if the National Railroad Passenger Corporation receives the notification referred to in paragraph (1)(B) of this subsection, for the purposes under such paragraph; and (B) in the amount of $62,000,000 for track improvements with respect to the Southwest corridor project in Boston, Massachusetts, less any amounts obligated for such purpose from yearly appropriations for any fiscal year ending before October 1, 1982. The amount so expended or reserved for expenditure for the purposes of paragraph (1)(B) of this subsection for the fiscal year ending September 30, 1983 shall be $10,000,000.".

(4) Section 704(b) is amended—

(A) by striking "LIMITATION.—" and inserting in lieu thereof "LIMITATIONS.—(1)"; and

(B) by adding at the end thereof the following:

"(2)(A) The projects for which funds are authorized to be appropriated under subsection (a)(1)(C) of this section shall be a part of the Northeast Corridor improvement project, and the goals of this title shall not be considered to be fulfilled until such projects are completed. Such projects shall not be undertaken or viewed as a substitute for any improvements specified in the document entitled Corridor Master Plan II, NECIP Restructured Program, dated January 1982, prepared for the United States Department of Transportation, Federal Railroad Administration, Northeast Corridor Improvement Project, in cooperation with the Federal Railroad Administration and the National Railroad Passenger Corporation (Amtrak), by DeLeuw, Cather/Parsons, NECIP architect/engineer.

"(B) For purposes of implementing the improvements and rehabilitation described in subsection (a)(1)(3) of this section, the Secretary may defer projects identified in the document referred to in subparagraph (A) of this paragraph. The aggregate cost of such projects as the Secretary may so defer shall not be substantially greater than the amount the Secretary is required to expend or reserve for expenditure for purposes of subsection (a)(1)(3) of this section.".

(5) Section 705 is amended—

(A) in subsection (a), by striking "the" after "reallocation to" and inserting in lieu thereof "such"; and

(B) in subsection (b), by inserting "National Railroad Passenger" immediately before "Corporation".

NEW SERVICE

SEC. 302. (a) If the National Railroad Passenger Corporation receives notification on or before June 1, 1983, from the State of New York that such State has approved a plan, developed in consultation with such Corporation, for the acquisition and rehabilitation of a line and construction necessary to facilitate improved rail passenger service between Spuyten Duyvil, New York, and the main line of the Northeast Corridor, and has approved a plan, developed in consultation with such Corporation and appropriate local governmental officials, for the rehabilitation of the Amtrak station at Syracuse, New York, such Corporation shall, by September 30, 1985, expend funds, not in excess of $30,000,000, authorized to be appropriated under section 601 of the Rail Passenger Service Act (45 U.S.C. 601) for such purposes.

(b) Notwithstanding the provisions of section 403 of the Rail Passenger Service Act (45 U.S.C. 563), the National Railroad Passenger Corporation may operate the service described in secion 704(a)(1)(B) of the Railroad Revitalization and Regulatory Reform Act of 1976.

(c) Section 601 of the Rail Passenger Service Act (45 U.S.C. 601) is amended by adding at the end thereof the following new subsection:

"(e) Funds from the yearly appropriations under this section for the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985 shall, if the Corporation receives the notification referred to in section 302(a) of the Rail Safety and Service Improvement Act of 1982, be first expended or reserved for expenditure by the Corporation for the purposes under such section 302(a). The amount expended or reserved for expenditure for such purposes for the fiscal year ending September 30, 1983 shall be $10,000,000.".

TITLE IV—RAILROAD FINANCING

EXTENSION

SEC. 401. Sections 505(e), 507(a), 507(d), and 509(a) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 825(e), 827(a), 827(d), and 829(a)) are amended by striking "September 30, 1982" wherever it appears and inserting in lieu thereof "September 30, 1985".

TRANSACTION ASSISTANCE

SEC. 402. Notwithstanding any other provision of law, any financially responsible person (including any government authority), except for a class I rail carrier, shall upon application be eligible for financial assistance made available in section 505 of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 825) for the purchase, lease, or rehabilitation of rail lines of the Consolidated Rail Corporation which are to be used for common carrier rail service and with respect to which an application for a certificate of abandonment has been filed with the Interstate Commerce Commission under section 308(a) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 748(a)), or a notice of insufficient revenues has been filed with the Commission under section 308(c) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 748(c)).

AUTHORIZATION FOR RAIL FUND

SEC. 403. (a) Section 509(b) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 829(b)) is amended—

(1) in paragraph (2), by striking "Not less than" and inserting in lieu thereof "Not more than";

(2) by striking paragraph (3);

(3) by redesignating paragraph (4) as paragraph (3);

(4) in paragraph (3), as redesignated by paragraph (3) of this section—

(A) by striking ", (2) and (3)" and inserting in lieu thereof "and (2)"; and

(B) by inserting ", and not more than $55,000,000 are authorized to be appropriated for fiscal years 1983, 1984 and 1985" immediately before the period; and

(5) by adding at the end thereof the following new paragraphs:

"(4) $40,000,000 of the funds received by the Secretary of the Treasury from amounts appropriated under subsection (a) of this section shall be reserved and made available for meritorious applications regarding that restructuring of rail freight facilities and systems specified in section 505(b)(2)(ii) of this title.

"(5) $15,000,000 of the funds appropriated under subsection (a) of this section shall be available for the purchase, or for the refinancing of the purchase, of the rail line of the Chicago, Rock Island and Pacific Railroad Company between Fort Worth and Dallas, Texas, or of interests in such rail line, by a State or one or more political subdivisions thereof. To the extent that funds are made available for such purposes through appropriations for any Administration of the Department of Transportation, other than the Federal Railroad Administration, the amount of funds authorized under this section shall be reduced accordingly.".

(b) Section 505(b)(2) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 825(b)(2)) is amended—

(1) by inserting "(i) immediately after "priorities"; and

(2) by inserting "(ii) immediately after "in the private sector and".

TITLE V—MISCELLANEOUS PROVISIONS

LOCAL RAIL SERVICE

SEC. 501. Section 5(h)(2)(A) of the Department of Transportation Act (49 U.S.C. 1654(h)(2)(A)) is amended to read as follows:

"(A) two-thirds of the available funds, multiplied by a fraction the numerator of which is the sum of (i) total rail mileage in the State, other than rail mileage of the Consolidated Rail Corporation, which, in accordance with section 10904(e) of title 49, United States Code, either is 'potentially subject to abandonment' or with respect to which a carrier plans to file, or has filed, an application for a certificate under subsection (a) of such section, and (ii) the total rail mileage of the Consolidated Rail Corporation in the State which such Corporation has certified to be in a situation comparable to 'potentially subject to abandonment' within the meaning of such term under such section 10904 or with respect to which the Consolidated Rail Corporation plans to file, or has filed, an application for a certificate under section 308 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 748) or under section 10904(a) of title 49, United States Code, and the denominator of which is the total of the rail mileage described in clauses (i) and (ii) in all the States; and".

CONTRACT RATES

SEC. 502. Section 10713(k)(1) of title 49, United States Code, is amended by striking "and paper)" and inserting in lieu thereof ", but not including wood pulp, wood chips, pulpwood or paper)'.

BURNHAM CANAL

SEC. 503. The portion of the Burnham Canal, in Milwaukee, Wisconsin, which is underneath and west of a point one hundred feet east of South Eleventh Street is declared to be not a navigable water of the United States within the meaning of the Constitution and laws of the United States. The right to alter, amend, or repeal this section is hereby expressly reserved.

COMMUTER TRANSITION FUNDING

SEC. 504. (a) Section 1139(b) of the Northeast Rail Service Act of 1981 is amended—

(1) by inserting "(1)"immediately after "(b)";

(2) by striking "in the fiscal year ending September 30, 1982,";

(3) by striking "contracting with Amtrak Commuter"; and

(4) by adding at the end thereof the following new paragraph:

"(2) Any funds appropriated under the authority of this subsection shall be distributed by the Secretary to Amtrak Commuter and commuter authorities according to the statutory provisions of paragraph (1) of this subsection within 60 days after receipt of an application by Amtrak Commuter or such commuter authorities or within 60 days after the date of enactment of the Rail Safety and Service Improvement Act of 1982, whichever is later.".

(b) Section 216(g) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 726(g)) is amended—

(1) by inserting "(1)" immediately after "APPROPRIATION.—"; and

(2) by adding at the end thereof the following new paragraph:

"(2) To the extent provided in appropriation Acts, any funds appropriated under the authority of paragraph (1) of this subsection prior to the date of enactment of the Rail Safety and Service Improvement Act of 1982 may be reappropriated to the Secretary, to facilitate the transfer of rail commuter services from the Corporation to other operators, for distribution under the statutory provisions of section 1139(b) of the Northeast Rail Service Act of 1981.".

(c)(1) Section 217(a) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 727(a)) is amended by striking "$262,000,000" and inserting in lieu thereof "$137,000,000".

(2) Section 217(f) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 727(f)) is amended to read as follows:

"(f) AUTHORIZATION OF APPROPRIATIONS.—(1) There is authorized to be appropriated not to exceed $262,000,000—

"(A) of which not to exceed $137,000,000 shall be appropriated to the Association for purposes of purchasing securities and accounts receivable of the Corporation under this section, such sums to remain available until the Secretary transfers the Corporation under title IV of this Act;

"(B) of which not to exceed $75,000,000 shall be appropriated to the Secretary, to facilitate the transfer of rail commuter services from the Corporation to other operators, for distribution under the statutory provisions of section 1139(b) of the Northeast Rail Service Act of 1981;

"(C) of which not to exceed $35,000,000 shall be appropriated to the Secretary to be allocated for employee protection under section 106 of the Rock Island Railroad Transition and Employee Assistance Act (45 U.S.C. 1005); and

"(D) of which not to exceed $15,000,000 shall be appropriated to the Secretary to facilitate the transfer of rail commuter services from railroads that entered reorganization after calendar year 1974 to any commuter authority that was providing commuter service, operated by a railroad that entered reorganization after calendar year 1974, as of January 1, 1979.

"(2) All sums received on account of the holding or disposition of any securities or accounts receivable referred to in paragraph (1)(A) of this subsection shall be deposited in the general fund of the Treasury.

"(3) The amount authorized to be appropriated under paragraph (1)(B) of this subsection shall be reduced, in an amount equal to any amounts reappropriated under the authority of section 216(g)(2) of this Act, upon the date of enactment of any Act which reappropriates such amounts.".

INTERCITY PASSENGER SERVICE EMPLOYEE PROTECTION

SEC. 505. (a) Section 1165 of the Northeast Rail Service Act of 1981 is amended—

(1) by inserting "(a)" immediately after "Sec. 1165."; and

(2) by adding at the end thereof the following new subsection:

"(b) Conrail employees who are deprived of employment by an assumption or discontinuance of intercity passenger service by Amtrak shall be eligible for employee protection benefits under section 701 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 797), notwithstanding any other provision of law, agreement, or arrangement, and notwithstanding the inability of such employees otherwise to meet the eligibility requirements of such section. Such protection shall be the exclusive protection applicable to Conrail employees deprived of employment or adversely affected by any such assumption or discontinuance.".

RAILROAD DEVELOPMENT CRITERIA

SEC. 506. (a) Section 10910(b)(1)(A)(ii) of title 49, United States Code, is amended by striking "has been placed" and inserting in lieu thereof "is", and by inserting "before an application to purchase such line, or any required preliminary filing with respect to such application, is filed under this section" immediately after "10903 and 10904 of this title".

(b) The amendment made by subsection (a) of this section shall be effective with respect to any application or preliminary filing with respect to which the Commission has made no final decision before May 1, 1982, except that such amendment shall not affect any line which has been removed from the carrier's system diagram map before the date of enactment of this Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 507. There is authorized to be appropriated to the Secretary of Transportation $15,600,000 for the fiscal year ending September 30, 1983, for the Office of the Administrator of the Federal Railroad Administration, of which not to exceed $9,200,000 shall be used for executive direction and administration and not to exceed $6,400,000 shall be used for policy support.

NORTHEAST CORRIDOR COORDINATION

SEC. 508. Section 505 of the Rail Passenger Service Act (45 U.S.C. 585) is amended—

(1) by striking "Board of Directors of Amtrak Commuter" both places it appears and inserting in lieu thereof "Northeast Corridor Coordination Board"; and

(2) by adding at the end thereof the following new subsection:

"(c) The Northeast Corridor Coordination Board shall consist of (1) one member from each commuter authority, within the meaning of such term under section 1135(a)(3) of the Northeast Rail Service Act of 1981 (45 U.S.C. 1104(a)(3)), which operates or contracts for the operation of rail commuter service over the main line of the Northeast Corridor; (2) two members to be named by Amtrak; and (3) one member to be named by the Consolidated Rail Corporation.".

APPLICABILITY OF LAWS

SEC. 509. Title V of the Rail Passenger Service Act (45 U.S.C. 581 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 511. APPLICABILITY OF LAWS.

"Any commuter authority operating commuter service under this title shall be subject to applicable laws with respect to such service, including, but not limited to, the Railway Labor Act (45 U.S.C. 151 et seq.), the Railroad Retirement Act of 1974 (45 U.S.C. 231 et seq.), the Railroad Retirement Tax Act (26 U.S.C. 3201 et seq.), and the Railroad Unemployment Insurance Act (45 U.S.C. 351 et seq.).".

COMMISSION PROCEEDINGS

SEC. 510. Section 1164(c) of the Northeast Rail Service Act of 1981 (45 U.S.C. 1112(c)) is amended—

(1) in paragraph (1)—

(A) by striking "bankruptcy, substantial sale," and inserting in lieu thereof "bankruptcy or substantial sale"; and

(B) by amending the last sentence to read as follows: "The Secretary may substitute for the evidence of such debt contingency notes payable solely from the railroad operating assets then securing such debt, including reinvestments thereof, or such other contingency notes as the Secretary deems appropriate and which conform to the terms set forth in this subsection."; (2) by amending paragraph (2) to read as follows:

"(2) If the interest of the United States is limited under paragraph (1), any new debt issued by such a railroad subsequent to the issuance of the debt described in paragraph (1) may have such higher priority in the event of bankruptcy, liquidation, or abandonment of the assets of such a railroad than the debt described in such paragraph as the Secretary and the railroad may agree."; and

(3) by adding at the end thereof the following new paragraph:

"(3) In carrying out the duties under this subsection, the Secretary may (A) enter into such agreements, (B) in accordance with any such agreements, cancel or cause to be cancelled or amend or cause to be amended any notes or securities currently held by agencies or instrumentalities of the United States, and (C) accept in exchange as substitution therefor such instruments evidencing the indebtedness owed to such agencies or instrumentalities as, in the Secretary's judgment, will effectuate the purposes of this subsection.".

FEEDER LINE TRANSFER

SEC. 511. (a) Notwithstanding any other provision of law, the Secretary of Transportation shall provide Federal financial assistance, in accordance with the provisions of this section, for the acquisition and rehabilitation (including related new construction of sidings and connecting tracks) of the feeder line which the Illinois Central Gulf Railroad has abandoned extending between Milepost 72 near Herscher, Illinois and Milepost 135 near Barnes, Illinois (known as the "Bloomer Line").

(b) In carrying out this section, the Secretary shall provide assistance to a qualified applicant in an amount not to exceed 90 percent of the acquisition costs and 80 percent of the rehabilitation costs associated with the redevelopment of the feeder line. Any qualified applicant may provide the non-Federal share of the costs of such project.

(c) If an application is filed with the Secretary which is supported by a preponderance of the rail service users on the feeder line or segment of such line for which such an application is filed, the Secretary shall act expeditiously on such application. If the Secretary denies an application filed under this section, the Secretary must provide to the applicant a contemporaneous statement of reasons for the denial and a list of the specific amendments to the application which, if made, would cause the Secretary to approve such application.

(d) If the entity purchasing the line described in subsection (a) of this section petitions the Interstate Commerce Commission for joint rates applicable to traffic moving over through routes in which the purchasing carrier may practically participate, the Commission shall, within 30 days after the date such petition is filed and pursuant to section 10705(a) of title 49, United States Code, require the establishment of reasonable joint rates and divisions over such route.

(e) There is authorized to be appropriated $3,000,000 to carry out this section.

(f) As used in this section, the term "qualified applicant" means—

(1) a State or local governmental entity;

(2) a person who is able to assure that adequate transportation will be provided over a substantial portion of the feeder line described in subsection (a) of this section for a period of not less than 3 years; or

(3) any combination of members of the classes of applicants described in paragraphs (1) and (2) of this subsection.

TITLE VI—ALASKA RAILROAD TRANSFER

SHORT TITLE

SEC. 601. This title may be cited as the "Alaska Railroad Transfer Act of 1982".

FINDINGS

SEC. 602. The Congress finds that—

(1) the Alaska Railroad, which was built by the Federal Government to serve the transportation and development needs of the Territory of Alaska, presently is providing freight and passenger services that primarily benefit residents and businesses in the State of Alaska;

(2) many communities and individuals in Alaska are wholly or substantially dependent on the Alaska Railroad for freight and passenger service and provision of such service is an essential governmental function;

(3) continuation of services of the Alaska Railroad and the opportunity for future expansion of those services are necessary to achieve Federal, State and private objectives; however, continued Federal control and financial support are no longer necessary to accomplish these objectives;

(4) the transfer of the Alaska Railroad and provision for its operation by the State in the manner contemplated by this title is made pursuant to the Federal goal and ongoing program of transferring appropriate activities to the States;

(5) the State's continued operation of the Alaska Railroad following the transfer contemplated by this title, together with such expansion of the railroad as may be necessary or convenient in the future, will constitute an appropriate public use of the rail system and associated properties, will provide an essential governmental service, and will promote the general welfare of Alaska's residents and visitors; and

(6) in order to give the State government the ability to determine the Alaska Railroad's role in serving the State's transportation needs in the future, including the opportunity to extend rail service, and to provide a savings to the Federal Government, the Federal Government should offer to transfer the railroad to the State, in accordance with the provisions of this title, in the same manner in which other Federal transportation functions (including highways and airports) have been transferred since Alaska became a State in 1959.

DEFINITIONS

SEC. 603. As used in this title, the term—

(1) "Alaska Railroad" means the agency of the United States Government that is operated by the Department of Transportation as a rail carrier in Alaska under authority of the Act of March 12, 1914 (43 U.S.C. 975 et seq.) (popularly referred to as the "Alaska Railroad Act") and section 6(i) of the Department of Transportation Act (49 U.S.C. 1655(i)), or, as the context requires, the railroad operated by that agency;

(2) "Alaska Railroad Revolving Fund" means the public enterprise fund maintained by the Department of the Treasury into which revenues of the Alaska Railroad and appropriations for the Alaska Railroad are deposited, and from which funds are expended for Alaska Railroad operation, maintenance and construction work authorized by law;

(3) "claim of valid existing rights" means any claim to the rail properties of the Alaska Railroad on record in the Department of the Interior as of the day before the date of enactment of this Act;

(4) "date of transfer" means the date on which the Secretary delivers to the State the four documents referred to in section 604(b)(1) of this title;

(5) "employees" means all permanent personnel employed by the Alaska Railroad on the date of transfer, including the officers of the Alaska Railroad, unless otherwise indicated in this title;

(6) "exclusive-use easement" means an easement which affords to the easement holder the following:

(A) the exclusive right to use, possess, and enjoy the surface estate of the land subject to this easement for transportation, communication, and transmission purposes and for support functions associated with such purposes;

(B) the right to use so much of the subsurface estate of the lands subject to this easement as is necessary for the transportation, communication, and transmission purposes and assocated support functions for which the surface of such lands is used;

(C) subjacent and lateral support of the lands subject to the easement; and

(D) the right (in the easement holder's discretion) to fence all or part of the lands subject to this easement and to affix track, fixtures, and structures to such lands and to exclude other persons from all or part of such lands;

(7) "Native Corporation" has the same meaning as such term has under section 102(6) of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3102(6));

(8) "officers of the Alaska Railroad" means the employees occupying the following positions at the Alaska Railroad as of the day before the date of transfer: General Manager; Assistant General Manager; Assistant to the General Manager; Chief of Administration; and Chief Counsel;

(9) "public lands" has the same meaning as such term has under section 3(e) of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(e));

(10) "rail properties of the Alaska Railroad" means all right, title, and interest of the United States to lands, buildings, facilities, machinery, equipment, supplies, records, rolling stock, trade names, accounts receivable, goodwill, and other real and personal property, both tangible and intangible, in which there is an interest reserved, withdrawn, appropriated, owned, administered or otherwise held or validly claimed for the Alaska Railroad by the United States or any agency or instrumentality thereof as of the date of enactment of this Act, but excluding any auch properties disposed of, and including any such properties acquired, in the ordinary course of business after that date but before the date of transfer, and also including the exclusive-use easement within the Denali National Park and Preserve conveyed to the State pursuant to this title and also excluding the following:

(A) the unexercised reservation to the United States for future rights-of-way required in all patents for land taken up, entered, or located in Alaska, as provided by the Act of March 12, 1914 (43 U.S.C. 975 et seq.);

(B) the right of the United States to exercise the power of eminent domain;

(C) any moneys in the Alaska Railroad Revolving Fund which the Secretary demonstrates, in consultation with the State, are unobligated funds appropriated from general tax revenues or are needed to satisfy obligations incurred by the United States in connection with the operation of the Alaska Railroad which would have been paid from such Fund but for this title and which are not assumed by the State pursuant to this title;

(D) any personal property which the Secretary demonstrates, in consultation with the State, prior to the date of transfer under section 604 of this title to, be necessary to carry out functions of the United States after the date of transfer; and

(E) any lands or interest therein (except as specified in this title) within the boundaries of the Denali National Park and Preserve;

(11) "right-of-way" means, except as used in section 609 of this title—

(A) an area extending not less than one hundred feet on both sides of the center line of any main line or branch line of the Alaska Railroad; or

(B) an area extending on both sides of the center line of any main line or branch line of the Alaska Railroad appropriated or retained by or for the Alaska Railroad that, as a result of military jurisdiction over, or non-Federal ownership of, lands abutting the main line or branch line, is of a width less than that described in subparagraph (A) of this paragraph;

(12) "Secretary" means the Secretary of Transportation;

(13) "State" means the State of Alaska or the State-owned railroad, as the context requires;

(14) "State-owned railroad" means the authority, agency, corporation or other entity which the State of Alaska designates or contracts with to own, operates or manage the rail properties of the Alaska Railroad or, as the context requires, the railroad owned, operated, or managed by such authority, agency, corporation, or other entity; and

(15) "Village Corporation" has the same meaning as such term has under section 3(j) of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(j)).

TRANSFER AUTHORIZATION

SEC. 604. (a) Subject to the provisions of this title, the United States, through the Secretary, shall transfer all rail properties of the Alaska Railroad to the State. Such transfer shall occur as soon as practicable after the Secretary has made the certifications required by subsection (d) of this section and shall be accomplished in the manner specified in subsection (b) of this section.

(b)(1) On the date of transfer, the Secretary shall simultaneously:

(A) deliver to the Senate a bill of sale conveying title to all rail properties of the Alaska Railroad except any interest in real property;

(B) deliver to the State an interim conveyance of the rail properties of the Alaska Railroad that are not conveyed pursuant to subparagraph (A) of this paragraph and are not subject to unresolved claims of valid existing rights;

(C) deliver to the State an exclusive license granting the State the right to use all

rail properties of the Alaska Railroad not conveyed pursuant to subparagraphs (A) or (B) of this paragraph pending conveyances in accordance with the review and settlement or final administrative adjudication of claims of valid existing rights;

(D) convey to the State a deed granting the State (i) an exclusive-use easement for that portion of the right-of-way of the Alaska Railroad within the Denali National Park and Preserve extending not less than one hundred feet on either side of the main or branch line tracks, and eight feet on either side of the centerline of the "Y" track connecting the main line of the railroad to the power station at McKinley Park Station and (ii) title to railroad-related improvements within such right-of-way.

Prior to taking the action specified in subparagraphs (A) through (D) of this paragraph, the Secretary shall consult with the Secretary of the Interior. The exclusive-use easement granted pursuant to subparagraph (D) of this paragraph and all rights afforded by such easement shall be exercised only for railroad purposes, and for such other transportation, transmission, or communication purposes for which lands subject to such easement were utilized as of the date of enactment of this Act. In the event of reversion to the United States, pursuant to section 610 of this title, of the State's interests in all or part of the lands subject to such easement, such easement shall terminate with respect to the lands subject to such reversion, and no new exclusive-use easement with respect to such reverted lands shall be granted except by Act of Congress.

(2) The Secretary shall deliver to the State an interim conveyance of rail properties of the Alaska Railroad described in paragraph (1)(C) of this subsection that become available for conveyance to the State after the date of transfer as a result of settlement, relinquishment, or final administrative adjudication pursuant to section 606 of this title. Where the rail properties to be conveyed pursuant to this paragraph are surveyed at the time they become available for conveyance to the State, the Secretary shall deliver a patent therefor in lieu of an interim conveyance.

(3) The force and effect of an interim conveyance made pursuant to paragraphs (1)(B) or (2) of this subsection shall be to convey to and vest in the State exactly the same right, title, and interest in and to the rail properties identified therein as the State would have received had it been issued a patent by the United States. The Secretary of the Interior shall survey the land conveyed by an interim conveyance to the State pursuant to paragraphs (1)(B) or (2) of this subsection and, upon completion of the survey, the Secretary shall issue a patent therefor.

(4) The license granted pursuant to paragraph (1)(C) of this subsection shall authorize the State to use, occupy, and directly receive all benefits of the rail properties described in the license for the operation of the State-owned railroad in conformity with the Memorandum of Understanding, referred to in section 606(b)(3) of this title. The license shall be exclusive, subject only to valid leases, permits, and other instruments issued before the date of transfer and easements reserved pursuant to subsection (c)(2) of this section. With respect to any parcel conveyed pursuant to this title, the license shall terminate upon conveyance of such parcel.

(c)(1) Interim conveyances and patents issued to the State pursuant to subsection (b) of this section shall confirm, convey and vest in the State all reservations to the United States (whether or not expressed in a particular patent or document of title), except the unexercised reservations to the United States for future rights-of-way made or required by the first section of the Act of March 12, 1914 (43 U.S.C. 975d). The conveyance to the State of such reservations shall not be affected by the repeal of such Act under section 615 of this title.

(2) In the license granted under subsection (b)(1)(C) of this section and in all conveyances made to the State under this title, there shall be reserved to the Secretary of the Interior, the Secretary of Defense and the Secretary of Agriculture, as appropriate, existing easements for administration (including agency transportation and utility purposes) that are identified in the report required by section 605(a) of this title. The appropriate Secretary may obtain, only after consent of the State, such future easements as are necessary for administration. Existing and future easements and use of such easements shall not interfere with operations and support functions of the State-owned railroad.

(3) There shall be reserved to the Secretary of the Interior the right to use and occupy, without compensation, 5,000 square feet of land at Talkeetna, Alaska, as described in ARR Lease Numbered 69-25-0003-5165 for National Park Service administrative activities, so long as the use or occupation does not interfere with the operation of the State-owned railroad. This reservation shall be effective on the date of transfer under this section or the expiration date of such lease, whichever is later.

(d)(1) Prior to the date of transfer, the Secretary shall certify that the State has agreed to operate the railroad as a rail carrier in intrastate and interstate commerce.

(2)(A) Prior to the date of transfer, the Secretary shall also certify that the State has agreed to assume all rights, liabilities, and obligations of the Alaska Railroad on the date of transfer, including leases, permits, licenses, contracts, agreements, claims, tariffs, accounts receivable, and accounts payable, except as otherwise provided by this title.

(B) Notwithstanding the provisions of subparagraph (A) of this paragraph, the United States shall be solely responsible for—

(i) all claims and causes of action against the Alaska Railroad that accrue on or before the date of transfer, regardless of the date on which legal proceedings asserting such claims were or may be filed, except that the United States shall, in the case of any tort claim, only be responsible for any such claim against the United States that accrues before the date of transfer and results in an award, compromise, or settlement of more than $2,500, and the United States shall not compromise or settle any claim resulting in State liability without the consent of the State, which consent shall not be unreasonably withheld; and

(ii) all claims that resulted in a judgment or award against the Alaska Railroad before the date of transfer.

(C) For purposes of subparagraph (B) of this paragraph, the term "accrue" shall have the meaning contained in section 2401 of title 28, United States Code.

(3)(A) Prior to the date of transfer, the Secretary shall also certify that the State-owned railroad has established arrangements pursuant to section 607 of this title to protect the employment interests of employees of the Alaska Railroad during the 2-year period commencing on the date of transfer. These arrangements shall include provisions—

(i) which ensure that the State-owned railroad will adopt collective bargaining agreements in accordance with the provisions of subparagraph (B) of this paragraph;

(ii) for the retention of all employees, other than officers of the Alaska Railroad, who elect to transfer to the State-owned railroad in their same positions for the 2-year period commencing on the date of transfer, except in cases of reassignment, separation for cause, resignation, retirement, or lack of work;

(iii) for the payment of compensation to transferred employees (other than employees provided for in subparagraph (E) of this paragraph), except in cases of separation for cause, resignation, retirement, or lack of work, for 2 years commencing on the date of transfer at or above the base salary levels in effect for such employees on the date of transfer, unless the parties otherwise agree during that 2-year period;

(iv) for priority of reemployment at the State-owned railroad during the 2-year period commencing on the date of transfer for transferred employees who are separated for lack of work, in accordance with subparagraph (C) of this paragraph (except for officers of the Alaska Railroad, who shall receive such priority for one year following the date of transfer);

(v) for credit during the 2-year period commencing on the date of transfer for accrued annual and sick leave, seniority rights, and relocation and turnaround travel allowances which have been accrued during their period of Federal employment by transfered employees retained by the State-owned railroad (except for officers of the Alaska Railroad, who shall receive such credit for one year following the date of transfer);

(vi) for payment to transferred employees retained by the State-owned railroad during the 2-year period commencing on the date of transfer, including for one year officers retrained or separated under subparagraph (E) of this paragraph, of an amount equivalent to the cost-of-living allowance to which they are entitled as Federal employees on the day before the date of transfer, in accordance with the provisions of subparagraph (D) of this paragraph; and

(vii) for health and life insurance programs for transferred employees retained by the State-owned railroad during the 2-year period commencing on the date of transfer, substantially equivalent to the Federal health and life insurance programs available to employees on the day before the date of transfer (except for officers of the Alaska Railroad, who shall receive such credit for one year following the date of transfer).

(B) The State-owned railroad shall adopt all collective bargaining agreements which are in effect on the date of transfer. Such agreements shall continue in effect for the 2-year period commencing on the date of transfer, unless the parties agree to the contrary before the expiration of that 2-year period. Such agreements shall be renegotiated during the 2-year period, unless the parties agree to the contrary. Any labor-management negotiation impasse declared before the date of transfer shall be settled in accordance with chapter 71 of title 5, United States Code. Any impasse declared after the date of transfer shall be subject to applicable State law.

(C) Federal service shall be included in the computation of seniority for transferred employees with priority for reemployment, as provided in subparagraph (A)(iv) of this paragraph.

(D) Payment to transferred employees pursuant to subparagraph (A)(vi) of this paragraph shall not exceed the percentage of any transferred employee's base salary level provided by the United States as a

cost-of-living allowance on the day before the date of transfer, unless the parties agree to the contrary.

(E) Prior to the date of transfer, the Secretary shall also certify that the State-owned railroad has agreed to the retention, for at least one year from the date of transfer, of the offices of the Alaska Railroad, except in cases of separation for cause, resignation, retirement, or lack of work, at or above their base salaries in effect on the date of transfer, in such positions as the State-owned railroad may determine; or to the payment of lump-sum severance pay in an amount equal to such base salaries for one year to officers not retained by the State-owned railroad upon transfer or, for officers separated within one year lump-sum severance payment (diminished pro rata for employment by the State-owned railroad within one year of the date of transfer prior to separation).

(4) Prior to the date of transfer, the Secretary shall also certify that the State has agreed to allow representatives of the Secretary adequate access to employees and records of the Alaska Railroad when needed for the performance of functions related to the period of Federal ownership.

(5) Prior to the date of transfer, the Secretary shall also certify that the State has agreed to compensate the United States at the value, if any, determined pursuant to section 605(d) of this title.

TRANSITION PERIOD

SEC. 605. (a) Within six months after the date of enactment of this Act, the Secretary and the Governor of Alaska shall jointly prepare and deliver to the Congress of the United States and the Legislature of the State a report that describes to the extent possible the rail properties of the Alaska Railroad, the liabilities and obligations to be assumed by the State, the sum of money, if any, in the Alaska Railroad Revolving Fund to be withheld from the State pursuant to section 603(8)(C) of this title, and any personal property to be withheld pursuant to section 603(8)(D) of this title. The report shall separately identify by the best available descriptions (1) the rail properties of the Alaska Railroad to be transferred pursuant to section 604(b)(1)(A), (B) and (D) of this title; (2) the rail properties to be subject to the license granted pursuant to section 604(b)(1)(C) of this title; and (3) the easements to be reserved pursuant to section 604(c)(2) of this title. The Secretaries of Agriculture, Defense, and the Interior and the Administrator of the General Services Administration shall provide the Secretary with all information and assistance necessary to allow the Secretary to complete the report within the time required.

(b) During the period from the date of enactment of this Act until the date of transfer, the State shall have the right to inspect, analyze, photograph, photocopy and otherwise evaluate all of the rail properties of the Alaska Railroad and all records related to the rail properties of the Alaska Railroad maintained by any agency of the United States under conditions established by the Secretary to protect the confidentiality of proprietary business data, personnel records, and other information, the public disclosure of which is prohibited by law. During that period, the Secretary and the Alaska Railroad shall not, without the consent of the State and only in conformity with applicable law and the Memorandum of Understanding referred to in section 606(b)(3) of this title—

(1) make or incur any obligation to make any individual capital expenditure of money from the Alaska Railroad Revolving Fund in excess of $300,000;

(2) (except as required by law) sell, exchange, give, or otherwise transfer any real property included in the rail properties of the Alaska Railroad; or

(3) lease any rail property of the Alaska Railroad for a term in excess of 5 years.

(c) Prior to transfer of the rail properties of the Alaska Railroad to the State, the Alaska Railroad's accounting practices and systems shall be capable of reporting data to the Interstate Commerce Commission in formats required of comparable rail carriers subject to the jurisdiction of the Interstate Commerce Commission.

(d)(1) Within nine months after the date of enactment of this Act, the United States Railway Association (hereinafter in this section referred to as the "Association") shall determine the fair market value of the Alaska Railroad under the terms and conditions of this title, applying such procedures, methods and standards as are generally accepted as normal and common practice. Such determination shall include an appraisal of the real and personal property to be transferred to the state pursuant to this title. Such appraisal by the Association shall be conducted in the usual manner in accordance with generally accepted industry standards, and shall consider the current fair market value and potential future value if used in whole or in part for other purposes. The Association shall take into account all obligations imposed by this title and other applicable law upon operation and ownership of the state-owned railroad. In making such determination, the Association shall use to the maximum extent practicable all relevant data and information, including, if relevant, that contained in the closing report prepared pursuant to subsection (a) of this section.

(2) The determination made pursuant to paragraph (1) of this subsection shall not be construed to affect, enlarge, modify, or diminish any inventory, valuation, or classification required by the Interstate Commerce Commission pursuant to subchapter V of chapter 107 of title 49, United States Code (49 U.S.C. 10781 et seq.).

(e) Section 202(a) of the Regional Rail Reorganization Act of 1973 is amended—

(1) by striking "and" at the end of paragraph (9);

(2) by striking the period at the end of paragraph (10) and inserting in lieu thereof"; and"; and

(3) by adding at the end thereof the following new paragraph:

"(11) determine the value of the Alaska Railroad, as required by section 605 of the Alaska Railroad Transfer Act of 1982.".

LANDS TO BE TRANSFERRED

SEC. 606. (a) Lands among the rail properties of the Alaska Railroad shall not be—

(1) available for selection under section 12 of the Act of January 2, 1976, as amended (43 U.S.C. 1611, note), subject to the exception contained in section 12(b)(8)(i)(D) of such Act, as amended by subsection (d)(5) of this section:

(2) available for conveyance under section 1425 of the Alaska National Interest Lands Conservation Act (Public Law 96-487; 94 Stat. 2515);

(3) available for conveyance to Chugach Natives, Inc., under sections 1429 or 1430 of the Alaska National Interest Lands Conservation Act (Public Law 96-487; 94 Stat. 2531) or under sections 12(c) or 14(h)(8) of the Alaska Native Claims Settlement Act (43 U.S.C. 1611(c) and 1613(h)(8), respectively); or

(4) available under any law or regulation for entry, location, or for exchange by the United States, or for the initiation of a claim or selection by any party other than the State or other transferee under this title, except that this paragraph shall not prevent a conveyance pursuant to section 12(b)(8)(i)(D) of the Act of January 2, 1976 (43 U.S.C. 1611, note), as amended by subsection (d)(5) of this section.

(b)(1)(A) During the ten months following the date of enactment of this Act, so far as practicable consistent with the priority of preparing the report required pursuant to section 605(a) of this title, the Secretary of the Interior, Village Corporations with claims of valid existing rights, and the State shall review and make a good faith effort to settle as many of the claims as possible. Any agreement to settle such claims shall take effect and bind the United States, the State, and the Village Corporation only as of the date of transfer of the railroad.

(B) At the conclusion of the review and settlement process provided in subparagraph (A) of this paragraph, the Secretary of the Interior shall prepare a report identifying lands to be conveyed in accordance with settlement agreements under this title or applicable law. Such settlement shall not give rise to a presumption as to whether a parcel of land subject to such agreement is or is not public land.

(2) The Secretary of the Interior shall have the continuing jurisdiction and duty to adjudicate unresolved claims of valid existing rights pursuant to applicable law and this title. The Secretary of the Interior shall complete the final administrative adjudication required under this subsection not later than three years after the date of enactment of this Act, and shall complete the survey of all lands to be conveyed under this title not later than five years after the date of enactment of this Act, and after consulting with the Governor of the State of Alaska to determine priority of survey with regard to other lands being processed for patent to the State. The Secretary of the Interior shall give priority to the adjudication of Village Corporation claims as required in this section. Upon completion of the review and settlement process required by paragraph (1)(A) of this subsection, with respect to lands not subject to an agreement under such paragraph, the Secretary of the Interior shall adjudicate which lands subject to claims of valid existing rights filed by Village Corporations, if any, are public lands and shall complete such final administrative adjudication within two years after the date of enactment of this Act.

(3) Pending settlement or final administrative adjudication of claims of valid existing rights filed by Village Corporations prior to the date of transfer or while subject to the license granted to the State pursuant to section 604(b)(1)(C) of this title, lands subject to such claims shall be managed in accordance with the Memorandum of Understanding among the Federal Railroad Administration, the State, Eklutna, Inc., Cook Inlet Region, Incorporated (as that term is used in section 12 of the Act of January 2, 1976 (Public Law 94-204; 89 Stat. 1150)), and Toghotthele Corporation, executed by authorized officers or representatives of each of these entities. Duplicate originals of the Memorandum of Understanding shall be maintained and made available for public inspection and copying in the Office of the Secretary, at Washington, D.C., and in the Office of the Governor of the State of Alaska, at Juneau, Alaska.

(4) The following procedures and requirements are established to promote finality of administrative adjudication of claims of valid existing rights filed by Village Corporations, to clarify and simplify the title

status of lands subject to such claims, and to avoid potential impairment of railroad operations resulting from joint or divided ownership in substantial segments of right-of-way:

(A)(i) Prior to final administrative adjudication of Village Corporation claims of valid existing rights in land subject to the license granted under section 604(b)(1)(C) of this title, the Secretary of the Interior may, notwithstanding any other provision of law, accept relinquishment of so much of such claims as involved lands within the right-of-way through execution of an agreement with the appropriate Village Corporation effective on or after the date of transfer. Upon such relinquishment, the interest of the United States in the right-of-way shall be conveyed to the State pursuant to section 604(b)(1)(B) or (2) of this title.

(ii) With respect to a claim described in clause (i) of this subparagraph that is not settled or relinquished prior to final administrative adjudication, the Congress finds that exclusive control over the right-of-way by the Alaska Railroad has been and continues to be necessary to afford sufficient protection for safe and economic operation of the railroad. Upon failure of the interested Village Corporation to relinquish so much of its claims as involve lands within the right-of-way prior to final adjudication of valid existing rights, the Secretary shall convey to the State pursuant to section 604(b)(1)(B) or (2) of this title all right, title and interest of the United States in and to the right-of-way free and clear of such Village Corporation's claim to and interest in lands within such right-of-way.

(B) Where lands within the right-of-way, or any interest in such lands, have been conveyed from Federal ownership prior to the date of enactment of this Act, or is subject to a claim of valid existing rights by a party other than a Village Corporation, the conveyance to the State of the Federal interest in such properties pursuant to section 604(b)(1)(3) or (2) of this title shall grant not less than an exclusive-use easement in such properties. The foregoing requirements shall not be construed to permit the conveyance to the State of less than the entire Federal interest in the rail properties of the Alaska Railroad required to be conveyed by section 604(b) of this title. If an action is commenced against the State or the United States contesting the validity or existence of a reservation of right-of-way for the use or benefit of the Alaska Railroad made prior to the date of enactment of this Act, the Secretary of the Interior, through the Attorney General, shall appear in and defend such action.

(c)(1) The final administrative adjudication pursuant to subsection (b) of this section shall be final agency action and subject to judicial review only by an action brought in the United States District Court for the District of Alaska. Review of agency action pursuant to this title shall be expedited to the same extent as the expedited review provided by section 1108 of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3168).

(2) No administrative or judicial action under this title shall enjoin or otherwise delay the transfer of the Alaska Railroad pursuant to this title, or substantially impair or impede the operations of the Alaska Railroad or the State-owned railroad.

(3) Before the date of transfer, the State shall have standing to participate in any administrative determination or judicial review pursuant to this title. If transfer to the State does not occur pursuant to section 604 of this title, the State shall not thereafter have standing to participate in any such determination or review.

(d)(1) Section 12(b)(7)(i) of the Act of January 2, 1976 (Public Law 94-204) is amended—

(A) by striking "subsection 12(b)(6)" and inserting in lieu thereof "section 12(b) (5) and (6)";

(B) by striking "12(b)(7)(ii)" and inserting in lieu thereof "12(b)(7)(iv)";

(C) by by striking "crediting" and inserting in lieu thereof "using";

(D) by striking "this subsection 12(b)(7)(i)(b)" and inserting in lieu thereof "these subsections 12(b)(7) (i)(b) or (ii)";

(E) by striking "State" in the last sentence and inserting in lieu thereof "state"; and

(F) by striking the penultimate sentence.

(2) Section 12(b)(7) of such Act is amended—

(A) by redesignating subsections (ii) through (iv) as subsections (iv) through (vi), respectively; and

(3) by inserting immediately after subsection (i) the following:

"(ii) Subject to the exceptions stated in section 12(b)(9), and notwithstanding the foregoing subsection 12(b)(7)(i) and any provision of any other law or any implementing regulation inconsistent with this subsection, until the obligations of the Secretary and the Administrator of General Services under sections 12(b) (5) and (6) are otherwise fulfilled:

"(A) concurrently with the commencement of screening of any excess real property, wherever located, for utilization by Federal agencies, the Administrator of General Services shall notify the Region that such property may be available for conveyance to the Region upon negotiated sale. Within fifteen days of the date of receipt of such notice, the Region may advise the Administrator that there is a tentative need for the property to fufill the obligations established under sections 12(b) (5) and (6). If the Administrator determines the property should be disposed of by transfer to the Region, the Administrator or other appropriate Federal official shall promptly transfer such property;

"(B) no disposition or conveyance of property under this subsection to the Region shall be made until the Administrator, after notice to affected State and local governments, has provided to them such opportunity to obtain the property as is recognized in title 40, United States Code and the regulations thereunder for the disposition or conveyance of surplus property; and

"(C) as used in this subsection, 'real property' means any land or interests in land owned or held by the United States or any Federal agency, any improvements on such land or rights to their use or exploitation, and any personal property related to the land.

"(iii) If the Region accepts any conveyance under section 12(b)(7)(i) or (ii), it shall be in exchange for acreas or acre-equivalents as provided in subparagraph I(C)(2)(e) of the document referred to in this section, except that, after the obligation of the Secretary and the Administrator under subparagraph I(C)(2)(g) of that document has been fulfilled, the acre-equivalents under subparagraph I(C)(2)(e)(iii)(A) shall be one-half the valued increment therein stated. The entitlement of the Region under section 12(b) of this Act shall be reduced by the number of acres or acre-equivalents attributed to the Region under this subsection. The Secretary and the Administrator are directed to execute an agreement with the Region which shall confrom substantially to the 'Memorandum of Understanding Regarding the Implementation of Section 12(b)(7)', dated September 10, 1092, and submitted to the Senate Committee on Commerce, Science, and Transportation. The Secretary, the Administrator and the Region may thereafter otherwise agree to procedures to implement responsibilities under this section 12(b)(7), including establishment of accounting procedures and the delegation or reassignment of duties under this statute.".

(3) Section 12(b)(7)(iv) of such Act, as so redesignated by paragraph (2) of this subsection, is amended—

(A) by striking "surplus" the first place it appears therein;

(B) by inserting immediately before the period at the end of the first sentence the following: "or paying for the conveyance of property pursuant to subsections (i) or (ii)";

(C) by inserting immediately after "account shall be" the following: "the sum of (1)";

(D) by striking "I(C)(2)(e)" and inserting in lieu thereof "I(C)(2)(e)(iii)(A)";

(E) by striking "the effective date of this subsection", and inserting in lieu thereof "December 2, 1980";

(F) by striking "and shall be adjusted" and inserting in lieu thereof "and (2) one-half the acre or acre-equivalent exchange value under subparagraph I(C)(2)(e)(iii)(A) of ten townships fewer than the unfulfilled entitlement of the Region on the same date to acres or acre-equivalents under paragraph I(C)(1) of the document referred to in this section. The balance of the property account shall be adjusted in accordance with subsection 12(b)(7)(iii)"; and

(G) by striking "subsection 12(b)(6)" and inserting in lieu thereof "section 12(b)(5) and (6)".

(4) Section 12(b)(7)(v) of such Act, as so redesignated by paragraph (2) of this subsection, is amended by striking "subsection (ii)" and inserting in lieu thereof "subsection (iv)".

(5) Section 12(b)(8) of such Act is amended to read as follows:

"12(b)(8). Subject to the exceptions stated in section 12(b)(9), and notwithstanding any provisions of law or implementing regulation inconsistent with this section:

"(i) The deadlines in subparagraphs I(C)(2)(a) and (g) of the document referred to in this section shall be extended until the Secretary's obligations under section 12(b) (5) and (6) are fulfilled: *Provided,* That:

"(A) the obligation of the Secretary under subparagraph I(C)(2)(a) of such document shall terminate on such date, after July 15, 1984, that the Secretary has fulfilled his obligation under subparagraph I(C)(2)(g) of that document: *Provided,* That the obligation of the Secretary under subparagraph I(C)(2)(g) of such document shall be fulfilled at such date, after July 15, 1984, that the sum of the acres or acre-equivalents identified for and placed in the pool and the acres or acre-equivalents used by the Region in purchasing property under section 12(b)(7) equals or exceeds 138,240 acres or acre-equivalents;

"(B) the authority of the Secretary under subparagraphs I(C)(2)(b) and I(C)(2)(g)(ii) of such document to contribute to the pool created under subparagraph I(C)(2)(a) of such document shall terminate (a) on July 15, 1984, if, by that date, the Secretary has fulfilled his obligation under subparagraph I(C)(2) (g), or (b) if not, on such date after July 15, 1984 as such obligation is fulfilled, or (c) if such obligation remains unfulfilled, on July 15, 1987;

"(C) the concurrence by the State as described in subparagraphs I(C)(2)(a)(vi) and I(C)(2)(c) of the document referred to in this section shall be deemed not required

after the Secretary has fulfilled his obligation under subparagraph I(C)(2)(g) of that document, but in no event after July 15, 1987. In lieu of such concurrence, after 1984 as to military property, and after the Secretary has fulfilled his obligation under subparagraph I(C)(2)(g) of that document or July 15, 1987, whichever is earlier, as to any other property, except property of the Alaska Railroad which is governed by subsection 12(b)(6)(i)(D) of this Act, the Secretary shall not place any lands in the selection pool referred to in subparagraphs I(C)(2) (a) and (g) of the document referred to in this section without the prior written concurrence of the State. Such concurrence shall be deemed obtained unless the State advises the Secretary within ninety days of receipt of a formal notice from the Secretary that he is considering placing property in the selection pool, that the State, or a municipality of the State which includes all or part of the property in question, requires the property for a public purpose of the State or municipality; and

"(D) notwithstanding section 606(a)(2) of the Alaska Railroad Transfer Act of 1982, the Secretary may include property of the Alaska Railroad in the pool of lands to be made available for selection to the extent that he is authorized to do so under a provision of section 12(b) of this Act if the State consents to its inclusion, which consent is not subject to any limitation under subsection 12(b)(8)(i)(C) herein: *Provided,* That, while the Alaska Railroad is the property of the United States, the Secretary shall obtain the consent of the Secretary of Transportation prior to including such property: *And provided further,* That, if the transfer of the Alaska Railroad to the State does not occur pursuant to the terms of the Alaska Railroad Transfer Act of 1982 or any amendments thereto, the State's consent shall be deemed obtained unless the State advises the Secretary in writing, within ninety days of receipt of a formal notice from the Secretary that he is considering placing such property in the selection pool, that the State, or a municipality of the State which includes all or part of the property in question, requires the property for a public purpose of the State or the municipality.

"(ii) In addition to the review required to identify public lands under section 3(e) of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(e)), the Secretary shall identify for inclusion in the pool all public lands (as such term is used under section 3(e) of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(e)), as described in subparagraph I(C)(2)(a)(v) of the document referred to in this section, and shall, in so doing, review all Federal installations within the boundaries of the Cook Inlet Region whether within or without the areas withdrawn pursuant to section 11 of the Alaska Native Claims Settlement Act (43 U.S.C. 1610) or by the Secretary acting under authority contained in that section: *Provided,* That no such additional review under such subparagraph shall be required of military installations or of such other installations as may be mutually excluded from review by the Region and the Secretary: *And provided further,* That the Secretary shall not review any property of the Alaska Railroad unless such property becomes available for selection pursuant to subsection 12(b)(8)(i)(D).

"(iii) The concurrence required of the State as to the inclusion of any property in the pool under subparagraph I(C)(2)(b) of the document referred to in this section shall be deemed obtained unless the State advises the Secretary in writing, within ninety days of receipt of a formal notice from the Secretary that the Secretary is considering placing property in the selection pool, that the State, or a municipality of the State which includes all or part of the property in question requires the property for a public purpose of the State or the municipality.

"(iv) The deadlines in subparagraph I(C)(1)(b) of the document referred to in this section shall be extended for an additional twenty-four months beyond the dates established in the Act of July 17, 1980 (Public Law 96-311; 94 Stat. 947).

"(v) On or before January 15, 1985, the Secretary shall report to the Congress with respect to:

"(A) such studies and inquiries as shall have been initiated by the Secretary and the Administrator of General Services, or have been prepared by other holding agencies, to determine what lands, except for lands held by the Alaska Railroad or the State-owned railroad, within the boundaries of the Cook Inlet Region or elsewhere can be made available to the Region, to the extent of its entitlement;

"(B) the feasibility and appropriate nature of reimbursement of the Region for its unfulfilled entitlement as valued in subsection 12(b)(7)(iv) of this Act;

"(C) the extent to which implementation of the mechanisms established in section 12(b)(7) promise to meet such unfulfilled entitlement;

"(D) such other remedial legislation or administrative action as may be needed; and

"(E) the need to terminate any mechanism established by law through which the entitlement of the Region may be completed.".

(6) Section 12(b) of such Act is amended by adding at the end thereof the following:

"12(b)(9). No disposition or conveyance of property located within the State to the Region under section 12(b)(6), 12(b)(7) and 12(b)(8), as amended, shall be made if the property is subject to an express waiver of rights under the provisions of subparagraph I(C)(2)(f) of the document referred to in this section, or if such disposition or conveyance violates valid rights, including valid selections or valid authorized agreements, of Native Corporations (as such term is used in section 102(6) of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3102(6)) or the State existing at the time of such disposition or conveyance under section 6 of Public Law 85-508, as amended (excepting section 906(e) of the Alaska National Interest Lands Conservation Act), sections 12(a), 12(b), 16(b) or 22(f) of the Alaska Native Claims Settlement Act, section 12(h) of the Act of January 2, 1976 (Public Law 94-204; 89 Stat. 1154), or sections 1416, 1418 through 1425 (inclusive), 1427 through 1434 (inclusive), or 1436 of the Alaska National Interest Lands Conservation Act: *Provided, however,* That nothing within this subsection 12(b)(9) shall diminish such rights and priorities as the Region has under section 12(b) of the Act of January 2, 1976 (Public Law 94-204; 89 Stat. 1151), as amended by section 4 of the Act of October 4, 1976 (Public Law 94-456; 90 Stat. 1935), section 3 of the Act of November 15, 1977 (Public Law 95-178; 91 Stat. 1369), section 2 of the Act of August 14, 1979 (Public Law 96-55; 93 Stat. 386), the Act of July 17, 1980 (Public Law 96-311; 94 Stat. 947), and section 1435 of the Alaska National Interest Lands Conservation Act.

"12(b)(10). For the purpose of its incorporation into this section, paragraph I(C)(1) of the document referred to in this section is amended as follows: (1) by striking 'withdrawn' and inserting in lieu thereof 'withdrawn or formerly withdrawn'; (2) by striking '17(d)(1)' and inserting in lieu thereof '17(d)(1) and (2)'; and (3) by striking the last sentence of subparagraph I(C)(1)(a) and inserting in lieu thereof the following: 'Cook Inlet Region, Incorporated shall not nominate any lands within the boundaries of any conservation system unit, national conservation area, national recreation area, national forest, defense withdrawal, or any lands that were made available to the State for selection pursuant to sections 2 and 5 of the State-Federal Agreement of September 1, 1972.'.

"12(b)(11). Notwithstanding the provisions of section 906 of the Alaska National Interest Lands Conservation Act and section 6(i) of the Alaska Statehood Act (72 Stat. 339):

"(i) The State is hereby authorized to convey to the United States for reconveyance to the Region, and the Secretary is directed to accept and so reconvey, lands tentatively approved for patent or patented to the State, if the State and the Region enter into an agreement that such lands shall be reconveyed to the Region to fulfill all or part of its entitlement under paragraph I(C)(1) of the document referred to in this section: *Provided,* That the acreage of lands conveyed to the United States under this provision shall be added to the State's unfulfilled entitlement pursuant to section 6 of the Alaska Statehood Act, and the number of townships to be nominated, pooled, struck, selected and conveyed pursuant to paragraph I(C)(1) of the document referred to in this section shall be reduced accordingly.

"(ii) The Secretary is directed to convey to the Region lands selected by the State prior to July 18, 1975 or pursuant to sections 2 and 5 of the State-Federal Agreement of September 1, 1972, if the State relinquishes such selections and enters into an agreement with the Region that such lands shall be reconveyed to the Region to fulfill all or part of its entitlement under paragraph I(C)(1) of the document referred to in this section, and the number of townships to be nominated, pooled struck, selected and conveyed pursuant to paragraph I(C)(1) of the document referred to in this section shall be reduced accordingly.

"(iii) The Secretary, in the Secretary's discretion, is authorized to enter into an agreement with the State and the Region to implement the authority contained in this section 12(b)(11), which agreement may provide for conveyances directly from the State to the Region. Conveyances directly conveyed shall be deemed conveyances from the Secretary pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.).".

(e) The State shall be liable to a party receiving a conveyance of land among the rail properties of the Alaska Railroad subject to the license granted pursuant to section 604(b)(1)(C) of this title for damage resulting from use by the State of the land under such license in a manner not authorized by such license.

EMPLOYEES OF THE ALASKA RAILROAD

SEC. 607. (a)(1) Any employees who elect to transfer to the State-owned railroad and who on the day before the date of transfer are subject to the civil service retirement law (subchapter III of chapter 83 of title 5, United States Code) shall, so long as continually employed by the State-owned railroad without a break in service, continue to be subject to such law, except that the State-owned railroad shall have the option of providing benefits in accordance with the provisions of paragraph (2) of this subsection. Employment by the State-owned railroad without a break in continuity of service

shall be considered to be employment by the United States Government for purposes of subchapter III of chapter 83 of title 5, United States Code. The State-owned railroad shall be the employing agency for purposes of section 8334(a) of title 5, United States Code, and shall contribute to the Civil Service Retirement and Disability Fund a sum as provided by such section, except that such sum shall be determined by applying to the total basic pay (as defined in section 8331(3) of title 5, United States Code) paid to the employees of the State-owned railroad who are covered by the civil service retirement Law, the per centum rate determined annually by the Director of the Office of Personnel Management to be the excess of the total normal cost per centum rate of the civil service retirement system over the employee deduction rate specified in section 8334(a) of title 5, United States Code. The State-owned railroad shall pay into the Federal Civil Service Retirement and Disability Fund that portion of the cost of administration of such Fund which is demonstrated by the Director of the Office of Personnel Management to be attributable to its employees.

(2) At any time during the 2-year period commencing on the date of transfer, the State-owned railroad shall have the option of providing to transferred employees retirement benefits, reflecting prior Federal service, in or substantially equivalent to benefits under the retirement program maintained by the State for State employees. If the State decides to provide benefits under this paragraph, the State shall provide such benefits to all transferred employees, except those employees who will meet the age and service requirements for retirement under section 8336(a), (b), (c) or (f) of title 5, United States Code, within 5 years after the date of transfer and who elect to remain participants in the Federal retirement program.

(3) If the State provides benefits under paragraph (2) of this subsection—

(A) the provisions of paragraph (1) of this subsection regarding payments into the Civil Service Retirement and Disability Fund for those employees who are transferred to the State program shall have no further force and effect (other than for employees who will meet the age and service requirements for retirement under section 8336(a), (b), (c) or (f) of title 5, United States Code, within 5 years after the date of transfer and who elect to remain participants in the Federal retirement program); and

(B) all of the accrued employee and employer contributions and accured interest on such contributions made by and on behalf of the transferred employees during their prior Federal service (other than amounts for employees who will meet the age and service requirements for retirement under section 5336(a), (b), (c) or (f) of title 5, United States Code, within 5 years after the date of transfer and who elect to remain participants in the Federal retirement program) shall be withdrawn from the Federal Civil Service Retirement and Disability Fund and shall be paid onto the retirement fund utilized by the State-owned railroad for the transferred employees, in accordance with the provisions of paragraph (2) of this subsection. Upon such payment, credit for prior Federal service under the Federal civil service retirement system shall be forever barred, notwithstanding the provisons of section 8334 of title 5, United States Code.

(b) Employees of the Alaska Railroad who do not transfer to the State-owned railroad shall be entitled to all of the rights and benefits available to them under Federal law for discontinued employees.

(c) Transferred employees whose employment with the State-owned railroad is terminated during the 2-year period commencing on the date of transfer shall be entitled to all of the rights and benefits of discontinued empoyees that such employees would have had under Federal law if their termination had occurred immediately before the date of the transfer, except that financial compensation paid to officers of the Alaska Railroad shall be limited to that compensation provided pursuant to section 604(d)(3)(E) of this title. Such employees shall also be entitled to seniority and other benefits accrued under Federal law while they were employed by the State-owned railroad on the same basis as if such employment had been Federal service.

(d) Any employee who transfers to the State-owned railroad under this title shall not be entitled to lump-sum payment for unused annual leave under section 551 of title 5, United States Code, but shall be credited by the State with the unused annual leave balance at the time of transfer.

STATE OPERATION

SEC. 608. (a)(1) After the date of transfer to the State pursuant to section 604 of this title, the State-owned railroad shall be a rail carrier engaged in interstate and foreign commerce subject to the jurisdiction of the Interstate Commerce Commission under chapter 105 of subtitle IV of title 49, United States Code, and all other Acts applicable to rail carriers subject to that chapter, including the antitrust laws of the United States, except, so long as it is an instrumentality of the State of Alaska, the Railroad Retirement Act of 1974 (45 U.S.C. 231 et seq.), the Railroad Retirement Tax Act (26 U.S.C. 3201 et seq.), the Railway Labor Act (45 U.S.C. 151 et seq.), the Act of April 22, 1908 (45 U.S.C. 51 et seq.) (popularly referred to as the "Federal Employers' Liability Act"), and the Railroad Unemployment Insurance Act (45 U.S.C. 351 et seq.). Nothing in this title shall preclude the State from explicitly invoking by law any exemption from the antitrust laws as may otherwise be available.

(2) The transfer to the State authorized by section 604 of this title and the conferral of jurisdiction to the Interstate Commerce Commission pursuant to paragraph (1) of this subsection are intended to confer upon the State-owned railroad all business opportunities available to comparable railroads, including contract rate agreements meeting the requirements of section 10713 of title 49, United States Code, notwithstanding any participation in such agreements by connecting water carriers.

(3) All memoranda which sanction noncompliance with Federal railroad safety regulations contained in 49 CFR Parts 209-236, and which are in effect on the date of transfer, shall continue in effect according to their terms as "waivers of compliance" (as that term is used in section 202(c) of the Federal Railroad Safety Act of 970 (45 U.S.C. 431(c)).

(4) The operation of trains by the State-owned railroad shall not be subject to the requirement of any State or local law which specifies the minimum number of crew members which must be employed in connection with the operation of such trains.

(5) Revenues generated by the State-owned railroad shall be retained and managed by the State-owned railroad for railroad and related purposes.

(6)(A) After the date of transfer, continued operation of the Alaska Railroad by a public corporation, authority or other agency of the State shall be deemed to be an exercise of an essential governmental function, and revenue derived from such operation shall be deemed to accrue to the State for the purposes of section 115(a)(1) of the Internal Revenue Code of 1954 (26 U.S.C. 115(a)(1)). Obligations issued by such entity shall also be deemed obligations of the State for the purposes of section 103(a)(1) of the Internal Revenue Code of 1954 (26 U.S.C. 103(a)(1)), but not obligations within the meaning of section 13(b)(2) of the Internal Revenue Code of 1954 (26 U.S.C. 103(b)(2)).

(B) Nothing in this title shall be deemed or construed to affect customary tax treatment of private investment in the equipment or other assets that are used or owned by the State-owned railroad.

(b) As soon as practicable after the date of enactment of this Act, the Interstate Commerce Commission shall promulgate an expedited, modified procedure for providing on the date of transfer a certificate of public convenience and necessity to the State-owned railroad. No inventory, valuation, or classification of property owned or used by the State-owned railroad pursuant to subchapter V of chapter 107 of title 49, United States Code (49 U.S.C. 10781 et seq.) shall be required during the two-year period after the date of transfer. The provisions of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and section 382(b) of the Energy Policy and Conservation Act (42 U.S.C. 6362(b)) shall not apply to actions of the Commission under this subsection.

(c) The State-owned railroad shall be eligible to participate in all Federal railroad assistance programs on a basis equal to that of other rail carriers subject to the jurisdiction of the Interstate Commerce Commission under chapter 105 of subtitle IV of title 49, United States Code.

(d) After the date of transfer to the State pursuant to section 604 of this title, the portion of the rail properties within the boundaries of the Chugach National Forest and the exclusive-use easement within the boundaries of the Denali National Park and Preserve shall be subject to laws and regulations for the protection of forest and park values. The right to fence the exclusive-use easement within Denali National Park and Preserve shall be subject to the concurrence of the Secretary of the Interior. The Secretary of the Interior, or the Secretary of Agriculture where appropriate, shall not act pursuant to this subsection without consulting with the Governor of the State of Alaska or in such a manner as to unreasonably interfere with continued or expanded operations and support functions authorized under this title.

FUTURE RIGHTS-OF-WAY

SEC. 609. (a) After the date of enactment of this Act, the State or State-owned railroad may request the Secretary of the Interior or the Secretary of Agriculture, as appropriate under law, to expeditiously approve an application for a right-of-way in order that the Alaska Railroad or State-owned railroad may have access across Federal lands for transportation and related purposes. The State or State-owned railroad may also apply for a lease, permit, or conveyance of any necessary or convenient terminal and station grounds and material sites in the vicinity of the right-of-way for which an application has been submitted.

(b) Before approving a right-of-way application described in subsection (a) of this section, the Secretary of the Interior or the Secretary of Agriculture, as appropriate, shall consult with the Secretary. Approval of an application for a right-of-way, permit,

lease, or conveyance described in subsection (a) of this section shall be pursuant to applicable law. Rights-of-way, grounds, and sites granted pursuant to this section and other applicable law shall conform, to the extent possible, to the standards provided in the Act of March 12, 1914 (43 U.S.C. 975 et seq.) and section 603(6) of this title. Such conformance shall not be affected by the repeal of such Act under section 615 of this title.

(c) Reversion to the United States of any portion of any right-of-way or exclusive-use easement granted to the State or State-owned railroad shall occur only as provided in section 610 of this title. For purposes of such section, the date of the approval of any such right-of-way shall be deemed the "date of transfer".

REVERSION

SEC. 610. (a) If, within ten years after the date of transfer to the State authorized by section 604 of this title, the Secretary finds that all or part of the real property transferred to the State under this title, except that portion of real property which lies within the boundaries of the Denali National Park and Preserve, is converted to a use that would prevent the State-owned railroad from continuing to operate, that real property (including permanent improvements to the property) shall revert to the United States Government, or (at the option of the State) the State shall pay to the United States Government an amount determined to be the fair market value of that property at the time its conversion prevents continued operation of the railroad.

(b) If, after the date of transfer pursuant to section 604 of this title, the State discontinues use of any land within the right-of-way, the State's interest in such land shall revert to the United States. The State shall be considered to have discontinued use within the meaning of this subsection and subsection (d) of this section when:

(1) the Governor of the State of Alaska delivers to the Secretary of the Interior a notice of such discontinuance, including a legal description of the property subject to the notice, and a quitclaim deed thereto; or

(2) the State has made no use of the land for a continuous period of eighteen years for transportation, communication, or transmission purposes. Notice of such discontinuance shall promptly be published in the Federal Register by the Secretary, the Secretary of the Interior, or the Secretary of Agriculture, and reversion shall be effected one year after such notice, unless within such one-year period the State brings an appropriate action in the United States District Court for the District of Alaska to establish that the use has been continuing without an eighteen-year lapse. Any such action shall have the effect of staying reversion until exhaustion of appellate review from the final judgment in that action or termination of the right to seek such review, whichever first occurs.

(c) Upon such reversion pursuant to subsection (b) of this section, the Secretary of the Interior shall immediately convey by patent to abutting landowners all right, title and interest of the United States. Where land abutting the reverted right-of-way is owned by different persons or entities, the conveyance made pursuant to this subsection shall extend the property of each abutting owner to the centerline of the right-of-way.

(d) If use is discontinued (as that term is used in subsection (b) of this section) of all or part of those properties of the Alaska Railroad transferred to the State pursuant to this title which lie within the boundaries of the Denali National Park and Preserve or the Chugach National Forest, such properties or part thereof (including permanent improvements to the property) shall revert to the United States and shall not be subject to subsection (c) of this section. Upon such reversion, jurisdiction over that property shall be transferred to the Secretary of the Interior or the Secretary of Agriculture, as appropriate, for administration as part of the Denali National Park and Preserve or the Chugach National Forest.

(e) Except as provided in subsections (a) through (d) of this section, if, within five years after the date of transfer to the State pursuant to section 604 of this title, the State sells or transfers all or substantially all of the State-owned railroad to an entity other than an instrumentality of the State, the proceeds from the sale or transfer that exceed the cost of any rehabilitation and improvement made by the State for the State-owned railroad and any net liabilities incurred by the State for the State-owned railroad shall be paid into the general fund of the Treasury of the United States.

(f) The Attorney General, upon the request of the Secretary, the Secretary of the Interior, or the Secretary of Agriculture, shall institute appropriate proceedings to enforce this section in the United States District Court for the District of Alaska.

OTHER DISPOSITION

SEC. 611. If the Secretary has not certified that the State has satisfied the conditions under section 604 within one year after the date of delivery of the report referred to in section 605(a) of this title, the Secretary may dispose of the rail properties of the Alaska Railroad. Any disposal under this section shall give preference to a buyer or transferee who will continue to operate rail service, except that—

(1) such preference shall not diminish or modify the rights of the Cook Inlet Region, Incorporated (as that term is used in section 12 of the Act of January 2, 1976 (Public Law 94-204; 89 Stat. 1150)), pursuant to such section, as amended by section 606(d) of this title; and

(2) this section shall not be construed to diminish or modify the powers of consent of the Secretary or the State under section 12(b)(8) of such Act, as amended by section 606(d)(5) of this title.

Any disposal under this section shall be subject to valid existing rights.

DENALI NATIONAL PARK AND PRESERVE LANDS

SEC. 612. On the date of transfer to the State (pursuant to section 604 of this title) or other disposition (pursuant to section 611 of this title), that portion of rail properties of the Alaska Railroad within the Denali National Park and Preserve shall, subject to the exclusive-use easement granted pursuant to section 604(b)(1)(D) of this title, be transferred to the Secretary of the Interior for administration as part of the Denali National Park and Preserve, except that a transferee under section 611 of this title shall receive the same interest as the State under section 604(b)(1)(D) of this title.

APPLICABILITY OF OTHER LAWS

SEC. 613. (a) The provisions of chapter 5 of title 5, United States Code (popularly known as the Administrative Procedure Act, and including provisions popularly known as the Government in the Sunshine Act), the Federal Advisory Committee Act (5 U.S.C. Appx. 1 et seq.), the National Historic Preservation Act (16 U.S.C. 470 et seq.), section 4(f) of the Department of Transportation Act (49 U.S.C. 1653(f)), and the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) shall not apply to actions taken pursuant to this title, except to the extent that such laws may be applicable to granting of rights-of-way under section 609 of this title.

(b) The enactment of this title, actions taken during the transition period as provided in section 605 of this title, and transfer of the rail properties of the Alaska Railroad under authority of this title shall be deemed not to be the disposal of Federal surplus property under the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 484) or the Act of October 3, 1944, popularly referred to as the "Surplus Property Act of 1944" (50 U.S.C. Appx. 1622). Such events shall not constitute or cause the revocation of any prior withdrawal or reservation of land for the use of the Alaska Railroad under the Act of March 12, 1914 (43 U.S.C. 975 et seq.), the Alaska Statehood Act (note preceding 48 U.S.C. 21), the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.), the Act of January 2, 1976 (Public Law 94-204; 89 Stat. 1145), the Alaska National Interest Lands Conservation Act (Public Law 96-487; 94 Stat. 2371), and the general land and land management laws of the United States.

(c) Beginning on the date of enactment of this Act, the ceiling on Government contributions for Federal employees health benefits insurance premiums under section 8906(b)(2) of title 5, United States Code, shall not apply to the Alaska Railroad.

(d) Nothing in this title is intended to enlarge or diminish the acreage entitlement of the State or any Native Corporation pursuant to existing law.

(e) With respect to interests of Native Corporations under the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.) and the Alaska National Interest Lands Conservation Act (16 U.S.C. 3101 et seq.), except as provided in this title, nothing contained in this title shall be construed to deny, enlarge, grant, impair, or otherwise affect any judgment heretofore entered in a court of competent jurisdiction, or valid existing right or claim of valid existing right.

CONFLICT WITH OTHER LAWS

SEC. 614. The provisions of this title shall govern if there is any conflict between this title and any other law.

REPEAL AND AMENDMENT OF EXISTING STATUTES

SEC. 615 (a) On the date of transfer to the State (pursuant to section 604 of this title) or other disposition (pursuant to section 611 of this title), whichever first occurs, the following provisions are repealed:

(1) The Act of March 12, 1914 (43 U.S.C. 975 et seq.).

(The act of June 24, 1946, to authorize certain expenditures by the Alaska Railroad (60 Stat. 304).

(3) The Act of July 19, 1932, concerning mining of coal adjacent to the Alaska Railroad (30 U.S.C. 208a).

(4) Section 6(i) of the Department of Transportation act (49 U.S.C. 1655(i)).

(b) On the date of transfer to the State (pursuant to section 604 of this title) or other disposition (pursuant to section 611 of this title), whichever first occurs, the following provisions are amended as follows:

(1) Title 5, United States Code, is amended—

(A) in section 305(a), by striking paragraph (3), and by redesignating paragraphs (4)-(8) as paragraphs (3)-(7), respectively;

(B) in section 3401(1), by striking clause (iii), and by redesignating clauses (iv)-(viii) as clauses (iii)-(vii), respectively;

(C) in section 5102(a)(1), by striking clause (iii), and by redesignating clauses (iv)-(ix) as clauses (iii)-(viii), respectively;

(D) in section 5342(a)(1), by striking subparagraph (C), and by redesignating subpar-

agraphs (D)-(J) as subparagraphs (C)-(I), respectively; and

(E) in section 7327, by striking subsection (a), and by striking the subsection designation "(b)".

(2) Section 102(7) of the Railroad Revitalization and Regulatory Reform Act of 1976 (45 U.S.C. 802(7)) is amended by striking "and the Alaska Railroad".

(3) Section 10749(b) of title 49, United States Code, is amended—

(A) by inserting "or" at the end of paragraph (1)(B);

"((B) by striking "; or" at the end of paragraph (2) and inserting in lieu thereof a period; and

(C) by striking paragraph (3).

(4) Section 324(a)(1) of the Public Health Service Act (42 U.S.C. 251(a)(1)) is amended by striking "employees of the Alaska Railroad and".

(5) Section 202(3)(a) of the Alaska National Interest Lands Conservation Act (16 U.S.C. 410hh-1(3)(a)) is amended by striking the third sentence.

(6) Section 1(o) of the Railroad Retirement Act of 1974 (45 U.S.C. 231(o)) is amended by inserting immediately after "National Transportation Safety Board," the following: "the State-owned railroad (as defined in the Alaska Railroad Transfer Act of 1982), so long as it is an instrumentality of the State of Alaska,".

SEPARABILITY

SEC. 616. If any provision of this title or the application thereof to any person or circumstance is held invalid, the remainder of this title and the application of such provision to other persons or circumstances shall not be affected thereby.

TITLE VII—RAIL SAFETY

SHORT TITLE

SEC. 701. This title may be referred to as the "Federal Railroad Safety Authorization Act of 1982".

REGULATORY AUTHORITY

SEC. 702. (a) Section 202(h)(1) of the Federal Railroad Safety Act of 1970 (45 U.S.C. 431(h)(1)) is amended to read as follows:

"(h)(1)(A) The Secretary shall, within one year after the date of enactment of the Federal Railroad Safety Authorization Act of 1982, issue such initial rules, regulations, orders, and standards as may be necessary to insure that the construction, maintenance, and operation of railroad passenger equipment maximize safety to rail passengers. The Secretary shall, as a part of any such rulemaking, consider comparable Federal regulations and procedure which apply to other modes of transportation, especially those administered and enforced by the Federal Aviation Administration. The Secretary shall also consider relevant differences between commuter and intercity passenger service. The Secretary shall periodically review any such rules, regulations, orders, and standards and shall, after a hearing in accordance with subsection (b) of this section, make such revisions in any such rules, regulations, orders, and standards as may be necessary.

"(B) The Secretary shall submit to the Congress a report within one year after the date of enactment of the Federal Railroad Safety Authorization Act of 1982 with respect to rules, regulations, orders, and standards issued under subparagraph (A) of this paragraph which describes any rules, regulations, orders, and standards issued or to be issued under this subsection, explains the reasons for their issuance, and compares them to comparable Federal regulations and procedures which apply to other modes of transportation, especially those administered and enforced by the Federal Aviation Administration.".

(b) The Secretary of Transportation shall, before March 1, 1983, conduct a study of the training of onboard operating and service railroad personnel in evacuation procedures and the use of emergency equipment. The Secretary shall consider, as part of such study, Federal regulations and procedures applicable to other modes of transportation. The Secretary shall submit the results of such study to the Committee on Commerce, Science and Transportation of the Senate, and the Committee on Energy and Commerce of the House of Representatives.

(c) Section 202 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 431), as amended by subsection (a) of this section, is further amended by adding at the end thereof the following new subsections:

"(i) The Secretary shall, within one year after the date of enactment of the Federal Railroad Safety Authorization Act of 1982, issue rules, regulations, orders, and standards to apply appropriate safety principles to track used for commuter or other short-haul rail passenger service in a metropolitan or suburban area.

"(j) The Secretary shall, within 60 days after the date of enactment of the Federal Railroad Safety Authorization Act of 1982, report to the Congress on whether to issue rules, regulations, orders, and standards to require that the leading car of any railroad train in operation after July 1, 1983, be equipped with an acceptable form of mounted oscillating light.

"(k) As used in this section, the term 'all areas of railroad safety' includes the safety of commuter or other short-haul rail passenger service in a metropolitan or suburban area, including any commuter rail service which was operated by the Consolidated Rail Corporation as of January 1, 1979.".

AUTHORIZATION FOR APPROPRIATIONS

SEC. 703. Section 214 of the Federal Railroad Safety Act of 1970 (45 U.S.C. 444) is amended—

"(1) by redesignating subsection (c) as subsection (d); and

"(2) by adding immediately after subsection (b) the following new subsection:

"(C)(1) There are authorized to be appropriated to carry out the provisions of this Act, except section 206(d) of this title and paragraph (3) of this subsection, not to exceed $29,300,000 for the fiscal year ending September 30, 1983, and not to exceed $31,400,000 for the fiscal year ending September 30, 1984.

"(2) To carry out the provisions of section 206(d) of this title relating to State safety programs, there are authorized to be appropriated not to exceed $2,700,000 for the fiscal year ending September 30, 1983, and not to exceed $2,900,000 for the fiscal year ending September 30, 1984.

"(3) For the purpose of conducting safety research and development activities under this Act, there are authorized to be appropriated not to exceed $20,000,000 for the fiscal year ending September 30, 1983, and not to exceed $21,000,000 for the fiscal year ending September 30, 1984, including funds for assisting in the treatment of alcohol and drug abuse problems of railroad employees.".

MOVEMENT FOR REPAIR

SEC. 704. Section 4 of the Act of April 14, 1910 (45 U.S.C. 13) is amended by striking "where such car can be repaired" and all that follows through "at the sole risk of the carrier," and inserting in lieu thereof the following: "on the line of railroad on which the car was discovered to be defective or insecure where such car can be repaired, or, at the option of a connecting carrier, such car may be hauled to the nearest available point on the line of such connecting carrier where such car can be repaired if such point is no farther than the nearest available point on the line on which the car was discovered defective or insecure, without liability for the penalties imposed by this section or section 6 of this title, if any such movement is necessary to make such repairs and such repairs cannot be made except at any such repair point; and such movement or hauling of such car shall be at the sole risk of the carrier doing the moving or hauling,".

ASH PAN ACT

SEC. 705. The Act of May 30, 1908 (45 U.S.C. 17 through 21), commonly referred to as the Ash Pan Act, is repealed.

RESPONSIBILITY FOR COMPLIANCE

SEC. 706. Section 209(a) of the Federal Railroad Safety Act of 1970 (45 U.S.C. 438(a)) is amended to read as follows:

"(a) It shall be unlawful for any railroad to fail to comply with any rule, regulation, order, or standard prescribed by the Secretary under this title.".

Amend the title of H.R. 3420 so as to read: "A bill making technical corrections to the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes".

Mr. FLORIO (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. LENT. Reserving the right to object, Mr. Speaker, and I will not object, I do so solely for the purpose of asking my colleague, the chairman of the Subcommittee on Commerce, Transportation, and Tourism, if he would explain briefly the Senate amendment.

Mr. FLORIO. Mr. Speaker, will the gentleman yield?

Mr. LENT. I yield to the gentleman from New Jersey.

Mr. FLORIO. Mr. Speaker, I thank the gentleman for the opportunity to explain what it is that has been done. This bill is identical to that bill that was passed by the House yesterday with the following modifications. The Shipping Act provisions have been stricken from the bill, and on the Alaska railroad provision there has been a compromise effectuated whereby the compensation to be paid by the State of Alaska in the event that the Alaska railroad were to be transferred to the State would be fixed by the U.S. Railway Association and there would be no transfer until such compensation were paid.

It is important to note that the rail provisions of this legislation are derived from H.R. 6308. Accordingly, to the extent applicable, the legislative history of H.R. 6308 shall be part of the legislative history of H.R. 3420.

Title III of H.R. 3420 deals with the Northeast corridor improvement project. Basically, it clarifies the scope of the overall project and the availability of funds to complete the project. It also makes funds available to implement improvements and rehabilitation of the rail lines between the main line

of the Northeast corridor and Atlantic City, N.J., so that safe passenger rail service can be operated over this line at a mimimum speed of 79 miles per hour not later than September 30, 1985.

The bill requires the Secretary of Transportation to expend or reserve for expenditure, first, a total of $30 million out of the yearly appropriations for the Northeast corridor improvement project in fiscal years 1983, 1984, and 1985 for improvements to the rail line between the main line of the Northeast corridor and Atlantic City, N.J. This provision is intended simply to make sure that sufficient resources will be made available in a timely manner so that the September 30, 1985, deadline for completing rehabilitation and improvement to the Atlantic City rail line can be met.

The term "expend or reserve for expenditure" is included so that if circumstances over which the Secretary has no control make it impossible for him to actually expend funds out of a particular fiscal year's appropriation for the Northeast corridor improvement project first for the Atlantic City rail improvements, then other corridor improvements can go forward as long as the Secretary first "reserves for expenditure" during that fiscal year funds out of the yearly appropriations for the Northeast corridor improvement project sufficient to permit required improvements and rehabilitation of the Atlantic City rail line to be accomplished by the end of fiscal year 1985.

Of the $30 million provided for improvements to the Atlantic City rail line, the bill directs the Secretary to expend or reserve for expenditure, first, $10 million out of the fiscal year 1983 appropriations for the Northeast corridor improvement project so that actual improvement and rehabilitation of the rail line can begin in fiscal year 1983.

Under the bill it should be noted that the Secretary of Transportation is required to expend or reserve for expenditure funds for the Atlantic City rail improvements. However, the Secretary is required by the bill to turn these funds over to Amtrak, and Amtrak, not the Secretary, has exclusive responsibility for implementing the required improvements.

In addition, the bill provides that the State of New Jersey shall consult with Amtrak in the development of the plan for the operation of improved passenger rail service between the mainline of the Northeast corridor and Atlantic City, N.J.

As the only U.S. operator of a national system of intercity rail passenger service, Amtrak has a great deal of expertise that will be valuable to the State of New Jersey in developing and insuring the feasibility of a plan for the operation of service over the Atlantic City rail line. Furthermore, the bill provides that the improvements and rehabilitation implemented by Amtrak pursuant to this legislation on the Atlantic City rail line must be consistent with the plan approved by the State of New Jersey for the operation of the service. For example, if an operator other than Amtrak is selected to provide service on the Atlantic rail line, it may be necessary for Amtrak to enter into agreements with other parties to insure that the improvements and rehabilitation of the line are consistent with the plan for operation of the service selected by the State.

Mr. LENT. It is my understanding this amendment has the support of the Department of Transportation; is that correct?

In addition it is my understanding that title III of the Senate amendment makes funds available to consolidate railroad passenger service at Pennsylvania Station in New York City. These funds would be used for the rehabilitation of a rail line required to facilitate rail passenger service between Spuyten Duyvl on the Hudson line and the main line of the Northeast corridor. This proposal, referred to as the west side connection, would allow the Empire Service trains from upstate New York to connect directly with the Northeast corridor at Penn Station. The connection is expected to yield benefits of approximately $10 million a year. Is my understanding correct as to the inclusion within the Senate amendment of this provision?

Mr. FLORIO. The gentleman is correct in both regards.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. LENT. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

Does the gentleman mean we are finally going to get rid of the Alaskan Railroad?

Mr. LENT. That is correct.

Mr. ROUSSELOT. Fantastic.

Mr. LENT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. SEIBERLING. Mr. Speaker, reserving the right to object, and I will not object, I would just like to ask the gentleman, it is my understanding that this contains the provisions with respect to the land transactions and native rights that were worked out with the representatives of the House Committee on Interior and Insular Affairs, and that the Senate worked out the compromise on the acquisition cost.

Mr. FLORIO. Mr. Speaker, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from New Jersey.

Mr. FLORIO. I thank the gentleman for yielding.

That is exactly correct.

Mr. SEIBERLING. Mr. Speaker, I strongly support this remarkable achievement, and I commend the gentleman from New Jersey for his role in achieving it.

Mr. Speaker, in addition to the concerns for pipeline and rail safety and the other aspects of this bill which I share with all of our colleagues, I have a particular concern for the portion of the bill dealing with the transfer of the Alaska Railroad to the State of Alaska. This concern arises from my responsibilities as chairman of the Subcommittee on Public Lands and National Parks of the Committee on Interior and Insular Affairs.

In conjunction with the distinguished chairman of our full committee, Mr. UDALL, I have carefully reviewed the Alaska Railroad provisions of the bill now before us. I am glad to be able to inform the House that those provisions, which are in title VI of the bill, are in accord with the positions taken by our committee and by the House as a whole after this legislation was reported from our committee and from the Committee on Energy and Commerce.

Therefore, I support the motion to concur in the amendment of the Senate, and I ask unanimous consent to revise and extend my remarks at this point in the RECORD.

When legislation to transfer the Alaska Railroad was proposed originally in the House, the Committee on Interior and Insular Affairs, through our chairman, Mr. UDALL, noted that we had a distinct interest because such a transfer inevitably involved matters within our committee's jurisdiction under the Rules of the House. Accordingly, the bill reported by the Committee on Energy and Commerce (H.R. 6308) was also referred to our committee, and we added a number of provisions relating to the procedures, terms, and conditions of the transfer. Thanks to the generous cooperation of the Committee on Energy and Commerce, and especially of the chairman of the subcommittee involved, Mr. FLORIO, those provisions were included within the bill that was brought to the floor and which the House passed on August 12, 1982.

Since that time, our committee has continued to play an active role with regard to the proposals to transfer the railroad, insofar as those proposals have involved matters within our jurisdiction.

By way of background, I should explain that the Alaska Railroad was authorized to be built by an act of Congress in 1914, and has been in operation since 1923. It is currently administered by the Department of Transportation. The railroad extends from the port town of Seward, at the southern end of the Kenai Peninsula, to Fairbanks. Between Anchorage and Fairbanks, its route passes through a portion of the Denali National Park and Preserve. Between Anchorage and Seward, the route crosses the Chugach National Forest.

Under the rules of the House, the Committee on Interior and Insular Affairs has jurisdiction over both the national park system and the national forests which were created by reservations from the public domain; the Chugach National Forest is in that category.

A number of Native corporations have asserted claims to land held by the railroad, under the provisions of the Alaska Native Claims Settlement Act. Generally, these claims are premised on section 3(e) of that act, which defines "public lands" for purposes of that act. Only public lands were to be made available for Native selections under the act. That section, in pertinent part, defines "public lands" as "all Federal lands and interests therein except: First, the smallest practicable tract, as determined by the Secretary of the Interior enclosing land actually used in connection with the administration of any Federal installations * * *". To date, there has been no final determination of what is the smallest practicable tract of land actually used by the Alaska Railroad; thus there has been no final determination of the validity of the several selections of railroad-held properties by the Native corporations.

The Committee on Interior and Insular Affairs, of course, has exclusive jurisdiction, under the rules of the House, over all matters involving Indians, including the Alaska Native Claims Settlement Act.

The 1914 act providing for establishment of the Alaska Railroad requires (43 U.S.C. 975d) that "all patents for lands taken up, entered, or located in Alaska after March 12, 1914" must include a reservation for rights-of-way for the construction of railroads, telegraph, and telephone lines. The significance of this requirement and its relationship to subsequent provisions of laws such as the Alaska Statehood Act, the Alaska Native Claims Settlement Act, and the Alaska National Interest Lands Conservation Act, which includes a title, title XI, dealing with rights-of-way across certain Federal lands, is unclear. It is also unclear whether such a reserved right would be held to be transferred to the State in the event of transfer of the Alaska Railroad, without clear provisions in any transfer legislation.

These also are matters within the special responsibilities and concerns of the Committee on Interior and Insular Affairs.

Let me briefly address myself to each of these matters and the postion on each which was taken by the Committee on Interior and Insular Affairs, positions which were reflected in the House bill, H.R. 6308, which dealt with the transfer of the railroad.

First, with regard to the portions of the railroad which cross Denali National Park and Preserve and the Chugach National Forest: The Committee on Interior and Insular Affairs concluded, as our committee's report (97-571, part II) explained, that "the exact status of the Railroad's present holdings" within those areas "is not to be viewed as determinative of the question of the extent to which those holdings should be transferred to the State." It was our view, and the view endorsed by the House through passage of H.R. 6308, that the State should be granted a railroad easement through Denali National Park and Preserve and the Chugach National Forest so as to allow continued operation of the railroad without creating new administrative and management problems arising from the creation of new non-Federal inholdings.

As it comes back to us from the Senate, the bill now before us meets our committee's concerns about the relationship between the railroad and the national park and national forest system, once the railroad is no longer in Federal ownership. Under section 604(b)(1)(D), on the date of transfer of the railroad the State will be granted an exclusive use easement for the portion of the railroad within Denali National Park and Preserve. This easement may be used only for railroad purposes and for such other transportation, transmission, or communication purposes for which the park lands subject to the easement were used on the date of enactment of the bill. And while under the bill the State will receive outright title to the portion of the railroad within the boundaries of the Chugach National Forest, that part of the railroad will be subject to all the laws and regulations for the protection of the resources and values of the national forest, pursuant to section 608(d) of the bill. Similarly, section 608(d) provides that the railroad-easement lands within the boundaries of the national park will be subject to all the laws and regulations for protection of the resources and values of the park, and also explicitly states that the Secretary of the Interior must concur before the State may be permitted to fence any of the lands within the national park affected by the railroad easement.

The bill is also acceptable with regard to the treatment of the various Native claims affecting railroad holdings. On this topic, I believe that it would be helpful to provide Members with some background information and a detailed discussion.

Since the enactment of the Alaska Native Claims Settlement Act (ANCSA) in 1971 there has been considerable controversy between village corporations representing Alaska Native villages located proximate to the Alaska Railroad (ARR) and the Federal Railroad Administration (FRA) regarding the validity of land selections filed by the corporations for lands which were reserved or withdrawn prior to the date of enactment of ANCSA for the use of the ARR.

If village corporation selections of ARR lands are valid they represent a solemn commitment of the United States to the Alaska Native people. However, ARR lands essential to the continued operation of the railroad by the State of Alaska should remain a part of the rail properties of the Alaska Railroad. The bill now before us reconciles these two competing policy goals in the following manner.

After enactment, and even on the date of transfer of the Railroad to the State, ARR lands, which are subject to claims of valid existing rights, including but not limited to land selection applications filed by village corporations pursuant to ANCSA, will remain in Federal ownership until such time as the validity of such claims is determined.

With respect to village corporation land selections, during the 10-month period following the date of enactment, the Secretary of the Interior, the State, and the village corporations with pending claims will make a good faith effort to agree whether ARR lands which have been selected by a village corporation should be conveyed to the corporation or the State. If the parties agree that a particular parcel of land which is the subject of a village corporation land selection application should be conveyed to the corporation, the parcel shall be immediately conveyed to the village corporation and the regional corporation representing the region within which the village is located, pursuant to the terms and conditions of ANCSA, and the acreage of the parcel will be deducted from the acreage entitlement of the village corporation under that act.

With respect to the village of Cantwell, its village corporation has been merged into Ahtna, Inc., a regional corporation; for purposes of this bill then, Ahtna, Inc. is the village corporation for Cantwell.

The conveyance of a parcel of land to Native corporations as the result of an agreement between the parties shall not give rise to a presumption as to whether the parcel is or is not public land. Consequently, if a native corporation which has received a conveyance desires to compel the Federal Railroad Administration to pay the corporation any of the proceeds derived from the parcel subsequent to its selection by a village corporation, the corporation must file a civil action and obtain declaratory relief that the parcel is in fact public land within the meaning of the relevant provisions of ANCSA.

If the parties agree that a particular parcel of land which is the subject of a village corporation land selection application should remain part of the rail properties of the Alaska Railroad, the parcel shall be conveyed to the State pursuant to section 604(b)(2).

If at the end of the 10-month negotiation period the parties have not

agreed that a particular parcel of land which is the subject of a selection application filed by a village corporation should be conveyed to either the corporation or the State, the Secretary of the Interior shall adjudicate whether the parcel is public land available for selection by and conveyance to the corporation pursuant to ANCSA. The Secretary shall make his determination based on the standards set forth in the regulations implementing section 3(e) of ANCSA which he promulgated on October 22, 1980 (43 C.F.R. subpart 2655). The Secretary of the Interior shall complete his final administrative adjudication with respect to each parcel of land which is the subject of a village corporation land selection application within 2 years from the date of enactment of this act. However, the Secretary of the Interior shall not adjudicate the validity of a village corporation's selection of a parcel of land which is the subject of an agreement between the parties. "Final administrative adjudication" means the administrative procedure which the Bureau of Land Management, the Interior Board of Land Appeals, and the Secretary of the Interior employ to determine the availability of lands subject to a land selection application filed by a Native corporation for selection by and conveyance to Native corporations pursuant to ANCSA.

If the Secretary of the Interior determines that a parcel of land is public land available for selection by and conveyance to Native corporations, he shall immediately convey such parcel to the appropriate corporations, pursuant to the terms and conditions of ANCSA and shall deduct the acreage of the parcel from the acreage entitlement of the village corporation which filed the selection application. If the Secretary of the Interior determines that the parcel is not public land he shall immediately convey the parcel to the State pursuant to section 604(b)(2).

A decision by the Secretary of the Interior as the result of a final administrative adjudication that a parcel of land is or is not public land available for selection by and conveyance to Native corporations may be the subject of judicial review, in the U.S. District Court for the District of Alaska and by the appellate courts. The party seeking judicial review may request the district court and the appellate courts, as appropriate, to enjoin the conveyance of the parcel to the opposing party and for other appropriate injunctive relief. Similarly, injuctive relief is also available with respect to judicial review of any other administrative action undertaken pursuant to this act. However, neither the district court nor the appellate courts may enjoin or otherwise delay the transfer of the railroad to the State or grant injunctive relief which will substantially impair or impede the operation of the railroad.

Prior to a decision by the State not to accept the transfer of the railroad, the State shall have standing to participate in both the administrative proceedings of the Secretary of the Interior relating to his final administrative adjudication of a village corporation's selection of lands among the rail properties of the Alaska Railroad and the proceedings of the district and appellate courts relating to judicial review of the final administrative adjudication. However, the State's standing shall cease at any time it determines not to accept the transfer of the Alaska Railroad and it shall not participate further in any administrative or judicial proceedings to which it was a party prior to the date of such determination. The State's standing to participate in any other administrative proceedings or judicial review pursuant to this act also shall cease at any time it determines not to accept the transfer of the Alaska Railroad.

Because of the importance of lands within the right-of-way to the continued operation of the State-owned railroad, if a village corporation land selection application includes lands within a portion of the right-of-way, the village corporation may relinquish its claim to the lands within the right-of-way at any time prior to a final administrative adjudication of the validity of its selection of the lands described in the application. In lieu of the lands within the right-of-way claims to which are so relinquished, the village corporation shall be conveyed lands from among its other selections or, if its other selections are insufficient to insure that the corporation will receive conveyance of its full acreage entitlement, from lands withdrawn for selection by and conveyance to the corporation pursuant to section 22(j)(2) of ANCSA, as amended. Under no circumstances shall relinquishments of lands within the right-of-way, relinquishments of lands as the result of an agreement between a village corporation and the State pursuant to section 606(b)(1)(A), or any other agreement, or administrative or judicial action undertaken as a result of this act result in a diminishment of the acreage entitlement of any Native Corporation pursuant to ANCSA. However, if lands within a portion of the right-of-way should revert to the Federal Government pursuant to section 610, Native corporations whose property abutts the portion of the right-of-way which is the subject of the reversion shall, like all other landowners whose property abutts the right-of-way, receive conveyance of the right-of-way pursuant to section 610(c), and lands within the right-of-way conveyed pursuant to section 610(c) shall not be deemed to have been conveyed pursuant to ANCSA and shall not be charged against the acreage entitlement of any Native corporation.

If a village corporation does not relinquish lands within the right-of-way which are described in a land selection application, the availability for selection and conveyance of the lands described in the application shall be adjudicated by the Secretary of the Interior pursuant to the standards set forth in the regulations implementing section 3(e) of ANCSA which were promulgated on October 22, 1980. If the lands described in the application are determined by the Secretary of the Interior to be available for selection by and conveyance to the corporation pursuant to those regulations, the Secretary of the Interior must then determine whether to retain the lands within the right-of-way in fee and convey such lands to the State pursuant to section 604(b)(2) of this act or to convey the lands within the right-of-way to the appropriate Native corporations reserving an easement for railroad purposes pursuant to section 17(b) of ANCSA. In this regard section 606(b)(4)(A)(ii) of the bill makes it clear that the Congress has determined that reserving an easement rather than retaining the lands within the right-of-way in fee will not afford the State sufficient protection or safe and economic operation of the railroad. Consequently, under this bill, the Secretary of the Interior shall not convey to the appropriate Native corporations the lands within the right-of-way; instead the Secretary of Transportation shall convey such lands to the State, pursuant to section 604(b)(2).

It should be emphasized that the above-described procedures for settling claims of valid existing rights filed by village corporations apply only to the settlement of claims to lands which have been validly claimed by the Alaska Railroad prior to the date of enactment of ANCSA under a public land order, executive order, statute, or similar color of law.

Between the date of enactment of the bill now before us and the conveyance of a parcel of land to the appropriate Native corporations pursuant to the above-described procedures, the Federal Railroad Administration shall administer each parcel of land which is the subject of a land selection application files by a village corporation pursuant to applicable law and the terms and conditions of the memorandum of understanding described in section 607(b)(3) regardless of whether a particular village corporation has signed the memorandum. Similarly, between the date of transfer and the conveyance of a parcel of land to the appropriate Native corporations, the State shall conform its occupation and use of the parcel to the terms and conditions of the memorandum regardless of whether the village corporation which selected the parcel has signed the memorandum.

It should be emphasized that with the exception of first, the 10-month negotiation period set forth in section 606(b)(1)(A); second, the authority of

a village corporation to relinquish lands within a portion of the right-of-way without having to relinquish all of the other lands which are the subject of the same land selection application as set forth in section 607(b)(4)(A)(i); third, the occupancy, use, and administration of lands by the Federal Railroad Administration and the State pursuant to the terms and conditions of the memorandum of understanding described in section 606(b)(3); fourth, the State's standing to participate in administrative and judicial proceedings pursuant to section 606(c)(3); and fifth, section 606(a) and 606(d), nothing in this bill is intended to deny, enlarge, grant, impair, or otherwise affect any judgment heretofore entered in a court of competent jurisdiction, or valid existing right or claim of valid existing right or other interest of any Native corporation under ANCSA or the Alaska National Interest Lands Conservation Act. This is made clear by the terms of section 613(e).

Similarly, it should be emphasized that nothing in this act is intended to enlarge, diminish, or in any way alter the responsibility of the Federal Railroad Administration, and after the date of transfer the State, to deposit the proceeds derived from lands selected by Native corporations into the escrow account established by section 2 of Public Law 94-204, as amended. If lands which have been administered by the Federal Railroad Administration and selected by Native corporations are public lands which will be conveyed to Native corporations pursuant to ANCSA or as a result of the enactment of this act, then the Native corporations which receive conveyance of the lands are entitled to the proceeds which have been derived from those lands subsequent to the filing of their land selection applications. If such lands are adjudicated not to be public lands available for Native corporation selection and conveyance, then the proceeds derived from such lands remain the property of the Federal Railroad Administration, or after the date of transfer, the State.

Unfortunately, since 1976 the Federal Railroad Administration has failed to deposit any proceeds from lands subject to Native corporation land selection applications into the escrow account. However, pursuant to section 604(d)(2)(B) the United States remains responsible for all claims against the Alaska Railroad, including but not limited to claims against the Federal Railroad Administration for failure to deposit proceeds in the escrow account. Similarly, although the State is authorized pursuant to section 604 (b)(1)(C) and (b)(4) to receive all benefits of lands which are the subject of the exclusive license, pursuant to section 604(d)(2)(A) the State also is responsible for the obligations of the Alaska Railroad after the date of transfer. And such obligations may include the obligation to deposit the proceeds derived from lands which are the subject of land selection applications filed by Native corporations into the escrow account until such time as the lands are conveyed to either the Native corporations or the State.

Finally, Mr. Speaker, there are the remaining matters of concern to the Committee on Interior and Insular Affairs which are touched on in this bill.

Section 615(a)(1) provides that, on the date of transfer of the Railroad or other disposal of the Railroad pursuant to section 611, the original act of March 12, 1914, pursuant to which the railroad came into being, will be repealed. The reference to "other disposition" reflects the fact that section 611 gives the State 1 year after enactment of the bill to fulfill the conditions imposed for the State's receipt of the railroad and that if the State does not meet those conditions within that period, the Secretary of Transportation then will be authorized to dispose of the railroad. Such disposal would apparently be by sale, lease, or similar transaction. In any event, section 612 makes it clear that should the Secretary, under the authority of section 611, dispose of the railroad to any party other than the State, such party will receive no greater rights within the Denali National Park and Preserve than the State would receive under the other provisions of the bill. Similarly, it is our understanding that the portion of the Railroad within the Chugach National Forest would, under section 608(d), remain subject to the laws and regulations for protection of the values and resources of the national forest, regardless of the transfer of the title of those railroad lands.

As to future rights-of-way, section 609(a) provides that such rights-of-way for additions to or expansions of the railroad will be granted only in accordance with the provisions of applicable existing law, including but not limited to the Federal Land Policy and Management Act of 1976, the Alaska National Interest Lands Conservation Act, or the National Environmental Policy Act. Applicable existing law will also govern the granting of future leases, permits, or conveyances for terminal and station grounds and material sites which may be sought in connection with future rights-of-way.

In this connection, I should point out that the phrase "right-of-way" is used in different ways in different parts of title VI. Except with regard to section 609, the section dealing with future rights-of-way that may be applied for, for extending the railroad, the term refers to an area extending for certain specified distances on each side of the centerline of the railroad's main or branch lines—that is, those lines where railroad tracks are now in place. I believe that it is generally understood and agreed that there are places along the railroad's route where the railroad in fact has control over slightly different areas besides its tracks than the general area addressed in the definition section, whether because of ownership patterns, prior Federal actions, or for other reasons.

I should also point out, Mr. Speaker, that the Committee on Interior and Insular Affairs has not been involved in the debate over whether the United States should receive monetary or other compensation for the transfer of the railroad. That matter, in the House, is within the jurisdiction of the Committee on Energy and Commerce.

Mr. Speaker, let me conclude by pointing out that the Committee on Interior and Insular Affairs has attempted to act in an expeditious and cooperative manner with regard to this important legislation, while at the same time fulfilling our responsibilities under the rules of the House for a careful review of those aspects of this bill which are within our jurisdiction. I want to express my appreciation for the courtesy and consideration of the members of the Committee on Energy and Commerce, and in particular Mr. FLORIO, the chairman of the Subcommittee on Commerce, Transportation, and Tourism. So far as concerns the provisions of title VI, relating to the Alaska Railroad, the bill that they have brought before the House today is sound and I believe that it deserves the approval of the House.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey (Mr. FLORIO)?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from New Jersey?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FLORIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the three conference reports on H.R. 5470, H.R. 7093, and H.R. 6056.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

CONFERENCE REPORT ON H.R. 6056, TECHNICAL CORRECTIONS ACT OF 1982

Mr. ROSTENKOWSKI submitted the following conference and statement on the bill (H.R. 6056) to make technical corrections related to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980:

CONFERENCE REPORT

[To accompany H.R. 6056]

The committee of conference on the disagreeing votes of the two Houses on the Senate amendments numbered 9, 15, 18, 24, and 27 to the bill (H.R. 6056) to make technical corrections related to the Economic Recovery Tax Act of 1980, and the Installment Sales Revision Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revenues Act of 1980, and on the disagreeing votes of the two Houses on the House amendments to the Senate amendments numbered 1, 10, 14, 16, 17, 26, 30, 31, 33, 34, 36, and 37 to such bill, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 9 and 15.

That the House recede from its disagreement to the amendments of the Senate numbered 24 and 27; and agree to the same.

That the Senate recede from its disagreement to the House amendments to the Senate amendments numbered 1, 10, 14, 17, 26, 33, 34, 36, and 37; and agree to the same.

That the Senate recede from its disagreement to the House amendment to the Senate amendment numbered 16 and agree to the same with an amendment as follows:

In lieu of striking out the matter proposed to be stricken out by the House amendment, strike out line 24 on page 7 of the Senate amendments and all that follows down through line 23 on page 8 of the Senate amendments and, in lieu of inserting the matter proposed to be inserted by the House amendment, insert the following:

(ii) ELECTION BY TAXPAYER OF RETROACTIVE APPLICATION.—

(I) RETROACTIVE APPLICATION.—If the taxpayer so elects, the amendments made by subparagraphs (B) and (C) shall apply as if included within the amendments made by title V of the Economic Recovery Tax Act of 1981.

(II) ADDITIONAL CHOICES WITH RESPECT TO 1981.—If the taxpayer held a foreign currency contract after December 31, 1980, and before June 24, 1981, and such taxpayer makes an election under subclause (I), such taxpayer may revoke any election made under section 508(c) or 509(a) of such Act, and may make an election under section 508(c) or 509(a) of such Act.

(III) ADDITIONAL CHOICES APPLY TO ALL REGULATED FUTURES CONTRACTS.—Except as provided in subclause (IV), in the case of any taxpayer who makes an election under subclause (I), any election under section 508(c) or 509(a) of such Act or any revocation of such an election shall apply to all regulated futures contracts (including foreign currency contracts).

(IV) SECTION 509(a) (3) AND (4) NOT TO APPLY TO FOREIGN CURRENCY CONTRACTS.—Paragraphs (3) and (4) of section 509(a) of such Act shall not apply to any foreign currency contract.

(V) TIME FOR MAKING ELECTION OR REVOCATION.—Any election under subclause (I) and any election or revocation under subclause (II) may be made only within the 90-day period beginning on the date of the enactment of this Act. Any such action, once taken, shall be irrevocable.

(VI) DEFINITIONS.—For purposes of this clause, the terms "regulated futures on contract" and "foreign currency contract" have the same respective meanings as when used in section 1256 of the Internal Revenue Code of 1954 (as amended by this Act).

(iii) ELECTION BY TAXPAYER WITH RESPECT TO POSITIONS HELD DURING TAXABLE YEARS ENDING AFTER MAY 11, 1982.—In lieu of the election under clause (ii), a taxpayer may elect to have the amendments made by subparagraphs (B) and (C) applied to all positions held in taxable years ending after May 11, 1982, except that the provisions of section 509(a) (3) and (4) of the Economic Recovery Tax Act of 1981 shall not apply.

And the House agree to the same.

That the House recede from its disagreement to the Senate amendment numbered 18 and agree to the same with an amendment as follows:

In lieu of inserting the matter proposed to be inserted by the Senate amendment numbered 18, insert the following:

(4) CREDIT OR REFUND FOR BENEFICIARIES OF TRUST OWNING ROYALTY INTERESTS.—

(A) IN GENERAL.—Subchapter B of chapter 65 (relating to rules of special application) is amended by adding at the end thereof the following new section:

"SEC. 6430. CREDITOR REFUND OF WINDFALL PROFIT TAXES TO CERTAIN TRUST BENEFICIARIES.

"(a) GENERAL RULE.—That portion of the tax imposed by section 4986 (relating to crude oil windfall profit tax) which is paid by any trust with respect to any qualified beneficiary's allocable trust production shall be treated as an overpayment of such tax by such qualified beneficiary. Any such overpayment shall be credited against the tax imposed by section 4986 or refunded to such qualified beneficiary.

"(b) COORDINATION WITH ROYALTY EXEMPTION.—

"(1) IN GENERAL.—If the aggregate amount of the allocable trust production of any qualified beneficiary for any calendar year exceeds such beneficiary's unused exempt royalty limit for such calendar year, then the amount treated as an overpayment under subsection (a) with respect to such qualified beneficiary shall be reduced by an amount which bears the same ratio to the amount which (but for this paragraph) would be so treated as—

"(A) the amount of such excess, bears to

"(B) the aggregate amount of such allocable trust production.

"(2) UNUSED EXEMPT ROYALTY LIMIT.—The unused exempt royalty limit of any qualified beneficiary for any calendar year is the excess of—

"(A) the number of days in such calendar year, multiplied by the limitation in barrels determined under the table contained in section 4994(f)(2)(A)(ii), over

"(B) the amount of exempt royalty oil (within the meaning of section 4994(f))—

"(i) with respect to which such qualified beneficiary is the producer, and

"(ii) which is removed from the premises during such calendar year.

"(3) ALLOCATION.—Rules similar to the rules of paragraphs (2), (3), and (4) of section 6429(c) shall apply to the amount determined under paragraph (2)(A).

"(c) ALLOCABLE TRUST PRODUCTION.—For purposes of this section—

"(1) IN GENERAL.—The term 'allocable trust production' means, with respect to any qualified beneficiary, the qualified royalty production of any trust which—

"(A) is removed from the premises during the calendar year, and

"(B) is allocated to such qualified beneficiary under paragraph (2).

"(2) ALLOCATION OF PRODUCTION.—

"(A) IN GENERAL.—The qualified royalty production of a trust for any calendar year shall be allocated between the trust and its income beneficiaries as follows:

"(i) there shall be allocated to the trust an amount of production based on the amount of any reserve for depletion for the calendar year with respect to qualified royalty production, and

"(ii) production not allocated under clause (i) shall be allocated between the trust and the income beneficiaries in accordance with their respective shares of the adjusted distributable net income for the calendar year.

"(B) DEFINITION AND SPECIAL RULE.—For purposes of this paragraph—

"(i) ADJUSTED DISTRIBUTABLE NET INCOME.—The term 'adjusted distributable net income' means distributable net income (as defined in section 643) for the calendar year reduced by the excess (if any) of—

"(I) any reserve for depletion for such year with respect to qualified royalty production, over

"(II) the amount allowable as deduction for depletion to the trust for such year with respect to qualified royalty production.

"(ii) ALLOCATION PRO RATA FROM EACH UNIT OF PRODUCTION.—Allocations under subparagraph (A) shall be treated as made pro rata from each unit of the qualified royalty production.

"(3) PRODUCTION FROM TRANSFERRED PROPERTY.—

"(A) IN GENERAL.—The allocable trust production of any qualified beneficiary shall not include any production attributable to an interest in property which has been transferred after June 9, 1981, in a transfer which—

"(i) is described in section 613A(c)(9)(A), and

"(ii) is not described in section 613A(c)(9)(B).

"(B) EXCEPTIONS.—Subparagraph (A) shall not apply in the case of any transfer so long as the transferor and the qualified beneficiary are required by subsection (b)(3) to share the amount determined under subsection (b)(2)(A). The preceding sentence shall apply to the transfer of any property only if the production attributable to the property was allocable trust production or qualified royalty production of the transferor.

"(d) DEFINITIONS.—For purposes of this section—

"(1) QUALIFIED BENEFICIARY.—The term 'qualified beneficiary' means any individual or estate which is a beneficiary of any trust which is a producer.

"(2) QUALIFIED ROYALTY PRODUCTION.—The term 'qualified royalty production' means, with respect to any person, taxable crude oil (within the meaning of section 4991(a)) which is attributable to an economic interest of such person other than an operating mineral interest (within the meaning of section 614(d)). Such term does not include taxable crude oil attributable to any overriding royalty interest, production payment, net profits interest, or similar interest of the person which—

"(A) is created after June 9, 1981, out of an operating mineral interest in property which is proven oil or gas property (within the meaning of section 613A(c)(9)(A)) on the date such interest is created, and

"(B) is not created pursuant to a binding contract entered into before June 10, 1981.

"(3) PRODUCER.—The term 'producer' has the meaning given to such term by section 4996(a)(1).

"(e) REGULATIONS.—The Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of this section."

(B) ALLOCATION OF LIMITATION BETWEEN EXEMPT ROYALTY OIL AND ALLOCABLE TRUST PRODUCTION.—Paragraph (2) of section 4994(f) (relating to royalty limit) is amended—

(i) by striking out "A qualified" in subparagraph (A) and inserting in lieu thereof "Except as provided in subparagraph (C), a qualified", and

(ii) by adding at the end thereof the following new subparagraph:

"(C) ELECTION TO INCREASE SECTION 6430 ROYALTY CREDIT BY REDUCING EXEMPTION UNDER THIS SUBSECTION.—Any qualified royalty owner who is a qualified beneficiary (within the meaning of section 6430(d)(1)) for any quarter may elect (at such time and in such manner as the Secretary may prescribe by regulations) to reduce by any amount the qualified royalty owner's royalty limit determined under subparagraph (A) for such quarter (after the application of paragraph (3)(B))."

(C) TECHNICAL AMENDMENT.—Subparagraph (B) of section 6654(g)(3) (relating to estimated tax computed after application of credits against tax) is amended by inserting "or 6430" after "section 6429".

(D) CONFORMING AMENDMENT.—The table of sections for subchapter B of chapter 65 is amended by adding at the end thereof the following new item:

"Sec. 6430. Credit or refund of windfall profit taxes to certain trust beneficiaries."

(E) EFFECTIVE DATE.—

"(i) IN GENERAL.—Except as provided in clause (ii), the amendments made by this paragraph shall apply with respect to calendar years beginning after December 31, 1981.

"(ii) ESTIMATED TAX.—The amendment made by subparagraph (C) shall take effect on January 1, 1982.

And the Senate agree to the same.

That the Senate recede from its disagreement to the House amendment to the Senate amendment numbered 30 and agree to the same with an amendment as follows:

In the subsection (d)(1)(B)(i) proposed to be inserted by the House amendment, strike out "October 19, 1982" and insert in lieu thereof "September 30, 1982".

And the House agree to the same.

That the Senate recede from its disagreement to the House amendments to the Senate amendment numbered 31 and agree to the same with an amendment as follows:

In lieu of inserting the section 306 proposed to be inserted by the first of the House amendments to the Senate amendment numbered 31, insert the following:

SEC. 306. TECHNICAL AMENDMENTS TO THE REVENUE PROVISIONS OF THE TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982.

(a) AMENDMENTS RELATED TO TITLE II.—

(1) AMENDMENTS RELATED TO SECTION 201.—

(A) Section 201 of the Tax Equity and Fiscal Responsibility Act of 1982 is Amended—

(i) by redesignating the second subsection (c) as subsection (d), and

(ii) by striking out "subsection (c)(1)" in subsection (e)(2) and inserting in lieu thereof "subsection (d)(1)".

(B) Clause (ii) of section 55(e)(5)(B) (defining qualified investment income) is amended by striking out "net capital gain" and inserting in lieu thereof "capital gain net income".

(C) Subparagraph (B) of section 55(d)(2) (relating to adjustments to net operating loss computation) is amended by striking out "subparagraph (A)" and inserting in lieu thereof "paragraph (1)".

(2) AMENDMENT RELATED TO SECTION 204.—Paragraph (1) of section 291(a) (relating to 15-percent reduction for certain preference items is amended by adding at the end thereof the following new sentence: "Under regulations prescribed by the Secretary, the provisions of this paragraph shall not apply to the disposition of any property to the extent section 1250(a) does not apply to such disposition by reason of section 1250(d)."

(3) AMENDMENT RELATED TO SECTION 205.—paragraph (3) of section 48(q) (relating to basis adjustment to section 38 property) is amended by striking out "paragraphs (1) and (2)" and inserting in lieu thereof "paragraphs (1) and (2) of this subsection and paragraph (5) of subsection (d)".

(4) AMENDMENTS RELATED TO SECTION 208.—

(A) Subsection (d) of section 208 of such Act is amended—

(i) by striking out "described in section 1381(a)" in paragraph (3)(E)(i) and inserting in lieu thereof "engaged in the furnishing of electric energy to persons in rural areas", and

(ii) by inserting ", or section 168(f)(8)(J) of such Code, as added by subsection (b)(4)" after "as added by subsection (a)(1)" in paragraph (5) thereof.

(B) Subsection (d) of section 208 of such Act (relating to effective dates) is amended by adding at the end thereof the following new paragraph:

"(7) COORDINATION WITH AT RISK RULES.—Subparagraph (J) of section 168(f)(8) of the Internal Revenue Code of 1954 (as added by subsection (b)(4)) shall take effect as provided in such subparagraph (J)."

(C) Subparagraph (C) of section 208(d)(3) of such Act (defining transitional safe harbor lease property) is amended to read as follows:

"(C) AUTOMOTIVE MANUFACTURING PROPERTY.—

"(i) IN GENERAL.—Property is described in this subparagraph if—

"(I) such property is used principally by the taxpayer directly in connection with the trade or business of the taxpayer of the manufacture of automobiles or light-duty trucks,

"(II) such property is automotive manufacturing property, and

"(III) such property would be described in subparagraph (A) if 'October 1' were substituted for 'January 1'.

"(ii) LIGHT-DUTY TRUCK.—For purposes of this subparagraph, the term 'light-duty truck' means any truck with a gross vehicle weight of 13,000 pounds or less. Such term shall not include any truck tractor.

"(iii) AUTOMOTIVE MANUFACTURING PROPERTY.—For purposes of this subparagraph, the term 'automotive manufacturing property' means machinery, equipment, and special tools of the type included in the former asset depreciation range guideline classes 37.11 and 37.12.

"(iv) SPECIAL TOOLS USED BY CERTAIN VENDORS.—For purposes of this subparagraph, any special tools owned by a taxpayer described in subclause (I) of clause (i) which are used by a vendor solely for the production of component parts for sale to the taxpayer shall be treated as automotive manufacturing property used directly by such taxpayer."

(5) AMENDMENT RELATED TO SECTION 211.—Paragraph (2) of section 211(e) of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to effective date for foreign tax credit for taxes on oil and gas income) is amended to read as follows:

"(2) Retention of old sections 907(b) and 904(f)(4) where taxpayer had separate basket foreign loss.—

"(A) IN GENERAL.—If, after applying old sections 907(b) and 904(f)(4) to a taxable year beginning before January 1, 1983, the taxpayer had a separate basket foreign loss, such loss shall not be recaptured from income of a kind not taken into account in computing the amount of such separate basket foreign loss more rapidly than ratably over the 8-year period beginning with the first taxable year beginning after December 31, 1982.

"(B) DEFINITIONS.—For purposes of this paragraph—

"(i) The term 'separate basket foreign loss' means any foreign loss attributable to activities taken into account (or not taken into account) in determining foreign oil related income (as defined in old section 907(c)(2)).

"(ii) An 'old' section is such section as in effect on the day before the date of the enactment of this Act."

(6) AMENDMENTS RELATED TO SECTION 222.—

(A) The last sentence of paragraph (2) of section 222(f) of such Act is amended by inserting ", except that in applying such section both direct and indirect ownership of stock shall be taken into account" before the period at the end thereof.

(B)(i) Paragraph (3) of section 312(j) (relating to earnings and profits of foreign investment companies) is amended by striking out "in partial liquidation or".

(ii) The heading for paragraph (3) of section 312(j) is amended to read as follows.". "(3) REDEMPTIONS.—".

(7) AMENDMENT RELATED TO SECTION 223.—Subparagraph (B) of section 223(b)(2) of such Act (relating to effective date for changes in tax treatment of distributions of appreciated property in redemption of stock) is amended to read as follows:

"(B) either before October 21, 1982, or within 90 days after the date of such ruling."

(8) AMENDMENTS RELATED TO SECTION 224.—

(A)(i) Subsection (h) of section 338 (relating to definitions and special rules) is amended by adding at the end thereof the following new paragraphs:

"(8) TARGET NOT TREATED AS MEMBER OF AFFILIATED GROUP.—Except as otherwise provided in paragraph (9) or in regulations prescribed under this paragraph, the target corporation shall not be treated as a member of an affiliated group with respect to the sale described in subsection (a)(1).

"(9) Elective recognition of gain or loss by target corporation, together with nonrecognition of gain or loss on stock sold by selling consolidated group.—

"(A) IN GENERAL.—Under regulations prescribed by the Secretary, an election may be made under which if—

"(i) the target corporation was, before the transaction, a member of the selling consolidated group, and

"(ii) the target corporation recognizes gain or loss with respect to the transaction as if it sold all of its assets in a single transaction,

then the target corporation shall be treated as a member of the selling consolidated group with respect to such sale, and (to the extent provided in regulations) no gain or loss will be recognized on stock sold or exchanged in the transaction by members of the selling consolidated group.

"(B) SELLING CONSOLIDATED GROUP.—For purposes of subparagraph (A), the term 'selling consolidated group' means any group of corporations which (for the taxable period which includes the transaction)—

"(i) includes the target corporation, and

"(ii) files a consolidated return.

(ii) If—

(I) any portion of a qualified stock purchase is pursuant to a binding contract entered into on or after the date of the enactment of the Tax Equity and Fiscal Responsi-

bility Act of 1982, and on or before the date of the enactment of this Act, and

(II) the purchasing corporation establishes by clear and convincing evidence that such contract was negotiated on the contemplation that, with respect to the deemed sale under section 338 of the Internal Revenue Code of 1954, the target corporation would be treated as a member of the affiliated group which includes the selling corporation.

then the amendment made by clause (i) shall not apply to such qualified stock purchase.

(B)(i) Subsection (d) of section 224 of such Act is amended by adding at the end thereof the following new paragraphs:

"(4) EXTENSION OF TIME FOR MAKING ELECTIONS; REVOCATION OF ELECTIONS.—

"(A) EXTENSION.—The time for making an election under section 338 of such Code shall not expire before the close of February 28, 1983.

"(B) REVOCATION.—Any election made under section 338 of such Code may be revoked by the purchasing corporation if revoked before March 1, 1983.

"(5) RULES FOR ACQUISITIONS DESCRIBED IN PARAGRAPH (2).—

"(A) IN GENERAL.—For purposes of applying section 338 of such Code with respect to any acquisition described in paragraph (2)—

"(i) the date selected under subparagraph (B) of this paragraph shall be treated as the acquisition date,

"(ii) a rule similar to the last sentence of section 334(b)(2) of such Code (as in effect on August 31, 1982) shall apply, and

"(iii) subsections (e), (f), and (i) of such section 338, and paragraphs (4), (6), (8), and (9) of subsection (h) of such section 338, shall not apply.

"(B) SELECTION OF ACQUISITION DATE BY PURCHASING CORPORATION.—The purchasing corporation may select any date for purposes of subparagraph (A)(i) if such date—

"(i) is after the later of June 30, 1982, or the acquisition date (within the meaning of section 338 of such Code without regard to this paragraph), and

"(ii) is on or before the date on which the election described in paragraph (2)(C) is made."

(ii) Subparagraph (A) of section 224(d)(2) of such Act is amended by striking out "under paragraph (1)" and inserting in lieu thereof "(within the meaning of section 338 of such Code without regard to paragraph (5) of this subsection)".

(9) AMENDMENTS RELATED TO SECTION 231.—

(A) Clause (ii) of section 263(g)(2)(B) (defining interest and carrying charges) is amended by striking out "section 1232(a)(4)(A)" and inserting in lieu thereof "section 1232(a)(3)(A)".

(B) Section 1232 (relating to bonds and other evidences of indebtedness) is amended by redesignating subsection (d) as subsection (c).

(C)(i) The next to the last sentence of section 1232(b)(2) (defining issue price) is amended by striking out "(other than a bond or other evidence of indebtedness or an investment unit issued pursuant to a plan of reorganization within the meaning of section 368(a)(1) or an insolvency reorganization within the meaning of section 371 or 374)".

(ii) Subsection (b) of section 1232 is amended by adding at the end thereof the following new paragraph:

"(4) SPECIAL RULE FOR EXCHANGE OF BONDS IN REORGANIZATIONS.—

"(A) IN GENERAL.—If—

"(i) any bond is issued pursuant to a plan of reorganization within the meaning of section 368(a)(1) for another bond (hereinafter in this paragraph referred to as the 'old bond'), and

"(ii) the fair market value of the old bond is less than its adjusted issue price,

then, for purposes of the next to the last sentence of paragraph (2), the fair market value of the old bond shall be treated as equal to its adjusted issue price.

"(B) DEFINITIONS.—For purposes of this paragraph—

"(i) BOND.—The term 'bond' includes any other evidence of indebtedness and an investment unit.

"(ii) ADJUSTED ISSUE PRICE.—

"(I) IN GENERAL.—The adjusted issue price of the old bond is its issue price, increased by the portion of any original issue discount previously includible in the gross income of any holder (without regard to subsection (a)(6) or (b)(4) of section 1232A (or the corresponding provisions of prior law)).

"(II) SPECIAL RULE FOR APPLYING SECTION 163(e).—For purposes of section 163(e), the adjusted issue price of the old bond is its issue price, increased by any original issue discount previously allowed as a deduction."

(iii) For purposes of paragraph (4) of section 1232(b) of the Internal Revenue Code of 1954 (as added by clause (ii)), any insolvency reorganization within the meaning of section 371 or 374 of such Code shall be treated as a reorganization within the meaning of section 368(a)(1) of such Code.

(iv) The amendments made by this subparagraph shall apply to evidences of indebtedness issued after December 13, 1982; except that such amendments shall not apply to any evidence of indebtedness issued after such date pursuant to a written commitment which was binding on such date and at all times thereafter.

(10) AMENDMENT RELATED TO SECTION 235.—Section 235(g)(5) of such Act is amended by striking out "section 253" and inserting in lieu thereof "section 242".

(11) AMENDMENT RELATED TO SECTION 236.—Subsection (c) of section 236 of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to effective date) is amended by adding at the end thereof the following new paragraph:

"(3) Treatment of certain renegotiations.—If—

"(A) the taxpayer after August 13, 1982, and before September 4, 1982, borrows money from a government plan (as defined in section 219(e)(4) of the Internal Revenue Code of 1954),

"(B) under the applicable State law, such loan requires the renegotiation of all outstanding prior loans made to the taxpayer under such plan, and

"(C) the renegotiation described in subparagraph (B) does not change the interest rate on, or extend the duration of, any such outstanding prior loan,

then the renegotiation described in subparagraph (B) shall not be treated as a renegotiation, extension, renewal, or revision for purposes of paragraph (1). If the renegotiation described in subparagraph (B) does not meet the requirements of subparagraph (C) solely because it extends the duration of any such outstanding prior loan, the requirements of subparagraph (C) shall be treated as met with respect to such renegotiation if, before April 1, 1983, such extension is eliminated."

(12) AMENDMENT RELATED TO SECTION 237.—Paragraph (2) of section 401(d) (as redesignated by section 237 of the Tax Equity and Fiscal Responsibility Act of 1982) is amended by striking out "paragraph (9)(B)" and inserting in lieu thereof "paragraph (1)(B)".

(13) AMENDMENT RELATED TO SECTION 266.—Section 266(c)(3) of such Act is amended by striking out "section 103(f)(2)(C)" and inserting in lieu thereof "section 101(f)(2)(C)".

(14) AMENDMENT RELATED TO SECTION 283.—Section 283(b)(2)(B) of such Act (relating to liability for tax and method of payment) is amended by striking out "January 18" and inserting in lieu thereof "February 17".

(b) AMENDMENTS RELATED TO TITLE III.—

(1) AMENDMENTS RELATED TO SECTION 302.—

(A) Subsection (d) of section 31 (relating to year for which credit allowed) is amended to read as follows:

"(d) YEAR FOR WHICH CREDIT ALLOWED.—

"(1) WAGES.—Any credit allowed—

"(A) by subsection (a) shall be allowed for the taxable year beginning in the calendar year in which the amount is withheld, or

"(B) by subsection (c) shall be allowed for the taxable year beginning in the calendar year in which the wages are received.

For purposes of this paragraph, if more than 1 taxable year begins in a calendar year, such amount shall be allowed as a credit for the last taxable year so beginning.

"(2) INTEREST, DIVIDENDS, AND PATRONAGE DIVIDENDS.—Any credit allowed by subsection (b) shall be allowed for the taxable year of the recipient of the income in which the amount is received."

(B) Paragraph (4) of section 3(i) of the Subchapter S Revision Act of 1982 is hereby repealed.

(2) AMENDMENT RELATED TO SECTION 310.—Subsection (d) of section 310 of the Tax Equity and Fiscal Responsibility Act of 1982 (relating to effective date for requirement that obligations be registered) is amended by adding at the end thereof the following new paragraph:

"(4) EFFECTIVE DATE FOR TAX-EXEMPT OBLIGATIONS.—In the case of obligations the interest on which is exempt from tax (determined without regard to the amendments made by this section)—

"(A) under section 103 of the Internal Revenue Code of 1954, or

"(B) under any other provision of law (without regard to the identity of the holder),

the amendments made by this section shall apply only to obligations issued after June 30, 1983. The preceding sentence shall not apply in the case of any obligation which under the Internal Revenue Code of 1954 (as in effect on the day before the date of the enactment of the Tax Equity and Fiscal Responsibility Act of 1982) was required to be in registered form."

(3) AMENDMENT RELATED TO SECTION 336.—Section 7701(a) (relating to definitions) is amended by redesignating paragraph (38) (as added by section 336(a) of the Tax Equity and Fiscal Responsibility Act of 1982) as paragraph (39).

(4) AMENDMENT RELATED TO SECTION 339.—Subparagraph (B) of section 6038A(c)(2) (defining controlled group) is amended by inserting ", (b)(2)(C)," after "(a)(4)".

(5) AMENDMENT RELATED TO SECTION 354.—Paragraph (23) of section 501(c) (relating to exempt organizations) is amended by striking out "25 percent" and inserting in lieu thereof "75 percent".

(c) AMENDMENTS RELATED TO TITLE IV.—

(1) AMENDMENTS RELATED TO SECTION 402.—

(A) The second sentence of section 6226(g) (relating to determination of court reviewable) is amended by striking out "Only" and inserting in lieu thereof "With respect to the partnership, only".

(B) The second sentence of section 622(a)(6) (relating to determination of court reviewable) is amended by striking out "Only" and inserting in lieu thereof "With respect to the partnership, only".

(2) AMENDMENTS RELATED TO SECTION 405.—

(A) Subsection (b) of section 405 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended to read as follows:

"(b) PENALTY.—Subsection (a) of section 6679 (relating to failure to file returns as to organization or reorganization of foreign corporations and acquisition of their stock), as amended by section 340(b)(1), is amended by striking out 'section 6035 or 6046' and inserting in lieu thereof 'section 6035, 6046, or 6046A'."

(B) Paragraphs (2) and (3) of section 405(c) of such Act are amended to read as follows:

"(2) The section heading of section 6679, as amended by section 340(b)(2), is amended to read as follows:

"'SEC. 6679. FAILURE TO FILE RETURNED, ETC., WITH RESPECT TO FOREIGN CORPORATIONS OR FOREIGN PARTNERSHIPS.'"

"(3) The table of sections for subchapter B of chapter 68 is amended by striking out the item relating to section 6679 and inserting in lieu thereof the following:

" 'Sec. 6679. Failure to file returns, etc., with respect to foreign corporations or foreign parnerships.'"

And the House agree to the same.

EXPLANATION OF DIFFERING PROVISIONS

1. TRANSITIONAL RULE FOR REHABILITATION TAX CREDITS

Present law.—Prior to ERTA, there was a 10-percent credit for rehabilitation of both historic and nonhistoric buildings. However, a certified historic structure could qualify only if the rehabilitation was certified by the Interior Department as being consistent with the historic character of the property or the district in which the property is located. To avoid having to obtain approval of the rehabilitation, taxpayers with buildings in registered historic districts could choose not to seek a designation of the building as a certified historic structure.

ERTA made a number of changes to the rehabilitation tax credit provisions. The 10-percent credit was replaced with a three-tier credit: (1) a 15-percent credit for 30-year-old buildings, (2) a 20-percent credit for 40-year-old buildings, and (3) a 25-percent credit for certified historic structures.

As under prior law, no credit is allowed for an uncertified rehabilitation of a certified historic structure. Contrary to prior law, no credit is allowed for an uncertified rehabilitation of a building in a registered historic district that is not a certified historic structure, unless the taxpayer obtains a certificate from the Interior Department that the property is not of historic significance to the district (decertification). The purpose of the rule is to ensure that a taxpayer with a building of historic significance cannot avoid having to obtain approval of the rehabilitation by choosing not to obtain a designation of the building as a certified historic structure. If the building is decertified, either the 15- or 20-percent, but not the 25-percent credit applies.

Under a transitional rule, a rehabilitation begun before 1982 that does not qualify under ERTA for the new credits is entitled to the 10-percent credit if the rehabilitation qualifies under the pre-ERTA rules. For example, if before 1982 a taxpayer commences rehabilitation of a building in a registered historic district that is not a certified historic structure and that has not received a decertification, no credit is allowed under ERTA. However, under the transitional rule, the 10-percent credit would apply if the pre-ERTA requirements were met.

If a rehabilitation began before 1982 and did not meet either the ERTA requirements or the pre-ERTA requirements, no credit would be allowed. For example, if the taxpayer had done an uncertified rehabilitation of a certified historic structure, neither the ERTA credits nor the 10-percent credit would apply. Both the ERTA rules and the pre-ERTA rules deny credit for uncertified rehabilitations of certified historic structures.

House bill.—No provision.

Senate amendment.—Under the Senate amendment, certain uncertified rehabilitations of a certified historic structure begun before 1982 would qualify for the 10-percent credit under the pre-ERTA rules if the pre-ERTA requirements, other than the requirement that the rehabilitation of a certified historic structure must be certified, are met. Designation of the structure as a certified structure must have occurred as a result of a request filed by the taxpayer with the Interior Department after December 31, 1981, and before September 27, 1982, for a determination of whether the building is of historic significance to the district.

Conference agreement.—The conference agreement follows the House bill.

2. DEFINITION OF INDEPENDENT PRODUCER

Present Law.—An independent producer for depletion and windfall profit tax purposes is any person who is not a "refiner" or "retailer. In general, a "retailer" is any person who directly or through a related person retails in excess of $5 million of oil or natural gas (excluding bulk sales of oil or natural gas to commercial or industrial users), or oil or gas products, in any taxable year.

House bill.—No provision.

Senate amendment.—The Senate amendment provides that, in determining the value of oil or gas products sold in any year for purposes of determining whether a taxpayer is a "retailer" (for depletion and windfall profit tax purposes), excluded. The provision will apply to bulk sales after September 18, 1982.

Conference agreement.—The conference agreement follows the Senate amendment.

Revenue effect.—The provision will reduce budget receipts by less than $5 million annually.

3. QUALIFIED ROYALTY PRODUCTION OF TRUSTS

Present law.—Under present law, qualified royalty owners are exempt from the windfall profit tax on up to two barrels a day (three barrels a day after 1984) of production of qualified royalty oil. Only individuals, estates, and qualified family farm corporations are included in the definition of qualified royalty owners. Under this rule, neither a trust nor its beneficiaries are entitled to any royalty owner exemption with respect to the production of the trust.

House bill.—No provision.

Senate amendment.—Under the Senate amendment, each qualified beneficiary of a trust that has qualified royalty production ("allocable trust production") will be entitled to a refund of windfall porfit tax paid on his or her allocable share of that production. There is a limit of two barrels a day (three barrels after 1984) on the total amount of qualified royalty production with respect to which any beneficiary may claim either a royalty oil exemption (under sec. 4991(b)(5)) or a refund under the new provision.

A beneficiary's allocable share of the tax paid with respect to allocable trust production is the portion of that production which bears the same ratio to all such production as the beneficiary's allocable depletion deduction bears to the entire depletion deduction allocable to the trust and its beneficiaries. All depletion deductions are taken into account for this purpose including depletion on hard mineral, gas, and crude oil that is not royalty production.

Conference agreement.—In general, the Conference agreement follows the Senate amendment, except with respect to the method of allocating qualified trust royalty production (and any associated refund or credit) between and among the trust and its beneficiaries and for certain technical and clarifying amendments. As under the Senate amendment, each income beneficiary of a trust will be entitled to a credit for or refund of windfall profit tax paid by the trust on his or her allocable share of the qualified royalty production of the trust. No credit or refund is available with respect to production allocated to the trust.

Under the Senate amendment, this allocation was made on the basis of all the depletion deductions available with respect to oil, gas, and mineral production of the trust. Thus, under trusts requiring allocation of the depletion deduction to the trust, beneficiaries would have been unable to take advantage of the exemption even though they received a substantial portion of the income from the trust's qualified royalty production. Under the Conference agreement, allocable trust production is allocated between and among the trust and its beneficiaries according to each person's interest in total trust qualified royalty production.

Trust qualified royalty production is first allocated to the trust in an amount based on the amount of any trust reserve for depletion for the calendar year with respect to qualified royalty production. To the extent qualified royalty production remains unallocated, such production is allocated between and among the trust and its income beneficiaries according to each person's share, as a percent, of adjusted distributable net income (adjusted DNI) for the calendar year. Adjusted DNI is the distributable net income of the trust for the calendar year (regardless of the trust's taxable year) reduced by the amount of any excess in the trust depletion reserve with respect to trust qualified royalty production for the calendar year over the depletion deduction allocated to the trust under the Internal Revenue Code with respect to trust royalty production for the calendar year. Each person's allocable share of trust production is deemed to be a pro rata share of each unit (i.e., type and category, including each base price and removal price category) of oil.

The total benefit available to any qualified beneficiary of a trust through this new provision and the royalty owner's exemption provisions of the windfall profit tax may not exceed an overall limitation based on 2-barrels a day in 1981 through 1984 and 3-barrels a day in 1985 and thereafter. The amount available with respect to aggregate allocable trust production is determined by reducing the applicable limitation by the amount of any oil that is subject to the exemption for oil held directly by individuals. A beneficiary may elect, under regulations, to reduce his or her exemption amount on production owned outside of trusts so that a

greater benefit is available with respect to trust production.

The Conference agreement applies the same anti-transfer rules to this new provision as apply with respect to the royalty owner exemption for oil production owned directly by individuals. Under these rules, transfers generally result in a loss of eligibility for the refund or credit unless they are made at death or between persons who share a single limitation on the credit or refund.

The Conferees also understand that with respect to the amendments made by the bill concerning the definition of crude oil and the treatment of condensates, the appropriate source for legislative history is the report of the Committee on Finance, which last reported the provision.

The conference agreement also contains a technical amendment permitting the Secretary to reduce the estimated tax payment liability of an individual by the amount of the refund or credit provided under the amendment for purposes of the estimated tax penalty.

This provision applies with respect to calendar years beginning after December 31, 1981, except that the amendment with respect to estimated taxes is effective on January 1, 1982.

Revenue effect.—The provision will reduce budget receipts by $42 million in fiscal year 1983, $51 million in 1984, $49 million in 1985, $49 million in 1986, and $48 million in 1987.

4. Effect of Sale in Bankruptcy of Aircraft Subject to Safe-Harbor Lease

Present law.—In general, the regular investment credit applies to tangible personal property and other tangible property (generally not including a building or structural component) used in connection with manufacturing, production, or certain other activities. Property used predominantly outside the United States generally is not eligible.

Recapture of investment credit is required if the property either is disposed of or ceases to be used for a qualifying purpose prior to the end of the recovery period used for computing ACRS deductions. For example, recapture is required if 5-year recovery property is used predominantly outside the United States before the end of the 5-year recovery period.

The general rule requiring recapture upon sale of property does not apply when property subject to a safe-harbor lease is sold as a result of the bankruptcy of the lessee, if certain requirements are met (bankruptcy rule). Among the requirements that must be met is a requirement that the person who purchases the property use the property predominantly within the United States.

The safe-harbor lease rules were modified by the Tax Equity and Fiscal Responsibility Act of 1982. Those modifications do not affect either the general recapture rule or the special bankruptcy rule. The modifications do not apply to transitional safe-harbor lease property, including certain aircraft.

House bill.—No provision.

Senate amendment.—For aircraft covered by the safe-harbor lease transitional rules, the Senate amendment provides that no recapture will be required upon sale of the aircraft in bankruptcy to a person who uses the property predominantly outside the United States if the other requirements of the bankruptcy rule (other than the prohibition against foreign use) are met.

Conference agreement.—The conference agreement follows the House bill.

5. Effective Date for Registration of Tax-Exempt Obligations

Present law.—The Tax Equity and Fiscal Responsibility Act of 1982 provides that certain obligations of the United States can be issued only in registered (or book-entry) form. A similar requirement is imposed through the imposition of tax-related sanctions on State, local, foreign and private obligations to a type offered to the U.S. public which are issued after December 31, 1982.

House bill.—The original House bill contained no provision.

Senate amendment.—No provision.

House amendment.—The amendment delays for one year, to December 31, 1983, the effective date of the registration provisions of TEFRA as they apply to obligations the interest on which is exempt from Federal income tax.

Conference agreement.—The conference agreement follows the House amendment but provides for a 6-month rather than a one-year delay of the effective date. The conference agreement clarifies that the postponement of the registration requirement of TEFRA does not affect any requirements of law prior to TEFRA requiring certain bonds (e.g., housing bonds and energy bonds) to be in registered form in order to be tax exempt.

6. Transitional Safe-Harbor Lease Rule for Auto Manufacturing Property

Present law.—The safe harbor lease modifications made by the Tax Equity and Fiscal Responsibility Act of 1982 do not apply to transitional safe harbor lease property. In general, eligible property must be placed in service by January 1, 1983. However, manufacturers that produce a class of products in an industry dominated by 4 or fewer persons have until October 1, 1983, to place their property in service. This provision was intended to apply only to automobile manufacturing.

House bill.—The original House bill contained no provision.

Senate amendment.—No provision.

House amendment.—The transitional safe harbor lease rule designed for automobile manufacturers was considered unclear in that it might be read to apply in some instances to property other than automobile manufacturing property. The amendment replaces the existing definition of eligible property with a definition that clarifies the intended scope and meaning of the provision.

The amendment makes it clear that only manufacturers of finished automobiles and trucks qualify and that the property must be used directly in the taxpayers' trade or business of manufacturing automobiles or trucks. At least half of the motor vehicles produced by the taxpayer in 1981 must have been passenger cars and light-duty trucks.

The amendment clarifies the type of property eligible under the provision by referring to equipment, machinery and tools of the type included in the former ADR classification for motor vehicles. In addition to property described under that classification, eligible property includes property owned by an automobile manufacturer and used by a vendor solely for the production of component parts to be sold to such manufacturer for inclusion in the finished automobiles or trucks.

Conference agreement.—The conference agreement follows the House amendment with the following modifications. The Conference agreement eliminates the requirement that at least half of the motor vehicles produced by the taxpayer in 1981 must have been passenger cars and light-duty trucks. The conference agreement limits eligibility to property used principally by the taxpayer directly in connection with the trade or business of manufacturing automobiles or light-duty trucks. Property used principally to manufacture heavy-duty trucks or truck-tractors is ineligible. For this purpose, a light-duty truck is a truck with a gross vehicle weight of 13,000 pounds or less. This definition of gross vehicle weight follows the provisions in section 4061 of the Internal Revenue Code and the regulations thereunder.

7. Discount Obligations Issued in a Reorganization

Present law.—When obligations are issued at a discount, with two principal exceptions the discount must be included in income by the holder and is deductible by the issuer over the life of the bond. If corporate obligations are issued for securities, original issue discount arises only if either the obligations or the securities are traded on an established securities market, and the original issue discount is the excess of the redemption price of the obligations over the value of the securities. Second, original issue discount does not arise with respect to bonds issued in recapitalizations and other corporate reorganizations, whether or not publicly traded. The Tax Equity and Fiscal Responsibility Act of 1982 amended the rules applicable to original issue discount to require the income inclusion and deduction in a manner that reflects the compounding of interest. Prior to TEFRA, discount was allocated on a pro rata basis to each month in the life of the bond, resulting in an overstatement of the portion allocable to the early months and a corresponding deduction understatement in later months.

New obligations exchanged for a corporation's outstanding obligations in a recapitalization may provide for the deferral until maturity of payments exceeding both the issue price of the outstanding obligations and their fair market value at the time of the exchange. Such deferred payments are not within the definition of original issue discount and are not taxable to a holder under the original issue discount rules of section 1232A. Some issuers have claimed entitlement to deductions prior to payment and without regard to the limitations that would apply if such deferred amounts were original issue discount. The claimed treatment would produce a substantial mismatching between the timing of the issuer's deduction and the holder's income inclusion, producing a substantial revenue loss to the Treasury. Present law is unclear as to the proper treatment of such amounts.

House bill.—The original House bill contained no provision.

Senate amendment.—No provision.

House amendment.—The amendment removes the exclusion for obligations issued in a reorganization from the definition of original issue discount. Under the amendment, original issue discount will be limited to the excess of the redemption price of the obligations, when they are exchanged for outstanding obligations, over the issue price of such outstanding obligations increased for previously deducted discount. This limitation will apply where the issue price of the outstanding obligations so adjusted exceeds their fair market value. The amendment makes no change to the exception to the definition of original issue discount for obligations that are not publicly traded and are not issued in exchange for publicly traded stock or securities. The amendment applies to obligations issued after December 13, 1982, other than obligations issued pursuant to a written commitment binding on that date.

Conference agreements.—The conference agreement follows the House amendment with a modification under which the adjusted issue price of an old bond exchanged in the transaction, for purposes of determining the limitation on original issue discount to the holder, is the issue price of such bond increased by the portion of original issue discount previously includible in the income of any holder. The conferees do not intend to create any inference as to the timing of deductions for deferred interest payments allowable to an issuer of an obligation that is not considered as issued at a discount under section 1232(b)(2). The conferees understand that the Treasury Department is currently studying the question of whether deductions for deferred interest payments under obligations that are not considered as issued at a discount to the inclusion of the deferred interest in gross income by the holders of such obligations. In the event that the mismatching of conference agreement cannot be satisfactorily resolved under present law, further corrective legislation may be appropriate in the near future to prevent such mismatching.

8. SUBCHAPTER S

Present law.—The Subchapter S Revision Act of 1982 provides that a corporation making a subchapter S election must have either a taxable year ending on December 31 or other accounting period for which it establishes a business purpose. That Act generally applies to taxable years beginning after December 31, 1982. Under the analagous rule relating to partnerships, the Internal Revenue Service generally permits adoption of, or change to, a fiscal year that does not result in a deferral of income to the partners in excess of 3 months. Rev. Proc. 72-51, 1972-2 CB 832.

The Act also revised the distribution rules to allow tax-free distributions of subchapter S income.

House bill.—The original House bill contained no provision.

Senate amendment.—No provision.

House amendment.—The House amendment provides that the taxable year requirements of the Subchapter S Act will apply to any Subchapter S election made after October 19, 1982. Thus, the corporation's year must end on December 31, or at the end of any period for which it establishes a business purpose.

The House amendment provides that stock or securities transferred to a small business corporation after October 19, 1982, and before the enactment of this bill, will not trigger shareholder gain where the corporation is liquidated under section 333 before March 1, 1983.

The House amendment also allows subchapter S corporations to elect to treat distributions as dividends. This will allow a corporation to distribute its earnings and profits to avoid the passive income restrictions, or to obtain a dividends paid deduction for the accumulated earnings tax or personal holding company tax for the year prior to becoming a subchapter S corporation. It will thus not be necessary to distribute the entire amount in the accumulated adjustment account at the end of the taxable year in order to pay a dividend. The procedures for electing dividend treatment will generally be similar to the procedures of prior law (Treas. Reg. sec. 1.1375-4(c)) allowing distributions out of earnings and profits to be made prior to distributions of previously taxed income.

Conference agreement.—The conference agreement generally follows the House bill. The conferees intend that the Internal Revenue Service, in determining whether a Subchapter S corporation may have a taxable year other than a calendar year, generally will apply rules similar to the rules applicable to partnerships. Thus, based on current administrative practice, the conferees generally understand that the Service will deem the business purpose test of section 1378 to be satisfied when the corporation's fiscal year would result in deferral of income to all shareholders of three months or less. However, if a corporation which was in existence on January 1, 1982, and which has a fiscal year ending on or after September 30, 1982 and on or before December 31, 1982, is eligible to make an S election after September 30, 1982, and does so within 75 days of the close of its fiscal year that ends in 1982, then the conferees intend that retention of the same fiscal year by the S corporation will satisfy the business purpose requirement. The agreement also provides that the special liquidation relief applies with respect to stock or securities transferred to the Subchapter S corporation after September 30, 1982.

9. TREATMENT OF CERTAIN CORPORATE STOCK PURCHASES

a. Seller's consolidated return treatment

Present law.—The Tax Equity and Fiscal Responsibility Act of 1982 provided that certain stock purchases by a corporation could be treated as if the target corporation sold all its assets on the purchase date. If prior to the stock purchase the target corporation was a member of an affiliated group of corporations filing a consolidated return, it is unclear whether recapture and other tax liability of the target corporation from the deemed sale of its assets was a consolidated return liability of the selling group or a separate liability of the target corporation.

House bill.—No provision.

Senate amendment.—No provision.

House amendment.—The amendment provides that such liability will normally be a separate return liability of the target corporation. However, authority is provided pursuant to which it is contemplated that regulations will provide otherwise when consolidated return treatment achieves the appropriate result. With respect to purchase contracts entered into after TEFRA was enacted and prior to enactment of this bill, if the purchasing corporation establishes to the satisfaction of the Secretary of the Treasury that the contract was entered into on the assumption that recapture taxes would be a liability on the seller's consolidated return, the transaction will be so treated under the bill.

Because of uncertainty as to the application of the TEFRA rule, the amendment extends the period during which asset sale treatment may be elected for prior stock purchases through February 28, 1983 and permits any election already made to be revoked by that date.

Conference agreement.—The conference agreement generally follows the House amendment. However, it provides more explicit rules for the inclusion under regulations of recapture and other tax liability of the target corporation in a selling corporation's consolidated return. Under the conference agreement, regulations will provide an election if the target corporation was a member of an affiliated group which files a consolidated return for the taxable year within which the transaction takes place. Under the election, the transaction will be treated as a sale by the target corporation of all its assets in a single transaction in which gain or loss is recognized to the same extent as in an actual sale and the target corporation will be a member of the selling consolidated return group with respect to the sale. Gain or loss to any member of such selling group from the sale or exchange of the target corporation's stock is not be recognized to the extent the regulations so provide. Except as expressly provided by the regulations, this election may not be made for a transaction entered into before such regulations are promulgated.

The conference agreement also requires the purchaser to establish by clear and convincing evidence, rather than to the satisfaction of the Secretary of the Treasury, that the purchase contract was entered into with the assumption that recapture taxes would be a liability on the seller's consolidated return in order for the transaction to be so treated, as to contracts entered into prior to enactment of the bill.

b. Retroactive application

Present law.—As enacted by TEFRA, a transitional rule provided that the deemed asset sale treatment could be elected not later than November 15, 1982, with respect to stock purchases after August 31, 1980, and before September 1, 1982.

House bill.—The original House bill contained no provision.

Senate amendment.—The Senate amendment provides that the date the taxpayer makes the election, rather than the date of the stock purchase, will be the date of the deemed sale of assets for transactions qualifying under this transitional rule. Adjustments must be made for distributions and other items attributable to operations of the target corporation between the stock purchase date and the date of election. Certain rules requiring consistency of treatment when several acquisitions are made from the same affiliated group of corporations would not apply. Under the Senate amendment, an election made before September 28, 1982, under this transition rule could be revoked not later than November 15, 1982.

House amendment.—The House provision modifies the Senate amendment to provide that the deemed asset sale with respect to these stock purchases will be effective for a date selected by the taxpayer which is after the later of June 30, 1982, or the stock purchase date and on or before the date of the election. The rule that would allow an election or revocation of an election to be made by February 28, 1983, would apply to these transitional rule elections under the House amendment. Any election made on or before November 15, 1982, may be revoked for the purpose of making a new election that selects another date for the deemed asset sale as provided above.

The House amendment also clarifies that certain tax-free transfers of the target corporation's stock or assets within the purchasing corporation's affiliated group will not result in disqualification of a transitional rule election.

Conference agreement.—The Conference agreement generally follows the Senate amendment as modified by the House amendment.

10. REGULATED FUTURES CONTRACTS

a. Bank forward contracts

Present law.—Contracts providing for the future delivery of foreign currency may be entered into with certain commercial banks comprising an informal interbank market or as regulated futures contracts which are taxed under the mark-to-market rules. Contracts traded in the interbank market are not assignable without the consent of the bank, and therefore, as in the case of regulated futures contracts, are not includible in inventory.

House bill.—The House bill would place foreign currency contracts traded through the interbank market under the mark-to-market rules applicable to regulated futures

contracts. This treatment would apply only to contracts involving those currencies which are also the subject of trading on regulated futures exchanges. The Secretary of the Treasury would be authorized to prescribe rules to determine the value of contracts and to disregard the terms of a contract which preclude the determination of readily ascertainable value. The bill would apply to contracts entered into after May 11, 1982.

Senate amendment.—The Senate amendment is the same as the House bill with modifications to permit certain taxpayer elections. Taxpayers may elect to have the amendment apply to positions held on and after May 11, 1982. In addition, the amendment provides that taxpayers may elect to extend the amendment to positions held in 1981. Taxpayers so electing would have 90 days after the date of enactment of this bill to have certain ERTA elections apply to 1981 positions.

House amendment.—The amendment revises and clarifies the rules applicable in determining whether a position will be treated as a foreign currency contract subject to mark-to-market treatment. The amendment provides that these contracts must be entered into at arm's length at a price determined by reference to the price in the interbank market and authorizes the issuance of regulations necessary or appropriate to carry out the purpose of the amendment, including regulations which would exclude from mark-to-market treatment contracts, or types of contracts, which are inconsistent with the purpose of the amendment.

Thus, for example, terms which attempt to make the contracts transferable in such a way to allow them to be held as inventory (which would make them unlike futures contracts) could cause them to be ineligible for mark-to-market treatment.

Contracts traded in the interbank market generally include not only contracts between a commercial bank and another person but also contracts entered into with a futures commission merchant who is a participant in the interbank market. A contract between two persons neither of whom is a futures commission merchant or other similar participant in the interbank market is not a foreign currency contract under the provision. If there is a change in the parties to a foreign currency contract under the relevant non-tax law, the transaction resulting in such change will be treated as a termination of the contract with respect to the original parties and the entering into of a new contract which, in order to be treated as a foreign currency contract subject to mark-to-market treatment, must independently qualify as such under the rules.

It is contemplated that, under the regulatory authority provided in the bill, the Internal Revenue Service may publish periodic rulings or similar statements (i) that provide guidance as to whether a price is determined by reference to the interbank market and (ii) that specify a type of contract or identify specific contracts that are excluded from the definition of foreign currency contract. In general, a price is determined by reference to the price in the interbank market if it is a price that would be obtainable from a bank that is a substantial participant in the interbank market. In making this determination, proper adjustments may be made for differences attributable to variations in the contracts customary in the interbank market, such as provisions relating to reasonable and customary commissions, the amount of currency under the contract, and the credit worthiness of the parties.

Significant price fluctuations may occur rapidly, frequently within a period of several hours, in the commodities markets and similar markets, including the interbank market. Present law provides generally that a dealer in securities must identify a security as held for investment by the close of the day on which it is acquired and a similar identification requirement applies to positions constituting hedges excluded from mark-to-market rules and other limitations on commodities straddles. Identification does not establish a taxpayer's purpose in holding a position but merely provides a statutory condition in addition to satisfying, as a matter of fact, that such position is held for investment, as inventory, or as a hedge. A taxpayer's purpose with respect to a position generally is formed quickly, frequently before the position is acquired. Thus, characterization of a position on a taxpayer's books several hours after the position was acquired may have little or no probative value in supporting the taxpayer's claim that such characterization is the correct one.

The amendment modifies the 1982 election to permit a taxpayer to apply the amendment to positions held at any time during their 1982 taxable year.

Conference agreement.—The conference agreement generally follows the House bill and the House amendment with a clarifying modification. Under the modification, a taxpayer who held a foreign currency contract during 1981 and before June 24, 1981, who elects to have the amendment apply to foreign currency contracts held in 1981, may make a new election under either section 508(c) or section 509(a) of ERTA. For an electing taxpayer, and election under section 508(c) or 509(a) of ERTA must be applied to all regulated futures contracts, including foreign currency contracts.

Revenue effect.—This provision will reduce fiscal year budget receipts by $18 million in 1983.

b. Cash settlement contracts

Present law.—Regulated futures contracts taxed under the mark-to-market rules are defined to include only contracts that require the delivery of personal property. Since the enactment of ERTA, trading has commenced in a number of mark-to-market futures contracts calling only for cash settlement. Some contracts provide for cash settlement as an alternative to the delivery of personal property.

Settlement or other termination of a contract results in capital gain or loss notwithstanding the absence of a sale or exchange only if the contract is with respect to personal property that would be a capital asset in the hands of the taxpayer.

House bill.—The House bill deletes the provision that a contract must require the delivery of personal property to be treated as a regulated futures contract subject to mark-to-market treatment.

Senate amendment.—The Senate amendment retains the present law definition of a regulated futures contract but provides that cash settlement contracts requiring the delivery of an amount of cash determined by reference to the value of any property or index based on that value will meet the delivery of personal property requirement.

House amendment.—The House amendment retains the original House provision and adds an amendment providing that capital gain or loss will result from termination of a contract which does not require delivery of personal property even though there is no sale or exchange, if the contract itself is a capital asset in the hands of the taxpayer.

Conference agreement.—The conference agreement follows the House bill amendment.

11. AT-RISK RULE FOR SAFE-HARBOR LESSORS

Present law.—The Tax Equity and Fiscal Responsibility Act of 1982 provides that the at-risk limitations on losses and credits do not apply to closely held corporations that buy tax benefits as a lessor in a safe-harbor lease. In general, the safe-harbor lease changes are effective for property placed in service or leases entered into after July 1, 1982 (general effective date). Two special effective date rules apply for the at-risk change. The at-risk change generally applies to property placed in service after September 3, 1982, the date of enactment of TEFRA (prospective rule). Subject to the general effective date rule, the change also applies to property placed in service before date of enactment where the lessor first becomes a closely held corporation after that date (retroactive rule).

House bill.—The original House bill contained no provision.

Senate amendment.—No provision.

House amendment.—House amendment adds language to clarify that the TEFRA at-risk change under the retroactive rule may apply where the property is placed in service before July 1, 1982, the general effective date for the safe-harbor leasing changes.

Conference agreement.—The conference agreement follows the House amendment.

12. RECAPTURE OF EXPENSING DEDUCTIONS WHERE PROPERTY USED FOR NONBUSINESS PURPOSES

Present law.—The Economic Recovery Tax Act of 1981 allowed taxpayers to elect to expense the cost of certain property acquired for use in a trade or business. For 1982, the maximum amount that may be expensed is $5,000.

Under present law, all or a portion of investment credit is recaptured (i.e., there is an increase in tax) when property is disposed of or otherwise ceases to be qualifying property before the end of the recovery period used to compute the credit. For example, if property ceases to be used for business purposes, recapture is required. Recapture of ACRS or expensing deductions is required (i.e., a portion of gain is treated as ordinary income rather than capital gain) at the time of a sale or exchange of the depreciable property. Unlike the investment credit, no recapture of ACRS or expensing deductions is required if the property ceases to be depreciable.

House bill.—No provision.

Senate amendment.—No provision.

House amendment.—The House amendment provides that, under regulations prescribed by the Secretary, the taxpayer must recapture the expensing deduction where the property is not predominantly used in a trade or business at any time before the close of the second taxable year following the year in which it is placed in service by the taxpayer. For this purpose, recapture means that, in the taxable year it is determined that the property is not used predominantly in a trade or business, the taxpayer must include in income the tax benefit derived from the expensing deduction.

The amendment does not alter the present law rule under which no expensing deduction is allowed if the property is not acquired for use in a trade or business.

Conference agreement.—The conference agreement follows the House amendment.

13. CREDIT FOR TAX WITHHELD FROM INTEREST, DIVIDENDS, OR PATRONAGE DIVIDENDS

Present law.—The Tax Equity and Fiscal Responsibility Act of 1982 provides for withholding on interest, dividends and patronage dividends. Under the Act, any amount of tax withheld on the payment or credit of interest, dividends or patronage dividends is

treated as a credit against the income tax of the recipient of the payment or credit for the recipient's taxable year beginning in the calendar year of the payment or credit.

House bill.—No provision.

Senate amendment.—No provision.

House amendment.—House amendment provides that the withholding credit is allowed in the same taxable year as the income is received. In the case of pass-through entities, such as partnerships, the ultimate taxpayers (i.e., partners) will thus receive the credit in the same taxable year the interest or dividends are included in their income.

Conference agreement.—The conference agreement follows the House amendment.

14. FOREIGN OIL LOSS RECHARACTERIZATION TRANSITION RULE

Present law.—The Tax Equity and Fiscal Responsibility Act of 1982 changed the tax rules for U.S. taxpayers with foreign oil operations. Before the Act, the foreign tax credit was computed separately for oil income and non-oil income. These separate computations or "baskets" were eliminated by TEFRA. Both before and after the Act, taxpayers with an overall foreign loss in one year must recapture that loss in later years through an adjustment to the foreign tax credit. Eliminating the separate baskets for the foreign tax credit (including the recapture provision) for oil and non-oil income created an unintended problem for some taxpayers. Absent a special rule in TEFRA, a taxpayer with a pre-TEFRA non-oil overall foreign loss and post-TEFRA foreign oil income would have had to recapture that loss, possibly in the first post-TEFRA year. TEFRA alleviated this problem for pre-TEFRA foreign non-oil losses by spreading the recapture over an eight year period. However, a taxpayer with a pre-TEFRA overall foreign oil loss and post-TEFRA foreign non-oil income will have to recapture that loss, possibly in the first post-TEFRA year.

House bill.—No provison.

Senate amendment.—No provision.

House amendment.—The House amendment conforms the treatment of pre-TEFRA foreign oil losses to the treatment of pre-TEFRA foreign non-oil losses. Thus, it provides that a pre-TEFRA foreign loss from either of the two separate baskets (the foreign oil basket and the foreign non-oil basket) will be recaptured from post-TEFRA income from the other basket not more rapidly than ratably over the eight-year period beginning with the first taxable year beginning after December 31, 1982. Such recapture of losses against income from the other basket will be in addition to (and not in lieu of) recapture of losses against income from the same basket.

Conference agreement.—The conference agreement follows the House amendment.

15. ALTERNATIVE MINIMUM TAX

Present law.—Prior to amendments made by the Tax Equity and Fiscal Responsibility Act of 1982, an alternative minumum tax was imposed on the tax preference for capital gains and adjusted itemized deductions. The minimum tax rules were extensively revised by that Act.

House bill.—No provision.

Senate amendment.—No provision.

House amendment.—Amendment provides that in computing the adjusted itemized deduction preference, any itemized deduction which is not allowed against the alternative minimum tax base in the current year because it is carried over to another year shall also be excluded from the computation of the adjusted itemized deduction preference in the current year. This amendment applies to taxable years beginning after 1978 and before 1983.

The House amendment also provides that in computing the alternative minimum tax for 1981, the special 20-percent capital gain maximum rate made applicable by ERTA to post-June 9 gains will be applied in certain cases by reducing the qualified net capital gain by losses for the taxable year. In these cases, the special tax base subject to the 20-percent rate will equal the taxpayer's alternate minimum taxable income.

Senate amendment.—No provision.

Conference agreement.—The conference agreement follows the House amendment.

16. REQUIRED RENEGOTIATIONS OF OUTSTANDING LOANS FROM GOVERNMENT PENSION PLANS

Present law.—Under income tax rules (sec. 72(p)) added by the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA), a loan made to an employee under an employer's tax qualified pension, profit-sharing, or stock bonus plan, or tax sheltered annuity program, generally is treated as a distribution from the plan unless certain requirements are met. All or a portion of the amount treated as distributed may be includible in gross income. Under the Act, a loan to an employee which is required to be repaid within 5 years generally is not treated as a taxable distribution when made if that loan, when added to the employee's outstanding loan balance under all plans of the employer, does not exceed the lesser of (1) one-half of the employee's vested plan benefits, or (2) $50,000 but in no event less than $10,000.

The income tax provisions relating to plan loans generally apply to loans made from tax-qualified plans of private employers or from government plans after August 13, 1982. Amounts borrowed by an employee on or before that date generally are not treated as taxable distributions. However, if a loan outstanding on August 13, 1982, is thereafter renegotiated, those amounts subject to the renegotiation are treated as if borrowed on the date of the renegotiation and may be treated as taxable distributions.

House bill.—No provision.

Senate amendment.—No provision.

House amendment.—Under the amendment if (1) a taxpayer borrows from a governmental plan after August 13, 1982, and before January 1, 1983, and (2) under the applicable State law the loan requires the renegotiation of all outstanding prior loans made to the taxpayer from the plan, then the required renegotiation will not be considered a renegotiation under the income tax rules for plan loans. Thus, the amount of the prior outstanding loan balance of the employee under the plan will not be treated as a taxable distribution on account of the required renegotiation. The amendment will apply, however, only if the required renegotiation does not extend the duration of, or change the interest rate on, any outstanding prior loan from the plan.

The additional amount which is borrowed by the taxpayer after August 13, 1982, and before January 1, 1983, is taken into account under the income tax rules as a loan made on the date on which the amount is borrowed. The additional amount that is borrowed may, thereofore, be treated as a distribution at the time it is borrowed.

Conference agreement.—The conference agreement generally follows the House amendment except that it provides that the special rule concerning renegotiations only applies to renegotiations made between August 13, 1982, and September 3, 1982 (the date of enactment of TEFRA). Additionally, the agreement provides that, in the case of a renegotiation which extends the duration of the loan, the special rule only applies if this extension is eliminated by April 1, 1983. For example, if a renegotiation on August 20, 1982, extended the duration of the loan, the special rule would be available if, as a result of a further renegotiation, the duration of the outstanding balance of the loan on August 13, 1982 was reduced to the period applicable on August 13, 1982. Of course, a further renegotiation which is limited to reducing the duration of the loan would not be treated as a new loan under the Code.

The agreement does not change the income tax treatment of a loan that would be treated as a distribution notwithstanding the special rule concerning renegotiations.

17. CLERICAL AND CONFORMING AMENDMENTS

House bill.—The House bill contains a number of typographical, clerical and conforming amendments.

Senate amendment.—No provision.

House amendment.—The amendment contains additional typographical, clerical, and conforming amendments.

Conference agreement.—The conference agreement follows the House bill and the House amendment. One of the clerical amendments relates to a provision of the House bill and Senate amendment which for purposes of the targeted job credit provides that a period for determining an individual's eligibility as a member of an economically disadvantaged family generally is the 6 months immediately preceding the earlier of the month in which the eligibility determination occurs or the month in which the individual is hired. This provision applies with respect to certifications issued after the date of enactment for individuals beginning work after May 11, 1982. This change should in no way disturb certifications already issued for individuals who have been determined by the designated local agency as economically disadvantaged. However, certifications are subject to revocation if they are incorrect because of false information provided by the employee.

DAN ROSTENKOWSKI,
SAM GIBBONS,
J. J. PICKLE,
CHARLES B. RANGEL,
FORTNEY H. (PETE) STARK,
BARBER B. CONABLE,
JOHN J. DUNCAN,
BILL ARCHER,
Managers on the Part of the House.

ROBERT DOLE,
BOB PACKWOOD,
WILLIAM V. ROTH, JR.,
RUSSELL B. LONG,
HARRY F. BYRD, JR.,
Managers on the Part of the Senate.

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of the conference report on the bill (H.R. 6056) to make technical corrections related to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980, and ask that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. CONABLE. Reserving the right to object, Mr. Speaker, I do so for the purpose of asking the distinguished chairman if he will explain the conference report on this measure.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. Mr. Speaker, the House and Senate conferees have reached agreement on the Technical Corrections Act of 1982 which makes technical, clarifying, and conforming amendments to provisions of the Tax Equity and Fiscal Responsibility Act of 1982, the Economic Recovery Act of 1981, the Installment Sales Revision Act of 1980, the Bankruptcy Tax Act of 1980, and certain other tax legislation enacted in 1980.

There were few items in disagreement between the House and Senate bills. As the conference report reflects, the Senate has agreed, with a few modifications, to a number of House-initiated amendments making corrections to the Tax Equity and Fiscal Responsibility Act of 1982 which had come to our attention after Senate action on the bill and which required expeditious treatment.

The conferees have agreed to modifications in two House amendments. As agreed, the delay in the effective date for the registration of State and local tax-exempt bonds will be for 6 months, rather than 1 year. The conferees have also agreed that the application of certain safe-harbor leasing transitional rules for automobile manufacturers will be clarified so that equipment used principally to manufacture light duty trucks will also qualify. The Senate has also agreed to other technical and clarifying amendments suggested by the House.

The conferees have also reached agreement on several amendments which were added by the Senate. Conference agreement includes the Senate provisions with regard to allowing certain bulk sales of petroleum products by independent producers and permitting certain trust beneficiaries to receive a refund under the windfall profit tax. The Senate has agreed to recede on its amendments with regard to the application of the safe-harbor leasing rules to bankrupt airlines and a provision which grandfathers certain rehabilitations under the 10-percent rehabilitation tax credit of prior law.

Mr. Speaker, the conference report on H.R. 6056 contains many necessary technical corrections and clarifications of recently enacted tax legislation. I urge its adoption.

Mr. CONABLE. Further reserving the right to object, Mr. Speaker, I would like to say that we all know that complexities of legislation frequently require modification and clarification to insure the original intent of the Congress is achieved. That is the purpose of this particular measure. The chairman described the various acts that are modified by the Technical Corrections Act.

I think it is important to say, Mr. Speaker, that this represents many hours of work of all committee tax staffs, including our committee, and the Joint Committee on Taxation.

Having mentioned the Joint Committee on Taxation, I would like to note briefly that the chief of staff of the Joint Committee on Taxation, Mark McConaghy, is leaving after many years of service on that staff. He is a highly competent and qualified tax man and technician of considerable acuity. And it is my impression that this body will have a great deal of difficulty replacing Mr. McConaghy and the work he has performed under other chiefs of staff previously as chief of staff himself.

I would like to express my appreciation to him for his many years of service and wish him the best of luck in whatever his further pursuits are.

Mr. Speaker, I rise in support of the conference report on H.R. 6056, the Technical Corrections Act of 1982. As I have indicated in the past, the complexities involved in tax legislation necessarily mean that the original legislation will sometimes require clarification and modfication to insure that the original intent of the Congress is achieved. This piece of legislation makes important changes with respect to the following pieces of legislation: The Installment Sales Revision Act of 1980, the Crude Oil Windfall Profit Tax Act of 1980, the Economic Recovery Tax Act of 1981, and the Tax Equity and Fiscal Responsibility Act of 1982. In many instances, these changes are of importance to taxpayers affected by these pieces of tax legislation, who need clarification of congressional intent and certainly about technically defective drafting.

In addition, the act represents many hours of work of all committee tax staffs, incuding our committee and the Joint Committee on Taxation.

On a slightly unrelated note, I would like to briefly note the fine job of the Joint Committee of Taxation on this project and many others under the leadership of Mark McConaghy, the chief of staff. Mark will be leaving at the end of this Congress to pursue other endeavors after many years of tireless service to the Congress. This Member would personally like to express his appreciation to Mark for his many years of service and wish him the best of luck in whatever he pursues.

Returning to the matter at hand, I urge the immediate adoption of the conference report of H.R. 6056.

□ 1950

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the chairman.

Mr. ROSTENKOWSKI. Mr. Speaker, I, too, want to make the observation that in the 2 years that I have been chairman of the Committee on Ways and Means, Mark McConaghy who is leaving has been of invaluable service. I think of no one who is as committed to responsible government and as dedicated to serving not only the House of Representatives, but his country.

I think certainly we are going to miss him. In any endeavor that he will take on in the future, I am sure he will be a success.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield for a question?

Mr. CONABLE. Yes; I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I notice mention of safe harbor leasing. Does this bill reinstitute or further correct the safe harbor leasing?

Mr. CONABLE. Mr. Speaker, I yield to the chairman for an explanation.

Mr. ROSTENKOWSKI. Mr. Speaker, if the gentleman will yield, what happened is that we have objected to a Senate amendment and, if anything, we have restricted whatever happens in the safe harbor leasing under the provisions of this legislation.

Mr. CONABLE. The provision would have extended the transition rules to certain airlines. It did not do so. The Senate provision to do that was dropped from the conference report.

Mrs. FENWICK. I thank the chairman and the ranking member.

Mr. CONABLE. Mr. Speaker, further reserving the right to object and returning to the matter at hand, I must urge immediate adoption of the conference report in view of the lucid explanation of the chairman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois (Mr. ROSTENKOWSKI)?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see prior proceedings of the House of today, Tuesday, December 21, 1982.)

Mr. ROSTENKOWSKI (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

NATIONAL CHILDREN AND TELEVISION WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 264) to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. WALKER. Reserving the right to object, Mr. Speaker, I reserve the right to object to tell the gentleman that no one on the minority side seems to know about this resolution coming up.

One of the questions we have is how many signatures were on this bill that we are bringing to the floor?

I am glad to yield to the gentleman.

Mr. GARCIA. Mr. Speaker, let me answer the second part first. There are over 218 signatures which were required; but coupled with that, this was OK'd last week, but in the confusion of all that has happened in the last I guess 7 days, we laid this aside because there were other matters to take up; but I can assure the gentleman that this is one of those items that has been approved by the minority side.

Mr. WALKER. Further reserving the right to object, Mr. Speaker, does the gentleman have additional requests of this kind that he is going to bring before us this evening?

Mr. GARCIA. I have several more, yes.

Mr. WALKER. Well, it would be very helpful to us on this dies, I might say to the gentleman, if we could have a list of those bills and have some knowledge as to what is coming before us, because if we do not have some knowledge as to what we are going to be taking up, this gentleman is going to feel constrained to object and I do not want to further burden the House with those kinds of objections.

So does the gentleman have a list of these bills available?

Mr. GARCIA. Yes, and we will make it available to the gentleman.

I just would like the House to know that the resolutions that I have I think are evenly divided on both sides of the aisle by requests for Members on the minority side, as well as Members on ours. We will give the gentleman the list.

Mr. WALKER. Further reserving the right to object, Mr. Speaker, I think we have a lot of Members who would like to see us finish up the session and get to the gas tax bill, get to the sine die adjournment and go home, rather than take up endless streams of unanimous-consent requests.

I would appreciate so we can expedite the procedures of the House getting a list of what it is we are going to be considering here.

Mr. GARCIA. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman.

Mr. GARCIA. Mr. Speaker, most of these resolutions that we are now dealing with are resolutions that have come over from the Senate and what we are trying to do is accommodate the Senators' requests that we pass these in the House; so this is basically what we are trying to do.

● Mr. WIRTH. Mr. Speaker, it is almost impossible to measure the impact that television has upon our lives—in everything from the way we wear our hair to the way we conduct our lives. Nowhere is that influence stronger than with our children, for what they watch on television today will affect their approach to the future—of their lives, of their communities, and, in fact the quality of life in our society.

The resolution, which I introduced, designating the week of March 13, 1983, as Children's Television Week is an important one. Children's Television Week will serve to call attention to the best that television has to offer our young citizens, and to applaud those who have sought quality, imagination, and sound educational values in developing and presenting children's television programing.

The first amendment guarantees that all Americans have access to the greatest diversity of information sources possible. That includes our children. As the most widely available mass medium, television has both the opportunity and responsibility to provide that diverse information to the largest number of children.

Television should educate, it should establish role models, it should provide examples of the kinds of standards and ethics we would like to see reflected in our society in the future. To that end, we must continue to encourage efforts on behalf of better television programing for children.

This resolution, already passed by the Senate, is proof that the cooperation among the industry, public interest groups and the Government that is necessary if excellence in children's programing is to flourish, already exists. I would like to take this opportunity to salute the efforts of the National Council on Children and Television, the National Parent-Teachers Association, the National Broadcasting Co., the National Coalition on Television Violence, and the congressional sponsors of this legislation in both Houses of Congress particularly Senator JOHN HEINZ and Congressman ROBERT GARCIA, for their cooperative efforts.

In the next Congress, the Subcommittee on Telecommunications, Consumer Protection and Finance will closely consider the issue of children's television. And Children's Television Week will help to spotlight our quest for excellence in children's programing. I hope it will become a reality today through your support.

Consideration of this resolution also gives me the opportunity to applaud the efforts of Peggy Charren and Action for Children's Television, and Joan Ganz Cooney and the Children's Television Workshop, who have done an extraordinary job in enriching the lives of our children through their involvement in this vital area. The Children's Television Workshop's shows—"Sesame Street," "The Electric Company," and "3-2-1 Contact," are good entertaining television shows that also guide and teach over 10 million young Americans every week. What we need is more children's TV along the lines of Ms. Cooney's contributions. In a recent article in USA Today, Ms. Cooney put forth some provocative views on children's television. They are printed below:

[From the USA Today, Nov. 22, 1982]

COONEY AND KIDS STICK TOGETHER

(By Roberta Plutzik)

Back in 1969, Joan Ganz Cooney was on the road "selling, selling, selling. Wherever three people were gathered who had anything to do with education, that's where I was."

What was she hawking? A new kids show called "Sesame Street," different in form and content from anything adults or children ever had seen on television.

Today, Joan Cooney, who originally wrote and produced "Sesame Street," works out of a spacious office overlooking New York City's Lincoln Center arts complex, and presides over the Children's Televison Workshop. CTW produces "Sesame Street" and operates one of the most successful nonprofit businesses in the nation.

As "Sesame Street's" 14th season begins—130 new shows begin airing today—Cooney no longer has to sell the concept to anybody. It is seen in more than 60 countries on six continents; its profit-making products division licenses the manufacture of some 1,600 toys, games, dolls, gym sets, eating implements, clothes, books and other child-related items that sell very well.

So well that in 1982, The Children's Television Workshop is self-supporting. Even as it goes after and wins grants for production of new shows such as "3-2-1 Contract's" current $7 million from federal and private

sources, CTW is able to stand firmly on its own feet.

Ad sales from CTW's inhouse record division and receipts from its newest and boldest venture, theme parks built jointly with Anheuser-Busch (two already are in action in Langhorne, Pa., and in the Dallas-Fort Worth area). Children's Television Workshop's position is enviable.

But security and acceptance hasn't slowed Cooney's effort to educate adults on the state—more dire than ever—of television programming for children. She calls the United States "virtually immoral toward its children in every way—TV is just the tip of the iceberg. We are the only country in the world, not just the advanced Western democracies but the world, that doesn't regulate television for children."

CTW's international associated find it "inconceivable," she says, "that all this air time that belongs to the people has been taken over entirely for commercial purposes and profit without the slightest regard for the youngest people in this country in whom it has had and continues to have enormous impact."

A few seasons back, when the Federal Communications Commission announced plans to mandate one half-hour a day of programming for preschoolers and another for older children, Cooney, 52, recalls that "the networks were prepared to fall into line without a squawk. (She knows this because they all phoned CTW to ask about preparing some quality programs to fill the slot.)

But the FCC decided against the guidelines and, in Cooney's opinion, "the trend is much worse now. Stations have a longer license period, so there's less fear. We have removed every obstacle in this country to putting on all adult programming and as many commercials as the law allows. The last obstacle was fear. There's not much of that left."

Cooney lashes out at the "commercialization of children—selling products to people who have no money" and defends CTW's licensing program by pointing out that it prohibits advertising to children or by children for any product under its umbrella.

Of the general quality of television today, Cooney terms it "bad news. I watch my own stepchild and his fine brain being rotted away by television."

Once divorced, Cooney married a Wall Street investment banker two years ago and became an instant mother to five children, ages 9 to 25.

In the '80s, while "Sesame Street" continues its efforts to prepare preschoolers with basic skills necessary for success in first grade, CTW also will be expanding its computer software and video game line and building six to eight more theme parks in the USA and abroad. Cable may enter the picture if sufficient funds for production and a suitable partnership can be arranted. But Cooney is wary of jumping too quickly into "one of the most potentially divisive and fractionated communications systems imaginable."

"I worry about a culture which could become so factionated, with people viewing events at different times. One of the ties that binds us together is collective television experiences like watching Archie Bunker, "Sesame Street," walks on the moon, Sadat going to Jerusalem, the Yankee World Series of 1978. One billion people saw the 1982 World Cup competition simultaneously. No cable company could do that, now or in 10 years."

An audience of more than 9 million children tune in "Sesame Street" seven days a week. About twice as many as watch "Mr. Rogers' Neighborhood," whom Cooney describes as "wonderful . . . but he's an acquired taste." Though some 30 million preschoolers have cut their teeth on "Sesame Street" during the last 13 seasons, Cooney recognizes the efforts of the Children's Television Workshop, which includes "Electric Company," are a drop in the bucket as far as programming goes for America's kids. "We're so huge a landmass that not to have united this country with regulations on what television is doing to and for children is a grave error we will pay for forever," Cooney says with regret. "It's too late now."

The text of the children's television week resolution follows:

H.J. RES. 623

Whereas television can create an intellectual and emotional environment which can play a decisive role in shaping individual development and perception;

Whereas parents and other adults should be able to look to television to provide children with true pictures of the world and positive models for behavior;

Whereas many dedicated groups and individuals strive to improve the quality of television programming viewed by children and their families; and

Whereas the Nation has a continuing responsibility to provide appropriate, stimulating programming for children and adolescents: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of March 13, 1983, is hereby designated as "National Children and Television Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the elected officials and people of the United States to observe such week through activities supporting television programs which are attentive to the needs and interests of children and those who care for them.●

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. GARCIA)?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 264

Whereas television can create an intellectual and emotional environment which can play a decisive role in shaping individual development and perception;

Whereas parents and other adults should be able to look to television to provide children with true pictures of the world and positive models for behavior;

Whereas many dedicated groups and individuals strive to improve the quality of television programing viewed by children and their families; and

Whereas this Nation has a continuing responsibility to provide appropriate, stimulating programing for children and adolescents: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of March 13, 1983, through March 19, 1983, is designated as "National Children and Television Week" and the President of the United States is authorized and requested to issue a proclamation calling upon all government agencies and the people of the United States to observe the week with appropriate activities supporting television programs which are attentive to the needs and interest of children.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL GARDEN WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 29) to authorize and request the President to issue a proclamation designating the calendar week of June 6 though June 12, 1982, as "National Garden Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. KINDNESS. Reserving the right to object, Mr. Speaker, is there something about this resolution that is different from the title?

I yield to the gentleman.

Mr. GARCIA. The answer is no.

Mr. KINDNESS. So we are talking about at a date that is past?

Mr. GARCIA. No. There is an amendment at the desk which we will be offering.

Mr. KINDNESS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. GARCIA)?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 29

Whereas the gardeners of this country produce a multitude of foods for our people and enable us to export foods to other countries which are in desperate need; and

Whereas our gardeners help to preserve and foster our traditional spirit of independence and individual initiative; and

Whereas gardening instills in our people, both young and old, a greater appreciation for nature, in general, and for our beautiful land, in particular; and

Whereas such appreciation naturally leads to a greater respect and care for our environment; and

Whereas gardening, in addition to being most beneficial for our country, furnishes a pleasant and productive full- or parttime activity for a large number of our citizens; and

Whereas our gardens also yield flowers of great variety and breathtaking beauty; and

Whereas these flowers bring beauty into our lives and satisfy our esthetic needs: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America

in Congress assembled, That the President is authorized and requested to issue a proclamation—

(1) designating the calendar week of June 6 through June 12, 1982, as "National Garden Week"; and

(2) urging Federal, State, and local government agencies, as well as citizens and private organizations, to observe that week with educational efforts, ceremonies, and other appropriate activities which shall include the wearing of garden flowers as a symbol of our appreciation for the efforts and contributions of our gardeners.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: On page 2, lines 5 and 6, after the words "week of" strike "June 6 through June 12, 1982" and insert in lieu thereof, "June 5 through June 11, 1983".

The amendment was agreed to.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. GARCIA: Amend the title so as to read: "To authorize and request the President to issue a proclamation designating the calendar week of June 5 through June 11, 1983, as 'National Garden Week.'"

The title amendment was agreed to.

A motion to reconsider was laid on the table.

COMMEMORATING 25TH ANNIVERSARY OF BEGINNING OF INTERNATIONAL GEOPHYSICAL YEAR

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the resolution (H. Res. 514) commemorating July 1, 1982, which is the 25th anniversary of the beginning of the International Geophysical Year and reaffirming the commitment of the House of Representatives to international cooperation in the sciences, and ask for its immediate consideration in the House.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 514

Whereas July 1, 1982, is the twenty-fifth anniversary of the beginning of the International Geophysical Year, and further, the year of 1982 is the fiftieth anniversary of the Second International Polar Year and the one-hundredth anniversary of the First International Polar Year;

Whereas the First and Second International Polar Years established the precedent for the International Geophysical Year, by organizing scientists from as many as forty countries in a series of studies covering the fields of aerology, astronomy, biology, geology, glaciology, hydrography, meteorology, and oceanography, and involving studies of auroral physics, cosmic rays, aurora borealis, atmospheric electricity, earth currents, geomagnetism, ionospheric physics, latitude and longitude, nacreous clouds, noctilucent clouds, ozone, and radiation, all of which produced a wealth of new data in these areas;

Whereas the International Geophysical Year involved scientists from sixty-seven countries, and brought together the world's most respected scientists with the most modern technological equipment of that time to study aurora and airglow, cosmic rays, geomagnetism, glaciology, gravity, ionospheric physics, longitudes and latitudes, meteorology, nuclear radiation, oceangraphy, seismology, solar activity, and upper atmospheric studies utilizing rockets and satellite vehicles;

Whereas the the studies conducted during the International Geophysical Year produced unprecedented and invaluable information that included many discoveries of major importance;

Whereas the Internatonal Geophysical Year advanced the sharing of data and the cooperation of all governments through the creation of the World Data Centers;

Whereas the International Geophysical Year was the largest, most comprehensive, and most successful cooperative program in science ever undertaken;

Whereas the the International Geophysical Year brought a new space age to the planet Earth, and launched individual governments into the search of the solar system;

Whereas the International Geophysical Year has had a lasting beneficial impact on cooperative scientific programs, as is evidenced by the creation of cooperative bodies such as the Special Committee on Oceanic Reserach, the Scientific Committee on Antarctic Research, the International Geophysical Cooperation, the Inter-Union Committee on Contamination by Extraterrestrial Exploration, the Committee on Space Reserach, Scientific Committee of Solar Terrestrial Physics, and the International World Days Service;

Whereas the International Geophysical Year has had an immeasurable positive impact on the scientific community and the public's understanding of scientific advancements and their importance to society; and

Whereas the efforts of the individual scientists participating in the International Geophysical Year extended beyond their own work and into the international environment, fostering cooperation among nations and a sense of good will and achievement: Now, therefore, be it

Resolved, That the House of Representatives commemorates July 1, 1982, which is the twenty-fifth anniversary of the beginning of International Gerophysical Year, and reaffirms the commitment of the House of Representatives to a new, vigorous era of international cooperation in all the sciences.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: On page 3, line 2, after the word "commemorates" strike the words "July 1, 1982, which is . . ."

The amendment was agreed to.

● Mr. WIRTH. Mr. Speaker, thank you for considering at this late minute House Resolution 514, a resolution that commemorates the 25th anniversary of the International Geophysical Year (IGY).

House Resolution 514 mentions just a fraction of the scientific advancements achieved during the 18-month period of IGY. Aside from the marvel of launching artificial space satellites and the intensive exploration of our planet, IGY brought a continuing flow of important scientific knowledge to our society. IGY's remarkable accomplishments have led to societal improvements we now take for granted, such as refined methods of weather prediction and space exploration. In addition, IGY has had a lasting beneficial impact on cooperative scientific programs—a global network of the world's finest scientists know each other and continue to work together.

Not only does House Resolution 514 commemorate IGY's 25th anniversary, but it reaffirms our commitment to a new era of international cooperation in all the sciences.

This spirit is evident in the writings of Lloyd Berkner, the originator of the original IGY proposal:

> But most encouraging in all has been the genuine enthusiasm with which the scientists of Earth, and the nations that support them, have embraced this program. Tired of war and dissension, men of all nations have turned to "Mother Earth" for a common effort on which all find it easy to agree.

That IGY filled the need for cooperation is beyond dispute. As Wallace Atwood, one of IGY's participants, has noted:

> I think it is fair to say that the international significance of the program, as its name bears out, has been of greater significance than even the very important discoveries which have been made. At a time when we are torn asunder by ideological differences and by selfish national attacks upon the freedom we stand for, it is heartening to find that there are some things that people can do together with common amity.

The words I have quoted apply today as well. In the last few months we have watched an escalation of war around the world, and the fear of a nuclear holocaust become the consuming interest of many. Yet, as a result of IGY, coexisting with these tensions are functioning organizations of international scientific cooperation. The legacy of IGY lives.

The participants in IGY wish to have it remembered. House Resolution 514 does that. Yet, we owe the scientists responsible for IGY more than a mere remembrance. We need to reaffirm our commitment to a new era of peaceful international cooperation in the sciences. My resolution reaffirms our commitment despite signals from the Reagan administration that it is willing to diminish our participation in international science programs. Our

nation cannot afford such a retreat, and I fear our world cannot long survive in an atmosphere of conflict instead of cooperation.

Thank you for allowing me to speak in behalf of House Resolution 514.●

The resolution was agreed to.

Mr. GARCIA. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. GARCIA: Amend the title so as to read: "Commemorating the twenty-fifth anniversary of the beginning of the International Geophysical Year and reaffirming the commitment of the House of Representatives to international cooperation in the sciences."

The title amendment was agreed to.

The SPEAKER pro tempore. The Clerk will report the amendment to the preamble.

The Clerk read as follows:

Amend the preamble by striking out the eighth clause of the preamble.

The amendment to the preamble was agreed to.

A motion to reconsider was laid on the table.

NATIONAL JAYCEE WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 240) to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. CARNEY. Reserving the right to object, Mr. Speaker, I reserve the right to object, and I do not intend to object, I just would like to commend my colleague, the gentleman from New York, for a fine job at this late hour. I want to put my full support behind the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York (Mr. GARCIA)?

□ 2000

Mr. SOLOMON. Reserving the right to object, Mr. Speaker, I do not want to object to the request of my colleague from New York but there are Members who need to catch planes tonight. I am not one of them.

My inquiry is: Is the gas tax bill ready, and if it is, why do we not take it up and then we can always take up these bills after we have finished that.

Is there anyone here who can answer that question?

The SPEAKER pro tempore. The Chair is not able to answer that question for the gentleman.

Mr. SOLOMON. Is there anyone in the leadership on that side of the aisle who can answer that question?

Mr. GARCIA. Mr. Speaker, if the gentleman would yield to me, I agree wholeheartedly with the gentleman. I have a roomful of guests at my home and I would like to get the party started but cannot do a thing until we finish here.

Mr. SOLOMON. Mr. Speaker, I withdraw my objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 240

Whereas the Jaycee idea began with a handful of young men in Saint Louis, Missouri, sixty-three years ago;

Whereas the Jaycee idea embraces today approximately three hundred thousand members in seven thousand five hundred American communities that have chapters in the United States Jaycees;

Whereas the Jaycee idea enriches the lives of communities around the world through affiliation in Jaycees International;

Whereas the Jaycees organization retains a youthful outlook, even in its maturity, and continues to build on the individual member, even with its global scope—first, helping him be the best man he can be, then helping him help his fellow man in need, one to one;

Whereas a Jaycee cares about people, and he shows it;

Whereas a Jaycee cares about progress and he does something about it;

Whereas a Jaycee lives by the creed that "service to humanity is the best work of life", and throws himself into that work both in his vocation and avocation;

Whereas a Jaycee is the kind of young man this country will need in great numbers to help meet the challenges of our times and the coming century; and

Whereas it is fitting that we should give special recognition and encouragement to the Jaycee and his organization: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week", and calling upon all Government agencies and people of the United States to observe the week with appropriate programs, ceremonies, and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL DAY OF THE SEAL

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the concurrent resolution (H. Con. Res. 236) to declare March 1, 1982, as "National Day of the Seal," and ask for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. WALKER. Mr. Speaker, reserving the right to object, I see that the seal has been waiting for his day since December 11, 1981. Do we have some idea as to how many signatures were on this one?

Mr. GARCIA. Over 200.

My colleague, the gentleman from Vermont (Mr. JEFFORDS), if he is here, I am sure would be able to respond to that question.

Mr. WALKER. It was over 218, did I understand the gentleman to say?

Mr. GARCIA. I am told.

Mr. WALKER. Very well. This is also another resolution where the seal has been waiting for his day to be declared for so long that we are going to have to amend it to make sure it gets declared next year?

Mr. GARCIA. We will amend it right now, if the gentleman will yield further.

● Mr. JEFFORDS. Mr. Speaker, I realize that this is not the most momentous piece of legislation awaiting the consideration of this body. Were it not for an important event this past week in the sight of many people to end the slaughter of baby harp seals in March, I would not have asked to bring it up.

On December 15 a telex was sent by 218 Members of this body urging the Council of Ministers of the European Community to ban the importation of furs from baby harp and hooded seals.

Mr. Speaker, last Friday, December 17, 1982, the Council of Ministers of the European Community adopted a resolution asking each member country to impose a ban on the import of pelts from young harp and hooded seals. This ban will last until March of 1983, at which time the Council will again consider the issue.

Although this ban is not permanent and it is, in effect, voluntary, it should be viewed as progress toward the goal of ending the much-publicized seal clubbing on the ice floes off Newfoundland each spring. Several years ago, we in the United States recognized that if we cut off demand for the seal pelts, we remove the incentive for this brutal seal hunt. That was the motivation behind section 101(a) of the Marine Mammal Protection Act.

Mr. Speaker, I want to take this opportunity to thank the 218 Members of this House who joined me in sending a telex to the President of the European Commission, urging adoption of this ban. I am informed by leaders of this movement in Europe that this type of input is appreciated and very influential.

And, on behalf of all Americans who have expressed concern and outrage about the seal hunt, I wish to commend the Council of Ministers for its wise action on this matter. We will all watch the next vote on a permanent ban very closely.

Mr. Speaker, a similar resolution has already been adopted by the Senate. This resolution is meant to celebrate the birth of the seal rather than its often brutal death, which has frequently been noted in the past. March 1 has been proclaimed the "International Day of the Seal" in many nations. In the United States, the focus of the festivities last year was New York City, where the Paul Winter Consort gave two benefit concerts in the Cathedral of St. John the Divine to help focus attention on the beauty of this natural event.

March 1 is a particularly significant day in the eternal cycle of the harp seal. Each year around this time, about 400,000 harp seal pups are born off the coast of Newfoundland and in the Gulf of St. Lawrence. In the first 2 months of their lives, approximately 180,000 of them will be killed before their bright white coat begins to molt and turns to the gray adult coat.

Much has been made of the often brutal and inhumane method of killing these animals. The hunt is conducted by Canadian and Norwegian nationals under the supervision of the Canadian Government, which justifies the harvest on the grounds of herd management techniques that are supposed to allow the herd to increase. However, a recent study by two population dynamics experts concluded that the methods used to determine quotas contained biases that led to underestimations of both the decline of the stock and the natural mortality rate. Nevertheless, the quotas remain unchanged and will be filled in the next 2 months.

Many U.S. citizens have expressed outrage over the clubbing that is used to kill the seal pups. On March 1, however, we can project a more positive, upbeat feeling about the seal by celebrating its birth. I urge my colleagues to support this resolution and observe the International Day of the Seal in any manner they see fit.

Further, I wish to take this time to commend the Ministers of the European Community for their actions. I am hopeful that their action may result in a loss of the last viable market for these furs, and thus lead to the end of this horrible afront to one of nature's most beautiful events, the birth of the baby harp seal.

I cannot close without mentioning the role that our late heroic member Leo Ryan played in trying to bring an end to this slaughter. I traveled off the coast of Newfoundland with Leo in 1978 to protest this kill. In a way that only Leo could do, he helped focus world attention on this tragic event. This was only one of Leo's many similar efforts to demonstrate inequities in this world. As you know, Leo was killed in Jonestown.

Also present at that time was Pamela Sue Martin, more widely known as Nancy Drew, and now appearing as Fallon on the TV series "Dynasty." Her sincere disgust and protest on behalf of our children assisted greatly in helping Leo focus attention on the senselessness of this event.

Friends of Leo should take heart that this crusade in which he played a leading part is nearing victory.●

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 236

Whereas the seal is an essential and inseparable part of the marine ecosystem; and

Whereas the seal, of which there are some thirty-three species, is a land mammal that returned to the oceans twenty to thirty million years ago; and

Whereas the presence of the seal helps maintain the health and balance of this environment; and

Whereas the presence of the seal is an indication of a whole and healthy ecosystem; and

Whereas the seal is a social creature with a highly evolved nervous system and physiology especially adapted to its marine environment; and

Whereas the seal epitomizes the freedom and the mystique of the oceans and in many cultures is revered as a spiritual embodiment of the mind in the waters; and

Whereas March is the month of the year when the Harp seals pup, renewing their eternal cycle; and

Whereas the growing worldwide awareness of the ecological and esthetic value of the seal has led to a desire to designate a special day of recognition: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress proclaims March 1, 1983, as the "National Day of the Seal" and urges all citizens to join in this celebration of life with appropriate activity.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: On page 2, line 2, strike "March 1, 1982" and insert in lieu thereof, "March 1, 1983".

The amendment was agreed to.

The concurrent resolution was agreed to.

TITLE AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Amend the title so as to read: To declare March 1, 1983, as "National Day of the Seal".

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. The Chair understands that the conference papers on the highway bill, the gas tax bill, are on their way to this Chamber and will be here momentarily. Until they arrive, the Chair will recognize for unanimous-consent requests.

Mr. ROUSSELOT. Mr. Speaker, I ask unanimous consent that we balance the budget.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Hearing none, the request is granted.

RECESS

The SPEAKER. The House will stand in recess until 8:15 p.m.

Accordingly (at 8 o'clock and 6 minutes p.m.), the House stood in recess until 8:15.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 8 o'clock and 15 minutes p.m.

□ 2020

CONFERENCE REPORT ON H.R. 6211, SURFACE TRANSPORTATION ASSISTANCE ACT OF 1982

Mr. ROSTENKOWSKI submitted a conference report and statement on the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

The SPEAKER. The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, pursuant to the earlier agreement, I call up the conference report on the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes, and ask for its immediate consideration.

The SPEAKER. Pursuant to the previous order of the House, the conference report is considered as read.

(For conference report and statement, see proceedings of the House of today, December 21, 1982.)

The SPEAKER. The gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 30 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 15 minutes to the gentleman from New Jersey (Mr. HOWARD).

Mr. CONABLE. Mr. Speaker, I yield half of my time to the gentleman from Pennsylvania (Mr. SHUSTER).

The SPEAKER. A half hour has been yielded to the Committee on Public Works and Transportation.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself 6 minutes.

The SPEAKER. The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Speaker, House and Senate conferees have reached an agreement on the revenue title to the Surface Transportation Assistance Act of 1982 (H.R. 6211). This title finances the increased levels of highway and mass transit spending by increasing net tax receipts from highway user taxes and extending the highway trust fund through 1988.

Both Houses agreed to increase the present gasoline tax by 5 cents, with 1 cent earmarked for mass transit. The gasohol exemption is increased by 1 cent, bringing the total tax on gasohol to 4 cents.

The Senate conferees have agreed to many of the House-passed provisions. A number of miscellaneous taxes, like those on lubricating oil, inner tubes and truck parts, were repealed. In addition, the conferees agreed to repeal the tax on tread rubber and to impose a graduated rate schedule on tires, completely exempting passenger tires. The tax on trucks and trailers would be imposed at 12 percent at the retail level on trucks weighing more than 33,000 pounds.

The conferees also reached a compromise on the tax rate schedule for heavy trucks which is near that approved by the House. Beginning in July 1984, the maximum tax on the heaviest trucks would be increased to $1,600. In subsequent years, the tax would rise to a maximum of $1,700 in 1986, $1,800 in 1987, and $1,900 in 1988. The House conferees also agreed to the Senate provisions allowing a 5,000-mile exemption and permitting refunds of the tax under certain circumstances.

The House conferees also agreed to a number of other Senate amendments exempting from fuel taxes qualified taxicabs and alcohol fuels. They further agreed to an extended period for payment of fuel taxes by certain oil jobbers. The Senate receded on the remainder of its amendments in the highway title.

The revenue impact of this compromise generally falls within the original parameters of the House bill. In short, the compromise more than adquately funds the highway provisions of this bill.

Mr. Speaker, this is a fair compromise that reflects the original House objectives of reallocating the burden of the tax to the heaviest users—those who impose the heaviest cost on the system—and eliminating a number of existing nuisance taxes on private automobiles and lightweight trucks.

Finally, the conferees agreed to strike other nongermane Senate amendments with the following exceptions:

An increase of $1 in the return filing level for dependents.

Allowing certain mutual funds to pass through tax-exempt interest under certain circumstances.

Providing an energy credit for 1982 only for a chlor-alkalai electrolytic cells.

The House accepted with modifications provisions it had passed earlier on deductions for conventions held on U.S. cruise ships. Also accepted were provisions regarding the normalization method for public utility property similar to those continued in H.R. 1524.

The House conferees accepted a Senate provision that adds additional weeks of unemployment compensation in States with extremely high unemployment rates.

The Committee on Ways and Means may hold hearings next year to review and evaluate the affirmative commitment rules for the energy tax credits applicable to synthetic fuels.

As my colleagues remember, the Congress adopted a special Federal supplemental compensation program (FSC) in the tax bill last August. This program gives workers who exhaust their State unemployment benefits, or Federal/State extended compensation up to an additional 10 weeks of benefits depending upon the insured unemployment rate in their State. Let me add that a State-by-State breakdown of additional weeks is available at the table. This program is fully financed by the Federal Government and is a direct congressional initiative to help unemployed workers.

Unfortunately, many workers under this existing program have exhausted or will exhaust in the very near future their FSC benefits. Given the state of the economy, it is unlikely that many will find employment in months ahead.

This new provision adds additional weeks under the Federal supplemental compensation program. Depending on the level of unemployment in your State, workers will receive either 6, 4, or 2 weeks of additional unemployment compensation benefits.

This new extension of benefits will cost $550 million.

The conference report also includes a Senate amendment that will allow SSI and AFDC recipients to receive assistance in meeting their home energy costs from private organizations, such as a special fund established by a utility company, without having their monthly grant reduced. A similar provision was included in the continuing resolution we just approved.

Mr. Speaker, this legislation has not been easily accomplished. Raising revenues is never a happy enterprise. But we have done what was necessary, and in the process we have better rationalized the taxes we impose on the users of our national highway system.

No one worked harder, or more effectively, for this landmark law than the Secretary of Transportation, Mr. Lewis. His perseverance and understanding carried this measure through some perilous times, and I applaud him.

Finally, I applaud the courage and wisdom of the majority on both sides of the aisle. I urge the entire House to support this conference report.

Mr. KAZEN. Mr. Speaker, will the gentleman yield for a question?

Mr. ROSTENKOWSKI. Mr. Speaker, I will yield time to the gentleman later.

I reserve the balance of my time.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support the revenue title of the conference report on H.R. 6211, which in part is the result of extensive and persistent work by the Secretary of Transportation and his admiring associates in the Congress.

It should be emphasized, Mr. Speaker, that under the leadership of the chairman of our committee, the gentleman from Illinois, House conferees were able to maintain substantially the key aspects of the original House-passed bill. The most significant change in current law under the conference agreement, the increase in the gasoline and diesel fuel excise tax from 4 cents per gallon to 9 cents per gallon, is consistent with both the original House-passed bill and the version approved by the other body. The gasohol subsidy goes from 4 cents a gallon to 5 cents a gallon.

The legislation does have a negative aspect in that it imposes a tax on work. Many Americans, who must drive personal cars to and from their jobs, will pay out more because of this measure. But this "downside" effect is offset by the measure's very positive benefits—an improved and safer highway and bridge network, plus several hundred thousand jobs in a basic in-

dustry now suffering a 23-percent unemployment rate.

On the issue of cost allocation—the extent to which users of any one type of vehicle pay a share of excise taxes commensurate with their use of those vehicles on the Nation's highways—the original House-passed bill made significant positive adjustments. The result was a fairer allocation than under existing law.

A controversial consequence of these changes was a substantial increase in the use taxes to be paid by heavy trucks. The bill passed by the other body substantially reduced this emphasis of the House bill, lowering sharply the top levy on the heaviest vehicles.

The conference agreement more closely follows the use tax schedule approved by the House originally, and thus achieves a fairer cost allocation than that existing under either current law or the version passed by the other body. To ameliorate any negative impact on the trucking industry, the conference agreement phases in these changes over a 5-year period. On balance, I think this is a reasonable method of achieving a more equitable cost allocation without imposing a substantial and immediate increase in user fees for the trucking industry.

In summary, Mr. Speaker, the conference agreement is a desirable piece of legislation, especially in view of the difficulty encountered by the other body in approving its version. I urge the immediate adoption of the report.

□ 2030

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Louisiana (Mr. BREAUX).

Mr. BREAUX. I thank the chairman for yielding.

I would like to enter into a colloquy, if I may.

As you know, when the Senate considered the Tax Reform Act this past summer, they included a provision in the legislation that increased the funds for the Dingell-Johnston sport fish restoration program by placing a tax on boats designed for recreational fishing and on fishing tackle items not taxed under the current program. In response to the controversy that arose out of this proposal, the leadership of the Merchant Marine and Fisheries Committee developed a compromise which replaced the tax on boats with a reallocation of the tax on motorboat fuels. Our compromise was supported by almost all of the boating and fishing groups and the boating manufacturers. It was deleted by the conference committee on the tax bill for the legitimate reason that Ways and Means Committee had not had a chance to properly scrutinize the measure.

As the chairman of the Ways and Means Committee knows, a number of members have suggested that the proposal we developed be included in this bill, but it has not been so included. The leadership of the Merchant Marine and Fisheries Committee still supports this proposal and intends to move the nontax provisions early in the next session of Congress.

I would ask the chairman of the Ways and Means Committee if he will schedule a hearing on the tax provisions of our proposal at the earliest possible date in the next session and help to expedite its progress through his committee.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. I recognize the intense nature and the concern the gentleman from Louisiana (Mr. BREAUX) shows in this area, and this has been discussed. It is my every intention because of the concerns of the gentleman from Louisiana that I will conduct some hearings, and I am sure that we will be looking forward to the gentleman's participation.

Mr. BREAUX. I thank the chairman for his comments.

Mr. ROSTENKOWSKI. Mr. Speaker, I have no further requests for time and yield back the balance of my time.

Mr. CONABLE. Mr. Speaker, I yield back the balance of my time.

Mr. HOWARD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is with great pride that we bring to the House the Surface Transportation Assistance Act of 1982. Through an enormous amount of effort and determination on the part of the Committee on Public Works and Transportation, the committee was able to reach agreement with the Senate committees on this legislation.

On December 6, the House overwhelmingly passed H.R. 6211, a 4-year bill combining authorizations for highways, highway safety, and public transportation. The authorization levels are consistent with those advocated by Secretary Lewis as part of his proposal to increase revenues in amounts equivalent to a 5-cent increase in the motor fuels tax.

In light of the remaining time in this session of the 97th Congress, the conferees propose to have considered in the House a compromise worked out with the Senate committees. The provisions of the conference report contain many of the same provisions that the House agreed to on December 6.

Mr. Speaker, the conferees expect that Route 609 in Essex County, N.J., known as Eisenhower Parkway, will be funded by the State of New Jersey from its allocation of interstate transfer highway funds. The conferees have provided that $1.8 million in fiscal year 1984 discretionary funds and $48 million in fiscal year 1985 discretionary funds be allocated for this purpose. In addition, the conferees also anticipate that $150 million of the additional $257 million in highway interstate transfer funds for fiscal year 1983 will be made available for projects in the Chicago area.

In addition, the conferees direct the Secretary to complete a study, within 9 months after enactment of this legislation, of alternative approaches for the allocation of rail funds other than route miles and rail revenue miles, and make recommendations which provide incentives for efficiency of performance. The study should address the issue of allocating funds in an equitable and fair manner, while increasing incentives to improve the operating efficiency of fixed guideway systems. Furthermore, the study should explore approaches which would not reduce an area's apportionment of needed block grant funds if an area modifies its service to increase its effectiveness. Factors to be analyzed should include, but not be limited to, age and condition of rolling stock facilities and structures—capital needs, operating costs, farebox and local and State funds as a percentage of total operating costs, route miles, rail revenue miles, passenger trips, revenue labor hours, percentage of trips made by rail as compared to total commuter trips by all modes of transportation to major centers and rail route miles weighted by costs to operate.

Further, the conferees expect that the administrative definition of revenue vehicle miles would include, to the extent feasible and appropriate, all scheduled route mass transportation service and special or flexible route mass transportation service operated by or under contract to a public body as well as all scheduled route mass transportation service provided by private bus carriers which receive either capital or operating assistance from a public body as part of an overall public transportation program. Capital assistance includes direct grants or the least, at no cost, of buses owned by a public body.

Mr. Speaker, I ask that this legislation be enacted for the interest of the country, the people, and the communities served by the highway and transit systems of this country.

The conferees agree that the buy American requirements of subsection (a) shall not apply if the Secretary determines that "their application would be inconsistent with the national interest."

The conferees believe that the Congress must exercise its oversight responsibilities as to what is in the national interest. Therefore, before the provision of subsection (b)(2) can

become effective, the Secretary shall take the following actions:

Not less than 30 days prior to the date he wishes to have the provision of subsection (b)(2) become effective, he shall publish a notice in the Federal Register giving all details pertaining thereto; including, but not limited to, the date on which his determination will become effective, the project involved, the cost of the project, and an explanation as to why it is not in the national interest to apply the buy American requirements of subsection (a).

For the purposes of implementing this section of the act the buy American provision applies to the purchase of and/or the leasing of all equipment.

I think the members of the committee of conference did a marvelous job and the staffs certainly have been working on this for weeks.

I would just like to point out once more the cooperation, the coordination, and the efforts to compromise of our ranking member. This is his last legislative act here this evening because he will not be with us and we will all lose from that. I speak of the gentleman from California (Mr. CLAUSEN) who deserves a great deal of credit for this legislation.

Mr. WHITE. Mr. Speaker, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Texas.

Mr. WHITE. I have a question. I thank the distinguished chairman for yielding.

What did the conference do relating to the tandem and to the width of trucks?

Mr. HOWARD. On the tandem what we have in our legislation, as the gentleman knows, if they were, they pay the additional money and coming out of the Ways and Means Committee, which they did, there would have been the 102-inch width. That was taken care of because that was passed. That was passed in the appropriations of the Department of Transportation just a few days ago, so that was out there.

What we passed on the tandem, the links, which would permit the tandems, is in this conference report with the additional funds.

Mr. WHITE. Is there anything relating to the weight in the conference report?

Mr. HOWARD. Yes. This is the 80,000 weight which 47 of the 50 States have now, so it only affects three States.

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. HOWARD. I am happy to yield.

Ms. OAKAR. First, I want to commend the gentleman and all the others involved.

Second, I want to ask what is the State's contribution. On the House side, as I recall, the State did not have to contribute match for a year.

Mr. HOWARD. The gentlewoman is right. As she knows, with the States not being ready to handle this money, that was another thing. I thank the gentlewoman for bringing that up. What we had was this: We had a provision where the first year's money would be available to the States without a match, that we would expect it to be paid back by the second year. Whatever would not be paid back by the second year would be deducted from their allocations for the third and the fourth year, so the fund would be whole at the end of the fourth year.

We have made an additional provision for these States which would not cost the fund anything in permitting to have the first 2 years, if they should need it, and pay it back the third and fourth.

However, an additional amount of money that would be deducted because they have to borrow the money those first 2 years, a small amount truly, that money would not just stay in the fund; that would be available to the Secretary so that he would be able to permit that to go to other States which were not borrowing the money.

What we do not want to happen here is just willy-nilly every single State to take all of the money the first 2 years.

□ 2040

So that amount will be sort of an inducement if they cannot afford—I believe this is an improvement that the States wanted in the bill from what we originally passed.

Ms. OAKAR. Can I assume also that the priority list of projects that was in the report language is the same?

Mr. HOWARD. The same.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding.

Would this bill make any changes in the environmental laws like in EPA or other environmental laws?

Mr. HOWARD. As far as I know, there is no dimunition of requirements environmentally in this law. I would have to check on every segment with the gentleman. But certainly we did not go in there talking about any reduction.

Mr. SEIBERLING. There is some provision in here for the Secretary to develop an expediting procedure, a fast track.

Mr. HOWARD. We have had things like that, that do not, as we say, do not jeopardize any environmental considerations, as this committee has not done that in the past, since we established the Council on Environmental Quality, and a lot of other environmental legislation.

Mr. SEIBERLING. One other question. Do I understand there is a domestic content requirement in this bill?

Mr. HOWARD. Yes, there is, which was brought down I believe to 25 percent. I am sure the gentleman from Minnesota (Mr. OBERSTAR), or the gentleman from Ohio (Mr. APPLEGATE) can speak to that. That was one of the final considerations that we did make.

Mr. SEIBERLING. Is someone going to address that, so the House will know what was done?

Mr. HOWARD. We will provide some time for the gentleman from Minnesota or the gentleman from Ohio to do that before we finish.

Mr. SEIBERLING. I thank the gentleman.

Mr. VOLKMER. Mr. Speaker, will the gentleman yield?

Mr. HOWARD. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

On the length and weight provision for uniformity, is it mandated in the bill or do the legislators of the States have to act?

Mr. HOWARD. I believe they have to act. We mandate the act.

Mr. VOLKMER. Or else lose their highway funds.

Mr. HOWARD. A certain percentage. Maybe 10 percent. I think this is going to work out all right. But there is a percentage in there.

Mr. Speaker, I reserve the balance of my time.

Mr. SHUSTER. Mr. Speaker, first I would like to second the accolade presented to our distinguished colleague from California (Mr. CLAUSEN), who has served this Congress and this Nation ably for 20 years, who has made enormous contributions to the present and to the future of the United States of America in the field of not only transportation, but in the field of clean water and economic development.

And I would like secondly to yield 3 minutes to that distinguished gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I do not believe that I will take the 3 minutes.

Mr. Speaker, I rise in support of the conference report on H.R. 6211, one of the most impressive legislative accomplishments of the 97th Congress.

The issues have been controversial, the debate has been long and hard, and prospects for the bill have often seemed in doubt. And Members have devoted an enormous amount of time and effort to bringing this bill to the floor.

Yet enactment of H.R. 6211 will stand as the major improvement in our highway program since the highway trust fund was established in 1956. Thus, its passage will reward our efforts many times over in terms of benefit to the Nation.

The hour is late and the dimensions of this bill are well known to Members. I, therefore, will not impose on the time and patience of my colleagues to recite its provisions.

Instead, I want to emphasize the great compromises that went into this final package, its highway, safety, transit, and revenue provisions. There is a great deal of credit to go around.

My regard and respect for my colleagues on the Public Works Committee need no restatement here. And I want to pay particular tribute to the leadership of the President, his truly great Secretary of Transportation, Drew Lewis, our own chairmen, JIM HOWARD, GLENN ANDERSON, BUD SHUSTER, and our House conferees, and of HOWARD BAKER and TIP O'NEILL.

This is a once-in-a-lifetime opportunity to do what must be done for highways and transit, an opportunity which we simply cannot let pass.

I strongly urge my friends and colleagues to adopt this package and move this critically needed bill on to the Senate and downtown for signature.

With that, Mr. Speaker, I thank my colleagues for the privilege of this kind of service over the years.

Mr. SHUSTER. Mr. Speaker, the gentleman from New Jersey has quite accurately described this bill, so I do not intend to get into that. I simply would make the single point in conclusion that this is a historic act on the part of the Congress. What we are doing here by increasing America's commitment to transportation to the tune of about 50 percent increase on the average over the next 4 years—what we are doing is not only creating jobs, creating better highways and mass transit, but by creating better roads, we are creating safe roads.

A conservative estimate is that we will save 1,000 lives and 100,000 accidents annually as these old antiquated roads are improved.

And so I believe we should note with pride the historic action which this House, I hope, shall take in the next few moments, because what we are doing is not only for present-day America, but it is for our children and for our children's children.

Mr. SNYDER. Mr. Speaker, will the gentleman yield?

Mr. SHUSTER. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Speaker, I rise in support of the conference report.

Mr. Speaker, we bring before you this afternoon a compromise surface transportation authorization. The operative word here is compromise, and a difficult one at that.

The highway funding formulas have been adjusted to address the concerns of the various regions of the country. The authorization levels fall between the House and Senate provisions. An 85-percent minimum allocation of highway funds was adopted. And we extended the temporary waiver of the local match for highway programs for a second fiscal year to give the States needed fiscal relief.

Our agreement provides some $53 billion over the next 4 years to finance an expanded highway program. The interstate rehabilitation and bridge restoration programs are doubled. The interstate construction, primary, and secondary programs are substantially expanded. Also expanded is the interstate discretionary program, targeted to completion of high-cost gaps. Another addition of significance to the Federal-aid highway program are several provisions increasing the flexibility of the States in using Federal highway dollars. This, and the increased funding, should enable the States to get on with the job of rebuilding our highways just as soon as the weather breaks.

With respect to transit, we provide approximately $14 billion over the 4-year authorization. Much of this will be provided through a new, consolidated block grant program designed to reduce the administrative burdens—and planning uncertainties—of grant recipients. Capital assistance, designed to encourage the rehabilitation of deteriorated transit systems while permitting a limited number of cost-effective new starts, is provided through a dedicated transit account of the highway trust fund financed by one cent of the gas tax increase.

Operating assistance is reduced slightly in fiscal year 1984, remaining level thereafter. To help communities adjust to the reduced operating aid, greater flexibility in the use of urban mass transportation administration funds is permitted for 2 years. By this mechanism we hope to encourage the cities to control runaway operating costs without unduly adding to their financial burdens.

As I said, Mr. Speaker, the bill before us is a compromise. We are not happy with each and every one of its provisions. But it addresses the differences between the two bodies in a reasonable manner, and provides a sound and expanded highway, highway safety, and transit program. It will enable us to get on with the massive task of rebuilding our surface transportation network. And, importantly, it will provide some 320,000 jobs in an industry suffering an unemployment rate twice the national average.

For all of these reasons, I urge a yea vote.

Mr. KRAMER. Mr. Speaker, will the gentleman yield?

Mr. SHUSTER. I yield to the gentleman from Colorado.

Mr. KRAMER. Mr. Speaker, I thank the gentleman for yielding.

I appreciate the fine work of the committee and the members, many distinguished members of the committee who labored so hard over the bill. I would like to invite my colleague from Pennsylvania's attention to section 107 of the conference report, if I could, and pose an inquiry.

It is my understanding that under the language of section 107, $257 million has been made available out of the highway trust fund for expenditure at the discretion of the Secretary and for the fiscal years ending in September 1984; September 1985; and September 1986; $700 million, and $725 million have been available for expenditure out of the highway trust fund, and of those 3 years, and for those 3 years, the Secretary has 25-percent funding discretion out of the fund to allocate among those projects that qualify as substitute highway projects as he may see fit.

Is my understanding of the action that has been taken in the conference and as presently contained in the bill correct?

Mr. SHUSTER. The gentleman is absolutely correct.

Mr. KRAMER. I thank the gentleman.

Mr. HOWARD. Mr. Speaker, I yield 5 minutes to the chairman of the Subcommittee on Surface Transportation, the gentleman from California (Mr. ANDERSON).

Mr. ANDERSON. Mr. Speaker, this conference report is the logical conclusion of consultations between House and Senate conferees. There were major differences between the bills which passed the two Chambers, and this report attempts to reconcile those differences. We have, for example, generally split funding for the various highway programs down the middle. An exception is in the important interstate construction, which is maintained at the annual $4 billion level in the House bill.

Because it is so important that we complete the Interstate System, in a prompt manner, a new interstate discretionary program is established, funded at $300 million a year. The Secretary is instructed, in distributing these funds, to place highest priority on those States with high-cost projects.

At the same time, the Interstate 4-R program, for the resurfacing, restoration, rehabilitation, and reconstruction of the interstate, is increased from the present $800 million to $1.95 billion and gradually in the outyears to $3.15 billion.

New logic is instilled in the interstate transfer program as much of the money for both highway and transit projects will now go out on a "fair share" basis. The program's cost-escalator clause is abolished.

The highway beautification program, from our original House bill, which I felt was quite reasonable, is dropped.

Turning to transit, a major feature of this bill is to reduce significantly UMTA funds delivered through the section 3 discretionary program and to increase dramatically those delivered by formula. This represents a major restructuring of existing law under which the ratio of discretionary capital to formula assistance has been approximately 60/40.

Nonetheless, the conferees fixed the discretionary program at a level higher than that recommended by the administration for the explicit purpose of providing for a limited number of cost-effective new starts (including some new starts not currently covered by letters of intent) along with other uses which continue to be eligible under section 3.

It is important to note that the American Public Transit Association estimates a need for $50 billion for transit capital projects over the next decade. Of this amount, more than $20 billion (40 percent) of these needs represents the construction of new systems or extensions to new systems.

The Secretary will certainly need to take into account an area's apportionment under the section 9 formula program when determining the allocation of section 3 funds needed for major capital expansion projects. The conferees do not expect that those new start communities—which have demonstrated their commitment to transit by establishing a source of revenue dedicated to transit—be placed at a disadvantage in seeking capital funds under section 3 on the baseless assumption that their needs for Federal assistance are less by virtue of their having done so.

The Federal match on new starts and all projects funded under section 3 shall be at 75 percent.

Cities will still be able to use their section 9 funds for operating assistance, although the largest among them will face a 20-percent reduction, while medium-sized cities will be capped at a 10-percent reduction in operating assistance and the smallest 5 percent. While I do not personally consider these reductions desirable, I am pleased that we have not had to dig deeper into this important program.

Mr. Speaker, 2 weeks ago when this bill was before the House, I said we had the opportunity to pass historic legislation improving our Nation's transportation infrastructure program. Our bill was passed at the time by a vote of 262 to 143.

I know of no reason why the support for that bill this evening should be any less than at that time. Those supporting our bill 2 weeks ago should support our conference report this evening.

I do know that the need for this legislation remains great.

We have the opportunity to pass legislation this country needs. I urge adoption of this conference report.

OCEAN DISPOSAL OF RADIOACTIVE WASTE MATERIAL

Mr. Speaker, in recent years the Committee on Merchant Marine and Fisheries has conducted hearings on past activities pertaining to the ocean disposal of low-level radioactive waste.

Therefore, we have included provisions in section 424 of this bill to safeguard and provide for more research into the effects of such activities.

The committee is concerned that radioactive waste disposal might occur before the completion of additional research into the possible impacts associated with waste disposal. The uncertainties associated with radioactive waste disposal remain a major concern, and we regard additional research as necessary. Therefore, in the Ocean Dumping Act amendments as passed by the House on September 30 by a unanimous voice vote we included a 2-year moratorium on the issuance of low-level radioactive waste permits.

The act as passed the House also contained a section dealing with the disposal of radioactive materials in the ocean after the 2-year moratorium expires. The provision requires a site specific radioactive material disposal impact assessment to be completed by the applicant and approved by the Administrator. The assessment shall be transmitted to the Committee on Merchant Marine and Fisheries and the Senate Committee on Environment and Public Works. This provision allows for a congressional veto by requiring the Administrator to receive authorization to issue a permit to dump the radioactive materials in the ocean through the passage of a joint resolution by the House and the Senate.

The assessment shall include the following:

First, a listing of all radioactive materials in each container, the number of containers, structural diagrams, the number of curies of radioactive material in each container, and the exposure levels on the interior and exterior of each container;

Second, an analysis of the environmental impact this proposed action would have upon human health and welfare and marine life;

Third, any and all adverse environmental effects at the site which cannot be avoided should the proposal be implemented;

Fourth, an analysis of the resulting environmental and economic conditions if the containers fail to contain the radioactive material when initially deposited at this specific site.

This is intended to be a worst-cast study which would assess the impact should the containers be broken open or corrode;

Fifth, a plan for the removal or containment of the disposed nuclear material if the container leaks or decomposes. In the monitoring plan to be conducted under this section the state of the containers will be examined. If they are leaking or corroding so as to indicate they will not contain the radioactive materials until it becomes harmless then the permit applicant must have a plan for safely removing or reencasing the containers;

Sixth, if the information gathered in this assessment indicates that the proposed action may impact upon a States coastal resources, then a determination must be made by each affected State whether the proposed action is consistent with its federally approved coastal zone management program (16 U.S.C. 1451);

Seventh, an analysis of the economic impact the disposal of the radioactive material may have upon other users of marine resources. This impact may be due to a real threat, as detailed in this assessment, or a perceived threat which may result in lower fish sales or other marine activities in this region;

Eighth, alternatives to disposing of the radioactive material at this ocean site must be detailed;

Ninth, comments and results of consultation with State and local officials and public hearings held in the Coastal States that are nearest to the affected areas;

Tenth, a comprehensive plan for the regular monitoring of the disposal site to determine the full effect of the disposal on the marine environment, living resources, or human health. This includes an examination of the containers to determine whether they will continue to contain the radioactive material until it becomes harmless;

Eleventh, any other information which the Administrator may require in order to determine the full effects of the proposed disposal.

This subsection is not intended to apply to materials containing only background levels of radioactive contamination.

It is not my intention to put in place a permanent ban on the ocean disposal of radioactive waste materials. And I do not believe this proposal to be a permanent moratorium. But through this mechanism we can make certain that what we put into the ocean will not have an adverse impact which we could result for generations to come. I therefore urge my colleagues to include it in this legislation.

CONTRACT AUTHORITY FOR RECREATIONAL BOATING FUND

Mr. Speaker, section 421 of the Senate substitute to H.R. 6122 contains an amendment to the Federal Boat Safety Act. This act allocates funds collected from the current highway tax on gasoline which are paid by

recreational boaters. The Secretary of Transportation has determined that approximately 1½ percent of the highway trust fund is contributed by recreational boaters.

This language, inserted by the distinguished Senator from Oregon, Senator PACKWOOD, simply converts the authority of the Secretary to spend this money for recreational boating safety and facilities to contract authority. Such authority is currently used by the Secretary in the administration of the highway trust fund and the airport and airway development trust fund. It is identical to a provision in H.R. 6813, which a majority of my colleagues have already supported.

Mr. Speaker, this provision will help develop recreational boating safety programs. This is becoming increasingly important as more and more of our constituents are taking to the lakes, rivers, and oceans for recreational purposes. Quite simply, Mr. Speaker, this provision will save lives on these waters, and I therefore urge its inclusion in this bill.

SALTONSTALL-KENNEDY ACT AMENDMENT

Mr. Speaker, section 423 of the Senate substitute to H.R. 6122 amends the Saltonstall-Kennedy Act. The funds in this act are derived from taxes on imported fish products into the United States. It is the intent of this act that the funds be used to develop fisheries and fishing technology to aid the ailing U.S. fishing industry.

The distinguished Senator from Oregon, Mr. PACKWOOD, inserted this provision to make sure that the funds collected are used to meet the intent of Congress.

This provision states that no less than 60 percent of the fund shall be used to make direct industry assistance grants and to expand domestic and foreign markets for U.S. fishery products, Mr. Chairman, this means jobs for our fishermen, fish processing industry, and fishing equipment industry.

Currently, too much of this money is being used to buy paperclips and staples for the National Marine Fisheries Service. This provision states that the Secretary may not use more than 40 percent of the funds to finance the operations of the National Marine Fisheries Service.

Mr. Speaker, this provision is vitally important if we are to maintain, and build up a viable U.S. fishing industry, capable of competing with foreign fishing. It is an excellent example of using money collected from a foreign industry impacting upon a domestic industry to aid that U.S. industry—at little or no expense to the Federal Government.

Therefore, Mr. Speaker, I urge its inclusion in this bill.

VESSEL CONSTRUCTION GUARANTEES

Mr. Speaker, section 425 of this act contains a provision inserted by Senator PACKWOOD, and which was included in the House-passed version of this year's maritime authorization, and approved by the conference committee on that legislation.

Unfortunately, it appears the MARAD authorization will be another victim of this lameduck. Therefore, a most important provision relating to title 11 construction loan guarantees has been included in this legislation.

This proposal will prevent a ceiling from being placed on the amount of loans guaranteed—other than a ceiling set in the annual authorization. It also prevents discrimination against a vessel because of its type.

One of the principle reasons for this provision is to promote construction of fishing vessels to help that beleaguered. Traditionally, the fishermen have been faithful in paying back their loans, and their default ration is less than 1 percent. In fact, the Federal Government makes more money than it spends on their guarantees because of the loan guarantee origination fee.

Mr. Speaker, this provision is needed to help rebuild our ailing fishing industry so it can better compete with foreign fishermen. This section means jobs—for the fishermen, the ship construction industry, and the fishing supply industry. I therefore urge its inclusion in this act.

Mr. NOWAK. Mr. Speaker, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from New York.

Mr. NOWAK. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I would like to engage the floor manager in a colloquy regarding the section relating to resurfacing standards.

Mr. ANDERSON. This is the provision that requires projects to be constructed in accordance with standards to preserve and extend the service life of highways and enhance highway safety.

Mr. NOWAK. It is recognized that full geometric design standards may not be appropriate in all 3R projects and that applicable standards and procedures for improvement projects should be allowed, provided that highway safety is enhanced.

Mr. ANDERSON. The gentleman from New York is correct.

Mr. NOWAK. Is it the intent of Congress that resurfacing, restoration, and rehabilitation work continue to be carried out without disruption or delay using the standards and procedures now in effect and being utilized by the States, so long as they meet the requirements you just described.

Mr. ANDERSON. Yes, that is correct. Pending completion of the study and submittal and consideration of the recommendations called for under this section, work can continue to be carried out using procedures now in effect, so long as they enhance highway safety and extend the service life of the highway.

Mr. NOWAK. I thank the gentleman very much for this clarification.

Mr. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from California.

Mr. CLAUSEN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, the minority concurs in the colloquy and exchange that just took place.

Mr. WYDEN. Mr. Speaker, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Oregon.

Mr. WYDEN. Mr. Speaker, I have taken a great interest in the use of recycled materials in the construction and repair of our roads, and I would like to tell my colleagues that the Senate language now in the conference report improves on what the House enacted earlier on the use of recycled materials.

The recycling language, now in the conference report before us, actually directs the Secretary to establish a procedure for implementing the recycling section within 90 days of this conference report's enactment and in fact authorizes more funds for those States that use recycled materials in their programs than the legislation adopted earlier by the House.

The bill before us now stipulates that by early next year the Secretary of Transportation must have a program in place for accepting applications from States and procedures for authorizing an additional 5-percent Federal assistance to States that utilize recycled materials in their paving program.

I am gratified that the Senate has made it clear both in the report and in a colloquy between Senator RANDOLPH, the author of the Senate provision on recycling, and Senator DECONCINI that rubber recycled from discarded tires is a recycled material under section 147. Moreover, the colloquy makes clear that the recycling of old, used tires should get priority treatment from the Secretary in granting applications because tires pay almost $700 million a year in taxes into the highway trust fund.

Mr. WILLIAMS of Montana. Mr. Speaker, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Montana.

Mr. WILLIAMS of Montana. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I oppose this Christmas toy despite the attractiveness of its wrapping. What a beautiful package, but how disappointed Americans will be when they discover what is contained within.

This is a Christmas toy which is supposed to bring joy to the users of America's highways. Where is the joy in paying $1 more every time drivers fill it up? Where is the joy for drivers in struggling to pass a huge double bottomed truck unit on a dark rainy night. This bill allows mammoth units on America's highway systems.

This Christmas toy will bring no joy to modest income Americans whom, already pinched by this prolonged and cruel recession, are now hit by this regressive gasoline tax which falls far more heavily upon them than upon rich Americans.

Our small truckers cannot afford this Christmas toy. Several years of hard times have many truckers running on the slim margin between profit and loss. This toy will cost some of those business people a tax increase of more than 150 percent within the next several months.

Those Americans looking for jobs will find little joy in this toy. The President, who apparently does not believe in jobs bills, says this is not that kind of effort. He is right. His economists and most economists who have examined the effects of this legislation have concluded that, on the balance, it will cause a net loss of American jobs.

It must be the Christmas spirit that causes support in this House for this legislation. It cannot be because of the merits. This Christmas toy, once the wrapping is off, will not do what is expected.

Do you remember the words to the song about the wonderous toy? "It went zip when it moved, bop when it stopped, and whir when it stood still. I never knew just what it was, and I guess I never will."

After Christmas with the wrapping off, we will be disappointed in this wondrous, expensive toy.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding.

Mr. Speaker, is the gentleman going to discuss the domestic content provisions in this bill?

Mr. ANDERSON. We have the experts here that will, yes.

Mr. KAZEN. I thank the gentleman.

Mr. HOWARD. Mr. Speaker, I yield 1 minute to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Speaker, I thank the chairman for yielding. I will be delighted to explain the buy-America provision of the highway bill, for myself and for the gentleman from Ohio (Mr. APPLEGATE), with whom I have worked as cosponsor of this amendment—and may I say that the gentleman has done an outstanding service to the unemployed steelworkers in his district, in helping to construct this amendment, which will help put many of those jobless people back to work, making American steel for the $12 billion worth of American bridges and highways that will be built annually under the provisions of this bill.

Mr. Speaker, the provision dealing with domestic content was arrived at on the basis of the investigation conducted by the International Trade Commission of the Department of Commerce which found eight European steelmakers in violation on a wide range of products, selling those products by an average of 26 percent below the domestic price in this country, subsidizing their steel to the amount of a range from 18 to 40 percent.

The conference agreed on a 25-percent domestic content; that is, on a bid where a European steelmaker would bid a hundred dollars, if the American steelmaker bid $125, the bid would go to American steel. That is on the basis of the amount of the subsidy that the European steelmakers have been giving to their steel, dumping it in this country, based on an 18-month investigation conducted by the Commerce Department and finalized in June of this year.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. OBERSTAR. I am happy to yield to the gentleman from Texas.

Mr. KAZEN. Does that pertain only to raw steel being brought into this country or to all products made of steel coming into this country?

Mr. OBERSTAR. To products as specified in the language, such as steel, cement manufactured products, used in such projects, such highway or bridge projects.

GENERAL LEAVE

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that all Members may revise and extend their remarks following the expiration of my time.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

● Mr. BROYHILL. Mr. Speaker, everyone today is talking about jobs. As unemployment climbs, efforts naturally intensify to create jobs, by any means at any cost.

We are asked today to approve the conference report on a bill which is supposed to create jobs. By placing additional excise taxes on motor fuels and other items and greatly increasing the tax burden on heavy duty trucks. Jobs for some 300,000 workers are claimed to be created.

Although I feel this new job figure is inflated, I think it would be wonderful if we could put 300,000 people to work. That still leaves 12 million out of work. To help them, we need to get the business and industrial community back on its feet. As we in Congress debate long and hard on how to create new jobs we are doing nothing to stop the elimination of job opportunities through onerous Government regulation.

The Energy and Commerce Committee, on which I serve, has been grappling for almost 2 years over the Clean Air Act, a classic case in point. The Clean Air Act was originally passed in 1970 to address the serious problem of air quality degradation in this country. The results of our national air quality management effort have been impressive, but at a high cost. Now that the mechanism is in place and our air is getting cleaner and cleaner, it is time to pause and look at which programs need to be continued or even strengthened, and which ones have never worked efficiently, or are no longer necessary. I have tried in these past 2 years to push needed reforms in this act which would encourage the development of new, clean industrial sources and stop the diversion of massive amounts of capital to satisfy nonproductive regulatory requirements.

As the Wall Street Journal pointed out in a December 15, 1982, editorial, the ultimate irony of this call for job creation could come next year when the Federal Government may be forced to throw thousands of people out of work because Congress has refused to address the weaknesses of the Clean Air Act.

As of the last day of this month, all areas of this country are required to be in compliance with Federal Air Quality Standards. Over 600 counties in 49 States will not make it. The law requires EPA to begin imposing Federal sanctions against these areas. Congress in its wisdom is debating various make-work projects and proposals, but refuses to even address the fact that this totally arbitrary deadline, less than 2 weeks away, may result in massive economic disruption in the very areas of this country that are feeling the pains of a recession.

There is much debate over the automatic nature of the clean air sanctions, and the timeframe needed to implement them, but the fact remains that they are the law of the land.

First, after December 31, EPA cannot allow the construction of new stationary sources in any noncomplying area, if the source emits the pollutant for which that area is in noncompliance. Not only does this have the economic effect of stunting industrial growth and destroying job opportunities, it prevents new, clean-burning plants from replacing old, dirty ones.

Second, many facilities are not in compliance with the State-adopted, federally enforcement limits on their emissions. These plants face immediate requirements to cut back emissions, which quite likely will mean production cutbacks resulting in layoffs, and in some cases, plant shutdowns. Again, this would happen because

Congress did not face the urgency of addressing this totally arbitrary deadline.

A third sanction facing many areas of this country is also directly related to the bill we are now considering. Under certain conditions, Federal highway funds must be withheld from areas in violation of the standards for two of the regualted pollutants after December 31. Areas cannot be awarded highway funds if they are in noncompliance for ozone or carbon monoxide are not covered by an adequate State air quality plan, or if the State has not made reasonable efforts to submit such a plan. Only mass transit and safety projects would be exempted.

These State plans were required to demonstrate compliance by the end of this year; if compliance is not attained, then they must be inadequate. Therefore, EPA need only find that reasonable efforts were not made to compile an adequate plan and funds will be cut off. In many cases the effort has been quite poor.

The stark reality is that passage of this bill into law will create over $5 million in additional revenues to improve roads and create jobs, and many of the areas that need these opportunities most may not get them because Congress has ignored the stringent provisons of an outmoded Clean Air Act. I hope that we will wake up soon and see the need to address this issue before further economic disruption results.

CLEAN AIR FARCE

While Congress dithers around trying to create new jobs, it's doing nothing about trying to stop destroying them with onerous regulation. A classic case is the Clean Air Act, which has since 1970 diverted massive amounts of scarce capital into nonproductive scrubbing equipment and the like. The ultimate irony could come next year when the federal government may be forced to throw thousands of people out of work owing to the anti-pollution laws.

As of midnight Dec. 31, the Environmental Protection Agency is required by law to begin the process of imposing sanctions against regions that are not in compliance with federal air quality standards. EPA lists around 600 counties—one-fifth of all the nation's counties and in every state except North Dakota—that are not in compliance with the standard for at least one polutant. The sanctions, which would probably take months to impose, would range from construction bans to plant shutdowns to cutoffs of federal highway funds. While it debates various make-work projects, Congress is not able to deal with proposals to relax these artificial deadlines and thus preserve jobs.

Congress has already debated the legislation for more than 19 months and had to pass a continuing resolution to keep the Clean Air Act from expiring Sept. 31, 1981. Now, with only a few days to go before adjournment and with the economy in a serious recession, it's uncertain whether even an amendment will be passed to extend the Dec. 31 compliance deadline.

The Senate Republican leadership has been reluctant to bring up for a floor vote a bill produced by the Environment and Public Works Committee, chaired by Sen. Robert T. Stafford. That proposal doesn't provide any of the regulatory relief requested by the administration and would make the law more onerous and more difficult to administer.

Moreover, the Stafford proposal would expand the EPA's mandate to control many additional "hazardous air pollutants" without providing enough time for scientific review to determine if these substances really are health risks. For instance, EPA would have only 60 days after enactment of the legislation to pick 20 potentially hazardous pollutants from a list of 40 and then to determine in two years if these are not dangerous; if EPA cannot make a determination in that time, those substances would automatically come under control. Similarly, the Senate proposal undertakes for the first time to deal with "acid rain." A massive 31-state program would be established to control sulfur emissions at the cost of billions of dollars, even though some new scientific evidence casts doubt on the theory that "dying" lakes in the Northeast are caused by emissions from coal-fired plants in the Midwest.

The House, meanwhile, is even in more of a tangle because of a feud between Reps. Henry A. Waxman and Thomas A. Luken which has prevented a bill from even getting out of the environmental subcommittee. Mr. Waxman has proposed revisions similar to Sen. Stafford's. Mr. Luken's proposals are along the lines of President Reagan's 11-point request, which he made last year, calling for less stringent standards and a "more reasoned pace" for compliance and enforcement.

Sen. Stafford, Rep. Waxman and others on Capitol Hill are continuing to look at the 1970 Clean Air Act through 1960s glasses. Their demands for even more stringent controls ignore the substantial improvements in air quality of the last decade. They don't seem to see the sizable investment that has already been made in air-pollution-control equipment and don't recognize the fact that as new plant and equipment come on stream, air quality will continue to benefit. Given their pleas for even tougher standards, you would think that the Clean Air Act was a failure. If Congress were really serious about creating jobs, it ought now to be asking about the costs of trying to extract that last bit of pollution from the air, and whether this economy can afford them. The Clean Air Act is one of many jobless bills created by Congress over the last 15 years. By consuming our scarce economic resources for whatever social purposes, we have lost opportunities to invest in productive, jobs-creating ventures. Removing some of these regulatory obstacles would be the biggest thing Congress could do to create jobs.●

● Mr. PICKLE. Mr. Speaker, H.R. 6211, the Surface Transportation Assistance Act of 1982, contains a provision relating to the time period for payment of the gasoline tax. The Senate added a provision extending the remittance schedule for small business jobbers which was focused on alleviating the extreme cash flow burdens that these small businessmen are encountering. In determining which groups would be eligible for the additional remittance period, the Senate elected to use a volumetric threshold. It was my feeling that a volumetric measure was not appropriate. As a result, I joined with my colleague from Tennessee, Congressman JOHN DUNCAN, in offering in the conference committee what we felt was a better approach.

Our proposal dropped the volumetric approach and replaced it with the definition of independent refiners and the definition of wholesale distributors to determine eligibility. In addition, we expanded the Internal Revenue Code definition of wholesale distributor to include a chain retailer. This proposal was based on the rationale that chain retailers are performing the same marketing functions as jobbers and therefore should be afforded the same relief available under the Senate extension of the remittance schedule.

It was our intent to give relief to these small businesses undergoing a severe cash flow crisis, and in doing so, we clearly intended to expand the code definition of a wholesale distributor to include the chain retailer. Historically, Congress has differentiated between large and small businesses when assessing the impact of a particular legislative provision. This has been true in the case of tax remittance schedules and should be true in the specific case of the gasoline excise tax. Thus, jobbers, chain retailers, and independent refiners—all small businessmen—should be given the relief extended by the Senate provision regarding the gasoline tax remittance schedule. It was my understanding that the conferees on H.R. 6211 agreed and accepted the proposal offered by Congressman DUNCAN and myself.

Mr. Speaker, it is obvious that the intent of Congressman DUNCAN and myself—and I believe the Conference Committee—was not followed when the final language was drafted. We did not know this until the bill was already presented to the House, with no amendments permitted. Therefore, we must seek relief by asking that this technical correction be made. We will immediately ask Treasury for a redefinition which will include chain retailers as wholesale distributors.●

● Ms. FERRARO. Mr. Speaker, since 1969 the Metropolitan Transportation Authority of New York has provided an efficient and effective discount fare program for elderly and handicapped citizens. The authority administers the program by providing eligible passengers with free return-trip coupons.

In 1974, a Federal law was enacted which required transit authorities that receive Federal transit operating assistance to allow handicapped and elderly passengers to pay half-fares. While the net result of the New York and Federal programs is the same, this particular form of the Federal regulation would have lead to severe admin-

istrative difficulties for New York's transit system.

Congress recognized these difficulties and has explicitly noted in every annual transportation appropriation measure since 1974 that the city's existing program satisfies the Federal discount fare requirement. Most recently, section 308 of the fiscal year 1983 appropriations legislation, Public Law 97-369, reaffirmed Congress desire that New York City be permitted to continue its current discount fare program without jeopardizing any Federal funding.

The severe time constraints that Congress is now working under to complete the Surface Transportation Assistance Act of 1982 have precluded the inclusion of language similar to section 308 in this act. However, I have been assured by House Public Works and Transportation Chairman James Howard that it is his understanding that nothing in this act contradicts the language in section 308 of Public Law 97-369 and the intent of Congress is that the New York Metropolitan Transportation Authority can continue its existing elderly and handicapped fare program without loss of Federal funds.●

● Ms. OAKAR. Mr. Speaker, I congratulate the conference committee for retaining the priority listing for bridge replacement and rehabilitation projects to be funded by the $200 million set-aside of discretionary funds. The Greater Cleveland area is particulary grateful to the chairman of the Public Works and Transportation Committee, Mr. HOWARD, for reconfirming the priority status of three projects in our area. The three projects have been mentioned in previous legislative history. Their priority status was confirmed by the Public Works and Transportation Subcommittee Chairman, Mr. ANDERSON, on the House floor on December 6, 1982, when this important legislation was discussed. Transportation Secretary Drew Lewis also offered his assurances regarding the priority of the three bridge projects.

The projects are the Brooklyn-Brighton Bridge and the Main Avenue Bridge in Cleveland, as well as the Tinkers Creek Bridge on SR-8 in Ohio. The three projects, whose estimated cost is in excess of $54 million are vitally needed by the Greater Cleveland area. The bridges serve not only the city, but the surrounding suburbs as well. Work on the bridges will also provide much-needed employment in an area that has been particularly hard hit by the recession.

I commend conference committee, chairmen HOWARD and ANDERSON and Secretary Lewis for supporting these three projects and for adding them to the Secretary of Transportation's list of priority projects to be funded by the $200 million descretionary fund. I thank them for their support.

● Mr. LAFALCE. Mr. Speaker, it is never easy for a Member of this body to vote to increase user fees, particularly in the face of a recession. However, I believe that the proposal before us today is necessary to make much needed repairs and improvements in our highway and mass transit systems, while creating construction jobs for thousands of unemployed Americans.

It has been clear for several years that massive amount of money must be spent to revitalize our Nation's infrastructure. Even the relatively new interstate highway system is in need of substantial repairs and rehabilitation; and thousands of bridges throughout the country have so deteriorated as to raise serious questions about their safety. Of the Nation's 524,966 bridges, 40 percent require major repair or replacement, according to the Federal Highway Administration.

The conference report also includes additional funding for urban mass transportation programs. One cent of the new tax, approximately $1.1 billion annually, will be used to establish a new mass transit trust fund. This fund, which will be allocated on a nonformula, discretionary basis, can be used for a limited number of new, cost-effective, mass transit systems. The fund will also be available for major capital projects, the costs of which exceed funds available under the formula block grant program also established by the bill.

Of particular note is the administration's reversal of its position prohibiting mass transit funds for new construction—so called "new starts." When the administration proposed an increase in the gasoline tax, it did so with a prohibition against the use of mass transit funds for new starts. After intense pressure, that policy was changed; the conference report before the House today would allow new revenues raised to be expended on new starts. This is particularly good news for western New Yorkers, for it clears the way for the Niagara Frontier Transportation Authority (NFTA) to submit proposals to UMTA to fund extensions of the Buffalo Light Rail Rapid Transit System—including those to Tonawanda and Amherst.

The conference report also amends the highway trust fund allocation formula to insure that States get a fair return on the money they contribute to the fund.

The new formula block grant program will give the States greater flexibility on the use of funds, since funding would be provided on a year-by-year rather than a project-by-project basis. State and local communities can assess their mass transportation needs and allocate available Federal funds to top priority projects.

But the heart of the issue before us today, Mr. Speaker, is the gasoline tax increase to be paid by the users of America's highways. Tomorrow's headlines will not read "Congress approves new mass transit program." The single issue that will capture the attention of the public is the nickel that will be added to the price of a gallon of gasoline.

The Federal gasoline tax, which is dedicated to the Federal Highway Trust Fund, has not been increased since 1959 when an extra penny was added to raise the tax to 4 cents per gallon. Since 1959, the consumer price index has increased a whopping 237 percent. Had the Federal gasoline tax kept pace with consumer price increases, the American motorists would be paying 13.5 cents per gallon today, enough, perhaps, to have avoided the damage and disrepair that has befallen our transportation system.

An increase in the Federal gasoline tax has been the subject of debate for several years. President Ford proposed an increase of 3 cents per gallon in 1975 to conserve fuel. In 1977, President Carter called for a 5-cent increase to conserve energy and improve our Nation's highways. The conference report, which has the bipartisan backing of the majority and minority leadership in the House, and has been endorsed by the President, will achieve both these ends—conservation and improvements in our Nation's transportation systems—and create 320,000 jobs.

We must be careful not to delude ourselves or the American public into believing that the creation of 320,000 new jobs will make any more than a small dent in our Nation's unemployment problem. Twelve million Americans are "officially" unemployed while millions of others have simply given up all hope of finding employment and are no longer counted among the Nation's jobseekers. Less than 3 percent of those seeking work will be employed as a result of the additional construction activity generated by the $5.5 billion raised annually by the 5-cent-per-gallon increase in the gasoline tax.

As noted in a recent editorial that appeared in the Rochester Times Union, "A gasoline tax is a good way to rebuild aging roads, shore up crumbling bridges, and replace decrepit buses and mass transit. But it is not repeat not, a panacea for unemployment." At best, Mr. Speaker, the gasoline tax is simply necessary. Other mechanisms will have to be found to attack the unemployment problem, and repair and replace aging infrastructure—sewers, ports, libraries, canals, and industrial capacity—not aided by the highway trust fund and the public transportation trust fund.

Mr. Speaker, the legislation before us today grew out of a concern about the Nation's rapidly deteriorating highways and bridges and the highest unemployment since the Great Depression. We cannot stand idly by as our Nation's bridges and roadways crumble and as the ranks of the unemployed continue to reach record levels. The conference report afforts us an opportunity to take a much-needed step in the right direction. It will not cure our infrasture problems nor will it cause a significant decline in unemployment. What this bill will do is make our highways safer, repair crumbling bridges, improve urban mass transportation systems, and remove 320,000 Americans from the unemployment rolls. It is a small response to problems that must be the center of our attention in the 98th Congress which convenes in January.

Thank you.●

The SPEAKER. All time has expired.

Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER. The question is on the conference report.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. DANNEMEYER. Mr. Speaker, on that I demand the years and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 180, nays 87, answered "present" 1, not voting 165, as follows:

[Roll No. 488]

□ 2100

The Clerk announced the following pairs:

On this vote:

Mr. Rahall for, with Mr. Mottl against.

Mr. Simon for, with Nichols against.

Mr. Gray for, with Mr. Panetta against.

Mr. Fazio for, with Mrs. Bouquard against.

Mr. Conte for, with Mr. Myers against.

Mr. Campbell for, with Mr. Hartnett against.

Mr. PETRI changed his vote from "nay" to "yea."

Mr. MYERS. Mr. Speaker, I have a live pair with the gentleman from Massachusetts (Mr. CONTE). If he were present he would have voted "yea." I voted "nay." I withdraw my vote and vote "present."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair wishes everyone a Merry Christmas.

CLARIFICATION OF INDIAN TRIBAL GOVERNMENT IN THE CASE OF ALASKA NATIVES

Mr. ROSTENKOWSKI. Mr. Speaker, I send to the desk a concurrent resolution (H. Con. Res. 439) providing for clarification of Indian tribal government in the case of Alaska Natives, and ask for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore (Mr. FOLEY). Is there objection to the request of the gentleman from Illinois?

□ 2110

Mr. CONABLE. Mr. Speaker, reserving the right to object, I do so for the purpose of clarification. It is my understanding, and I ask the chairman to confirm this, that the bill passed earlier relating to Indian tribal government had an unnecessarily limited provision in it with respect to native Americans living in Alaska. The pur-

pose of this concurrent resolution is to make a correction in that so that the law will apply to all the tribes in Alaska with the same effect as those Indian tribes in the lower 48. The purpose is only to correct an error in the earlier measure. It does not in any way change the substance of the earlier measure, but extends its scope to Alaska Natives.

Mr. ROSTENKOWSKI. Mr. Speaker, the gentleman's observation is correct.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield.

Mr. SEIBERLING. Will the gentleman tell me—this sounds like something within the jurisdiction of the Committee on Interior and Insular Affairs, dealing with Alaskan Native affairs. Is this a tax matter?

Mr. ROSTENKOWSKI. This is a tax measure that was considered by the Ways and Means Committee and passed earlier this evening.

Mr. SEIBERLING. So this is not dealing with the normal exercise of power——

Mr. ROSTENKOWSKI. Not at all.

Mr. CONABLE. Further reserving the right to object, I would like to tell the gentleman that the earlier measure had to do only with the taxing powers of Indian tribes.

Mr. SEIBERLING. I thank the gentleman.

Mr. CONABLE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 439

Resolved by the House of Representatives (the Senate concurring), That the Clerk of the House of Representatives, in enrolling H.R.5470, shall substitute for paragraph (40) of section 7701(a) of the Internal Revenue Code of 1954 (as added by section 203 of the bill) the following new paragraph:

"(40) INDIAN TRIBAL GOVERNMENT.—

"(A) IN GENERAL.—The term 'Indian tribal government' means the governing body of any tribe, band, community, village, or group of Indians, or (if applicable) Alaska Natives, which is determined by the Secretary, after consultation with the Secretary of the Interior, to exercise governmental functions.

"(B) SPECIAL RULE FOR ALASKA NATIVES.—No determination under subparagraph (A) with respect to Alaska Natives shall grant or defer any status or powers other than those enumerated in section 7871. Nothing in the Indian Tribal Governmental Tax Status Act of 1982, or in the amendments made thereby, shall validate or invalidate any claim by Alaska Natives of sovereign authority over lands or people."

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT AS MEMBERS OF COMMITTEE TO INFORM PRESIDENT OF THE UNITED STATES THAT THE TWO HOUSES HAVE COMPLETED THEIR BUSINESS AND ARE READY TO ADJOURN

Mr. WRIGHT. Mr. Speaker, I call up House Resolution 640 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 640

Resolved, That a committee of two Members be appointed by the House to join a similar committee appointed by the Senate, to wait upon the President of the United States and inform him that the two Houses have completed their business of the session and are ready to adjourn, unless the President has some other communication to make to them.

The resolution was agreed to.

The SPEAKER. The Chair appoints as Members on the part of the House of the Committee to Inform the President the gentleman from Texas (Mr. WRIGHT) and the gentleman from Illinois (Mr. MICHEL).

TRIBUTE TO DEPARTING AGRICULTURAL LEADERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Vermont (Mr. JEFFORDS) is recognized for 30 minutes.

● Mr. JEFFORDS. Mr. Speaker, there is little question that agriculture is our country's most basic and largest industry. It is the continuing goal of Republican members of the House Committee on Agriculture to insure that we maintain a sound, market-oriented farm and food policy so that America's farm families may pursue their unparalleled production with the opportunity for profit.

Unfortunately, five of my fellow Republicans on the Agriculture Committee will not be serving in the 98th Congress just ahead. They have accomplished so such that I wish to pay tribute to the leadership they have exhibited and the yeoman service they have performed on behalf of agriculture. Enthusiastically joining me in these remarks gentleman from Missouri (Mr. COLEMAN), are the gentleman from Montana (Mr. MARLENEE), the gentleman from Kentucky (Mr. HOPKINS), the gentleman from Idaho (Mr. HANSEN), the gentleman from Minnesota (Mr. STANGELAND), the gentleman from Kansas (Mr. ROBERTS), the gentleman from Missouri (Mr. EMERSON), the gentleman from New Mexico (Mr. SKEEN), the gentleman from Washington (Mr. MORRISON), the gentleman from Wisconsin (Mr. GUNDERSON), the gentleman from Iowa (Mr. EVANS), and the gentleman from California (Mr. CHAPPIE).

I refer, of course, to my colleagues: WILLIAM C. WAMPLER of Virginia, PAUL FINDLEY of Illinois, TOM HAGEDORN of Minnesota, JOHN NAPIER of South Carolina, and CLINT ROBERTS of South Dakota.

I particularly want to commend BILL WAMPLER not only for his effective leadership of his fellow Republican members but for his demonstrated diplomacy in working with the Agriculture Committee's majority in advancing the cause of farm families.

In the "Fighting Ninth" District of southwestern Virginia, where politics is a way of life, Congressman WAMPLER has earned the distinctive and effectionate nickname, "The Bald Eagle of the Cumberlands." His unflagging work on behalf of sound farm policies and constant vigilance against deficit spending has earned him national esteem.

The relationship between farm policy and sound fiscal policy was the keystone of BILL WAMPLER's legislative work in agriculture. The gentleman from Virginia correctly reflected farmers' feelings when he said on more than one occasion that bringing inflation and high-interest rates under control would be the best farm program that the Congress and the administration could provide.

Time and space will not permit me to recount the many fine legislative efforts of BILL WAMPLER, so let me just touch on a few as indicative of the effective efforts he has made in the course of his 18 years in the Congress.

BILL WAMPLER has long been known on Capitol Hill as "Mr. Agriculture Research" because of his constant work in championing the cause of agricultural research, extension, and teaching in the United States.

BILL was the author and prime mover of title XIV of the 1977 Farm Act which sought to reverse a decade or more of decline in research, extension, and teaching in the food and agricultural sciences by authorizing a dramatic, 5-year increase in funds of existing programs in those sciences at the Federal, regional, and State levels.

That act also initiated new research, extension, and education programs in the hope that these new initiatives would enhance food and agricultural productivity geared to this Nation's future needs.

In 1981, displeased with the lack of enough progress in carrying out the initiatives authorized in the 1977 Farm Act, BILL WAMPLER again took the leadership introducing amendments to make clear the original intent of the Congress in establishing the National Agricultural Research, Extension, and Teaching Policy Act (title XIV)—this time to make it perfectly clear that the Congress expects the executive branch to reinforce the historic State-Federal partnership in the research, extension, and teaching programs in the food and agricultural sciences.

One of the first results of this revitalized effort, enacted as a new title XIV of the Agriculture and Food Act of 1981, was the appointment of a new and added Assistant Secretary of Agriculture to maintain a continuing oversight of the objectives of title XIV.

In the pesticides area, BILL WAMPLER worked actively in support of H.R. 5203 which provided for a 2-year extension of the Federal Insecticide, Fungicide, and Rodenticide act (FIFRA) and, more importantly, containing amendments which responded to many problems identified since FIFRA was last amended in 1978.

Mr. WAMPLER long has been recognized as one of the members most familiar with FIFRA and one of the authors of the amendment included in FIFRA which established the Scientific Advisory Panel and the amendment to provide peer review of the scientific decisions emanating from the Environmental Protection Agency with regard to pesticide registrations and regulations. BILL WAMPLER supported and fought for strengthening amendments to our pesticide legislation to maintain the needed balance to enable EPA to continue to protect the health and safety of the public and pesticide users while allowing farmers and producers to benefit from modern, cost-effective chemical pest control technologies.

The gentleman from Virginia long has been an ardent advocate of sound scientifically based food safety policy. In June 1981, he cosponsored legislation to consider a number of changes in present food safety policies. Among other provisions of the bill was a requirement that the banning of a food additive be based on a scientific finding of significant risk to human health, rather than the absolute "zero risk" principal required under the present law's so-called Delaney clause.

BILL WAMPLER has always had a strong interest in food and nutrition issues. He has said on many occasions that he supports the food stamp program and that the program, when it helps the elderly and the disabled and those low-income people who are in need, is a very humanitarian program. However, BILL has expressed his concern about the growth and the cost of the food stamp program and thus has supported those actions that eliminate fraud, abuse, and mismanagement.

There is no question in my mind that BILL WAMPLER's wise and compassionate leadership will be sorely missed.

Another of our colleagues who will be missed is PAUL FINDLEY of Illinois, an intelligent, articulate legislator who has championed the cause of market-oriented agriculture since he was first elected to Congress in 1960.

In the 97th Congress, PAUL FINDLEY was a leader in the administration's fight to reduce Government involvement in agriculture, first introducing the administration's farm bill, and then working hard with his Agriculture Committee colleagues to assure that the final bill would provide farm income protection without breaking the U.S. Treasury.

PAUL is a man of strong convictions, not to be deterred because his position may not always be the most popular. He has not been afraid to take on the tough issues. I remember well how he led the fight to introduce flexibility into the dairy price support program, maintaining that the long-term interests of dairy farm families would be better served by keeping dairy program costs under control rather than run the risk of burdensome costs which could cause the program to be eliminated..

PAUL FINDLEY has constantly contended that farm economic problems cannot be solved by inflationary Treasury outlays; that throwing money at these problems often makes them worse instead.

PAUL FINDLEY's market orientation philosophy does not stop at home. He believes that you cannot have a market-oriented domestic policy if you do not have a market-oriented foreign policy. That is why he was out front in convincing President Reagan to lift the Carter embargo on U.S. grain sales to the Soviet Union.

Through his position as a senior member of both the Agriculture Committee and the Foreign Affairs Committee, Congressman FINDLEY has been a leader in U.S. efforts to eliminate nontariff trade barriers and unfair export subsidies of foreign competitors. He led successful U.S. efforts to head off European Economic Community restrictions on imports of U.S. corn gluten feed. He strongly supported President Reagan's efforts to test the General Agreement on Tariffs and Trade (GATT) to see whether it can be relied on to assure fair market access for U.S. farm products.

PAUL has supported the expansion of Public Law 480, the food for peace program, believing that this Nation's aid policies, in addition to serving humanitarian needs, should be coordinated with two-way trade objectives to build markets for U.S. products.

While a strong supporter of Government efforts to assure adequate nutrition for poor people in this country and overseas, PAUL FINDLEY recognizes the value and diginity of American principles regarding work. For this reason, he might be called the Mr. Workfare of the Congress. Under workfare, able-bodied people work for their food stamps. As a result of FINDLEY's workfare initiatives in the food stamp program, Congress adopted a Findley amendment to expand the workfare program to any community that wants to participate in it.

As the fourth ranking minority member of the Agriculture Committee, TOM HAGEDORN was one of the most effective leaders in defending the needs of American agriculture.

TOM was the ranking Republican on the Livestock, Dairy, and Poultry Subcommittee, in the 97th Congress. In that position, he was instrumental in dealing with the major problems confronting these vital sectors of agriculture.

He was very active in working to preserve the integrity of the dairy price support program, a program that has been beset with a huge supply-demand imbalance resulting in record levels of Government price support purchases of dairy products. Mr. HAGEDORN worked closely with the administration and with representatives of producer, industry, and consumer groups to develop effective legislation to make equitable adjustments and bring Government costs under control.

TOM has introduced and cosponsored legislation in the areas of meat and poultry inspection, improvement of food safety laws, animal disease control, easing of import duties on animal drugs necessary for U.S. herds, and humane treatment of horses during the course of transportation.

TOM HAGEDORN was an ardent supporter of movement toward free trade and improving our status as a reliable supplier of agricultural products in world markets. He strongly opposed the 1980 grain embargo and introduced recently passed legislation that preserves the integrity of our agricultural export contracts in the event of a trade embargo.

He believed that Congress should uphold the philosophy of reliance on the market place to sustain farm income and not place the burden on the Federal Government. To that end, he pressed for better utilization of existing export credit programs. In addition, he introduced bills that have since become law to expand of agricultural commodities, particularly dairy products.

TOM was particularly concerned with the specific trade problems that the United States has encountered in exporting farm commodities. He introduced legislation to establish the concept of reciprocity of market access as a key principle of U.S. agricultural trade policy and trade law.

Those who know TOM HAGEDORN know that he has been a tireless legislator on Agriculture's behalf. He has made a significant contribution to the work of the Agriculture and the Congress.

JOHN NAPIER of South Carolina has proven to be another hard worker among the freshmen members of the Agriculture Committee. Believing in the need for vitality in the tobacco price support program, he was a leading element in congressional strategy designed during the 97th Congress to

prevent antitobacco legislation and insuring the continuation of a program to better serve tobacco farmers and the tobacco industry. Through his efforts to forge a bipartisan coalition, he was instrumental in the continuation of the tobacco price support program.

Representative NAPIER was a staunch defender of the rural telephone bank and rural electrification programs. He worked hard to see to it that these programs were maintained at adequate funding levels and their administrators allowed access to the Federal Financing Bank.

Additionally, JOHN supported legislation to provide the Secretary of Agriculture the authority to implement set-aside programs and urged him to do so to reduce supplies and raise prices. He also supported efforts to expand commodity exports.

The FmHA emergency loan program was supported by Mr. NAPIER in an effort to insure that adequate financial support exists for small, undercapitalized farms. JOHN also worked to promote efforts to tailor Farmers Home Administration programs to FmHA's original purpose: to develop farm and small community basic services.

Another very active freshman member of the Agriculture Committee during the 97th Congress is CLINT ROBERTS of South Dakota.

Mr. ROBERTS introduced legislation on family enterprise estate and gift taxes geared primarily to protecting family farms. Many provisions of his bill were incorporated into the Tax Reform Act of 1981.

Like others whose farm constituents were adversely impacted, Mr. ROBERTS was a strong proponent of lifting the Soviet grain embargo, working with key Agriculture Committee members to urge the President to end the embargo, an effort that was singularly successful.

On the homefront, CLINT cosponsored legislation with Mr. FINDLEY to establish the workfare system in the food stamp program.

Congressman ROBERTS was the prime sponsor of H.R. 4347, a bill to reauthorize the WEB rural water project which will affect his home State of South Dakota and to authorize other water development studies. The Agriculture Committee, along with the Interior Committee, reported the legislation to the House where it was passed by unanimous consent. Following favorable Senate action, the bill was signed into law by the President in an Oval Office ceremony with CLINT ROBERTS in attendance.

CLINT was active in other areas of concern to the farm sector, as well, during the 97th Congress, cosponsoring legislation on animal damage control, suspension of export sales, bankruptcy reform with regard to farm produce storage facilities, as well as other legislation to aid farm families and rural communities.

If a common thread runs through the fabric of these five gentlemen's congressional experience, it could be called justifiable pride in service—service to their constituents and, through that service, an even greater service to their country. Their colleagues in the Congress wish them Godspeed and every success in their future endeavors.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. NELSON) is recognized for 5 minutes.

● Mr. NELSON. Mr. Speaker, due to unavoidable circumstances, I was not present and was, therefore, unable to cast my vote on House Resolution 636 (rollcall No. 486), which provided for the consideration of H.R. 3809 relating to the disposal of nuclear wastes. Had I been present, I would have voted for House Resolution 636.●

SAFETY PROBLEMS IN THE AIR TRAFFIC CONTROL SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. FORD) is recognized for 5 minutes.

● Mr. FORD of Michigan. Mr. Speaker, yesterday the National Transportation Safety Board (NTSB) confirmed what many of us have feared would happen with the Federal Aviation Administration's (FAA) program to rebuild the air traffic control system. The NTSB confirmed that the FAA is cutting corners in its training program, a practice which can only adversely affect aviation safety.

The NTSB investigation revealed that as far back as May of this year, the FAA waived its own requirement that a controller assigned to conduct on-the-job training for a trainee must first receive FAA-approved instructor training. In a "Class I Urgent Action" recommendation, the Board recommended this waiver be canceled immediately. The Board expressed its concern that many controllers providing on-the-job training did not have sufficient experience or seasoning. According to the Board—

> In some instances, developmental (trainee) controllers were certified on a position in the morning and were conducting on-the-job training at that same control position for another developmental controller in the afternoon of the same day.

The Board further found that those few experienced controllers available are being overworked, noting:

> Many senior controllers are conducting on-the-job training for 5 to 7 hours per shift which the Safety Board has determined to be very stressful for the instructors and trainees in heavy workload situations.

Members will recall that this is not the first time the FAA has cut corners in its training program. A year ago a Post Office and Civil Service Committee investigation determined that grades had been falsified at the FAA training academy to increase the number of students passing.

I am sure the Members share my concern over the Safety Board's most recent findings. I must point out, however, that the pay package which the administration rammed through the Congress earlier this year does not appear to have alleviated the problems the FAA is facing in rebuilding the system. I want to assure the Members that the Committee on Post Office and Civil Service will continue to closely monitor this situation during the next Congress.

I would like to include the Safety Board's report:

NATIONAL TRANSPORTATION SAFETY BOARD,
Washington, D.C. December 20, 1982.

Re Safety recommendation(s), A-82-146 through -149.

Hon. J. LYNN HELMS,
Administrator, Federal Aviation Administration, Washington, D.C.

The National Transportation Safety Board began a followup special investigation[1] of the Air Traffic Control (ATC) system of the United States on October 1, 1982. The purpose of this investigation is to evaluate the safety of the ATC system at a later point in its rebuilding phase following the controller's strike of August 3, 1981. The investigation has involved surveying 50 ATC facilities, including 16 air route traffic control centers (ARTCC'S) and 34 terminal radar and non-radar facilities, and interviewing about 350 facility managers, staff, controllers, controller trainees, and military controllers temporarily assigned to the Federal Aviation Administration (FAA). Safety Board investigators have observed ATC operations at the facilities, while riding in the cockpits of commercial airlines, and while flying airplanes within the system.

The Safety Board has not yet completed its analysis of all the information gathered during the field phase of its followup investigation. Once the analysis is completed, the Safety Board will issue a final report of the special investigation. However, the investigation has revealed some specific safety problems which the Board believes require immediate, corrective action by the FAA. The safety problems relate to the manner in which on-the-job training (OJT) is being administered and regulated by ATC facility management.

Before May 7, 1982, a controller assigned to conduct OJT for a trainee (developmental) controller was required first to receive FAA-approved instructor training in accordance with Chapter 3, Section 2, Paragraph 100.C(3) of FAA Handbook 3120.4F, "Air Traffic Training." However, on May 7, 1982, the FAA issued a general notice (GENOT), which waived this requirement for ATC facilities "where resources prohibit adminis-

[1] For additional information, read: Special Investigation Report—"Air Traffic Control System" (NTSB-SIR-81-7) issued Dec. 8, 1981, which was based on investigative data spanning the period Aug. 3, 1981, to Oct. 9, 1981.

tering appropriate training courses" until May 1, 1983. The Safety Board believes that the FAA should reconsider its decision on this matter for several reasons.

During its investigation of the ATC system, the Safety Board learned that many facilities are using newly certified controllers to provide OJT on both radar and nonradar control positions immediately after the newly certified controllers have been "signed-off" on a control position, but before they have had time to develop either sufficient experience or "seasoning" at that position or receive FAA-approved instructor training. ATC facility personnel, including experienced controllers, newly certified controllers, and facility staff have expressed concern to the Board's investigators about the prudence and reasonableness of this practice. In some instances, developmental controllers were certified on a position in the morning and were conducting OJT at that same control position for another developmental controller in the afternoon of the same day. It was also learned that one developmental controller, certified on a radar position, gave OJT to another developmental controller during a part of the shift and, later in the same shift, they reversed their roles at another radar control position. since the waiver to the standards on May 7, 1982, there presently are no ATC system-wide standards in effect governing the amount of experience at a control position or the amount of classroom training in instructor techniques a controller should have before he/she is assigned as an OJT instructor.

During the Safety Board's initial investigation of the ATC system in the fall of 1981, the FAA stated that no significant modifications of facility training programs to quality controllers were being undertaken on planned. Further, Chapter 3, Section 2, Paragraph C(1) (not waived) of FAA Handbook 3120.4F, requires that an OJT instructor, "Be proficient on the position at which the training is being conducted." "Proficient" is defined as being "highly skilled." Based on the foregoing information, the Safety Board believes that the existing implementation of OJT at many facilities is not in keeping with the intent of this important criterion and may have a deleterious effect on the proficiency and capabilities of the newly trained controller workforce. Therefore, the Satety Board believes that the FAA should immediately cancel the waiver governing instructor training requirements and the FAA should immediately reexamine its use of newly certified developmental controllers at OJT instructors.

Experienced OJT instructors now have a double incentive to spend considerable extra time conducting OJT. The first incentive is the newly enacted ATC pay package which includes extra pay for conducting OJT. The second incentive is the desire of senior controllers' to qualify trainees rapidly so they can return to a normal workweek and vacation schedule. Additionally, these personal incentives are reinforced by the manager's desires to meet training goals. As a result, OJT instructors are often scheduled by management for extensive training periods and because they feel obligated to train new controllers to rebuild the workforce, the instructors willingly comply with management's instructions and undertake the assignment. As a result, many senior controllers are conducting OJT for 5 to 7 hours per shift which the Safety Board has determined to be very stressful for the instructors and trainees in heavy workload situations. Additionally, the extended hours of OJT do not provide for a meaningful learning situation for the trainees.

The Board's investigators learned that this situation became so serious at one facility surveyed by the Safety Board that the Facility Advisory Board members brought it to the attention of facility management. Additionally, the Board's investigators learned that, at an "all hands" meeting at this facility, senior controllers complained about the exceedingly stressful effects of the existing OJT workload to facility management. As a result of those complaints, actions were taken to allow full performance controllers at the facility to schedule certain days during which they would not conduct OJT. The OJT Instructors expressed relief to the Safety Board's investigators at the easing of the excess stress of conducting continued OJT. It is the responsibility of managers to recognize the adverse consequences of conducting protracted OJT and to develop realistic methods of keeping the amount of OJT required to be provided by controllers at an acceptable level. Therefore, the Safety Board believes that the FAA should consider adopting and formalizing this particular measure of controlling the amount of OJT systemwide to relieve undue controller stress at other facilities with heavy OJT workloads.

Safety Board investigators also studied a procedure developed at LaGuardia Tower, a level-four terminal facility, to control and monitor the controller training process during the rebuilding of the ATC workforce. The facility manager pooled the two Evaluation, Proficiency and Development Specialists (EPDS) and the one Planning and Procedures Specialist (PPS), who was also performing as an EPDS at the time, and assigned one of them to each of the three facility controller teams, shortly after the strike began in August 1981. The specialists' responsibilities include oversight of OJT and classroom and administrative training requirements for their respective team members. They are also responsible for coordination of all training activities with the respective team manager. Although this practice was originally set up on a temporary basis, the positive experience and results of the arrangement have caused the facility manager to continue the practice, and to recommend it to FAA ATC regional and headquarters staff as a permanent team position entitled Evaluation, Proficiency, and Procedures Specialist (EPPS). The proposed EPPS position would perform the combined functions of an EPDS and PPS, and thereby satisfy the needs of each team in training, administration, evaluation, proficiency development, program development, and program planning.

The Safety Board's investigators were impressed by both the quality and quantity of training conducted by and directed by the team-assigned EPDS's (EPPS), and their ability to monitor and control first-hand the training of their respective team members. Therefore, the Safety Board believes that this concept should be analyzed and considered by the FAA for adoption at other ATC facilities. The implementation of a team-assigned "EPPS" or a similar procedure could enhance the ATC system controller workforce recovery process and could assist in the resolution of many of the shortcomings of the existing OJT program, which are of concern to the Safety Board.

In view of the above, the National Transportation Safety Board recommends that the Federal Aviation Administration:

Cancel immediately the waiver of the FAA Handbook "Air Traffic Training," 3120.4F, Chapter 3, Section 2, Paragraph 100.C(3), which requires instructor techniques training prior to being assigned to conduct on-the-job training. (Class I, Urgent Action) (A-82-146)

Provide air traffic control facility managers with guidance and criteria to govern the use of newly certified developmental controllers as on-the-job instructors to ensure that the instructors are experienced, proficient and trained in instructor techniques before being assigned to conduct training. (Class II, Priority Action) (A-82-147)

Provide air traffic control facility managers with guidance and procedures to place a more measured control on the amount of on-the-job training that controllers are assigned to conduct commensurate with workload and the complexity of the traffic being handled at the control position. (Class II, Priority Action) (A-82-148)

Develop and adopt the team-assigned Evaluations, Proficiency and Procedures Specialist concept, based on that in use at the LaGuardia Tower, or a similar concept, in place of the existing staff-assigned. Evaluations, Proficiency and Development Specialist-Planning and Procedures Specialist concept in use at appropriate air traffic control facilities. (Class II, Priority Action) (A-82-149)

Burnett, Chairman, Goldman, Vice Chairman, McAdams, Bursley, and Engen, Members, concurred in these recommendations.

PATRICIA A. GOLDMAN,
(For Jim Burnett, Chairman).●

THE GLOBAL ECONOMIC CRISIS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 60 minutes.

● Mr. LAFALCE. Mr. Speaker, as the 97th Congress draws to an end, many issues remain for the new Congress to address. Among those is a little understood crisis that is dominating the time and energy of the world's financial and political leaders, including our President. We are facing an overwhelming problem in the world economy that could result in the collapse of the world financial structure. That problem is seen in closest detail in the crises that have faced Mexico, Argentina, and Brazil. When the picture is painted more broadly, we are shown in frightening perspective the possibility of worldwide economic disruption with disastrous consequences for an already imperiled American economy.

The problem of global economic crisis is one that cannot be ignored in this Chamber. Today, Mr. Speaker, the House Banking Committee held an important hearing on this momentous issue. Members of the committee heard Secretary of the Treasury Donald Regan testify on the importance of a strong American response to the financial crisis abroad, and on the importance of that response to the American economy. That testimony corroborated my judgments regarding the urgency of this problem. The tidal wave of international insolvency will

not wait for us to pause. The threat is to the vital lifeline of world trade, and we must respond immediately.

I would like to briefly outline the genesis of this crisis, what consequences are falling on the shoulders of our neighbors across the world, and the stake that America has in this situation. I will then outline some potential avenues for resolving the current crisis and providing for stable economic expansion in the future. Mr. Speaker, I do not hesitate to say that the issue here is perhaps more important to America's future prosperity than any we have had before us in my tenure in Congress. Our colleagues must address these problems with all of the intellectual ability and vision we can muster, and we must address them soon.

THE GENESIS OF THE CURRENT CRISIS

As we know, the whole of the industrialized world is in recession, and the situation in developing countries is even worse. Growth in the industrial nations is flat, world trade is off, and developing countries stagger under an enormous burden of short-term debt. The world financial system has been shaken by political events in Poland, war in the Falklands, and the recent debt problems of Argentina, Mexico, and Brazil. We are in the midst of a difficult situation in which we worry about the risks of international lending by banks and yet grow concerned that these institutions will cease their lending. Many very worthy borrowers have been transformed into international credit risks. Several developing countries teeter on the edge of default and, in fact, the situation in certain industrial countries is also precarious.

The stage for this turn of events was set when commercial banks assumed the responsibility for recycling the flood of OPEC dollars that became available in the international market in the 1970's. The price hikes that created these petro-dollars found non-oil, less developed countries (LDC's) strapped for funds to finance oil purchases and in need of capital inflows to support development. International banks undertook aggressive loan making activities in LDC's where borrowers, experiencing enormous needs for external financing, amassed huge quantities of short-term debt. From 1973 to 1982, debt carried by these countries surged from about $100 billion to about $500 billion. Half of the increase in the debt of LDC's between 1974 and 1978 was to private financial institutions. By 1982, commercial banks in the West held 65 percent of total East bloc and LDC debt. Much of the growth in debt reflected rising oil prices, and much of it was contracted for the short term at floating interest rates.

As Secretary Regan pointed out, quite rightly, this morning, heavy borrowing was not the "appropriate economic response." Instead of instituting policies of restraint, many countries financed continuing domestic outlays with external debt. After the oil price increase of 1979–80, Third World borrowers saw the burden of this loan-making grow tremendously with changes in the world economy as the United States and all of the major industrial nations undertook a series of efforts to combat inflation. The result has been a world situation that has economies throughout the world suffering from high unemployment and the effects of recordbreaking interest rates over the last 2 years.

LDC borrowers saw the price of debt in international markets reach unbelievable highs. The London Interbank Offer Rate (LIBOR) and the New York prime, on which private international debt is based, increased dramatically. The average rate for country borrowing, including spread and fees, rose from 8 percent in 1972 to 18 percent in 1981. The costs associated with these increases were enormous. Each percentage point rise in the LIBOR rate was estimated to increase the debt servicing costs for developing countries by $3 billion per year.

Further complicating the picture, the price and volume of commodity exports from developing countries fell as the global recession dampened demand. Prices for commodities declined precipitously, reaching a 30-year low. The effect of such a price tumble can be illustrated by a recent report in the Financial Times that Tanzania must now produce more than 13 tons of tea to buy a tractor which, in 1972, could be traded for only 5 tons. Earnings from commodity trade have obviously not been able to keep up with increases in financing costs. Morgan Guaranty's "World Financial Markets" has estimated that in 1982 total debt servicing will amount to 179 percent of Argentina's exports, 129 percent of Mexico's, 122 percent of Brazil's, 116 percent Chile's, and 95 percent of Venezuela's

The result of these difficulties have been payments crises in a number of developing countries. Mexico faced an $80 billion debt problem. Brazil and Argentina have required, like Mexico, large loans from the International Monetary Fund (IMF) and a massive rescheduling of private debt. Bolivia may request $300 million from the IMF in February, and the Philippines may be forced to ask commercial banks to reschedule as much as $500 million of its foreign debt.

The crisis is moving into the industrial nations also, where external borrowing has been used to finance massive social programs. France may be requesting IMF funds before long, and Denmark has been placed on Standard and Poor's watch list. There are many others. As Secretary Regan said, "Internationally, rescheduling has become a growth industry."

As developing borrowers, in particular, began to experience difficulties, the availability of bank credit has been reduced as lenders shied away from their previous commitment to LDC's. This only exacerbates the problems for those borrowers who face debt crises, and in fact threatens those which have made a strong effort to finance their obligations by clamping down on internal growth.

Brazil, which was last week saved from default by a hastily executed package of loans from the industrial countries, has had sound financial management and a strong economy, burdened only by the cost of oil. Financing that cost through private loans—foreign assistance has slowed to a trickle because of the country's economic progress—Brazil amassed $85 billion in foreign debt. Financial collapse has been avoided at large cost: In 1981, real income per person fell by over 5 percent, after increasing for two decades.

THE EFFECT OF THE CRISIS ON THE WORLD ECONOMY

Mr. Speaker, there has been a great deal of press coverage in recent months of international efforts to avoid defaults by some of the largest borrowers. Mexico has instituted an austerity program in accordance with its agreement with the International Monetary Fund. Argentina is negotiating with the IMF and international bankers, and Brazil has signed a letter of intent with the IMF for a $4.5 billion loan. To some it may seem that the crisis is over. That perception is gravely mistaken.

Treasury Secretary Regan expressed this morning the strain placed on the international system by the problems of large debtor countries. He noted particularly the fact that the demands being placed on the IMF are unprecedented. The difficulty has not past.

Commentator Hobart Rowen said in the Washington Post of December 16 that:

> The hard reality is that the global economy could be teetering on the brink of a major disaster that can be averted * * * only by signs of courageous leadership by the United States.

On the same day, the Brandt Commission proclaimed that:

> The global economy has slid into a recession which has begun to resemble the Great Depression of the 1930's.

The effects of the world situation are being felt here as well as in the strained economies of the developing world. The inter-relatedness of world markets insures that the pains of payments problems are felt in the industrial world, and we have to very carefully assess the impact of those problems. The risk, Mr. Speaker, is not only to those countries on the verge of

insolvency, and it is not only to lenders who face massive loan losses. The risk is borne by this economy and by the economies of the industrialized world.

This risk takes several distinct and very important characteristics and should be of important consequence to our decisionmaking here in Congress. First, we are experiencing the risk of an international financial crisis. Our banking system, in particular, is exposed to potentially threatening losses in the world economy. By the end of 1981, the nine largest American banks had loans outstanding to Argentina, Brazil, and Mexico of 20, 42, and 45 percent of their capital. One recent report says that the 10 U.S. banks with the largest Mexican exposure hold loans totaling $13.5 billion. While rescheduling of debt decreases the risk of such great exposure, we should be aware that a reaction of fear in the international market could cause a major crisis in our domestic monetary system.

Another facet of the risk we face in the international market is exacerbating economic contraction. Mr. Speaker, default or near-default causes economic contraction in problem-ridden economies. As individual nations restrict economic activity, the world economy becomes static. World trade is slowed and the pressure for protection of available markets grows. Mr. Speaker, when developing countries are unable to sell their exports, they are not going to be able to buy our imports. And when the engine that drove economic growth in the 1970's—international trade—is shut off, the world financial system is threatened. Worldwide depression becomes a reality.

Self-interest alone demands that we react to the immediate crisis. Foreign trade is a major factor in U.S. business and employment. In 1970, exports and imports combined accounted for 8.6 percent of GNP; today they account for 18 percent. Much of that growth reflects growth in trade with developing countries. Currently the U.S. sends one-third of its exports to non-oil developing countries. More of our products and services are purchased in those countries than in all countries of the European Community.

The importance of trade to our economy was recently emphasized by Fred Bergsten, former Assistant Secretary of the Treasury and current Director of the Institute for International Economics, who observed that 60 percent of our growth from 1978 to 1980 was attributable to improvements in our external balance. Further, he added, "from 1981 through mid-1982, the deterioration in our external balance was the largest single factor—larger than the slumps in the housing or auto industries—pushing our economy into recession."

Mr. Speaker, the importance of trade, and growth in trade, cannot be overemphasized. One recent study said that a gain in growth of 1 percent in the developing world is worth $1.5 billion in new exports from the industrial West. I shudder to think what might happen in the loss of a large proportion of those markets. Contractions in the debtor countries will at the very least threaten recovery in the industrial nations. It could do much worse. As Federal Reserve Chairman Volcker has warned, "Should we fail to understand the full extent of these difficulties or respond inappropriately, no country will escape the consequences."

A NEW INTERNATIONAL PERSPECTIVE

The belief that our Nation can live in isolation from world economic woes must die. We rely on trade for jobs and profits as well as goods and services. In the midst of crisis, then, we must enact a program to promote global health. If we do anything less, we risk setting in motion a chain of events that could undermine the political and economic stability of crucial allies in the less-developed countries, and ultimately result in economic disaster within the industrial nations. I repeat what Volcker said, "no country will escape the consequences."

The problems of debt service in Bolivia, Ecuador, and Costa Rica are our problems. Belt tightening in South Korea, Chile, and the Philippines means difficulties in the United States. The human costs of slowing development in countries where people pay through disease and poverty must be tallied to our account. And, Mr. Speaker, debt problems in the developing world are going to lead to problems in the world of our important Western Allies.

A PROPER RESPONSE

In order to address the crisis of our international financial system we must take immediate action. Fortunately, Mr. Speaker, the President and his cabinet have finally come to see the need for a U.S. commitment to the solution of this issue. As the Washington Post noted editorially on December 14, the administration is "tuning down the accusatory bombast and talking pragmatically about cooperation." Three months ago I was dismayed over the stubborn resistance of the administration to taking much needed steps to assist countries in distress. I now praise the efforts of Treasury Secretary Regan in bringing the issue to the forefront in conjunction with last week's Frankfurt meetings, and I strongly support the President's resolve to request congressional action. I am also very pleased that the chairman of the House Banking Committee has convened hearings this week on these problems.

Mr. Speaker, we must assist troubled countries appropriately, rapidly, and effectively. The response of many of our colleagues, however, might be that we are "bailing out the banks who created the problem origially." Robert Solomon, former adviser to the Board of the Federal Reserve System and currently a guest scholar at the Brookings Institution, has said, and I agree, that "It cannot be overemphasized that the recession and high interest rates in the industrial countries are at the heart of the debt servicing difficulties of the developing nations." High interest rates increase the cost of funds; recession means that countries cannot finance the increased costs by selling exports. If we want to describe the efforts as a bailout Mr. Speaker, we should describe them as a bailout of the world economy.

The point must be reinforced that we are not shoring up faulty economies by seeking a short-term answer to the impending crisis. Most of the countries that are experiencing payments problems are fundamentally sound. In time, they can pay their debts. The problem is one of liquidity, and it is the same problem faced by corporations or individuals in the United States whose earnings have decreased in the recession. In the case of these debtor countries, however, failure to provide temporary assistance may seriously impair the world economy.

The form of this temporary assistance has been tentatively agreed to by officials of the 10 largest industrial nations. There is general agreement that the obvious bridge to be constructed is that of allowing the International Monetary Fund to engage in its proper role as stabilizer of the international monetary system. When the IMF was chartered in 1944, it was designed to work in cooperation with the World Bank in promoting financial stability and growth throughout the world. It was engineered to work with countries with balance-of-payments difficulties, and subscriber nations pledged resources to make available loans to countries with high deficits. While the World Bank has worked to promote economic strength within developing countries, the IMF has worked to promote payments strength. The IMF has two distinct advantages in the world economy that make it a very obvious place to begin in this crisis. First, it is a multilateral institution. This problem is one for the world economy to solve, not just the economy of the United States. The IMF provides a forum for full participation by western countries.

Second, and most importantly, the IMF, through conditionality agreements, can demand that loan recipients institute corrective actions to shore up national economies in the long term. Mr. Speaker, the IMF is perhaps the only existing institution that can accommodate the adjustment

process as countries move into an era of slower growth. Conditionality can insure that credit is allocated properly, and it can promote strengthening of the world economy. In Mexico, for example, the conditions of an IMF loan require that in 1 year the Mexican Government reduce a deficit that currently equals 16 percent of gross domestic product to a deficit of 8 percent. Such an effort requires a complete reversal of Mexican fiscal policies, and it will ultimately help to salvage the Mexican economy.

The IMF has met the needs of Mexico and of Brazil, and is struggling to aid developing countries around the world. Unfortunately, current IMF resources are not equal to meeting the credit needs of the LDC's. It has committed most of its $65.9 billion fund, and it is expected to face a shortfall by the end of next year. The fund needs an infusion of capital, and it needs it immediately.

The U.S. Congress has an obligation to the world economy and to our domestic economy to support the IMF. Next year we will be called on to submit further resources to the Fund. It is imperative that we do so. I realize that in this period of concern about budget difficulties there may be opposition to an IMF quota increase. I want to underscore the fact, however, that any borrowing against our quota by the IMF is replaced in our budget accounts by a credit at the IMF and will be repaid. We will not be supplying "foreign aid"—we will be making a very sound investment in the economies of LDC's. It is a sound investment that will be repaid many times over in the growth of world trade.

Mr. Speaker, an agreement with the IMF should result in available resources by the end of next year. In order to complement this capital infusion, and in order to provide emergency funds in the short term, it has been proposed that the United States commit its support to an expansion of a temporary fund within the IMF. There currently exists a fund within the IMF which can be activated only to "forestall and cope with an impairment of the international monetary system." That fund is described under the General Arrangements to Borrow (GAB), which was established by 10 industrial countries in 1962. The IMF is empowered to borrow from the GAB for lending only to GAB countries, and such action can only be taken in consultation with lenders. Interest is paid on GAB borrowing, and a participant may request that a loan be repaid if its own balance-of-payments condition deteriorates.

Expansion of the GAB would be a logical immediate step to address emergency situations in the LDCs. It is a matter to be discussed by the industrial countries early in the new year, and it is a matter worthy of full exploration by the Congress.

We in Congress need to explore other opportunities for multinational cooperation. The Bank for International Settlement (BIS) has been very helpful in arranging private credits for Mexico. The BIS, which was created in 1930 to facilitate the payment of war debts among the allied countries, has evolved into a useful medium for promoting the cooperation of central banks and acting as a trustee for international settlements. We are not currently members of the BIS, although the Federal Reserve acts as an observer, and the BIS does have relationships with several private U.S. banks. The work of the BIS, and our participation, should be of continuing interest in Congress.

THE ROLE OF THE ADMINISTRATION

The current administration must assume a position of leadership as we address this complex problem. The President must educate the President and the public and the Congress on the importance of shoring up the world economy; the Congress must respond appropriately. This effort will require the greatest possible bipartisanship.

Mr. Speaker, our colleagues should take the opportunity of our holiday recess to think heavily about the ramifications of congressional action on this matter. I ask that the full text of Secretary Regan's testimony be published in the CONGRESSIONAL RECORD because it is of the utmost importance that we carefully study the full extent of the international crisis. We need to act in a bipartisan manner, and we need to do it early in the new Congress.

Jacques de Larosiere, Managing Director of the IMF, has said that "A lasting recovery of the world economy requires sound domestic policies, but growth can only be achieved in the context of an international monetary system that functions in a stable and smooth way." We have an obligation to promote monetary stability and, quite frankly, we have no other choice.

Secretary Regan's testimony follows:

STATEMENT OF HON. DONALD T. REGAN, SECRETARY OF THE TREASURY

INTERNATIONAL DEBT SITUATION AND INCREASE IN IMF RESOURCES

Mr. Chairman and members of the Committee:

I am pleased to meet with you today to discuss the international debt situation and current negotiations on an increase in the resources of the International Monetary Fund. The world faces extremely difficult economic and financial problems, essentially without precedent in the postwar period. Mismanagement of these problems would have serious adverse effects on the United States economy—on our recovery and on our ability to create needed new jobs. Orderly resolution will minimize the potential risks for our citizens. I would like to review the situation, the broad strategy for dealing with current problems and, given the critical role for the IMF in this approach, the status of international discussions on increasing IMF resources. Answers to the specific questions in your letter of invitation are appended to my statement.

INTERNATIONAL FINANCIAL DEVELOPMENT

The present troubled state of the world economy has its roots in emerging inflation pressures in the late 1960's, the twin oil shocks of the 1970's and policy responses that attempted to avoid adjustment to new economic realities.

The appropriate economic response to emerging problems and the oil price increases was monetary and fiscal restraint to counter inflationary pressure, and for real adjustment and resource reallocation to reflect new competitive conditions and the reduced real consumption possibilities implied by the large transfer of income and wealth to OPEC. Instead, many governments tried to maintain real incomes at levels prevailing prior to the price increases and preserve employment in uncompetitive industries by transfers. Reluctance to pay for these transfers and subsidies by increased taxation led to debt-financed increases in government outlays, with monetization of the resulting deficits producing faster monetary growth in turn. The results were higher inflation, slower real growth, and rising government sector deficits relative to GNP (primarily from enlarged transfer payments). In addition—and of central importance in today's debt situation—oil importing countries experienced unprecedented current account deficits and external borrowing requirements.

Most of the needed current account financing was provided through private markets, largely by commercial banks. Commercial banks served as the risk-taking intermediaries between OPEC and borrowing countries. The growth of lending was considerably larger, and the financing smoother, than many observers had thought possible; but the corollary has been the rapid growth of international debt.

In addition, the liquidity provided by the growth of international lending tended to postpone adjustment of domestic economies and helped maintain consumption at inflated levels. Continued borrowing and postponement of adjustment was encouraged by the belief on the part of debtors that inflation would erode their debt burden.

The increase in international lending—both private and official—was heavily concentrated on the non-OPEC developing countries. By the end of 1981, total non-OPEC LDC debt was about $500 billion—5 times the level of their debt in 1973. Net new borrowing by these countries from banks in the major industrialized countries reached a cyclical low of $11 billion in 1977, rose to $22 billion in 1978 (of which $13 billion went to Latin America) and $42 billion in 1981 (of which $33 billion went to Latin America). By June 1982, the stock of debt owed to the private Western banks by non-OPEC developing countries totaled around $265 billion, of which $168 billion was owed by countries in Latin America.

In recent months, financial markets have begun to recognize that the inflationary environment of the 1970's is changing fundamentally. Markets are beginning to believe that the world economy is in a disinflationary period that will continue for some time. Inflation expectations are undergoing dramatic change. Lenders are re-evaluating loan portfolios that were established under

quite different expectations about future inflation. Levels of debt previously expected to decline in real terms—and therefore to remain manageable relative to growing nominal export receipts under conditions of high inflation—are now seen to be high in real terms and large in the face of weak export prices and slow world economic growth. Interest rates—though down recently in nominal terms—are seen to be high and more burdensome in real terms because of lower expected inflation. On the other hand, the strong possibility that real interest rates will eventually be reduced is a positive factor in the outlook.

The re-evaluation that is going on is an inevitable result of the collision between ongoing inflationary behavior and monetary policy that no longer provides sufficient money to finance continued high inflation. In general, national monetary authorities are demonstrating that anti-inflationary policies will not be reversed at the first signs of slow growth or higher unemployment. The world economy is in the midst of an unavoidable adjustment period which will continue until inflationary expectations abate and the public's behavior ceases to be based on the presumption that inflation will persist into the future as it has in the past.

In this atmosphere of shifting expectations, the overall tone in bank lending is cautious. The problems with major sovereign and corporate borrowers did not develop overnight. Many of them were foreseen in 1981, but did not reach the stage of individual liquidity or solvency crises until this year. Previously strong and well-known private companies in North America and Europe now require debt restructuring and rationalization. Major sovereign borrowers, beginning with Argentina, then Mexico and Brazil have faced liquidity problems and foreign exchange shortages: and a host of other countries—including Yugoslavia, Poland, Zaire, the Sudan—also have problems servicing debt. Internationally, rescheduling has become a growth industry.

Accordingly, banks are taking a harder look at lending, country exposure and transfer risk, and the strength of the other banks they deal with. They are increasing their loan loss provisions, and expect to be involved in debt restructurings with many of their sovereign borrowers.

The major international banks tend to view the basic LDC debt problem as one of liquidity rather than solvency. They see the key causes to be faulty domestic policies and the weak performance of the world economy. Most would assume there is a negligible risk of permanent default by major sovereign borrowers, and that corrective domestic policies, coupled with world economic recovery, will restore credit-worthiness of the LDC's over the longer term. The major uncertainities are in the delays in reestablishment of confidence and credit-worthiness, and questions about the adequacy and continued availability of new credits from the banking community to provide support as adjustments take place.

With the decline in inflation and interest rates, and the establishment of economic adjustment programs in key borrowing countries, the rate of increase in demand for new bank lending is not expected to be as high as in previous years. But some net new lending will be required. The essence of the problem is to assure that conditions are established that will reconcile the necessary prudence in lending with the need for continued financing while these adjustments take effect.

UNITED STATES INTERESTS

The world economy has become highly—and often uncomfortably—interdependent since World War II, with a strong growth in international trade and an extraordinary increase in international financing. International trade was the single most dynamic part of the world economy in the decade of the 1970s. Our own stake in the health of the world economy has grown rapidly as well. U.S. exports in the latter part of the decade grew twice as fast as the growth of world trade. Merchandise exports as a share of U.S. gross national product doubled between 1970 and 1979 and now account for 8 percent of U.S. GNP. By the end of the decade, exports accounted for one in three acres of U.S. agricultural production—or roughly 40 percent of our total agricultural production. One out of every eight jobs in the manufacturing sector produced for export; and nearly 20 percent of our total production of goods was exported. Imports have also risen rapidly, to the point that something like 20 percent of our consumption is supplied by imports, and imports form an integral part of the U.S. production process.

In the financial area, U.S.-owned banks account for about one-third of total international bank lending to final borrowers. International bank claims outstanding, after eliminating double counting from interbank transactions, total about $1 trillion, while U.S. banks' claims on foreign borrowers were around $349 billion as of mid 1982. Most U.S. bank lending involves customers in the developed country area, but about one-fourth goes to Latin America. These figures are indicative of the share of risk borne by U.S. banks, and are roughly proportional to the U.S. share of GNP in the OECD area.

The links between trade and banking are obvious. Moreover, U.S. banks' ability to finance domestic activity clearly benefits from a sound, profitable international lending business.

Mr. Chairman, as this discussion has indicated, the United States economy is strongly tied to developments abroad. We have very solid self-interests in assuring that the debt and financial situation is smoothly handled. In order to identify specific U.S. interests, I would like to discuss briefly a hypothetical case where the United States and major foreign governments follow a "hands-off" approach to debt problems, effectively allowing them to follow their course without official support.

From what we've seen in the last few months, private lenders have become extremely hesitant to extend new loans to LDCs saddled with sizable debts. Private lenders are holding back until borrowers—encouraged by the IMF—undertake new domestic policies aimed at reducing borrowing needs. For the sake of discussion, a "hands-off" attitude by the U.S. and other would most likely result in a cessation of new private lending to LDCs in general. What would that mean for the borrowers, for the world economy, for the United States, and for our citizens.

LDC borrowers received about $45 billion in new bank loans in 1981. We expect this year they will borrow something like $20-25 billion. Next year, if lenders pulled back sharply in the absence of any interest or action on the part of the major industrial countries, this lending could decline towards zero. Assuming that there is some new private lending next year, say $5-10 billion, LDCs would face a decline of $35-40 billion in loans over the 1981-83 period. Trade and current account deficits would have to be reduced accordingly to match the new lower level of external financing.

What would such a reduction in lending to LDCs imply for the world as a whole? First, the adjustment would come largely against industrial countries. As a consequence of unavoidable cuts in LDC imports, industrial country exports would be directly reduced by $35-40 billion. This would represent a direct loss of 0.3 to 0.5 percent of GNP in the industrial countries; secondary effects could double that loss to some 0.6 to 1.0 percent of their GNP. At the early stage of global recovery we're likely to be in next year, a drop of this magnitude from lost exports could abort the gradual rebuilding of consumer and investor confidence needed for a sustained recovery.

For the United States, the effects would be broadly similar. Growth would be about 1 percent less than we're expecting, and our trade deficit would grow very rapidly due to the loss of $12 billion or so in exports to LDCs. Lost jobs in vital export sectors would compound our recovery efforts.

The American citizen has the right to ask why he and his government need to be concerned with debt problems abroad. With high unemployment at home, why should we be assisting other countries, rather than, say, reducing taxes or increasing spending domestically? Why should he care what happens to the international financial system?

One way to look at this question is to ask what the implications are for workers in Providence, Pascoag or Woonsocket if foreign borrowers do not receive sufficient assistance to adjust in an orderly way. What if they are late in making interest payments to banks, or can't pay principal, and loans become non-performing or are written off as a loss?

If interest payments are more than 90 days late, the banks stop accruing them on their books, they suffer reduced profits and bear the costs of continued funding of the loan. Provisions may have to be made for loss, and as loans are actually written off, the capital of the bank is reduced.

This in turn reduces the banks capital/asset ratio, which forces banks to curtail lending to individual borrowers and lowers the overall total they can lend. The reduction in the amounts banks can lend will impact on the economy. So will the banks' reduced ability to make investments, which in everyday language includes the purchase of municipal bonds which help to finance the operations of the communities where individual Americans work and live. Reduced ability to lend could also raise interest rates.

I want to make very clear, Mr. Chairman, that we are not talking here just about the big money center banks and the multinational corporations. Well over 1,500 U.S. banks, or more than 10 percent of the total number of U.S. banks, have loaned money to Latin America alone. They range in size from over $100 billion in assets to about $100 million. Those banks are located in virtually every state, in virtually every Congressional district, and in virtually every community of any size in the country. Those loans, among other things, financed exports, exports that resulted in jobs, housing and investment being maintained or created throughout the United States.

If the foreign borrowers are not able to service those loans, not only will U.S. banks not be able to continue lending abroad, they will have to severely curtail their lending in the United States. Let me illustrate this

point as graphically as I can. A sound, well-run U.S. bank of $10 billion in assets—not all that large today—might have capital of $600 million. It is required by the regulators to maintain the ratio of at least $6 in capital to every $100 in assets. What happens if 10 percent, or $60 million, of its capital is eroded through foreign loan losses? It must contract its lending by $1 billion. Now realistically, the regulators will not force it to contract immediately, but they will force it to restrict its growth until its capital can be rebuilt.

The net result in either event is $1 billion in loans that can't be made in that community—20,000 home mortgages at $50,000 each that can't be financed, or 10,000 lines of credit to local businesses at $100,000 each that can't be extended.

And of course, this reduction in lending also will have negative effects on financing of exports, imports, domestic investment and production in individual cities and states around the United States, be it in shipping, tourist facilities, farming, or manufacturing. The impact will not only be on the banks—it will negatively affect the individual as well as the economic system as a whole. Higher unemployment and a reduction in economic activity, with all they entail for city, state and Federal budgets would be a further result. None of this is in the interest of the U.S. citizen.

The answer to the question why the United States should participate in efforts to manage and resolve current international financial problems is that our efforts are primarily in defense of the average American and his own economic interests. The purpose is to protect his job and his income. If the U.S. is to prosper, if unemployment is to be reduced and new jobs created, if the strength of the companies we work for and in which our pension funds and insurance companies invest is to be maintained, it is vitally important that our large and growing customers overseas should remain healthy and, when in economic difficulty, be helped to adjust and recover.

U.S. STRATEGY AND THE ROLE OF THE IMF

U.S. strategy to deal with current strains on the international financial system contains five key elements. If these operate as they should, there is no need for a potential crisis to be unmanageable. Indeed, there is good probability for a steady and sustained, albeit gradual, improvement, both in the basic, underlying situation as well as in the reestablishment of confidence.

These key elements are not new, nor are they hastily constructed palliatives. Rather, they go to the foundations of the international monetary and financial system.

First, the crux of any lasting effort to remedy the debt problems of less-developed countries must be orderly, but effective, domestic adjustment efforts by each country concerned. The necessary adjustments will vary from country to country since the causes of a country's external payments difficulties usually differ between countries. But experience shows that some combination of the following is likely to be found in a country experiencing debt problems: uncontrolled government expenditures, large fiscal deficits, inflationary money growth, inefficient state enterprises, subsidized or protected private enterprises, distorted prices, rigid exchange rates, and interest rate restrictions which discourage private savings and contribute to a misallocation of investment expenditures.

Not surprisingly, the economic adjustments necessary to restore a country's foreign borrowing capacity are also necessary to restore the conditions for stable and strong domestic economic growth. However, I do not want to underestimate the short-run economic and political difficulties of making the necessary adjustments.

The second key element is readiness to provide official financing on a transitional basis where that is needed to permit orderly adjustment to take place. The international institution best able to provide official support within the context of domestic economic adjustment is the IMF. In this connection, the IMF plays a number of key roles. The staff of the IMF works closely with member governments in order to help identify the causes of their economic problems and to identify the appropriate economic policy adjustments. The IMF also stands ready to provide temporary financial support to those countries willing and able to undertake the necessary economic policy measures to get out of their external financial problems. The IMF cannot force a member country to adopt an economic program. However, when committing its resources, the IMF has a special responsibility to assure itself that the economic adjustment program a country is following will restore domestic and external health, and that the economic adjustment program will lead to fewer restrictions on international trade and financial transactions.

Other forms of official financing can also provide increased direct assistance that can make a significant remedial contribution to troubled LDC debtors, as well as serving the commercial and financial interests of the lending country.

However, neither IMF nor other officials credit, in themselves, will be sufficient to provide the required finance and liquidity to support the adjustment necessary to redress the economy of a major industrializing debtor country. Additional liquidity and trade finance must be forthcoming.

Thus, a third key element is commercial bank financing. The role of the commercial banks overshadows that of all other lenders combined. At the end of 1981, total non-OPEC LDC debt totaled about $500 billion, of which $255 billion (51 percent) was to private banks. During the first half of 1982, the proportion of debt to the commercial banking system increased further.

In the second half of 1982, U.S. regional and some foreign banks have sought to limit or reduce exposure. To the extent they are successful, they place a greater and disproportionate strain on the resources of the larger banks and official lenders that are committed to the international financial system, and on the borrowing countries, already faced with a severe adjustment burden. This increases the risk of precipitate, restrictive, and potentially politically destabilizing adjustment, rather than a more gradual, albeit still painful, process that we consider essential.

A cessation of commercial bank lending is not in the interest of the lending banks themselves. In some cases, it could push weak, but otherwise still viable, borrowers into a rescheduling. All those commercial banking institutions—large and small—that have played a part in the international lending that enabled LDC borrowers to run up debt, some of it non-productive and non-foreign exchange earning, must be aware of the dangers should they attempt to reduce exposure during the adjustment process that is underway.

Thus continued—though reduced—flows of new financing by the banks are a necessary component of the overall financing package required to support ordered economic adjustment.

A fourth element is the official will and capacity to act in potential emergencies. As demonstrated in some recent cases, in limited instances when the stability of the system is at stake, there may be a need for immediate and sufficient *ad hoc* liquidity support which can be made available to countries while they negotiate with the IMF, formulate adjustment programs, work out orderly financing programs with their creditors, and begin the process of program implementation.

Central banks, working cooperatively among themselves and with the Bank for International Settlements, at times supplemented by U.S. Treasury resources, can provide short-term financial assistance, under appropriate conditions and with adequate assurance of repayment, until the borrower can work out an IMF adjustment program.

Let me mention the role of the Treasury's Exchange Stabilization Fund in the contest of the current international economic situation. The ESF was established in 1934, to enable the Treasury to act when necessary to stabilize international exchange markets. The ESF has been used many times over the years, both to finance U.S. operations in the exchange markets and to provide short-term financing to other countries. Its provisions have been modified by the Congress from time to time to reflect the evolution of the international monetary system, including recognition of the shift to floating exchange rates and the central role of the IMF in providing official balance of payments financing.

In the present context, a need for short-term liquidity support has arisen where commercial banks have become concerned about their exposure in key borrowing countries and have acted to precipitously curtail lending. The immediate consequence is to make the borrowers' financing problems worse. For the longer-term, the economic adjustments undertaken in connection with the IMF program will strengthen the countries' ability to service debt, and such adjustment programs are a major factor in restoring banks' confidence and willingness to continue lending. But there is inevitably a lag between the time major liquidity problems arise, domestic programs are formulated, agreement is reached with the IMF, and implementation begins. It is during this period that uncertainty and risk of disruptive actions are perhaps greatest.

The ESF—in conjunction with the Federal Reserve and the monetary authorities of other major countries—is available to play a supporting role during this critical period, to help maintain stability while medium-term adjustment and financing programs are developed and put in place. These credit operations by the ESF are short-term in nature, well-secured, interest-earning and supportive of the IMF's central role, and are an entirely appropriate U.S. contribution to maintenance of international financial stability.

By their nature, these are short-term *ad hoc* solutions, but the major Central Banks and Finance Ministries must be capable of providing the necessary "bridge" finance needed in these situations. I think there is room for review of whether our data and mechanisms for identifying emerging problem cases are adequate and whether our arrangements for providing emergency financing work as smoothly as they should or could. I have raised these questions during a

recent meeting of the Finance Ministers and Central Bank Governors of major countries, and we will be doing more work in this area.

The fifth key element is a set of economic policies in the major industrialized countries that will produce economic growth and a counter to the risks of inward-looking protectionism. What is currently missing in the world economy is business and consumer confidence. Investment spending is being postponed as capacity utilization remains low, and gloom and doom predictions about the global economy become commonplace. This lack of confidence spreads to consumers who, fearing the possibility of unemployment, postpone consumption in favor of rebuilding savings. At the curent juncture, many economic players have adopted a "wait and see" approach—a decision which collectively can lead to an immobilized world economy.

The world economy is fundamentally poised for a sustained recovery: inflation rates in most major countries have receded; nominal interest rates have fallen sharply; inventory rundowns are largely complete. But most international observers do not foresee the source of growth that will reignite investment and consumption decisions.

Solid, observable U.S. recovery is one critical ingredient missing for world economic expansion. A second ingredient to establishing credible growth in the industrial economies is in the hands of European and Japanese policy officials. What the United States, Europe, and Japan can do to help promote credible growth in their domestic economies will be of major importance to each other and to the developing countries, whose current adjustment problems can be eased by an expansion of exports to the industrialized economies.

There are dangers in the current situation that must be borne in mind. Governments may succumb too quickly to political pressures to stimulate their economies further via excessive monetary or fiscal expansion. A major shift at this stage could place upward pressure on interest rates, discourage the downward movement in real interest rates critical to investment-led growth, and suggest a return to the stop-go policies of the seventies. If such an expansion were attempted via increased government spending, it would reverse important gains in reducing the involvement of governments in domestic economies.

In addition, rising protectionist pressures in the United States and elsewhere pose a real threat to global recovery. Signs already exist that other governments are turning to protectionist trade measures in an attempt to preserve jobs in noncompetitive industries and to reduce imports and/or increase exports; there is a real danger of spreading protectionist measures over the next year. Far too quickly, governments could react to trade measures by imposing their own restrictions, in a futile attempt to offset the efforts of other countries' trade policies.

The only solution is a strong endorsement of anti-protectionist policies. As the world's largest trader, the United States carries a major responsibility to lead the world away from a possible trade war. The clearest and strongest signal for other countries would be for the United States to renounce protectionist pressures at home and to preserve its essentially free trade policies.

THE IMF'S ROLE AND RESOURCES

The IMF was founded to promote a sound financial framework for the world economy and is at the center of international efforts to deal with current economic and financial problems. The resources of the IMF are available to provide temporary balance of payments financing in support of the efforts of members to implement the sound economic adjustment programs needed to restore their external positions to a sustainable basis. The economic policy conditions associated with use of IMF resources are designed to ensure that the adjustments are internationally responsible and effective and to assure repayment to the IMF over the medium term.

The IMF is a unique institution, and differs fundamentally from the multilateral development banks or other foreign aid agencies. There is no set class or group of lenders or borrowers in the IMF, no concept of "donor" or "recipient." Each member is obligated to provide its currency to the IMF to finance drawings by other countries facing balance of payments needs; and each country in turn has a right to draw upon the IMF in case of balance of payments need. The U.S. subscription to IMF resources has been used many times over the years. In turn the United States has drawn upon IMF resources frequently, most recently in 1978, for a total equivalent to about $6.5 billion, the second largest use of the entire membership.

The re-emergence of large balance of payments financing needs and growing debt problems has led to a sharp resurgence in requests for IMF financing. Since 1980, the use of IMF credit has doubled and the amount of outstanding drawings on the IMF now totals about $18 billion. Some 33 countries, nearly a quarter of the membership, now have IMF programs in place.

Any assessment of the adequacy of IMF resources over the medium term is bound to be imprecise. The demand for IMF financing depends importantly on members' balance of payments financing needs, the availability of alternative sources of funds, and the willingness and ability of members to implement IMF policy conditions. Moreover, the amount of resources effectively available to the IMF to finance drawings at any time—the "liquidity" of the IMF—depends not only on the size of quotas and borrowing arrangements, but also on the composition of the IMF's currency holdings, whether the issuers of those currencies are in a strong enough position to allow their currencies to be used to provide credit to others, and the likelihood that liquid claims on the IMF will be utilized. All of these factors, and thus the ability of the IMF to meet official financing needs, are subject to rapid change.

Subject to this caveat, we estimate that the IMF at present has on the order of $33 billion in resources effectively available for lending, including $19 billion in usable currency and SDR holdings and $14 billion in existing credit lines. A portion of these funds, about $10 billion, is already committed under existing IMF programs. Thus, only about $23 billion at most is available for commitment to new programs, and even this amount is uncertain for the reasons I just mentioned. Some $14 billion is virtually certain to be committed in the new future, including commitments for major programs in Mexico, Argentina, and Brazil. Given the scope of today's financing problems, requests for IMF programs by many more countries must be anticipated over the next year, and it is quite possible that the IMF's ability to commit resources to adjustment programs could be exhausted during the course of 1983.

It is therefore clear that the IMF's liquidity position will be under serious strain in the near future. Although the IMF has sufficient resources to meet immediate cash needs, since actual drawings are placed and tied to performance under agreed programs, there is very little margin of safety. In particular, the Fund's ability to continue to commit financing, and permit its current holdings to be drawn down to low levels, depends importantly on assurances that further resources will be forthcoming soon.

The IMF must have adequate resources if it is to effectively fulfill its responsibilities for maintaining the sound financial system essential for U.S. and global economic recovery. The discussions that are currently underway have been focusing on two main elements of the IMF's resources:

An increase in quotas, the IMF's traditional permanent resource base; and

At U.S. initiative, establishment of a special borrowing arrangement, to be available for use by the IMF in situations posing a serious threat to the international monetary system.

The adequacy of IMF quotas is reviewed periodically in relation to the growth of international transactions, the size of payments imbalances and financing needs, and world economic prospects. The objective of such reviews is to ensure that the IMF has sufficient resources to meet the official financing needs of members in normal circumstances. The last increase in IMF quotas became effective in 1980, following several years of negotiations and legislative consideration, and raised quotas by about 50 percent to the equivalent of about $67 billion. During the present review, which began in 1981, the U.S. has been seeking an increase that should be sufficient to meet demands for IMF resources under normal circumstances over the next few years. Some countries have advocated very major increases—a doubling or in some cases even a tripling—which we consider excessive and unrealistic.

In addition to meeting normal requirements for official balance of payments financing, the IMF also serves as the financial backstop for the system. It must have, and be seen to have, the means to deal with the extraordinary financing demands that do arise from time to time. Consequently, the United States proposed earlier this year that consideration be given to creation of contingency borrowing arrangements to supplement quotas, which could be called upon by the IMF in case of need to deal with very serious balance of payments financing needs that threaten the stability of the system. We believe that such arrangements would have important attractions.

Since credit lines would be established only with countries with relatively strong reserve and balance of payments positions, they could be expected to provide more effectively usable resources than a quota increase of comparable size. Consequently, such credit lines would be a more effective and efficient means of strengthening the IMF's ability to deal with extraordinary financial difficulties than a comparable increase in quotas.

Second, by demonstrating that the IMF is positioned to deal with severe threats, such borrowing arrangements could provide the confidence to the private markets that is needed to ensure that capital continues to flow, thus reducing the risk that problems of one country will affect others.

Finally, creditors under the arrangement would have an important voice in decisions on its activation and thus would be assured that the financing would be used only in cases of systemic need and in support of ef-

fective adjustment efforts by borrowing countries.

Our discussions with other countries in the past several months have indicated very considerable interest in this concept, and specifically in adapting and expanding the IMF's existing General Arrangements to Borrow for this purpose.

WHERE WE STAND TODAY

The Committee is well aware of the major country cases that have hit the headlines in recent months, particularly the Latin American cases of Mexico, Argentina and Brazil and some countries in Eastern Europe. Together, the three Latin American Countries have external debts outstanding totaling some $195 billion, of which about $137 billion represents debts to commercial banks in the industrial countries. The debt of these three countries alone represents some 40 percent of the total estimated for all of the developing country area. Clearly, major financing and debt servicing problems in these countries mean major potential problems for the international financial system as a whole, with adverse consequences for the United States and prospects for recovery. By the same token, progress toward resolution of problems in these three cases can provide both an example and a basis for confidence that the problems confronting the system as a whole can be managed. Let me describe briefly the recent events in each of these three countries.

Mexico was confronted with an extreme liquidity bind over the summer, and requested immediate liquidity support from the U.S. while it initiated discussions with other countries, with its commercial banks on a restructuring of its debts, and with the International Monetary Fund on development of a comprehensive economic adjustment program. The United States responded positively, first through activation of the existing Federal Reserve swap line with Mexico; by arranging for the advance payment, on commercial terms, for increased oil deliveries for the Strategic Petroleum Reserve; and, a few days later, by joining other industrial countries under the aegis of the Bank for International Settlements in arrangements to provide $1.85 billion in short-term credit to Mexico.

Mexico has now completed its negotiations with the IMF and has announced a series of strong adjustment measures at home. The economic adjustment program Mexico has formulated will be presented to the IMF Executive Board for formal approval on December 23. Mexico is also nearing completion of discussions with commercial banks on a program to restructure its public sector debt maturities coming due through the end of 1984, and to provide some $5 billion—tied to continued performance under its IMF program—in net new commercial bank financing in 1983.

Argentina's financing problems began to emerge around the time of the Falklands conflict, which drained the country's foreign exchange holdings and caused serious complications for domestic economic management. With the end to the Falklands conflict and steps toward normalization of its international financial relations. Argentina also initiated discussions with the commerical banks and with the IMF on an adjustment program. As in the Mexican case, both of these discussions are now nearing completion. Argentina and the IMF Management have completed negotiations on an IMF adjustment program; this will be brought to the Executive Board for action shortly. Argentina is also in the final stages of discussions with the commercial banks on a package involving debt restructuring, short-term bridge financing and provision of net new commercial bank financing totaling $1.5 billion in 1983, again dependent on compliance with the terms of the IMF program.

Finally, Brazil's difficulties in obtaining needed financing in the markets have received considerable press attention in recent days. As Brazil's liquidity problems began to emerge, the United States has extended short-term liquidity support to help provide breathing space while Brazil formulated an economic adjustment program and initiated negotiations with the IMF. It has just been announced that Brazil and the IMF have reached agreement on a program, and we expect that this will be brought to the Executive Board early next year. Brazil has also initiated discussions with the commercial banks on its financing requirements and plans for next year.

In sum, very substantial progress has been made in each of these cases in developing a cooperative and constructive approach to acute financing problems of significance to the international financial system as a whole. The countries concerned have acted responsibly and courageously to develop, with the help of the IMF, difficult but necessary economic adjustment programs. Collectively, these programs are intended to reduce these countries' current account deficits and net financing requirements from an estimated $22 billion in 1982 to $12 billion in 1983, with further reductions planned for 1984. The United States and other monetary authorities have provided short-term liquidity assistance where necessary to permit longer range financing and adjustment programs to be worked out. The IMF has been the central actor in each case, in developing the specifics of the adjustment programs of the country concerned, and will be charged both with monitoring the implementation of those programs and providing transitional financial support as the programs take hold. And, of crucial importance, the commercial banks are demonstrating their preparedness to provide continued new financing as these countries work to reduce their deficits and external financing requirements in a deliberate, nondisruptive way.

The demands that are being placed on the IMF's financial resources by these and other countries are unprecedented. It is critically important that we move promptly toward agreement on an expansion of the IMF's resources, so that it can make commitments during the course of the next year in the firm knowledge that its resources will be increased in the reasonably near future.

The negotiations—negotiations, I might add, involving some 146 member countries—are proceeding reasonably well. Although there are still differences of view, substantial in some cases, the parameters of the negotiation have become fairly clear: the bulk of IMF member countries now appear to support a quota increase in the range of 40 to 60 percent, to a new level of SDR 85 to SDR 100 billion, and an expansion of the General Arrangements to Borrow to a total in the range of SDR 15 to 20 billion. In dollar terms, these ranges amount to about $93-100 billion for total new quotas and about $17-$22 bilion for the expanded GAB. The exact size of these arrangements, and the shares of U.S. participation in each, remain to be negotiated. Whatever the amounts finally agreed, it is important to emphasize that U.S. participation will not affect net U.S. budget outlays or the Federal deficit.

Detailed discussions on these and related questions are being held in the IMF Executive Board this week. We are hopeful that on the basis of these discussions and consultations with other countries, it will be possible to aim for completion of the negotiations early next year, after which we would promptly submit specific legislative proposals for your consideration.

CONCLUSION

In conclusion, Mr. Chairman, the world is faced with extraordinarily difficult but manageable international financial problems. But they will not manage themselves. It is crucially important to U.S. economic interests—to U.S. economic activity, jobs, production and investment—that those problems be dealt with in a constructive and orderly way, and the United States cannot escape playing a leading rule in that effort. An effective strategy is in place, and welcome progress is being made. The strategy will not succeed unattended. The IMF is a central element of the solution, and it is essential that we and others act to assure that it has adequate resources to perform that central role.

I appreciate this opportunity to consult with your Committee as we conduct the negotiations on IMF resources, and hope that we will be able to have specific legislative proposals for your consideration shortly. This Committee will, of course, have a decisive role in the disposition of this legislation, and I urge your strong support now for our negotiating approach and later for the legislation we will submit to you.●

EFFORT TO ESTABLISH NEW NATIONAL INSTITUTE OF ARTHRITIS AND MUSCULOSKELETAL DISEASES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 10 minutes.

● Mr. PEPPER. Mr. Speaker, in the closing moments of the 97th Congress, I regret to have to report to some 37 million Americans—including a quarter of a million children—that despite our persistent efforts we have not been able to see Congress enact legislation that could bring new hope for the alleviation of their suffering. I refer, of course, to the goal we shared—establishment of a new and distinct National Institute of Arthritis and Musculoskeletal Diseases.

Unfortunately, despite strong bipartisan support in both the House and Senate, and despite the many hours of work invested in the enactment of the legislation we developed, events have put our goal beyond our reach for the moment.

The fact that we came so close, even at this late hour, is a tribute to the support and invaluable assistance of a number of my colleagues including, in the House, the distinguished chairman of the Subcommittee on Health and the Environment, HENRY WAXMAN, RON WYDEN, an important member of that subcommittee and my valued

friend and colleague on the Select Committee on Aging, and, in the Senate, Senators CRANSTON and GOLDWATER, cosponsors of the Senate companion measure to my bill and Senator HATCH, chairman of the Committee on Labor and Human Resources.

As many of my colleagues are aware, I have long supported research on arthritis, which is one of the cruelest and most prominent robbers of the health and well-being of the elderly.

As author of the legislation which created the original Arthritis Institute in 1950, I cherished the hope that by now we would have discovered the causes of arthritis and brought about a cure or, at the very least, learned to treat it effectively. While there has been considerable progress in areas such as joint replacement, we are nowhere near the goals we established over three decades ago.

Last year, I conducted a hearing of my Subcommittee on Health and Long-Term Care to examine the state-of-the-art in arthritis research and the adequacy of Federal support for this endeavor. We heard compelling testimony from victims of arthritis and nationally prominent physician researchers. From this hearing grew my determination that we establish a new and more direct focus on arthritis.

I strongly believe that can only be accomplished by the creation of a separate Institute.

Over the years the purpose of the original Arthritis Institute has been obscured as the Institute has profliferated to become the Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases, bringing 10 different categories of unrelated diseases under 1 umbrella. And in recent years, arthritis has slipped further and further down the totem pole in visibility and support. Only 19 percent of the current Institute's budget is devoted to arthritis and related diseases—and 1 percent of the overall NIH budget is spent for this purpose.

One look at the extent of arthritis as a national health and economic burden should be enough to convince any who are skeptical of the need for a new Institute. Some 37 million Americans suffer from some form of musculoskeletal disease or 1 of the 100 forms of arthritis. That estimate ranks these diseases second in prevalence only to cardiopulmonary diseases.

The economic cost of these diseases—in health expenditures, disability payments, lost wages, lost homemaker services, and lost tax revenues—is an astounding $30 billion, second only to the cost of circulatory diseases.

While especially critical to the elderly, these diseases are by no means restricted to them: Some 250,000 children suffer from juvenile arthritis. That means that arthritis is more common now among children than polio was during even the most severe epidemics of the past.

Our subcommittee hearing examined new laboratory findings and recently developed techniques that have suddenly brought promising new leads, which must be explored, in the areas of genetics, viruses, immunology, and joint replacement. Yet despite these thrilling advances, millions upon millions of Americans are still told to take aspirin. One witness before our committee testified that she had taken 12 aspirins a day for 30 days.

So many arthritis victims lack hope that they spend about $1 billion on quack remedies every year. Yet the Federal response to this overwhelming problem is a research commitment on the order of $43 million annually. About $1.50 per patient is spent for research.

Taken another way, the Nation spends about $32 per patient on quackery, while the Federal Government spends less than $2 for research to find real cures and, hopefully, causes. We spend about 5 percent of the amount spent on quackery to fund legitimate research.

Aware of the problems associated with support for arthritis research, Congress in 1975 renewed its commitment with enactment of the National Arthritis Act, which established a National Commission on Arthritis. The Commission developed a long-range arthritis plan with specific recommendations for the use of our national resources to combat arthritis. Unfortunately, neither the Arthritis Act nor the plan the law mandated has even come close to being implemented.

It is long since time that we return to the purity of purpose a separate institute would represent to the millions of Americans who suffer the intolerable pain of arthritis. A new institute with higher visibility and a sharper focus will attract more established and experienced scientists to the field and entice young researchers who perceive that there is promise and opportunity in this area of research. I am convinced this step is critical to attainment of the goals established by Congress so many years ago.●

A TRIBUTE TO JOHN L. BURTON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PHILLIP BURTON) is recognized for 60 minutes.

● Mr. PHILLIP BURTON. Mr. Speaker, this will be the last day that my brother, JOHN, serves as a Member of the House of Representatives. I am pleased JOHN will be returning to the city he loves, but I also have a special sense of loss at JOHN's departure.

JOHN is leaving public service after 18 years in elective office. I know Californians will be hearing from him and will find, while he is leaving Congress, he will not be leaving those issues which he has championed so well.

JOHN was a leader in the long fight to wrest this Nation from its disastrous involvement in Vietnam. As Congress labored long into the night in the closing days and weeks of that war, JOHN was often on the House floor urging his tired colleagues on to act to end that national tragedy.

As chair of the Government Activities and Transportation Subcommittee, JOHN was the "barnyard dog" type of watchdog that President Reagan is so fond of calling his inspector generals. His subcommittee has been a vigilant overseer of the FAA and other agencies, always concerned with the safety of airline passengers and the well-being of those who fly and service aircraft.

Now that the Burton brothers act has split up here in Washington—we still have another brother in elective office in San Francisco—I suppose I will have to redouble my efforts to champion those causes that JOHN and I have worked for in Congress. I, of course, wish him well and look forward to seeing him back in San Francisco.

Mr. Speaker, I would like to bring to the attention of my colleagues a letter from Charles Manatt, chairman of the Democratic National Committee. Chuck has been a good friend of the Burton brothers and I am pleased he asked to have this letter placed in the RECORD.

The letter follows:

DEAR PHIL: I deeply appreciate the opportunity to join with your many colleagues in honoring John Burton upon the completion of his outstanding term of service in the U.S. House of Representatives.

John will be sorely missed in the Congress. He will be missed because of his contributions to the legislative process; he will be missed because of the outstanding representation he gave his nation, his state, and his city; and John will be missed for his style, his unique openness and candor that bothered some and delighted most.

But never let it be said that John Burton didn't give his all to his job. He will be a tough act to follow—in any job.

I am sure that there will be days when John does miss Washington and the Congress. I can only remind him of the words of Norman Cousins: "Life somehow finds a way of transcending politics."

CHARLES T. MANATT.●

● Mr. STOKES. Mr. Speaker, I would like to thank the gentleman from California (Mr. PHILLIP BURTON) for taking this special order so that Members can salute Congressman JOHN BURTON. Mr. Speaker, this special order serves two purposes.

First, this special order affords us an opportunity to send 50th birthday greetings to my good friend, JOHN BURTON. I and many of my colleagues had the pleasure of attending a birthday celebration for him last week. To one of the greatest Members of this

body, I extend my hearty best wishes on this special occasion.

The second purpose of this special order, Mr. Speaker, is to honor JOHN on his numerous achievements during his 8 years of service in the House of Representatives. As we all know, JOHN will be retiring at the end of the 97th Congress. It is only appropriate that we pause to salute one of this body's most dedicated and hard-working Members.

Mr. Speaker, JOHN has served the people of California's Fifth Congressional District well during his tenure in the House of Representatives. He has been a tireless legislator and a friend of the poor and the workers of this Nation. From this perspective, JOHN has made an indelible mark on the work of the House of Representatives.

Mr. Speaker, JOHN's positive contributions to the work of the House of Representatives probably shows most clearly through his service on the House Government Operations Committee. As the chairman of the Government Activities and Transportation Subcommittee, JOHN has diligently and thoroughly conducted investigations on the safety standards at the Federal Aviation Administration and the purchasing practices of the General Accounting Office.

JOHN has also been an active and vocal member of the House Administration Committee. During my tenure as the chairman of the House Select Committee on Assassinations, I was in contact with the members of the House Administration Committee on several occasions. JOHN shared my view that the committee must be afforded enough resources to effectively conduct an investigation into the assassinations of President Kennedy and Dr. Martin Luther King, Jr. From his position on the committee, JOHN proved to be extremely supportive of the work of the House Select Committee on Assassinations. I take this opportunity to thank JOHN for that support.

Mr. Speaker, in closing I would just like to say that because of JOHN BURTON, this House has taken a giant step closer to meeting the needs of the American citizens. It has been an honor for me to serve in the Congress with a man of high integrity and compassion of JOHN BURTON. I shall miss him as he retires from the Congress.●

● Mr. PANETTA. Mr. Speaker, I want to join my colleagues in paying a very special tribute to a very special Member of this body, JOHN BURTON. Over the past 6 years, it has been a distinct pleasure and a memorable experience having the opportunity to work with JOHN. His unique sense of humor and his blunt honesty have livened this House as well as activities within the California delegation.

I think JOHN leaves behind him not only the friendship of his colleagues but also a fine record of legislative accomplishment. In his chairmanship of the Transportation Subcommittee of the Government Operations Committee, he has been instrumental in highlighting the need for safety and integrity in our Nation's transportation programs. In addition, he has made a special contribution to efforts to protect our Nation's environment from those who would ignore the need to look to the future and the quality of the lives of our descendants in this country.

Mr. Speaker, I know it had to be an extremely difficult decision for JOHN to retire at the end of this Congress. He had a promising future in this body. But I fully understand his need to look to his personal life and to get out of the public eye for the time being. It is difficult and, frankly, it is unfair for Members of Congress to be required to live their lives—both inside and outside the Congress—in the public eye. It forces us to lose some of our best colleagues. I know we all join in wishing JOHN the best of luck in the years ahead. It has truly been an honor to know him, and I hope he will be visiting us frequently in the future.●

● Mr. ANDERSON. Mr. Speaker, I would like to join with my colleagues in saying a few words on behalf of our friend from San Francisco, JOHN BURTON.

JOHN, who is today celebrating his 50th birthday, will be missed by many of us when the 98th Congress officially convenes next month. More importantly, however, his constituents in the "Golden Gate District" will truly miss his able services. As a Member of Congress for 8 years, JOHN has made numerous contributions to the city of San Francisco, the State of California, and the entire country.

As some of you are aware, I have known JOHN for quite a long time. As a matter of fact, when he was first elected to the California State Legislature, I was serving as Lieutenant Governor. Besides being a former member of the State assembly myself, JOHN and I have both had the distinct privilege to chair the California Democratic Party.

Because of his committee assignments on Government Operations, where he chairs the Subcommittee on Transportation and Government Activities, House Administration, and the Select Committee on Aging, where he chairs the Subcommittee on Retirement Income and Employment, JOHN has been in the unique position to accomplish much in the way of economic and social justice for all Americans. He has prided himself, deservedly so, on his strong views for the need to provide equality to all people—particularly those less fortunate than us. I urge him to continue to advocate this important cause.

Because of JOHN's assignment as chairman of the Subcommittee on Transportation and Government Activities, and because of my past and present assignments as chairman of the Aviation and Surface Transportation Subcommittees, I have seen him, firsthand, aggressively tackle the many problems which confront us in the field of transportation. He has proven himself to be a hard worker and certainly not one to shy away from potentially controversial subjects. I am sure even his critics will admit that he has been most colorful, and his flamboyant style, both in committee and on the House floor, will be noticeably absent next year.

JOHN has been in the political arena for over 15 years now and is deserving of a welcomed rest. I hope that he will continue to play an active role in the betterment and development of our country.

Again, I wish JOHN all the best on this his golden birthday. My wife, Lee, joins me in saying farewell to JOHN and wish him and his daughter, Kimiko, the best of everything in all their future endeavors.●

● Mr. DELLUMS. Mr. Speaker, I join with my colleagues today in honoring my friend, JOHN BURTON, of the Fifth Congressional District of California. This occasion certainly evokes mixed emotions.

I enthusiastically wish JOHN a happy birthday. And certainly I wish JOHN the very best as he returns to the bay area. But I will not only miss him greatly as a friend but also as a valued and trusted colleague.

Congressman JOHN BURTON has been a powerful voice for the less powerful during his entire public career. Unfaltering, he has struggled for a just society—committed to political and social equity, economic democracy, and equal justice under law.

JOHN has brought to our debate and to our thinking a high level of intelligence, integrity, and, of course, a great deal of wit. These qualities are to be admired in the public person.

As the challenges increase, it seems that we still have too few who are willing to commit themselves to an effort which would shape the realities of America to the design of highly valued ideals. We need, and will therefore greatly miss, JOHN BURTON.●

● Mr. STARK. Mr. Speaker, I join the California delegation and the rest of the House in wishing our colleague, JOHN BURTON, the best in the years to come, and to congratulate him on an outstanding career of service to the people of his State and Nation.

But this is also a sad occasion for me. JOHN is one of my closest friends in the Congress. He is a neighbor, a companion, and an adviser.

One reason he is such a good friend is that he has a great sense of humor. His wit and humor and outlook on the world have made him one of the few Members able to put into perspective some of the more absurd aspects of the many silly things Congress gets itself into. His humor and his ability to deflate the unnecessarily pompous situation will be missed. The House will be a much less interesting place without him.

JOHN's record of service is one of compassion for the poor and the oppressed of the Nation and the world. Most bios in the "Congressional Directory" are just a string of phrases on schools attended, awards received, elections won. But JOHN's is different in that it includes in the middle of his many commendable achievements the phrase: "dedicated to achieving social and economic justice for all peoples." For JOHN, this is not a phrase—it is something he has lived his entire life. His service in the State legislature, in the State Democratic Party, and here in Congress has been a living testament to the dedication expressed in his bio.

The wealthy and those who are members of powerful organizations can and do take care of themselves. It is the poor and the unorganized who are all too frequently unrepresented and unsupported in the halls of Government. JOHN has been one of the few who has represented those who most need representation. That is his honor and his badge and his contribution.

He will be sorely missed. His leaving places a heavier burden on the rest of us to work for a government of compassion.●

● Mr. MATSUI. Mr. Speaker, one thing is certain about the new Congress that will convene next month: House floor debate will not be as interesting because of the departure of one of our most unique colleagues, JOHN BURTON of California.

JOHN's wit and humor have helped to lift the spirits in this Chamber at times when we have taken ourselves too seriously. That contribution will be greatly missed by all of us.

But there is another more important certainty about his retirement from the House of Representatives. Those Americans who suffer from social and economic injustice are losing a great champion with JOHN BURTON's departure from Congress.

In a State and Federal legislative career that has spanned most of the past two decades, Assemblyman and Congressman JOHN BURTON has stood up and spoken out for those without power or influence. The poor, the aged, the blind, the disabled, the elderly—all have benefited from the efforts of the gentleman we honor here today.

JOHN BURTON, together with his devoted brother PHIL, has never failed to voice the concerns of those millions of needy Americans even when it has been politically unpopular to pursue their causes.

I am going to personally miss the presence of JOHN BURTON, for whom I have great affection. And I am sure my colleagues, even those who have disagreed with JOHN on the issues over the years, will feel a substantial loss when he is no longer here to lighten the mood and to remind us when we fail to focus on the problems of those who most need the help of government.

But for now, I want to join my colleagues in wishing JOHN the best of health and happiness in the coming years and to wish him a very happy 50th birthday.●

● Mr. WEISS. Mr. Speaker, I want to join in saluting the distinguished gentleman from California, Mr. JOHN BURTON, as he prepares to retire from a long and impressive career of public service. Since his election to the California State Assembly in 1965, he has proven himself a leader on an array of issues, particularly those which affect the truly needy in our society.

For close to two decades, JOHN BURTON has consistently spoken for what he and his constituents believe, even when it might be unpopular to do so. His was a prominent voice against the House Un-American Activities Committee in the late 1950's and early 1960's. And to this day he remains no less committed to protection of fundamental civil rights and civil liberties for all Americans regardless of ideology or belief.

For many years he has been an advocate for arms control and nuclear disarmament, and I know that he plans to maintain his commitment to ending the senseless nuclear arms race when he leaves this body. I have had the honor of serving with him on the Subcommittee on Government Activities and Transportation, where he has been a responsive and effective chairman.

His Subcommittee on Retirement Income and Employment of the Select Committee on Aging has made significant contributions to the income security of our Nation's senior citizens.

I regret that the gentleman has chosen to retire from this body. His participation will be sorely missed. At the same time I know that his personal involvement in the issues he has worked so hard for will not end. Congress and the Nation will miss his presence.●

● Mr. DELUGO. Mr. Speaker, I rise with my colleagues to say just a few words about a friend whose intellectual and political courage and creative brilliance have made immeasurable contributions to this House for over 8 years.

Representative JOHN L. BURTON has chosen not be be with us in the 98th Congress. Our deliberations will be poorer for his decision to retire from Congress. The process of legislating will certainly suffer because of it.

JOHN has been dedicated to the continuing effort to achieve social and economic justice for all peoples. His commitment and compassion have added mightily to the effort.

In the fields of human rights, aviation safety, protection of the environment, income security for the elderly, and efficient Federal procurement, JOHN has been a leader. He has effectively advanced these causes and others.

We who have come to know JOHN by working with him appreciate his convictions, his minimal regard for conventions, his positive approach, his civility, and his humor.

The Nation will miss JOHN L. BURTON in Congress but, I am sure, benefit from his future involvements.●

● Mr. WAXMAN. Mr. Speaker, it is with mixed emotions that I address my remarks of good wishes to my esteemed friend and colleague, Representative JOHN L. BURTON. I join with his friends and family in celebrating his 50th birthday and saluting him on this milestone occasion.

I am, however, saddened that JOHN has decided to retire from Congress. Next month the House of Representatives will be poorer for his departure.

JOHN BURTON and I have been friends, compatriots, and colleagues for nearly a quarter of a century. We were audacious red hots in the California Federation of Young Democrats. We worked side by side in the California State Assembly and, later, in Congress. Both JOHN and I are among the few people who can claim to have fought Mr. Reagan from one end of the country to the other.

JOHN BURTON's finest quality is his determined unwillingness to be realistic. In California during the Reagan years, each time the indigent elderly received a social security increase, Mr. Reagan reduced their supplementary State payments—as a result, they were singled out to receive zero compensation for inflation.

Each year, Democrats in the legislature made futile attempts to override Mr. Reagan's veto of our measure for increase payments to the aged poor. Many Members considered it more a gesture than a political act. JOHN BURTON did not see windmills—he saw a legislative battle to be won. He finally brought us a miracle—a successful override of the veto of popular Gov. Ronald Reagan.

JOHN brought to Congress the same colorful personal style and the same focus on issues he showed in California.

JOHN BURTON is one of the few legislators I have ever known who always sees and feels the real-life human

beings hidden behind statistics, bills, strategic maneuvers, and political legerdemain. He has never been impressed with his own power—or anyone else's power. He has been preoccupied with the powerless and voiceless Americans he has championed.

I wish JOHN a very happy birthday and I urge him to maintain an involvement in public affairs. Much as I wish him well in his future endeavors, I cannot but hope he will continue to be a visible, vocal, and active force for the goals he has pursued during his years in public office.●

● Mr. MAZZOLI. Mr. Speaker, I would like to add my tribute to JOHN BURTON as he prepares to retire from the House and as he celebrates his 50th birthday—an event which came my way on election day, November 2.

JOHN has marched to his own drum while a Member of the House from California's Fifth District. I hope JOHN can continue to do his own unimitatable thing in the years ahead as he walks through the Frisco fog whistling for Toto.●

● Mr. OBERSTAR. Mr. Speaker, JOHN BURTON has been a dedicated, compassionate legislator to humane domestic economic policies and to rational, sane foreign, and defense policies.

He has been, throughout his service in this House, an eloquent and passionate spokesman for equality in the United States and throughout the world.

JOHN BURTON has used his well-developed sense of humor, an occasionally biting sense of humor, to deflate pretention, cast light on the darkness of policies based on greed, and to mock the absurdity of such unfortunate U.S. policy as military support for repressive governments in Central America.

JOHN BURTON leaves a position in this House which no Member will fill. I will miss his unique participation in the debates of this House.●

● Mr. BEVILL. Mr. Speaker, for the past 8 years, our colleague JOHN BURTON has ably represented the Golden Gate district of California. During those 8 years this body has come to know and respect JOHN for his unique abilities and his deep dedication to the well-being of all people in this country.

Men like JOHN BURTON have been prodding the conscience of this country since its inception. Men like JOHN BURTON have been leading the fight to care for the poor, the handicapped, the mentally ill, and the mentally retarded. Men like JOHN BURTON have been standing strong on principle, refusing to sacrifice those least able to defend themselves against expedient budget cuts in programs without articulate constituencies.

I know that JOHN BURTON will be missed in Congress. I personally will feel a great loss when JOHN BURTON retires. But I know that he will not remain silent. He will find other arenas in which to express his heartfelt convictions about the rights of every person in this Nation to the privileges guaranteed by our Constitution.●

● Mr. WON PAT. Mr. Speaker, I am very pleased to join in this special salute to a very special Member of this body, Congressman JOHN BURTON of California. As you know, JOHN is celebrating his birthday today and I can think of no more appropriate opportunity to salute the many accomplishments of this outstanding and highly devoted public servant.

I have long been privileged to work closely with Congressman BURTON's brother, PHILLIP, and thus have had ample opportunity to see first hand the political ability which has been instilled in the BURTON brothers. Like his brother, JOHN is charged with a desire to see that justice is done for the little man in this country and he has pursued this goal with a vigor and talent that many have admired.

A good example of this desire to get to the heart of matters was the outstanding hearings Congressman BURTON held several years ago on the safety of the DC-10 aircraft following the tragic crash in Chicago. I saw some of those hearings and came away pursuaded that JOHN BURTON was pursuing the real reason why that plane crashed killing so many with all of the conviction and energy anyone could ask.

JOHN wanted to make certain that the victims did not die in vain and he accomplished this goal by forcing as much as anyone an exhaustive examination of the wings and engines of the doomed craft which led to changes being ordered in the servicing of the remaining planes.

I was also pleased to work with JOHN when my office successfully sought to obtain title from the U.S. Government of over 900 acres of land in Guam's port area. Congressman JOHN BURTON was a tough man to pursuade but he was also a wonderful friend whose support was crucial to the final passage of that legislation.

We need dynamic leaders of Congress like JOHN BURTON now, more than ever before. His decision to leave Congress for other pursuits can be readily understood by all of us who have worked the long hours this job demands. Yet, I hope that he will turn his energies to again find some means of working for those whom he has spoken so well for here in the House. We need champions to help offset the policies of the current administration and the absence of JOHN BURTON will sorely be felt in the 98th Congress.

JOHN, thank you for all you have done for my own constituents in Guam. They deeply appreciate your many fine qualities and on their behalf I wish you and your family a most happy and productive future. You have left behind you a legacy of dedication and outstanding public service and countless friends. Few of us could ask more and my prayers and best wishes go with you in the future. Thank you.●

● Mr. PATTERSON. Mr. Speaker, I want to join my colleagues today in paying tribute to one of this body's most colorful and interesting Members, JOHN BURTON of California, who will be missed by all of us who have had the pleasure of knowing him.

As fellow members of the class of 1974, JOHN BURTON and I have seen this Nation go through a number of significant and dramatic changes. Throughout these tumultuous and trying years, JOHN BURTON has never faltered in his commitment to serving the needs of the American people, and most particularly the elderly, the young, the handicapped, and the disadvantaged; all who are the most underrepresented classes of people in our society today.

Even amidst the most arduous debate and weighty discussions in this Chamber, JOHN BURTON has always injected humor and commonsense to rekindle our spirits and our sense of hope and commitment.

It somehow seems fitting that our colleague, JOHN BURTON, is redirecting his energies on the threshold of his second 50 years. I wish him the very best in his new pursuits and hope that his next 50 years will be filled with much happiness and will be personally rewarding and professionally challenging.●

● Ms. FERRARO. Mr Speaker, I would like to take this opportunity to pay tribute to the Honorable JOHN BURTON. JOHN's presence in this House will be missed in the coming Congress.

I have had the pleasure of serving with JOHN BURTON on the House Select Committee on Aging. In particular, I am honored to be a member of the Retirement Income and Employment Subcommittee which he chairs.

He will not only be missed by the Members of this body. He will be missed by the senior citizens of this Nation. In 1975, JOHN BURTON became an original member of the House Select Committee on Aging. In 1979, he became the chairman of the Retirement Income and Employment Subcommittee. Under his leadership, this subcommittee convened the first congressional hearing to study the problems of midlife women—problems which very often lead to poverty and illness.

JOHN BURTON, together with Chairman PEPPER, created a special Task Force on Social Security and Women. This task force, of which I am a member, became the first group to

hold hearings on reforms in social security to meet the changing needs of women in the work force.

Most recently, Mr. Speaker, Mr. BURTON fought very hard to save the title V program which the administration wanted to eliminate. This program means jobs for over 54,000 older Americans.

These are just a few of JOHN BURTON's many accomplishments during his five terms in the House of Representatives. He will be missed and I wish the best of luck in all his future endeavors.●

● Mr. EDWARDS of California. Mr. Speaker, if it is possible for one word to sum up JOHN BURTON's 8 years as a Member of Congress, that word would have to be passion.

When it comes to issues concerning the needs of poor people, or the development of a just and humane foreign policy, or a reordering of our national priorities, no Member of this body speaks with more passion and commitment than JOHN BURTON.

In this regard, I am reminded of JOHN's forceful remarks before the House last week during our consideration of funding for the MX missile. It was JOHN who pointed out the incongruity—indeed, the absurdity—of calling the MX a peacekeeper. The speech had all the hallmarks of JOHN's special style—humor, insight, passion, and truth.

His contribution to the debate on the MX made us think about this issue from a new angle. So it is with JOHN's viewpoints on so many of the issues which come before the House. Often amusing, generally insightful, his remarks compel us to think and to reevaluate our positions. I think its fair to say that when JOHN BURTON talks, everybody listens.

His colleagues in the California Democratic delegation will miss him greatly. The House of Representatives will be diminished by his absence. I hope and trust we can count on JOHN to continue to speak out with passion on the vital issues of peace and justice which confront our country and the world.

Good luck to you, JOHN in your future work. And happy birthday.●

● Mr. MOFFETT. Mr. Speaker, the House is losing one of its most unique, original, creative, honest, and courageous Members. JOHN BURTON, who came to the House with the class of 1974, has chosen to retire.

When our class came to the House, we were all characterized as reform-minded, antiwar, favoring social service spending, and a new, closer look at the Pentagon budget. We were appalled by Watergate, determined to stop the continuing tragedy in Vietnam, and were convinced that America was best served by being a friend, rather than an enemy, of Third World countries.

Some of us have retired, were beaten, moved on, or became more enmeshed in the House leadership which we, frankly, tried to challenge. Most of us retained the important views and values I described; but, really, we became more moderate. As we accumulated seniority, the tone we used changed.

But JOHN BURTON has been different. He served as a subcommittee chairman on both the Government Operations Committee and Select Committee on Aging without losing his edge, without losing his sense of outrage.

He was persistent in following his conviction that our fiscal priorities were unbalanced. Year after year, he forced the House to focus on this issue by offering transfer amendments.

He was persistent in following his conviction that the Central Intelligence Agency was acting like a rogue elephant in foreign affairs. He acted, offering amendments to prevent destabilizing activities, covert operations, and outright murder by our intelligence collectors.

As a Government Operations chairman, JOHN BURTON was a careful practitioner of congressional oversight, monitoring Amtrak and Conrail, investigating the activities of the FAA with respect to the tragic crashes which, from time to time, have plagued our air carrier industry. I was grateful for his assistance in dealing with problems that plagued the Northeast corridor, the rail link that connects our Northeastern communities served by Amtrak.

His subcommittee has paid careful attention to the FAA's proposed "regulation by objective," a comical codeword for extending airline deregulation to the area of safety. His hearings resulted in the FAA's decision to delay a final rulemaking on this issue. He was the first chairman to conduct hearings on the Bush task force's recommendations to relax auto safety standards.

We always like to think that our "class" was different. The class of 1974 was different than some of the succeeding groups elected to Congress in the succeeding 8 years. If you walk from committee to committee, you hear a lot about "can't do" government. Surprisingly, much of this rhetoric comes from former State legislators who were anxious to come to Washington. They talk a lot about bringing government down to size. Some of what they say has merit.

But JOHN BURTON has been different. He understands that there are roles for the Government to play which cannot be executed by State government, local government, or the private sector. He understands that Washington must play a role in protecting the environment, providing subsistence for the poor, and protecting the safety of all of us. His activism and commitment will be missed.●

● Mr. BROOKS. Mr. Speaker, quite often when a Member leaves Congress, we rise to say that he is unique, that he cannot be replaced, that we will not see his like again, and so on. In no case is this more accurate than in the case of JOHN BURTON. I am not referring solely to the fact that with JOHN's retirement we will be losing our only Member who is also a dues paying member of Bartenders Union, Local 41, although this certainly sets him apart from the rest of us.

JOHN BURTON has brought to the House a sense of humor and a perspective that has made a singular contribution to the diversity of this institution. And, significantly, he has combined this with a dedication to legislative issues that has made him an effective Congressman and a fine representative of his constituents' interests. I have been privileged to serve with him on the Government Operations Committee and I have admired the skill that he has brought to his role as chairman of our Subcommittee on Government Activities and Transportation. JOHN has led the subcommittee in important investigations into various areas of air transportation and the Government's procurement and management of property and services. This work will stand as a monument to JOHN's service in the House.

We will miss JOHN BURTON in this House next year.●

● Mr. DIXON. Mr. Speaker, on the occasion of his 50th birthday, there is no better time to express the sense of privilege I feel for having had the opportunity to work with JOHN BURTON, our distinguished colleague from the Fifth District of California. As we bid him farewell, I am honored to participate in this special tribute and to provide added recognition for his dedication to the work of Congress.

My relationship with JOHN dates back a better part of a decade. I came to admire his political skill while working with him in the California State Assembly. In that capacity, he worked diligently to preserve the State's valuable environmental resources and to protect consumer rights, among many other important issues he confronted during his tenure in the assembly.

After leaving the assembly to become a Member of Congress, he used his role as a member of the Government Operations Committee to oversee Government purchasing practices. He also spearheaded the thorough investigation into the causes of the tragic D-10 crash at O'Hare Airport. Despite outside pressure, he persevered in his efforts to assure that no compromises were made to public safety in air travel regulations.

JOHN's colorful style and personality will be sorely missed here in the Con-

gress. I know, however, that we can all appreciate his desire to move on and face new challenges. I am certain, that in whatever direction his career takes him, his dedication to public service will not cease. Best wishes and happy birthday, JOHN.●

● Mr. RAHALL. Mr. Speaker, I would like to thank the distinguished gentleman from California (Mr. BURTON) for taking out this special order today so that we in this body can wish a happy 50th birthday to Representative JOHN BURTON. I am also pleased to take this time to congratulate JOHN on his 8 years of dedicated service in the House of Representatives.

Many of us have our own personal views about JOHN's way of doing things, but no one can say that JOHN BURTON was never himself. He spoke frankly and right to the point.

Most importantly, has been his leadership on the Government Operations Subcommittee on Government Activities and Transportation. From this post, JOHN has been in the forefront on important issues concerning safety standards of the Federal Aviation Administration and purchasing practices of the GSA.

In the 96th Congress, JOHN BURTON dug deep into the tragic DC-10 plane crash that killed 273 people in Chicago, and pressured the FAA into finding the causes of the crash. He was tough, and he was concerned about the quality of the aircraft millions of people were flying in.

JOHN BURTON is a man who will be missed in this House, and I extend to him the very best of luck in the years to come.●

● Mr. RUSSO. Mr. Speaker, I think we may mark this occasion as one of those times in life that contain elements of joy as well as sorrow. I am certainly sad to have to say goodby today to JOHN BURTON as a Member of Congress. But on the other hand, I am delighted to extend best wishes of the day for this milestone birthday.

JOHN will be missed here. He is one of the Members you can count on to be straightforward. He has served with integrity and I always have enjoyed his refreshing candor as well as his capacity for friendship. Whatever we do here in Congress, while we deal with the impersonal law, it is the personal impact of the people chosen to represent that shapes our actions. The people of California chose well when they sent JOHN BURTON here and he has served them ably and his presence has been a positive one for them as well as the country. A good mind and a realistic perspective coupled with individual courage and commitment are the qualities of a good Congressman, and that JOHN BURTON has been.

Now that JOHN has obtained the half-century mark and has already accumulated enviable accomplishments, I know we can look forward to continued success for him. We all count on him to continue his involvement and his concern because as Henry Ford said:

> You take all the experience and judgment of men over fifty out of the world and there wouldn't be enough left to run it.

Happy birthday and keep up the good work, JOHN.●

● Mr. ANNUNZIO. Mr. Speaker, it is a pleasure for me to join with my colleagues in paying tribute to the Honorable JOHN L. BURTON, who is retiring after providing dedicated service and representation to the people of the Fifth District of California in the U.S. House of Representatives for the last 8 years. His tireless efforts to insure the social and economic justice of all Americans is most worthy of recognition.

Before coming to the Congress, JOHN served in the U.S. Army from 1954 to 1956. He compiled a record of outstanding achievement as a member of the California State Assembly from 1965 to 1975, and as the chairman of the assembly's Rules Committee from 1971 to 1974. Also, he ably served the Democratic Party in the capacity of chairman of the California Democratic Party from 1973 to 1974.

Elected to the House of Representatives in a special election on June 4, 1974, JOHN BURTON has distinguished himself as the chairman of the Subcommittee on Government Activities and Transportation, as a member of the Subcommittee on Government Information and Individual Rights of the House Government Operations Committee, as a member of the Subcommittee on Office Systems, and as a member of the Policy Group on Information and Computers of the House Administration Committee, a committee where I have worked with him and have come to know him. JOHN also has served in Congress with diligence as the chairman of the Subcommittee on Retirement Income and Employment of the House Select Committee on Aging.

JOHN is a Congressman of deep conviction, compassion, and courage, who has provided dedicated service to his constituency and to all people in this Nation, and he will be missed in the House of Representatives.

I extend to JOHN BURTON my best wishes for continued success in all of his future endeavors in devotion to the highest principles.●

● Mr. DE LA GARZA. Mr. Speaker, it seems that my friend and colleague, JOHN BURTON, has found two birds in one bush, retiring from Congress on the occasion of his birthday. You cannot beat that.

And it calls for a double congratulations. JOHN very capably represented the "Golden Gate District" of California in his four terms in the House. It goes without saying that he served us all well on the House Administration Committee, and the Select Committee on Aging, and Committee on Government Operations. I will remember JOHN as the man who always had a helping hand to lend to those who needed it, and he never looked sideways at any chance to assist his colleagues and friends. In my district, he had many friends who valued the understanding he provided to the Spanish surname.

Good luck, JOHN, in whatever you pursue back home in San Francisco. I know you will be successful.●

● Mr. BIAGGI. Mr. Speaker, it is with a sense of great feeling that I take this occasion to pay tribute to my good friend and colleague, JOHN BURTON, who is leaving the House at the end of this session. Let me also congratulate JOHN as he begins his fifth decade on this Earth. It has been said that life begins at 50, JOHN.

I have had the particular pleasure of serving with JOHN on the House Select Committee on Aging. JOHN has served with special distinction and effectiveness as the chairman of the Subcommittee on Retirement Income and Employment and while in this capacity has conducted a number of important hearings focusing on the major issues of the day for senior citizens such as the future of social security and issues related to pension reform.

JOHN played an important role in the successful effort which produced an override of President Reagan's veto of the supplemental appropriations bill and saved the title V older workers program. Older Americans in this Nation owe a debt of gratitude to JOHN BURTON for all he has done on their behalf.

JOHN will be fondly remembered as being one of the most colorful of all House Members. He is a man who has distinguished himself on a number of occasions because of his outspoken views on the important topics of the day. His voice was always one listened to and respected by his colleagues. It was a voice of influence because those of us who know JOHN realize he speaks from the deep rooted sense of conviction and commitment to causes. JOHN will be remembered as a man of courage and honesty, and his absence will be felt. In fact it is a shame that the incoming group of Members will not have the JOHN BURTON experience that I and others have so enjoyed.

JOHN BURTON leaves this House by his own choice. Because of that—I know I speak for many others—when I wish JOHN happiness, success and peace of mind in any and all future endeavors, and I thank him for the honor of being his friend.●

● Mr. FORD of Michigan. Mr. Speaker, I am pleased to have the opportunity to pay tribute to one of our colleagues on his birthday—JOHN BURTON. During his 8 years in the

House, JOHN has proved to be one of the most witty and intelligent Members of Congress. After a long career in California politics, JOHN was elected to this body in a special election in 1974. He has long been a leading advocate against unfairness in our Government and our society, and has exhibited a deep concern for the underprivileged.

As chairman of the Government Operations Subcommittee on Government Activities and Transportation, JOHN BURTON held extensive hearings into the Government regulations of the DC-10 after the tragic crash in Chicago. In his capacity as chairman of the Select Aging Subcommittee on Retirement Income and Employment, JOHN has been instrumental in attempts to insure that older Americans are not discriminated against in employment opportunities. Both the Congress and the people of the Fifth District are losing a very able Representative in JOHN BURTON.●

● Mr. REUSS. Mr. Speaker, I am pleased to join in this tribute to my friend JOHN BURTON for his 8 productive years of congressional service, and to wish him a happy 50th birthday.

In his Second Inaugural Address, Franklin D. Roosevelt said:

> The test of our progress is not whether we add more to the abundance of those who have much; it is whether we provide enough for those who have too little.

In JOHN BURTON's many years in government, first in the California State Assembly and then in the Congress, he has worked unceasingly to better the lot of those who have too little. He has fought to insure that the mentally ill and mentally retarded receive their rights as full and equal members of our society. He has fought to protect and increase benefits for the aged, blind, and disabled. He has helped preserve for future generations the beauty of our natural resources. He has forcefully opposed the increased militarization of our Nation, accomplished to the detriment of the poor and working people who must bear a disproportionate share of its cost. He has worked for peace, through both international cooperation and the pursuit of social and economic justice.

While effectively advocating these great goals, JOHN had delighted friends and disarmed foes with his keen wit and intelligence. His refreshing floor remarks have endeared him to colleagues on both sides of the aisle.

JOHN's decision to retire from Congress caught many of us by surprise. Never lacking the courage of his convictions, he simply decided that it is time to seek new challenges. His colleagues and constituents will miss his unique presence.

When you open your bar, JOHN, I will be there to run the kitchen.●

● Mr. DWYER. Mr. Speaker, I join my other distinguished colleagues today in honoring a fine Congressman and good friend, JOHN BURTON.

It has been a privilege for me to have served with JOHN BURTON these past 2 years. In his 8 years representing California's Fifth District, JOHN has raised a steady, solid voice in behalf of his constituents and has been a vanguard for justice and fair play for all people.

His commitment to those less fortunate—the disadvantaged, the handicapped and the aged—has been translated into an excellent record of achievement both in California and nationwide. In Congress, JOHN BURTON has been a most able and dedicated chairman of the Select Committee on Aging's Subcommittee on Retirement Income and Employment.

In sum, JOHN BURTON is a man of principle and compassion whose dedication to equity and fairness has been a credit to this institution.

On his 50th birthday, as he prepares for another chapter in his accomplished career, I extend to JOHN my profound respect and sincere best wishes.●

● Mr. AKAKA. Mr. Speaker, I rise today to join my colleagues in paying tribute to the gentleman from California (Mr. JOHN BURTON) on the occasion of his retirement from this body.

JOHN began his career in politics in 1964 when he won election to the California State Assembly. His efforts there led to his winning two significant chairmanships: chairman of the assembly rules committee and chairman of the California State Democratic Party. He sought and won election to the House of Representatives in 1974.

Both in California and here in Washington, JOHN has been a voice for social and economic equity, particularly for the aged. He is as concerned about the poor as any Member of this House, repeatedly trying to redirect national priorities so that those in need are adequately provided for.

During the 96th Congress, as chairman of the Government Operations Subcommittee on Government Activities and Transportation, JOHN held much needed hearings into the causes of the tragic Chicago airplane crash. These hearings, however, represent only part of his continuing efforts regarding airline safety standards. Many people travel more safely and with increased confidence because of JOHN BURTON. As one who represents a State with significant tourism, I for one greatly appreciate his efforts. In addition, as chairman of the Select Aging Subcommittee on Retirement and Income, JOHN has continued his efforts on behalf of the aging with skill and diligence.

JOHN BURTON is a maverick, in the best sense of that word. He is an individual who follows his own counsel and trusts his own judgment, tempered only by discussions with those of his colleagues whose opinions and expertise he respects. The House will be made a more somber and less stimulating place by his retirement.●

● Mr. MONTGOMERY. Mr. Speaker, I want to join my colleagues today in this special order honoring the gentleman from California, (Mr. JOHN BURTON).

JOHN has always gone his own way here in the Congress, standing up and speaking out for the issues in which he believed strongly. He always made his point in a very articulate, and in many cases, a very witty manner. We have had our differences over the issues, but JOHN and I have become good friends over the years.

He has served the people of the "Golden Gate District" of California well and I know they will miss his experience and his voice here on Capitol Hill.

JOHN has served diligently on the Committee on Government Operations, where he was chairman of the Subcommittee on Transportation and Government Activities. He also worked hard on the House Administration Committee and on the Select Committee on Aging.

JOHN was very active in the Democratic Party in California before coming to the House of Representatives 8 years ago. I am sure he will return to California and continue to make a contribution on the California political scene.

He can be proud of the service and his accomplishments for the Fifth District as well as for the entire State while serving here in this Chamber. I know he will be missed by a great many of his colleagues when the 98th Congress convenes in January.●

● Mr. JONES of North Carolina. Mr. Speaker, when I heard that the younger brother, JOHN, of my good friend, PHIL BURTON, was going to run for Congress, I wondered if the U.S. House could afford to have two BURTONS at the same time. I should have had no fears for when JOHN arrived here some 8 years ago he was certainly a welcomed addition, and has added much to the legislative process as well as the enjoyment of his warm personality.

So, today, December 15, I want to express a warm, happy birthday to JOHN BURTON, and wish him many, many more. To put it mildly, JOHN will be missed, for as I have previously stated, he brought a welcomed style of conduct to the Congress that few, if any, others have exhibited. I hope for his sake that his 8 years have been enjoyable and rewarding, and that he has found at least a part of the happiness that he has brought to others.

And so, to JOHN and his family, I wish much success and happiness in the years ahead.●

GENERAL LEAVE

Mr. KILDEE. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks and to include therein extraneous material on the subject of the special order speech today by the gentleman from California (Mr. PHILLIP BURTON).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

ACHIEVING A BALANCED BUDGET

(Without objection, Mr. ROUSSELOT was given permission to address the House for 1 minute.)

Mr. ROUSSELOT. Mr. Speaker, I would merely like to say to my colleagues that I still am anxious to find a way to achieve a balanced budget, and would like to do so if we can.

My colleague from New York (Mr. KEMP) has some additional comments that he wishes to make on additional tax cuts, and I will yield to him.

Mr. KEMP. Mr. Speaker, I would just like to say how much this body is going to miss the gentleman from California. His efforts to balance the budget through all the years, his efforts to restore a sound and responsible fiscal policy, his courage and determination on behalf of not only the people of his district but on behalf of the country, are well known and deeply appreciated and something that I think all Members, liberal, conservative, on both sides of the aisle, owe the gentleman from California a large amount of appreciation.

I personally want to thank him for his friendship and his dedication to this country. He has served his party best by serving his country first, and that is in the highest tradition of this body.

Mr. ROUSSELOT. I thank my colleague. I was really trying to fill time, but I certainly did not expect that.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I now yield to my colleague from Indiana.

Mr. MYERS. Mr. Speaker, I certainly support and join my colleague from New York in thanking the gentleman from California for his contribution through the years. You know, we often disagree on little things, but the gentleman from California has been truly supporting what is great for our country. We are going to miss the gentleman from California, and we hope it will not be too long before he comes back. I know the gentleman and I have conversed about this, and he has not said that he was going to come back or even try to come back, but we hope he will because the gentleman from California has been a genuine supporter of what is good for our country and what is needed for our country. We are going to miss that kind of contribution.

Mr. ROUSSELOT. I thank my colleague from Indiana. I hope his basketball team wins.

□ 2120

Mr. MYERS. We hope that, too. I suppose the gentleman means as long as UCLA and Indiana do not meet.

Mr. ROUSSELOT. I think that will be a great contest when it finally arrives.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I will be glad to yield to my colleague, the gentleman from Florida. I understand he is waiting for a bill.

Mr. GIBBONS. As the gentleman said, I am waiting for a couple of bills that are floating around somewhere in the corridor out there. I hope we will be able to find them. Perhaps a messenger was waylaid or lost his way. These are not momentous bills.

Mr. WALKER. Mr. Speaker, if the gentleman will yield, will the gentleman tell us what he expects to float by here later on this evening?

Mr. GIBBONS. Well, it will be Santa Claus a little later on really.

Mr. WALKER. Does the gentleman mean we can expect Santa Claus?

Mr. GIBBONS. One of the bills deals with the authorization bill, if the Members would believe it, for the International Trade Commission, the USTR office. As the Members know, the International Trade Commission is an arm of the Congress, and it submits its budget directly to the Congress.

The other bill pertains to the U.S. Trade Representative's office, and everyone, I think, has agreed that our present U.S. Trade Representative is about to work himself to death with all the matters that are moving around here. On both the House side and the Senate side, we thought he needed the opportunity to have an assistant. That is one of the bills we are looking for. The other bill is a bill that involves probably 150 Members of the total Congress. They are what we call minor tariff bills. We got rid of all the controversies. The only trouble was that the Senate conferees' papers got lost. We are out looking for them. That is the problem we have. There is no controversy about these bills. We just need some papers, as the gentleman understands it.

TRIBUTES TO THE HONORABLE JOHN ROUSSELOT AND THE HONORABLE WILLIAM BRODHEAD ON THEIR DEPARTURE FROM THE HOUSE

(Without objection, Mr. GIBBONS was given permission to address the House for 1 minute.)

Mr. GIBBONS. Mr. Speaker, I really rose to say some nice words about the gentleman from California (Mr. ROUSSELOT). I remember when the gentleman came here. He had a reputation of being a fiery individualist, and he turned out to be a fiery individualist. But he is also not only a fiery individualist, he is an excellent legislator. he asks penetrating questions, and he works hard and is conscientious about his work. I will certainly miss him.

We have had the opportunity to travel together and to work together on our jobs in trade, and I found him to be one who contributed, always carrying his share of the load, and he was willing to carry other people's share of the load.

So, Mr. Speaker, as the gentleman goes back to his native State of California and takes on some other activities, we wish him well. He is a fine gentleman.

Mr. ROUSSELOT. Mr. Speaker, if the gentleman will yield, I thank the gentleman from Florida (Mr. GIBBONS) for those kind words.

Mr. MATSUI. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I am glad to yield to the gentleman from California.

Mr. MATSUI. Mr. Speaker, in view of the comments of the subcommittee chairman, I would also like to lend my comments, as probably the only Californian here in this room, to the discussion about my friend, JOHN ROUSSELOT. JOHN and I probably agree on philosophy about 180 degrees apart, but I want the subcommittee chairman to know and I certainly want JOHN to know that I believe he is probably one of the finest legislators I have ever met. I shall certainly miss him personally, and this institution will miss him.

He is one individual Member who knows how to work and compromise and ultimately come up with positive decisions. I just want to commend the gentleman for expressing these comments about JOHN ROUSSELOT.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I am glad to yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker, I would just like to say a few words about our colleague JOHN ROUSSELOT.

When I first came to this body longer ago than I would like to think about, I thought, boy, there is one guy I will never see eye to eye with; he and I come from about as far apart politi-

cally as we can and still be loyal Americans.

But I will say this: I have learned to like, respect, and admire JOHN ROUSSELOT. He is a person who has principles. He believes, and he acts on his beliefs. He is not two-faced. He is a clear thinker, he is a clear speaker, and he has added tremendously to the deliberative qualities of this institution.

While we have not always agreed on certain issues, I certainly admire JOHN and, more importantly, I like JOHN. This reminds me of the famous lines from one of Kipling's poems, with which I am sure we are all familiar:

But there is neither East nor West, Border, nor Breed, nor Birth,
When two strong men stand face to face, though they come from the ends of the earth!

JOHN, Godspeed to you.

Mr. GIBBONS. I thank the gentleman.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I cannot resist the temptation to say that the gentleman from California has spoken so often from the other side of the well that he obviously has had some tremendous impact over there, and I think maybe that is something we will all have to take up in the future to get those kinds of praiseworthy comments. But for JOHN ROUSSELOT they are well deserved.

I have sat on the floor here for many hours and have seen him work hard hour after hour. The words expressed by his colleagues on the other side are well deserved praise. I think that only those of us who have worked so closely with him know how much he will be missed.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. WALKER. Mr. Speaker, I think the gentleman from Florida now has the time.

Mr. GIBBONS. I am glad to yield to the gentleman from Ohio.

Mr. SIEBERLING. Mr. Speaker, JOHN and I both believe in one thing. We both believe in a balanced budget; we just disagree on how we are going to get there.

Mr. OBEY. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I am glad to yield to the gentleman from Wisconsin.

Mr. OBEY. Mr. Speaker, I, too, would like to say a few words about JOHN ROUSSELOT. I don't know if I dare put them in the RECORD, but I, nonetheless, would like to say a few words about him.

I do not think that JOHN and I would agree but about twice in a century, but I do respect one thing about you, JOHN, and that is that you have got guts and you have the courage of your convictions, and on occasion you even exhibit that with a sense of humor, which is not all that often present in this body. For that, I am very grateful.

Mr. GIBBONS. Mr. Speaker, I agree very much.

The gentleman from California (Mr. ROUSSELOT) has a great sense of humor, and he uses it in a friendly manner and quite effectively.

Mr. Speaker, I want to say a few words about the gentleman from Michigan (Mr. BRODHEAD). The gentleman from Michigan has served on the Committee on Ways and Means now for 6 or 7 years. He is a very effective member of the Ways and Means Committee.

I happened to be walking through the west door on that fateful morning when he stood in the well here and said he was not going to seek reelection. I walked to the well as soon as he departed from the microphone and said that I hoped that he would change his mind.

I hope that when the gentleman returns to the State of Michigan and to his home in Detroit, he will find peace and tranquillity there so that he and his family can get reacquainted with each other and so he can successfully practice law and become a very fine contributing member of the community.

Mr. Speaker, it is with a great deal of sadness that I want to say that we are going to have to say goodbye to the gentleman from Michigan (Mr. BRODHEAD).

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I am glad to yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I appreciate my colleague's yielding.

Since everyone else was nice enough to express all those thoughts—and I appreciate it; I do not want to be unappreciative—I do not want to rise to say something about my good friend and colleague, the gentleman from Michigan (Mr. BRODHEAD), who has, I think, served with great excellence on the Committee on Ways and Means.

I have known him in other ways, and I have had a chance firsthand to see him put his talents to work on our Social Security Subcommittee and on the Public Assistance and Unemployment Compensation Committee. There are few Members of the Congress that approach these very, very difficult problems that we have on those two subcommittees of the Ways and Means Committee with greater thought, with greater precision, and with greater care than our colleague, the gentleman from Michigan (Mr. BRODHEAD). He has made major contributions to legislation in the Committee on Ways and Means, and he has done it many times without broadcasting it or trying to gain a lot of publicity; he was just doing the job and helping to protect the people who are affected by that legislation.

□ 2130

I know that he will be very much missed by the Ways and Means Committee because he has served so well and so thoughtfully. I cannot emphasize enough the thought and time that this gentleman gave to the Ways and Means Committee in this area.

Besides that, he is a gentleman and a person that is so easy to work with, expecially after you have had a chance to be with him on a committee.

So I am most grateful that the gentleman from Florida (Mr. GIBBONS) has taken this time to give us a chance to express our thanks to the gentlemen from Michigan (Mr. BRODHEAD) for all that he has done. I know as he goes back into private practice that maybe, as he said in his own release when he decided not to run for reelection, he can spend more time with his family. I know he will be greatly missed by the House of Representatives because he does perform in a very positive and constructive way.

I thank my colleague from Florida from taking this time.

Mr. GIBBONS. Mr. Speaker, I now yield to the gentleman from Michigan (Mr. BRODHEAD).

Mr. BRODHEAD. I thank the gentleman for recognizing me.

I just want to thank the gentleman from Florida (Mr. GIBBONS) and the gentleman from California (Mr. ROUSSELOT) for the very kind words about me. I have enjoyed serving with both Members and greatly appreciate their willingness to take the floor and say some words on my behalf.

This is my last statement before the House of Representatives and I just want to say very briefly that the people of the United States of America make very wise choices in the people that they select to serve in this body. The people that I have served with in this body have been the finest group of people that it has ever been my privilege to know. I just hope that as the years go by that those of us who are going to be outside of this institution and those of us who are privileged to be in this institution can work together to develop a greater public understanding and public support for the Members of this institution and for the marvelous work that they do.

I am deeply grateful to all of you for everything, all of your kindness to me, and I am deeply grateful to the people of my district for having given me the opportunity to serve here.

Mr. GIBBONS. Mr. Speaker, I want to say some very nice things about the gentleman in the chair. The gentleman in the chair, the distinguished Member of Congress from Washington, Mr. FOLEY, has attained a stature not only within the Democratic Party but within this country that is truly outstanding.

The SPEAKER pro tempore. The Chair thanks the gentleman.

Mr. GIBBONS. And I want to say that it has been a pleasure working with him.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Indiana.

Mr. MYERS. The gentleman in the chair filled a very, very difficut role when he followed the gentleman from Texas, Mr. Pogue. I served on the Committee on Agriculture with the gentleman from Texas and I remember when the Chair sat in the second chair behind the previous Chair, the gentleman from Texas, Mr. Pogue, who probably knew agriculture better than anyone that I know of.

I remember riding back in the bus league when we were in the bus league and we used to get out some place in the United States riding a bus along the highways and the gentleman's predecessor, Mr. Pogue, would ride up in the jump seat and say, "Now, at the next crossroads George Smith bought this farm back in 1938." He knew all about that farm.

Now the gentleman in the chair assumed that role but next to the gentleman from Texas, Mr. Pogue, Mr. FOLEY knew more about agriculture than anybody I know of.

□ 2140

Really it was a difficult role.

But he had a good tutor. He knew all about those farms also. The gentleman in the chair sacrificed all that experience to assume a new responsibility when he gave up the chairmanship of the Committee on Agriculture to our good friend, the gentleman from Texas (Mr. DE LA GARZA), who was a great agriculturalist. But the gentleman in the chair certainly has a great background in agriculture. It was not an easy role and an easy decision that the gentleman in the chair made to give up that role in agriculture.

So the gentleman from Florida who speaks about the sacrifice that our friend has made, the gentleman from Washington (Mr. FOLEY), to give up that responsibility, but he gave it up to a very, very competent and able gentleman from Texas (Mr. DE LA GARZA). So I certainly join my colleague from Florida in congratulating the gentleman from Washington (Mr. FOLEY) for the role he has played in the history of agriculture in the country as well.

Mr. GIBBONS. I certainly concur with the gentleman.

REPORT OF COMMITTEE TO INFORM THE PRESIDENT

The SPEAKER pro tempore. The Chair will receive a report from the committee.

Mr. WRIGHT. Mr. Speaker, your committee appointed to inform the President that we are ready to adjourn and to ask him if he has any further communications to make to the Congress has performed that duty.

The President has directed us to say that he has no further communications to make to the Congress except to wish each of its Members a very Merry Christmas and a very happy New Year.

Mr. MICHEL. And we would like to do the same to all of the Members.

The SPEAKER pro tempore. The Chair wishes to express our thanks to the committee for its report.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate disagrees to the amendment of the House to the amendment of the Senate to the bill (H.R. 4566) entitled "An act to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes," agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DOLE, Mr. ROTH, Mr. DANFORTH, Mr. LONG, and Mr. BENTSEN to be the conferees on the part of the Senate.

CONFERENCE REPORT ON H.R. 6094, FISCAL YEAR 1983 AUTHORIZATION OF APPROPRIATIONS FOR THE U.S. CUSTOMS SERVICE, INTERNATIONAL TRADE COMMISSION, AND TRADE REPRESENTATIVE

Mr. GIBBONS submitted the following conference report and statement on the bill (H.R. 6094) to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1983, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 97-988)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6094) to authorize appropriations for the United States International Trade Commission, the United States Customs Service, and the Office of the United States Trade Representative for fiscal year 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate.

DAN ROSTENKOWSKI,
SAM M. GIBBONS,
BILL FRENZEL,
Managers on the Part of the House.

BILL DOLE,
BILL ROTH,
JOHN C. DANFORTH,
RUSSELL LONG,
LLOYD BENTSEN,
Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6094), to authorize appropriations for the United States International Trade Commission, the United States Customs Service, and the Office of the United States Trade Representative for fiscal year 1983, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate.

EXPLANATION OF THE CONFERENCE AGREEMENT

Section 2: United States Customs Service

House bill—The House bill authorizes $568,801,000 in appropriations for the U.S. Customs Service. This amount includes $31,464,000 to fund the possible transfer of BATF activities to Customs.

Senate amendment—The Senate amendment provides for an authorization level of $564,224,000 for the Customs Service. As in the House bill, the authorization includes $31,464,000 for BATF transfer.

Conference agreement—The Conferees agreed to the Senate amendment.

Section 3: Office of the United States Trade Representatives

House bill—The House bill authorizes an appropriation of $10,100,000 to the Office of the U.S. Trade Representative for fiscal year 1983.

Senate amendment—The Senate amendment authorizes an appropriation of $11,100,000 for fiscal year 1983. The Senate amendment also amends Section 141(b) of the Trade Act of 1974 (19 U.S.C. 2171(b)(2)) to provide for one additional Deputy United States Trade Representative. Present law authorizes only two such Deputies.

Conference agreement—The Conferees agreed to the Senate amendments.

DAN ROSTENKOWSKI,
SAM M. GIBBONS,
BILL FRENZEL,
Managers on the Part of the House.

BILL DOLE,
BILL ROTH,
JOHN C. DANFORTH,
RUSSELL LONG,
LLOYD BENTSEN,
Managers on the Part of the Senate.

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent that it may be in order to consider immediately the conference report on the bill H.R. 6094, to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1983, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the title of the bill.

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent that the statement

of the managers be read in lieu of the report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see prior proceedings of the House of today, Tuesday, December 21, 1982.

Mr. GIBBONS (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida (Mr. GIBBONS) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I have no intention of taking that much time. This is the conference report that I referred to a while ago that refers to the U.S. Trade Representative's Office and the Office of the International Trade Commission and the U.S. Customs Service.

This is completely noncontroversial. It went from the House to the other body.

We are accepting the Senate amendments. The Senate amendments in effect allow for the appointment of an additional assistant U.S. Trade Representative.

It is the hope of the conferees that the President will appoint one and that he will have the rank of Ambassador and will be generally covering all branches of the Cabinet that we have, everything from agriculture on the one side to labor on the other.

The U.S. Trade Representative's Office is badly overworked now because of the high volume of trade representative work that must be done not only here in the Congress but throughout the world. The current occupant of that office needs some assistance.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I am glad to yield.

Mr. WALKER. These are the only two items that are in this bill? There is nothing else down in the bill?

Earlier today we had a request from the gentleman for a bill similar to this with other purposes in it and I just want to be sure.

Mr. GIBBONS. No, there are no big surprises in this one. This is all germane.

Mr. WALKER. These are the only two items covered in it?

Mr. GIBBONS. The gentleman is correct.

Mr. WALKER. I thank the gentleman.

Mr. GIBBONS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 4566, TARIFF AND CUSTOMS AMENDMENTS

Mr. GIBBONS submitted the following conference report on the bill (H.R. 4566), to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 97-989)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the amendment of the Senate to the bill (H.R. 4566) to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

TITLE I—TARIFF PROVISIONS

SUBTITLE A—IN GENERAL

SEC. 101. AMENDMENT OF TARIFF SCHEDULES.

Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, an item or other provision, the reference shall be considered to be made to an item or other provision of the Tariff Schedules of the United States (19 U.S.C. 1202).

SEC. 102. CANNED TUNA.

Item 112.30 is amended—

(1) by inserting "and not the product of any insular possession of the United States," immediately after "15 pounds each,"; and

(2) by striking out "United States Fish and Wildlife Service" and inserting in lieu thereof "National Marine Fisheries Service".

SEC. 103. FURS FROM CHINA.

Headnote 4 to subpart B of part 5 of schedule 1 is amended by striking out "or of the People's Republic of China".

SEC. 104. LIMITATION OF IMPORTS OF SEED POTATOES.

The superior heading to items 137.20 and 137.21 is amended by inserting ", and imported for use as seed" after "tags".

SEC. 105. CLASSIFICATION OF CERTAIN FABRICS.

Subpart A of part 4 of schedule 3 is amended—

(1) by amending the superior heading to items 346.05 through 346.65 to read as follows:

	"Fabrics of pile construction, in which pile threads were inserted or knotted during the weaving or knitting, whether or not the pile threads cover the entire surface and whether the pile threads are wholly or partly cut or are not cut:			":

(2) by amending the superior heading for items 346.05 and 346.10 to read as follows:

	"Fabric of corduroy construction, whether or not the filling floats are cut:			"; and

(3) by amending the superior heading for items 346.15 through 346.24 to read as follows:

	"Fabric of velveteen construction, whether or not the filling floats are cut:":			

SEC. 106. REDUCTION OF DUTY ON CERTAIN FOURDRINIER WIRE

(a) IN GENERAL.—Subpart B of part 3 of schedule 5 is amended by striking out item 642.30 and inserting in lieu thereof the following:

	Fourdrinier wires, seamed or not seamed, suitable for use in papermaking machines, whether or not parts of, are fitted or attached to, such machines):			
642.31	Of plastics	9.4% ad val.	10% ad val.	75% ad val
	Other:			
642.33	With 24P or more wires to the linear inch.	Free		75% ad val
642.34	Other	19.4% ad val.	12% ad val.	75% as val

(b) APPLICATION WITH OTHER PROVISIONS.—

(1) The rate of duty in column numbered 1 for items 642.31 and 642.34 (as added by subsection (a)) shall be subject to any staged rate reductions for item 642.30 which were proclaimed by the President before the 15th day after the date of the enactment of this Act.

(2) Whenever the rate of duty specified in column numbered 1 for such item 642.31 or 642.34 is reduced to the same level as the corresponding rate of duty specified in the column entitled "LDDC" for such item, or to a lower level, the rate of duty in such "LDDC" column shall be deleted.

SEC. 107. REDUCTION OF DUTY ON CERTAIN CERAMIC INSULATORS.

(a) IN GENERAL.—Subpart D of part 2 of schedule 5 is amended by inserting immediately after item 535.12 the following new item:

"535.13	Ceramic insulators to be used in the production of spark plugs for natural gas-fueled, stationary, internal combustion engines.	3.6%	60% ad val."

(b) REPEAL.—Item 909.20 of the Appendix is repealed.

(c) PHASE-DOWN OF TEMPORARY RATE.—Effective with respect to articles entered after December 31, 1983, item 535.13 (as added by subsection (a)) is amended by striking out "3.6% ad val." and inserting in lieu thereof "3.5% ad val.".

SEC. 108. PERMANENT DUTY—FREE TREATMENT OF YANKEE DRYER CYLINDERS.

(a) IN GENERAL.—Subpart D of part 4 of schedule 6 is amended by inserting immediately after item 668.04 the following new item:

"668.06 Yankee dryer cylinders .... Free ..... 85% ad val."

(b) REPEAL.—Item 912.06 of the Appendix is repealed.

SEC. 109. CERTAIN AIRCRAFT COMPONENTS AND MATERIALS.

In the case of any aircraft which—

(1) was previously exported from the United States,

(2) was composed, at the time of such exportation in part of components and materials which are products of the United States and which were installed—

(A) while such aircraft was within the United States, and

(B) after such aircraft was operational,

(3) is returned to the United States after being so exported without having been advanced in value or improved in condition by any process of manufacture or other means while abroad, and

(4) was entered for consumption before 1970,

the rate of duty provided for in item 694.40 on the date of such entry shall, notwithstanding any other provision of law, be assessed upon the full value of such aircraft less the value of such components and materials; and such entry shall, notwithstanding the provisions of section 514 of the Tariff Act of 1930 or any other provision of law, be reliquidated on the basis of such assessment. For the purposes of this section, the value of any such component or material is the cost of such component or material at the time of installation in the aircraft plus the cost of such installation.

SEC. 110 WATCHES.

(a) PRODUCTS OF INSULAR POSSESSIONS DEFINED.—Paragraph (a)(i) of headnote 3 of the General Headnotes and Rules of Interpretation is amended by striking out "(or more than 70 percent of the total value with respect to watches and watch movements)".

(b) RATE OF DUTY ON WATCHES.—Headnote 6 of schedule 7, part 2, subpart E is amended—

(1) by striking out "paragraph (b)" in paragraph (a) and inserting in lieu thereof "paragraphs (b) through (h)"; and

(2) by striking out "an insular possession of the United States outside the customs territory of the United States" in paragraph (a), and inserting in lieu thereof "the Virgin Islands, Guam, and American Samoa (hereinafter referred to as the 'insular possession')"; and

(3) by striking our paragraphs (b) through (d) and inserting in lieu thereof the following new paragraphs:

"(b) Watches and watch movements produced or manufactured in a United States insular possession which contain any foreign component may be admitted free of duty without regard to the value of the foreign materials such watches contain if they conform with the provisions of this headnote, but the total quantity of such articles entered free of duty shall not exceed the amounts established by or pursuant to paragraph (c) of this headnote.

"(c) Notwithstanding the provisions of paragraph (b) of this headnote, the provisions of this headnote and the benefits thereunder shall not apply to any article containing any material which is the product of any country with respect to which column 2 rates of duty apply.

"(d)(i) In calendar year 1983 the total quantity of such articles which may be entered free of duty shall not exceed 4,800,000 units.

"(ii) In subsequent calendar years, the Secretary of Commerce and the Secretary of the Interior (hereinafter referred to as the "Secretaries"), acting jointly, shall establish a limit on the quantity which may be entered free of duty during the calendar year, and shall consider whether such limit is in the best interest of the insular possessions and not inconsistent with domestic or international trade policy considerations. The quantity the Secretaries establish in any calendar year under this paragraph shall not—

"(I) exceed 10,000,000 units, or one-ninth of apparent domestic consumption (as determined by the International Trade Commission pursuant to paragraph (d) of this headnote), whichever is greater;

"(II) be decreased by more than 10 percent of the quantity established for the immediately preceding calendar year; and

"(III) be increased to more than 7,000,000 units, or by more than 20 percent of the quantity established for the immediately preceding calendar year, whichever is greater.

"(e) On or before April 1 of each calendar year (beginning with the first year in which watch imports from the United States insular possessions exceed 9,000,000 units), the International Trade Commission shall determine the apparent United States consumption of watches and watch movements (including solid state timepieces) during the preceding calendar year, shall report such determination to the Secretaries, and shall publish such determination in the Federal Register.

"(f)(i) In calendar year 1983, not more than 3,000,000 units of the total quantity of articles described in paragraph (d) which may be entered free of duty shall be the product of the Virgin Islands, not more than 1,200,000 units shall be the product of Guam, and not more than 600,000 units shall be the product of American Samoa.

"(ii) For calendar year 1984 and thereafter, the Secretaries may establish new territorial shares of the total amount which may be entered free of duty, taking into account the capacity of each territory to produce and ship its assigned amounts. A territory's share in any year shall not be reduced—

"(I) by more than 200,000 units in calendar year 1984 or 1985, and

"(II) by more than 500,000 units in calendar year 1986 or thereafter, except that no territorial share shall be established at less than 500,000 units.

"(g) The Secretaries, acting jointly, shall allocate the calendar year duty exemptions provided by paragraphs (b), (d), and (f) of this headnote on a fair and equitable basis among producers located in the insular possessions, and shall issue appropriate licenses therefor. Allocations made by the Secretaries shall be final. In making the allocations, the Secretaries shall consider the potential impact of territorial production on domestic production of like articles and shall establish allocation criteria (including minimum assembly requirements) that will reasonably maximize the net amount of direct economic benefits to the insular possessions.

"(h)(i) In the case of each calendar year beginning after December 31, 1982, and before January 1, 1995, the Secretaries, acting jointly, shall—

"(I) verify the wages paid by each producer to permanent residents of the insular possessions during the preceding calendar year, and

"(II) issue to each producer (not later than March 1 of such year) a certificate for the applicable amount.

"(ii) For purposes of subparagraph (i), except as provided in subparagraphs (iii) and (iv), the term 'applicable amount' means an amount equal to the sum of—

"(I) 90 percent of the producer's creditable wages on the assembly during the preceding calendar year of the first 300,000 units, plus

"(II) the applicable graduated declining percentage (determined each year by the Secretaries) of the producer's creditable wages on the assembly during the preceding calendar year of units in excess of 300,000 but not in excess of 750,000.

"(iii) The aggregate amount of all certificates which are issued during any calendar year shall not exceed an amount which bear the same ratio to $5,000,000 as—

"(I) the gross national product of the United States (as determined by the Secretary of Commerce) for the preceding calendar year, bears to—

"(II) the gross national product of the United States (as so determined) for 1982.

"(iv) (I) Subject to the provision of clause (II), if the amount of the certificates issued under subparagraph (i) would exceed the limit under subparagraph (iii), the applicable amount of each producer's certificate shall be reduced proportionately by the amount of such excess.

"(II) The applicable amount of any producer's certificate shall not be reduced below the amount determined under subparagraph (ii)(I), except that if the application of this clause would result in the aggregate amount of the certificates exceeding the limit under subparagraph (iii), the applicable amount of each producer's certificate shall again be reduced proportionately by the amount of the excee determined after application of this clause.

"(v) Any certificate issued under subparagraph (i) shall entitle the certificate holder to secure the refund of duties equal to the face value of the certificate on watches, watch movements (including solid state timepiece) and, with the exception of discrete cases, parts therefor imported into the customs territory of the United States by the certificate holder. Such refunds shall be made under regulations issued by the Treasury Department. Not more than 5 percent of such refunds may be retained as a reimbursement to the Customs Service for the administrative costs of making the refunds.

"(vi) Any certificate issued under subparagraph (i) or any portion thereof, shall be negotiable.

"(vii) Any certificate issued under subparagraph (i) shall expire 1 year from the date of issuance and may be applied against duties on imports of watches and watch movements the entry of which were made within 2 years prior to the date of issuance of the certificate.

"(viii) For purposes of determining the applicable amount of any producer's certificate to be issued during calendar year 1983, the greater of—

"(I) the producer's creditable wages for calendar year 1982, or

"(II) 60 percent of the producer's creditable wages for calendar year 1981,

shall be considered the creditable wages for calendar year 1982.

"(i) The Secretaries are authorized to issue such regulations, not inconsistent with the provisions of this headnote, as they deter-

mine necessary to carry out their respective duties under this headnote. Such regulations shall include minimum assembly requirements. Any duty-free entry determined not to have been made in accordance with applicable regulation shall be subject to the applicable civil remedies and criminal sanctions, and, in addition, the Secretaries may cancel or restrict the license or certificate of any manufacturer found in willful violation of the regulations.".

SEC. 111. PIPE ORGAN PARTS.

Items 726.60 and 726.62 are amended to read as follows:

"726.60	Player actions and parts thereof.	Free	60% ad val.
726.62	Other	Free	63% ad val.".

SEC. 112. ELIMINATION OF DUTY ON TOY TEA SETS.

Subpart E of part 5 of schedule 7 is amended by inserting immediately after item 737.70 the following new item:

"737.73	Toy tea sets of ceramic were made to the approximate scale of 1 to 10 or larger.	Free	70% ad val.".

SEC. 113. CLASSIFICATION OF DOLLS AND TOY FIGURES

(a) IN GENERAL.—Subpart E of part 5 of schedule 7 is amended—

(1) by adding at the end of the headnotes thereto the following new headnotes:

"3. For the purposes of the superior heading to items 737.47 and 737.49 and of item 737.51, 'toy figures of inanimate objects' are only imagnary creatures that either—

"(i) do not possess features of human or other earthly creatures;

"(ii) possess both earthly and non-earthly features but are predominantly non-earthly in nature; or

"(iii) possess features which are a hybrid of features of more then one animate object.

This definition does not cover toy figures of objects which are readily recognizable as vegetables, minerals, robots, or machines, whether or not such figures possess humanoid or earthly features.

"4. Items 737.23, 737.28, 737.30, and 737.47 do not include any doll or toy that either—

"(i) will maintain the three dimensional shape of its torso if the stuffing or filler is removed, or

"(ii) is constructed such that the 'filler' material consists of one piece (such as one piece of foam rubber) or more than one piece that achieves the same affect as one piece.

"5. For the purposes of items 737.26 and 737.51, 'skins' are the outer coverings or shells of those dolls or toy figures which, if imported stuffed or filled, would be classified in items 737.23, 737.28, 737.30, and 737.47, but do not contain stuffing or filling in the torso when imported.

"6. For the purposes of item 737.47, the term 'filled' includes toy figures which are not completely filled or are filled with materials such as plastic beads or crushed nutshells but which otherwise possess the characteristics of toy figures classifiable as 'stuffed'.";

(2) by redesignating items, 737.45 and 737.50 as 737.42 and 737.43, respectively; and

(3) by adding in numerical sequence the following new items:

.....	Toy figures of intimate objects, not having a spring mechanism:.	.....	.....	.....
737.47	.....	.....	.....	.....
737.49	Stuffed or filled.....	13.65 ad val.	75. ad val...	106 ad val.
737	Other 13.65 ad val	75. ad val...	106106 ad val..	
737.51	Skins for toy figures of animate or unanimated objects.	13.65 ad val.	75 ad val....	75 ad val.".

(b) APPLICATION WITH OTHER PROVISIONS.—

(1) The rates of duty in column numbered 1 for items 737.47, 737.49, and 737.51 (as added by subsection (a)(3) shall be subject to any staged rate reductions for item 737.95 which are proclaimed by the President before the 15th day after the date of the enactment of this Act.

(2) Whenver the rate of duty specified in column numbered 1 for each of such items 737.47, 737.49, and 737.51 is reduced to the same level as the corresponding rate of duty specified in the column entitled "LDDC" for such item, or to a lower rate, the rate of duty in such "LDDC" column shall be deleted.

SEC. 114. ELIMINATION OF DUTY ON CASEIN BLANKS.

(a) IN GENERAL.—Subpart A of part 7 of schedule 7 is amended—

(1) by striking out "(item 745.40)" in headnote 2(b) of such subpart and inserting in lieu thereof "in the superior heading to items 745.41 and 745.42"; and

(2) by striking out item 745.40 and inserting in lieu thereof the following:

	"Button blanks and molds, and parts of buttons:.			
745.41	Button blanks of casein ..	Free		45% ad val
745.42	Other	22.1% ad val.	11.4% ad val.	45% ad val"."

(b) APPLICATION WITH OTHER PROVISIONS.—

(1) The rate of duty in column numbered 1 for item 745.42 of the Tariff Schedules of the United States (19 U.S.C. 1202) (as added by subsection (a)(2)) shall be subject to any staged rate reductions for items 745.40 which were proclaimed by the President before the 15th day after the date of the enactment of this Act.

(2) Whenever the rate of duty specified in the column numbered 1 for such item 745.42 is reduced to the same level as the corresponding rate of duty specified in the column entitled "LDDC" for such item, or to a lower level, the rate of duty in the column entitled "LDDC" shall be deleted from such Schedules.

(3) For purposes of the Trade Act of 1974, the amendments made by this section (not including the rates of duty in column numbered 2 of such Schedules shall be considered to be trade agreement obligations entered into and proclaimed under the Trade Act of 1974 of benefit to foreign countries or instrumentalities.

SEC. 115. INCREASE IN VALUE LIMITATIONS FOR DUTY-FREE IMPORTATIONS OF PERSONAL ARTICLES BY RETURNING UNITED STATES RESIDENTS.

(a) IN GENERAL.—Subpart A of part 2 of schedule 8 is amended—

(1) by striking out "$300" in item 813.30 and inserting in lieu thereof "$400"; and

(2) by striking out "$600" and "$300" in item 813.31 and inserting in lieu thereof "$800" and "$400", respectively.

(b) AMENDMENTS TO TARIFF ACT OF 1930.—Section 321(a)(2)(A) of the Tariff Act of 1980 (19 U.S.C. 1321(a)(2)(A)) is amended by striking out "$25" and "$40" and inserting in lieu thereof "$50" and "$100", respectively.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to returning residents of the United States who arrive in the United States on or after the 15th day after the date of the enactment of this Act.

SEC. 116. MATERIALS CERTIFIED BY NASA.

(a) IN GENERAL.—Subpart A of part 3 of schedule 8 is amended—

(1) by inserting immediately after "Subpart A—United States Government" the following headnote:

"Subpart A headnote:

"1. With respect to item 837.00, the return of materials from space by the National Aeronautics and Space Administration shall not be considered an importation, and an entry of such materials shall not be required."; and

(2) by adding immediately after item 836.00 the following new item:

	"Articles for the National Aeronautics and Space Administration and articles imported to be launched into space under launch services agreements with the National Aeronautics and Space Administration:		
337.00	Materials certified by it to the Commissioner of Customs to be imported to be launched into space, spare parts, or necessary and uniquely associated support equipment for use in connection with a launch into space.	Free	Free ".

(b) TERMINATION.—Item 837.00 (as added by subsection (a)) shall not apply to articles entered, or withdrawn from warehouse for consumption, after December 31, 1994.

SEC. 117. PRAYER SHAWLS.

Part 4 schedule 8 is amended—

(1) by striking out "and 854.20," in headnote 1 to such part and inserting in lieu thereof "854.20, and 854.30,"; and

(2) by inserting after item, 854.20 the following new item:

"854.30	Pray shawls, bags for the keeping of prayer shawls, and headwear of a kind used for public or private religious observances, whether or not any of the foregoing is imported for the use of a religious institution.	Free	Free ".

SEC. 118. INCREASE IN VALUE LIMITATIONS APPLICABLE TO INFORMAL ENTRIES OF IMPORTED MERCHANDISE.

The article description immediately preceding item 869.00 is amended by striking out "$600" and inserting in lieu thereof "$1,000".

SEC. 119. CERTAIN METAL WASTE AND SCRAP.

(a) IN GENERAL.—Part 7 of schedule 8 is amended—

(1) by inserting the following new headnote immediately after headnote 2 to such part:

"3. (a) Items 870.50 and 870.55 shall not apply when the market price of copper is under 51 cents per pound.

"(b) For purposes of subparagraph (a), the market price of copper has the meaning assigned to it by headnote 5(b) of the headnotes to schedule 6, part 2, subpart C.

"(c) For purposes of subparagraph (a), the market price of copper shall be considered to be under 51 cents per pound only on and after the seventh day after the date of a report by the United States International Trade Commission to the Secretary of the

Treasury that it has determined that the market price has been under 51 cents per pound for one calendar month. After any such report, the market price shall be considered as not being under 51 cents per pound only on and after the twentieth day after the date of a report by the Commission to the Secretary that it has determined that the market price has been 51 cents or more per pound for one calendar month.

"(d) Determinations by the Commission under this headnote shall be made in the manner prescribed by headnote 5(c) to schedule 6, part 2, subpart C."; and

(2) by inserting immediately after item 870.45 the following:

		Rates of Duty		
		1-a	1-b	2
"Metal waste and scrap (provided for in part 2, schedule (6), except lead, zinc, and tungsten waste and scrap; unwrought metal including remelt scrap ingot (except copper, lead, zinc, and tungsten) in the form of pigs, ingots, or billets (a) which are defective or damaged, or have been produced from melted down metal waste and scrap for convenience in handling and transportation without sweetening, alloying, fluxing, or deliberate purifying, and (b) which cannot be commercially used without remanufacture; relaying or rerolling rails; and articles of metal (except articles of lead, of zinc, or of tungsten, and not including metal-bearing materials provided for in schedule 4 or in part 1 of schedule 6 and not including unwrought metal provided for in part 2 of schedule 6) to be used in remanufacture by melting or to be processed by shredding, shearing, compacting, or similar processing which renders them fit only for the recovery of the metal content:				
870.50	Copper waste and scrap	Free	The column 1-b rate applicable in the absence of this item.	The column 2 rate applicable in the absence of this item.
870.55	Articles of copper	Free	The column 1-b rate applicable in the absence of this item.	The column 2 rate applicable in the absence of this item.

		Rates of Duty		
		1	2	
870.60	Other	Free	Free	".

(b) CONFORMING AMENDMENT.—Headnote 5(a) to subpart C of part 2 of schedule 6 is amended by inserting "and for items 870.50 and 870.55," immediately after "In this subpart,".

(c) REPEALS.—Subpart B of part 1 of the Appendix is amended—

(1) by striking out "911.10, 911.11," in headnote 3(a) to such subpart; and

(2) by striking items 911.10, 911.11, and 911.12 and the superior heading to such items.

SEC. 120. TEMPORARY SUSPENSION OF DUTY ON CERTAIN BULK FRESH CARROTS

Subpart B of part 1 of the Appendix is amended—

(1) by striking out headnote 2 and inserting in lieu thereof the following:

"2. For purposes of item 903.25—

"(a) the term 'culled carrots' refers to those carrots which fail to meet the requirements of the United States Department of Agriculture for carrots of grades 'U.S. No. 1' or 'U.S. No. 2' (See 7 CFR sections 2851.4141 and 2851.4142); and

"(b) the total quantity of carrots which may be entered under item 903.25 during the period specified in that term shall not exceed 20,000 tons."; and

(2) by inserting in numerical sequence the following new item:

"203.25	Culled carrots, fresh or chilled in immediate containers each holding more than 100 pounds (provided for in item 135.42, part 8d. schedule 1) if entered for consumption during the period from August 15 in any year, to the 15th day of the following February inclusive.	Free	No change	On or before 12/31/84".

SEC. 121. EXTENSION OF TEMPORARY SUSPENSION OF DUTY ON CERTAIN RED PEPPERS.

Item 903.60 of subpart B of part 1 of the Appendix is amended by striking out "6/30/81" and inserting in lieu thereof "6/30/85".

SEC. 122. TEMPORARY SUSPENSION OF DUTY ON CANTALOPES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"903.65	Cantaloupes, fresh, if entered during the period from January 1 to May 15, inclusive of any year (provided for in items 148.12 and 145.17 part 9B, schedule 1).	Free	No change	On or before 5/15/85".

SEC. 123. TEMPORARY SUSPENSION OF DUTY ON CAROB FLOUR.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"903.69	Carob flour (provided for in item 152.05 part 9C schedule 1).	Free	No change	On or before 12/31/84."

SEC. 124. TEMPORARY SUSPENSION OF DUTY ON HATTERS' FUR.

Subpart B of part 1 if the Appendix is amended by inserting in numerical sequence the following new item:

"903.55	Fur not on the skin prepared for hatters' use (provided for in item 156.20).	Free	No change	On or before 12/31/85".

SEC. 125. EXTENSION OF TEMPORARY SUSPENSION OF DUTY ON WOOD EXCELSIOR.

Item 904.00 of the Appendix is amended by striking out "6/30/81" and inserting in lieu thereof "6/30/83"

SEC. 126. TEMPORARY SUSPENSION OF DUTY ON NEEDLECRAFT DISPLAY MODELS.

Subpart B of part 1 of the Appendix is amended as follows:

(1) The headnotes to such subpart are amended by adding at the end thereof the following new headnote:

"5. For the purposes of the superior heading to items 906.10 and 906.12, the term 'mass-produced kits' includes only those which are designed to be sold in the customs territory of the United States exclusively in kit form.".

(2) The following new superior heading and new items are inserted in numerical sequence:

"906.10	Needle-craft display models, Primarily hand stitched of completed mass-produced ties. Articles provided for in items 356.15, 360.70, 360.75, 364.15, 364.23, 364.30, 365.78, 365.84 365.56, 366.79, 367.84, 367.56, 367.60, 366.04, 356.06, 386.09, 388.50, 388.40, and 389.60 of schedule 3 (except shoe uppers and tents).	Free	No change	On or before 6/30/85
906.10	Aprons and baby bibs (provided for in items 383.03, 383.08, 383.20, and 383.50 of schedule 3).	Free	No change	On or before 6/30/85.".

SEC. 127. TEMPORARY SUSPENSION OF DUTY ON P-HYDROXYBENZOIC ACID.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.00	P-Hydroxybenzoic Acid (provided for in item 404.44, part 1, schedule 4).	Free	No change	On or before 9/30/85.".

SEC. 128. TEMPORARY SUSPENSION OF DUTY ON TRIPHENYL PHOSPHATE

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.01	Triphenyl phosphate (provided for in item 404.48, part 18, schedule 4).	Free	No change	On or before 9/30/85.".

SEC. 129. EXTENSION OF TEMPORARY SUSPENSION OF DUTY ON BIS (4-AMINOBENZOATE)-1,3 PROPANEDIOL (TRIMETHYLENE GLYCOL DI-P-AMINOBENZOATE).

Item 907.05 of the Appendix is amended—

(1) by striking out "however provided for in items 402.36 through 406.63" and inserting in lieu thereof "provided for in item 405.07"; and

(2) by striking out "6/30/83" and inserting in lieu thereof "6/30/84".

SEC. 130. TEMPORARY SUSPENSION OF DUTY ON 4-METHYLPHENOL.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.08	+chioro-3-methyipaenoi 50–60–7) (provided for in item 403.66. part 1B. schedule 4).	Free	No change	On or before 6/30-84. "

SEC. 131. EXTENSION OF TEMPORARY SUSPENSION OF DUTY ON CERTAIN PHOTOGRAPHIC COUPLERS.

Items 907.10 and 907.12 of the Appendix are amended by striking out "6/30/82" and inserting in lieu thereof "9/30/85".

SEC. 132 TEMPORARTY SUSPENSION OF DUTY ON ETHYLBIPHENYL.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"901.4	Mixtures of 3-ethylbiphenyl (methyibiphenyl) and 4-ethyibiphenyl (P-ethyibiphenyl) (provided for in item 407.16 per 1B, schedule 4).	Free	no change	on or before 6/30/85.".

SEC. 133. TEMPORARY REDUCTION OF DUTY ON DICOFOL.

(a) IN GENERAL.—Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.15	1,1-Bis (4-Chlorophenyl)-2,2,2-trichloroethanol (Dcofol) (provided for in item 408.28, part 1C, schedule 4).	10.3% ad val.	7¢ per lb.— 41% ad val.	On or before 9/30/85.".

(b) PHASE-DOWN OF TEMPORARY RATE.—Effective with respect to articles provided for in item 907.15 (as added by subsection (a)) that are entered, or withdrawn from warehouse for consumption, on and after each of the dates set forth below, column 1 for such item is amended by striking out the rate of duty in effect on the day before such date and inserting in lieu thereof the rate of duty appearing below next to each such date:

Date:	*Rate of duty*
January 1, 1984	*9.5% ad val.*
January 1, 1985	*8.6% ad val.*

(c) SPECIAL RATE FOR LEAST DEVELOPED DEVELOPING COUNTRIES.—The rate of duty on an article provided for in such item 907.15 that is—

(1) entered, or withdrawn from warehouse for consumption on or after the effective date of the amendment made by subsection (a) and before October 1, 1985; and

(2) a product of a least developed developing country;

shall be 6.9 percent ad valorem.

(d) RADIOACTIVE PROVISION.—In the case of the application of the amendments made by this section to any full measure entry—

(1) which was made before the 15th day after the date of the enactment of this Act;

(2) which was unliquidated, or the liquidation of which was not final, on such day; and

(3) with respect to which there would have been less duty if the amendments made by this section applied to such entry;

such entry shall be liquidated as though such entry had been made on such 15th day.

SEC. 134. TEMPORARY SUSPENSION OF DUTY ON UNCOMPOUNDED ALLYL RESINS.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.16	Allyi resins, uncompounded (provided for in item 408.96, per IC schedule 4).	Free	No charge	On or before 9/30/84.".

SEC. 135. TEMPORARY SUSPENSION OF DUTY ON SULFAPYRIDINE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.17	Sulfapyridine (provided for in item 411.28, part 1C, schedule 4).	Free	Free	On or before 12/31/85.".

SEC. 136. TEMPORARY REDUCTION OF DUTY ON SULFATHIAZOLE.

(a) Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.19	Sulfathiazole (provided for in item 411.80.	13.3% ad val.	7¢ per lb. + 80% ad val.	On or before 12/31/83.

(b) During such time as item 907.22 (as added by subsection (a)) is in effect, the rate of duty on sulfathiazole that is a product of a least developed developing country shall be 8 percent ad valorem.

(c) (1) With respect to articles entered after December 31, 1983, and before January 1, 1985, item 907.22 is amended by striking out "13.3% ad val." and inserting in lieu thereof "11.9% ad val.", and by striking out "12/31/83" and inserting in lieu thereof "12/31/84".

(2) With respect to articles entered after December 31, 1984, and before January 1, 1986, item 907.22 is amended by striking out "11.9% ad val." and inserting in lieu thereof "10.6% ad val.", and by striking out "12/31/84" and inserting in lieu thereof "12/31/85".

SEC. 137. EXTENSION OF TEMPORARY SUSPENSION OF DUTY ON DOXORUBICIN HYDROCHLORIDE.

Item 907.20 of the Appendix is amended by striking out "6/30/82" and inserting in lieu thereof "6/30/88".

SEC. 138. TEMPORARY REDUCTION OF DUTY OF CAFFEINE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"907.22	Caffeine (provided for in item 437.02, part 38, schedule 4).	6% ad val.	No change	On or before 12/31/83.

SEC. 139. TEMPORARY SUSPENSION OF DUTY ON TARTARIC ACID AND CERTAIN TARTARIC CHEMICALS.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following items:

"907.68	Tararic acid (provided for in item 425.94, par. 2D, schedule 4).	Free	No change	On or before 6/30/84.
907.68	Potassium salts: Antimony narrate (tartar emetic) (provided for in item 426.72, par. 2D, schedule 4).	Free	No change	On or before 6/30/84.
907.68	Cream of tartar (provided for in item 428.78, part 2D, schedule 4).	Free	No change	On or before 6/30/84.
907.69	Sodium tartmate (Rochelle salts) (provided for in item 426.52, part 2D, schedule 4).	Free	No change	On or before 6/30/84.".

SEC. 140. EXTENSION OF TEMPORARY SUSPENSION OF DUTY ON NATURAL GRAPHITE.

Item 909.01 of the Appendix is amended by striking out "6/30/81" and inserting in lieu thereof "12/31/84".

SEC. 141. TEMPORARY SUSPENSION OF DUTY ON COPPER SCALE.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"911.05	Copper scale (provided for in item 603.70, part 1, schedule 6).	Free	No change	On or before 12/31/85.".

SEC. 142. CHIPPER KNIFE STEEL.

Item 911.29 is amended—

(1) effective with respect to articles entered on or after October 1, 1982, and before January 1, 1983, by striking out "4.6% ad val." and inserting in lieu thereof "4.4% ad val.", and by striking out "9/30/82" and inserting in lieu thereof "12/31/82";

(2) effective with respect to articles entered after December 31, 1982, and before January 1, 1984, by striking out "4.4% ad val." and inserting in lieu thereof "4.2% ad val.", and by striking out "12/31/82" and inserting in lieu thereof "12/31/82";

(3) effective with respect to articles entered after December 31, 1983, and before January 1, 1985, by striking out "4.2% ad val." and inserting in lieu thereof "4.0% ad val.", and by striking out "12/31/83" and inserting in lieu thereof "12/31/84"; and

(4) effective with respect to articles entered after December 31, 1984, and before April 1, 1985, by striking out "4.0% ad val." and inserting in lieu thereof "3.9% ad val.", and by striking out "12/31/84" and inserting in lieu thereof "3/31/85";

SEC. 143. TEMPORARY SUSPENSION OF DUTY ON CERTAIN FREIGHT CONTAINERS.

Subpart B of part I of the Appendix is amended by inserting in numerical sequence the following new item:

"911.80	Frieght containers specially designed and equipped to facilitate the carriage of goods by one or more modes of transport without intermediate reloading, each having a gross mass range of at least 40,000 pounds provided for in item 640.80, part 3A schedule 6).	Free	No change	On or before 12/31/86.".

SEC. 144. EXTENSION OF TEMPORARY SUSPENSION OF DUTY ON COBALT.

Item 911.90 of the Appendix is amended by striking out "6/30/82" and inserting in lieu thereof "6/30/83".

SEC. 145. TEMPORARY SUSPENSION OF DUTY ON CERTAIN CLOCK RADIOS.

Subpart B of part 1 of the Appendix is amended—

(1) by adding at the end of the headnotes to such subpart the following new headnote:

"6. For the purposes of item 911.95, the term 'entertainment broadcast band receivers' means receivers designed principally to receive signals in the AM (530-1710 KHz) and FM (88-108 MHz) entertainment broadcast bands, whether or not capable of receiving signals on other bands such as aviation, television, marine, public safety, industrial, and citizens bands."; and

(2) by inserting in numerical sequence the following new item:

"911.95	Entertainment broadcast band receivers valued not over $40 each (however provided for in schedule 6), incorporating timekeeping or time display devices, not in combination with any other article, and not designed for motor vehicle installation.	Free	No change	On or before 9/30/84.".

SEC. 146. EXTENSION OF TEMPORARY SUSPENSION OF DUTY ON BICYCLE PARTS.

(a) Generator lighting sets: Item 912.05 of the Appendix is amended by striking out "6/30/83" and inserting in lieu thereof "6/30/86".

(b) Other parts.—Item 912.10 of the Appendix is amended—

(1) by deleting "click stick levers," and inserting in lieu thereof "trigger and twist grip controls for three-speed hubs,";

(2) by inserting "including cable or inner wire for caliper brakes and casing therefor, whether or not cut to length," immediately after "parts of all the foregoing,"; and

(3) by striking out "6/30/83" and inserting in lieu thereof "6/30/86".

SEC. 147. TEMPORARY SUSPENSION OF DUTY ON HEAT-SET, STRETCH TEXTURING MACHINES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.07	Machines designed for heat-set, stretch texturing of continuous man-made fibers (provided for in item 670.06, part 4E, schedule 6).	Free	No change	On or before 12/31/85."

SEC. 148. TEMPORARY SUSPENSION OF DUTY ON HOSIERY KNITTING MACHINES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.08	Single cylinder fine gauge hosiery knitting machines and double cylinder jacquard hosiery knitting machines (provided for in items 670.16 and 670.18, part 4E, schedule 6).	Free	No change	On or before 9/30/85."

SEC. 149. TEMPORARY SUSPENSION OF DUTY ON DOUBLE-HEADED LATCH NEEDLES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.09	Double-headed latch needles (provided for in item 670.58, part 4E, schedule 6).	Free	No change	On or before 6/30/85."

SEC. 150. TEMPORARY SUSPENSION OF DUTY ON PROSTHESES.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.15	Externally-powered electric prosthetic devices for amputees (provided for in item 709.57, part 2B, schedule 7), and parts thereof.	Free	No change	On or before 9/30/84."

SEC. 151. TEMPORARY SUSPENSION OF DUTY ON SMALL TOYS.

Subpart B of part 1 of the Appendix is amended by inserting in numerical sequence the following new item:

"912.20	Articles provided for in parts 6D and 6E of schedule 7 (except ballons, marbels, dice, and diecast vehicles), valued not over five cents per unit; and jewelry provided for in part 8A of schedule 7 (except parts), valued not over 1.5 cents per piece.	Free	No change	On or before 12/31/86.".

SEC. 152. TEMPORARY SUSPENSION OF DUTY ON CERTAIN DOLLS AND TOY FIGURES.

Subpart B of part 1 of the Appendix is amended by inserting at the end thereof the following new items:

"912.30	Stuffed dolls (with or without clothing) and doll skins for stuffed dolls (provided for respectively in items 737.21, 737.23 and 737.26, part 6E, schedule 7).	Free	No change	On or before 12/31/86
"912.34	Stuffed or filled toy figures of inanimate objects not having a spring mechanism (provided for in item 737.47, part 6E, schedule 7).	Free	No change	On or before 12/31/86
"912.36	Skins for stuffed toy figures of animate and inanimate objects (provided for in item 737.61, part 6E, schedule 7).	Free	No change	On or before 12/31/86.".

SEC. 153. 2-YEAR EXTENSION OF THE INTERNATIONAL SUGAR AGREEMENT.

Section 2 of the Act entitled "An Act providing for the implementation of the International Sugar Agreement, 1977, and for other purposes" (Public Law 96-236; 7 U.S.C. 3602) is amended by striking out "1983" and inserting in lieu thereof "1985".

SEC. 154. 1-YEAR EXTENSION OF THE INTERNATIONAL COFFEE AGREEMENT.

Section 2 of the International Coffee Agreement Act of 1980 (19 U.S.C. 1356k) is amended by striking out "the expiration of this joint resolution" and inserting in lieu thereof "October 1, 1983",

SEC. 551. UPLAND COTTON.

Section 103(f)(3) of the Agriculture Act of 1949 (7 U.S.C. 1444(f)(3)) shall be effective for the 1982 through 1985 crops of upland cotton amended to read as follows:

"(3) Notwithstanding any other provision of law, any upland cotton described in items 955.01 through 955.03 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) imported into the United States during the period of time when a special quota established under this subsection is in effect shall be deemed to be an import under such special quota until the special quota is filled and any such cotton shall be free of duty.".

SEC. 156. EFFECTIVE DATES.

(a) IN GENERAL.—Except as provided in subsection (b) and sections 109, 115, and 133. The amendments made by this subtitle shall apply to articles entered on or after the 15th day after the date of the enactment of this Act.

(b) RETROACTIVE APPLICATION.—

(1) IN GENERAL.—Notwithstanding section 514 of the Tariff Act of 1930 or any other provision of law, upon proper request filed with the customs officer concerned on or before the 90th day after the date of the enactment of this Act, the application of the amendments made by this Act to the entry of any article described in paragraph (2) shall be treated as provided in such paragraph.

(2) APPLICABLE SECTIONS.—In the case of the application of the amendment made by section 102, 107, 108, 119, 121, 125, 131, 137, 139, 140, 142, or 144 to any entry—

(A) which was made after the applicable date and before the 15th day after the date of the enactment of this Act; and

(B) with respect which there would have been do duty or a lesser duty if the amendment made by such section applied to such entry;

such entry shall be liquidated or reliquidated as though such entry had been made on the 15th day after the date of the enactment of this Act.

(3) APPLICABLE DATE.—For purposes of paragraph (2), the term "applicable date" means—

(A) in the case of section 139, June 30, 1980;

(B) in the case of section 102, March 31, 1981;

(C) in the case of sections 107, 119, 121, 125, and 140, June 30, 1981;

(D) in the case of section 108, December 31, 1981;

(E) in the case of sections 131, 137, and 144, June 30, 1982; and

(F) in the case of section 142, September 30, 1982.

Definitions. For purposes of this subtitle—

(1) the term "entered" means entered, or withdrawn from warehouse for consumption, in the customs territory of the United States; and

(2) the term "entry" includes any withdrawal from warehouse for consumption.

SUBTITLE B—IMPLEMENTATION OF NAIROBI PROTOCOL

SEC. 161. SHORT TITLE, ETC.

(a) SHORT TITLE.—This subtitle may be cited as the "Educational, Scientific, and Cultural Materials Importation Act of 1982".

(b) PURPOSE.—The purpose of this subtitle is to enable the United States to give effect to the Nairobi Protocol to the Florence Agreement on the Importation of Educational, Scientific, and Cultural Materials (opened for signature on March 1, 1977) with a view to contributing to the cause of peace through freer exchange of ideas and knowledge across national boundaries.

SEC. 162. BOOKS, PUBLICATIONS, AND DOCUMENTS.

Part 5 of schedule 2 is amended—

(1) by inserting, in numerical sequence, the following new item:

"270.90	Catalogs of films, recordings or other visual and auditory material of an educational, scientific, or cultural character.	Free	Free.".

(2) by striking out items 273.45 through 273.55, and the superior heading thereto, and inserting in lieu thereof the following:

"273.52	Architectural, engineering, industrial, or commercial drawings of plans, whether originals or reproductions.	Free	Free.".

and

(3) by inserting immediately below the phrase "Printed not over 20 years at time of importation:" and above (and at the same hierarchical level as) "Lithographs on paper:" the following new item:

"274.55	Loose illustrations, reproduction proofs or reproduction films used for the production of books.	Free	Free.".

SEC. 163. VISUAL AND AUDITORY MATERIALS.

(a) PHOTOGRAPHIC FILM.—Part 5 of schedule 2 is amended—

(1) by inserting the phrase "(including developed photographic film; photographic slides; transparencies; holograms for laser projection; and microfilm, microfiche, and similar articles)" immediately after "Photographs" in the superior heading to items 274.50 through 274.70, and

(2) by adding, in numerical sequence, the following new item:

"274.57	Developed photographic film; photograph slides; transparencies; holograms for laser projection; and microfilm, microfiche, and similar articles.	Free	Free."

(b) MOTION PICTURE FILMS.—Subpart G of part 2 of schedule 7 is amended—

(1) by striking out "724.05 and 724.10" in headnote 1 and inserting in lieu thereof "724.07 and 724.22",

(2) by striking out headnote 2,

(3) by striking out items 724.05 and 724.10, and the superior heading thereto, and inserting in lieu thereof the following:

"724.07	Motion-picture films in any form on which pictures, or sound and pictures, have been recorded, whether or not developed.	Free	Free."

(4) by striking out items 724.15 through 724.40 and inserting in lieu thereof the following new item:

"724.22	Sound recordings, combination sound and visual recordings, and magnetic recordings, not provided for in the foregoing provisons of ths subpart.	Free	Free".

and

(5) by striking out the rates of duty appearing in rate columns 1, LDDC, and 2 for item 724.12 and inserting "Free" in rate columns numberd 1 and 2.

(c) PATTERNS, MODELS, ETC.—Part 7 of schedule 8 is amended—

(1) by striking out headnote 1 and redesignation headnote 2 as headnote 1,

(2) by striking out item 870.30, and

(3) by inserting, in numerical sequence, the following new item:

"870.35	Patterns models (except toy models) and wall charts of an educational, scientific or cultural character, mock-up or visualizations of abstract concepts such as molecular structures or mathematical formulae; materials for programed instruction; and kits containing printed material, and audio materials and visual materials or any combination of two or more of the foregoing.	Free	Free.

SEC. 164. TOOLS FOR SCIENTIFIC INSTRUMENTS OR APPARATUS

Part 4 of schedule 8 is amended by adding in numercal sequence, the following new item:

"851.67	Tools specially designed to be used for the maintenance, checking, gauging or repair of instruments or apparatus.	Free	Free"

SEC. 165. ARTICLES FOR THE BLIND OR OTHER HANDCAPPED PERSONS.

(a) ELIMINATION OF DUTY.—Subpart D of part 2 of schedule 8 is amended by striking out items 825.00, 826.10 and 826.20.

(b) SPECIALLY DESIGNED ARTICLES.—Part 7 of schedule 8 is amended—

(1) by inserting, in numerical sequence, the following new items:

	Articles specially designed or adapted for the use or benefit of the blind or other physically or mentally handicapped persons:.		
	Articles for the blind:		
870.50	Books, music, and pamphlets, in raised print, used exclusively by or for them.	Free	Free
870.55	Braille tablets, cubarithms, and special apparatus, machines, presses, and types for their use or benefit exclusively.	Free	Free
870.60	Other	Free	Free";

and

(2) by adding the following new headnote:

"2. For the purposes of items 870.50, 870.55, and 870.60—

"(a) The term 'physically or mentally handicapped persons' includes any person suffering from a permanent or chronic physical or mental impairment which substantially limits one or more major life activities, such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

"(b) These items do not cover—

"(i) articles for acute or transient disability;

"(ii) spectacles, dentures, and cosmetic articles for individuals not substantially disabled;

"(iii) therapeutic and diagnostic articles; or

"(iv) medicine or drugs.".

(c) STATISTICAL INFORMATION.—The Secretary of the Treasury, in conjunction with the Secretary of Commerce, shall take such actions as are necessary to obtain adequate statistical information with respect to articles to which the amendments made by this section apply.

SEC. 166. AUTHORITY TO LIMIT CERTAIN DUTY-FREE TREATMENT ACCORDED UNDER THIS ACT.

(a) AUTHORITY TO LIMIT.—

(1) IN GENERAL.—In addition to any authority under section 201 of the Trade Act of 1974 (19 U.S.C. 2251), the President may proclaim changes in the Tariff Schedules of the United States (19 U.S.C. 1202) to narrow the scope of, or place conditions upon, the duty-free treatment accorded under section 164, section 165, or section 167(b) (insofar as section 167(b) relates to temporary duty-free treatment of articles covered by sections 164 and 165) with respect to any type of article the duty-free treatment of which—

(A) has significant adverse impact on a domestic industry (or portion thereof) manufacturing or producing a like or directly competitive article, and

(B) is not provided for in the Florence Agreement or the Nairobi Protocol.

"(2) RATES WHICH ARE TO TAKE EFFECT IF DUTY-FREE TREATMENT ELIMINATED.—If the President eliminates any duty-free treatment under paragraph (1), the rate of duty thereafter applicable to any article which is—

(A) affected by such action, and

(B) imported from any source,

shall be the rate proclaimed by the President as the rate applicable to such article from such source (determined without regard to this subtitle).

(b) RESTORATION OF TREATMENT.—If the President determines that any duty-free treatment which is no longer in effect because of action taken under subsection (a) could be restored in whole or in part without a resumption of significant adverse impact on a domestic industry or portion thereof, the President may proclaim changes to the Appendix to the Tariff Schedules of the United States to resume such duty-free treatment.

(c) OPPORTUNITY TO PRESENT VIEWS.—Before taking an action authorized by subsection (a) or (b), the President shall afford an opportunity for interested Government agencies and private persons to present their views concerning the proposed action.

SEC. 167. EFFECTIVE DATE; TEMPORARY DUTY-FREE TREATMENT.

(a) IN GENERAL.—The amendments made by sections 162, 163, 164, and 165 shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the date which the President proclaims as the date on which he ratifies the Nairobi Protocol to the Florence Agreement on the Importation of Educational, Scientific, and Cultural Materials.

(b) TEMPORARY DUTY-FREE TREATMENT.—

(1) ARTICLES FOR THE BLIND OR OTHER HANDICAPPED PERSONS.—Subject to the provisions of paragraph (3) and section 166, the President shall proclaim changes to the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) to implement the provisions of section 165 with respect to articles entered, or withdrawn from warehouse for consumption, during the two and one-half-year period beginning on the thirtieth day following the date of the enactment of this subtitle.

(2) OTHER ARTICLES.—Subject to the provisions of paragraph (3) and section 166, the President, if he deems such action to be in the interest of the United States, may proclaim further changes to the Appendix to the Tariff Schedules of the United States to implement any provision of section 162, 163; or 164 with respect to articles entered, or withdrawn from warehouse for consumption, during any period beginning on or after the thirtieth day following the date of the enactment of this subtitle and ending not later than two and one-half years after such beginning date.

(3) TIME PROVISIONS CEASE TO HAVE EFFECT.—If any temporary duty-free treatment accorded under paragraph (1) or (2) has not yet expired, such treatment shall cease to be effective on and after the date proclaimed by the President pursuant to subsection (a).

TITLE II—MISCELLANEOUS CUSTOMS PROVISIONS

SEC. 201. INTERNATIONAL TRANSMISSION OF BUSINESS DOCUMENTS; IMPORTERS OF RECORD.

(a) General headnote 5 is amended—

(1) by striking out "and" at the end of subdivisin (d);

(2) by redesignating subdivision (e) as subdivision (f); and

(3) by adding immediately after subdivision (d) the following:

"(e) records, diagrams, and other data with regard to any business, engineering, or exploration operation whether on paper, cards, photographs, blueprints, tapes, or other media; and".

(b) Item 870.10 is repealed.

(c) Section 483 of the Tariff Act of 1930 (19 U.S.C. 1483) is repealed.

(d) Section 484 of the Tariff Act of 1930 (19 U.S.C. 1484) is amended—

(1) by amending subsection (a)—

(A) by amending that part of paragraph (1) thereof which precedes subparagraph (A) to read as follows: "Except as provided in sections 490, 498, 552, 553, and 336(j) of this Act and in subsections (h) and (i) of this section, one of the parties qualifying as 'importer of record' under paragraph (2)(C) of this subsection, either in person or by an agent authorized by him in writing—",

(B) by redesignating paragraph (2)(C) as paragraph (2)(D), and by inserting immediately after paragraph (2)(B) the following:

"(C) When an entry of merchandise is made under this section, the required documentation shall be filed either by the owner or purchaser of the merchandise or, when appropriately designated by the owner, purchaser, or consignee of the merchandise, a person holding a valid license under section 641 of this Act. When a consignee declares on entry that he is the owner or purchaser of merchandise, the appropriate customs officer may, without liability, accept the declaration. For the purposes of this title, the importer of record must be one of the parties who is eligible to file the documentation required by this section.", and

(C) by striking out "consignees" in paragraph (2)(D) (as redesignated by subparagraph (B)) and inserting in lieu thereof "importers of record";

(2) by striking out "consignee" in subsections (c) and (d) and inserting in lieu thereof "importer of record"; and

(3) by amending subsections (h) and (i) to read as follows:

"(h) The carrier bringing the merchandise into the port at which entry is to be made may certify any person to be the owner, purchaser, or consignee of the merchandise, and that person may be accepted as such by the appropriate customs officer. A carrier shall not certify a person pursuant to this subsection unless it has actual knowledge of or reason to believe in the accuracy of such certification.

"(i) For the purposes of this section, the appropriate customs officer may accept a duplicate bill of lading signed or certified to be genuine by the carrier bringing the merchandise to the port at which entry is to be made.".

(e) Sections 485, 487, 494, and 505(a) of the Tariff Act of 1930 (19 U.S.C. 1485, 1487, 1494, and 1505(a)) are each amended by striking out "consignee" wherever it appears and inserting in lieu thereof "importer of record".

(f) Section 557 of the Tariff Act of 1930 (19 U.S.C. 1557) is amended—

(1) by inserting "purchaser" immediately after "owner" in the first sentence of subection (a); and

(2) by striking out "consignee" in subsection (d) and substituting in lieu thereof "importer of record".

(g) The amendments made by this section shall apply with respect to merchandise entered on and after the 30th day after the date of the enactment of this Act.

SEC. 202. DELIVERY INTO SUCCESSIVE BONDED WAREHOUSES REGARDLESS OF LOCATION.

The first sentence of the eighth paragraph of section 311 of the Tariff Act of 1930 (19 U.S.C. 1311) is amended by striking out "at an exterior port" and "immediate".

TITLE III—IMPLEMENTATION OF CONVENTION ON CULTURAL PROPERTY

SEC. 301. SHORT TITLE.

This title may be cited as the "Convention on Cultural Property Implementation Act".

SEC. 302. DEFINITIONS.

For purposes of this title—

(1) The term "agreement" includes any amendment to, or extension of, any agreement under this title that enters into force with respect to the United States.

(2) The term "archaeological or ethnological material of the State Party" means—

(A) any object of archaeological interest;

(B) any object of ethnological interest; or

(C) any fragment or part of any object referred to in subparagraph (A) or (B);

which was first discovered within, and is subject to export control by, the State Party. For purposes of this paragraph—

(i) no object may be considered to be an object of archaeological interest unless such object—

(I) is of cultural significance;

(II) is at least two hundred and fifty years old, and

(III) was normally discovered as a result of scientific excavation, clandestine or accidental digging, or exploration on land or under water; and

(ii) no object may be considered to be an object of ethnological interest unless such object is—

(I) the product of a tribal or nonindustrial society, and

(II) important to the cultural heritage of a people because of its distinctive characteristics, comparative rarity, or its contribution to the knowledge of the origins, development, or history of that people.

(3) The term "Committee" means the Cultural Property Advisory Committee established under section 206.

(4) The term "consignee" means a consignee as defined in section 488 of the Tariff Act of 1930 (19 U.S.C. 1488).

(5) The term "Convention" means the Convention on the means of prohibiting and preventing the illicit import, export, and transfer of ownership of cultural property adopted by the General Conference of the United Nations Educational, Scientific, and Cultural Organization at its sixteenth session.

(6) The term "cultural property" includes articles described in article 1(c) through (k) of the Convention whether or not any such article is specifically designated as such by any State Party for the purposes of such article.

(7) The term "designated archaeological or ethnological material" means any archaeological or ethnological material of the State Party which—

(A) is—

(i) covered by an agreement under this title that enters into force with respect to the United States, or

(ii) subject to emergency action under section 304, and

(B) is listed by regulation under section 305.

(8) The term "Secretary" means the Secretary of the Treasury or his delegate.

(9) The term "State Party" means any nation which has ratified, accepted, or acceded to the Convention.

(10) The term "United States" includes the several States, the District of Columbia, and any territory or area the foreign relations for which the United States is responsible.

(11) The term "United States citizen" means—

(A) any individual who is a citizen or national of the United States;

(B) any corporation, partnership, association, or other legal entity organized or existing under the laws of the United States or any State; or

(C) any department, agency, or entity of the Federal Government or of any government of any State.

SEC. 303. AGREEMENTS TO IMPLEMENT ARTICLE 9 OF THE CONVENTION

(a) AGREEMENT AUTHORITY.—

(1) IN GENERAL.—If the President determines, after request is made to the United States under article 9 of the Convention by any State Party—

(A) that the cultural patrimony of the State Party is in jeopardy from the pillage of archaeological or ethnological materials of the State Party;

(B) that the State Party has taken measures consistent with the Convention to protect its cultural patrimony;

(C) that—

(i) the application of the import restrictions set forth in section 307 with respect to archaeological or ethnological material of the State Party, if applied in concert with similar restrictions implemented, or to be implemented within a reasonable period of time, by those nations (whether or not State Parties) individually having a significant import trade in such material, would be of substantial benefit in deterring a serious situation of pillage, and

(ii) remedies less drastic than the application of the restrictions set forth in such section are not available; and

(D) that the application of the import restrictions set forth in section 307 in the particular circumstances is consistent with the general interest of the international community in the interchange of cultural property among nations for scentific, cultural, and educational purposes;

The President may, subject to the provisions of this title, take the actions described in paragraph (2).

(2) AUTHORITY OF PRESIDENT.—For purposes of paragraph (1), the President may enter into—

(A) a bilateral agreement with the State Party to apply the import restrictions set forth in section 307 to the archaeological or ethnological material of the State Party the pillage of which is creating the jeopardy to the cultural patrimony of the State Party found to exist under paragraph (1)(A); or

(B) a multilateral agreement with the State Party and with one or more other nations (whether or not a State Party) under which the United States will apply such restrictions, and the other nations will apply similar restrictions, with respect to such material.

(3) REQUESTS.—A request made to the United States under article 9 of the Convention by a State Party must be accompanied by a written statement of the facts known to the State Party that relate to those matters with respect to which determinations must be made under subparagraphs (A) through (D) of paragraph (1).

(4) IMPLEMETATION.—In implementing this subsection, the President should endeavor to obtain the commitment of the State Party concerned to permit the exhange of its archaeological and ethnological materials under circumstances in which such exchange does not jeopardize its cultural patrimony.

(b) EFFECTIVE PERIOD.—The President may not enter into any agreement under subsection (a) which has an effective period beyond the close of the five-year period beginning on the date on which such agreement enters into force with respect to the United States.

(c) RESTRICTIONS ON ENTERING INTO AGREEMENTS.—

(1) IN GENERAL.—The President may not enter into a bilateral or multilateral agreement authorized by subsection (a) unless the application of the import restrictions set forth in section 307 with respect to archaeological or ethnological material of the State Party making a request to the United States under article 9 of the Convention will be applied in concert with similar restrictions implemented; or to be implemented, by those nations (whether or not State Parties) individually having a significant import trade in such material.

(2) EXCEPTION TO RESTRICTIONS.—Notwithstanding paragraph (1), the President may enter into an agreement if he determines that a nation individually having a significant import trade in such material is not implementing, or is not likely to implement, similar restrictions, but—

(A) such restrictions are not essential to deter a serious situation of pillage, and

(B) the application of the import restrictions set forth in section 307 in concert with similar restrictions implemented, or to be implemented, by other nations (whether or not State Parties) individually having a significant import trade in such material would be of substantial benefit in determining a serious situation of pillage.

(d) SUSPENSION OF IMPORT RESTRICTIONS UNDER AGREEMENTS.—If, after an agreement enters into force with respect to the United States, the President determines that a number of parties to the agreement (other than parties described in subsection (c)(2)) having significant import trade in the archaeological and ethnological material covered by the agreement—

(1) have not implemented within a reasonable period of time import restrictions that are similar to those set forth in section 307, or

(2) are not implementing such restrictions satisfactorily with the result that no substantial benefit in deterring a serious situation of pillage in the State Party concerned is being obtained,

the President shall suspend the implementation of the import restrictions under section 307 until such time as the nations take appropriate corrective action.

(e) EXTENSION OF AGREEMENTS.—The President may extend any agreement that enters into force with respect to the United States for additional periods of not more than five years each if the President determines that—

(1) the factors referred to in subsection (a)(1) which justified the entering into of the agreement still pertain, and

(2) no cause for suspension under subsection (d) exists.

(f) PROCEDURES.—If any request described in subsection (a) is made by a State Party, or if the President proposes to extend any agreement under subsection (e), the President shall—

(1) publish notification of the request or proposal in the Federal Register;

(2) submit to the Committee such information regarding the request or proposal (including, if applicable, information from the State Party with respect to the implementation of emergency action under section 304) as is appropriate to enable the Committee to carry out its duties under section 306(f); and

(3) consider, in taking action on the request or proposal, the views and recommendations contained in any Committee report—

(A) required under section 306(j) (1) or (2), and

(B) submitted to the President before the close of the one-hundred-and-fifty-day period beginning on the day on which the President submitted information on the request or proposal to the Committee under paragraph (2).

(g) INFORMATION ON PRESIDENTIAL ACTION—

(1) IN GENERAL.—In any case in which the President—

(A) enters into or extends an agreement pursuant to subsection (a) or (e), or

((B) applies import restrictions under section 204,

the President shall, promptly after taking such action, submit a report to the Congress.

(2) REPORT.—The report under paragraph (1) shall contain—

(A) a description of such action (including the text of any agreement entered into),

(B) the differences (if any) between such action and the views and recommendations contained in any Committee report which the President was required to consider, and

(C) the reasons for any such difference.

(3) INFORMATION RELATING TO COMMITTEE RECOMMENDATIONS.—If any Committee report required to be considered by the President recommends that an agreement be entered into, but no such agreement is entered into, the President shall submit to the Congress a report which contains the reasons why such agreement was not entered into.

SEC. 304. EMERGENCY IMPLEMENTATION OF IMPORT RESTRICTIONS.

(a) EMERGENCY CONDITION DEFINED.—For purposes of this section, the term "emergency condition" means, with respect to any archaeological or ethnological material of any State Party, that such material is—

(1) a newly discovered type of material which is of importance for the understanding of the history of mankind and is in jeopardy from pillage, dismantling, dispersal, or fragmentation;

(2) identifiable as coming from any site recognized to be of high cultural significance if such site is in jeopardy from pillage, dismantling, dispersal, or fragmentation which is, or threatens to be, of crisis proportions; or

(3) a part of the remains of a particular culture or civilization, the record of which is in jeopardy from pillage, dismantling, dispersal, or fragmentation which is, or threatens to be of crisis proportions;

and application of the import restrictions set forth in section 307 on a temporary basis would, in whole or in part, reduce the incentive for such pillage, dismantling, dispersal or fragmentation.

(b) PRESIDENTIAL ACTION.—Subject to subsection (c), if the President determines that an emergency condition applies with respect to any archaeological or ethnological material of any State Party, the President may apply the import restrictions set forth in section 307 with respect to such material.

(c) LIMITATIONS.—

(1) The President may not implement this section with respect to the archaeological or ethnological materials of any State Party unless the State Party has made a request described in section 303(a) to the United States and had supplied information which supports a determination that an emergency condition exists.

(2) In taking action under subsection (b) with respect to any State Party, the President shall consider the views and recommendations contained in the Committee report required under section 306(f)(3) if the report is submitted to the President before the close of the ninety-day period beginning on the day on which the President submitted information to the Committee under section 303(f)(2) on the request of the State Party under section 303(a).

(3) No import restrictions set forth in section 307 may be applied under this section to the archaeological or ethnological materials of any State Party for more than five years after the date on which the request of a State Party under section 303(a) is made to the United States. This period may be extended by the President for three more years if the President determines that the emergency condition continues to apply with respect to the archaeological or ethnological material. However, before taking such action, the President shall request and consider, if received within ninety days, a report of the Committee setting forth its recommendations, together with the reasons therefor, as to whether such import restrictions shall be extended.

(4) The import restrictions under this section may continue to apply in whole or in part, if before their expiration under paragraph (3), there has entered into force with respect to the archaeological or ethnological materials an agreement under section 203 or an agreement with a State Party to which the Senate has given its advice and consent to ratification. Such import restrictions may continue to apply for the duration of the agreement.

SEC. 305. DESIGNATION OF MATERIALS COVERED BY AGREEMENTS OR EMERGENCY ACTIONS.

After any agreement enters into force under section 303, or emergency action is taken under section 304, the Secretary, after consultation with the Director of the United States Information Agency, shall by regulation promulgate (and when appropriate shall revise) a list of the archaeological or ethnological material of the State Party covered by the agreement or by such action. The Secretary may list such material by type or other appropriate classification, but each listing made under this section shall be sufficiently specific and precise to insure that (1) the import restrictions under section 307 are applied only to the archeological and ethnological material covered by the agreement or emergency action; and (2) fair notice is given to importers and other persons as to what material is subject to such restrictions.

SEC. 306. CULTURAL PROPERTY ADVISORY COMMITTEE.

(a) ESTABLISHMENT.—There is established the Cultural Property Advisory Committee.

(b) MEMBERSHIP.—

(1) The Committee shall be composed of eleven members appointed by the President as follows:

(A) Two members representing the interests of museums.

(B) Three members who shall be experts in the fields of archaeology, anthropology, ethnology, or related areas.

(C) Three members who shall be experts in the international sale of archaeological, ethnological, and other cultural property.

(D) Three members who shall represent the interest of the general public.

(2) Appointments made under paragraph (1) shall be made in such a manner so as to insure—

(A) fair representation of the various interests of the public sectors and the private sectors in the international exchange of archaeological and ethnological materials, and

(B) that within such sectors, fair representation is accorded to the interests of regional and local institutions and museums.

(3)(A) Members of the Committee shall be appointed for terms of two years and may be reappointed for 1 or more terms.

(B) A vacancy in the Commission shall be filled in the same manner in which the original appointment was made.

(c) EXPENSES.—The members of the Committee shall be reimbursed for actual expenses incurred in the performance of duties for the Committee.

(d) TRANSACTION OF BUSINESS.—Six of the members of the Committee shall constitute a quorum. All decisions of the Committee shall be by majority vote of the members present and voting.

(e) STAFF AND ADMINISTRATION.—

(1) The Director of the United States Information Agency shall make available to the Committee such administrative and technical support services and assistance as it may reasonably require to carry out its activities. Upon the request of the Committee, the head of any other Federal agency may detail to the Committee, on a reimbursable basis, any of the personnel of such agency to assist the Committee in carrying out its functions, and provide such information and assistance as the Committee may reasonably require to carry out its activities.

(2) The Committee shall meet at the call of the Director of the United States Information Agency, or when a majority of its members request a meeting in writing.

(f) REPORTS BY COMMITTEE.—

(1) The Commitee shall, with respect to each request of a State Party referred to in section 303(a), undertake an investigation and review with respect to matters referred to in section 303(a)(1) as they relate to the State Party or the request and shall prepare a report setting forth—

(A) the results of such investigation and review;

(B) its findings as to the nations individually having a significant import trade in the relevant material; and

(C) its recommendation, together with the reasons therefor, as to whether an agreement should be entered into under section 303(a) with respect to the State Party.

(2) The Committee shall, with respect to each agreement proposed to be extended by the President under section 303(e), prepare a report setting forth its recommendations together with the reasons therefor, as to whether or not the agreement should be extended.

(3) The Committee shall in each case in which the Committee finds that an emergency condition under section 304 exists prepare a report setting forth its recommendations, together with the reasons therefor, as to whether emergency action under section 304 should be implemented. If any State Party indicates in its request under section 303(a) that an emergency condition exists and the Committee finds that such a condition does not exist, the Committee shall prepare a report setting forth the reasons for such finding.

(4) Any report prepared by the Committee which recommends the entering into or the extension of any agreement under section 303 or the implementation of emergency action under section 304 shall set forth—

(A) such terms and conditions which it considers necessary and appropriate to include within such agreement, or apply with respect to such implementation, for purposes of carrying out the intent of the Convention; and

(B) such archaeological or ethnological material of the State Party, specified by type or such other classification as the Committee deems appropriate, which should be covered by such agreement or action.

(5) If any member of the Committee disagrees with respect to any matter in any report prepared under this subsection, such member may prepare a statement setting forth the reasons for such disagreement and such statement shall be appended to, and considered a part of, the report.

(6) The Committee shall submit to the Congress and the President a copy of each report prepared by it under this subsection.

(g) COMMITTEE REVIEW.—

(1) IN GENERAL.—The Committee shall undertake a continuing review of the effectiveness of agreements under section 303 that have entered into force with respect to the United States, and of emergency action implemented under section 304.

(2) ACTION BY COMMITTEE.—If the Committee finds, as a result of such review, that—

(A) cause exists for suspending, under section 303(d), the import restrictions imposed under an agreement;

(B) any agreement or emergency action is not achieving the purposes for which entered into or implemented; or

(C) changes are required to this title in order to implement fully the obligations of the United States under the Convention;

the Committee may submit a report to the Congress and the President setting forth its recommendations for suspending such import restrictions or for improving the effectiveness of any such agreement or emergency action or this title.

(h) FEDERAL ADVISORY COMMITTEE ACT.—The provisions of the Federal Advisory Committee Act (Public Law 92-463; 5 U.S.C. Appendix I) shall apply to the Committee except that the requirements of subsections (a) and (b) of section 10 and section 11 of such Act (relating to open meetings, public notice, public participation, and public availability of documents) shall not apply to the Committee, whenever and to the extent it is determined by the President or his designee that the disclosure of matters involved in the Committee's proceedings would compromise the Government's negotiating objectives or bargaining positions on the negotiations of any agreement authorized by this title.

(i) CONFIDENTIAL INFORMATION.—

(1) IN GENERAL.—Any information (including trade secrets and commercial or financial information which is privileged or confidential) submitted in confidence by the private sector to officers or employees of the United States or to the Committee in connection with the responsibilities of the Committee shall not be disclosed to any person other than to—

(A) officers and employees of the United States designated by the Director of the United States Information Agency;

(B) members of the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate who are designated by the chairman of either such Committee and members of the staff of either such Committee designated by the chairman for use in connection with negotiation of agreements or other activities authorized by this title; and

(C) the Committee established under this title.

(2) GOVERNMENTAL INFORMATION.—Information submitted in confidence by officers or employees of the United States to the Committee shall not be disclosed other than in accordance with rules issued by the Director of the United States Information Agency, after consultation with the Committee. Such rules shall define the categories of information which require restricted or confidential handling by such Committee considering the extent to which public disclosure of such information can reasonably be expected to prejudice the interests of the United States. Such rules shall, to the maximum extent feasible, permit meaningful consultations by Committee members with persons affected by proposed agreements authorized by this title.

(j) NO AUTHORITY TO NEGOTIATE—Nothing contained in this section shall be construed to authorize or to permit any individual (not otherwise authorized or permitted) to participate directly in any negotiation of any agreement authorized by this title.

SEC. 307 IMPORT RESTRICTIONS.

(a) DOCUMENTATION OF LAWFUL EXPORTATION—No designated archaeological or ethnological material that is exported (whether or not such exportation is to the United States) from the State Party after the designation of such material under section 305 may be imported into the United States unless the State Party issues a certification or other documentation which certifies that such exportation was not in violation of the laws of the State Party.

(b) CUSTOMS ACTION IN ABSENCE OF DOCUMENTATION.—If the consignee of any designated archaeological or ethnological material is unable to present to the customs officer concerned at the time of making entry of such material—

(1) the certificate or other documentation of the State Party required under subsection (a); or

(2) satisfactory evidence that such material was exported from the State Party—

(A) not less than ten years before the date of such entry and that neither the person for whose account the material is imported (or any related person) contracted for or acquired an interest, directly or indirectly, in such material more than one year before that of entry, or

(B) on or before the date on which such material was designated under section 305,

the customs officer concerned shall refuse to release the material from customs custody and send it to release the material from customs custody and send it to a bonded warehouse or store to be held at the risk and expense of the consignee, notwithstanding any other provision of law, until such documentation or evidence is filed with such officer. If such documentation or evidence is not presented within ninety days after the date on which such material is refused release from customs custody, or such longer period as may be allowed by the Secretary for good cause shown, the material shall be subject to seizure and forfeiture. The presentation of such documentation or evidence shall not bar subsequent action under section 310.

DEFINITION OF SATISFACTORY EVIDENCE. The term "satisfactory evidence" means—

(1) for purposes of subsection (b)(2)(A)—

(A) one or more declarations under oath by the importer, or the person for whose account the material is imported, stating that, to the best of his knowledge—

(i) the material was exported from the State Party not less than ten years before the date of entry into the United States, and

(ii) neither such importer or person (or any related person) contracted for or acquired an interest, directly or indirectly, in such material more than one year before the date of entry of the material; and

(B) a statement provided by the consignor, or person who sold the material to the importer, which states the date, or, if not known, his belief, that the material was exported from the State Party not less than ten years before the date of entry into the United States, and the reasons on which the statement is based; and

(2) for purposes of subsection (b)(2)(B)—

(A) one of more declarations under oath by the importer or the person for whose account the material is to be imported, stating that, to the best of his knowledge, the material was exported from the State Party on or before the date such material was designated under section 305, and

(B) a statement by the consignor or person who sold the material to the importer which states the date, or if not known, his belief, that the material was exported from the State Party on or before the date such material was designated under section 305, and the reasons on which the statement is based.

(d) RELATED PERSONS.—For purposes of subsections (b) and (c), a person shall be treated as a related person to an importer, or to a person for whose account material is imported, if such person—

(1) is a member of the same family as the importer or person of account, including, but not limited to, membership as a brother or sister (whether by whole or half blood), spouse, ancestor, or lineal descendant;

(2) is a partner or associate with the importer or person of account in any partnership, association, or other venture; or

(3) is a corporation or other legal entity in which the importer or person of account directly or indirectly owns, controls, or holds power to vote 20 percent or more of the outstanding voting stock or shares in the entity.

SEC. 308. STOLEN CULTURAL PROPERTY.

No article of cultural property documented as appertaining to the inventory of a museum or religious or secular public monument or similar institution in any State Party which is stolen from such institution after the effective date of this title, or after the date of entry into force of the Convention for the State Party, whichever date is later, may be imported into the United States.

SEC. 309. TEMPORARY DISPOSITION OF MATERIALS AND ARTICLES SUBJECT TO TITLE.

Pending a final determination as to whether any archaeological or ethnological material, or any article of cultural property has been imported into the United States in violation of section 307 or section 308, the Secretary shall, upon application by any museum or other cultural or scientific institution in the United States which is open to the public, permit such material or article to be retained at such institution if he finds that—

(1) sufficient safeguards will be taken by the institution for the protection of such material or article; and

(2) sufficient bond is posted by the institution to ensure its return to the Secretary.

SEC. 310. SEIZURE AND FORFEITURE.

(a) IN GENERAL.—Any designated archaeological or ethnological material or article of cultural property, as the case may be, which is imported into the United States in violation of section 307 or section 308 shall be subject to seizure and forfeiture. All provisions of law relating to seizure, forfeiture, and condemnation for violation of the customs laws shall apply to seizures and forfeitures incurred, or alleged to have been incurred, under this title, insofar as such provisions of law are applicable to, and not inconsistent with, the provisions of this title.

(b) ARCHAEOLOGICAL AND ETHNOLOGICAL MATERIAL.—Any designated archaeological and ethnological material which is imported into the United States in violation of section 307 and which is forfeited to the United States under this title shall—

(1) first be offered for return to the State Party;

(2) if not returned to the State Party, be returned to a claimant with respect to whom the material was forfeited if that claimant establishes—

(A) valid title to the material,

(B) that the claimant is a bona fide purchaser for value of the material; or

(3) if not returned to the State Party under paragraph (1) or to a claimant under paragraph (2), be disposed of in the manner prescribed by law for articles forfeited for violation of the customs laws.

No return of material may be made under paragraph (1) or (2) unless the State Party or claimant, as the case may be, bears the expenses incurred incident to the return and delivery, and complies with such other requirements relating to the return as the Secretary shall prescribe.

(c) ARTICLES OF CULTURAL PROPERTY.—

(1) In any action for forfeiture under this section regarding an article of cultural property imported into the United States in violation of section 308, if the claimant establishes valid title to the article, under applicable law, as against the institution from which the article was stolen, forfeiture shall not be decreed unless the State Party to which the article is to be returned pays the claimant just compensation for the article. In any action for forfeiture under this section where the claimant does not establish such title but establishes that it purchased the article for value without knowledge or reason to believe it was stolen, forfeiture shall not be decreed unless—

(A) the State Party to which the article is to be returned pays the claimant an amount equal to the amount which the claimant paid for the article, or

(B) the United States establishes that such State Party, as a matter of law or reciprocity, would in similar circumstances recover and return an article stolen from an institution in the United States without requiring the payment of compensation.

(2) Any article of cultural property which is imported into the United States in violation of section 308 and which is forfeited to the United States under this title shall—

(A) first be offered for return to the State Party in whose territory is situated the institution referred to in section 308 and shall be returned if that State Party bears the expenses incident to such return and delivery and complies with such other requirements relating to the return as the Secretary prescribes; or

(B) if not returned to such State Party, be disposed of in the manner prescribed by law for articles forfeited for violation of the customs laws.

SEC. 311. EVIDENTIARY REQUIREMENTS.

Notwithstanding the provisions of section 615 of the Tariff Act of 1930 (19 U.S.C. 1615), in any forfeiture proceeding brought under this title in which the material or article, as the case may be, is claimed by any person, the United states shall establish—

(1) in the case of any material subject to the provisions of section 307, that the material has been listed by the Secretary in accordance with section 305; and

(2) in the case of any article subject to section 308, that the article—

(A) is documented as appertaining to the inventory of a museum or religious or secular public monument or similar institution in a State Party, and

(B) was stolen from such institution after the effetive date of this title, or after the date of entry into force of the Convention for the State Party concerned, whichever date is later.

SEC. 312. CERTAIN MATERIAL AND ARTICLES EXEMPT FROM TITLE.

The provisions of this title shall not apply to—

(1) any archaeological or ethnological material or any article of cultural property which is imported into the United States for temporary exhibition or display if such material or article is immune from seizure under judicial process pursuant to the Act entitled "An Act to render immune from seizure under judicial process certain objects of cultural significance imported into the United States for temporary display or exhibition, and for other purposes", October 19, 1965 (22 U.S.C. 2459); or

(2) any designated archaeological or ethnological material or any article of cultural property imported into the United States if such material or article—

(A) has been held in the United States for a period of not less than three consecutive years by a recognized museum or religious or secular monument or similar institution, and was purchased by that institution for value, in good faith, and without notice that such material or article was imported in violation of this title, but only if—

(i) the acquisition of such material or article has been reported in a publication of such institution, any regularly published newspaper or periodical with a circulation of at least fifty thousand, or a periodical or exhibition catalog which is concerned with the type of article or materials sought to be exempted from this title,

(ii) such material or article has been exhibited to the public for a period or periods aggregating at least one year during such three-year period, or

(iii) such article or material has been cataloged and the catalog material made available upon request to the public for at least two years during such three-year period;

(B) if subparagraph (A) does not apply, has been within the United States for a period of not less than ten consecutive years and has been exhibited for not less than five years during such period in a recognized museum or religious or secular monument or similar institution in the Unites States open to the public; or

(C) if subparagraphs (A) and (B) do not apply, has been within the United States for a period of not less than ten consecutive years and the State Party concerned has received or should have received during such period fair notice (through such adequate and accessible publication, or other means, as the Secretary shall by regulation prescribe) of its location within the United States; and

(D) if none of the preceding subparagraphs apply, has been within the United States for a period of not less than twenty consecutive years and the claimant establishes that it puchased the material or article for value without knowledge or reason to believe that it was imported in violation of law.

SEC. 313. REGULATIONS.

The Secretary shall prescribe such rules and regulations as are necessary and appropriate to carry out the provisons of this title.

SEC 314. ENFORCEMENT.

In the customs territory of the United States, and in the Virgin Islands, the provisions of this title shall be enforced by appropriate customs officers. In any other territory or area within the United States, but not within such customs territory or the Virgin Islands, such provisions shall be enforced by such persons as may be designated by the President.

SEC. 315. EFFECTIVE DATE.

(a) IN GENERAL.—This title shall take effect on the ninetieth day after the date of the enactment of this Act or on any date which the President shall prescribe and publish in the Federal Register, if such date is—

(1) before such ninetieth day and after such date of enactment; and

(2) after the initial membership of the Committee is appointed.

(b) EXCEPTION.—Notwithstanding subsection (a), the members of the Committee may be appointed in the manner provided for in section 306 at any time after the date of the enactment of this Act.

And the House agree to the same.

STATEMENT OF MANAGERS

EXPLANATION OF THE CONFERENCE AGREEMENT

Section 102: Canned tuna

House bill—Amends the TSUS item 112.30 description: (a) to indicate clearly that shipments from the U.S. insular possessions are not to be included in determining the extent to which the tariff quota on canned tuna not packed in oil has been filled, and (b) to reflect that the agency responsible for the administration of the quota is the National Marine Fisheries Service, formerly the U.S. Fish and Wildlife Service. These amendments would apply to articles entered after March 31, 1981.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 107: Certain ceramic insulators

House bill—Phased-down permanent reduction of column 1 (MFN) rate of duty on ceramic insulators used in the production of spark plugs from 11.6% to 3.6% as of January 1, 1983, and 3.5% as of January 1, 1984. Previous temporary reduction of duty expired June 30, 1981.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 142: Chipper knife steel

House bill—Phased-down permanent reduction of column 1 (MFN) rate of duty on chipper knife steel under TSUS item 606.93 to 4.4% as of September 30, 1982, 4.2% as of January 1, 1983, 4.0% as of January 1, 1984, 3.9% as of January 1, 1985, 3.7% as of January 1, 1986, 3.6% as of January 1, 1987. Previous temporary duty reduction expired September 30, 1982.

Senate amendment—No provision.

Conference agreement—The conferees agreed to a 2½-year reduction as follows: 4.4% retroactive to October 1, 1982, until December 31, 1982, 4.2% from January 1, 1983, until December 31, 1983, 4.0% from January 1, 1984, until December 31, 1984, and 3.9% from January 1, 1985, until March 31, 1985.

Section 108: Yankee dryer cylinders

House bill—Eliminates the column 1 (MFN) rate of duty on Yankee dryer cylinders under TSUS item 668.04. The previous temporary suspension of duty expired on December 31, 1981.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 109: Certain aircraft components and materials

House bill—Exempts from duty certain U.S.-made avionics systems and other equipment that had been installed in an aircraft exported from the United States and then assessed duties when the aircraft was reimported into the United States before 1970.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 111: Pipe organ parts

House bill—Eliminates the column 1 (MFN) rates of duty on pipe organ parts under TSUS items 726.60 and 762.62.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 112: Toy tea sets

House bill—Eliminates the column 1 (MFN) rate of duty on toy tea sets of ceramic ware.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 115: Increase in value limitations for duty-free importations of personal articles by returning U.S. residents

House bill—

(1) A returning U.S. resident may import duty-free up to $600 (increase from current $300) of articles accompanying such person, acquired for personal or household use.

(2) A returning U.S. resident may import duty-free up to $800 (increase from current $600) of articles, whether or not accompanying such person, if such person arrives directly or indirectly from an insular possession, and not more than $400 (increase from current $300) of which shall have been acquired elsewhere than in such insular possession.

(3) The Secretary of Treasury may administratively exempt from duty up to $50 (increase from current $25) in bona fide gifts sent from persons in foreign countries to persons in the United States.

(4) The Secretary of Treasury may administratively exempt from duty up to $50 (increase from current $40) in articles for household use accompanying persons arriving in the U.S. who are not entitled to exemption under any other provision of TSUS Schedule 8.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 117: Prayer shawls

House bill—Eliminates column 1 (MFN) and column 2 rates of duty on prayer shawls, and headwear used in religious observances.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 118: Increase in value limitations applicable to informal entries of imported merchandise

House bill—Increases value from $600 to $1,000 of noncommercial articles for personal or household use accompanying a person arriving in the United States (other than duty-free articles or articles acquired in U.S. insular possessions) which are subject to a flat duty of 10 percent of the fair retail value in the country of acquisition.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 123: Carob flour

House bill—Temporarily suspends column 1 (MFN) rate of duty on carob flour under TSUS item 152.05 until December 31, 1984.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 125: Wood excelsior

House bill—Temporarily suspends the column 1 (MFN) rate of duty on wood excelsior until June 30, 1983. Previous temporary suspension expired June 30, 1981.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 146: Bicycle parts

House amendment to Senate amendment—Extends the existing suspension of column 1 (MFN) duties on certain bicycle parts to June 30, 1986. "Click stick levers" would not be included in the suspension, while cables and casings for caliper brakes and trigger on twist grip controls for 3-speed hubs would be added to the suspension.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 148: Hosiery knitting machines

House amendment to Senate amendment—Temporary suspension until September 30, 1985, of column 1 (MFN) rate of duty on single cylinder fine gauge hosiery knitting machines and double cylinder jacquard hosiery knitting machines. Current rates of duty are 5.7% and 6.9% ad valorem.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 149: Double-headed latch needles

House amendment to Senate amendment—Temporary suspension on doubleheaded latch needles of column 1 (MFN) rate of duty, currently $.41 per 1000 plus 14.2% ad valorem, until June 30, 1985.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 150: Protheses

House amendment to Senate amendment—Temporary suspension of column 1 (MFN) rate of duty, currently 8.4% ad valorem, on externally-powered electric prosthetic devices and their parts until September 30, 1984.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 152: Certain dolls and toy figures

House amendment to Senate amendment—Temporary suspension of column 1 (MFN) rates of duty until December 31, 1985, on (1) stuffed dolls, with or without clothing; (2) stuffed toy figures of inanimate objects; (3) inanimate objects not stuffed, but not wholly or mostly metal, rubber, or plastic; and (4) skins of dolls, toy figures of animate and inanimate objects. Current rates of duty range from 13.9% ad valorem to 17.1% ad valorem.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section

House amendment to Senate amendment—Would allow business documents to enter the U.S. in a no-entry required status as "intangibles" instead of entering duty-free under item 807.10 as is the present primary method. In addition would prohibit nominal consigness from conducting customs business on behalf of any other person, unless the consignee is a licensed customshouse broker.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 202—Bonded warehouses

House amendment to Senate amendment—Would allow articles to be delivered into successive bonded storage warehouses as long as the ultimate purpose remained that of export, be amending section 311 of the Tariff Act of 1930. Currently articles withdrawn from a bonded manufacturing warehouse may be delivered into any bonded storage warehouse at an exterior port for the sole purpose of immediate export.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 130: 4-Chloro-3-methylphenol

House bill—Temporary suspension of column 1 (MFN) rate of duty on 4-chloro-3-methylphenol under TSUS item 403.56 until June 30, 1984.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 137: Doxorubicin hydrochloride

House bill—Extends temporary suspension of column 1 (MFN) rate of duty on doxorubicin hydrochloride until June 30, 1984, retroactive to June 30, 1982, when the previous suspension expired.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 139: Tartaric acid and certain tartaric chemicals

House bill—Temporary suspension of column 1 (MFN) rates of duty on tartaric acid, potassium salts, cream of tartar, and sodium tartarate until June 30, 1984. Retroactive application to June 30, 1980, if request filed with Customs within 90 days after date of enactment.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 119: Certain metal waste and scrap

House bill—Provides permanent column 1 (MFN) duty-free treatment on copper waste and scrap, articles of copper, and other metal waste and scrap articles. Current column 1b rate would apply to copper waste and scrap and articles of copper if the market price of copper falls below $.51 per pound.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 103: Furs from China

House amendment to Senate amendment—Repeals the embargo on furskins with respect to the People's Republic of China (PRC) imposed under headnote 4 to subpart 5 of schedule 1 of the TSUS.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 113: Classification of dolls and toy figures

House amendment to Senate amendment—Provides for realignment of TSUS items and new definitions for certain stuffed dolls and other toy figures classified under TSUS items 737.25 through 737.50.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 122: Cantaloupes

House amendment to Senate amendment—Suspends until May 15, 1985, the column 1 (MFN) rate of duty of 35% on fresh cantaloupes entered between January 1 and May 15 of each year provided for in TSUS item 148.17.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 124: Hatters' fur

House amendment to Senate amendment—Suspends until December 31, 1985, the column 1 (MFN) rate of duty of 15% on hatters' fur.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 127: Surgical drapes and sterile gowns

House amendment to Senate amendment—Reduces until January 1, 1988, the Column 1 (MFN) and column 2 rates of duty on disposable hospital gowns and drapes of fiber fabric to 5.6% and 26.5% respectively. The present column 1 (MFN) rates are $.20 per pound plus 14% for drapes. The column 2 rates are 76% for both items.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the Senate amendment.

Section 127: P-hydroxybenzoic acid

House amendment to Senate amendment—Suspends until September 30, 1985, the column 1 (MFN) rate of duty of 11.3% for P-hydroxybenzoic acid under TSUS item 404.44

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 128: Triphenyl phosphate

House amendment to Senate amendment—Suspends until September 30, 1985, the column 1 (MFN) rate of duty of 12.1% of triphenyl phosphate under TSUS item 404.84.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 129: Bis(4-Aminobenzoate)-1,3 propanediol (trimenthelyne glycol di-P-aminobenzoate)

House amendment to Senate amendment—Extends until June 30, 1984, the existing temporary suspension of the column 1 (MFN) rate of duty on TSUS item 405.08.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 132: Ethylbiphenyl

House amendment to Senate amendment—Suspends until June 30, 1985, the column 1 (MFN) rate of duty of 20.1% of ethylbiphenyl under TSUS items 402.52 and 407.16.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 134: Uncompounded allyl resins

House amendment to Senate amendment—Suspends until September 30, 1984, the column 1 (MFN) rate of duty of 8.4% on uncompounded allyl resins under TSUS item 407.16.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 133: Dicofol

House amendment to Senate amendment—Phased-down temporary reductions in duties until September 30, 1985, on dicofol under TSUS item 408.28: column 1 (MFN) rate of duty 10.3% as of January 1, 1983, 9.5% as of January 1, 1984, 8.6% as of January 1, 1985; LDDC rate 6.9% during entire period; column 2 rate 7 cents per pound plus 41%. Effective 15 days after date of enactment.

Senate amendment—Permanent duty reduction reclassified under item 408.24: initial column 1 (MFN) rate of duty 11.2%, reduced annually to 6.9% as of January 1, 1987. Retroactive application on non-liquidated entries if request filed with Customs within 90 days after enactment.

Conference agreement—The conferees agreed to the House provision for a temporary duty reduction and the Senate provisions on the effective date.

Section 143: Certain Freight Containers

House bill—Temporary suspension of column 1 (MFN) rate of duty until December 31, 1986, on freight containers used in international trade with gross mass rating of at least 40,000 pounds and manufactured at least 5 years prior to date of entry.

Senate amendment—Same, except 5-year age requirement not included.

Conference agreement—The conferees agreed to the Senate provision.

Section 155: Upland Cotton

House bill—Suspends duty on imports entered during a period of time when a special quota is proclaimed to section 103(f) of the Agriculture Act of 1949.

Section 103(f) of the Agriculture Act of 1949 as amended permits special quotas, in addition to the permanent annual quota, to be proclaimed for a 90-day period if cotton prices exceed certain specified levels. Such imports are subject to existing rates—ranging from duty-free to $.02 per pound.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision.

Section 105: Classification of certain fabrics

House bill and amendment to Senate amendment—No provision.

Senate amendment—Reclassifies all fabrics of pile construction, under TSUS items 346.05 through 346.65, resulting in column 1 (MFN) duty increases to 22.1% through 35.5%, and column 2 rates of 31.25% through 50% for the primary fabrics, i.e., unfinished cotton corduroy, and cotton velveteen. Current column 1 (MFN) rates for those fabrics are 7.4% ad valorem and 9.2% ad valorem; column 2 rates are 13.5% ad valorem and 18.5% ad valorem.

Conference agreement—The conferees agreed to the Senate amendment.

Section 144: Cobalt

House bill and amendment to Senate amendment—No provision.

Senate amendment—Extends temporary suspension of column 1 (MFN) rate of duty on cobalt from June 30, 1982, to June 30, 1983.

Conference agreement—The conferees agreed to the Senate amendment.

Section 141: Copper scale

House amendment to Senate amendment—Suspends until September 30, 1985, the

column 1 (MFN) rate of duty of 6.6% for copper scale under TSUS item 603.70.

Senate amendment—Identical provision except for a termination date of December 31, 1985.

Conference agreement—Conferees agreed to Senate provision.

Section : Seed potatoes

House bill and amendment to Senate amendment—No provision.

Senate amendment—Adds an "actual use" provision to permit the Customs Service to verify use of potatoes entered into the United States as seed stock rather than table stock.

Conference agreement—The conferees agreed to the Senate amendment.

Section 147: Certain texturing machines

House amendment to Senate amendment—Suspends until September 30, 1985, the column 1 (MFN) rate of duty of 5.3% on certain texturing machines under TSUS item 670.06.

Senate amendment—Eliminates column 1 (MFN) duty on certain texturing machines specially designed for stretch or heat-set texturing of continuous manmade fibers. The duty elimination would be retroactive to March 1, 1982, if a request were filed with Customs within 90 days of enactment.

Conference Agreement—The conferees agreed to the House provision.

Section 136: Sulfathiazole

House bill and amendment to Senate amendment—No provision.

Senate amendment—Temporary reductions of duty on sulfathiazole: Column 1 (MFN) from 29.4% to 13.3% from January 1, 1983, to January 1, 1984, 11.9% from January 1, 1984, to January 1, 1985, and 10.6% from January 1, 1985, to January 1, 1986; LDDC rate 8.0% during entire period; column 2 rate 7 cents per pound plus 80%.

Conference agreement—The conferees agreed to the Senate provision.

Section 120: Carrots

House-passed bill and amendment to Senate amendment—No provision.

Senate amendment—Temporary suspension of Column 1 (MFN) rate of duty until June 30, 1985, on culled carrots imported in bulk containers of 100 pounds of more, during the period August 15 to February 15 under a quota of 20,000 tons.

Conference agreement—The conferees agreed to a two-year suspension of duty.

Section 135: Sulfapyridine

House-passed bill and amendment to Senate amendment—No provision.

Senate amendment—Temporary suspension of column 1 (MFN) and column 2 rates of duty on sulfapyridine until December 31, 1985.

Conference agreement—The conferees agreed to the Senate provision.

Section 131: Color Couplers

House amendment to the Senate amendment—Extends existing temporary suspension of column 1 (MFN) rates of duty on color couplers and color intermediates from June 30, 1982, to September 30, 1985.

Senate amendment—Same provision, except request for retroactive application must be filed with a customs officer within 90 days after the date of enactment.

Conference agreement—The conferees agreed to the Senate provision.

Section 114

House-passed bill—Eliminates column 1 (MFN) rate of duty, currently 22.1%, and LDDC duty, currently 11.4% for casein button blanks.

Senate amendment—Identical provision, except treats amendments in column 1 rates as trade agreement obligations.

Conference agreement—The conferees accepted the Senate amendment.

Section 121

House-passed bill—No provision.

House amendment to Senate amendment—No provision.

Senate amendment—Continues temporary suspension of column 1 (MFN) rate of duty on red peppers, currently 12.0%, from June 30, 1981, to June 30, 1985. Previous temporary column 1 (MFN) suspension expired June 30, 1981. Provision for a retroactive application of suspension, to June 30, 1981, if request filed with Customs within 90 days after enactment.

Conference agreement.—The conferees agreed to the Senate amendment.

Section 153

House-passed bill—No provision.

House amendment to Senate amendment—No provision.

Senate amendment—Extends implementing legislation for the International Sugar Agreement, which expires January 1, 1983, until January 1, 1985.

Conference agreement—The conferees agreed to the Senate amendment.

Section 154

House-passed bill—No provision.

House amendment to Senate amendment—No provision.

Senate amendment—Extends the implementing legislation for the International Coffee Agreement, which expired with the joint resolution, until October 1, 1985.

Conference agreement—The conferees agreed to the Senate provision.

Section 106: Fourdrinier wire

House amendment to Senate amendment—Eliminates column 1 (MFN) rate of duty on Fourdrinier wire for use in papermaking machines.

Senate amendment—Identical provisions except retains current duties on plastic wire.

Conference agreement—Conferees agreed to Senate amendment.

Section 110: Insular possession

House amendment to Senate amendment—(1) Eliminate 70% foreign content limit for duty-free entry of watches from insular possessions under general headnote 3(a);

(2) Establish new 7 million unit annual limit on duty-free entry with adjustment flexibility downward by no more than 10% or upward by no more than 20% in any one year;

(3) Continue country allocation authority for the Secretaries of Commerce and Interior;

(4) Provide a duty rebate for the industry on a by-company basis which reflects the amount of local labor content in the watches.

Senate amendment—No provision.

Conference agreement—The conferees agreed to the House provision with an amendment and the following intent.

In developing the regulations dealing with minimum assembly requirements (under Sections 115 (f) and (h)) the Secretary shall ensure that the activities and work performed on the watches in the Virgin Islands, Guam, and American Samoa will be meaningful and add significantly to the value of the product. The Committee is aware of past instances where watches have been assembled with only minimal work in our insular possessions and then allowed to enter this country duty-free. The intent of the conferees, therefore, is to ensure that substantial and meaningful work be performed, or duty-free treatment should not be allowed.

Conference agreement—The conferees agreed to the Senate provision.

Fish Nets and Netting

House bill—

(1) Phased down permanent reduction of col. 1 rate to 17.0%: $.15 per lb. + 26.7% as of 1/1/83; $.09 per lb. + 22.8% as of 1/1/84; $.03 per lb. plus 18.9% as of 1/1/85 and 17.0% as of 1/1/86.

(2) Effective as of 1/1/83.

Senate amendment—Tariff-rate quota with col. 1 rate of 17.0% on the amount entering during any 12-month period beginning April 1 which is the greater of 1,750,000 lbs. or 28.5% of U.S. consumption during the preceding such calendar year. Tariff quota expires 7/1/89. No change in col. 2 rate. Provisions apply to articles entered after 3/31/83.

Conference Agreement—Conferees deleted the provision.

SUBTITLE B

Sections 161-168—Implementation of the Nairobi protocol

House bill—No provision.

Senate amendment—Sections 161-167 implement the Nairobi Protocol to the Florence Agreement. The protocol provides for duty-free treatment for a broader range of educational, scientific, and cultural materials and articles for the handicapped than is currently provided in U.S. law implementing the Florence Agreement.

Conference agreement—The Conferees agreed to the Senate Amendment.

Title II, sections 201-215—implementation of the cultural property convention

House bill—No provision.

Senate amendment—Sections 201-215 implement the Convention on the Means of Prohibiting and Preventing the Illicit Import, Export, and Transfer of Ownership of Cultural Property. These provisions authorize the President to enter into agreements to restrict imports of illicitly-traded artifacts when the major importing nations are implementing similar controls. The provisions also authorize the President to impose import controls unilaterally in an emergency, and they bar the importation of certain items identified as having been stolen from museums or similar institutions abroad.

Conference agreement—The Conferees agreed to the Senate Amendment.

DAN ROSTENKOWSKI,
SAM M. GIBBONS,
BILL FRENZEL,
Managers on the Part of the House.

BOB DOLE,
BILL ROTH,
JOHN C. DANFORTH,
RUSSELL LONG,
LLOYD BENTSEN,
Managers on the Part of the Senate.

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the conference report on the bill (H.R. 4566) to reduce certain duties, to suspend temporarily certain duties, to extend certain existing suspensions of duties, and for other purposes. And that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. ROUSSELOT. Reserving the right to object, Mr. Speaker, can the chairman of the subcommittee tell us what happened to section 2 of this bill as it relates to tuna?

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from California.

Mr. GIBBONS. The House provision was agreed to.

Mr. ROUSSELOT. So the gentleman did not recede to the Senate on section 2.

Mr. GIBBONS. That is correct.

Mr. ROUSSELOT. Am I correct in my understanding that the tuna industry is not very excited about that?

Mr. GIBBONS. Well, they did not tell the House Members they were not excited. They apparently told one or two Senators. But this bill still has to go through the Senate. And they are operating under unanimous-consent requests over there.

Yes, this bill has to go to the Senate. We act first on the conference report.

Mr. ROUSSELOT. Further reserving the right to object, if I wanted to be a hero with the tuna industry and object, this would be the time to do it, or should I wait for it to go to the Senate?

Mr. GIBBONS. I do not think so.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, I now yield to my colleague, the gentleman from Minnesota (Mr. FRENZEL.)

Mr. FRENZEL. I thank the gentleman for yielding.

I would say that the gentleman has already become a hero on the gas tax bill with the California public utilities section. I hope the gentleman will resist the urge to become a hero twice, because that bill is not through the Senate yet itself.

Mr. ROUSSELOT. Well, are the gentlemen telling me that this bill has a hard road to go, swim upstream with the tuna over there in the Senate?

Mr. GIBBONS. That is just one of the many, many items in here. In fact, most of the items in this bill, the trouble was we found Senators fighting with each other over the bill. Some were for the provisions and some were against them. I do not know what is going to happen to this bill in the Senate.

Mr. ROUSSELOT. Are we going to have a full discussion of this bill?

Mr. GIBBONS. All the gentleman wants, and maybe more.

Mr. ROUSSELOT. All right. I guess I will be a neat guy.

Mr. FRENZEL. The gentleman has always been a neat guy.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see prior proceedings of the House today, Tuesday, December 21, 1982.)

Mr. GIBBONS (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida (Mr. GIBBONS) is recognized for 30 minutes.

Mr. GIBBONS. Mr. Speaker, I yield myself such time as I may consume.

This bill is what we call one of the small item tariff bills. It is a real cross to bear.

History left us with a code, a Tariff Code, that has 6,000 major classifications in it. You must remember that the tariff laws are the oldest laws of the United States. And we have 6,000 classifications in that Tariff Code, major classifications, and Lord knows how many minor classifications we have in this tariff bill.

From time to time businessmen come here and ask their Member of Congress to see if they cannot get some adjustments in the Code. Sometimes they are changing tariffs, sometimes they are changing classifications, sometimes the tariffs go up, sometimes they go down, sometimes they are temporarily suspended.

Essentially the philosophy that guides the committee is to be very cautious.

We take testimony from all the members of the executive branch. We advertise. And we take testimony from all the proponents. If there are any opponents, we usually never take the matter up. And we try to work all the controversy our of these matters.

These matters are important, though, for American business and American jobs.

There are some products, some esoteric chemicals and things like that that this country does not make, never has made, and perhaps does not hold the patent to make. And we have to import those, to add them and to be component parts. And the same as far as knitting needles and knitting machines. We do lot of knitting in the United States but we do not make the needles and machines, or we do not make them as well as other people do, and the people in the textile industry come in and say will we suspend or remove the duty on those.

We normally start off, Mr. Speaker, if there is any controversy, we usually do nothing. If it is new and it is a first time exposure to us, we temporarily suspend the duty to see if other American manufacturers or producers want to get into the field. And after a length of time, we hear nothing from anyone, we come along and maybe remove the tariff.

These tariff things go up and down. They are very small in nature, and they have little or no impact upon the budget.

I will be glad to yield half of my time to the gentleman from Minnesota, the minority member of the committee, or to anyone who wants to ask any questions.

Mr. ROUSSELOT. Will the gentleman yield briefly?

Mr. GIBBONS. I will be glad to yield to the gentleman.

Mr. ROUSSELOT. Could the gentleman explain to us, since I understand he was the author of what is known as section 2 in this bill, could he now explain what that does to the tuna industry as it relates to Samoa?

Mr. GIBBONS. It really takes the law back to where it was before somebody down in the bureaucracy tried to change it by executive fiat. It is a question of whether you count Samoa in or out of the quotas.

Mr. ROUSSELOT. What does that mean in the American tuna industry when you have Samoa exempted or not exempted? What does that mean?

Mr. GIBBONS. It means that the quota is slightly larger. By not counting Samoa, tuna is imported tuna. Now, what is the way we have always done it in the past. Somebody down in the executive branch changed the system of counting.

Mr. ROUSSELOT. In other words, the change was made by executive order or something.

Mr. GIBBONS. Yes, sir.

Mr. ROUSSELOT. From what it previously was.

Mr. GIBBONS. Correct.

Mr. ROUSSELOT. Why is the American tuna industry or some of them concerned about that change back to what it was?

Mr. GIBBONS. You know, I do not know, because they have never told me. As I say, this bill is almost 2 years old. In fact, it passed our committee, it passed the House over a year ago. It has been lounging around in the other body for over a year and a half. I guess probably the CBI debate stirred up everybody, and maybe, you know, we adopted an amendment here on the floor to take tuna completely out of the CBI.

Mr. ROUSSELOT. In the Caribbean Basin Initiative bill we exempted the tuna industry from the potential that they considered that that would be as a threat. But what you are saying is does the gentleman believe that going back to what the law was before this Executive fiat action is somehow not that damaging to the tuna industry?

Mr. GIBBONS. I do not believe it is that damaging .

Mr. ROUSSELOT. And you have no testimony to the effect it is.

Mr. GIBBONS. Correct. And nobody from the tuna industry has ever come to see me or as far as I know any member of our committee about it. They may have come to see the gentleman from California.

Mr. ROUSSELOT. No. I frankly have had phone calls and other concerns. But I must tell the gentleman until we have had this discussion, I did not fully understand what had happened in the past, that what you are doing under section 2 is merely trying to return the situation to what it was, and it really is not a drastic change.

□ 2150

Mr. GIBBONS. The status quo ante is what they say, or something like that.

Mr. ROUSSELOT. Well, I thank the gentleman for the explanation.

I hope that in this portion of his remarks he will add any additional information that is needed to clarify what the gentleman is doing with section 2 of this act.

Mr. GIBBONS. All right, I will be glad to.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

I am going over the list of things that are covered in the bill and I am trying to figure out where there might be some things that would raise some questions.

I remember when the bill was on the floor there was some concern about the China fur tariff elimination.

Am I correct that all of that has been worked out and that the Minnesota fur people or the Wisconsin fur people and all those who are worried are no longer concerned about this particular provision?

Mr. GIBBONS. It is my impression they are not concerned, because I have not received any comments from them or from any of their representatives of those areas.

They were really worried about Russian fur. When I talked to them last and when we told them this only included Chinese fur, the last time I talked to them, they had no further objection.

Mr. WALKER. What about the casein blanks that is in there?

Mr. GIBBONS. That is casein blanks, that is button blanks is what it is. There is nothing in here having to do with casein. I am very familiar with that issue. This bill would never have gotten that far had there been any casein language in there. All the members of the Agriculture Committee are aware of that problem.

Mr. WALKER. Cantaloup duty suspension, do we not raise plenty of cantaloups in this country that they might be concerned about the competition?

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. Yes; I would be glad to yield.

Mr. FRENZEL. That was the bill that was requested by the chairman of the Agriculture Committee who comes from cantaloup area and I think from time to time seasonally they need to do some importation.

Mr. GIBBONS. The problem, I say to the gentleman from Pennsylvania (Mr. WALKER) is that the only thing a grocer really has got to sell is shelf space and growers in this country, even though they may have competitive vegetables or whatever—a melon, that is what a cantaloup is—they do not like to lose their shelf space. Sometimes a grower in this country will import in order to keep the supply going to the grocery stores, into the chains, so that they do not lose their shelf space.

As I say, the gentleman from Texas (Mr. DE LA GARZA), the chairman of the Agriculture Committee, was the chief sponsor of that particular proposal.

I have had nobody express to me any objection to the cantaloups. It does help the consumer at a time when the American producers are not able to produce cantaloups because of the weather. These cantaloup come in, they are seasoned slightly different than ours and it keeps the prices down and it keeps the shelf space in the grocery stores.

Mr. WALKER. Mr. Speaker, if the gentleman would yield further, I would simply say that I do not intend to object to the bill. It appears as though they are items that are not a problem; but I would hope that in the future these kinds of bills would not come up under this kind of process.

I was concerned when we were assembling papers at the desk just before we came out with the bill and I would hope that this kind of bill would not come before us in the waning hours of the session in the future.

Mr. GIBBONS. Let me assure the gentleman from Pennsylvania that the gentleman from Florida feels that way. We are not only going to change the procedure in the Ways and Means Committee, as far as I am concerned, but I want to tell the gentleman from Pennsylvania that we sent these bills to the Senate, some of them over a year ago and, as I say, they languished and aged over there and picked up, some of them picked up opposition. They were dropped along the way. Some of them we dropped in conference today because opposition was expressed.

These are not controversial matters and I appreciate the courtesy of the gentleman from Pennsylvania and his diligence.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I am glad to yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, the gentleman from Florida has yielded me half of his time.

I hope the bill will be speedily passed. I think it is a good bill. It takes into account the wishes of nearly half the Members of this House. It is a shame that the Senate did not respond with our bills soon enough so that we could make a more orderly presentation to the House. I hope we will be able to do so in the future.

Mr. Speaker, I yield back the balance of my time.

Mr. GIBBONS. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the two conference reports just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. Is there any additional business to come before the House?

The Chair recognizes the majority leader, the gentleman from Texas (Mr. WRIGHT).

THE AMERICAN FARMER NEEDS HELP NOW

(Mr. WHITTEN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. WHITTEN. Mr. Speaker, one of the most serious situations facing the country today is the plight of the American farmer. I think that by January or February the situation is going to be such that many of the farmers will default because they have no way of paying on the $200 billion they now owe.

The farmers need help now if we are to avoid bankruptcies on a tremendous scale.

PAYMENT IN KIND

Mr. Speaker, we have pending a bill which provides for payment in kind. It has passed the House and is now awaiting action in the other body. That bill would allow the Secretary of Agriculture to exempt payments in kind from requirements in the law which prevent the competitive sale of

U.S. farm products overseas and which limit the amount a farmer may receive in land diversion payments.

Mr. Speaker, we need more than that. We need to repeal all restrictions on the Commodity Credit Corporation. Those engaged in agriculture are so desperately in need of any help that this may help increase their collateral so that they can borrow the money they need to farm in this coming year. I would point out, however, the minute you start a pay-in-kind program, you had better not continue it, for soon there will be a year when farmers will not have to farm and then all of agriculture will go broke for farm production will be reduced to only that for domestic consumption.

It must be remembered that payment in kind reduces all the gross spending that would normally go on in the farm community—chemicals, seed, farm equipment—everything connected with agriculture. If this reduction is kept over a period of years, we will not only feel the effects in all our communities, but it will lead to a breakdown in the overall economy which I describe later in my remarks.

WE NEED ACTION NOW

Mr. Speaker, we need to act now to save farmers from bankruptcies. We need to stop holding off world markets the huge amounts of commodities that are surplus to our domestic needs.

We should direct the Secretary of Agriculture to offer commodities for sale for export to the highest bidder in such amounts and quantities as are necessary to meet world needs.

The deduction of 50 cents per hundredweight from the proceeds of the sale of milk should not be in effect at any time unless surplus Commodity Credit Corporation-owned stocks of dairy products are regularly offered for sale for export to the highest bidder, as authorized by the Commodity Credit Corporation charter. The dairy farmer should not bear the cost of our failure to offer surplus dairy products for sale.

And land diversion payment limitations should be removed in order to restore agricultural income at this time when farm costs of production are excessive and prices received by farmers are below such costs.

Furthermore, if the officers and directors of the Commodity Credit Corporation fail to protect the assets of the Corporation by regular sale of farm commodities in world trade at competitive prices, they should be disqualified and other officials, who can and will properly discharge their responsibilities as officers of the Corporation, should be appointed.

Also, all laws which restrict the authorities and obligations contained in the charter of the Commodity Credit Corporation to sell commodities surplus to domestic need should be repealed.

WORLD NEEDS OUR FOOD

Mr. Speaker, the hungry people of the world are crying for food at the same time that we are holding huge amounts of surplus commodities off world markets. This food is surplus to American needs—but it is not surplus to world needs.

This food is also the biggest advantage that we have over Russia, for they can in no way compete with us in the production of food. Unfortunately, we are failing to use that advantage. Instead of using our advantage, we hold our farm commodities off world markets, and store them instead of making them available to the needy people of the world.

Mr. Speaker, once again I must call attention to the fact that the basis for all our prosperity, the basis for our economy, goes back to the wonderful job that those engaged in agriculture do for the rest of us. I do not believe there is any nation in history other than the United States where 4 percent of the people provide food, clothing, and shelter for the other 96 percent of the people so that they can do something else. That 4 percent of our people also supply food to our neighbors abroad, to people abroad who are so badly in need of food.

REVOLVING FUND

Years ago, the Congress established the Commodity Credit Corporation for the purpose of supporting farm prices, and for buying and selling commodities.

CCC was originally incorporated under the laws of Delaware and is now a wholly owned Government corporation. CCC operates as a fully funded revolving fund of $25 billion with authority to support prices, to buy commodities, and to sell competitively in world trade. The proceeds are returned to the fund for further use. CCC is the biggest revolving fund that I know of in history. CCC is the only organization of our Government that has the authority under its charter to buy and sell, the same way as our competitors. But for several years, we have not used this $25 billion for that purpose. We must return to using it.

To hold U.S. commodities off world markets is to hold an umbrella over world prices at the expense of U.S. farmers. Our customers can then take delivery from our competitors at just under our price.

WORLD MARKETS

For agricultural commodities, the world price is the only real price. The rest of the world sells to their domestic market at the world price, but then taxes their people. We, however, choose not to add a user's tax to food, but rather maintain a cheap food policy for our domestic market, and make up the difference between domestic price and world price by direct payments in order to keep our farmers in business. This policy results in Government-owned inventories at artificially inflated prices.

Yet, when we try to sell in world trade at competitive prices—the rest of the world calls it "dumping." By doing so, they try to conceal their own domestic policies.

As a result, we do not sell our commodities, we store them. By storing our commodities and offering only at an artificial inflated price, we hold our umbrella over the world price and let the rest of the world make the sales.

Refusing to sell surplus products and then making the farmer pay the cost of that policy is unacceptable. These products are surplus to domestic needs—they are not surplus to world needs. It is unconscionable to refuse to sell food when millions of people throughout the world go to bed hungry every night, and then make the farmer bear the cost of that policy. Not only is this policy unconscionable, it also will not work. The history of our efforts at production controls clearly demonstrates that such controls are not a satisfactory substitute for competitive sales abroad.

CCC'S AUTHORITY TO SELL

The Commodity Credit Corporation Charter Act provides unlimited authority to sell competitively in world markets. Like most exporting nations of the world, we should sell what we produce and do not need for what it will bring in the world markets. Past experience has shown that, when buyers have the opportunity to support world prices by their bids, markets throughout the world are strengthened and commodities flow freely through the normal channels of trade. Loss of markets to our competitors has proved the dangers of an artificial price umbrella over world markets fixed by a governmental policy.

Mr. Speaker, I would point out that it is the obligation of the officers of any corporation to protect the assets of their corporation. So it is with the officers of the Commodity Credit Corporation. Failure to sell is a failure to protect the assets of the Corporation. The present Directors and officers of the Corporation, including the general sales manager, are all employees of the Department of Agriculture and are also subject to policies from outside the Department which, at times, clearly are not in the interest of U.S. agricultural producers. If, by being Federal employees, they are unable to operate freely in carrying out their duties, then they should step aside and allow their positions to be filled by non-Federal employees, who have had experience in world trade and who can and will properly discharge their responsibilities as officers or Directors of the Corporation. This change would give the Corporation the independence of action that Congress intended and

would free the Corporation from restrictive sales policies.

Only in this way can American agriculture be protected and enabled to retain its export business.

Mr. Speaker, I am very much concerned that many who are setting agriculture policy today are unaware of the errors of the past.

Mr. Speaker, today many are calling for less volume to get price, but a higher price offset by a lower volume does not help, just as greater volume for less price does not help either. The error is that as a Government policy, we are giving away foreign markets, when the production of 2 acres out of every 5 must be exported for a healthy U.S. agriculture here at home.

It is absolutely essential that we work to keep the supply of and demand for agricultural commodities in balance, if we are to avoid the choice between going hungry and going broke. We must sell it for what it will bring—not to break a competitor but to protect our own economy. Likewise, we must relate the farmer's prices to his cost—see that volume and price exceed cost—and that he maintain foreign markets.

We must remove restrictions on the Commodity Credit Corporation so it can use its existing authority to make loans and to sell or barter competitively in world markets.

Mr. Speaker, an increase in export sales in essential if we are to avoid farm bankruptcies on a tremendous scale. And, we must remember that if the farmer goes down, the rest of us—whatever our business—go down, too.

With the United States pleading for world support, we need to supply food to a hungry world for what it can pay—instead of paying our farmers not to produce. If we produce beyond domestic needs, we must not hold such productin off world markets and away from those in need. Too often we provide guns when we should provide food.

What we really need is to have the history of the last Depression required reading by all Government officials, and certainly by those who deal with agriculture, so that we prevent a recurrence of what happened before. Truly this is a case of an ounce of prevention being worth a pound of cure.

LESSONS OF HISTORY

I repeat again that the Great Depression, if we study history, started out with a fall in the income of those engaged in agriculture. If the Members will read the history of the Great Depression, and I hope they will, they will find that the farm programs were first passed in an effort to restore the purchasing power of the farmer. In my area, Mr. Speaker, we have had three short crops. Over 60 percent of our people are borrowing money from Farmers Home Administration to stay in business. I have urged the Secretary of Agriculture, the Director of the Office of Management and Budget, and the President to study each of those cases. In those cases where they can stretch out the time of payment, I have asked them to do everything they can to help the borrower to work his way out of his present situation because once you start foreclosing, it will spread like wildfire.

Many Members wonder why I feel so strongly about this. It is because I came to Congress right after the Great Depression, which lasted 10 years. Many economists can tell you why we had the Great Depression, but I have never heard of one who can explain why it lasted 10 years. You could drive 100 miles from my hometown in any direction and be lucky to find one man who owned his land. As a youngster of 21 I voted to extend from 1 to 3 years the time to redeem land sold to the State for taxes. You could not buy a bag of flour on the credit of the State of Mississippi.

May I say to the Members that the course we are following today is exactly the course that was followed preceding the Depression, first by Mr. Hoover and then by Mr. Roosevelt. When Mr. Roosevelt found it did not work, he turned the other way.

Mr. Speaker, we must sell. And, in a hungry world, this country should not hold back on food for people, while sending them guns and weapons of war, which the people do not want but their leaders do—as status symbols. Our records show we have sold or provided such weapons of war to 78 countries—many of them tiny countries you never heard of—and we are always surprised when they use them.

We need again to use the Commodity Credit Corporation like it was intended. We need to offer what we have in surplus and not keep it from the rest of the world. We need to make some friends again. We need, above all, to keep the farmer in business so be can provide food for the rest of us.

$26 BILLION DISASTER THREATENS NATION'S BOND MARKET

(Mr. HANSEN of Idaho asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HANSEN of Idaho. Mr. Speaker, the following letters and news clippings tell a startling story which needs immediate congressional investigation:

AUGUST 5, 1982.

Special attention: Mr. Michael P. Flaherty, General Counsel.

Hon. FERNARD J. ST GERMAIN,
Chairman, Banking, Finance and Urban Affairs Committee, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to our discussion, I am enclosing the GAO audit and other information regarding the Washington Public Power Supply System (WPPSS) situation. My key concerns here are that the financial burdens created for the construction of the five plants called WPPSS 1 through 5 are of such monstrous size as to be the dominant factor in the whole economy of the area.

During the current investigation, which I initiated several months ago on April 1, I continue to come upon very disturbing allegations.

The small cooperatives and municipal users of BPA power have had literally no say in the terms or amount of bond underwritings against their credit.

After the entire project began to come apart (WPPSS 4, 5 and 1 having been terminated), the single most lucrative bond issue in the history of Merrill Lynch, Pierce, Fenner and Smith was floated.

There is currently no way to monitor whether the proceeds of the bond issue are, or have in the past been used for the purposes for which they were issued.

WPPSS has been accused of comingling funds for all projects. It is possible that the small cooperatives and municipals (the 88) are being charged with debts that do not relate in any way to their intended purpose.

In one instance, a small cooperative has, as its share of the total obligation to date, a sum equal to almost $40,000 dollars per subscriber.

It is alleged that the bond underwriters had a significant part in drafting the contracts under which the 88 joined in supporting the construction of 4 or 5. In that drafting, the rights of the 88 on termination of 4 and 5 were removed from the final contract offered to the individual users in the 88.

The 88 were brought in, not because of intrinsic power considerations, but because of an adverse Internal Revenue Ruling on expense write-off on WPPSS 1, 2 and 3. Only then were the small users (the 88) brought in, as a substitute inducement to investors for the loss of the tax shelter.

Some of these allegations have been supported by the interim GAO study just completed, which was done at my request and dated July 30, 1982. For others, there are varying degrees of evidence. I am pursuing as much verification as possible, due to the involvement of federal entities in what seems to be the tailoring of a power project to the needs of the bond investment community, and for no other apparent purpose.

There is now only one of the plants slated for completion, and one other which may be salvaged. But after years of expense, there is not a single guaranteed kilowatt of generating power. There is, however, a public debt which some estimates put as high as 25.8 billion dollars, a sum exceeded only by the United States national debt in the public obligation area.

One of the foremost problems here is, even if the members of the 88 agree to pay, the size of the obligatioin is clearly beyond their capacity to pay and creates the likelihood of a default of an unprecedented size in the investment market. For comparison I only remind you the Chrysler guarantee was less than 8 percent the size of this problem.

For these reasons I respectfully request your review of this situation and look forward to cooperating with you and the Banking Committee in investigating and in finding appropriate solutions to this massive problem.

In addition to the enclosed information and additional files which I am pleased to make available to you, you may wish to con-

tact Mr. John Brown at the General Accounting Office, at 275-8545.

Sincerely,

GEORGE HANSEN,
Member of Congress.

AUGUST 10, 1982.

Special attention: Mr. Michael P. Flaherty, General Counsel.

Hon. FERNAND J. ST GERMAIN,
Chairman, Banking, Finance and Urban Affairs Committee, Washington, D.C.

DEAR MR. CHAIRMAN: As Members from the Northwest, we are deeply concerned on behalf of our constituents with the growing financial crisis arising out of the WPPSS nuclear power construction program. There is increasing evidence that the small users of Bonneville Power Administration electric supply will be driven into financial collapse and perhaps even bankruptcy if forced to pay in accordance with the written terms of their contracts on the failed project. But even more frightening is the prospect that whether they pay or not, the economic vitality of the Northwest has been seriously impaired and financial stability of the bond-market in the Region and perhaps in the entire United States has been prejudiced.

There is now a body of indications that the economic disaster to the small electric utilities is in no small measure attributable to the involvement of the financial community. These underwriters participated in drafting the contracts which are so dangerous to the survival of the 88 small utilities and which favored the salability of the bonds. The Rural Electrification Administration openly acknowledges that the advantage to the bond market is more of interest to it than the survival of the 88.

We have now been apprised that the PNGC newsletter, Status Report, (July 30, 1982, Volume VI, No. 7) makes the following incredible statement: "The U.S. General Accounting Office (GAO) recently decided that BPA made the correct recommendation to WPPSS this spring when the federal power marketing agency recommended that WPPSS nuclear Plant 1 be mothballed. Although construction on another plant was not as far along, the GAO said, that plant's partially private ownership would have led to lawsuits had WPPSS tried to mothball it."

There could not be any clearer signal that something is radically wrong. BPA, a federal agency charged with distributing power makes a decision involving hundreds of millions of dollars of financial liability against certain public power users to favor private power users. This is even more shocking when it is realized that the public power users are already under control of BPA and REA. In essence this decision alone requires Congressional review.

The picture shows BPA offloading liability on the 88 small power users in WPPSS on the basis of who is likely to sue and then REA attempts to further foreclose lawsuits by telling those same users that if they sue on the WPPSS contracts they will be denied future credit. The facts show that BPA induced the 88 into the contract with WPPSS on representations of power shortages which were grossly overstated. They arranged the elections within WPPSS to put maximum financial burden on the 88 and then together with REA they tried to coerce the 88 not to pursue legal or other remedies on pain of a credit cut off—all this to pay for a power system which will never produce a kilowatt of electrical energy.

It would not overstate the matter to conclude that these federal agencies charged by Congress with bringing technological advancement to the less developed areas of the country, have been the servants of the interests of the financial movers of the Wall Street bond underwriting group to the damage and perhaps the destruction of the small electric users of the Pacific Northwest.

BPA, REA, the Department of Justice, and even the GAO have all acted or approved certain acts in concert which have the combined effect of creating or approving an economic calamity for public power in the Pacific Northwest—a twenty-six billion dollar debt and no power. In any case, there appears to be no federal agency free of involvement in the disaster of WPPSS to give an unbiased report to Congress on the problem in general and the causal relationship between the needs or desires of the financial community and the imminent collapse of the small utilities of the Northwest.

As if to confirm this view, GAO recently took the position that default by the 88 on the WPPSS bonds would adversely affect the economy of the region. Based upon interviews with Wall Street financial interests, they added that default could affect the ability of the region itself to raise capital in the bond market. Conveniently, GAO ignored the fact that, even if compelled to pay, many of the 88 would collapse and never make the payments anyway.

Under such circumstances, it is our view that only an investigation through hearings by the Banking Committee can provide the responsible overview necessary to guarantee a proper resolution of a problem which could indeed adversely affect the region and many other regions of the country already plagued by problems of many financial institutions in a failing credit market. It appears that in the WPPSS situation and others like it, the influence of the sources of the capital is disproportionate to their proper role.

If the financial powers in this country have become so arrogant that they can decide which areas of the country will prosper and which will decay, we think that it is time for a thorough review by Congress of where they got this power and how we can limit it. Your immediate attention to this critical matter is strongly encouraged.

Sincerely,

GEORGE HANSEN.
LARRY E. CRAIG.

P.S.—Several of our colleagues from other states have expressed their concern to us over the issue of the financing of the WPPSS projects. We are advised that they will also be in direct communication with you either jointly or severally. We hope that you will be able to give this matter as prompt attention as is possible under the circumstances.

AUGUST 18, 1982.

Special attention: Mr. Michael P. Flaherty, General Counsel.

Hon. FERNAND J. ST GERMAIN,
Chairman, Banking, Finance and Urban Affairs Committee, Washington, D.C.

DEAR MR. CHAIRMAN: It is becoming increasingly obvious, as I pointed out in earlier correspondence, that the problem of the disintegration of the five nuclear projects of WPPSS is not merely one of the abuse of federal authority to trap small utilities into a plan of dubious feasibility. Included in the problem is the economic viability of the Pacific Northwest in the foreseeable future as well as the role played by the financial community and the possibility of huge default in bonds.

Last Friday's announcement in the attached Wall Street Journal article of August 16, 1982 that the rate increase to Kaiser Aluminum alone put in jeopardy the investment of $600 million into the economy of the area. When the President of Kaiser says that he has "extreme concern about how reliable the industrial future is in the Northwest", the dimensions of the disastrer caused by the combination of factors involving BPA and WPPSS in concert with the financial interests who helped shape the calamity begin to appear.

Untold numbers of jobs, not to speak of the crippling financial damage to the average ratepayer, are part of the price of this fiasco. In size alone, this is too mammoth to be treated as a mere regional problem. When the GAO can report that the New York financial powers are threatening to shut off credit not merely to the power users but to the entire area, and even power interests across the country, we are faced with a national problem.

The basis on which the astronomical costs of mismanagement can be mitigated is only one of the problems we face. The pressure of the WPPSS collapse has given even the private power companies an opening to raise their rates, even without direct involvement in WPPSS. We are witnessing the pressures of the almost incomprehensible size of the WPPSS debt begin to twist and warp the very fabric of the area's economic life.

At this moment, the WPPSS disaster threatens to end the proposed modernization of a major area industry; create a major agricultural crisis; throw more than half of the area public power utilities into bankruptcies; triple the cost of users of electricity; and dry up the area's sources of credit. Hard as it is to visualize the size of a $25.8 billion debt, it is easy to see the consequences as they begin to emerge.

I doubt that anyone yet knows the solution to the problem, but I do know that it cannot be allowed to drift along until the entire area is a wasteland. Since it is now beyond contest that the federal government was the prime engine in creating the fertile ground for the tragedy, it is vital that we in Congress move immediately to get all the available facts and seek how to limit the damage of what is fast becoming the worst tragedy in the history of the Northwest, if not the entire nation.

What appears to be a coverup of governmental negligence or mismanagement has now reached the proportion where individual small investors may lose heavily on the collapse of bond obligations.

Sincerely,

GEORGE HANSEN,
Member of Congress.

P.S.—Mr. Chairman, the immensity of the WPPSS bond liability exposure cannot be exaggerated when one compares the $26 billion involved to the trauma generated by (1) the Chrysler bailout ($1.5 billion government guarantee); (2) the New York City bond bailout (some $4 billion); (3) the Franklin National Bank failure (total asets less than $4 billion); (4) the current Penn Square failure (losses anticipated not to exceed $200 million); and (5) Drysdale Securities losses, absorbed by Chase Manhattan whose securities are now being shied away from as a result (involved some $160 million loss).

Apart from the human cost of the Vietnam war, the Congress yearly endured highly emotional debate on the economic toll for more than a decade. But the liability of WPPSS is more than 60 percent of the

total cost ($40 billion) of that war—a cost which was spread over 200 million people—as opposed to a narrow band of 7 million who must bear the $26 billion cost of this domestic nuclear disaster.

AUGUST 10, 1982.

Hon. JAKE GARN,
Chairman, Senate Banking, Housing, and Urban Affairs Committee, Washington, D.C.

DEAR MR. CHAIRMAN: I am sure you share my deep concern in behalf of constituents with the growing financial crisis arising out of the WPPSS nuclear power construction program. There is increasing evidence that the small users of Bonneville Power Administration electric supply will be driven into financial collapse and perhaps even bankruptcy if forced to pay in accordance with the written terms of their contracts on the failed project. But even more frightening is the prospect that whether they pay or not, the economic vitality of the Northwest has been seriously impaired and financial stability of the bond market in the Region and perhaps in the entire United States has been prejudiced.

I am certain your own constituents in northern Utah have expressed their concern to you during these past few months since the huge proportions of the problem have become evident.

There is now a body of indications that the economic disaster to the small electric utilities is in no small measure attributable to the involvement of the financial community. These underwriters participated in drafting the contracts which are so dangerous to the survival of the 88 small utilities and which favored the salability of the bonds. The Rural Electrification Administration openly acknowledges that the advantage to the bond market is more of interest to it than the survival of the 88.

I have now been apprised that the PNGC newsletter, Status Report, (July 30, 1982, Volume VI, No. 7) makes the following incredible statement: "The U.S. General Accounting Office (GAO) recently decided that BPA made the correct recommendation to WPPSS this spring when the federal power marketing agency recommended that WPPSS Nuclear Plant 1 be mothballed. Although construction on another plant was not as far along, the GAO said, that plant's partially private ownership would have led to lawsuits had WPPSS tried to mothball it."

There could not be any clearer signal that something is radically wrong. BPA, a federal agency charged with distributing power makes a decision involving hundreds of millions of dollars of financial liability against certain public power users to favor private power users. This is even more shocking when it is realized that the public power users are already under control of BPA and REA. In essence this decision alone requires Congressional review.

The picture shows BPA offloading liability on the 88 small power users in WPPSS on the basis of who is likely to sue and then REA attempts to further foreclose lawsuits by telling those same users that if they sue on the WPPSS contracts they will be denied future credit. The facts show that BPA induced the 88 into the contract with WPPSS on representations of power shortages which were grossly overstated. They arranged the elections within WPPSS to put maximum financial burden on the 88 and then together with REA they tried to coerce the 88 not to pursue legal or other remedies on pain of a credit cut off—all this to pay for a power system which will never produce a kilowatt of electrical energy.

It would not overstate the matter to conclude that these federal agencies charged by Congress with bringing technological advancements to the less developed areas of the country, have been the servants of the interests of the financial movers of the Wall Street bond underwriting group to the damage and perhaps the destruction of the small electric users of the Pacific Northwest.

BPA, REA, the Department of Justice, and even the GAO have all acted or approved certain acts in concert which have the combined effect of creating or approving an economic calamity for public power in the Pacific Northwest—a twenty-six billion dollar debt and no power. In any case, there appears to be no federal agency free of involvement in the disaster of WPPSS to give an unbiased report to Congress on the problem in general and the causal relationship between the needs or desires of the financial community and the imminent collapse of the small utilities of the Northwest.

As if to confirm this view, GAO recently took the position that default by the 88 on the WPPSS bonds would adversely affect the economy of the region. Based upon interviews with Wall Street financial interests, they added that default could affect the ability of the region itself to raise capital in the bond market. Conveniently, GAO ignored the fact that, even if compelled to pay, many of the 88 would collapse and never make the payments anyway.

Under such circumstances, it is my view that only an investigation through hearings by the Banking Committee can provide the responsible overview necessary to guarantee a proper resolution of a problem which could indeed adversely affect the region and many other regions of the country already plagued by problems of many financial institutions in a failing credit market. It appears that in the WPPSS situation and others like it, the influence of the sources of the capital is disproportionate to their proper role.

If the financial powers in this country have become so arrogant that they can decide which areas of the country will prosper and which will decay, I think that it is time for a thorough review by Congress of where they got this power and how we can limit it. I am enclosing a copy of my letter further outlining the problem to Chairman Fernand St Germain of the House Banking Committee of which I am a member. Your immediate attention to this critical matter is strongly encouraged, particularly due to the direct interest it holds for you and all of us in the area affected.

Sincerely,

GEORGE HANSEN,
Member of Congress.

AUGUST 18, 1982.

Hon. JAKE GARN,
Chairman, Senate Banking, Housing, and Urban Affairs Committee, Washington, D.C.

DEAR MR. Member of Congress.

[From the Wall Street Journal, Aug. 16, 1982]

KAISER ALUMINUM SAYS ELECTRIC RATES BOOST IMPERILS BIG PROJECT

OAKLAND, CALIF.—Kaiser Aluminum & Chemical Corp. is reconsidering previously announced plans for a $600 million modernization of two aluminum plants in Washington state, because of new industrial electricity rates announced Friday by the Bonneville Power Administration.

Kaiser said the rates are higher than earlier estimates it received from Bonneville. The company said the rate boost would result in a $52 million increase in production cost next fiscal year, instead of the $28 million increase it anticipated.

Kaiser's president, A. S. Hutchcraft, said the increase "has given me cause for extreme concern about how reliable the industrial future is in the Northwest." He added that company lawyers are examining certain aspects of the decision for a possible appeal to the Federal Energy Regulatory Commission.

A Kaiser spokesman said a deadline hasn't been set for its reexamination of plans.

A spokesman for Bonneville Power Administration, which sells power to Washington, Oregon, Idaho and western Montana, said, "No promises were made or intended" to Kaiser regarding the rates. "There's no question that the increase is hurting the aluminum industry in the Northwest," he said, adding: "We understand that. We believe the rates are necessary, although hurtful."●

GAO CONFIRMS BPA AND REA RESPONSIBILITY IN WPPSS DISASTER

(Mr. HANSEN of Idaho asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HANSEN of Idaho. Mr. Speaker, a July 30, 1982 General Accounting Office investigation has clearly identified Bonneville Power Administration and Rural Electrification Administration actions and activities affecting utility participation in Washington Public Power Supply System Plants 4 and 5. The report follows:

REPORT BY THE U.S. GENERAL ACCOUNTING OFFICE; BONNEVILLE POWER ADMINISTRATION AND RURAL ELECTRIFICATION ADMINISTRATION ACTIONS AND ACTIVITIES AFFECTING UTILITY PARTICIPATION IN WASHINGTON PUBLIC POWER SUPPLY SYSTEM PLANTS 4 AND 5

Congressman George Hansen asked GAO to examine the roles of the Bonneville Power Administration and the Rural Electrification Administration in development and termination of Washington Public Power Supply System Plants 4 and 5.

GAO found: BPA provided electric demand forecasting help to small regional utilities, endorsed the need for additional generating units, supported utility participation in the plants, and acted to indirectly facilitate termination of the plants.

REA directed its borrowers to pay their debts to the Washington Public Power Supply System and implied their financial standing with REA could be affected if their obligations on plants 4 and 5 are not met.

U.S. GENERAL ACCOUNTING OFFICE,
ENERGY AND MINERALS DIVISION,
July 30, 1982, Washington, D.C.

Hon. GEORGE HANSEN,
House of Representatives,
Washington, D.C.

DEAR MR. HANSEN: In your April 1 and 8, 1982, letters and in subsequent discussions with the General Accounting Office, you requested that we determine how activities of the Bonneville Power Administration (BPA) and the Rural Electrification Administration (REA) affected two uncomplete nuclear powerplants (WNP-4 and 5) recently terminated by the Washington Public Power Supply System (Supply System). You expressed concern that BPA may have encouraged regional utilities to participate in these projects and that REA may be coercing rural cooperatives not to challenge the cooperatives' financial and legal responsibilities to the Supply System.

In an April 20, 1982, letter to you, we identified five concerns we would specifically examine in addressing your concerns. These areas are:

BPA's involvement in regional demand forecasting.

BPA's representation of the region's need for additional generating capacity to its customers during this timeframe.

BPA's involvement, if any, in its customers' decisions to participate in plants 4 and 5, and the respective levels of their participation.

Recent BPA actions which directly or indirectly relate to termination of plants 4 and 5.

Recent REA actions directed toward BPA customers which could affect the customers' approach to terminating plants 4 and 5.

We found that BPA: Played a role in providing electric demand forecast assistance to small customers and provided input to the region's forecast, endorsed the need for additional generating units to meet regional power needs by defending the validity of the regional forecast, supported the participation of its preference customers [1] in plants 4 and 5, and took several actions indirectly facilitating attempts to mothball and then terminate plants 4 and 5.

We found that REA directed its borrowers to meet their Supply System obligations, and implied that their present and future financial standing with REA could be affected if they do not honor their obligations on plants 4 and 5.

OBJECTIVES, SCOPE, AND METHODOLOGY

Our objectives were to ascertain the facts and circumstances surrounding the five issues agreed to in our April 20, 1982, letter. To obtain information with respect to BPA's involvement in forecasting, representations on need for additional generating capacity, and involvement in customers' decisions to participate in the Supply System's nuclear plants 4 and 5, we reviewed BPA files and records pertaining to the subjects from the mid-1960s to the present. This included correspondence with various Pacific Northwest utility organizations, the Supply System, BPA studies and reports on the region's power supply and demand outlook, and regional forecasts.

To supplement this information and obtain a clear perspective of BPA's role, we identified and interviewed key BPA officials having major roles in the evolution and development of the region's power program. We specifically discussed with BPA's former Administrator, Deputy Administrator, Power Manager, and an Area Office Manager what role BPA played in forecasting the region's power needs, what pronouncements it made on the need for additional generating capacity, and whether the agency influenced its customers in deciding to participate in the construction of the Supply System plants. We also discussed the issues with present BPA officials including the Administrator and Deputy Administrator. In addition, we met and discussed these issues with representatives from the region's Public Power Council, public utility districts, municipalities, and REA cooperatives to obtain their views on the events and circumstances regarding BPA's involvement and role. The utilities we met with included those you identified, others identified by another member of the Northwest congressional delegation, and others selected outside this group to provide a broader based sample.

In examining recent BPA actions related to termination of plants 4 and 5, we reviewed recent BPA files and correspondence and discussed with key BPA officials the role BPA played in the termination.

Time constraints required that we limit our review to BPA's role. Consequently, we were unable to examine the roles of other organizations in the decision to pursue and eventually terminate these plants. These include the Supply System, the Public Power Council, Pacific Northwest Utilities Conference Committee, and large industry. In evaluating BPA's activities, it is important to keep in perspective their status as one of many key organizations.

With respect to recent REA actions, we met with REA headquarters officials in Washington, D.C., and interviewed REA field representatives in the Pacific Northwest to determine their interest and role in the termination of plants 4 and 5. We also discussed REA actions with cooperatives who are participants in plants 4 and 5 as well as with representatives of the National Utilities Cooperative Financial Corporation to obtain their comments and views. In addition, we reviewed REA's files and records including field activity reports, cooperatives' financial records, participant and loan agreement, and correspondence.

We performed our review in accordance with GAO's current "Standards for Audit of Governmental Organizations, Programs, Activities, and Functions." Information on the five concerns and our findings follow. To understand the nature of these concerns and the history of electricity development in the Pacific Northwest, a detailed background is provided in appendix I.

BPA INVOLVEMENT IN REGIONAL DEMAND FORECASTING

Although BPA was not the primary organization for regional forecasting, it played a role in providing assistance to its small preference customers, and provided input for the region's forecasting. The official regional forecast, as recognized by the utilities, is published annually by the Pacific Northwest Utilities Conference Committee (PNUCC). This is a regional power planning organization with representation from BPA and the public and private utilities in the Pacific Northwest. The PNUCC regional

[1] Under statute, BPA must give preference in selling Federal power to publicly owned systems e.g., the public utilities which purchase power from BPA have traditionally been labeled BPA preference customers.

forecast which is used for planning additional generation facilities is compiled from the individual utility forecasts of which BPA's input represented about 40 percent of the demand projections. During the 1970s, BPA's involvement in forecasting regional demand focused on providing technical assistance to its customers.

This assistance varied from providing minor help on technical issues in some instances to fully preparing the demand forecasts for smaller customers. BPA's forecasting assistance is provided by five economists or public utility specialists assigned to its Area and District offices who work with its customers in the preparation of their demand forecasts. The forecasts are then sent to BPA's headquarters office for review. Final approval of the forecast rests with the utility. However, BPA officials told us that many of their preference customers were small utilities with limited staffs and technical expertise in demand forecasting. Accordingly, BPA officials acknowledged that they relied on BPA's expertise for assistance in such areas and accepted the forecast prepared by BPA.

Generally, the degree of BPA involvement was inversely proportional to the size of the customer utility—the smaller the customer the greater BPA's involvement. The approximately 100 utilities receiving assistance from BPA made up approximately 20 percent of the 1974 regional demand projections. BPA also did demand estimates for the Federal agencies and industries it serves directly. For the most part, these demands were set contractually and involved little forecasting per se. The Federal agencies and industries made up an additional 20 percent of the region's 1974 demand projections. The remaining 60 percent of projected demand was from the private utilities and large public utilities which developed their forecasts independently.

BPA'S REPRESENTATION OF THE REGION'S NEED FOR ADDITIONAL GENERATING CAPACITY TO ITS CUSTOMERS

BPA and utility officials as well as documents obtained from their files agree that BPA endorsed the need for additional generating units to meet regional power needs. BPA published an annual summary of the regional forecast during the mid-1970s entitled "Power Outlook." In these documents, BPA repeatedly cited the energy deficits which were being forecast and stated that additional delays in starting construction on new thermal plants would exacerbate an already serious energy supply situation.

Additionally, in May, 2 months following publication of its 1976 "Power Outlook" BPA published a special report entitled "The Electric Energy Picture in the Pacific Northwest." This report emphasized that greater deficits were projected in the 1976 forecast than in previous years. The following chart taken from BPA's special report demonstrates the increase of projected deficits. These deficits were projected through 1987 with Supply System plant 4 anticipated to come on line in 1983 and plant 5 in 1985.

BPA not only endorsed the forecast calling for additional generating units but also publicly defended the forecast against critics. In response to a critique from the Washington State Thermal Power Plant Site Evaluation Council, BPA stated that the forecast was the "best available tool for projecting the future demand for electricity in the Pacific Northwest." BPA also expressed concern that the regional forecast might, in fact, be too low.

Although BPA endorsed the regional forecast and thereby the power deficits it projected, we found no indication that BPA made an independent evaluation of the methodology or assumptions used in the total forecast. A possible reason for this was that the demand growth predicted for the Pacific Northwest of about 6 to 7 percent was similar to projections for the rest of the Nation. To meet projected demand, utilities across the country were planning to start construction on new thermal plants to avoid deficits. For example, in 1978 the Tennessee Valley Authority had 17 nuclear units under construction to meet projected demand growth. Eight of those units are currently deferred because the forecasted demand growth did not materialize and TVA is now considering whether to cancel four units.

BPA'S INVOLVEMENT IN CUSTOMERS' DECISIONS TO PARTICIPATE IN PLANTS 4 AND 5

According to BPA's Administrator during the mid-1970s, BPA "actively supported" the participation of its preference customers in plants 4 and 5. This is further supported by BPA correspondence from the time period and by statements made by public utility officials we interviewed. A November 8, 1974, letter from the BPA Administrator to BPA's preference customers discussed the need for plants 4 and 5 and another nuclear plant. That letter stated in part:

"These projects are scheduled * * * to meet Northwest utilities' load growth during the mid-1980s. Major financing will be needed in 1975 to maintain the construction schedules for these essential projects * * *.

"Any utility which needs additional power resources in the mid-1980s will need to enter the Participant's Agreements with WPPSS at this time. Only by utilities signing these agreements can these generating projects be constructed on the schedule required to meet loads of Northwest utilities after July 1, 1983."

Another letter on June 11, 1975, from the BPA Power Manager to REA who was reviewing the option agreements for plants 4 and 5 on behalf of REA cooperatives stated:

"Resources available to meet the estimated loads of BPA's preference customers, including REA borrowers, after July 1, 1983, would be inadequate without the capability of the projects. We know of no other projects, under construction or planned, available to the customers which would fulfill the need in the time frame that the projected need exists. While we cannot verify each utility's load estimate, our participation in load estimating procedures of the REA borrowers indicates that the estimates generally conform with current BPA load estimating standards.* * * Finally, a major strength of the proposed projects is that they have been planned to meet the region's preference agencies' load growth as a whole. These agencies through their participation in the Public Power Council have acted together to plan for their future power supply. By participating in the projects, the cooperatives have been given the opportunity to buy capability from the project at cost."

Later, at a March 17, 1976, BPA Regional Advisory Council meeting, the BPA Administrator made the following comments:

"The first one that came to mind * * * was that we wanted to provide some certainty in the planning process for those who have a responsibility to their own local customers. The second objective we listed was that we wanted to meet the regional power requirements. In that regard we thought it was important, if possible, to find a way to keep the WPPSS plants 4 and 5 on schedule.

* * * * *

"All of this boils down to the fact, * * * it would be desirable for public power to continue to try to keep plants 4 and 5 on schedule."

BPA continued to support its customers participation in plants 4 and 5. In April 1976, BPA met with its preference customers to inform them that BPA would not be able to meet all their future power requirements, and that they would soon be receiving the "notice of insufficiency." As a result of uncertainty created by the lack of a BPA power allocation policy, the preference customers were reluctant to sign up for plants 4 and 5, fearing that if they did so they would be later penalized by BPA in the allocation process. The Administrator told them he would be sending them a letter, which he later did, assuring them that they would not be penalized in any future BPA policy on power allocation for participating in the plants.

Information distributed at the BPA April 1976 Preference Customer Meeting showed that the estimated cost of Supply System plants 4 and 5 was about $2.4 billion. During the afternoon session of this meeting, representatives from the Supply System discussed the participants and ownership agreements for the two nuclear plants. A week after this meeting, the Supply System mailed participants agreements and related documents to prospective participants giving them 90 days to execute the agreements.

Further actions by BPA include meeting with preferance customers in late May 1976 to discuss the deteriorating power supply picture and the importance of the region having adequate resources to meet projected demand requirements and participating in plants 4 and 5. Supply System representatives also attended the meeting to discuss the plants and answer questions of prospective participants. Also, BPA told its preference customers in the June 1976 notice of insufficiency that it would be unable to meet their future power requirements. Subsequently, in July 1976, 88 public utilities and 1 investor-owned utility signed agreements for plants 4 and 5.

Although it is not possible to quantify the impact BPA's statement had on the utilities' decision to participate, the notice of insufficiency, according to a number of participants, was a strong factor in their decision to participate in plants 4 and 5.

In addition to encouraging customer participation in the plants, BPA helped its customers determine their respective level of participation. According to a BPA official, a utility's percentage of participation in plants 4 and 5 was determined by using a formula developed by the Supply System. Each participant's share was aimed at 80 to 90 percent of their demand growth between 1983 and the late 1980s. In November 1974, BPA scheduled customers' meetings in each of its five service areas to explain the need for, and purpose of the proposed participant agreements. The BPA letter scheduling the meeting stated that its area power managers were to work with each utility to help determine the need for and amount of participation by each utility in projects 4 and 5.

BPA ACTIONS RELATED TO TERMINATION OF PLANTS 4 AND 5

Although it had no direct financial interest in plants 4 and 5, BPA management was

concerned that an uncontrolled termination of the plants could impact on the three net billed plants. BPA, therefore, took several actions indirectly affecting attempts to mothball and terminate plants 4 and 5. In July 1981, as cash for the plants was running out, BPA reached an agreement with the Supply System to sell $100 million of nuclear fuel contracts and spare parts from plants 4 and 5 to one of BPA's net billed plants. The $100 million transferred to plants 4 and 5 allowed the Supply System to keep these plants financially alive until October 1981, an extension of 2 months, and provided additional time to find future funds for the plants. Between October 1981 and January 1982, BPA also assisted in attempts to develop a mothballing plan. At this time BPA was working with the Supply System and other regional power entities on alternatives to termination and encouraged the participation of various groups in the mothballing proposals including private utilities and large industry. For example, BPA agreed to act as an escrow agent for the participants during this period to collect the loan funds.

In October 1981, regional utilities and large industry agreed to loan the Supply System $60 million to fund plants 4 and 5 while attempts were being made to develop a mothballing plan.[2] Between October 1981 and January 1982, the Supply System worked to obtain short-term loans from the 88 project participants. However, sufficient funds were not obtained, and the Supply System adopted a resolution terminating plants 4 and 5 on January 22, 1982.

REA ACTIONS DIRECTED TOWARDS BPA CUSTOMERS

Subsequent to the Supply System's decision to terminate plants 4 and 5, REA has directed its borrowers (that are both customers of BPA and participants in the plants) to meet their Supply System obligations, and implied that their present and future financial standing with REA could be affected if they do not honor their obligations on plants 4 and 5. For example, after the Supply System's decision to cancel the plants, REA in a January 29, 1982, letter to its borrowers endorsing an orderly termination of the project stated: Each system is expected to honor Supply System obligations, steps should be taken to implement rate increases to meet Supply System obligations, and defaults by the Supply System could trigger actions and litigations accelerating the financial obligations of the participants.

REA also asked its borrowers to establish and submit plans for meeting Supply System obligations and requested that their boards pass a resolution agreeing to advance money for the termination costs of the plants.

On February 10 and March 22 and 23, 1982, REA and the National Rural Utilities Cooperative Financing Corporation[3] held joint meetings with the participants to discuss their obligations and formulate a unified approach in addressing some issues raised about termination. Several REA borrowers who attended the meetings alleged that although REA did not prohibit borrowers from legally challenging their obligations to the Supply System, REA implied they would have difficulty obtaining REA financing if they did. REA officials, however, said they told the participants they appreciated their problems but still expected them to honor their commitments whether or not they were involved in lawsuits challenging the payments. Further, REA officials maintain that at the March meetings they assured borrowers they would "work with those" that were unable to meet their Supply System debts. REA, however, kept no minutes of the meetings or elaborated on how it would work with its borrowers.

According to REA's files, their field staff warned several borrowers to honor their Supply System debts. For example, in a March 25, 1982, field report, an REA representative wrote in reference to one borrower and its questions on paying its Supply System obligation: "As the system is way past due to come in for a new loan application I felt it was only right to notify their manager as to the obligations of the system well before this goes any further." Another document in REA's files indicated that some borrowers may have been led to believe that the agency would not process future loan applications unless they agreed to pay the obligations. Further, the manager of one cooperative told us that an REA field representative had warned him that REA would replace him and the board if the cooperative challenged its Supply System commitments. The REA representative maintained that he did not make such a warning but only pointed out that REA has the authority to appoint a supervisor to conduct the cooperative's affairs if the borrower has difficulty meeting its obligations.

In an April 21, 1982, letter, REA also requested each borrower to develop and submit a financial forecast by June 30, 1982, indicating how it planned to meet its Supply System obligations, and stated that new loans and advances on previously approved loans would be withheld pending the receipt and review of the forecasts. REA stated that it could not continue approving loans or loan advances until it was assured that satisfactory plans to cover Supply System debts were developed. REA, however, did not specify what constitutes an acceptable financial forecast and advised us that they have no set criteria for reviewing the forecasts or determining whether they are satisfactory. With respect to advances on approved loans, REA advised us that they would continue to make advances if so required despite the letter.

In a May 1982 letter responding to an inquiry from one cooperative regarding the Supply System obligations, REA ignored the borrower's basic question. The cooperative wanted to determine if REA borrowers involved in legal action could withhold payment to the Supply System without objection or penalty from REA, provided that the utility had generated sufficient income to pay the obligation should the legal challenge be unsuccessful. REA's response did not directly answer the question, but stated only that the borrowers were expected to honor their obligations to the Supply System under the 1976 agreement. REA did not advise the cooperative whether or not it would be penalized if it chose to enter a lawsuit. An REA official in a May 1982 congressional hearing did, however, testify to the effect that REA would not penalize borrowers if they participated in lawsuits challenging the obligations.

In discussing the rationale for their recent actions, REA officials told us that they expect the borrowers to begin making their debt service payment to the Supply System beginning in January 1983 as required by contract. We were told that in REA's view, the cooperatives entered an agreement with the Supply System and have an obligation to honor this agreement although many of the borrowers may be faced with serious financial problems in meeting these payments. REA officials acknowledged that default on some of its direct loans to borrowers could increase if these borrowers are required to meet their Supply System obligations.[4] REA, however, has not reached any conclusions on possible defaults because it has not completed its review of borrower financial plans.

Further, these officials maintained that nonpayment of the Supply System debts could have even more serious consequences for REA. REA has taken this position because it is concerned that failure of its borrowers to pay their Supply System obligations could adversely affect REA's $26 billion loan guarantee program and the ability of its rural electric cooperatives to obtain funds in the private capital markets. REA maintains that its loan guarantee program would be adversely impacted if the "take or pay" provision of the Supply System agreement (see appendix I) is not upheld by the courts in the pending lawsuit and the borrowers are not required to pay the debt. Currently, REA guarantees loans to finance construction of power plants from the Federal Financing Bank to generating and transmission cooperatives all over the Nation. To protect REA's interest, generating and transmission cooperatives are required to have similar "take or pay" contract provisions with their distribution cooperatives for selling the power. This assures that the generating and transmission cooperatives will be paid even if power is never delivered, thus assuring that they would have funds to repay the loans.

REA is also concerned that the situation could make it difficult for its rural electric cooperatives to obtain funds from private markets. REA officials expressed concern that failure of its borrowers to honor the Supply System obligations would be viewed negatively by the entire financial community. Such a development, REA officials contend, would affect the credibility of the entire rural electric cooperative sector because the financial markets would perceive more risks in funding cooperative activities.

The National Utilities Cooperative Finance Corporation is a case in point. It borrows money from private capital markets for relending to rural electric cooperatives. Because of the Corporation's financial structure, its creditworthiness is directly tied to that of its member cooperatives. An adverse development with respect to the Supply System could make borrowing more difficult or costly for the National Utilities Cooperative Finance Corporation. Consequently, this could result in less private financing and lead to the necessity for more REA assistance.

AGENCY COMMENTS

A draft copy of this report was provided to BPA and REA for comment. Their detailed comments are included in appendixes II and III. BPA said the information regarding its activities was accurately stated. REA did

[2] The loans to the Supply System by 66 participants, 3 investor-owned utilities, and 12 direct service industry customers were made in equal amounts in Nov. and Dec. of 1981. The effective rate of interest on these loans is 15 percent, and the loans are due on July 1, 1984.

[3] The National Rural Utilities Cooperative Finance Corporation is a private lending organization which provides financing to rural electric utilities and has made loans to 34 of the participants.

[4] These loans amount to about $319 million.

not have any major objections to the report but did offer a number of specific comments expanding on REA's activities. We have evaluated REA's comments and incorporated them into the report where appropriate except for the following comment.

REA stated it has criteria for determining an acceptable financial forecast in REA Bulletin 105-5. We do not agree. The bulletin states that its purpose is "to provide electronic distribution borrowers with suggested forms and techniques for preparing a financial forecast." It does not state what REA's policy is or what criteria must be met to qualify for a loan. In contrast to REA, the National Rural Utilities Cooperative Finance Corporation has an official statement "Policy and Procedures Memorandum-Loans-1" setting forth its specific loan policy and has a supplemental memorandum establishing additional loan conditions for Supply System participants.

We trust this material answers your questions. As arranged with your office, we will not release this report to other interested parties for 7 days unless you publicly announce its contents earlier. At that time, copies will be sent to interested parties and will be made available to others on request. If we can be of any further assistance, please let us know.

Sincerely yours,

J. DEXTER PEACH,
Director.

APPENDIX I

BACKGROUND ON ELECTRIC POWER IN THE PACIFIC NORTHWEST

The diverse nature of regional power development in the Pacific Northwest [1] has given rise to a myriad of regional power supply and power planning institutions consisting of a public, private, and Federal mix. BPA, the major power supplier in the Northwest, currently wholesales approximately 50 percent of the region's power. The remaining 50 percent is generated by a number of private and public utilities and publicly owned utility groups. About 100 public utilities are distributors only, buying their power requirements from BPA.

The Supply System and the Pacific Northwest Generating Company (PNGC) are two utility groups involved with generating power for the regional system. Formed in 1957 under the laws of the State of Washington, the Supply System (made up of 23 utility members) has the authority to acquire, construct, and operate generating plants and other related facilities. The Supply System was formed by the public utilities to enhance their ability to successfully undertake these activities. Formed in 1975, PNGC is currently a consortium of 20 rural electric cooperatives. PNGC activities to date have been primarily limited to purchase of shares in generating facilities owned and constructed by other utilities.

Until the 1960s, nearly all the region's electric energy needs were met by hydroelectric projects built on the Columbia River system. In the mid-1960s, projected future demand exceeded the projected baseload capability of the region's hydropower system. In response, in October 1966, BPA and the region's public and private utilities formed the Joint Power Planning Council, with the BPA Administrator as chairman, to study the region's future need for electric power and to develop a plan to meet that need.

As a result of this effort, the Hydro Thermal Power Program was developed in 1969 to meet forecasted electrical demand by incorporating new coal-fired and nuclear generating plants into the existing hydroelectric system. The initial activities of the program involved constructing seven large thermal plants, expansion of the generating capacity at hydroelectric projects, and further development of the Federal transmission system. The seven generating plants included the Supply System's nuclear units 1, 2, and 3; Portland General Electric's Trojan Nuclear Plant, and Boardman Coal Plant; and Pacific Power and Light's Centralia and Jim Bridger Coal Plants.

BPA agreed to participate in financing the Supply System's units 1, 2 and 3 construction through an arrangement with its preference customers called net billing. Under net-billing, BPA acquires its preference customers' share of the electric power generated by the new non-federally financed thermal plants. This thermal power is integrated into BPA's hydroelectric system and sold to BPA's customers at BPA's rates. In return for the power acquired, BPA assumes the preference customers' share of the construction, operation, and maintenance costs of these plants. BPA pays for these costs by offsetting them against the amounts due BPA for the sale and/or transmission of power or sale of services to the preference customers.

In 1972, BPA's ability to assist in the net-billing financing of additional generating units was halted by two developments. First, due to increases in the projected costs associated with the net-billed plants, the annual cost to BPA was projected to exceed the revenues received from power sales and other services to preference customers. Second, the Internal Revenue Service issued a tax ruling revoking the tax exempt status of municipal bonds sold to finance powerplants if more than 25 percent of the capability is assigned to a Federal agency. These events, coupled with delays in the construction of the net-billed plants, led Northwest power planners to believe they would not have adequate resources to meet projected regional demand growth beyond the early 1980s.

Under these circumstances, the Secretary of the Interior instructed BPA in March 1973 to informally notify its customers that it would be unable to meet their full power requirements beginning in 1982 unless the utilities and BPA could develop another plan. These "notices of insufficiency" were intended to allow time for the utilities to obtain additional resources outside of the Federal system and for BPA to develop a policy for allocating the Federal power available. In December 1973, BPA and regional utilities agreed to a "phase II" of the Hydro Thermal Power Program.

Under phase II, the utilities would continue to construct thermal generating units but without BPA participation in financing of the plants. Additional generation took on a new importance to the region after 1973 when energy shortages caused by low water in the region's reservoirs prompted pleas from utilities that their customers conserve energy. Large industry loads were interrupted and at least one State adopted an emergency power curtailment plan. Due to the oil embargo, the Nation's energy policies were also focused on alleviating energy shortages.

By 1974, the Supply System, with support of the Public Power Council, was pursuing the development of plants 4 and 5 as part of phase II. The Supply System financed the initial development of the two plants with a $17.5-million note issue. These funds began to run out in 1975, and 93 regional utilities interested in purchasing shares of the plants' capability signed option agreements. The option agreements were then used to back the issuance of additional debt. Under the option agreements, utilities gained the right to execute a future agreement to purchase a share of the project capability.

Problems developed, however, with finalizing the formal participants agreements. Utilities were hesitant to sign the agreements unless BPA agreed their participation in plants 4 and 5 would not cause them to lose access to or be penalized in Federal power allocations. In early 1976, BPA alleviated this concern by assuring their preference customers that their participation in the plants would not place them "in a less favorable position than non-participating customers with respect to future allocations of BPA power." Also in June 1976, BPA formally notified their preference customers it would be unable to meet their full requirements after 1983.

Subsequently, 88 preference customers and 1 investor-owned utility agreed to participate in plants 4 and 5. REA also became indirectly involved in the construction of plants 4 and 5 even, though no Federal funding was involved because 41 of the participants were REA borrowers and could not participate in the projects without REA approval.[1] In September 1976, REA authorized its borrowers to participate in the construction financing of the two plants.

Between 1976 and 1981, the Supply System continued the construction of plants 4 and 5. However, construction delays and dramatically increased projected costs ($2.4 to $7.8 billion) began to cause regional concern over the two units. A January 1981 report by the Energy and Utilities Committee of the Washington State Senate raised "serious questions" about whether the plants would be completed. The report questioned whether the Supply System could continue to find buyers for bonds to finance the plants. In March the committee recommended the Supply System consider a "temporary pause" in construction.

In June 1981, the Supply System board, on the recommendation of its managing director, voted to slow down construction of the plants. As the year progressed, financing for the plants appeared in jeopardy, and the Supply System worked on plans to "mothball" the units to avoid terminating them. However, the participants were unable to come to an agreement on mothballing, and on January 22, 1982, the Supply System decided to terminate the two plants. The amount borrowed for these two plants was $2.25 billion and by the time this debt is retired, the principal and interest will amount to about $7.2 billion.

Because of the large financial costs to the participants and the fact that they will never receive power, several REA cooperatives have brought suit.[3] They are arguing

[1] The term Pacific Northwest as used here means the States of Washington, Oregon, Idaho, and Montana west of the Continental Divide.

[1] The Rural Electrification Act as amended (7 U.S.C. 902) authorizes REA to make and guarantee loans to rural electric cooperatives for financing the construction of electric generating, transmission, and distribution facilities. Under REA loan agreements, borrowers may not undertake any new financial obligations unless they are approved by the REA.

[3] Twelve REA borrowers filed a lawsuit on April 23, 1982, challenging the Supply System take or pay contracts.

that the "take or pay" provision of their contract is invalid, and that they do not have to honor their obligation to the Supply System. The Supply System contends that under the "take or pay" provision of the agreement, the participants are required to make payments whether or not the plants are completed or operable.

APPENDIX II

DEPARTMENT OF ENERGY,
BONNEVILLE POWER ADMINISTRATION,
July 22, 1982, Portland, Oreg.

Mr. J. DEXTER PEACH,
Director, Energy and Mineral Division, U.S. General Accounting Office, Washington, D.C.

DEAR MR. PEACH: We appreciate the opportunity afforded us by the General Accounting Office to comment on your draft report regarding the roles of the Bonneville Power Administration (BPA) and the Rural Electrification Administration (REA) in the construction of Washington Public Power Supply System projects WNP-4 and WNP-5. We have reviewed the draft report and find the facts reported regarding BPA activities are accurately stated.

We do not feel competent to comment on those matters relating to REA activities.

I believe you and your staff are to be commended on the objectivity and evenhanded manner in which you approached this complex assignment.

Sincerely,

PETER T. JOHNSON,
Administrator.

APPENDIX III

U.S. DEPARTMENT OF AGRICULTURE,
RURAL ELECTRIFICATION ADMINISTRATION,
July 20, 1982, Washington, D.C.

Mr. HENRY ESCHWEGE,
Director, Community and Economic Development Division, U.S. General Accounting Office, Washington, D.C.

DEAR MR. ESCHWEGE: This is in reply to your letter of July 13, 1982, to Mr. Harold V. Hunter, Administrator, Rural Electrification Administration (REA) for comments on the draft of the proposed report to Congressman George Hansen, entitled "Bonneville Power Administration and the Rural Electrification Administration Actions and Activities Affecting Utility Participation in Washington Public Power Supply System Plants 4 and 5 (GAO/EMD—82-105)." We appreciate the opportunity to review the draft and offer the following comments:

Page 9, first paragraph:

The letter written to all REA borrower/participants on January 29, 1982, was after the Washington Public Power Supply System (Supply System) had adopted a resolution to terminate Plants 4 and 5. Once the decision had been made by the Supply System to terminate, the participants' options were a "controlled" or "uncontrolled" termination of these plants. The earlier efforts to mothball the plants, which REA supported, had failed. It was REA's concern that possible actions arising from uncontrolled termination, including the possible acceleration of the debt of the outstanding bonds, would have an adverse effect on all participants. The acceleration of debt would seriously jeopardize the REA borrower/participants' ability to meet their obligations, including those to REA. Controlled termination, on the other hand, under which the participants were requested to advance funds to the Supply System as needed to provide the resources for an orderly termination of the plants, would forestall such acceleration and provide for repayment of outstanding debt over a much longer period of time. For this reason REA was of the opinion that support of the controlled termination program was the only viable alternative available to its borrowers.

Page 8, second paragraph:

The meetings on February 10 and March 22-23 were not only to discuss REA's position regarding controlled termination but were also an effort to improve communications and formulate a unified approach in addressing some of the issues raised about the controlled termination plan. Basic to both of these meetings were REA concerns over its own security interests in the borrower/participants and that refusal to honor contractual obligations under the 1976 agreement could have an adverse impact on the rural electrification program.

Page 9, bottom of page

Page 10, top of page:

REA's position is that our borrower/participants should honor all commitments made under the 1976 agreement unless otherwise determined by a court of law. REA's concern is that the actions of the borrower/participants who have undertaken legal efforts to resolve any areas of ambiguity which they feel might exist in the 1976 agreement not place in jeopardy REA's first mortgage lien upon the assets of the borrowers. Any claim on the borrowers' assets which could result from these legal efforts would create problems in continuing to advance existing loan funds and in obtaining additional loans from REA by imposing a threat to REA's existing security interests.

At the March 22-23 meeting, REA requested that each borrower/participant prepare a financial forecast on how they would meet their obligations. REA indicated to the group that it shares the borrowers' concern over the impact on rates and would work with the borrowers in developing their financial plans.

Page 10, first paragraph:

REA has certain rights reserved to it under the loan and mortgage documents executed by its borrowers which provide, among other things, that REA may take possession of and manage, control and operate a borrower's system under certain specified conditions of default. A borrower's financial difficulties in itself is not an event of default.

Page 10, second paragraph:

REA does have established criteria for determining an acceptable financial forecast. The criteria is outlined in REA Bulletin 105-5, and is basically the same as that used in connection with preparation and review of forecasts prepared by all of its borrowers on a regular basis. REA field personnel have conducted workshops and worked individually with borrower/participants to develop the financial plans requested by REA. An interpretation of the proper accounting for the Supply System costs and obligations has also been sent to each borrower/participant. REA has agreed to extend the deadline for submission of the financial forecasts as may be needed and to date has received 19 of the expected 41 forecasts.

Page 10, third paragraph:

REA's May 17, 1982, response to an inquiry from Orcas Power & Light Co. states that the "board of Orcas is certainly free to follow the advice of its legal counsel in an effort to resolve those areas of ambiguity which counsel and the board might find to exist in the WPPSS 4 and 5 agreements, providing that in doing so the first security interest in the assets of Orcas held by REA will not be placed in jeopardy." Whether any legal action undertaken by Orcas will be a threat to REA's security interest or not, cannot be judged at this time.

Page 11, first paragraph:

Although some borrower/participants have stated that rate increase sufficient to meet the Supply System obligations, in addition to their other operating costs, would be impossible to implement. REA has not yet completed its review of the financial plans to reach any such conclusion. Depending upon the economic conditions of the borrower's area and the rate increases necessary for the borrower to meet its obligations, the possibility of future defaults will be considered in REA's evaluation of the borrowers' financial plans.

Page 11, second paragraph:

Although it could have an adverse effect on REA's guaranteed loan program, if the "take or pay" provisions of the supply System agreement are not upheld, REA is not of the opinion that the program would be "destroyed".

REA would be happy to discuss any of the above comments with you or your staff.

Sincerely,

JOE S. ZOLLER,
Acting Administrator.

GAO note: Page numbers of the draft report were changed to correspond with those in this final report.●

DO REA AND BPA KNUCKLE UNDER TO BIG MONEY INTERESTS?

(Mr. HANSEN of Idaho asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HANSEN of Idaho. Mr. Speaker, just how much power do the Wall Street bond underwriters have over agencies of this U.S. Government to force collection of bond issues? The following letters, regarding this scandalous Washington Public Power Supply System (WPPSS) and an expected default affecting billions of dollars in bonds, speak for themselves:

DECEMBER 9, 1982.

Hon. JOHN R. BLOCK,
Secretary, U.S. Department of Agriculture, Washington, D.C.

DEAR MR. SECRETARY: Several electric cooperatives in my state have advised me that the Rural Electrification Administration has been urging those cooperatives among the 88 participants in the WPPSS 4 and 5 project to be prepared to make payment on assessments by WPPSS which will come due in January, 1983. The REA position is tantamount to coercion, since it is coupled with allegations that REA will refuse credit to those coops which do not make the payment; will accelerate existing debts and will call all loans between REA and any nonpaying coop.

This stance of REA is unconscionable in the face of the massive litigation now proceeding in several cases contesting the validity of the contract under which these coops are alleged to be responsible for the WPPSS bonds, principal and interest. REA seems to be trying to force the coops involved into a position which would make the result of the litigation meaningless. It is not my understanding that the act of doing business with

the REA requires the waiver of the ordinary rights of parties, including that of a judicial determination of the meaning of so complex a contract as the participation agreement in WPPSS.

There is now an even more compelling reason to refuse payment under the WPPSS contract. The concomitant rate increase to coop customers has been contested in court and at least one coop is bound by a stipulation made to the court in a ratepayer case that it would make no payment under the WPPSS contract until ordered to do so by a court of competent jurisdiction. REA's position seems to be that the coop must go into contempt of court in order to service whatever priorities motivate REA.

I am advised that the Department of Agriculture has already mobilized a task force to move in and displace directors and management personnel of any coop which refuses or fails to pay these WPPSS demands by the alleged due date in January. Aside from the obvious fact that this procedure will result in yet another embarassing litigation, the mere act of planning such a course of action tends to confirm my growing conviction that the only really unforgiveable crime today is to offend the financial power structure. It appears that the WPPSS disaster is having the salutary effect of exposing to public scrutiny the immense power of these financial institutions and the lengths to which even government agencies will go to protect that power.

I strongly urge you to reconsider the attempts to coerce the small coops in the name of maintaining the integrity of the court system and for the basic reason that elemental fairness requires it.

Sincerely,

GEORGE HANSEN,
Member of Congress.

DECEMBER 14, 1982.

MR. HAROLD HUNTER,
Administrator, Rural Electrification Administration, Administrator's Office, Washington, D.C.

DEAR MR. HUNTER: I was pleased to have you come by my office today and renew our long acquaintance. It is particularly gratifying to have so prompt a response to my inquiry to you and Secretary Block. I also appreciate your willingness on Monday to meet and work with co-op delegations from the Northwest to address specific problems. Both your Agency and I are rightly concerned about the effect of the WPPSS situation on the continued operation of those electric cooperatives which look to REA for financial advice and assistance.

As we discussed, my concern is that REA not be or not be perceived as coercing the cooperatives to make payments to WPPSS before the legal liability of the group is determined by a court of competent jurisdiction. I have urged all parties through BPA Administrator Johnson and Secretaries Hodel and Watt that such a court decision may not be as desirable as a negotiated arrangement among the entities involved in WPPSS, including the federal government, the bond underwriters and the participants.

My concern remains that the solution not be arrived at by improper pressure on the participants from a federal agency. I am particularly gratified that you are prepared to enlist the resources of your agency in determining how the contracts were prepared and executed and how the financing history of the project developed. I look to your early follow-through on getting needed answers and pledge my cooperation in arriving at an equitable resolution of a most complex situation.

You can understand that these cooperatives are apprehensive that the REA will use its loan authority as a means of applying pressure on them. It is my understanding that REA has issued directives to participants which they perceive as requiring them to pass resolutions and make payments which would seriously jeopardize their legal positions in court actions; which would require them to take actions contrary to member mandates; which in some cases, would force them to violate orders of regulatory commission. Therefore, it is my hope that our conversation will induce REA to treat approved loans as outside the issue here and process them normally.

One serious question is the manner in which the bonds financing the WPPSS project were structured. As you know, I have asked key government people and the underwriters themselves to publicly reveal who now owns the bonds, how the rate of return was set and why the final nine issues were let on a negotiated rather than a competitive basis.

So that you will understand my concern about the potential for government agencies working for the financial community rather than for those for whom they are mandated to assist, I call your attention to comments by one Edward Kresky, a financial adviser to BPA. He says that the financial community feels that the 88 utilities are "able to pay but won't". Assuming that to be true, how does it bear on the mandate of REA and BPA to service and protect the legal rights of these entities and not the Wall Street community?

This same man says that participants who refuse to pay will be banished from the credit markets. Since he is speaking as a consultant to BPA, is he enunciating the government position even as to government financial credit? I think that it is past time for BPA and REA to come forward and make it clear whose interests they are protecting in this scandalous matter. It is further incumbent on both organizations, which, it appears, collaborated to induce the 88 to enter a participation agreement which both agencies had approved in advance, to make a full disclosure of all facts in their possession bearing on Agency decisions and activities, and obligations of the various parties. Such disclosure should also require the financial institutions to reveal fully the economic history of the project, including who holds the bearer bonds issued by WPPSS.

Another prime question is how were the ratings for the bonds arranged so at variance with the known facts regarding the condition of the project. I do not need to remind you that at this point only one of the five plants has any immediate prospects of being completed.

As we discussed, I am disturbed that the two principal government agencies involved, BPA and REA, have demonstrated more interest in forcing the participants to pay than in determining whether, given all the unusual circumstances surrounding the financial arrangements in WPPSS, there was any impropriety involved? The participants will, to the extent they have the capacity, pay what they owe on the WPPSS projects. Of this I am confident and I support that position. The overriding questions remain, what do they owe? Is the contract binding? Was the underwriting above reproach? Were the participants induced to enter the arrangement for the reasons given publicly, or were they brought in to bail out an already deteriorating situation?

I look forward to your prompt assistance in obtaining answers to the questions I have stated and others. I am also reassured by your report that, although a task force had been considered, at present no such move is contemplated over the issue of WPPSS payments.

I will continue to give close attention to the WPPSS matter and the relationship between the REA, BPA and the participants. I expect that your administration and this office can cooperate in that endeavor and hope you will keep me current on developments within REA in those matters concerning any co-ops which are participants as they are affected by the WPPSS situation.

Again, I look forward to working with the Administration in solving the situation with the minimum of damage to all the parties.

Sincerely,

GEORGE HANSEN,
Member of Congress.

STATEMENT BY CONGRESSMAN GEORGE HANSEN
RE: GAO WPPSS 4 AND 5 REPORT

The General Accounting Office (GAO) report I have now received regarding WPPSS 4 and 5 confirms a government induced financial disaster for public power users of the Pacific Northwest, a disaster which could well bleed the area into an agricultural depression and severe general economic hardship.

The Bonneville Power Administration scared the small city and cooperative power companies into signing on with the Washington Public Power Supply System (WPPSS) or they would probably loose their low rates and guaranteed supply.

In the meantime, the big public power empire builders, including BPA, were issuing incredible demand forecasts calling for construction of twenty 1,000 megawatt nuclear plants, five to be built by or through the federal government.

Incredibly, none of the 15 proposed private nuclear plants moved ahead, but all 5 of the proposed public plants did to disastrous consequences. And even last year's 1981 WPPSS annual report was still reflecting a need beyond the 5 huge plants under construction.

The Federal Government through BPA continued to encourage this mammoth bonding and building program until the public power users of the Northwest were into debt some $25 billion dollars for huge unfinished nuclear plants now being junked one by one with no real guarantee that any of them will ever deliver electricity.

Now the cost is scandalous enough, but, when the 88 small municipal and cooperative power companies found that construction on WPPSS 4 and 5 was being terminated and they would be directed to pay massive assessments with no power supplied, they were stunned.

It didn't seem fair but there they were with BPA and many federal officials telling them that they were bound by contract and that it must be honored. The hammer came down even harder when the REA told the cooperatives that their government financing would be jeopardized if they didn't get on schedule and pay up.

The REA, the BPA, and the U.S. Department of Justice lined up with coercion, with legal fees, and with law suits to insulate and protect the big money interests of Wall Street from the mismanagement, damaging forecasts, cost overruns and questionable practices to assure the continued smooth

flow of billions of dollars from the Northwest to New York.

The Iran hostage crises, the Panama Canal giveaway, the journeys to the moon—none of these billion dollar affairs comes close to the cost of the WPPSS fiasco, all to be borne by the 7 million people of the Northwest.

Certainly there is a case for defense; certainly there is a cause to fight for justice and survival.

AUGUST 2, 1982.

Open letter to: Northwest cities and public utilities.

Re: General Accounting Office (GAO) report to Congressman George Hansen of July 30, 1982 (GAO/EMD-82-105).

GENTLEMEN: Around the turn of the year, some of your member groups brought the problem of the termination of the two projects known as WPPSS 4 and 5 to my attention. I told you then that I was not sure what legal recourse might be available or what could be done at the federal level about the enormous economic disaster posed by these terminations to the small consumers in Idaho and the Northwest. However, we agreed that I would investigate the matter and that we would work together to limit and, with any luck, to eliminate the damage to the cooperatives, municipals and their consumers in the area.

After initially exploring several legal possibilities and any legislative potential, I asked the General Accounting Office for an investigation to obtain necessary answers to several key questions. Those questions, posed to GAO on April, 1982, boiled down to three. First, did the federal government have a part in inducing the preferred clients of BPA to participate in WPPSS 4 and 5? Second, did the federal government take part in the decision-making to terminate 4 and 5, thereby leaving its preferred customers in the position of buying energy they would not get and paying for the construction of generating capacity which would never generate? Finally, and most important, did the federal government use its power to coerce these entities not to contest the contracts under which they are constrained to pay for the incompetence of others, the so-called take-or-pay provisions?

On Friday, July 30, 1982, the GAO delivered its report to me. With out exception, the conclusions are that the federal government through its agencies, the BPA and REA, was the moving force at every step of the way in the process which that same government now contends leaves the small users with no recourse but to pay up. GAO found: (1) "BPA provided electric demand forecasting help to small regional utilities, endorsed the need for additional generating units, supported utility participation in the plants, and acted to indirectly facilitate termination of the plants." (2) "REA directed its borrowers to pay their debts to the Washington Public Power Supply System and implied their financial standing with REA could be affected if their obligations on plants 4 and 5 are not met."

You are much more familiar than I am with the multiple law suits which are now in court and with others which undoubtedly will yet be filed over this issue. You are at least as aware as I am of the continuing pressure on your groups to back away from defending yourselves and your customers. Also, I have noted that you are the object of advice from federal officials which ranges from the suggestion that you individually go bankrupt to protect your credit, no less, to the argument that you entered the contracts with you eyes open and that you should willingly take you medicine and not disturb the government with your complaints.

However, the clear indication I now bring to you from the GAO that your allegations to me were absolutely correct, along with the suits now filed, signify that we are not at the end of the matter, but only the beginning. I am no lawyer and claim no command over the technicalities of jurisdiction and contract clauses. But I do know the distinction between right and wrong; fair and unfair. It is clear after months of probing, that you are right and are being treated unfairly. I do not know if this fight can be won, but I want to assure you that if you don't quit and want to press on, I am in it with you to the finish.

There are many more questions which now need to be answered. Was the entire plan to include WPPSS 4 and 5 hatched for the purpose of widening the financial base of support for the issuance of public bonds on the project? That seems to be the very bludgeon which REA holds over the heads of the "preferred customers." I have seen no satisfactory answer to the question of why REA, whose purpose was to bring the benefits of the technological revolution to the rural areas of America, is so concerned about the ratings of bond issues on Wall Street.

We all understand the financial benefits of a good bond rating, but the fever in the REA's reaction to this case indicates that there could be a good deal more here than meets the eye. A look at the record of WPPSS financial affairs tends to confirm that the financial stability of a doomed project in the Northwest is only a minor part of what is really at issue.

It is no secret that the actual cost of building these huge nuclear plants is only a fraction of what the finance costs will be. Tens of billions of dollars are involved making WPPSS, according to a recent magazine article, the world's largest debtor after the United States Government. The middle men of Wall Street, the bond underwriters and salesmen and attorneys have already made a killing and will make yet millions more before the mess is over. Make no mistake. They have risked nothing. They get paid to underwrite the bonds and they get paid again to sell them. And since, when they flip their own wall switches, the power comes from Consolidated Edison of New York, they have no personal stake in the economic problems of the Northwest.

WPPSS has gotten most of its legal and financial advice from New York. The principal underwriters of the bonds are New York investment houses. Is the REA so concerned about the rural electrification of New York City? As we all know, it is the buyers of the bonds who take any ultimate risk. The financiers of Wall Street with their three-piece suits are only middle men taking a cut from the little consumer on one side and the small investor on the other. Is it any wonder that they don't want the 88 to rock their comfortable boat which is siphoning billions of dollars from the Pacific Northwest to the bond markets of New York.

In order to pin down more accurately exactly the relationship between the bond market and decisions on the survival of 4 and 5, I have written Peter Johnson, the manager of BPA, a letter requesting a time sequence laying out the dates of key decisions on the construction of WPPSS 1 through 5 and the dates of key decisions on putting more bonds into circulation. Perhaps we can find out for whose benefit the entire project was conceived and ultimately cancelled since there is not a single plant in the WPPSS complex which is totally guaranteed to become operational ever.

If everything that the preferred customers of BPA told me did not raise questions, the strange story of Proposition 394 in the State of Washington would, by itself, be sufficient to warrant inquiry. 394 was an initiative offered to the voters of Washington requiring voter approval of future bond sales by WPPSS. As you all know, it passed overwhelmingly.

There is nothing odd about that, given the track record of WPPSS. What is odd is what has happened since. BPA, a federal entity, is funding a suit to void the initiative brought by three private Seattle banks. More startling still, the U.S. Department of Justice has joined in the same cause against the right of the taxpayers of Washington to limit the power of WPPSS to borrow in the future.

Should we be surprised that the Department of Justice would take such a position? At the very highest levels, the managers of its policies are from the very financial interests on Wall Street which would be hurt if the people took control of the use of their own finances. In the same regard, I am reminded that another agency of the Federal Government, the Internal Revenue Service, had a large part in distorting the natural economic decisions of the victims of the Teton flood disaster, who ironically, because of IRS pressure, become investors in the WPPSS tax exempts. You will remember that in that case the IRS doggedly clung to the position that the reimbursement for flood damage paid by the federal government to these victims was a captial gain.

In a nut shell, this is why no one can guarantee that the 88 and their customers, the little people, can win. The banks, the bond underwriters and the federal government are lined up together defending their time-honored right to shear the people and they seem prepared to tolerate no opposition to that right. Nonetheless the fight is worth waging, and, in my opinion, must be waged if many of the 88 as well as the customers you serve are to survive.

We may be able to win for ourselves and for the rate payers who will be paying off this bonded debt into the 21st century. But of almost equal importance, we will alert others that the fleecing we took in the Northwest came from blind reliance on the federal government and on Wall Street. We at least will have alerted other victims in other parts of the country not to follow our example, and the concurrent example of the people in the Tennessee Valley.

Lest anyone think that my skepticism is born out of the current disaster, let me quote what I said before the situation had been revealed when the Northwest Power Bill was before Congress on November 17, 1980. "However, my support is given with a serious warning as to the pitfalls I envision. We must be prepared to deal with any resultant problems quickly and effectively as they arise and at whatever level of government necessary. Not to do so may be disastrous for a single state like Idaho or even all the states involved in any conflict with powerful special interests or if an attempt to submerge states rights by expedient or unwise federalization begins to materialize." Unfortunately that day has arrived.

The bottom line of the GAO report has to be that any course of action to protect the

ratepayers is the responsibility of the managers of the utilities involved in WPPSS 4 and 5. I am satisfied that, based on the investigative findings, there are reasonable grounds for protest. My principle purpose for involvement has been and continues to be to assist you in pursuing any viable course of action designed to protect the economic interest of the citizens of Idaho and the Northwest region.

Your past cooperation is deeply appreciated and I welcome and encourage your studied reaction at the earliest time so that further initiatives can be pursued.

Sincerely,

GEORGE HANSEN,
Member of Congress.

AUGUST 2, 1982.

Mr. J. DEXTER PEACH,
Director, U.S. General Accounting Office, Washington, D.C.

DEAR MR. PEACH: Thank you for your report on the federal involvement affecting participation by the small distributors in the WPPSS project. I am sure that it will be most helpful in clarifying the relationships among the parties.

Both from the contents of your report and from other sources investigating the WPPSS matter, it now appears that BPA had a major role in all phases of the WPPSS history, including financing and terminating the various elements of the overall project. In view of the original perception that BPA was a bystander in the decisions, it is my intention to further request that your office secure answers to some questions which derive from BPA involvement.

In general, my concern is in the area of the obligation of entities which borrow on the bond market and goes in two directions. As soon as possible, I will direct specific questions to you with regard to (1) the nature of the legal limits on the borrower to use the proceeds of such borrowing for the specific purpose for which it was borrowed. And (2) a different but related question has arisen concerning the consequences to the borrower of an allegation as to the nature of the assets against which the borrower sells his bonds.

Since you have direct experience in the BPA/WPPSS situation, it is my hope that your inquiry will shed much needed light on the area of the financial rights and liabilities of the various entities involved.

The specific questions will be directed to you shortly.

Sincerely,

GEORGE HANSEN,
Member of Congress.

AUGUST 2, 1982.

Mr. PETER JOHNSON,
Administrator, Bonneville Power Administration, Portland, Oreg.

DEAR PETER: As you are aware from our conversation in my office and other visits I have had with you and members of your staff regarding the Washington Public Power Supply System (WPPSS) matter and involvement of Bonneville Power Administration (BPA) in the disaster which it has become, I am greatly concerned about the adverse consequences on the small power distributors and consumers of the Northwest of the plant terminations which your Agency had a large part in ordering.

So that I might get a clearer perspective on the events and forces which operated to produce the unfortunate current situation, I ask you to provide me with background information on the decisions which led to the situation as it now exists. Please reconstruct for me a chronology of the decisions to build and then to terminate those plants which are now certain not to be built.

In addition, will you please provide me with the dates on which final determinations were made to issue bonds against the project and specify as to each issue, the asset against which that issue was to be made. In this way, it may be possible for me to fully understand the relationship between the construction decisions and the financial forces which were part of the decision making process.

I understand the magnitude of the problem you have inherited and am grateful for your offer of cooperation in getting to the facts and solutions necessary to properly deal with it.

Sincerely,

GEORGE HANSEN,
Member of Congress.●

PUBLIC WARNED CONCERNING BOND PURCHASE

(Mr. HANSEN of Idaho asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HANSEN of Idaho. Mr. Speaker, there is good reason to alert the general public regarding any purchase of bonds on this Washington Public Power Supply System (WPPSS) and demand an immediate congressional investigation based on the facts presented in this following letters and documents:

DECEMBER 8, 1982.

OPEN LETTER TO PEOPLE OF THE STATE OF IDAHO AND THE PACIFIC NORTHWEST—WARNING TO GENERAL PUBLIC CONCERING PURCHASE OF WPPSS BONDS

For several months, I have been attempting to ascertain the owners of the various issues of the bonds of the Washington Public Power Supply System (WPPSS). These bonds were issued to defray the costs of construction of five nuclear power plants to provide energy to the public power systems of the entire Northwest, including sixteen organizations in the state of Idaho.

My concern has been two-fold. First, to protect the ratepaying customers of the municipal and cooperative power suppliers from having to pay improper and exorbitant rates to cover the interest and principal of these bonds. Second, to protect innocent purchasers of the bonds from the consequences of the failure of the WPPSS system to provide the promised energy and therefore, to generate the revenues necessary to pay out on the bonds.

As you are by now aware, there is substantial legal opinion that these bonds are revenue bonds. That is, that they are payable exclusively from the proceeds of the sale of the energy produced by the plants. It is also now common knowledge that at least two and possibly four of the projected five nuclear plants will never produce any electrical energy.

You might think that it is an easy matter to find out who owns the bonds. It isn't. The reason that there is so much difficulty in finding out such a simple fact seems to be that the bonds may be held by the very underwriters who issued them. So far they refuse to say how much of this financing they own. Their unwillingness makes it appear that they are afraid someone might think that their retention of the bonds is improper.

Whatever the reason, all the indications are that there is a serious problem with the issuance and pricing of these bonds. Until this matter is cleared up, prudent investors will be well-advised to consider carefully before purchasing these securities. The value of the bonds themselves is at issue as is the value in the hands of persons or entities who acquired them as the end product of improper conduct.

I have made a direct request of the financial institutions concerned for the amount of bonds they hold and have also called for a Congressional investigation to determine these and other answers to the WPPSS calamity. In the meantime, forwarned is forearmed. It is in that spirit that I make these observations known to you.

Sincerely,

GEORGE HANSEN,
Member of Congress.

DECEMBER 3, 1982.

HANSEN CONTINUES DEMAND FOR INVESTIGATION OF BANK MANIPULATION IN WPPSS SCANDAL

WASHINGTON, D.C.—Congressman George Hansen is joining with other Northwest Congressmen in a Congressional Resolution calling for the appointment of special counsel to investigate the scandalous Washington Public Power Supply System (WPPSS) operations which threaten Idaho and the Pacific Northwest with financial disaster.

Hansen, whose previous investigation by the General Accounting Office proved the intimate involvement of the federal government in the financial collapse of the multibillion dollar project said, "We have now established the need to get complete facts on WPPSS history from the beginning, including the manner of financing and how and by whom it was arranged."

"It has taken us a long time to get any official attention for the injustice done to the ratepayers of the Northwest and we do not intend to stop until they are treated fairly," Hansen stated.

Hansen said that the reluctance of Congressional Committees to take on powerful investment banking interests on Wall Street was emphasized this week when he was advised by the Chairman of the House Banking Committee that after four months of consideration the Committee declined to investigate on the grounds they lacked jurisdiction.

"At the suggestion of Banking Committee Chairman Fernard J. St Germain," Hansen continued, "I am requesting Chairman John D. Dingell of the House Energy and Commerce Committee to proceed immediately with that investigation." "To avoid further footdragging, however, we are also pursuing the special investigator resolution," Hansen pointed out.

"I knew that challenging the banking bosses would be tough," said the Idaho lawmaker, "so it comes as no surprise that my pressing for a thorough investigation is being treated as a hot potato."

Several months ago Hansen charged that the entire project had begun to look like it was put together for the profit of the Wall street investment community. He pointed out that there is reason to believe that the underwriters who issued the bonds for WPPSS put them out without competitive bidding "and that means they set their own

rate of return," the Congressman noted. "The most damning fact of all," he continued, "is that there is substantial reason to believe that these same underwriters retained the bonds in their own portfolios."

Hansen said that that course of conduct looked to him like a violation of the antitrust laws at minimum and an outright theft at the worst. "You have to remember that it is the rate payers of Idaho and other Northwest states who will pay for these manipulations—and the amount now stands at some 26 billion."

DECEMBER 3, 1982.

Hon. JOHN D. DINGELL,
Chairman, House Committee on Energy and Commerce, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: I wrote to you on November 24th concerning the misfortune of the nuclear energy problem in the Pacific Northwest. That letter asked you to undertake an investigation of the multibillion dollar disaster caused by the collapse of the Washington Public Power Supply System (WPPSS) operation and the complaints of improper and illegal actions involved.

In a letter dated November 30, Chairman St Germain of the House Banking Committee has advised me that that Committee lacks jurisdiction to undertake the investigation necessary to determine the facts surrounding the WPPSS collapse. He suggests that the House Energy and Commerce Committee has the appropriate authority "including jurisdiction over the Securities and Exchange Commission or securities underwriting." This hopefully resolves any jurisdictional concern and should open the way for your Committee to act without delay.

I therefore renew my urgent request to you to have your Committee on Energy and Commerce commence as soon as possible a thorough investigation of the entire problem-ridden history of the WPPSS project. Time is of the essence since we are within a few short months of a perhaps irreversible default in bond payments which could conceivably trigger a financial crisis seriously damaging to the future of the Northwest as an industrial and farming area and to the entire financial under-pinning of the nation's public utilities.

Sincerely,

GEORGE HANSEN,
Member of Congress.

DECEMBER 8, 1982.

Hon. JOHN D. DINGELL,
Chairman, House Committee on Energy and Commerce, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Enclosed is more information for you investigation of WPPSS.

The copy of the letter to the CEO of a major financial institution is typical of similar requests to other firms involved.

Sincerely,

GEORGE HANSEN,
Member of Congress.

DECEMBER 9, 1982.

Hon. JAMES T. BROYHILL,
Ranking Republican, House Committee on Energy and Commerce, Rayburn House Office Building, Washington, D.C.

DEAR MR. BROYHILL: Enclosed is more information for your investigation of WPPSS. The copy of the letter to the CEO of a major financial institution is typical of similar requests to other firms involved.

It is difficult to keep track of all the apparent anomolies in this matter. Both Standard and Poor's and Moody's give these bonds very high ratings, even after there was public knowledge that there were terminations in the offing for WPPSS 4 and 5. But, in addition, even after all but WPPSS 2 were put in the doubtful category, the bonds still rated as though they were prime investments. On what basis could such ratings conceivably be compiled?

As a further example, it is almost impossible to find an investor in WPPSS bonds. Who now owns almost $7 billion in bonds? Why was the form of bond changed from registered to bearer at just about the time that the rates of return began to climb so rapidly? Was such change designed to disguise ownership? Was it to make undisclosed transfer easier?

And why were the last 10 WPPSS issues let on a negotiated basis? How were these exorbitant rates of return set? How, after WPPSS 4 and 5 went down, was the same management able to float the largest single bond issue to that time in the history of the United States, and on a AAA rating? And these are just a few of the unanswered questions.

I will contact you further personally as we discussed.

Sincerely,

GEORGE HANSEN,
Member of Congress.

DECEMBER 8, 1982.

Hon. FERNAND J. ST GERMAIN,
Chairman, Banking, Finance and Urban Affairs Committee, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Thank you for your letter of November 30, 1982. The enclosed may be of interest in how the need for House investigation is developing.

The copy of the letter to the CEO of a major financial institution is typical of similar requests to other firms involved.

Sincerely,

GEORGE HANSEN,
Member of Congress.

Enclosure.

DECEMBER 8, 1982.

Hon. JAKE GARN,
Chairman, Senate Banking, Housing, and Urban Affairs Committee, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Enclosed is more information for your investigation of WPPSS.

The copy of the letter to the CEO of a major financial institution is typical of similar requests to other firms involved.

Sincerely,

GEORGE HANSEN,
Member of Congress.

DECEMBER 8, 1982.

Mr. ROGER E. BIRK,
Chairman and Chief Executive Officer, Merrill Lynch & Co., Inc., New York, N.Y.

DEAR MR. BIRK: The name of your firm has been provided to me as one of the underwriters of a series of bond issues on the WPPSS project in the Pacific Northwest. You may be aware that I have asked for a Congressional investigation of the entities involved in WPPSS and their parts in the economic calamity which it represents to the people of the Northwest. Among the many reasons for conducting a thorough investigation of the factors which led to the disruption of the WPPSS project is the intimate involvement of the underwriting community in the terms of contracts, the cost of credit and the distribution of liability on such a disastrous affair.

Members of the group which has underwritten the WPPSS bonds have informed us that the current ownership of the bonds in question is in a very few entities, principal among which are the underwriters who procured the issuance of the bonds. I would appreciate your cooperation in determing who owns the WPPSS bonds and accordingly ask you to advise me which of the enclosed list of bonds your firm holds and in what amounts.

As you are no doubt aware, members of your financial community have raised the concern that investigation of the facts surrounding the issuance of the WPPSS bonds will undermine the confidence of the investment community. However, that confidence has already been dealt a devastating blow and I believe that your assistance to the Congress in acquiring the necessary information can expedite a solution to the current problems and also make a recurrance of the WPPSS matter less likely. On the other hand, resistance to the uncovering of the facts can, rightly or wrongly, leave the impression that the underwriters have something to hide and that further loss of investor confidence will be more a result of the actions of those who created and used WPPSS than of those who are seeking to know how and why it happened in order to expedite a solution.

There is reason to believe that, with the cooperation of all the interested parties, the damage done by the WPPSS failure can be contained and distributed among those responsible in some reasonably just proportion. The Shearson suggestion was a step in this direction and I currently have more comprehensive proposals for a cooperative effort before BPA and Cabinet officials.

I am sure that you are aware that dates are fast approaching, beyond which negotiated arrangements will be much more difficult, if not impossible. I therefore urge your prompt consideration and response to the request outlined in paragraph two.

Sincerely,

GEORGE HANSEN,
Member of Congress.

CHRONOLOGY OF SUPPLY SYSTEM—FINANCINGS FOR PROJECT NOS. 1, 2, 3, 4, and 5.

[Dollars in millions]

Project	Sale date	Par value	Successful bidder	Interest cost (percent)
I. Project notes:

[1] Negotiated Sale-Senior Manager. Competitive bid price was deemed too high by Supply System board, and a negotiated sale was commenced with results shown above.
[2] Negotiated Sale (Senior Lead Manager indicated).

Note: All outstanding bonds for Projects Nos. 1, 2, and 3 are rated "AAA" by Standard & Poor's; and "Al" by Moody's. All outstanding bonds for Projects Nos. 4/5 are rated "BBB+" by Standard & Poor's; ratings have been suspended by Moody's.●

NEGOTIATIONS DEMAND TO PREVENT MULTIMILLION-DOLLAR DEFAULT

(Mr. HANSEN of Idaho asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. HANSEN of Idaho. Mr. Speaker, the Nation's bond market is dangerously close to a $26 billion default as attested by the following news article, a default which can yet be prevented through swift and decisive action by key officials of the U.S. Government as outlined in the letters and article following:

[From the Wall Street Journal, Friday, Dec. 17, 1982]

WASHINGTON PUBLIC POWER IS THWARTED IN BID TO PAY OFF DEBT

SEATTLE.—A Washington State court judge dealt another blow to the ability of Washington Public Power Supply System to pay off $2.25 billion in bonds issued to finance two of the system's nuclear power plants.

Superior Court Judge H. Joseph Coleman ruled that Washington State utilities don't have to assume the debt of utilities in other states for the Washington Public Power bonds.

The judge said that the so-called "step up" provisions in the contracts between Washington Public Power and the 88 utilities sponsoring the power plants weren't valid.

The provisions called for the utilities to increase their share of debt payments if

other utilities in the system were unable to pay.

A Washington Public Power spokesman said the system will appeal the ruling on the step-up provision.

The decision was made in the case of Chemical Bank of New York, trustee for the bondholders, against the power supply system and the 88 participants over the contracts requiring the utilities to pay. A trial is scheduled for Jan. 10. The decision on the step-up provision was made in a pre-trial hearing.

The bonds are backed by "take or pay" contracts signed by the 88 utilities. Under the contracts, the utilities are committed to paying off the debt incurred for the two power plants, regardless of whether the plants ever generated power. Courts in Oregon and Idaho have ruled that utilities in those states lacked the authority to sign contracts with Washington Public Power and therefore don't have to pay the debt.

The two abandoned, partly finished plants are among five originally planned by Washington Public Power. They were abandoned because of an unexpected decline in energy demand in the region.

As reported, Standard & Poor's Corp. downgraded the bonds on Washington Public Power's nuclear projects Nos. 4 and 5 to a speculative single-B from triple-B-plus, saying the system's ability to pay debt service on the bonds after July 1 is "uncertain."

Washington Public Power must make debt payments of $94 million in January and July.

Washington Public Power currently pays interest on the bonds out of a fund that is expected to run out in February.

After that, the termination plan for the plants calls for the participating utilities to be billed to pay off the bonds.

Eileen Titmuss, municipal bond analyst at Drexel Burnham Lambert Inc., believes the ruling means that "default is even more imminent."

The judge's ruling also said that the trial will consider whether contracts between Washington Public Power and the utilities are valid. He said that court records indicate that Washington Public Power misrepresented some facts when seeking the participation of utilities in the two nuclear plants.

NOVEMBER 24, 1982.

Mr. DONALD HODEL,
Acting Secretary,
U.S. Department of Energy,
Washington, D.C.

DEAR DON: As you know, I have communicated extensively with your office recently regarding the difficulties and controversy surrounding the disastrous failure of nuclear projects of the Washington Public Power Supply System (WPPSS).

Although the recent General Accounting Office investigation I requested has confirmed my concern that the small electric distributors know as the 88 were not receiving fair treatment in the allocation of liability for the WPPSS failure, I have taken the position that it is of primary importance for all the involved parties to settle the areas of responsibility among themselves and reach a negotiated settlement. Certainly the "billion dollar crap-shoot" going on in the courts gives little comfort to any of the concerned parties or to the future of the nation's energy needs, and the financing of public utilities.

The current multiplicity of court actions with conflicting results only serves to convince me that the negotiation of these differences with an apportionment of the financial obligations is imperative. I am enclosing a letter to that effect which I recently wrote to Peter Johnson, who currently holds your old position as BPA Administrator.

With the future of the nation's energy program hanging in the balance, it is my hope that you, as one who best knows the situation and who now holds the key position involving the nation's energy policy, will endorse my proposal for an early negotiated settlement and use your good offices to urge Mr. Johnson and others to cooperate in such action. I am reliably informed some of the other parties at interest will be receptive to such a suggestion.

Sincerely,

GEORGE HANSEN,
Member of Congress.

P.S.—I appreciated our conversation today concerning the WPPSS situation and this proposal. Hopefully positive steps can soon be taken to effectively work toward an early and acceptably (equitable) solution.

NOVEMBER 24, 1982.

Hon. JAMES G. WATT,
Secretary,
U.S. Department of the Interior,
Washington, D.C.

DEAR JIM: As you know, I have communicated extensively with your office regarding the difficulties and controversy surrounding the disastrous failure of nuclear projects of the Washington Public Power Supply System (WPPSS).

Although the recent General Accounting Office investigation I requested has confirmed my concern that the small electric distributors known as the 88 were not receiving fair treatment in the allocation of liability for the WPPSS failure, I have taken the position that it is of primary importance for all the involved parties to settle the areas of responsibility among themselves and reach a negotiated settlement. Certainly the "billion dollar crap-shoot" going on in the courts gives little comfort to any of the concerned parties or to the future of the nation's energy needs, and the financing of public utilities.

The current multiplicity of court actions with conflicting results only serves to convince me that the negotiation of these differences with an apportionment of the financial obligations is imperative. I am enclosing a letter to that effect which I recently wrote to BPA Administrator Peter Johnson.

With the future of the nation's energy program hanging in the balance, it is my hope that you, as one who is most familiar with the problem and who holds a key position involving the situation, will endorse my proposal for an early negotiated settlement and use your good offices to urge Mr. Johnson and others to cooperate in such action. I am reliably informed that some of the other parties at interest will be receptive to such a suggestion.

Sincerely,

GEORGE HANSEN,
Member of Congress.

P.S.—This letter comes to you as Chairman pro-tem of the Cabinet Council on Natural Resources and the Environment of which the Department of Energy is a part. Similar correspondence has been sent to Secretary-designate Hodel. Your assistance is sincerely needed. Many thanks. GEO.

[From the Idaho State Journal, Sept. 24, 1982]

HANSEN PUSHES BPA CHIEF ON WPPSS SETTLEMENT

BOISE, IDAHO.—Rep. George Hansen, R-Idaho, said Thursday he has sent Bonneville Power Administration chief Peter Johnson a letter urging him to call a conference to settle the many disputes over the ill-fated Washington Public Power Supply System.

Without some effort to resolve legal action involving WPPSS, bond underwriters and purchasers and the 88 Pacific Northwest utilities involved, Hansen said, the disputes could drag on for years and run up enormous legal bills.

Hansen has been pushing for federal investigations into the WPPSS project. It originally was to involve the construction of five nuclear power plants in the state of Washington, but plants 4 and 5 have been abandoned and work suspended on plant 1.

The projects were halted because of cost overruns and declining forecasts of Pacific Northwest power needs.

Hansen said there "is no longer any serious question about the intimate involvement of the federal government" in the WPPSS projects, from "inducing participants to coercing payment."

In the letter to Johnson, Hansen said various investigations leave "the clear indication" that BPA was involved in decisions made by WPPSS on issuing bonds to pay for the project.

"Whatever the motivation of any of the parties in so complex a project as the failed Washington nuclear plants 1 thru 5, it becomes increasingly clear that no particpant is without some responsibility for the outcome," Hansen said.

He said lawsuits appear to be the least-satisfactory way of resolving the many questions about the project.

SEPTEMBER 23, 1982.

Mr. PETER T. JOHNSON,
Administrator,
Bonneville Power Administration,
Portland, Oreg.

DEAR PETER: Recognizing your concern for the ultimate well-being of public power in the Northwest, I am writing to review with you recent developments in the WPPSS controversy and, as a result of that review, to propose some modest steps which should contribute to a solution of the situation with as little damage as possible to the involved entities.

That the best hope for resolution must start with limiting the damage to the smaller preferred customers of your Agency is a sad commentary on the entire misadventure. These smaller users (the so-called 88) have already suffered substantial damage since they were induced to lend themselves to the WPPSS 4 and 5 projects.

When I first took an interest in the WPPSS scandal, I warned the Idaho cooperatives and municipalities that I would not and could not support a federal "bailout" of these groups merely because they had made a bad deal. The focus of my endeavors has been to determine whether the Federal Government, directly or through one or

more of its agencies, had acted improperly to induce or coerce the 88 into the WPPSS project in a way to create a moral and/or legal duty on the part of the government to make restitution to the damaged parties.

Based on GAO reports, publications by the BPA and the REA, statements and pleadings in cases arising out of the WPPSS matter like the I 394 litigation, and the very terms of the participants' contracts, there is no longer any serious question about the intimate involvement of the federal government in every phase of the entire project from inducing participation to coercing payment. Even more disturbing is the clear indication that BPA was involved in decisions made by or on behalf of WPPSS on issuing securities against the project.

Whatever the motivation of any of the parties in so complex a project as the failed WNP plants 1 through 5, it becomes increasingly clear that no participant is without some responsibility for the outcome. In the case of WNP 4 and 5, it is now beyond dispute that the federal government bears a major share of the responsibility for the eventual outcome. In addition, it is now apparent that the bond underwriters also have a substantial liability for both the provisions of the participant's contracts and for representations made to purchasers of the securities issued on the WPPSS project.

Now that the facts are beginning to demonstrate that responsibility is distributed among a large number of entities, the original position of the 88 becomes more important. Despite serious question as to the validity of some, if not all of the 88 contracts, these distributors have consistently taken the reasonable position that they were not opposed to accepting a fair share of the actual cost of construction and termination of the WNP 4 and 5 plants.

Litigation now seems to be the least satisfactory device for resolution of the differences among the parties and claimed beneficiaries of 4 and 5. Leaving aside the questions of commingling of WPPSS assets and the questionable enforceability of the bonds against the 88 or perhaps even WPPSS, the other complexities would appear to be better handled by a negotiated agreement among the groups involved on sharing the loss on 4 and 5.

While I do not speak for any of the participants, I am convinced that an initiative by the Administrator of BPA seeking a conference toward negotiated settlement would be well received. BPA, as the prime mover of WPPSS, should probably chair such a meeting and the 88, the bond underwriters, bond trustees, involved federal agencies, and perhaps even official representatives of the states of the Northwest should be participants. I fear that without such a conciliation, the holders of many of the bonds will be left without recourse, except possibly against the underwriters.

I urge you to give such a conference serious consideration and I pledge my cooperation in any way possible to assist in the fair resolution of the matter. The opportunity to preserve public and nuclear power in the Northwest and perhaps in a much wider area should be, from your own standpoint, worth the effort in itself. Any early conference could save enormous litigation expense, materially shorten the time necessary to resolve the matter, and provide a balanced solution to all parties concerned.

I shall be contacting you further regarding this proposal and look forward to your response.

Sincerely,

GEORGE HANSEN,
Member of Congress.

HANSEN COMMENDS EFFORT TO HELP IDAHO RATEPAYERS IN WPPSS LOSS

WASHINGTON, D.C.—Congressman George Hansen met early today with representatives of the Participant's Committee of the WPPSS 88 and of interested financial groups at their request to discuss a proposal to spread the liability for the cost of construction, termination and financing of the disastrous and abandoned WPN 4 and 5 plants.

Hansen, who has been a critic of BPA's handling of the entire WPPSS matter, in a letter this week suggested to Peter Johnson, the current Administrator of BPA, that he call and participate in a conference to negotiate a settlement among the interested and responsible parties to the WPPSS matter as a desirable alternative to the prohibitively costly and perhaps unsatisfactory results of the multiplicity of law suits now pending in the matter.

"Although I am not in a position to endorse the proposal previewed today, which is to be presented to the 88 next Monday, until I have had the chance to study the details," said the 2nd District Congressman, "I am gratified that at least steps are finally being considered to alleviate the burden imposed on the small utilities by an operation which has become a nightmare of mismanagement and soaring finance costs and in which they had no control or responsibility."

Hansen pointed out that when he became aware of the unconscionable burdens on the 88 and their ratepayers, literally all of the entities with control and responsibility for the scandal were merely telling the 88 to pay up and shut up. "As the facts began to become clearer, it was apparent that the 88 were the vicitms, and that there should be proper recourse to the BPA, the bond underwriters and the other groups who used the 88 of their own purposes," said the Idaho Congressman. "I am pleased that the investigations which I initiated through GAO and privately have borne fruit in this attempt to relieve the burden to the 88 and electric ratepayers in Idaho and the Northwest."

"As I wrote to Mr. Johnson, I remain ready to assist in reaching a reasonable solution among all the parties," Hansen pointed out, "and it appears that there is now interest in this approach."

Hansen noted that he was convinced that no matter how the negotiations or suits were ultimately resolved, that a thorough investigation of the manner in which these projects were underwritten was indispensible. He has also requested such an investigation within his own Banking Committee and is hopeful that Committee Chairman, Fernand St Germain will undertake such an investigation in the near future.

Hansen, long a critic of the careless practices of big banks and financiers which result in losses to the taxpayers, said that he is not convinced that all the groups which share the responsibility for the losses in WPPSS have as yet been identified and made to bear their fair share of the burden of repayment.●

THE TAVOULAREAS CASE

(Mr. LENT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. LENT. Mr. Speaker, in August 1982 a Federal Court jury in Washington, D.C., reached a verdict that the Washington Post newspaper had committed a libelous act in printing an untrue story which defamed William P. Tavoulareas, the president of Mobil Corp. Testimony at that trial showed, as Mr. Tavoulareas and Mobil had alleged earlier, that the Washington Post article, for which it was ordered to pay $2 million in damages, grew out of a secret scheme between the Post reporters and employees of the House of Representatives designed to create a media event beneficial to both of them. These actions, and others, raise serious questions as to the propriety of the way in which this matter has been handled by the House subcommittee on which I sit, and by the staff of that subcommittee.

Our Subcommittee on Oversight and Investigations held a public hearing on February 8, 1982, at which remarks critical of Mr. Tavoulareas and Mobil were made by selected witnesses. The subcommittee staff subsequently agreed to receive into the record a written statement from Mobil explaining its position. However, Mobil's statement was not included in the subcommittee's published record of these proceedings. On three occasions in 1982, I have written to the subcommittee chairman, raising questions about our procedures and requesting that the hearing record be made complete, but this has not been done.

These events have achieved great public notoriety, but the public does not have the full story. I think it essential that the missing pieces of our subcommittee's record be made available to the public. I am therefore inserting into these remarks copies of my three letters to the subcommittee chairman, together with the statement of Mobil Corp., dated February 25, 1982, which was submitted by Mobil for the record, but heretofore has not been made public by our subcommittee or its staff:

HOUSE OF REPRESENTATIVES,
Washington, D.C., March 16, 1982.

Hon. JOHN D. DINGELL,
Chairman, Subcommittee on Oversight and Investigations, Committee on Energy and Commerce, Washington, D.C.

DEAR JOHN: In connection with the hearing of our Subcommittee on Oversight and Investigations, held on February 8, 1982, information as to certain activities of our Subcommittee staff became available, which came as a considerable surprise to me, and I assume also to the other members.

According to material introduced in the record of that hearing, it appears that three members of our staff may have engaged in secret dealings with the Washington Post, involving dissemination of confidential sub-

committee information and other activities which appear to raise questions in terms of the standards of conduct expected of our staff employees. You confirmed at the hearing (transcript, pages 14-15) that the giving of sworn testimony on these matters by our Subcommittee staff employees, in pending civil litigation, has been limited on the basis of congressional immunity. As you know, I expressed concern that members of our Subcommittee staff would be pleading congressional immunity in a court action and noted that as a member of the Subcommittee, I had not been consulted on whether that position should be taken. Indeed, I had only learned of these developments over the weekend preceding the hearing of February 8.

Moreover, I understand one of these staff members, Mr. Peter Stockton, has testified in the civil libel action brought by Mr. Tavoulareas against the Washington Post, that he has been employed by CBS and ABC during the same time he was on the congressional payroll. An article in the New York Times of January 4, 1982, says Mr. Stockton was paid by the ABC news program "20/20" and by the CBS news program "60 Minutes" for news reporting services while employed by our Subcommittee, and that it is "unusual" for a government employee to be concurrently retained for "news reporting".

When I undertook on February 8 to address questions on these matters to our staff members, you offered that if I so desired, "or if it appears to be necessary, we will depose the staff under oath in the appropriate fashion" (transcript, page 121).

After reflecting on this matter since the date of that hearing, I conclude that it would be appropriate to obtain sworn statements from our three Subcommittee staff members so the record will be complete on these matters.

Despite your offer of sworn depositions, it seems to me that it would be simpler and conserve time if we just obtain sworn answers in writing to the questions of interest. Accordingly, I am enclosing a list of the questions which seem to me to be necessary and pertinent, and request that the Subcommittee require answers be provided in writing, under oath, to each of those questions by each of the following: Mr. Peter Stockton, Mr. David Schooler and Mr. Michael Barrett.

I further request that a copy of their sworn answers be provided promptly to each member of the Subcommittee, and that these answers, together with the questions and this letter, be included in the record of these hearings.

Sincerely yours,

NORMAN F. LENT,
Member of Congress.

QUESTIONS TO BE ANSWERED UNDER OATH, INDIVIDUALLY, BY MESSRS. PETER STOCKTON, DAVID SCHOOLER, AND MICHAEL BARRETT

A. Refer to the Memorandum, February 4, 1982, Subcommittee Staff to John Dingell, Chairman, subject: Adequacy of SEC Rules Dealing with Conflict of Interest: The Mobil/Tavoulareas/Atlas Relationship.

1. What individual or individuals authored this memorandum?

2. Was it based on any sources of information, other than documents provided by the SEC? If so, identify those sources.

3. Was it reviewed with, discussed with, or disclosed to any person not a member of the Subcommittee or its staff prior to the hearing on Monday, February 8, 1982. If so, identify those persons.

4. Who authorized its distribution to the press on Monday, February 8, 1982? Was its release discussed with any member or members of the Subcommittee and, if so, who?

5. Why was it not distributed to Minority Counsel, Jim Christy, and to all members of the Subcommittee prior to the February 8 hearings?

B. With respect to the employment of Mr. Peter Stockton by CBS and ABC while working as a congressional employee:

1. Describe the time period during which Mr. Stockton was employed by or informally worked with CBS and ABC, the nature of his activities, the amount of compensation received by him from each of the networks, and the amount of time devoted by him to such outside activities.

2. Describe all information or documents offered to representatives of the "60 Minutes" show, relating to Atlas/Samarco/Mobil or any other matter before the Subcommittee, and describe all communications with that show regarding the possibility of giving coverage to that subject or subjects.

3. Identify the congressional committee or subcommittee which was informed of Mr. Stockton's arrangements with CBS and ABC, the text of any communication to such committee or subcommittee describing those arrangements, and the date and nature of any action taken by each such committee or subcommittee regarding this matter.

4. Was Mr. Stockton's arrangement with CBS or ABC ever mentioned to, authorized or approved by, the Subcommittee on Oversight and Investigations or by any member of such Subcommittee. If so, describe the dates, circumstances and individuals involved.

C. Each of the three Subcommittee employees has asserted congressional immunity as a basis to limit his sworn testimony in the civil litigation pending between William Tavoulareas and the Washington Post. In this connection:

1. Identify any member or members of the Subcommittee whose approval was sought for this assertion of congressional immunity.

2. State the basis of the claim of immunity.

3. State what facts were sought to be concealed by the claim of immunity.

D. In 1979, the Securities and Exchange Commission furnished to the staff of the Energy and Power Subcommittee certain documents and transcripts from the SEC's files regarding Atlas/Samarco/Mobil. With respect to any such documents or transcripts:

1. Was any such document or transcript furnished by you or another Subcommittee employee to Sandy Golden, Partick Tyler or anyone else associated with the Washington Post? If so, identify the paper given and state the date or approximate date of such event.

2. Was the furnishing of any such documents or transcripts authorized, approved or known in advance by any member or the House of Representatives. If so, identify such individual and describe the nature of such authorization, approval or knowledge.

E. In the pending civil litigation between William Tavoulareas and the Washington Post, testimony and documents establish that there were frequent contacts between Subcommittee employees and members of the media, particularly representatives of the Washington Post regarding Atlas/Samarco/Mobil before the matter came to the public's attention by virtue of the Washington Post articles of November 30, and December 1, 1979. In this connection:

1. Describe and date as specifically as possible, any meeting, telephone conversation or other communication between you and/or any other Subcommittee employee on the one hand, and any reporter or media representative on the other, during the year 1979 regarding the subject of Atlas/Samarco/Mobil, identifying each individual involved, the subject matter, and any documents transmitted to or from Subcommittee employees.

2. Describe any contacts of which you are aware between members of the SEC staff and Washington Post reporters during 1979 regarding this subject matter, identifying each individual involved in any such contacts or communications, the subject matter and the specifics of any discussions or other communications.

F. Peter Stockton and David Schooler are shown as authors of a memorandum stating they interviewed one George Comnas in Osterville, Massachusetts, on November 17, 1979. In this connection:

1. When and in what manner did you first become aware of Mr. Comnas' existence and involvement in the subject matter of the November 17 interview? Was any person connected with the media the source of such information? If so, identify such source or sources.

2. Identify each individual present during any part of the November 17 interview, (and if from the media, so indicate), describe the duration of the interview. Are there records or notes of such interview other than the memorandum dated November 19, 1979, entitled, "Summary of Interview with George Comnas on November 17, 1979? If so, identify such notes or records and state whether any of them have been given to the media.

3. Did any reporter or anyone else other than Peter Stockton and David Schooler travel to Osterville, Massachusetts or vicinity in connection with the Comnas interview? If so, identify each such individual and state whether or not he actually attended the interview.

4. Did any one or more members of the House of Representatives, on behalf of the subcommittee on energy and Power or otherwise, authorize, approve, or have advance knowledge of the Comnas interview? If so, identify each such member. If not, identify the individual or individuals on whose authority or initiative such interview was initiated and conducted.

5. Why, on November 17, 1970, was sworn testimony not taken from Mr. Comnas? Describe any offers, promises or assurances of immunity or protection from prosecution extended to Mr. Comnas with respect to statements made or to be made by him.

6. Was the Energy and Power Subcommittee conducting an investigation regarding Atlas/Samarco/Mobil matters in November, 1979? If so, when did that investigation begin, on whose authority was it initiated, and what events had occurred in connection with that investigation prior to the Comnas interview.

G. With respect to dissemination of Subcommittee materials to reporters for the Washington Post in 1979:

1. State when (the date) Chairman Dingell first became aware of the fact that the memorandum regarding the Comnas interview of November 17, 1979, had been furnished to reporters for the Washington Post. How did Chairman Dingell become aware of that event? Identify the person or

persons who advised him of such dissemination.

2. Describe Chairman Dingell's reaction upon learning of that event, including any action taken by him to reprimand any Subcommittee employee in connection therewith.

H. In connection with the investigation conducted by the SEC, beginning in December, 1980, SEC representatives have furnished to the Subcommittee staff various documents and transcripts. In this connection:

1. Describe each document (if any) furnished by individual employees of the SEC, as distinct from documents furnished officially by the SEC, identifying such individual employees.

2. Describe the security procedures employed by the Subcommittee staff to implement the SEC's advice that these materials from a private investigation should remain confidential, identifying by name each Subcommittee employee allowed to have access to such documents.

3. Describe each document received from the SEC which has been made available to members of the press, identifying the Subcommittee employee or employees who made such document available, and the reporter or other press representative to whom it was furnished.

HOUSE OF REPRESENTATIVES,
Washington, D.C., July 21, 1982.

Hon. JOHN D. DINGELL,
Chairman, Subcommittee on Oversight and Investigations, Washington, D.C.

DEAR JOHN: I have received the printed record of the hearing of the subcommittee on Oversight & Investigations in connection with the hearing of Februry 8, 1982, entitled "Securities Laws and Corporate Disclosure Regulations."

I am deeply concerned that the printed Record does not include certain material that was agreed to be included, and contains certain material for which there was no agreement.

Specifically, on page 68, I asked that "Mobil's letter to you dated January 28, 1982, with the attachments be included, by unanimous consent" in the Record. Although the Mobil letter of January 28, explaining the reasons for the declinations of Mr. Rawleigh Warner, Jr. and Mr. William P. Tavoulareas, to the Subcommittee's invitation to testify appears in the printed record, the attachments were omitted.

You may have concluded that the unanimous consent request was to have been limited to the Mobil letter of January 28, 1982. If that is true, I do not believe that the Subcommittee was afforded the opportunity to determine, as stated by you on page 71 of the printed record, that the proffering of Mobil's testimony be deferred:

"Until such time as we have concluded today's hearing, at which time we will, I think, make some judgment as to whether we wish to receive Mobil's proffer of testimony or whether we desire to have Mr. Tavoulareas and/or others appearing either in their individual capacity or in their capacity as officers of Mobil under process of the committee and under oath, so that we might examine more fully into this matter."

I am also attaching a copy of a letter dated March 11, 1982, received by our colleague, Marc L. Marks, as Ranking Minority Member of the Subcommittee, attaching a copy of a Statement dated February 25, 1982, submitted by Mobil following the February 8, 1982, hearing. It would appear that Mobil had some basis for believing that its February 25, 1982, statement would be included in the printed Record.

On page 298, the last page of the hearing record, it is stated:

"(The following documents were submitted for the record. Depositions of over 25 witnesses taken by the SEC staff and other relevant Mobil, Fairfield-Maxwell, Atlas and Samarco documents may be found in Subcommittee files.)"

This text appears after, as the transcript reflects, the Subcommittee adjourned.

Who submitted the documents reproduced from pages 299-390? I recall no unanimous consent request asking that these materials be made a part of the hearing record. It would appear that majority staff has selectively placed in the record certain documents while excluding others, without any authority granted to it by the Subcommittee membership.

I was particularly surprised by the inclusion on page 345 of a letter to the Attorney General dated December 28, 1981, requesting an inquiry by the Department of Justice into "whether the private investigation of Subcommittee witnesses and potential witnesses may have constituted a violation of Section 1505 of Title 18, United States Code." No reference to this letter was at any time made during this hearing, nor was any Minority Member or minority counsel advised before or after the hearing that such an inquiry to the Attorney General had been made. Yet is appears in the hearing record with the apparent imprimatur of the full Subcommittee. Even more curiously, no Department of Justice response is included in the record.

I am also appalled by the insertion in the hearing record of certain newspaper articles designed to show that majority staff member Peter Stockton was somehow the victim of an attempted personal smear by either Mobil Oil or Mr. Tavoulareas. The articles describe Mr. Stockton as a "dedicated Congressional investigator" whose "credentials are extraordinary". With all due respect, this seems entirely self-serving to Mr. Stockton and of no relevance to the issues identified as the subject matter of the February 8 hearing. Its inclusion in the hearing record is, to my knowledge, without authority from the Subcommittee membership.

John, I am concerned that this hearing record is flawed and/or faulty and does not accurately reflect the materials and documents which should appear in the Subcommittee record pursuant to the long-standing Committee and Subcommittee treatment. Accordingly, I request the hearing record be recalled and corrected.

Sincerely,

NORMAN F. LENT,
Member of Congress.

MOBIL OIL CORPORATION,
March 11, 1982.

Hon. MARC L. MARKS,
House of Representatives, Washington, D.C.

DEAR MR. MARKS: Enclosed for your information is a copy of the statement which Mobil has submitted for enclosure in the record of the hearings held on February 8 by the House Energy and Commerce Subcommittee on Oversight and Investigations.

Sincerely,

PAUL F. PETRUS.

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 11, 1982.

Hon. JOHN D. DINGELL,
Washington, D.C.

DEAR JOHN: On July 21, I wrote you regarding the printed record of the hearing of the Subcommittee on Oversight & Investigations, held on February 8, 1982, entitled "Securities Laws and Corporate Disclosure Regulations". To date, I have not received a response to that letter although, in my opinion, a number of glaring omissions were outlined.

Since writing that letter, additional information has come to my attention which makes it even more clear that either a republication or a supplement to the printed record of our Subcommittee's proceedings is required in order to accurately portray what has in fact transpired.

It seems that one of the reasons, perhaps the principal reason, why the printed record exhibits the deficiencies pointed out in my earlier letter, lies in the timing and purpose of the printing and release of that record. After the passage of many months from the February 8, 1982, hearing, and before any Subcommittee report had been prepared, the hearing record was hurriedly printed and distributed on July 17, 1982. This, by a remarkable coincidence, was the very same day on which Messrs. Michael Barrett and Peter Stockton of the Subcommittee staff were scheduled to testify in the libel action brought by William Tavoulareas against the Washington Post in the Federal District Court in Washington, D.C. During cross-examination of Mr. Barrett by counsel for the Washington Post, he was asked whether a transcript of the hearing had been published and Mr. Barrett answered that it had just been published that very day, and had been brought to the courthouse (Tr. pp. 2763-64). Counsel for the Washington Post sought to introduce the printed hearing record into evidence, but the Judge sustained an objection to such introduction of the document (Tr. p. 2765). The timing of this exercise strikes me as most peculiar, especially since neither I nor any other member of the subcommittee had received a printed copy of the hearing transcript as of that date.

In my letter to you of March 16, 1982, you will recall I suggested it would be appropriate to obtain sworn statements from our Subcommittee staff members as to the circumstances surrounding the dissemination, in November 1979, of confidential Subcommittee information and of their secret dealings with the Washington Post. In large measure that request has been fulfilled by reason of their testimony, under subpoena, in the libel action. On July 17, both Messrs. Barrett and Stockton testified, and I enclose a copy of the trial transcript containing that testimony, together with pertinent portions of their earlier depositions.

That testimony illuminates several matters directly pertinent to the Subcommittee's activities relative to Mobil Corporation and Mr. William Tavoulareas. First, you will recall that your letter of March 5, 1980, to Mr. Tavoulareas stated that any dissemination of Subcommittee materials to the Washington Post in November 1979 was done by someone "not associated with our inquiry", and in your letter of December 18, 1981, you expanded this to mean a person "not associated with the Subcommittee". However, as you also know, in a sworn deposition Mr. Stockton testified that he was the one who gave the documents to the Post, and that he informed you virtually contem-

poraneously, probably on the very day in December, 1979 that Mr. Tavoulareas first met with you about this situation. (Deposition of 11/16/81, pp. 71-75.) Mr. Stockton has now repeated these statements again under oath, in the public trial, stating that in November 1979 he had repeated contacts with Pat Tyler of the Post (Tr. p. 2794), and that during the week ending November 23, 1979, he called Pat Tyler and delivered the Subcommittee documents to Mr. Tyler (Tr. pp. 2801-04). Further, Mr. Stockton admitted that at the December 4; 1979, meeting attended by yourself and Mr. Tavoulareas, although questions were asked about who released the documents to Mr. Tyler, he remained silent and did not identify himself as the person who had leaked those materials to Tyler (Tr. p. 2810).

Perhaps even more startling, Mr. Stockton testified under oath that the purpose of leaking the documents was to "obtain publicity" about the topic of possible Subcommittee "hearings"; however, no hearings had been scheduled and in fact no hearings on this matter were held in 1979, 1980 or 1981 (Tr. pp. 2802-06). Instead of making a general release of information to the press, Mr. Stockton admitted that this was a "narrow, singular release of information to one reporter and one newspaper", saying "that is often the case, that is not unusual" and that he did that "quite often" (Tr. pp. 2807-08).

Among the materials leaked to the Post reporter in 1979 were SEC materials from a "private investigation", which were subject to confidentiality restrictions, including the release of the SEC transcript of its 1977 interview with Mr. Tavoulareas, and a subsequent letter directed to the SEC by Mobil General Counsel; George Birrell. I do think it is a matter of real concern that our Subcommittee staff would obtain such materials from a federal agency for the apparent purpose of the selective dissemination to the media, a purpose which has been documented by Mr. Stockton's testimony (Tr. p. 2787) and by the unrelated testimony of Post reporter Patrick Tyler (Tyler testimony at p. 525, 540, 549-552, 553, 557, and 562-567). This conduct is made further reprehensible by the fact that the Subcommittee did not at the time contemplate any related hearings or other legislative activity on the matter.

Mr. Barrett's testimony further confirms the repeated contacts between Pat Tyler and Mr. Stockton, prior to publication of the Washington Post articles of November 30 and December 1, 1979 (Tr. p. 2743), and states that at the December 4, 1979, meeting between you and Mr. Tavoulareas, you denied that the Subcommittee materials had been leaked and said "if somebody leaks documents he gets fired" (Tr. p. 2749). Of course, as Mr. Barrett testified, Mr. Stockton is still employed by the Subcommittee (Tr. p. 2749).

I still do not understand why you and our Subcommittee continue to tolerate this admitted misconduct by our Subcommittee staff members, especially in view of your earlier commitment to take appropriate action.

My letter of July 21 noted that the printed record not only failed to include the attachments to Mobil's letter of January 28, 1982, but also omitted the Statement of Mobil Corporation, dated February 25, 1982, submitted by Mobil following the February 8, 1982, hearing. I have since learned that Mr. Michael Barrett had agreed that such a Statement would be included in the printed record. Copies of pertinent correspondence to this effect are enclosed.

Accordingly, it seems to me essential to print and republish the hearing record, or at least a supplement to the printed record, which would include the attachments to the Mobil letter of January 28, 1982, the Statement of Mobil Corporation dated February 25, 1982, and my letters to you of March 16, and July 21, 1982, and this letter. Copies of each of these items are enclosed, and I trust this can be accomplished in the near future so that the substance of this hearing can be accurately conveyed.

Sincerely,

NORMAN F. LENT,
Member of Congress.

STATEMENT OF MOBIL CORP., BEFORE THE SUBCOMMITTEE ON OVERSIGHT AND INVESTIGATIONS OF THE COMMITTEE ON ENERGY AND POWER, FEBRUARY 25,1982

A. INTRODUCTION

We note preliminarily that the hearing conducted on February 8, 1982 by the Subcommittee on Oversight and Investigations did include testimony and colloquy on the matters ostensibly under investigation by the Subcommitteee, namely, the adequacy of the Securities and Exchange Commission's rules and regulations pertaining to disclosure of transactions involving so-called "related persons" and of the process by which the SEC investigates and enforces its regulations. Differing theories for interpreting the existing SEC rules were advanced by past and present SEC staff members who testified. The colloquy made it clear that the rules in question are extraordinarily complex and ambiguous, with aberrational and anomalous impact on companies' disclosure obligations in some instances. Suggestions were made for administrative clarification of ambiguities as well as possible legislative change.

Mobil obviously has no quarrel with the Subcommittee's review of the above subject, it being a matter which lies between the Congress and the SEC.

We do think it strange, however, that as a method to explore this broad subject the Chairman and majority staff selected a Mobil matter which is seven or eight years old and has been fully investigated and disposed of by the SEC which found there was no violation of law, no dishonesty and no misuse of corporate assets. As a consequence, the hearing was largely reduced to examining a variety of statements contained in a preliminary draft memorandum of certain SEC staff members, whose conclusions were rejected by their superiors who then made different recommendations to the full Commission which agreed there was no violation of law.

Mobil questions the legitimacy of the process and suggests the integrity of the Congress is impugned when such hearings, ostensibly convened for the above-mentioned legislative purpose, in fact not only exhibit such a different focus but also involve conduct of government employees which is shocking in its irresponsibility, as follows:

The central purpose of the "hearing" clearly was to stage a media event as a self-serving, defensive maneuver on the part of the Subcommittee's Chairman and certain majority staff members by resurrecting and republishing unfounded charges against Mobil and its President, William P. Travoulareas, originally made by them over two years ago and, in this way, to divert attention from their continuing efforts to rationalize and preclude testimony in pending litigation as to their complicity with the Washington Post and untrue statements previously made in that connection. The press was apparently given to believe that new revelations would be forthcoming at the hearing regarding those charges. In fact, the event featured only a rehash of allegations which have long since been established to have no foundation in fact or in law.

The Chairman called the hearing on short notice, after he was advised that he would be subpoenaed to give sworn testimony in the libel action brought by Mr. Tavoulareas and his son, Peter, in connection with two articles on this subject published by the Washington Post in late 1979. Chairman Dingell has asserted Congressional immunity to avoid giving such testimony under oath, and has supported efforts to limit the testimony of his Subcommittee staff members on the basis of Congressional immunity. We understand the other members of the Subcommittee were not advised of this in advance of the hearing.

Chairman Dingell at the hearing made much of the fact that Mr. Tavoulareas and Mobil's Chairman, Rawleigh Warner, Jr., had declined an invitation to appear and testify. It was only when another Subcommittee member, Congressman Lent, raised the question, that it developed that Mobil had offered the testimony of Mr. George A. Birrell, its Vice President and General Counsel, as the Mobil official most familiar with the stated subject matter of the Subcommittee's hearing. Mr. Birrell had written a letter to Chairman Dingell on January 28, 1982 (Attachment A), making this offer on behalf of Mobil and explaining that he had advised Messrs. Warner and Tavoulareas that it would be inappropriate for them to appear at the hearing because the same matter is pending before a Federal District Court, and Mr. Tavoulareas' deposition was scheduled to be taken in that court action two days after the Subcommittee hearing date. Mr. Birrell's letter enclosed a copy of a letter dated January 11, 1982 from Mr. Tavoulareas to Chairman Dingell, reviewing in detail the complicity of the Subcommittee staff in furnishing confidential government information to the Washington Post for use in the Post's articles, the fact of false and libelous statements having been made by Chairman Dingell, and the desirability of sworn testimony being given by Chairman Dingell in the pending litigation without claim of immunity. Prior to the hearing, a member of Chairman Dingell's staff advised that a copy of Mr. Birrell's letter and the enclosure would be given advance distribution to the other Subcommittee members. We understand this was not done, so apparently no one on the Subcommittee other than Chairman Dingell and no one on the Subcommittee's staff except certain majority staff members had advance notice of this information pertinent to the hearing suddently scheduled for February 8, 1982.

As a further diversionary tactic, the Chairman's remarks at the hearing and a memorandum, dated February 4, 1982, to him from the Subcommittee staff, wrongly give an impression that after the SEC's lengthy investigation the SEC staff had concluded Mobil was in violation of SEC disclosure rules, and that Mobil had somehow induced the SEC to compromise that conclusion through a negotiated settlement. There was, in fact, no such legal conclusion by the responsible SEC staff officials or the Commission, and there was no negotiated compromise of any such conclusions.

At the hearing, someone for the Subcommittee staff placed on the press table a 41-page document, dated February 4, 1982, labeled "memorandum", authored anonymously by the "Subcommittee Staff" and addressed to Chairman Dingell. In our view, that memorandum is so irresponsible and inaccurate as to be an embarrassment to the Congress. The document is replete with demonstrably misleading and untrue statements about Mobil and Mr. Tavoulareas and matters pertaining to the investigation by the SEC. Apparently produced on a cut-and-paste basis to meet the schedule of the hurriedly called hearing, the memorandum exhibits innumerable errors apparent on its face, many quotations which are inaccurate when compared with their source, endless distortions and wildly speculative conclusions. In our view, the misleading and untrue statements contained in that memorandum are so egregious as to suggest the need for Congressional investigation of the conduct of the Subcommittee Chairman and his staff in connection, among other things, with the possibility that someone has acted in violation of Federal statues which prohibit the furnishing of false and fictitious statements to the United States Government and actions which corruptly influence congressional proceedings.These disturbing features of the so-called "hearing" and of the related conduct of Chairman Dingell and the Subcommittee majority staff members are reviewed below.

B. BACKGROUND OF THE HEARING AND CHAIRMAN DINGELL'S REFUSAL TO TESTIFY AS TO THE TRUTH

As detailed in a letter from Mr. Tavoulareas to Chairman Dingell dated November 20, 1981 (Attachment B), the genesis of this affair dates back to a 1979 effort by a reporter to develop a story for the Washington Post critical of Mobil. The reporter interviewed one George Comnas, who it developed was a most unreliable witness, and realized Comnas' off-the-record statements would not support a front-page story. The matter was brought to the attention of the Subcommittee staff who interviewed the same unreliable witness on an unsworn basis and prepared a "report" of the interview which they then furnished to the reporter. The reporter then wrote two articles purportedly in reliance on the congressional "report" and referring to a so-called "investigation" allegedly being conducted by Chairman Dingell's Subcommittee. In this fashion, "non-facts" became headline facts in the sense that a Congressional "investigation" pertaining to them was deemed a newsworthy event.

The SEC investigation was prompted by a letter (based on the same "report" of the unsworn interview with Comnas) which Chairman Dingell sent to the SEC Chairman on November 20, 1979, making a number of very serious charges against Mobil and Mr. Tavoulareas. That letter was sent only three days after the Subcommittee staff members had interviewed George Comnas, the apparent source of the basic allegations, and without any effort to clarify the facts with Mobil. Mr. Comnas was interviewed on a Saturday. The "report" based on that unsworn interview was written Sunday and Monday. The Chairman's letter to the SEC was sent Tuesday. The questions raised by such precipitous action based on information from one unverified source are obvious, especially when one considers the added feature of the Subcommittee staff's secret dealings with the Washington Post.

Mobil is advised that Subcommittee staffers' sworn testimony in the libel action brought by Mr. Tavoulareas and his son has now confirmed certain details of this complicity, which is even more shocking than we had previously thought, as set forth in Mr. Tavoulareas' letters to Chairman Dingell. That testimony establishes that a letter from Chairman Dingell dated March 5, 1980 was untrue in claiming that the 1979 Subcommittee staff "report" had not been provided to the Washington Post by members of the Subcommittee staff, and most significantly, that Chairman Dingell knew the facts were to the contrary well before the time he wrote that letter. Moreover, Chairman Dingell and the Subcommittee staff knowingly allowed counsel to the House Representatives to make a similar untrue statement to a Federal District Court Judge in connection with efforts to quash deposition subpoenas, on the basis of Congressional immunity, for the taking of testimony by the Subcommittee staff members on the subject.

In January 1982, Chairman Dingell was served with a subpoena to testify in the libel action pending in the United States District Court for the District of Columbia. He promptly sought to avoid testifying, seeking the assistance of the Speaker of the House of Representatives on the basis of "serious questions concerning the rights and privileges of the House."

At the hearing on February 8, 1982, Congressman Lent noted that as a member of the Subcommittee he had not been advised that Subcommittee staff members were claiming immunity from testifying in the civil litigation, saying:

"I am really shocked, Mr. Chairman, that people who are on the staff, who have been working on this case, who are in possession of the facts, would plead Congressional immunity in a civil court of this land. . . . I was not asked whether we ought to assert Congressional immunity in a civil case. I am shocked to learn just over the weekend that our staffers have been put in that position." (Tr. 16)[1]

Mobil agrees that the position taken by Chairman Dingell and by the Subcommittee staff members, resisting efforts to obtain their truthful testimony under oath, is a shocking circumstance. Their posture on the matter suggests much, we believe, as to the reasons for the February 8 hearing and the apparent continuing vendetta being conducted by them against Mobil and Mr. Tavoulareas.

C. THE DIVERSIONARY EFFORT TO REVIVE THE DISCREDITED CHARGES AGAINST MOBIL AND MR. TAVOULAREAS

Having leveled very serious charges in 1979 against Mobil and Mr. Tavoulareas, which he referred to the SEC for investigation, Chairman Dingell and the Subcommittee staff now find it expedient to disregard the results of that very extensive investigation, which were favorable to Mobil and its President, and to initiate yet another "investigation" of the same charges. We submit this is an unprincipled, wasteful and disgraceful abuse of the legislative process. (It is pertinent to note a statement by Representative Collins in the Washington Report of February 15, 1982, that over recent years the staff of the Energy and Commerce Committee has expanded to the extent of requiring a budget increase from $1.5 million in 1971 to $7.5 million in 1980. We make the obvious point that especially in an era of budgetary constraints, legitimate questions are raised as to the continued expenditure of funds on this matter which has been fully reviewed by the SEC, as requested two years ago by Chairman Dingell, and found to be without substance.)

1. The disproven charge of "misappropriation of corporate assets"

The principal charge made by Chairman Dingell in his letter of November 20, 1979 to the SEC Chairman was that William Tavoulareas "misused corporate assets to buy out George Comnas and enrich his son," that there was a "misappropriation of corporate assets". No reasonable person could doubt that on the evidence this charge was false when made, and has been completely put to rest. Yet, the Subcommittee staff memorandum of February 4, 1982 claims the SEC staff found the Chairman's "concerns" expressed in his 1979 letter to the SEC were "valid" (p. 5) and that the SEC staff found that George Comnas, the apparent source of the charge of misuse of corporate assets, was a "credible witness".

Nowhere in the SEC staff writings can either of such asserted findings be identified, and it was established at the February 8, 1982 hearing that on at least one central issue (and there are many other instances in the record), Mr. Comnas was not a credible witness. The basis of the "misappropriation of assets" charge was a consulting fee paid to Mr. Comnas by Mobil after he left Atlas in 1975. Yet, Mr. Ryan of the SEC staff confirmed that Atlas reimbursed Mobil the $83,000 paid by Mobil to Mr. Comnas for consulting fees, saying that "ultimately it was Atlas' money." (Tr. 84) And a document signed by Mr. Comnas, dated April 15, 1976, shows that he acknowledged then that Atlas had agreed to reimburse Mobil. (Tr. 85) Thus, Mr. Comnas had to know, at least three years before he furnished information to the Subcommittee staff, that such a misappropriation of corporate assets charge would be untrue.

Mr. Stanley Sporkin, who headed the SEC's Division of Enforcement during the investigation, repeatedly confirmed there was no evidence to support that charge. He stated "I do not want anybody to think I am talking about dishonesty here." (Tr. 42) Further:

"There was no finding that there was a misappropriation of funds. We looked at this very carefully. . . . I don't think it is fair to say, Mr. Chairman, that Mr. Tavoulareas was found to have misappropriated any funds. I don't think I could have made that statement in good conscience. . . . I don't think there is anything we found that would indicate a misappropriation [by] Mr. Tavoulareas of Mobil's money. That record ought to be clear because I think it would be unfair to indicate otherwise." (Tr. 87-89)

2. The disproven charge of misleading Mobil's management and directors

In 1979 Chairman Dingell alleged that "William Tavoulareas may have also misled Mobil's management and directors concerning his involvement in these activities". All the evidence is to the contrary, yet this same allegation is again featured in Chairman Dingell's statement at the recent hearing and in the February 4 Subcommittee staff memorandum.

The official Report of Investigation attached to the 1981 Action Memorandum of the Division of Enforcement, forwarded to the Commission, exhibits no support what-

[1] "Tr." references are to the as yet uncorrected stenographic transcript of the hearing held on February 8, 1982.

ever for this charge. Instead, it details the thorough and continuous disclosures by William Tavoulareas to Mobil's senior management and its directors of all pertinent details, from the very inception of the Mobil/Atlas/Samarco relationships. At the February 8, 1982 hearing, Mr. Ryan of the SEC staff confirmed "the factual statement is correct" that William Tavoulareas apprised Mobil's Conflict of Interest Committee Chairman of Peter Tavoulareas' possible involvement with Atlas "right from beginning", that the full Mobil board of directors received annual reports describing all transactions involving Atlas, and that there was no "failure to disclose material information by William Tavoulareas to Mobil's management and their directors". (Tr. 81-82)

3. The disproven charge of a securities law violation

Chairman Dingell, in 1979, alleged that the Atlas/Samarco transactions "may violate Federal securities laws, including those applying to failure to disclose material information to stockholders" and that Mobil's letter to stockholders in November 1976 "was incomplete and may have been false and misleading." In view of the record which is conclusively to the contrary, we think it astonishing, to say the least, that these same charges were repeated in Chairman Dingell's opening statement on February 8, 1982, and in the Subcommittee staff memorandum of February 4, 1982.

The truth is that the exhaustive SEC investigation yielded an "absence of sufficient evidence and legal basis to find securities laws violations", as stated at the hearing by Commissioner Philip A. Loomis. (Tr. 55-56) To be sure, there was a debate at the hearing as to the possible desirability of changing the securities laws or rules of the Commission regarding transactions in which a relative of a corporate officer or director may have an interest. But neither the Division of Enforcement's Report of Investigation, nor its official Action Memorandum to the Commission, or the action taken by the Commission itself lends support to Chairman Dingell's charge of a securities law violation.

The Director of the SEC's Division of Corporation Finance testified that there was "probably not a violation of law. That is probably the critical point". (Tr. 34) Whether Mobil's 1976 letter to shareholders, voluntarily issued without legal requirement to do so, could have been more extensive in its details is a matter for discussion. But, as Mr. Spencer of the SEC staff stated, "The question would be whether or not it is materially incomplete and in violation of our laws." (Tr. 34-35)

Commissioner Loomis emphasized that "* * * I don't want to assume that there were any violations of law here, that * * * [it] was material, or would have given rise to an action, because no action was recommended." (Tr. 35-36) He noted that the Division of Enforcement "did not recommend the finding of any violation of the federal securities laws", and therefore "the Commission determined to take no action which would appear to be a sanction on persons involved." (Tr. 55-56) In the absence of violations, the Commission did not feel they had authority to order Mobil to publish the Report of Investigation. (Tr. 64-65)

The discussion about what might have been the case under different circumstances centered on two novel and quite speculative theories of interpreting the SEC's disclosure rules. While these theories may be of interest to others in the future, the hearing made it clear such theories were not applicable during the time of the Mobil/Atlas/Samarco transactions. One speculative theory mentioned was that a contractual or economic relationship between companies (as distinct from equity ownership) may render one of them a "de facto subsidiary" of the other, requiring Proxy Rule information that would not otherwise be called for. Such an interpretation was not then, and is not presently, the law, and the Director of the SEC's Division of Corporation Finance noted that to find Atlas was a "de facto subsidiary" of Mobil would have been a "novel interpretation" of the SEC's rules. (Tr. 38, 42-43) The other speculative theory was that Proxy Rule information requirements that pertain only to a relative who lives in the "home" of a director might be expanded to include an adult relative who lives elsewhere but enjoys some measure of financial support from the director. As to this theory, too, the Director of the Division of Corporation Finance confirmed the obvious: ". . . to be fair we would have read home as meaning home . . . ." (Tr. 95) He noted, moreover, that past SEC interpretations have applied that language as it is written; "The disclosure required only attaches where the offspring lives at home." (Tr. 97)

Speculative theories for novel interpretation of the SEC's rules, or suggestions for change in the SEC rules, do not add up to an ex post facto securities law violation by Mobil, and there was none.

4. The disproven charge of "misleading" testimony in 1977

Finally, in 1979 Chairman Dingell charged that the 1977 testimony of William Tavoulareas to SEC staff members "may substantially have mislead the Commission concerning these transactions and his involvement." This allegation, too, has been shown to be without substance and the official Report of investigation of the SEC's Division of Enforcement contains no such suggestion.

In his 1977 sworn testimony, Mr. Tavoulareas answered every question put to him. Mobil is condident those answers were truthful and complete, and they were precise. It ill behooves the Chairman now to say that such testimony was "vague" (Tr. 3), and we find it disturbing in the extreme that the Subcommittee staff memorandum (p. 5), despite all the evidence to the contrary, suggests that the "SEC staff" found "substantial evidence" that this allegation, one of Chairman Dingell's 1979 charges, was "valid".

The most that can be said for this now discredited charge is that one of the SEC investigators is himself quite vague as to what Mr. Tavoulareas stated in 1977, despite the ready availability of the written transcript. Mr. Ryan claimed at the hearing that he received an "impression" in 1977 that Mr. Tavoulareas "completely recused himself from Atlas-Samarco matters. He had absolutely no discussions or nothing else." (Tr. 89) Mr. Ryan says he was under the impression that "in the first transcript he said he did not get involved in discussions in any way with Samarco and Atlas." (Tr. 91) These "impression" do not coincide with the 1977 transcript, which contains no such statements by Mr. Tavoulareas. He testified that he was not involved in "decision making between Atlas and Samarco" after his son joined Atlas (p. 42), and his earlier role in the selection of George Comnas to head Atlas is fully displayed in the 1977 transcript.

At the February 8 hearing, reference was made to one phrase, quoted out of context, from Mr. Tavoulareas' 1977 testimony that "I never got into negotiations of any kind at all between Atlas and Samarco . . ." (Tr. 91)[2] The two pages of questions and answers in the 1977 transcript leading up to that statement, however, make it clear that reference was to the ship charter agreements between Mobil and Samarco, not management agreement matters between Samarco and Atlas. The question to which Mr. Tavoulareas was responding was, "Have you ever discussed with your son the terms of the agreements [i.e., the charter agreements between Mobil and Samarco]?" (p. 36) His answer was as quoted above. Mr. Tavoulareas was simply stating that as President of Mobil, he did not get involved in the details of individual ship charters to and from Samarco, which were handled down the line by Mobil's Marine Department.

The fact that Mr. Tavoulareas did become involved in certain discussions and made recommendations from time to time, as he testified in 1980, in no way suggests Mr. Tavoulareas "misled" the SEC staff, either "substantially" (as alleged) or insubstantially, in 1977, when he indicated that Mobil "decisionmaking" and "negotiations" regarding Atlas/Samarco were handled by others.

D. THE ALLEGED NEGOTIATIONS OF A COMPROMISE OF THE SEC'S INVESTIGATIVE RESULTS

By artful sleight-of-hand techniques, the Subcommittee staff memorandum of February 4, 1982 and Chairman Dingell's opening statement at the February 8 hearing would have one believe that in December 1980 the SEC "staff" (i.e., the Division of Enforcement and Division of Corporation Finance) had concluded that Mobil violated the securities laws and were prepared to recommend an enforcement action; and that "staff" conclusions and recommendations to this effect were changed by reason of negotiations with Mobil, who reviewed the "staff" document and obtained changes not only in the conclusions and recommendations but in the statement of facts itself. These innuendos are distressing, and they are untrue.

First, who is the "SEC staff" to whom so many "findings" are attributed? In the Subcommittee staff memorandum, much reference is made to a so-called "staff report" of December 1980. That document, however, was only a preliminary draft memorandum, for discussion by the staff investigators with their superiors within the Division of Enforcement. On the face of the document, it is apparent that the recipients raised a number of questions. The December 1980 preliminary draft memorandum was in no sense a "staff report", a misleading label assigned to that document repeatedly in the Subcommittee staff's memorandum of February 4, 1982.

Moreover, that 1980 draft memorandum was unknown to Mobil and Mr. Tavoulareas and their counsel until the day of the hearing, February 8, 1982. Mobil and Mr. Tavoulareas were unaware of, and could not have negotiated a compromise of any of the conclusory material in, that draft memorandum.

The reason for this became apparent at the February 8 hearing, when it developed that the novel legal interpretations reflected in that preliminary draft memorandum were not supported by senior members of the Commission staff. (Tr. 38-41, 43-44, 93-97) Mr. Sporkin, then Director of the Divi-

[2] It should be noted that the SEC never requested a corrected transcript of that testimony.

sion of Enforcement, himself testified that he was "not prepared to recommend to the Commission that an injunctive action be brought." (Tr. 27)

What the SEC staff did review with Mobil was a simple recital of facts, based on documents and testimony furnished to the SEC, which was prepared later by the SEC staff and constituted the "Report of Investigation" attached to the official Action Memorandum of July 7, 1981 which was submitted to the Commission. That process involved no compromise as to the legal views of the SEC's Division of Enforcement. It was only a good faith, responsible effort by Mobil to assure that, if it was to issue that document under its own name, the statements attributed to witnesses and documents would in fact be accurate portrayals of what had been said and written.

Mobil's counsel only agreed to recommend to their client that Mobil issue the statement, and then only if they had prior access to the transcripts of testimony provided by non-Mobil witnesses so the accuracy of factual statements attributed to those sources could be verified. Those transcripts were not in fact made available to Mobil. It was therefore inaccurate for Chairman Dingell to say, as he did in his opening statement, that the Commission "overturned" an "agreement" between the SEC staff and Mobil.

Under the circumstances just described, Mobil certainly cannot be described as having agreed to file the statement and it is misleading for the Subcommittee staff to write in their memorandum (p. 8):

"While Mobil had indicated a willingness, finally, to disclose more information, once the Commission acted, Mobil refused to do so."

In any case, as Commissioner Loomis testified on February 8, the Commission determined that in the absence of evidence of a securities law violation or of any recommendation or finding of a securities law violation, it should not take action which "would appear to be a sanction on persons involved", and that in that circumstance the Commission did not have the authority to order Mobil to publish the Report of Investigation. (Tr. 55-56, 64-66)

E. THE FALSE AND MISLEADING SUBCOMMITTEE STAFF MEMORANDUM

Even a casual reader unacquainted with the facts would note that the Subcommittee Staff's memorandum of February 4, 1982 evidences an extraordinarily hasty and careless job of composition. It is filled with typographical mistakes, sentences which are obviously garbled and, on verification of quoted material, numerous mistakes of transcription. The over zealous authors attribute statements to people who did not make them, engage in hyperbole of a non-professional character, avoid phrasing serious unfounded allegations as such by portraying them as unanswered questions, and use successive qualifiers and adjectives to hedge outrageous statements. (Many examples of this latter practice could be cited, but just one will do. At page 22: "However, the SEC report of Warner's testimony, mentioned earlier, indicates that Warner may have been seriously confused about the creation of Atlas." The "SEC report" mentioned is apparently the preliminary discussion draft of December 1980. Whether it "indicates" that Mr. Warner "may" have been confused is irrelevant, but the outrageous innuendo is not. Mr. Warner's testimony, in fact, makes it abundantly clear that he was fully knowledgeable about the "creation of Atlas.")

It is tempting, but would make this statement unduly long, to review the innumerable other misstatements, exaggerations and misleading innuendos contained in the Subcommittee staff memorandum. However, a short illustrative list deserves comment in the context of section 1001 of Title 18 of the United States Code which makes it illegal knowingly and willfully to make any false or fictitious statement or representation to any department or agency of the United States, which includes the legislative branch of the government, and of Section 1505 of Title 18 which makes it illegal corrutly to influence the due and proper exercise of the power of inquiry of a Congressional committee.

1. At page 6 the memorandum asserts that "Mobil failed to produce important documents subpoenaed by the SEC; . . . and William Tavoulareas refused to provide requested personal financial records." Each of these statements is false.

As to the first, at page 32 a caption reads: "Mobil Withholds Critical Document on Japan Line Deal", and below it is stated that "Mobil . . . had failed to produce a critical document that was covered by the SEC subpoena." The fact is, the agreed interpretation of the subpoena did not call for documents relating to proposed transactions never consummated, such as the Japan Line proposal. At the hearing Mr. Ryan of the SEC was asked, "Did Mobil produce all the documents subpoenaed by the SEC?" Mr. Ryan answered, "I would say basically yes". (Tr. 48) Questioned specifically on the so-called "critical document", Mr. Ryan stated, "Going back early in the negotiations with Mobil on subpoena compliance, there is a letter in there which I agreed to that I was not looking for records of proposed transactions. Apparantly Mobil interpreted those transactions to fall within the Japan Lines deal and fall in line with the proposed transaction." (Tr. 48) Asked if he had any "quarrel with Mobil in that respect", Mr. Ryan said "no". (Tr. 48) In any case, Mr. Ryan also noted that the same document had been submitted to the SEC by Peter Tavoulareas as well as Fairfield International, which contrasts with the Subcommittee staff memorandum's reference to a mysterious other "source" of the document (p. 32). There is no basis whatever for the conclusion (p. 6) by the Subcommittee staff that "the SEC investigation was hampered" in this connection.

It is also false and misleading to say that "Peter Tavoulareas refused to turn over subpoenaed documents. . . ." At the hearing the SEC staff representatives noted that Atlas, Peter Tavoulareas and his partner Ares Emmanuel are outside the country and not subject to SEC jurisdiction. There never was any subpoena addressed to Peter Tavoulareas. He therefore would not have "refused to turn over subpoenaed documents", although an SEC representative noted that numerous records were produced by him on a voluntary basis. (Tr. 50-51)

It is false and misleading to say that "William Tavoulareas refused to provide requested personal and financial recprds." At the hearing, Mr. Ryan of the SEC staff noted that ". . . we explored what means were given to Peter Tavoulareas after he left his father's home. I believe the testimony was to the effect that William Tavoulareas did substantially assist his son while living in London, being employed by Costos Lemos. The testimony further went on he did not receive money supplementing his income after he joined Atlas. I do not recall seeing any schedule. I don't recall pushing the matter with Mobil." (Tr. 119-120) Further, Mr. Ryan testified that he could not recall whether "personal financial records" had been requested of Mr. Tavoulareas. (Tr. 52) Mr. Spencer, Director of the Division of Corporation Finance, testified that Mr. Tavoulareas "turned over every record that was subpoenaed . . ." (Tr. 52)

Thus, sworn testimony at the hearing and the SEC record prove that the Subcommittee staff made a false and misleading statement in saying that SEC investigation was "hampered" by a failure or refusal of Mobil or Peter Tavoulareas to produce "subpoenaed" documents or of William Tavoulareas to provide "requested personal financial records."

2. It is false and misleading for the Subcommittee staff to state: "Enforcement action was recommended to the Commission by the staff. . . ." (p. 5)

The only recommendation made to the Commission by "the staff" of which Mobil is aware, was that set forth in the official Action Memorandum of the Division of Enforcement dated July 7, 1981. That document states (p. 4):

"The staff however does not recommend enforcement action in this matter if Mobil Corporation makes additional clarifying disclosure to its stockholders."

And of course Commissioner Loomis confirmed "the staff did not recommend the finding of any violation of the federal securities laws." (Tr. 55)

3. The Subcommittee staff memorandum repeatedly misrepresents the preliminary discussion draft of December 1980 as being a "staff report" embracing "staff" findings and recommendations when, in fact, that document shows on its face that it raised questions in the minds of the authors' superiors and, in any case, was never approved by the SEC staff official having authority to make "findings" and recommendations to the Commission, namely, the director of the Division of Enforcement. These mischaracterizations of variuos statements made in the preliminary discussion draft of December 1980 would prompt the unwary reader to think they were official "findings" of the Division of Enforcement. They were not.

Worse yet, even where a position is directly ascribed to the Division of Enforcement, the Subcommittee staff memorandum grossly misstates the situation. That memorandum claims (p. 9):

"The division in its enforcement recommendations also expressed the view that the proxy rules had been violated."

Nowhere in the Enforcement Division's official Action Memorandum, or even in the earlier draft memorandum on which the Subcommittee staff places so much reliance, did anyone on the SEC staff express the view that the proxy rules "had been violated." In fact, the 1980 draft memorandum does not even mention the proxy rules. The official Action Memorandum of the Division of Enforcement to the Commission expresses no view to that effect. To the contrary, it states that the pertinent proxy rules provision are "in certain respects ambiguous", reviews the speculative theory having to do with so-called "de facto" subsidiaries, and indicates in a footnote that the proxy rules would "appear" to apply if Atlas (in which Mobil owns no stock) could be considered a "subsidiary" of Mobil. This contrasts sharply with the misleading impression given by the above-quoted sentence from the Subcommittee staff memorandum.

4. Under the heading, "William Tavoulareas' First Major Involvement in Aiding Atlas/Peter Tavoulareas" (pp. 19-22), the Subcommittee staff untruthfully postulates that William Tavoulareas knew his son, Peter Tavoulareas, "was part of the deal", and that this is the reason he supported George Comnas' company (Atlas) as marine manager for Samarco. The Subcommittee memo states that "William Tavoulareas personally selected George Comnas to create a ship management company" (p. 22) and suggests that Fairfield-Maxwell, Mobil and a number of other ship management firms would have been better suited for the job then George Comnas' Atlas. However, as the SEC official Report of Investigation points out (p. 3-4), "the joint ventures (i.e., the four shareholders of Samarco) agreed to retain a certain George Comnas, or a company associated with him, to be the independent manager for Samarco". The decision by the Samarco partners to retain the Comnas company, as independent manager, was to avoid conflicts of interest for Mobil and Fairfield-Maxwell, which had their own shipping operations (Report of Investigation, p. 5). That joint decision to retain an outside management firm, headed by Comnas, was set forth in a Memorandum of Understanding signed by all Samarco shareholders some three months before Peter Tavoulareas joined George Comnas in Atlas. The record further establishes that the Mobil internal decision, as a Samarco shareholder, was made jointly by several Mobil senior management officers, including Mobil's Chairman, and that Mr. Tavoulareas had advised Mobil's Chairman and its Conflicts of Interest Committee Chairman, at the very beginning, of his son's possible participation with Mr. Comnas.

5. Another matter untruthfully characterized by the Subcommittee memo involves the rationale for Mobil's participating in Samarco. Suggesting at pages 25 through 29 that Samarco was activated only to justify hiring Atlas so that Peter Tavoulareas could get started in business, the Subcommittee staff concludes that the only valid reason for Samarco's existence would be a Saudi flag preference system. The memo states, "Certainly William Tavoulareas, Harmon Hoffmann and Wally Mac Donald were savvy enough to know that flag preference was not forthcoming." (p. 26) The Subcommittee memo goes on to ask, "why did Mobil devote their resources to this venture? In 1982—eight years later—there is still no Saudi flag preference law."

Yet the SEC record and official Report of Investigation suggest no doubt as to the reality of a soundly-based expectation in 1974 that a preference system would be promulgated (see Report of Investigation, p. 3). And in fact, Saudi flag preference, though not in the form of a "law", has existed and does exist today for substantial volumes of Saudi crude oil. Pursuant to Government requirements shippers of incentive crude oil and Petromin direct sale crude oil are required to give preference to tankers of Saudi Arabian shipping companies. The Subcommittee statement (p. 27) that the "the whole arrangement is economically suspect" because there is no preference system is belied by the facts that a preference system was genuinely anticipated by all concerned and that there is a preference system and as a result Samarco is making a profit.

6. Under the heading, "William Tavoulareas Negotiates the Atlas Contract, November 1974" (pp. 30-32), there is perhaps the most egregious misrepresentation of facts. In suggesting that William Tavoulareas negotiated the Atlas contract, the Subcommittee staff has entirely disregarded the evidence and the official SEC staff findings. The Subcommitte staff centers on a single incident in which William Tavoulareas "was inadvertently drawn into a conversation" (see Report of Investigation, p. 6) at a social gathering in Saudi Arabia. The conversation related to only one aspect of the then pending Atlas/Samarco Agreement. (William Tavoulareas promptly advised Mobile senior management of having been drawn into this conversation (see SEC Report of Investigation, p. 6)).

The record shows that Mr. Tavoulareas persuaded Atlas to withdraw its demand for a 6 percent equity in Samarco vessels (not a share of Samarco, as the Subcommittee staff memo wrongly states) and to accept the Alirezas' position, a result considered less desirable by Atlas. It is manifestly false and misleading to say he "obtained a 4 percent profit sharing arrangement on behalf of Atlas".

In addition, the official Report of Investigation states: "From April 1974 through December 1974, negotiations continued between Samarco and Atlas concerning the terms of a contract between the two parties. The negotiations on behalf of Atlas with Samarco were handled by George Comnas. Negotiations on behalf of Samarco were primarily handled by Samarco's Saudi partners."

It is clear beyond doubt that Mr. Tavoulareas did not negotiate "the Atlas contract".

F. CONCLUSIONS

Based on all of the foregoing, Mobil respectively suggests to the full membership of the Subcommittee that they might wish to consider taking the following actions:

1. Call for an investigation by the Subcommittee, the parent Committee or the House Committee on Standards of Official Conduct, or other appropriate body of the House, as to all the facts regarding:

(a) the 1979 and later involvement of the Subcommittee staff with the Washington Post;

(b) the sworn and unsworn statements made in that connection;

(c) the positions taken to refuse giving and/or to limit sworn testimony as to the foregoing, on the basis of congressional immunity;

(d) the authorship of and authorization for the preparation and dissemination of the 41-page Subcommittee staff memorandum of February 4, 1982 (in relation to the facts of record known to such authors and the related misleading and untrue statements in that memorandum); and

(e) all outside employment contracts or other arrangements whereby members of the Subcommittee staff work with or for the media, including details of Mr. Peter Stockton's work for CBS and ABC reported in the New York Times of January 4, 1982, allegedly involving compensation payable to him in exchange for his providing confidential congressional information.

2. In connection with such review, require sworn testimony by the Subcommittee staff members and any member of the Subcommittee involved in the matters referred to above.

3. Furnish the results of the foregoing review to the parent Committee, the Speaker and/or the House Committee on Standards of Official Conduct or other appropriate body of the House, for the taking of such action as may be necessary and desirable to insure compliance with congressional standards and the integrity of the Subcommittee and its proceedings.

4. With regard to all the foregoing, consider referring the results of such review to the Department of Justice for further investigation in relation to possible violation of Sections 1001 and 1505 of Title 18 of the United States Code, or such other Federal statutes as may be applicable.

ATTACHMENT A

MOBIL CORP.,
New York, N.Y., January 28, 1982.

Hon. JOHN D. DINGELL,
Chairman, Subcommittee on Oversight and Investigations, House Committee on Energy and Commerce, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Please refer to two letters of January 19, 1982, addressed to Rawleigh Warner, Jr., Chairman of the Board of Mobil Oil Corporation and William P. Tavoulareas, President of Mobil Oil Corporation, inviting them to appear and testify on February 9, 1982, at a hearing of the Subcommittee on Oversight and Investigations relating to the "adequacy of the SEC's required disclosure of related party transactions" and dealing specifically with "an examination of the Mobil/Tavoulareas/Atlas relationship." It is my understanding from conversations I have had with two members of the Subcommittee staff that these hearings in fact relate solely to the Mobil/Tavoulareas/Atlas relationships. I am writing to inform you that Messrs. Warner and Tavoulareas respectfully decline the invitation which you have extended to them. The reasons for that action are set forth below.

As you are aware, this whole matter is the subject of litigation in a private libel action brought by Mr. Tavoulareas and his son against the Washington Post arising out of two articles which appeared in that publication in the latter part of 1979. The subject matter of one of those articles was a letter dated November 20, 1979, addressed by you in your then capacity as Chairman of the Subcommittee on Energy and Power of the Committee on Interstate and Foreign Commerce, to the Chairman of the Securities Exchange Commission demanding an investigation of this matter.

The libel action was commenced in the fall of 1980, has been in the discovery stage and is now scheduled to go to trial this summer. Deposition testimony of certain of your subcommittee staff members has been taken and, pursuant to a discovery program outlined some time ago to Federal District Judge Gasch before whom the case is pending, your deposition has been noticed. At the same time, a deposition of Mr. Tavoulareas is now scheduled for Thursday, February 11, two days after the Subcommittee's hearing date.

Against this background, I have advised Messrs. Warner and Tavoulareas that it would be inappropriate for them to appear voluntarily at this time in a public forum as witnesses regarding this subject because this whole matter in all its detail is now pending before a Federal District Court in the District of Columbia.

As you know, your role and that of the Subcommittee staff in this matter has been the subject of lengthy correspondence between you and Mr. Tavoulareas. Attached is a copy of a letter dated January 11, 1982, from Mr. Tavoulareas to you, which summarizes the substance of this correspondence and the matters in dispute. This letter was

mailed to you on January 12, and Mr. Warner and Mr. Tavoulareas were informed of these proposed hearings late on the afternoon of January 15.

For the foregoing reasons, Mr. Warner and Mr. Tavoulareas respectfully decline the Subcommittee's invitation to appear and testify at this time.

As a matter of fact, one could ask whether it is necessary to hold any hearings on this matter. You will recall that in a meeting with Mr. Tavoulareas, Mr. Schmertz and me, you told us that you had sent your letter to the SEC, asking them to initiate an investigation because you did not feel that your committee should take this matter up; that it was a matter which was better left to the SEC to investigate.

You should be aware that the SEC spent eighteen months on this matter, took testimony from more than a score of witnesses, examined voluminous documents, and caused the government, Mobil Mr. Tavoulareas and others to make substantial expenditures.

The result of the SEC investigation was a detailed report which disclosed no impropriety on the part of either Mobil or Mr. Tavoulareas and a decision by the SEC that no disclosure or other action of any kind should be required of either Mobil or Mr. Tavoulareas.

While we recognize that Congress exercises legislative oversight over such such agencies as the SEC, it is difficult in the light of the extent of the SEC's investigation and its conclusions to perceive the public interest in a further investigation of the matter by the Subcommittee. This is particularly so in view of your recent statements regarding the vast number of important national issues which the Committee is going to have to address in the next several months.

If the hearings are nevertheless held, I request (1) that copies of this letter and its attachment be distributed to the members of your Subcommittee and that it be included in the record of the hearings; and (2) that Mobil be permitted to file a written statement for inclusion in the record of the hearings addressing the question of the adequacy of the related party transaction rules of the SEC as they apply to the Mobil/Tavoulareas/Atlas relationship. Furthermore, if the Committee wishes a live witness from Mobil, let me reiterate that I would be available and pleased to appear as the most knowledgeable person at Mobil both on the subject of the related party transaction rules and the SEC's investigation of this matter.

Very truly yours,

GEORGE A. BIRRELL.

MOBIL OIL CORP.,
New York, N.Y., January 11, 1982.

Hon. JOHN D. DINGELL,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN DINGELL: After the first reading of your letter of December 18, I was confused beyond words. But after rereading your letter, I can see that its purpose must be more devious. You go out of your way to avoid addressing the essential points raised in my November 20, 1981 letter, or seem to be attempting to rewrite history. In fact, the letter appears to have been written to confuse third parties who may read it, but do not have all the facts available. (In this regard, you mention reporters from the Times and the Wall Street Journal having made inquiries—perhaps it was written with such an audience in mind.) In any event, my attorneys will have a chance to find out what you were trying to say when they depose you in the near future as a witness in my case. I can only hope that you will not use all possible legal subterfuges, such as congressional immunity, to avoid testifying fully as to the facts—as has been the case when the members of your staff were deposed.

As you well know, these difficulties began when you made charges against me in a letter to the SEC on November 20, 1979. The SEC has now investigated all those charges and, as you know, has taken no action. However, in the process I have learned a great deal; and it is relevant to restate the charges which I have not made against you, and which you have still not answered:

1. You know that in November 1979 your Mr. Stockton leaked to Pat Tyler of the Washington Post the material you sent to the Securities Exchange Commission.

2. You knew this well before sending your letter of March 5, 1980. Yet, that letter claimed any disclosure to the Post was not by any of your staff members.

3. You knowingly allowed Mr. Brand, Counsel to the House of Representatives, to present false information to a Federal Judge, or made no attempt to correct Mr. Brand's false representation when you learned of it after the fact.

4. You made false and libelous statements in your letter of November 20, 1979, to Harold M. Williams, then Chairman of the Securities Exchange Commission, and you continue to claim your statements in that letter to be true, even though you and the SEC have evidence to the contrary.

5. You have allowed, if not encouraged, a staff member to provide confidential government information to the Washington Post for purpose of gaining, according to the New York Times, "publicity for a potential subcommittee inquiry into the Tavoulareases' business relationships."

6. You have knowingly allowed, if not encouraged, a member of your staff to engage in potential conflicts of interest by working for your Committee and, at the same time, working for two television networks. The purpose of his television work, according to the individual, was to redress his outrage "* * * about a bunch of issues here in Washington."

Mr. Dingell, let us be clear on one thing. You and your staff are now the accused. These are serious charges which your position requires you to answer. I challenge you to waive your congressional immunity and answer each one of these issues. Let me discuss each of these issues more fully:
